Students intending to practice in Quebec should especially note the requirements of the Official Language Act of the Province of Quebec. This has the aim of encouraging the use of French and making French the language of work. It requires that all professionals registering after 1975 be capable of dealing with the public in French. The university provides numerous courses in French at a variety of levels and aimed at a variety of needs. The course lists of the French Language Centre and the Department of French Language and Literature should be consulted by students interested in furthering their knowledge of French. Students must contact the Centre or Department before registering for their courses.

4.3 STUDENT PROGRESS

The session is divided into two semesters with examinations and the evaluation of student progress at the end of each. The course promotion system is employed. Students are allocated a letter grade for each course taken. Their grade point average is computed as described below from a combination of the grade and the credit assigned to a course.

The language of instruction is English, but students may write examinations, reports and essays in French.

An examiner may permit the use of electronic calculators in his examination. In this event, it is the examiner's responsibility to see that no undue advantage accrues to the student possessing such a calculator. Only battery operated calculators are

permitted in examinations. Power supplies cannot be provided and it is the student's responsibility to see that the batteries are adequate. Noisy calculators, such as mechanical and electro-mechanical types, are not permitted.

Letter Grades

A	Very Good
B	Good
C	Satisfactory
D	Conditional Pass
F	Failed
K	Incomplete
KF	Incomplete (failed)
L	Deferred

Grades A, B and C are permanent grades clearly indicating satisfactory results. Grade D is a permanent grade indicating marginal results which may be acceptable for peripheral courses but not for core courses required by the program. The classification of a course as core or peripheral depends on the individual student's program and will be decided by his department. Grade F is a permanent grade indicating unsatisfactory results. In addition, a student may be assigned categories K, KF and L. Category KF indicates a temporary deficiency which the student must clear in order to receive credit. Categories K and L do not influence grade point average. K indicates a delay granted in completion of the course and L indicates a deferred grade because of medical or other valid reasons.

Course Credit

The credit assigned to a particular course reflects the amount of effort it demands of the student. One credit normally represents three hours total work per week. This is in general a combination of lecture hours, other contact hours such as laboratory periods, tutorials and problem periods and personal study. As a guide the average division of time for a course is indicated in hours in the course listing after the course credit. For example 3(3-0-6) indicates a credit of three units consisting of three lecture hours per week, no other contact hours and six hours of personal study per week.

Grade Point Averages

Letter grades are assigned grade points according to the scheme A = 4, B = 3, C = 2, D = 1, F = 0, KF = 0. Categories K and L are excluded from the calculation of the grade point average which is defined by the ratio

$$\frac{\Sigma \text{ (course credit x grade points)}}{\Sigma \text{ course credits}}$$

Summation over all courses taken in one semester gives the semestrial grade point average (SGPA) while summation over all courses taken since entry into the program gives the cumulative grade point average (CGPA). All results are included when courses are taken more than once. Any courses taken which lie outside the program are classified as extra and do not affect the grade point average.

Standings

A student's standing is based on his CGPA according to the following criteria.

Satisfactory standing:
2.00 or better

Probationary standing:
1.20 - 1.99 first semester
1.50 - 1.99 subsequent semesters

Unsatisfactory standing:
less than 1.2 first semester
less than 1.5 subsequent semesters

Candidates in satisfactory standing may proceed with the following conditions:

(i) All core courses in which D or F grades were obtained must either be repeated successfully (grades A, B or C) or be replaced by an alternative approved course which is completed successfully.

(ii) All other courses in which F grades were obtained must either be repeated (grades A, B, C or D) at some point before graduation or be replaced by some alternative approved course which is completed successfully before graduation.

Candidates in probationary standing may proceed for one semester under the same conditions noted above but, in addition, must reduce their load to a maximum of 13 credits per semester and must achieve at the end of the semester either a CGPA of 2.00 or better or an SGPA of 2.5 or better. A student whose SGPA is 2.5 or better but whose CGPA is less than 2.00 may continue on probationary standing.

Candidates with unsatisfactory standing must withdraw for at least one semester, after which they may be considered for readmission by the Committee on Standings.

REPEATED COURSES

A student who fails to achieve the required results in a course must successfully repeat either it or a substitute course approved by his department.

For students who fail prerequisite courses which are offered formally in only one semester, the departments responsible may, in appropriate cases, arrange 'reading courses' during the other semester or during the summer months. Such courses taken during a regular semester constitute a normal part of the candidate's work load which must be reduced correspondingly in the rest of its content.

Reread of Examinations

A student may request the reread of an examination by applying in writing to the Associate Dean of Student Affairs within three months of the date of the examination. Payment of the $10 reread fee must be enclosed with the application. If the grade is improved as a result of the reread the fee is refunded. If a lower mark is given, it will replace the original mark.

4.4 COURSE NUMBERING SYSTEM

Detailed curricula are listed in the next section under the appropriate school or department. In each case, the courses are grouped under four categories which are common to all programs:

(1) required courses in subjects taught outside the department
(2) required courses in subjects taught inside the department
(3) elective courses in technical subjects to be selected according to rules which vary somewhat from department to department, and
(4) elective courses of a general nature which permit the student to extend his education in areas of relevant personal interest.

A core program comprises all required courses. The course numbers indicate the department of origin by the first three digits as follows:

Science Departments

180 - Chemistry
186 - Geology
189 - Mathematics
198 - Physics

Engineering Departments

300 - Faculty (non-departmental)

301 - Architecture

302 - Chemical Engineering

303 - Civil Engineering and Applied Mechanics

304 - Electrical Engineering

305 - Mechanical Engineering

306 - Mining and Metallurgical Engineering and Applied Geophysics

308 - Computer Science

The fourth digit indicates the level of the course. Courses numbered 0XX and 1XX are normally taken in the first year of studies. Courses numbered 2XX are normally taken in the second year of studies. Courses numbered 3XX are normally taken in the second or third year of studies. Courses numbered 4XX are normally taken in the third year of studies.

The terminal letters indicate the semester(s) in which the courses are given, i.e. A - Fall, B - Winter, C - Summer, D- Fall and Winter, F - An assignment or project accomplished in the summer but reported in the Fall.

Where asterisks appear with a prerequisite, they have the following significance:

* a D grade is acceptable for prerequisite purposes

** under special circumstances, the Department may permit this course to be taken as a co-requisite.

The curricula and courses described in the following pages have been approved for the 1975/76 session but the Faculty reserves the right to introduce changes as may be deemed necessary or desirable.

5 ACADEMIC PROGRAMS

5.1 THE FACULTY OF ENGINEERING

Dean
Gerald W. Farnell, S.M.(M.I.T.), Ph.D.(McG.), F.I.E.E.E.

Associate Deans
Academic Student Affairs
William Bruce, M.A.Sc.(Tor.), M.E.I.C., M.A.S.M.E.
Planning and Development
Tomas J.F. Pavlasek, M.Eng., Ph.D.(McG.), M.E.I.C., S.M.I.E.E.E.

Associate Professor of Engineering Practice
John T. Woolsey, B.A.Sc.(Tor.), M.A.(Sir G.Wms.), M.E.I.C.

Special Lecturer in Engineering Law
Nat Salomon, B.A., B.C.L.(McG.)

A number of faculty courses are offered. These courses are elective and are of a more general nature than the departmental courses.

300-010A,B ENGINEERING ECONOMY 3(3-0-6). Basic concepts of accounting. Interpretation of financial statements. Mathematics of finance. Techniques for decision making on the acquisition and disposal of capital assets. (Rates of return, uncertainties, risk, retirement and replacement, valuations, leasing, benefit/cost, optimum levels of investment.) Textbook: To be announced.
Professor Woolsey

300-011A ECONOMIC ENVIRONMENT 3(3-0-6). Theory of prices. Theory of the firm. Public finance. The banking system. National income. Employment. Labour relations. Inflation. Poverty. Economic growth. Regional economic problems. Engineering applications of macro-economics. Influence of micro-economics on engneering decisions. Students who have taken a course in general economics at college level cannot take 300-011A for credit. Textbook: To be announced.
Professor Woolsey

300-112B MANAGEMENT 3(3-0-6) *Prerequisites:* 300-010A,B**, 300-011A or equivalent. The application of science to management. Coordination of the operations of the business enterprise through planning, organizing, staffing, directing and controlling. Management systems. Textbook: Koontz & O'Donnell. Essentials of Management 1974 (McGraw-Hill).
Professor Woolsey

300-020A ENGINEERING LAW 2(2-0-4). Definition of law; different branches of law; distinction between civil and criminal law and between civil and common law; statutes, orders in council, and by-laws; Canadian constitutional law and organization of courts; civil law including marriage, tutorship, minority, and interdiction, types of property, rights of ownership, successions, wills and succession duties, expropriation, servitudes, obligations, responsibility for negligence, Workmen's Compensation Act, privileges, hypothecs, registration, prescription, marriage contracts and rights of women, sale, lease and hire, mandate, engineering and architectural contracts. Responsibility of architect and builder; organization of engineering and architectural professions; patents, trademarks, industrial design and copyright; partnership and companies; mining; railways; expert evidence and evidence generally.
Mr. N. Salomon

300-030A ENVIRONMENTAL ASPECTS OF TECHNOLOGY 3(3-0-6). Modern society depends for its effective functioning on technology, much of which has far-reaching implications for our environment. The course gives a general view of our technological requirements, discusses potential problem areas and reviews measures for their alleviation. It commences with a general discussion of the urban environment indicating our needs for space, energy and communications. The factors governing energy production are then considered followed by a discussion of transportation systems, vehicles and noise. A survey of our needs for pure water and potential supplies leads to consideration of waste disposal. The public health aspects of water and air pollution are discussed. Finally the application of systems engineering to the whole problem is reviewed.

The course is suitable for U1 level engineering and science students but consideration will be given to admitting any student with a collegial level science background.

The course is taught by a team of professors expert in the particular fields. Grading is on the basis of two short papers and one medium length paper. Enrolment is limited.

5.2 SCHOOL OF ARCHITECTURE

Director
Norbert Schoenauer, M.Arch,(McG.), M.I.T.I.C., M.T.T.I.C., C.U.Q.

Associate Director
Derek Drummond, B.Arch.(McG.)

Professors
John Bland, B.Arch.(McG.), A.M.T.P.I. (Lond.), F.R.A.I.C., A.R.I.B.A.
Peter Collins, Dipl.Arch.(Leeds), M.A.(Manc.) L.L.M.(Qu.)
Norbert Schoenauer, M.Arch.(McG.), M.I.T.I.C., M.T.T.I.C., C.U.Q.
Stuart Wilson, B.Arch.(McG.)

Visiting Professors
Raymond Affleck
Thomas Blood
Dimitri Dimakopoulos
Fred Lebensold
Andrew Vecsei

Associate Professors
Bruce Anderson, B.Arch.(McG.), M.Arch.(Harv.)
Joseph Baker, B.A.(Manc.)
Derek Drummond, B.Arch.(McG.)
David Farley, B.Arch.(McG.), M.C.P., M.Arch.(Harv.)
Brian McCloskey, B.Arch.(McG.), M.Arch. (Harv.)
John Schreiber, B.Sc.(Arch.)(Glas.), M.L.A. (Harv.)
Radoslav Zuk, B.Arch(McG.) M.Arch.(Mass.)

Assistant Professors
Witold Rybczynaski, B.Arch., M.Arch.(McG.)

Sessional Lecturers
David Bourke, B.Arch.(McG.), M.Arch. (Harv.), F.R.A.I.C., R.C.A.
Leslie Doelle, M.Arch. (McG.)

Roy LeMoyne, B.Arch.(McG.)
Seymour Levine, B.Eng., M.Eng.,(McG.)
Harry Mayerovitch, B.A., B.Arch.(McG.)
Arthur Mendel, B.Eng.(McG.)
Gentile Tondino

Part-time Lecturers

Bruce Allan, B.Sc.(Arch.), B.Arch. (McG.)
Timothy Grosvenor, B.Arch.(McG.), M.Arch. (Harv.)
Pieter Sijpkes, B.Sc.(Arch.), B.Arch.(McG.)
Ronald Williams, B.Arch.(McG.)

The McGill architectural program is divided into two parts. The first leads to a non-professional degree Bachelor of Science (Architecture), as a preparation for activities related to architecture or a first and basic stage in professional architectural education. The second, consisting of a minimum of two semesters for those with the McGill B.Sc.(Arch.), leads to the professional degree Bachelor of Architecture which has long been recognized by the Order of Architects of Quebec and the Royal Institute of British Architects as representing completion of their educational requirements for membership. The Bachelor of Architecture degree is also recognized by the Commonwealth Association of Architects. Candidates in the first part of the program who plan to go to the professional degree must follow the series of required and elective courses stipulated for professional studies and achieve an acceptable standing both in Design and Construction courses and in their cumulative grade point average. Students commencing their studies in 1975 and subsequently applying to the B.Arch. program must also have had a total of six months related professional experience. Other students who intend to enter activities related to architecture may make appropriate substitutions for certain of the required courses in order to improve their preparation for studies in associated areas.

Ancillary Academic Facilities

Laboratories

The Architectural Workshops — see course 301-320A, Design and Construction I and course 301-421B, Design and Construction II.

The Communications Laboratory — see course 301-010A, Communication, Behaviour and Architecture and course 301-424B Design and Construction V.

Collections

The Blackader Library, housing the architecture collection, is under the supervision of Mrs. Eva Doelle. The slide collection is maintained by Mme Johanne Bellefleur-Arsenault under the direction of Professor Peter Collins.

CURRICULUM FOR THE B.Sc.(Arch.) DEGREE

Required Courses		Course Credit
NON–DEPARTMENTAL SUBJECTS		
303-055A,B	Mechanics I	4
* 303-089A	Building Materials	2
303-109B	Surveying	3
303-183B	Strength of Materials	4
* 303-284A	Soil Mechanics and Foundations	2
* 303-285A	Structural Steel Design	2
* 303-288B	Reinforced Concrete Design	2
* 303-392A	Structures	2
308-070A,B	Computers and Architecture	2
ARCHITECTURAL SUBJECTS		
301-001A	History of Architectural Theory I	3
301-010A	Communication, Behaviour and Architecture	6
301-012A	Freehand Drawing I	1
301-102B	History of Architectural Theory II	3
301-111B	Architectural Graphics and Design Elements	6
301-113B	Freehand Drawing II	1
301-214A	Freehand Drawing III	1
301-216F	Sketching School I	1

301-250F	Summer Project I	1		
301-315B	Freehand Drawing IV	1		
301-320A	Design and Construction I	6		
301-421B	Design and Construction II	6		
301-422A	Design and Construction III	6		
301-441B	Mechanical Services	2		
301-442A	Electrical Services	2		
301-443B	Environmental Acoustics	2		
301-451F	Summer Project II	1		
One of				
301-423B	Design and Construction IV	6		
301-424B	Design and Construction V	6	6	55
301-426B	Design and Construction VII	6		

*Candidates intending not to proceed to the B.Arch. degree may substitute other courses of equal total weight for any of these.

ELECTIVE COURSES

To be selected from those offered by the School (listed below) and/or a sequence of approved courses from other departments.

ARCHITECTURAL ELECTIVES

301-203A	The Evolution of Standardization in Urban Spaces	2
301-204B	History of Architecture in Canada	2
301-205A	History of Housing	2
301-230B	Landscape	2
301-232A	Structure of Cities	2
301-235A	Site Usage	2
301-239C	Summer Course in Europe	2
301-407A	Seminar on Architectural Judgement	2
301-408A,B	Seminar on Architectural Theory in the 20th Century	2
301-409B	Seminar on Legal Aspects of Environmental Control	2
301-420B	Geometry, Architecture and Environment	2
301-431A	Civic Design	2
301-561B	Architectural Theory of the Italian Renaissance	2

Courses Offered by the School

Elective courses are indicated by the symbol •

301-001A HISTORY OF ARCHITECTURAL THEORY I 3(3-0-6). An introduction to the study of architectural ideas.
Professor Collins

301-010A COMMUNICATION, BEHAVIOUR AND ARCHITECTURE 6(2-10-6). Design in relation to human communication and behaviour. Visual perception and architectural expression. Techniques of visual communication and graphic design. Modelling with wet materials. Shaping and forming dry materials. Models. Photographic methods of designing and recording. Basic printing methods including silkscreen. Orthographic projection, sketching and architectural drawing.

The Communications Laboratory, including the Photo Lab, is under the direction of Professor Bruce Anderson assisted by Barry Murphy, Technician.
Professor Anderson

301-012A FREEHAND DRAWING I 1(0-3-0). Drawing in pencil and charcoal.
Mr. Tondino

301-102B HISTORY OF ARCHITECTURAL THEORY II 3(3-0-6). (Prerequisite: 301-001A*.) A study of architectural ideals of the present century and of the technical and sociological developments which affected them.
Professor Collins

301-111B ARCHITECTURAL GRAPHICS AND ELEMENTS OF DESIGN 6(2-10-6). (Prerequisite: 301-010A.) Orthographic projections, measured drawings, perspective and other conventional representations of architectural elements with reference to their spatial qualities, effects of light, colour and texture. Diagrams and lettering.
Professor Drummond

301-113B FREEHAND DRAWING II 1(0-3-0). (Prerequisite: 301-012A*.) A continuation of course 301-012A.
Mr. Tondino

• **301-203A THE EVOLUTION OF STANDARDIZATION IN URBAN SPACES 2(2-0-4).** Prere quisite: 301-102B.) A historical survey of tectonic theories related to the creation of orderly urban environments in the 16th, 17th and 18th centuries; the theories of standardization as applied to the classical "Orders" and their relevance to standardized building components today.
Professor Collins

• **301-204B HISTORY OF ARCHITECTURE IN CANADA 2(2-0-4).** (Prerequisite: 301-102B.) French, British and American influences in the Maritime Provinces, Quebec and Ontario.
Professor Bland

• **301-205A HISTORY OF HOUSING 2(2-2-2).** (Prerequisite: 301-102B.) Indigenous housing both transient and permanent, from the standpoint of individual structure and pattern of settlements. The principal historic examples of houses including housing in the age of the industrial revolution and contemporary housing.
Professor Schoenauer

301-206B PHILOSOPHY OF STRUCTURE 2(2-0-4). (Prerequisite: Satisfactory completion of courses in the Civil Engineering program totalling 45 credits.) An inquiry into the principles and factors underlying the development and forms of structures, natural and man-made, and the application of these principles to current design problems.
Mr. Mayerovitch

301-214A FREEHAND DRAWING III 1(0-3-0). (Prerequisite: 301-113B*.) A continuation of course 301-113B.
Mr. Tondino

301-216F SKETCHING SCHOOL I 1. (Prerequisite: 301-113B.) A ten day supervised field trip in the late summer to sketch places or things having specific visual characteristics. Students are required to include Sketching School in the B. Sc.(Arch.) program.
Professor Wilson & Mr. Tondino

• **301-230B LANDSCAPE 2(2-2-2).** (Prerequisite: 301-102B.) Land form, plant life, microclimate; land use and land preservation; elements and methods of landscape design.
Professor Schreiber

• **301-232A STRUCTURE OF CITIES 2(2-2-2).** (Prerequisite: 301-102B.) Historical and analytical review of cities and the social, economic, physical and political factors that have determined their location, form, growth or decline.
Professor Bland

• **301-235A SITE USAGE 2(2-2-2).** (Prerequisite: 301-111B.) Arrangement of building developments on the land. Composite patterns resulting from site planning decisions. Scale and distribution of open space. Utilization of space; relationship of private to public domain; spatial determinism and its effect on interaction and development; qualities of interaction and development; qualities of street-scale open space. Site conditions and restrictions. Site engineering, building layout, drainage and services. Regulatory mechanism; incentive and mandatory controls.
Professor Drummond

• **301-239C SUMMER COURSE IN EUROPE,** (4 credits, Prerequisite: 301-203A.) An eight week course consisting of a three week environmental design project supervised at an English university, a three week sequence of organized visits to buildings in Paris already studied in courses 301-102 and 203, and two research projects for which individual written reports must be submitted.
Professor Collins

301-250F SUMMER PROJECT I. 1. (Prerequisite: 301-111B.) These projects are assigned by staff members before the end of the session after discussion with the students in terms of objectives, techniques, etc.
Professors Wilson & McCloskey

301-315B FREEHAND DRAWING IV 1(0-3-0). (Prerequsite: 301-214A*.) A continuation of course 301-214A.
Mr. Tondino

301-317F SKETCHING SCHOOL II 1. (Prerequisite: 301-216F.) Students are required to include Sketching School II in the B.Arch. program.
Professor Wilson & Mr. Tondino

• **301-318B FREEHAND DRAWING AND SKETCHING 1(0-3-0)9** (Prerequisite: 301-216F.) Drawing and sketching in pencil, charcoal and other media both in the studio and out-of-doors.
Mr. Tondino

301-320A DESIGN AND CONSTRUCTION I 6(2-10-6). (Prerequisite: 301-111B.) A study of man's need for shelter and for humane environmental amenities. The characteristics of modern building materials and techniques of construction on open sites. Methods of building durable, agreeable and purposeful structures. Design methodology. Aspects of ecology related to architectural design.

The Architectural Workshop is under the direction of Professor Stuart Wilson assisted by Gabriel Deveault and Raymond Rondeau, Technicians.
Professors Wilson & McCloskey

• **301-407A SEMINAR ON ARCHITECTURAL JUDGEMENT 2(2-0-4).** (Prerequisite: 301-4213*.) The investigation, by means of analogies with the judicial process in Law, of the criteria of architectural judgement.
Professor Collins

• **301-408A,B SEMINAR ON ARCHITECTURAL THEORY IN THE 20TH CENTURY 2(2-0-4).** (Prerequisite: 301-421B.) Seminar to allow specific modern architectural problems of design to be studied in detail.
Professors Bland & Zuk

• **301-409B SEMINAR ON LEGAL ASPECTS OF ENVIRONMENTAL CONTROL 2(2-0-4).** (Prerequisite: 301-407A.) A survey of those aspects of Canadian law which can protect or beneficially modify the environment in the interests of the community. Maximum of 12 students with preference given to students in architecture.
Professor Collins

301-420B GEOMETRY, ARCHITECTURE AND THE ENVIRONMENT 2(2-2-2). Geometry in the formal structure of design. Regular, semi-regular and partly irregular nets or grids, lattices, polygons and polyhedra. Evidence of the presence of these figures and structures in natural objects and natural phenomena. Graphical and physical models. Application to architecture and the human environment.
Professor Wilson

301-421B DESIGN AND CONSTRUCTION II 6(2-10-6). (Prerequisite: 301-320A.) Instruction in the design of buildings with particular emphasis on considerations of construction, structural adequacy, weather and fire resistance, building codes and industrialized building systems. Working drawings and models.

The Architectural Workshop is under the direction of Professor Stuart Wilson assisted by Gabriel Deveault and Raymond Rondeau, Technicians.
Professors Wilson & McCloskey

301-422A DESIGN AND CONSTRUCTION III 6(2-10-6). (Prerequisite: 301-421B.) A more developed study of the process of forming an architectural concept involving considerations of purpose, site, desirable spatial relationships, efficient lines of movement, appropriate choice of material, structure and methods of construction, all related to judgements concerning appearance, economy and human relevance. Diagrammatic plans, sections and rough models.
Professors Baker & Zuk

301-423B DESIGN AND CONSTRUCTION IV 6(2-10-6). (Prerequisite: 301-422A.) A detailed study of the development of an architectural proposal for a comprehensive building involving a coherent initial concept and subsequent decisions as to the means of fulfilling the requirements skillfully and economically. Preliminary working drawings.
Professor Bland

301-424B DESIGN AND CONSTRUCTION V 6(2-10-6). (Prerequisite: 301-422A. A detailed study of the function and structure of the urban environment, including surveys of selected urban areas by recording and analysing specific environmental factors. Architectural and urban design with specific reference to their social implications. Urban renewal and rehabilitation by means of systematic design methods. Techniques of instructional publicity including documentary film-making.

The Communications Laboratory, including the Photo Lab, is under the direction of Professor Bruce Anderson assisted by Barry Murphy, Technician.
Professor Anderson

301-425A,B DESIGN AND CONSTRUCTION VI 7(2-12-7). (Prerequisite: 301-423B or 301-424B.) A detailed study of the organization of multiple units in a problem involving the repetition of elements with appropriately integrated functional, structural and mechanical systems. Principles of problem analysis, programming, site planning, legal considerations, structural possibilities, feasibility and cost studies.
Professor Schoenauer & Visitors

301-426B DESIGN AND CONSTRUCTION VII 6(2-10-6). (Prerequisite: 301-422A.) A study of exceptional problems of architectural design in terms of community needs but always involving specific environmental modifications of an actual place to achieve some physical or social betterment.
Professor Baker

301-427A,B DESIGN AND CONSTRUCTION VIII 7(2-12-7). (Prerequisite: 201-423B or 301-424B.) A study of complex environmental problems involving conflicting requirements, severe restraints, optimization, adaptability to growth and change, and the integration of building systems. Development of systematic design methods leading to a comprehensive environmental form.
Professor Zuk & Visitors

• **301-431A CIVIC DESIGN 2(2-2-2).** (Prerequisite: 301-421B.) The elements of form in buildings and their siting: design in the urban setting.
Professor Drummond

301-433A URBAN PLANNING I 2(2-2-2). (Prerequisite: 301-423B or 301-424B.) Theory and practice. An examination of different basic approaches to urban planning with examples.
Professor Farley

301-434B URBAN PLANNING II 2(2-2-2). (Prerequisite: 301-433A.) Theory and practice seminar. Detailed analysis of selected examples of the urban planning process, recent and from the past. Each student will be expected to prepare and present a case study.
Professor Morris Charney

301-441B MECHANICAL SERVICES IN BUILDING 2(2-2-2). (Prerequisite: 301-421B.) Problems encountered in providing mechanical services in buildings. Physiological and environmental aspects of heat, ventilation and air conditions, estimation of heating and cooling loads and selection and specification of equipment. Sprinkler Systems and plumbing. Construction problems produced by installation of this equipment.
Mr. Levine

301-442A ELECTRICAL SERVICES 2(2-2-2). (Prerequisite: 301-421B.) Production, measurement and control of light; design of lighting systems; electrical distribution in residential and commercial buildings; Canadian Electrical Code.
Mr. Mendel

301-443B ENVIRONMENTAL ACOUSTICS 2(2-2-2). (Prerequisite: 301-421B.) Significance of acoustics in architectural design, and in environmental control of buildings. Acoustical requirements in the design of auditoria such as theatres, lecture halls, opera houses, concert halls, churches, motion picture theatres, studios, etc. Principles of noise and vibration control, sound insulating in building construction. Control of mechanical noises and vibrations. Practical noise control in various types of buildings.
Mr. Doelle

301-444A PROFESSIONAL PRACTICE 2(2-2-2). (Prerequisite: 301-423B or 301-424B.) The architect's relationship to his client; responsibility; business conduct; supervision; arbitration; issuing of certificates; competitions; standard forms of contracts; payment; liens; servitudes; public health; building regulations; fees.
Mr. LeMoyne

301-445B SPECIFICATIONS 2(2-2-2). (Prerequisite: 301-423B or 301-424B.) Principles of writing architectural specifications; discussion of actual specifications; essays on common building materials and construction practices; practice in specifying for common trades.
Mr. LeMoyne

301-451F SUMMER PROJECT II 1. (Prerequisite: 301-421B.) See course 301-250F.
Professor Bland

301-452F SUMMER PROJECT III. (Prerequisites: 301-423B or 301-424B.) See course 301-250F.
Professor Baker

• **301-561B ARCHITECTURAL THEORY OF THE ITALIAN RENAISSANCE 2(2-0-4).** (Prerequisite: 301-102B with "B" grade minimum or equivalent.) An optional seminar course available to 2nd or 3rd year students who have demonstrated above-average ability in architectural history and theory. Participants would be required, within a framework of lecture courses given at the beginning of the semester, to prepare papers for discussion based on research in the Blackader Library or in other libraries.
Professor Collins

5.3 DEPARTMENT OF CHEMICAL ENGINEERING

Chairman
G.A. Ratcliff, B.A., M.A.(Cantab.), Ph.D. (Cornell)

Professors
J.M. Dealy, B.Sc.(Kansas), Ph.D.(Mich.)
W.J.M. Douglas, B.Sc.(Qu.), Ph.D.(Mich.)
M.R. Kamal, B.Sc.(Ill.), Ph.D.(Carnegie-Mellon)
G.A. Ratcliff, B.A., M.A.(Cantab.), Ph.D. (Cornell)

Associate Professors
T.J. Boyle, Sc.M., Sc.D.(M.I.T.)
R. Clift, B.A., M.A.(Cantab.), Ph.D.(McG.)
O.M. Fuller, B.Ch.E., Ph.D.(Georgia Inst. Tech.)
J.R. Grace, B.E.Sc.(W. Ont.), Ph.D.(Cantab.)
M.E. Weber, B.S.E.(Prin.), Sc.D.(M.I.T.)

Assistant Professors
J.M. Charrier, Ph.D.(Akron)
B. Volesky, Ph.D.(W.Ont.)

Special Lecturers
M. Avedesian, Ph.D.(Cantab.)
N.E. Cooke, Sc.D.(M.I.T.)
F.El Hosseiny, Ph.D.(Leeds)
R. Levesque, M.B.A.(Sir G.Wms.)
A. Rudzinski, M.Sc.(Danzig)

Senior Research Associate
W.H. Gauvin, B.Eng., M.Eng., Ph.D.(McG.)

Research Associates
A.S. Mujumdar, B.Ch.E.(Bombay), Ph.D.(McG.)
J. Brunet, B.Sc.(Montr.),M.Sc., Ph.D.(Florida)
E.J. Farkas, B.S.E.(Prin.), Sc.D.(M.I.T.)
J. Vera, Ph.D.(Santa Maria)

Associate Members
H.L. Goldsmith (Experimental Medicine), B.Sc., M.A.(Oxon.), Ph.D.(McG.)
J.L. Neal (Paediatrics), M.S.(Yale.), Ph.D.(McG.)

Chemical Engineering

The central purpose of engineering is to pursue solutions to technological problems in order to satisfy the needs and desires of society. Chemical engineers are trained to solve the kinds of problems that are typically found in the "chemical process industries", which include the chemical manufacturing, plastics, pulp and paper, petroleum refining, and paint industries as well as substantial portions of the food processing, textile, nuclear energy, and pharmaceutical industries. The technological problems and opportunities in these industries are often closely linked to social and economic questions. For this reason, practitioners of chemical engineering often deal with these questions when they are working in management, pollution abatement, product development, marketing and equipment design.

The chemical engineering curriculum begins with a study of those aspects of chemistry, physics, and mathematics that are basic to a quantitative understanding of the process industries. Courses on the technical operations and economics of the process industries are added to this foundation. The core curriculum concludes with a course on cases from engineering practice, process design courses taught by practicing design engineers and a research projects course. Several courses are given in a modular, student-paced format that has proved to be both effective and popular with students. Problem-solving, experimenting, planning, and communicating skills are emphasized in courses distributed through the core curriculum.

By means of elective courses, students can also obtain breadth or depth in bodies of knowledge that are not taught in chemical engineering courses. Management, chemistry, metallurgical engineering, mechanical engineering, computer science, and the social sciences are popular choices among today's students. Chemical engineering can form a useful part of a larger educational program that continues with studies in business administration, law, and medicine. The versatility of chemical engineering graduates is a strength that is much appreciated by employers in industry and government.

ACADEMIC PROGRAM

The chemical engineering program comprises 94 credits as outlined below. Students who have passed Chemistry 202 at the CEGEP level are exempt from course 180-212 (Introductory Organic Chemistry I) but still must obtain 94 credits in total, i.e. 4 credits are transferred from required courses to free electives. Similarly, students who have passed Chemistry 301 at the CEGEP level are exempt from course 180-213 (Introductory Physical Chemistry I) and have 3 credits transferred to their general elective requirements.

Students must obtain C grades in all core courses. For the Department of Chemical Engineering, core courses include all required courses (departmental and non-departmental) as well as restricted electives. A "D" grade is satisfactory only for general elective courses.

The required courses taken must, in the first instance, be those listed below. The department does not sanction "reading courses" except in exceptional circumstances. Where a course which is nearly equivalent is available elsewhere in the Faculty, students who received a "D" in a Chemical Engineering course may take the "equivalent" course the second time around. These "equivalent" courses are:

Subject	Chem. Eng. Course	Equivalent Course
Fluid Mechanics	302-131B	305-230A,303-211B
Heat Transfer	302-211A	305-246A,B
Thermodynamics I	302-021A	305-040A, 305-012A
Process Control	302-371B	305-317A

Where the number of credits for the equivalent course differs from the number in the department course, the difference must be made up in general elective credits (i.e. the total program still includes a minimum of 94 credits).

CURRICULUM FOR THE B.ENG. DEGREE IN CHEMICAL ENGINEERING

Required Courses		Course Credit	
NON–DEPARTMENTAL COURSES			
180-212A,B	Introductory Organic Chemistry I	4	
180-213A,B	Introductory Physical Chemistry I	3	
180-250B	Selected Topics in Organic and Physical Chemistry	3	
189-261A	Linear Algebra and Differential Equations I	3	
189-262B	Linear Algebra and Differential Equations II	3	
189-263A	Advanced Calculus	3	
189-264B	Introduction to Boundary Value Problems	3	
308-080A	Computers in Engineering	2	24
CHEMICAL ENGINEERING COURSES			
302-001A	Chemical Process Principles I	4	
302-021A	Chemical Engineering Thermodynamics I	3	
302-097A	Technical Paper I	1	
302-122B	Chemical Engineering Thermodynamics II	3	
302-131B	Fluid Mechanics	4	
302-191B	Instrumental Measurements Laboratory	2	
302-198A	Technical Paper II	1	
302-202B	Chemical Process Principles II	3	
302-211A	Heat Transfer	4	
302-212B	Mass Transfer	3	
302-241A	Chemical Reaction Engineering	3	
302-251A	Separation Processes	3	
302-292A	Chemical Engineering Laboratory I	4	
302-293B	Chemical Engineering Laboratory II	3	
302-303B	Chemical Process Economics	3	
302-371B	Process Control	3	47

And either			
302-353A	Process Design	3	
302-454B	Design Project	4	
or			
302-394A,B,F	Research Project and Seminar	3	
302-495A,B,F	Research Project and Seminar	4	7

Elective Courses

RESTRICTED ELECTIVES

Course to be selected from those approved by the Department. (See guidelines below). 7

GENERAL ELECTIVES

Approximately three courses. (See guidelines below). 9

Total 94

For a student beginning in September, a typical 6 semester program (2) leading to a B. Eng. in Chemical Engineering is shown below:

Term 1		Term 2	Credits	
Lin. Alg. and Diff. Eq. I (189-261)	3	Lin. Alg. and Diff. Eq. II (189-262)	3	
Advanced Calculus (189-263)	3	Intro. to Boundary Value Problems (189-264)	3	
Thermo I (302-021)	3	Thermo II (302-122)	3	
CPPI (302-001)	4	Fluid Mech. (302-131)	4	
Computers	2	Lab (302-191)	2	
	15		15	30
Term 3		**Term 4**		
Tech. Paper (302-097)	1	Mass Trans. (302-212)	3	
Lab (302-292)	4	Lab (292-293)	3	
Ht. Trans. (302-211)	4	Sep'n Proc. (302-251)	3	
Organic Chem (180-212)	4	Chemistry (180-250)	3	
Physical Chem. (180-213)	3	Elective	3	
	16		15	31
Term 5		**Term 6**		
Tech. Paper (302-198)	1	CPPII (302-202)	3	
Economics (302-303)	3	Control (302-371)	3	
Chem. R. Eng. (302-241)	3	Research/Design	4	
Research/Design	3	Elective	7	
Elective	6			
	16		17	33
				94

Notes:

1) 301-371 can be taken in Term 4 if desired.

2) Most students who begin in January require 7 semesters to graduate. However, in some cases it is possible for a student beginning in January to graduate in 6 terms plus one summer course (302-394).

Restricted Electives

A minimum of 7 credits of the 94 credit total must be chosen from a list of Restricted Electives approved by the Department. The purpose of this requirement is to provide students with an area of specialization within the broad field of chemical engineering. Alternatively, some students use the restricted electives to increase the breadth of their chemical engineering training.

The Restricted Elective Courses currently approved by the department are as follows:

302-381A	Polymer Engineering
302-386B	Textile Technology
302-283B	Industrial Rheology
302-262A	Introduction to Industrial Microbial Processes
302-594B	Fermentation Engineering
302-252B	Particulate Systems
302-361B	Computer Methods in Chemical Engineering
302-271A	Industrial Water Pollution Control
302-272A.	Industrial Air Pollution Control

The first three courses listed above comprise a Polymeric Materials sequence. Additional courses in this area may be taken as general electives in the Chemistry department (e.g. 180-455B) or at the graduate level (302-682A, 302-783A). The department has considerable expertise in the polymer area. An agreement has recently been worked out with the Canadian Association of Textile Colourists and Chemists which is cooperating with course 386B.

Courses 262A, 594B and 283B make up a sequence in **Food and Fermentation Processes.** Students interested in this area are strongly advised to consider taking additional courses in this area as general electives, particularly those offered by the School of Food Science of the Faculty of Agriculture, the Faculty of Medicine and courses in biochemistry and microbiology (e.g. 362-442A, 377-200A, 376-413B, 336-320A, 336-321B, 336-322B). The food, beverages and pharmaceutical industries are large industries in the Montreal area and these courses help make our students attractive to employers in these areas.

A third area of specialization is **Pollution Control.** Presently there are two courses given in the Department on Water and Air Pollution respectively. Complementary and interdisciplinary courses are available in other departments for students interested in the environmental aspects of engineering.

The restricted electives offered by the department are planned to be as follows.

1975-76
(and alternate years thereafter)

381A	Polymer Eng.
262A	Microb. Processes
271A	Water Pollution Control
283B	Ind Rheology
361A	Computer Methods

1976-77
(and alternate years thereafter)

1st Term

381A	Polymer Eng.
262A	Microb. Processes
272A	Air Pollution Control

2nd term

386B	Textile Tech.
594B	Fermentation Eng.
252B	Particulate Systems

Note that many of the restricted electives will be offered only in alternate years. Students should therefore plan their electives as far ahead as possible. With the approval of the instructor and faculty advisor, students may also take graduate courses as restricted electives.

General Electives

The general elective requirement enables our students to increase the breadth or depth of their education. University level courses may be chosen in any field. Particular attention is drawn to the following.

1. Any credits, above 7 obtained from courses on the restricted elective list, count towards the general elective requirement.

2. Three general elective courses are offered by the department. Course 302-204B, Models of Socio-Technical Systems, is part of the university-wide network of courses designated as the Environmental Studies Program. Courses 302-299A, B and 302-399A, B, Projects in Chemical Engineering, grew out of student initiatives. In these two courses students propose and work, individually or in small groups, on projects of their own choosing. A faculty member willing to act as advisor must be found for each project, but students must take the initiative. Successful projects have treated such areas as work attitudes of engineers, pollution and safety regulations, fermentation process development and product recovery, unemployment, and teaching methods.

3. The following outside areas should be looked at closely:
   a) French courses.
   b) Chemistry courses
   c) Management minor courses.
   d) Courses in other branches of engineering to broaden the technical base of the student.
   e) Courses in the arts and social sciences to broaden the social and cultural background and to develop communications skills.
   f) Faculty courses in engineering.

4. The only restrictions on general electives are the following:

   a) A course must fit into the timetable without causing conflicts.

   b) A course may not be elected if it is essentially a repetition of material already covered in our curriculum (e.g. a second introductory computing course) or if the student has already mastered the material (e.g. introductory Spanish for a Spanish-speaking student).

5. General electives count into the grade point averages like any other course. The only difference in the way these courses are treated is that a "D" is sufficient to pass.

Special Programs

Graduate study in chemical engineering is possible for students who have a B.Sc. in chemistry and meet the admission requirements. Individualized qualifying programs, usually one year long, are available to prepare such students for graduate courses and research.

Curriculum Committee

The curriculum committee is composed of three students, elected by their classes, and three staff members. This committee provides a forum for all matters involving undergraduate student/staff inter-actions. While the primary concern is with matters of curriculum and courses (their content, evaluation, marking, scheduling, teaching methods, etc.), the committee has also taken up a number of other matters in recent years, e.g. working space, facilities (equipment and libraries), plant tours.

Canadian Society for Chemical Engineering

The Chemical Engineering Student Society has for many years been affiliated both with the CSChE (Canadian Society for Chemical Engineering) and with the AIChE (American Institute of Chemical Engineers). For a nominal fee of $3.00 per year, students receive "Chemistry in Canada", a monthly publication, and the AIChE Student Members Bulletin as well as other privileges of student membership in the two societies. Locally, the student chapter also organizes a series of social, educational and sporting events. For example, recent events have included student-professor banquets and Christmas parties, dances, speakers, broomball games and joint meetings with the Montreal Section of the CSChE. The latter gives students a chance to mix with practicing chemical engineers.

Scholarships and Bursaries

Certain bursaries and scholarships are open to students in the department. Students who are interested in bursaries and scholarships should consult the section "Undergraduate scholarships, bursaries, prizes, medals and loan funds" of the General Announcement available from the Registrar's Office. Prof. Volesky should be consulted regarding specific scholarships and bursaries.

Courses Offered by the Department

Elective courses are indicated by the symbol •

302-001A CHEMICAL PROCESS PRINCIPLES I 4(3-0-9). (Co-requisite: 189-285A.) Solution of chemical engineering problems by the application of the laws of conservation of mass and energy. Applications in steady and transient processes. Self-paced, modular course.
Professor Weber

302-021A CHEMICAL ENGINEERING THERMODYNAMICS I 3(3-0-6). (Co-requisite 189-284A.) Work and mechanical energy, first and second laws of thermodynamics, use of property charts and tables, relationships between thermodynamic properties, mechanical energy balance, heat engines and refrigerators, use of equations of state, estimation of equilibrium properties, phase equilibrium in single component systems. Optional module on statistical thermodynamics. Self-paced, modular system of instruction.
Professor Dealy

302-097A TECHNICAL PAPER I I(0-0-3). A technical paper prepared according to instructions issued by the Department.
Professor Boyle

302-122B CHEMICAL ENGINEERING THERMODYNAMICS II 3(3-0-6). (Prerequisite: 302-021A.) Thermodynamics of mixtures, phase equilibrium in multicomponent systems, chemical reaction equilibrium in homogeneous and heterogeneous systems.
Professor Dealy

302-131B FLUID MECHANICS 4(3-1-8). (Co-requisite: 189-286B.) Fluid properties; fluid statics; basic concepts and equations of fluid dynamics including the continuity and Navier-Stokes equations, Bernoulli's equation and application to flow measuring devices; dimensionless groups and simil-

itude; momentum theorems, pumps; two dimensional potential flow; drag and boundary layers; pipe flow; losses in valves and fittings.
Dr. Avedesian

302-191B INSTRUMENTAL MEASUREMENTS LABORATORY 2(0-3-3). (Prerequisite: 302-021A*.) Co-requisite:302-131B. Techniques for measurement of properties of solids, liquids and gases; application of these techniques in practice; selection of measurement techniques for engineering applications.
Professor Charrier

302-198A TECHNICAL PAPER II 1(0-0-3). (Prerequisite: 302-097A.) A technical paper prepared according to instructions issued by the Department.
Professor Douglas

302-202B CHEMICAL PROCESS PRINCIPLES II 3(3-0-6). (Prerequisites: 302-001A, 180-250B*.) Applications of physical, organic and inorganic chemistry to case studies in chemical process contexts. The cases chosen emphasize process and product development in the Canadian chemical industry.
Professor Fuller

• **302-204B MODELS OF SOCIO-TECHNICAL SYSTEMS 3(3-0-6).** Introduction to the use of computer simulation for the study of social system behaviour. Expression of theories in computer simulation form. Interpretation of simulation results. Comparison between simulation models and mental models. World models developed at M.I.T.
Professor Boyle

302-211A HEAT TRANSFER 4(3-0-9). (Prerequisites: 302-021A*, 302-131B*, 189-286A,B*.) Transport of heat by conduction; transport by convection in free and forced flows; transport by radiation. Mathematical formulation and solution of heat transfer problems. Design of heat transfer equipment.
Professors Ratcliff and Weber

302-212B MASS TRANSFER 3(3-0-6). (Prerequisites: 302-211A*.) Transport of matter by diffusion. Transport by convection in free and forced flows. Design of mass transfer equipment: distillation columns, packed bed contactors, etc.
Professor Douglas

302-241A CHEMICAL REACTION ENGINEERING 3(3-0-6). (Prerequisites: 302-001A, 180-250B*.) Application of kinetics of homogeneous chemical reactions in calculating reactor size, production rate, selectivity and yield; interaction between chemical reaction and heat transport; kinetics of heterogeneous catalysis; catalyst properties; mass and heat transfer in heterogeneous reactions; reactor size and production rate for heterogeneous reactions.
Dr. Vera

302-251A SEPARATION PROCESSES 3(3-0-6). (Prerequisites: 308-080A, 302-001A*, 302-122B*.) Analysis of separation processes using macroscopic material and energy balances; applications to distillation and extraction; design of staged cascades; performance of real systems; selection of operating conditions and contacting equipment.
Dr. Avedesian

• **302-252B PARTICULATE SYSTEMS 3(3-0-6).** (Prerequisites: 302-001A, 302-131B*.) Study of operations involving multiphase systems with one of the phases finely sub-divided as bubbles, drops or particles. Applications in evaporation, crystallization, fluidization etc.
Professor Clift

• **302-262A INTRODUCTION TO INDUSTRIAL MICROBIAL PROCESSES 3(3-1-5).** (Prerequisite: 180-212A,B.) Introduction to the fundamental principles of the microbial world, cell structure and growth. Comparative study of the morphology, biology and relationships of algae, fungi, bacteria and viruses. Energy transformations. Survey of selected industrial microbial processes of importance in producing food, antibiotics, organic acids, polymers, etc. Microbial leaching. Ecological aspects and waste-water treatment. Single-cell protein synthesis.
Professor Volesky

• **302-271A INDUSTRIAL WATER POLLUTION CONTROL.** (Prerequisite: 302-131B.) Water quality standards; water surveys; process design considerations; physical, chemical and biological treatment of aqueous effluents from industrial plants; case studies in the Canadian context.
Dr. Cooke

• **302-272A INDUSTRIAL AIR POLLUTION CONTROL.** (Prerequisite: 302-131B.) Air quality standards, air surveys, process design consideration dispersion theory and stack design; dust cleaning methods, design of scrubbers, case studies in the Canadian context.
Dr. Cooke

• **302-283B INDUSTRIAL RHEOLOGY 2(1-1-4).** (Prerequisites: 302-131B or equivalent.) An introduction to the basis of mechanical testing of viscous liquids and pastes in the process industries. Topics include: fundamentals of rheology; classification of material responses; instrumentation for rheological measurements; applications to the petroleum, plastics, food processing and pharmaceuticals industries.
Professor Dealy

302-292A CHEMICAL ENGINEERING LABORATORY 1 4(2-3-7). (Prerequisite: 302-191B.) Planning, execution, and evaluation of experimental projects; design of experiments; interpretation of experimental results; statistical analysis of exper-

imental data; effective work in groups; selected laboratory exercises on chemical engineering topics.
Professor Fuller and Staff

302-293B CHEMICAL ENGINEERING LABORATORY II 3(1-3-5). (Prerequisite: 302-292A*.) Guided practice in planning and executing experimental projects on chemical engineering topics.
Professor Fuller and Staff

• **302-299A,B PROJECTS IN CHEMICAL ENGINEERING I 2(1-0-5).** (Prerequisite: 302-001A*.) Projects on social or technical aspects of chemical engineering practice. Students must suggest their own projects to be approved and supervised by a member of the staff.
Staff

302-303B CHEMICAL PROCESS ECONOMICS 3(3-0-6) (Prerequisites: 302-211A*, 302-251A*.) Quantitative analysis of economic problems relating to chemical processes. Evaluation of economic optima for operating plants. Methods of cost estimation for new plants. Interest and investment costs; depreciation; alternative investments.
Mr. R. Lévesque

302-353A PROCESS DESIGN 3(3-0-6). (Prerequisites: 302-211A*, 302-212B*, 302-251A**.) Integration of unit operations and chemical engineering science in the design of chemical plants. The evaluation of the optimum combination of the purchase price and operating costs is emphasized.
Mr. Rudzinski

• **302-361A COMPUTER METHODS IN CHEMICAL ENGINEERING 3(2-0-7).** Application of scientific computers in process design, chemical engineering analysis and research. Process simulation; structure and design of general purpose programs; linear programming; numerical analysis. Batch and conversational computer modes are used.
Professor Boyle

302-371B PROCESS CONTROL 3(3-0-6). (Prerequisites: 302-211A*, 302-251A*.) Linear incremental models of processes; development and representation of control strategies; measurement and interpretation of transient response; controller tuning; feedforward and cascade control systems. Assignments use an instrumented process laboratory, analog computer, and minicomputer control system.
Professor Boyle

• **302-381A POLYMER ENGINEERING 3(3-0-6).** (Prerequisites: 302-131B, 180-212A,B.) The application of engineering fundamentals to the preparation and processing of polymers. Classification and characterization of polymers, reaction media and kinetics of polymerization, reactor design, mechanical behaviour of polymers, visco-elasticity and rheology, processing techniques; extrusion, molding, etc.
Professor Charrier

• **302-386B TEXTILE TECHNOLOGY 3(3-0-6).** (Prerequisite: 302-131B or equivalent.) Application of engineering principles to the following topics: chemical constitution and properties of fibre-forming polymers, theories of fibre structure; relations between molecular structure and properties of natural and man-made fibres; staple and filament yarns; blending of fibres; effect of operating variables on yarn properties; weaving and knitting technology; finishing of fibres, textile testing.
Dr. El Hosseiny

302-394A,B,F RESEARCH PROJECT AND SEMINAR 3(1-6-2). (Prerequisite: 302-293B.) Independent study and experimental work on a topic chosen by consultation between the student and the Departmental staff.
Staff

• **302-399A,B PROJECTS IN CHEMICAL ENGINEERING II 2(1-0-5).** (Prerequisite: 302-299A,B.) Projects on social or technical aspects of chemical engineering practice. Students must suggest their own projects to be approved and supervised by a member of the staff.
Staff

302-454B DESIGN PROJECT 4(2-0-10). (Prerequisite: 302-353A.) Process design brief will be prepared for an industrial system involving heat and mass transfer operations. The topic will be assigned to give sufficient scope for selecting design alternatives.
Dr. Cooke & Mr. Rudzinski

302-495A,B,F RESEARCH PROJECT AND SEMINAR 4(1-9-2). (Prerequisite: 302-394A.) Independent study and experimental work on a topic chosen by consultation between the students and the Departmental staff.
Staff

• **302-594B FERMENTATION ENGINEERING 3(3-0-6).** (Prerequisite: 302-262A.) Engineering aspects of biochemical and microbiological processes. Design and scale-up of fermentation equipment. Oxygen transfer. Instrumentation. Agitation and aeration. Immobilized enzyme processes. Separation techniques including reverse osmosis and ultrafiltration. Bio-hazards.
Professor Volesky

5.4 DEPARTMENT OF CIVIL ENGINEERING AND APPLIED MECHANICS

Chairman
R.G. Redwood, M.A.Sc.(Tor.), Ph.D.(Bristol)

Professors
J.L. de Stein, B.Sc.(Sask.), M.Eng.(McG.), M.E.I.C.
P.J. Harris, B.Sc.(Man.), M.Eng., Ph.D.(McG.), M.E.I.C.
R.G. Redwood, M.A.Sc.(Tor.), Ph.D.(Bristol)
R.N. Yong, M.S.C.E.(Purdue), M.Eng., Ph.D.(McG.)

Associate Professors
R.G. Cox, B.A., Ph.D.(Cantab.)
R.D. Japp, M.Eng., Ph.D.(McG.)
S. Mirza, B.Eng.(Karachi), M.Eng., Ph.D.(McG.)
J.C. Osler, B.Eng.(McG.), S.M.(Harv.), M.E.I.C.
A. Pakalnins, D.Eng.Sc.(Latvia)
D.A. Selby, B.Eng., M.Eng.(McG.), M.E.I.C.
S.B. Savage, M.S.(Calif. Tech.), Ph.D.(McG.)
C.J. Turkstra, M.S.(Ill.), Ph.D.(Wat.)

Assistant Professors
B.J. Adams, B.Sc.(Man.), M.S., Ph.D.(Northwestern)
V. Chu, M.A.(Tor.), Ph.D.(M.I.T.)
A.R. Cook, M.Sc., Ph.D.(Mich.)
E. McKeyes, M.Eng., Ph.D.(McG.)
D. Panagiotakopoulos, B.E.(C.C.N.Y.), Ph.D.(Cornell)
G.R. Thomas, M.E., Ph.D.(Cornell)

Research Associates
A. Sethi, M.Sc.(Punjab), D.Sc.(Louvain)
D.R. Sheeran, M.S., Ph.D.(Northwestern)

Part-Time Staff
Professors
G. Cavadias, B.Eng.(Athens), M.Sc.(McG.)
J.O. McCutcheon, B.Eng., M.Eng.(McG.)

Associate Professors
L.J. Arcand, B.Sc., M.Eng.(McG.)

Special Lecturers
A. deGouville
B. Eskenazi
P. Janiga
N.W.E. Lee
E. Leon
R.J. Lindsay

Civil Engineering can be defined as that branch of engineering which deals with systems of constructed facilities. Responsibilities of Civil Engineers thus include the planning, development, and construction of transportation systems, urban services, resource development projects, waterways, and structures varying from skyscrapers to rocket vehicles. Applied mechanics refers to branches of science and analysis upon which the practice of civil engineering is based.

As with all other branches of engineering, rapidly expanding knowledge in science and mathematics coupled with the development of computers has led to great changes in the practice of civil engineering. The curriculum of this Department fully reflects these changes, and the foundation provided will enable graduates to cope with further changes in the future.

The required courses ensure a sound scientific and analytical basis for professional studies through courses in mechanics, solid mechanics, fluid mechanics, soil mechanics, structural analysis, systems analysis and mathematics. Fundamental concepts are applied to various fields of practice in both required and elective courses.

By a suitable choice of elective courses, a student can attain advanced levels of technical knowledge in particular specialized areas. After completing such a program, he will then be well prepared for a professional career or for graduate studies at any prominent university in North America or abroad. In professional practice the civil engineer may be concerned with detailed design, or with planning and project management, both requiring the technical understanding provided by his engineering studies; he may be concerned with projects varying in size from those costing multi-millions of dollars to small schemes costing several thousands of dollars. Diverse professional careers may be followed in either the private or public sectors.

Alternatively, a student can elect to develop his interests in a more general way by combining courses within the department with courses from other departments or faculties. Such a general program of studies in civil engineering has proven to be an excellent basis for careers in urban government and business management.

CURRICULUM FOR THE B.ENG. DEGREE IN CIVIL ENGINEERING AND APPLIED MECHANICS

Required Courses

		Course Credit	
NON-DEPARTMENTAL SUBJECTS			
186-221A	General Geology	3	
189-261A,B	Linear Algebra and Differential Equations I	3	
189-262A,B	Linear Algebra and Differential Equations II	3	
189-263A,B	Advanced Calculus	3	
189-264A,B	Introduction to Boundary Value Problems	3	
305-090A	Engineering Graphics II	2	
308-080A	Computers in Engineering	2	
And either			
304-181B	Electric Power	3	
or			
306-012A	Engineering Thermodynamics	3	22
CIVIL ENGINEERING SUBJECTS			
303-001A	Structural Materials	2	
303-002A	Probabilistic Systems	3	
303-003A	Technical Reporting	1	
303-004F	Technical Papers	2	
303-005A,B	Mechanics I	4	
303-106B	Mechanics II	3	
303-107A,B	Solid Mechanics	4	
303-108B	Deterministic Systems	3	
303-109B	Surveying	3	
303-110A	Sanitary Engineering	3	
303-211B	Fluid Mechanics	3	
303-212A	Soil Mechanics	4	
303-213A	Structural Analysis	4	
303-214A	Structural Design I	3	
303-215B	Structural Design II	3	
303-219B	Transportation Engineering	3	
303-317B	Foundations	3	
303-318B	Project	3	54

*Or alternate if equivalent has been taken.

Elective Courses

TECHNICAL ELECTIVES

Approximately six courses to be selected from those listed below offered by the Department, or from other suitable graduate or undergraduate courses.

16

303-133B	Urban Planning
303-216B	Transportation Economics
303-230B	Municipal Systems
303-231A	Stream Pollution and Control
303-232B	Hydrology
303-235A	Geometronics
303-239B	Photogrammetry and Interpretation
303-338A	Hydraulics
303-340A	Traffic Engineering
303-345A	Construction Project Management

303-350A	Soil Behaviour
303-351A	Highway and Airport Design
303-360A	Structural Theory I
303-361B	Structural Theory II
303-362A	Design in Metals
303-363A	Design in Concrete
303-364B	Experimental Stress Analysis
303-370A	Research Project

GENERAL ELECTIVES

Three courses	8
Total	**100**

Courses Offered By The Department

Elective courses are indicated by the symbol •

303-001A STRUCTURAL MATERIALS 2(2-2-2). Study of structural materials from the point of view of microscopic phenomena and the relationship to mechanical behaviour. Study of metals, concrete and polymeric materials.
Professor McKyes

303-002A PROBABILISTIC SYSTEMS 3(3-1-5). An introduction to probability, statistics and decision theory with applications to Civil Engineering design. Descriptive statistics, common probabilistic models, principles of parameter estimation, elementary bayesian analysis.
Professor Turkstra

303-003A TECHNICAL REPORTING 1(1-0-2). Students will be encouraged to communicate ideas and factual data, either verbally, visually or in writing, relating to various situations encountered in engineering practice. Formal assignments will be limited to four short written submissions, including one group assignment, while the remainder of the course will emphasize active participation in class.
Professors Adams and Osler

303-004F TECHNICAL PAPERS 2. Two technical papers are to be presented. These are normally prepared during the summer months and are to be on a technical topic, related, if possible, to the students' summer employment. Detailed instructions are provided in the Spring.

303-005A,B MECHANICS I 4(4-2-6). Systems of forces and couples, resultants, equilibrium. Frames and beams, reactions, shear forces, bending moments. Centroids, centre of gravity, distributed forces, moment of inertia. Friction, limiting equilibrium, screws, belts. Kinematics and kinetics of particles and systems, coordinates, mass-acceleration, work-energy, impulse-momentum. Orbital motion of particles.
Professors Japp, Selby & Mr. Janiga

303-081A ANALYTICAL MECHANICS 3(3-1-5). (Prerequisite: 189-285A,B.) Kinematics of particles, dynamics of particles, Newton's laws of motion, forced and dampened harmonic motion, resonance. Work, conservative forces, potential energy. General three-dimensional and constrained motion of particles. Relative motion and general moving frames of reference. Angular momentum of particles, central force fields and orbits. Dynamics of a system of particles, kinetic energy and angular momentum, collisions and impulse, bodies of variable mass. General motion of rigid bodies, moments and products of inertia, principal axes, angular momentum and kinetic energy of rigid bodies, gyroscopic precession. Euler's equations.
Professor Cox

303-086A DYNAMICS I 3(3-0-6). (Co-requisite 189-287A.) Basic principles of Newtonian dynamics and its limitations, non-inertial reference frames. Generalized coordinates, Lagrange's equations and Hamilton's principle, central force motion. Cartesian tensors, coordinate transformations, moment of inertia tensors, principal axes, Langrangian rigid body dynamics. Euler's equations of motion, gyroscopic precession.
Professor Harris

303-089A BUILDING MATERIALS 2(2-2-2). Microscopic and macroscopic considerations of metals, Portland cement, concrete and polymers at an introductory level.
Professor McKyes

303-090A MECHANICS I 4(4-1-7). Introduction to Mechanics. Fundamental quantities. Conservation of mass. Kinematics, momentum and force; conservation of momentum; Newton's Laws; concepts of force and impulse; angular momentum and its conservation; central force motion; various classes of forces (electrostatic, friction, gravity, etc.) and pseudo-forces; relative motion. Energy: kinetic, potential and other mechanical forms; work. Static equilibrium; statics, electrostatics, hydrostatics and elastostatics. Centre of mass and moment of inertia. Rigid-body dynamics. Connection of Mechanics with other branches of engineering.
Professors Lee & Zwarts

303-106B MECHANICS II 3(3-2-4). (Prerequisite: 303-005A,B; 189-285A,B**.) Particle kinematics, moving coordinate systems, rigid body kinematics, moments of inertia. Rigid body kinetics, mass-acceleration, work-energy, impulse momentum. Euler's equations. Lagrange's equations, Hamilton's principle, vibrations of single degree of freedom systems.
Professor Japp

303-107A,B SOLID MECHANICS 4(3-2-7)†. (Prerequisite: 303-005A,B*, 303-080A**.) Stress-strain relationships; elastic and inelastic behaviour; performance criteria. Elementary and compound stress states, Mohr's circle. Shear strains, torsion. Bending and shear stresses in flexural members. Deflections of beams. Statistically indeterminate systems under flexural and axial loads. Columns. Dynamic loading.
†Two-hour laboratory periods and problem periods, alternate weeks.
Professors Savage, Turkstra & Staff

303-108B DETERMINISTIC SYSTEMS 3(3-1-5). (Prerequisite: 189-285A,B**.) Introduction to the systems approach and optimisation techniques; applications of linear programming; critical path scheduling; marginal and sensitivity analysis; evaluation of projects and choosing among alternatives; integration of technological and social aspects in engineering projects.
Professor Panagiotakopoulos

303-109B SURVEYING 3(2-3-4). (Prerequisite: 308-080A**.) The construction and use of modern survey instruments: transit, level, etc.; linear and angular measurements and errors; types and magnitudes; probability; significant figures; units of measurements; simple circular curve; theory and use of the Polar Planimeter; engineering and architectural applications of surveying measurements. A field school must be attended after completion of the lecture course.
Professor Selby and Mr. Lindsay

303-110A SANITARY ENGINEERING 3(3-3-3). Introduction to the fundamental principles of municipal water supply and wastewater disposal; transportation, storage, pumping, characteristics, and examination of water and wastewater; physical, chemical and biological operations and processes of water and wastewater treatment systems.
Professor Adams

• **303-133B URBAN PLANNING 2(2-2-2).** (Prerequisite: 308-080A*.) City in history; master plans of land use and communications; traffic and transportation systems; planning and design of residential subdivisions.
Professor Pakalnins

303-182B VIBRATIONS AND WAVES 3(3-0-6). (Prerequisite: 303-081A; Co-requisite: 189-286B.) Generalized coordinates, Lagrange's equations for particles and general systems, Hamilton's principle, generalized forces and momenta. Hamilton's equations. Vibrations of simple and multiple degree of freedom systems, coupled oscillations, normal coordinates, vibrations of a system of many particles. Waves on strings, travelling and standing waves, super-position. Energy and momentum transport. Boundary conditions, normal modes, Fourier analysis. External driving forces. Longitudinal waves, propagation across boundaries, reflection and refraction at a plane interface, impedance concepts, selective wave transmission. Wave pulse in dispersive media, group velocity. Transmission lines. Waves on circular and rectangular membranes, interference phenomena.
Professor Chu

303-183B STRENGTH OF MATERIALS 4(3-3-6). (Prerequisites: 303-005A,B*.) Structural behaviour, trusses, statically determinate beams, frames, and arches; moments of inertia, stress, strain, properties of materials; bending and shearing stresses; torsion; fixed and continuous beams; reinforced concrete beams; columns; combined stresses; Mohr's circle.
Professor Selby

303-187B DYNAMICS II 3(3-0-6). (Prerequisite: 303-086A; Co-requisite: 189-288B.) Introduction to the theory of elasticity, stress and strain tensors, equations of motion and compatibility, free and forced vibrations of single and multiple degree of freedom linear systems; non-linear vibrations and stability, phase plane and singular points, subharmonic response, limit cycle, derivations of various wave equations by Hamilton's principle, reflection and transmission, frequency and amplitude dispersion, formation of discontinuities, elastic surface waves.
Professor Cox

303-191A,B MECHANICS II 3(3-1-5). (Prerequisite: 303-090A.) Classification of mechanics. Co-ordinate systems and relative motion. Degrees of freedom, generalized coordinates and constraints. Newtonian, Lagrangian and Hamiltonian formulations of mechanics. Solution of equations of motion for simple systems. Rigid-body dynamics; Euler's equations. Energy methods; stability and the phase plane. Transition from discrete to continuous, deformable systems. Wave propagation.
Professor Paidoussis

303-193B MECHANICS II HONOURS 3(3-1-5). (Prerequisite: 303-090A.) Same topics as covered in Mechanics II, but in a manner and with the stress appropriate for honours students.
Professor Paidoussis

303-211B FLUID MECHANICS 4(3-3-6). (Prerequisites: 189-286B, 303-106B**.) The fundamental principles of fluid dynamics; fluid kinematics and equations of motion; dynamic similtude and basic concepts of creeping motions and flow in porous media, boundary layers, turbulence and turbulent shear stresses. Application to pipe and open channel systems, hydraulic machines, and flow measurements.
Professor Chu

303-212A SOIL MECHANICS 4(3-3-6). (Prerequisite: 303-107A,B*.; Co-requisite: 186-221A.) Soil properties and characteristics of soils, foundation types, soil behaviour, classification, yield and failure, general considerations of stability.
Professor Yong

303-213A STRUCTURAL ANALYSIS 3(3-1-5). (Prerequisite: 303-107A,B.) Virtual work and energy methods; statically indeterminate systems, continuous beams and frames; slope deflection and moment distribution methods; influence lines.
Professor Turkstra

303-214A STRUCTURAL DESIGN I 3(3-1-5). (Prerequisite: 303-107A,B*.) Design in steel and timber. Properties of structural steels, classification and behaviour of steel structures. Allowable stress and plastic design. Members in axial tension and compression; flexure, with and without lateral support; reinforced beams, unstiffened plate girders. Introduction to beam-columns. Connections. Truss design. Fabrication and erection. Properties of timber, timber beams, columns and connections.
Professor Redwood

303-215B STRUCTURAL DESIGN II 3(3-1-5). (Prerequisite: 303-107A,B*.) A study of the physical properties and characteristics of concrete; the design process; the mechanics of reinforced concrete in bending; shear and diagonal tension; bond and anchorage; structural systems; continuous beams and slabs; columns under axial load.
Professor Mirza

303-216B TRANSPORTATION ECONOMICS 2(2-1-3). (Prerequisites: 303-002A*, 303-108B*.) Transportation economics. Treatment of highway and other transportation problems, drawing from statistical and probabilistic analysis as well as from economics.
Mr. deGouville

303-219B TRANSPORTATION ENGINEERING 3(3-1-5). Prerequisites: 303-002A, 303-108B, 308-080A.) Operating characteristics of highway, guided-ground, air, water-borne, and pipeline transport modes; land use/transportation interaction; travel demand analysis; transportation planning methodology; analysis of transportation alternatives; highway design; human factors and safety in highway transportation; location, planning, and design of airports.
Professor Cook

• **303-230B MUNICIPAL SYSTEMS 3(3-2-4).** (Prerequisite: 303-110A.) Design construction and economics of water supply and wastewater disposal systems, including process and control engineering, and industrial waste disposal.
Professor Pakalnins

• **303-231A STREAM POLLUTION AND CONTROL 3(3-0-6).** (Prerequisite: 303-110A**.) Sources and types of pollution; effects of pollution; thermal pollution; oil pollution; pollution from farmland; eutrophication; stream self-purification; pollution surveys and water quality standards.
Professor Pakalnins

• **303-232B HYDROLOGY 3(3-2-4).** (Prerequisites: 303-002A, 303-108B**.) Physical background to hydrology; climate variations; water balance, seepage and groundwater, evapo-transpiration, runoff; methods of collecting data and statistical treatment. Elements of flood routing; reservoir design.
Professor Cavadias

• **303-235A GEOMETRONICS 2(2-3-1).** (Prerequisite: 303-109B.) Surveys for engineering projects; altimetry — trigonometric and barometric; underground surveys; hydrographic surveying — bathymetry; discharge of streams, electronic radio location; electronic distance measuring — telluriometer — geodimeter — use of the laser — airborne profile recording; elements of geodetic surveying; simple cartography.

• **303-239B PHOTOGRAMMETRY AND INTERPRETATION 3(3-3-3).** (Prerequisite: 303-109B.) Construction of planimetric and topographic maps, determination of space position of objects from photographs; preparation of composite pictures of the ground; aerial cameras and equipment. Vertical aerial photographs are used to evaluate, analyse, classify and interpret images of objects seen on the photographs; laboratory use of stereoscopes and a Multiplex projector, and field visits, are included.
Professor Arcand and Mr. Lee

302-284A SOIL MECHANICS AND FOUNDATIONS 2(2-3-1). (Prerequisites: 303-183B* or 303-107A,B*.) Nature of soils, identification and classification. Physical properties of soils, permeability, compressibility, shear strength, principle of effective stresses, stress strain behaviour. Seepage, frost action. Field exploration of soil conditions. Foundations, shallow and deep. Earth pressures and retaining structures, stability of earth masses.
Professor Japp

303-285A STRUCTURAL STEEL DESIGN 2(2-2-2). (Prerequisite: 303-183B; Co-requisite: 303-089A.) A study of the characteristics of structural steel frames in building construction. Included is the detailed design of axially loaded members, trusses, beams and girders, and the overall

framing of buildings. Also a consideration of structural loads, code requirements and design procedures.
Mr. Leon

303-288B REINFORCED CONCRETE DESIGN 2(2-2-2). (Prerequisite: 303-183B; Co-requisite: 303-089A.) A study of elementary reinforced concrete building systems including a consideration of their characteristics. Also the working stress design of simple and continuous span beams, and the design of columns. An introduction to ultimate strength designs is also given. In addition the principles of structural timber design are studied.
Mr. Eskenazi

303-317B FOUNDATIONS 3(3-1-5). (Prerequisite: 303-212A*.) Site investigation, engineering properties of soils for design. Plastic equilibrium, bearing capacity theory. Design of footings and rafts, differential settlement, coefficient of subgrade reaction. Earth pressures, design of retaining walls and bulkheads. Piles, soil-structure interaction, estimates of the bearing capacity of single piles, group action.
Professor Osler

303-318B PROJECT 3(0-4-5). (Prerequisite: Completion of an approved set of required and technical elective courses.) The project consists of a study or design topic in any of the branches of Civil Engineering. The project may be analytical or experimental, and may combine various branches in the discipline. The topic can be chosen in consultation with a staff member, whose approval is necessary. Guidance will be provided by Department staff and by practising engineers. The project is normally carried out in a student's last semester.
Professor Turkstra and Staff

• **303-338A HYDRAULICS 2(2-2-2).** (Prerequisite: 303-211B.) Design of channels for non-uniform flow; computation of backwater curves, effect of ice and obstruction. Computations of unsteady flow in open channels; abrupt waves, floodwaves, tidal propagation. Navigation locks, manifold locks, manifold design. Water intakes.
Professor Savage

303-340A TRAFFIC ENGINEERING 3(3-2-4). (Prerequisite: 303-219B*.) Driver, vehicle and traffic flow characteristics; origin-destination studies, traffic studies and analysis, accident studies, queueing theory applications, gap acceptance, simulation, highway capacity, traffic regulations and control measures, intersection control.
Professor Cook

303-345A CONSTRUCTION PROJECT MANAGEMENT 3(3-2-4). (Prerequisites: 303-002A, 303-108B, 303-214A or 303-215B.) Planning, operation, and control construction projects using systems analysis methods, economics, modern management techniques, and statistical analysis; linear graph modeling, PERT, precedence networks; scheduling of operations, manpower, and equipment, resource levelling; progress monitoring and reporting; the rate of work method; time-cost trade-offs; cost estimation; evaluation of contract bidding; risk analysis; methods improvement in construction management.
Professor Panagiotakopoulos

• **303-350A SOIL BEHAVIOUR 3(3-0-6).** (Prerequisite: 303-212A.) Soil-water interaction in relation to soil properties, environmental considerations, volume changes, infiltration and diffusion. Soil freezing, soil strength parameters, time-deformation characteristics, stability and yield.
Professor Yong

• **303-351A HIGHWAY AND AIRPORT DESIGN 2(2-2-2).** (Prerequisite: 303-212A*. Design and construction of subgrades; fill selection, compaction, compaction control, soil stabilization, frost action. Stability of cuts and embankments. Design of rigid and flexible pavements and bases, stresses in layered systems, evaluation of design parameters, current methods of design, evaluation and strengthening of existing pavements.
Professor Osler

• **303-360A STRUCTURAL THEORY I 3(3-2-4).** (Prerequisite: 303-213A.) Advanced topics in structural analysis. Plastic Design and Limit Design methods, matrix methods and computer applications, structural dynamics, energy methods and numerical analysis, arches, cabled structures, fundamentals of plate and shell action.
Professor Thomas

• **303-361B STRUCTURAL THEORY II 3(3-2-4).** (Prerequisite: 303-213A.) Studies in advanced structural mechanics, stress and strain tensors and their transformations, basic equations of elasticity, unsymmetrical bending of beams, sheer centres, torsion of non-circular sections, curved beams, thick cylinders, stress concentrations.
Professor Harris

• **303-362A DESIGN IN METALS 3(3-3-3).** (Prerequisites: 303-213A, 303-214A.) A study of structural systems; recent developments and trends in structural steel such as cantilever construction, castellated beams, composite construction, continuity, etc.; economic factors and cost studies; compression members by elastic and inelastic theory; miscellaneous details with high strength bolts and welds.
Professor Redwood

• **303-363A DESIGN IN CONCRETE 3(3-3-3).** (Prereqiuisites: 303-213A, 303-215B.) Ultimate strength design of reinforced concrete beams, slabs, columns, retaining walls and footings. Floor systems and building frames. Yield line theory of slabs. Composite construction, design of prestressed concrete beams.
Professor Harris

• **303-364B EXPERIMENTAL STRESS ANALYSIS 2(2-3-1).** (Prerequisite: 303-213A.) Two dimensional stress and strain equations, Mohr's circle of strain, strain rosettes and graphical solutions; extensometers; electric strain gauges, circuitry for static and dynamic measurement, transducers. Two dimensional photoelasticity, photostress; brittle coatings, dimensional analysis and structural models.
Professor Harris

• **303-307A RESEARCH RPROJECT 3(0-1-8).** (Prerequisite: 60 credits in the Civil Engineering and Applied Mechanics program.) This course is open only to those students with a high cumulative grade point average. A research project must be carried out and a technical paper prepared under the supervision of a member of staff. The nature of the project must be established with the consent of the Staff Supervisor, and must be approved by the Department before registration. This course is to be taken in conjunction with the required course 303-318B, and the project therefore can be carried out through two semesters.

303-392A. STRUCTURES 2(2-2-2). (Prerequisite: 303-285A; Co-requisite: 303-288B.) A study of structural systems in concrete, steel, timber; a philosophy of structure; choice of structure; economic factors in design; recent developments and trends in structure; lateral stability by frame action, bracing, sheer walls; mechanics of certain structural forms.
Professor Selby

PROGRAMS IN CIVIL ENGINEERING

Considerable freedom exists for students to influence the nature of the program study which they follow in the Department of Civil Engineering and Applied Mechanics. The Department offers a variety of advanced elective courses in three main groupings: Geotechnical Engineering, Structural Engineering, and a broad area which may be called Environmental Systems. The last of these is wide in scope, and embraces studies in urban systems engineering, transportation, hydrology, environmental and municipal engineering, hydraulics, photogrammetry and air photograph interpretation and pollution studies.

In order to complete a program in the minimum time, the need to satisfy prerequisites limits the choice of courses in the first and second semesters. In Semester 1, students are advised to register in the following courses:

189-261A	Linear Algebra and Differential Equations I
189-263A	Advanced Calculus
303-003A	Technical Reporting
303-005A	Mechanics I
305-090A	Engineering Graphics II
308-080A	Computers in Engineering

In Semester 2 the following courses are advised:

189-262B	Linear Algebra and Differential Equations II
303-106B	Mechanics II
303-107B	Solid Mechanics
303-108B	Deterministic Systems
303-109B	Surveying

Additional courses may be added to both of the above semesters by students with above average records.

Courses taken in Semester 3 or later are very much dependent upon a student's interests and ability. Information and advice concerning different possibilities are made available in the Department prior to registration. All programs require the approval of a Staff Adviser. Programs for students transferring into the Department with advanced standing will be dependent upon the academic credit previously achieved, and such a program will be established only after consultation with a Staff Adviser.

The General Elective requirements of eight credits may be satisfied by taking approved courses, at the appropriate level, given anywhere within the University; these courses may be of a technical or non-technical nature.

Technical Elective courses must amount to 16 out of a total of 100 credits, and most of these electives will be selected from those offered in the Department. Providing good grades have been maintained, and with the instructor's approval, the courses elected may include certain ones normally provided for graduate students. Permission may be granted for a student to take a coherent group of elective courses from outside of the Department, subject to the overall requirement that the emphasis of these elective courses is compatible with the professional orientation of a civil engineer. Such a program is the Minor in Management, which is particularly relevant to students interested in careers in construction or business management. Four of the required technical elective credits may be considered as satisfied by completion of the courses listed in Section 5.1; the total B.Eng. program in Civil Engineering with this Minor thus comprises a minimum of 106 credits. This fact, and timetabling conflicts, will normally mean that additional time will be needed to complete the degree with this Minor.

In addition to courses described in Section 5.1, the following courses given by other Departments are particularly relevant for civil engineering students:

301-206B	Philosophy of Structures
301-433A	Urban Planning I
301-433B	Urban Planning II
307-251A	Geophysical Exploration
307-304B	Behaviour of Rock Structures
308-250B	Numerical Analysis

In some cases enrolment may be limited, and in others the instructor's permission should be obtained before registration.

5.5 DEPARTMENT OF ELECTRICAL ENGINEERING

Chairman
P. Silvester, M.A.Sc.(Tor.), Ph.D.(McG.)

Professors
E.L. Adler, M.A.Sc.(Tor.), Ph.D.(McG.)
L. Blostein, M.Eng.(McG.), Ph.D.(Ill.)
R.P. Comsa, M.Sc.(Zurich), M.Eng(McG.)
G.L. d'Ombrain, B.Sc.Eng., Ph.D.(Lond.)
G.W. Farnell, S.M.(M.I.T.), Ph.D.(McG.), F.I.E.E.E.
T.J.F. Pavlasek, M.Eng., Ph.D.(McG.)
P. Silvester, M.A.Sc.(Tor.), Ph.D.(McG.)
C.D. Zames, B.Eng.(McG.), Sc.D.(M.I.T.)

Associate Professors
P.R. Belanger, S.M., Ph.D.(M.I.T.)
C.H. Champness, M.Sc.(Long.), Ph.D.(McG.)
M.J. Ferguson, M.S.(Cal.Tech.), Ph.D.(Stan.)
M. Fukada, M.S.E.E.(Tokyo), Ph.D.(Calif.)
A.A. Gundjian, B.Sc(Alexandria), Ph.D.(Penn.)
M.D. Levine, M.Eng(McG.), Ph.D.(Lond.)
N. Rumin, M.Sc., Ph.D.(McG.)
E. Sigurdson, B.Sc.(Man.), Ph.D.(Lond.)
F. Spitzer, B.Sc., Ph.D.(Lond.)
G.L. Yip, M.Sc.(Qu.), Ph.D.(Tor.)

Assistant Professors
R.C. Lee, B.Sc.(Man.), Ph.D.(McG.)
A.S. Malowany, B.Eng., Ph.D.(McG.)
B.T. Ooi, S.M.(M.I.T.), Ph.D.(McG.)

Lecturers
C.W. Bradley, M.Eng.(McG.)
K.L. Fraser, B.Eng.(McG.)

Special Lecturers
B. Gevay, M.Eng.(McG.)
B.A. Howarth, M.Eng., Ph.D.(McG.)
J.M. Keelty, M.Sc.(Birm.)
K.J. Koiste, B.Eng.(McG.)
M. Marin, M.A.(Madrid), Ph.D.(Calif.)

Sessional Lecturer
H.L. Nakra, Ph.D.(McG.)

Associated Faculty Member
J.S. Outerbridge, Ph.D., M.D.C.M.(McG.)

Research Associate
M.C. Jain, Ph.D.(Delhi)

Demonstrators
To be appointed

Looking back from the year 2000, historians of electrical engineering will probably consider the twentieth century to be divisible into three equal periods. The first period witnessed a rapid and exciting growth in the sophistication of electromechanical devices, while the second was marked by a startling growth in electronic communications. It is probably safe to forecast that the present era will be the age of digital computer systems and computer communications.

Since a digital computer is essentially a large-scale electronic system, it is quite natural for the growing importance of the computer to be reflected in the ever evolving curriculum of the Department of Electrical Engineering. Thus a substantial portion of the Department's activity centers on the electronic devices and circuits which form the building blocks of electronic computers. An equally great amount of effort is devoted to the structure and organization of computers. The physical make-up of computers, however, forms only a portion of the broader picture. An important part of the electrical engineer's work has always been, and probably always will be, the design of electrical devices and systems. Computer-aided design thus falls well within the province of the electrical engineer. So do problems of man-machine and computer-computer communications, since the effective use of electronic communication technologies as well as the efficient distribution of electrical energy require rapid movement and processing of data. At the same time, small special-purpose computers are being incorporated as functional sub-units into virtually every conceivable variety of electrical system.

While the Department recognizes the importance of the computer revolution, it has not neglected in its program such important areas as communications, control systems, electromagnetic propagation, electro-optical systems, power engineering, and electron devices and circuits.

The Department offers two accredited undergraduate programs, a regular and an honours course leading to the professionally recognized degrees of, respectively, B.Eng. and B.Eng.(Honours). Suitably qualified and motivated students can complete either program in six semesters (three years) of post-collegial studies. Both courses provide the student with a strong background in mathematics, networks, electronics, computer engineering and electromagnetics. These provide the fundamental tools for further studies. Because of the diversity of the field it is not possible to become expert in everything, but it is considered important for the student to obtain an exposure to a diverse subset of the important areas. In order to promote this breadth, the student is required to choose from a restricted set of courses. Finally, there is a large group of technical electives which allow considerable freedom to specialize in specific areas, or to obtain a broad perspective of the field. Six major areas of specialization are defined: Communication Systems; Computer Engineering; Control Systems; Electromagnetics and Waves; Solid State Devices and Electronics; Power Engineering.

In addition to technical elective requirements, the student must also satisfy a general elective requirement. Although it is possible to take technical

courses to satisfy this requirement, students are urged to use this freedom to study in some depth a field entirely outside electrical engineering. The Faculty is defining course packages that study a certain field in sufficient depth to be called a minor. With judicious use of general electives and the occasional additional course, a student in the regular course should be able to take a faculty minor.

The Honours curriculum is designed to produce a stronger background in the mathematical and physical bases of electrical engineering with the goal of an in-depth study of certain areas of the field. As a result, the required courses stress a more fundamental and analytical approach to the subject matter. The technical electives must be chosen to provide coherent study of certain well-defined areas and should serve as a basis for future study either in graduate school or industry. Students in this curriculum normally benefit from smaller classes and more personal attention on the part of the staff.

Laboratories for both teaching and research work are good, and growing. Because much of the Department's teaching is organized on a project basis, it is occasionally difficult to draw a clear line between graduate and undergraduate activities. In the laboratories, investigative work is often carried out by advanced undergraduate students as well as graduates; in the classroom, graduate and undergraduate courses frequently overlap. The facilities of the Department include several digital computer installations, as well as analog computers. In addition, the new Louis Herdt coherent optics laboratory, semiconductor devices laboratory, acoustics laboratory, and various others provide challenging opportunities for project work as well as research.

In recent years, an advanced degree has become increasingly necessary for electrical engineers interested in pursuing technically oriented careers. More than one-third of McGill Electrical Engineering graduates currently continue to a Master's degree or beyond. While the computer-oriented bias evident in the undergraduate program is also reflected in graduate course offerings, project and thesis work is usually planned on a highly individual basis and hence covers a very broad spectrum.

CURRICULUM FOR THE B.ENG. DEGREE IN ELECTRICAL ENGINEERING (REGULAR)

Required Courses

		Course Credit	
NON–DEPARTMENTAL SUBJECTS			
189-261A.B	Linear Algebra and Differential Equations I	3	
189-262A,B	Linear Algebra and Differential Equations II	3	
189-263A,B	Advanced Calculus	3	
189-264A,B	Introduction to Boundary Value Problems	3	
189-381A	Functions of a Complex Variable	3	
198-321A	Modern Physics	3	
303-081A	Analytical Mechanics	3	
303-182B	Vibrations and Waves	3	24
ELECTRICAL ENGINEERING SUBJECTS			
304-001A,B	Introductory Circuit Theory	3	
304-021A,B	Introduction to Computers	3	
304-131A,B	Introductory Electronics	3	
304-191A,B	Electrical Laboratory I	3	
304-202A,B	Network Analysis	3	
304-251A,B	Electromagnetic Fields	3	
304-292A,B	Electrical Laboratory II	3	
304-333A,B	Electronic Circuits	3	
304-352B	Electromagnetic Waves	3	
304-470F	Technical Paper	2	
304-493A,B	Electrical Laboratory III	3	
304-494A,B	Electrical Laboratory IV	3	35

Required Courses (Breadth)

Choose 12 credits (4 courses) from the list below

304-222A,B	Digital System Design	3
304-261A,B	Electromechanical Energy Conversion I	3
304-303A,B	Signals and Systems	3
304-305B	Random Signals and Noise	3

304-332B	Properties of Solids	3	
308-250A,B	Numerical Analysis	3	12

Elective Courses

TECHNICAL ELECTIVES

Eighteen credits (6 courses) chosen from 300, 400, 500, or 600 level courses given by the department. Courses contained in the breadth list but not used for that requirement may also be chosen. Subject to departmental approval up to six credits (2 courses) may be taken from outside the department. **18**

GENERAL ELECTIVES

Six credits (2 courses) selected in accordance with departmental regulations. 6

(See section below)

Total **95**

TYPICAL REGULAR PROGRAM

A typical organization of the six semester study leading to a B.Eng. in Electrical Engineering is given below:

REGULAR COURSE

Semester 1 (Fall)

304-001A	Circuits	3
304-021A	Intro. to Computers	3
303-081A	Analytical Mechanics	3
189-261A	Diff. Eq. I	3
189-263A	Advanced Calculus	3
		15

Semester 2 (Winter)

304-131B	Electronics	3
304-191B	Elect. Lab I	3
303-182B	Vibration and Waves	3
189-262B	Diff. Eq. II	3
189-264B	Boundary Value Problems	3
		15

Semester 3 (Fall)

198-321A	Modern Physics	3
304-251A	Electromagnetic Theory	3
304-202A	Networks	3
189-381A	Complex Variables	3
	Required breadth course	3
		15

Semester 4 (Winter)

304-333B	Electronics	3
304-292B	Elect. Lab II	3
304-352B	Electromagnetic Waves	3
	Required breadth courses	6
	General Elective	3
		18

Semester 5 (Fall)

304-470F	Technical Paper	2
304-493A	Elect. Lab III	3
	Technical Electives	9
	Required breadth course	3
		17

Semester 6 (Winter)

304-494B	Elect. Lab IV	3
	Technical Electives	9
	General Elective	3
		15

Notes:

1) 304-222, Digital System Design, is a prerequisite to several computer oriented courses. It is therefore recommended that students electing to take this course do so in Semester 3 or Semester 4.

2) A core course is the same as a required course and necessitates a C or better for acceptable credit.

CURRICULUM FOR THE B.ENG. DEGREE IN ELECTRICAL ENGINEERING (HONOURS)

Required Courses

		Course Credit	
NON-DEPARTMENTAL SUBJECTS			
189-266A,B	Linear Algebra and Differential Equations I	3	
189-267A,B	Linear Algebra and Differential Equations II	3	
189-268A,B	Advanced Calculus	3	
189-269A,B	Introduction to Boundary Value Problems	3	
189-384B	Probability	3	
189-385A	Complex Variables	3	
198-271B	Quantum Physics	3	
303-086A	Dynamics I	3	
303-187B	Dynamics II	3	27
ELECTRICAL ENGINEERING SUBJECTS			
304-001A,B	Introductory Circuit Theory	3	
304-021A,B	Introduction to Computers	3	
304-136B	Introductory Electronics	3	
304-191A,B	Electrical Laboratory I	3	
304-207A	Network Analysis	3	
304-256A	Electromagnetic Fields	3	
304-276A	Thermal Physics	3	
304-292A,B	Electrical Laboratory II	3	
304-308B	Signals and Systems	3	
304-337B	Electronic Properties of Solids	3	
304-338B	Electronic Circuits	3	
304-357B	Electromagnetic Waves	3	
304-470F	Technical Paper	2	
304-493A,B	Electrical Laboratory III	3	
304-499A,B	Electrical Laboratory IV	3	44

Elective Courses

Technical Electives

Twenty-one credits (7 courses) must be selected from graduate and undergraduate courses. At least six credits of 500 or 600 level courses in Electrical Engineering must be selected in each of two areas, as defined in this calendar (Computer Engineering, Communication Systems, Control Systems, Power Engineering, Electromagnetics and Waves, Electronic Devices and Circuits). Course selections are subject to the approval of the department. Subject to departmental approval up to six credits (2 courses) may be taken from outside the department. 21

GENERAL ELECTIVES

Six credits (2 courses) selected in accordance with departmental regulations. (See section below) 6

Total **98**

Typical Honours Program

A typical organization for six terms of study leading to a B.Eng. (Honours) is given below.

Honours Course

Semester 1 (Fall)			**Semester 2 (Winter)**		
304-001A	Circuits	3	304-136B	Electronics	3

304-021A	Intro. to computers	3	304-191B	Elect. Lab. I	3
303-086A	Dynamics I	3	303-187B	Dynamics II	3
189-266A	Diff. Eq. I	3	189-267B	Diff. Eq. II	3
189-268A	Advanced Calculus	3	189-269B	Boundary Value Problems	3
			198-271B	Quantum Physics	3
		15			18

Semester 3 (Fall)

189-385A	Complex Variables	3
304-207A	Networks	3
304-256A	Electromagnetic Fields	3
304-276A	Thermal Physics	3
	General or Technical Elective	3
		15

Semester 4 (Winter)

189-384B	Probability	3
304-308B	Signals and Systems	3
304-338B	Electronics	3
304-357B	Electromagnetic Waves	3
304-292B	Elect. Lab II	3
304-337B	Electronic Properties of Solids	3
		18

Semester 5 (Fall)

304-470B	Technical Paper	2
304-493A	Elect. Lab III	3
	Technical Electives	9
	General Elective	3
		17

Semester 6 (Winter)

304-499B	Elect. Lab IV	3
	Technical Electives	12
		15

Notes:
1) 304-222, Digital System Design, is a prerequisite to several computer-oriented courses. It is recommended that the student take this as the elective in Semester 3 or Semester 4.
2) A core course is the same as a required course and necessitates a C or better for acceptable credit.

PROGRAMS IN ELECTRICAL ENGINEERING

Our course of study allows considerable flexibility. By an appropriate choice of courses the student can obtain concentrated study in computer engineering, power systems, electromagnetics and waves, electronic devices and integrated circuits, communications or control systems. Alternatively a student may mix courses from these areas to obtain a broad technological base in Electrical Engineering. Some suitable combination of electives are listed below.

COMPUTER ENGINEERING

Computer engineering at McGill emphasizes the structure, design, and role of computers in modern systems. Modern communication, control, and power systems all have mini-computers deeply imbedded within them. In order to obtain the best system, the computer engineer needs a thorough understanding of both hardware and software. A combination of required courses and technical electives satisfy this aim.

Required Course		**Credits**
304-021A,B	Introduction to Computers	3

Required Breadth Courses

304-222A,B	Digital System Design	3
304-250A,B	Numerical Analysis	3

Technical Electives (Electrical Engineering)

304-324A	Small Computer Systems	3
304-425B	Computer Organization and Architecture	3
304-529A	Image Processing and Communication	3
304-531A	Real Time Systems	3
304-532A	Computer Graphics	3
304-533B	Text Processing	3

Other Electives

308-300A,B	Programming Languages	3
308-310B	Computer Software Organization and Design	3
308-315A	Information Structures	3
308-320B	Files and Data Bases	3
189-417A	Mathematical Programming	3
280-373A	Operations Research I	3
280-374B	Operations Research II	3

In addition to the above there are projects involving computation, digital system design, computer interfacing and applications in the required electrical laboratories.

COMMUNICATION SYSTEMS

Required Breadth Courses

304-303A,B	Signals and Systems	3
304-305B	Random Signals and Noise	3

TECHNICAL ELECTIVES

304-324A	Small Computer Systems	3
304-411A	Communication Systems	3
304-472B	Communications Technology	3
304-512B	Digital Signal Processing	3
304-521A	Digital Communications	3
304-522B	Statistical Communication Theory	3
304-529A	Image Processing and Communication	3
304-531A	Real Time Systems	3
304-593B	Antennas and Propagation	3

In addition to the above, courses describing some of the components used in communication systems are available. A strong background in antennas, microwaves, solid state electronics and computer structure is recommended. Finally the system ideas embodied in control system theory can be quite useful.

CONTROL SYSTEMS

Required Breadth Courses

304-303A,B	Signals and Systems	3
304-305B	Random Signals and Noise	3

TECHNICAL ELECTIVES

304-314A	Small Computer Systems	3
304-404A	Control Systems	3
304-464A	Power Systems Analysis	3
304-501A	Frequency Design of Linear Control Systems	3
304-502B	State Space Methods in Linear Systems	3
304-512B	Digital Signal Processing	3
304-531A	Real Time Systems	3

To obtain sufficient breadth to design complex control systems, additional knowledge of computer structure, communications, electronics and mathematical programming is desirable.

POWER ENGINEERING

Required Breadth Courses

304-261A,B	Electromechanical Energy Conversion I	3

TECHNICAL ELECTIVES

304-462B	Electromechanical Conversion II	3

304-463B	High Voltage Engineering	3
304-464A	Power System Analysis	3
304-501A	Frequency Design of Linear Control Systems	3
304-502B	State Space Methods in Linear Systems	3
304-531A	Real Time Systems	3
304-562A	Continuum Electromechanics	3
304-565B	Inverter and Chopper Circuits	3

The above courses together with relevant options from the systems, circuits, control, electromagnetics and computer areas form a strong foundation for power engineers.

ELECTROMAGNETICS AND WAVES

TECHNICAL ELECTIVES

304-471B	Acoustics	3
304-562A	Continuum Electromechanics	3
304-575B	Optical and Magnetic Properties of Solids	3
304-592A	Microwave Theory and Techniques	3
304-593B	Antennas and Propagation	3
304-596B	Coherent Wave Optics	3

These courses along with the required electromagnetics courses serve as a basis for further work in electromagnetic phenomena and as an introduction to microwave devices for all electrical engineers.

ELECTRONIC DEVICES AND CIRCUITS

Required Breadth Courses

304-222A,B	Digital System Design	3
304-332B	Properties of Solids	3
304-303A,B	Systems and Signals	3

TECHNICAL ELECTIVES

304-443A	Integrated Circuit Technology	3
304-474B	Electronic Design	3
304-572A	Laser Electronics	3
304-575B	Optical and Magnetic Properties of Solids	3
304-579A	Semiconductor Devices and Models	3
304-596B	Coherent Wave Optics	3

In addition to the above, the required courses give a firm basis in both the physics of electronic devices and linear and digital electronics. The required laboratories include extensive experimentation using modern integrated and discrete electronics components, a small scale integrated circuit fabrication laboratory and a laser communications and holography facility.

REGULATIONS CONCERNING GENERAL ELECTIVES

Six credits of electrical engineering electives or any of the courses listed below. *At least three credits must* be selected at either the *three or four hundred* level in Arts, Science or Management, or from the *two, three, or four hundred* level in Engineering.

Humanities

All two, three and four hundred level courses from the departments of Anthropology, Art History, Classics, Economics, English, French Language and Literature, History, Linguistics, Philosophy, Political Science, Religious Studies and Sociology, with the exception of 154-307, 154-317, 154-357, 107-210 and 107-211, 120-338, 120-302, 120-303, 120-349, 166-228, 166-350.

Management

280-211, 221, 222 and all three and four hundred level courses except 280-331.

Mathematics

189-242, 243, 271, 272, 318, 328, 333 and all courses numbered *higher* than 189-355.

Physics

198-214, 309, 314, 319, 351, 346, 437, 451, 452, 454, 457 and 496.

Chemistry

All two, three and four hundred level courses *except* 180-200, 204, 214, 234 and 447.

Earth Sciences

All two, three and four hundred level courses from the departments of Meteorology, Geological Sciences and Geography, *except* 183-202, 186-230 and 186-331.

Biological Sciences

All two, three and four hundred level courses from the departments of Anatomy, Biochemistry, Biology, Microbiology and Immunology, Physiology and Psychology with the *exception* of 189-231, 189-309, 189-373, 204-204, 204-305, 204-307, 552-201, 552-202 and 528-201, 177-373.

Computer Science

308-230, 250, 300, 305, 310, 315, 320, 415, and 425.

Architecture

301-001, 010, 102, 203, 204, 205, 206, 230, 232 and 443.

Engineering Economy, Law & Management

300-010, 300-011, 300-020 and 300-112.

Civil Engineering

303-107 and all two, three and four hundred level courses.

Mechanical Engineering

305-040, 305-141 or 142 and all two, three and four hundred level courses except 305-215 and 317.

Chemical, Mining & Metallurgical Engineering

302-122, 302-131, 306-120, 306-140, 306-141, 306-160, 306-161, 306-162 and all two, three and four hundred level courses *except* 302-361, 302-371, 306-225, 306-326, and 306-332.

COURSES OFFERED BY THE DEPARTMENT

304-001A,B INTRODUCTORY CIRCUIT THEORY 3(3-1-5). (Co-requisite: 189-261A,B or 189-266A,B.) KVL and KCL laws, branch constitutive relations, response of simple circuits to suddenly applied excitations, impulse response, steady-state response to sinusoidal excitations, power and energy, elementary loop and nodal analysis, network theorems.

304-021A,B INTRODUCTION TO COMPUTERS 3(3-1-5). Introduction to digital systems, information and arithmetic; elementary combinational and sequential logic; stored program control and simple machine language programs; introduction to assemblers and compilers. The student will also experience both simulations and the use of a small (PDP-8) computer. FORTRAN will be used for simulation and computational exercises.

304-131A,B INTRODUCTORY ELECTRONICS 3(3-0-6). (Prerequisite: 304-001A,B*.) Semiconductor junctions and transistor characteristics, bipolar and field-effect transistors. Digital circuits and logic gates. Transistor circuits and biasing. Frequency response of small-signal amplifiers. Integrated circuit fabrication.

304-136B INTRODUCTORY ELECTRONICS 3(3-0-6). (Prerequisite: 304-001A,B*.) Honours section of 304-131; similar in content to 304-131 but taught in greater depth.

304-181A,B ELECTRIC POWER 3(3-0-6). (prerequisite: 189-261A,B.) Electrical circuit theory; distribution of electric power, electrical power utilization, electrical machines, transformers, controlled rectifiers. Not open to electrical engineering students.

304-191A,B ELECTRICAL LABORATORY I 3(1-5-4). (Co-requisite: 304-131A,B or 304-136B.) Operating principles and limitations of basic electrical and electronic laboratory measurements and techniques including meters, oscilloscopes, generators and bridges.

304-202A,B NETWORK ANALYSIS 3(3-1-5). (Prerequisite: 304-001A,B. Co-requisite: 189-381A.) Formulation of network equilibrium equations, transform solution techniques, network functions, two-port analysis, network theorems, pole-zero design techniques.

304-207A NETWORK ANALYSIS 3(3-0-6). (Prerequisite: 304-001A,B. Co-requisite: 189-381B. or 189-385B.) Honours section of 304-202; similar in content to 304-202 but taught in greater depth.

304-222A,B DIGITAL SYSTEM DESIGN 3(3-0-6). (Prerequisite: 304-021A,B; 304-131A,B** or 304-136B**.) Information representation and manipulation, coding, logic functions, Boolean algebra, graphical and algorithmic methods of synthesis and minimization of combinational circuits, finite state machines, synthesis of synchronous sequential networks, asynchronous sequential logic.

304-251A,B ELECTROMAGNETIC FIELDS 3(3-0-6). (Prerequisites: 304-001A,B*, 304-021A,B, 189-263A,B and 189-264A,B, or 189-268A,B and 189-269A,B.) Electrostatics and electric potential; kinematics, electrodynamics and Maxwell's equations; magnetostatics and magnetic vector potential; energy and power; time-varying fields; applications to engineering problems.

304-256A ELECTROMAGNETIC FIELDS 3(3-0-6). (Prerequisites: 304-001A,B, 189-263A,B and 189-264A,B, or 189-268A,B and 189-269A,B.) Honours section of 304-251; similar in content to 304-251 but taught in greater depth.

304-261A,B ELECTROMECHANICAL ENERGY CONVERSION I 3(3-0-6). (Co-requisite: 304-202A,B or 304-207A.) Basic electromechanical energy conversion processes. Simple electromechanical transducers. Transformers. Machine models. Characteristics of commutator, induction and synchronous machines.

304-276A THERMAL PHYSICS 3(3-0-6). (Prerequisites: 198-271B, 303-187B.) Definition of thermodynamics; equilibrium thermodynamics; potentials as Legendre transforms of internal energy; concept of thermodynamic energies; equilibrium and nonequilibrium properties of matter; heat and current flow; statistical mechanical foundation of thermodynamics; distribution functions, application to material properties.

304-283A,B ELECTRONIC INSTRUMENTATION 3(3-0-6). (Prerequisite: 304-181A.) Linear electronic devices, amplifiers and feedback, switching circuits, digital and logic circuits, instrumentation measurement transducers, modulation and transmission of signals. Not open to electrical engineering students.

304-292A,B ELECTRICAL LABORATORY II 3(3-5-4). (Prerequisite: 304-191A,B. Co-requisite: 304-202A or 304-207A.) Advanced instrumentation and measurement techniques with applications to electronic circuit design.

304-303A,B SIGNALS AND SYSTEMS 3(3-0-6). (Co-requisite: 304-202A,B or 304-207A.) Inputs, outputs, states. Linearity, time-invariance. Analysis of linear system in state form. Convolution and transfer functions. Signal space, orthogonal expansions, Fourier series. Fourier transforms and applications to modulation and sampling. Feedback, the Routh-Hurwitz criterion, the root locus and the Nyquist stability criterion.

304-305B RANDOM SIGNALS AND NOISE 3(3-0-6). (Prerequisite: 304-303A,B or 303-308A.) Introduction to probability, engineering applications and heuristic basis, axioms and sets, conditional probability, independence; random variables, definitions, functions, moments, vector and scalar, characteristic functions; random processes, noise model, stationarity, ergodicity, correlation and power spectrum, spectrum measurements; response of linear systems to random inputs, cross spectral densities, narrow band noise; introduction to discrete time and space processes, Markov chains and elementary queues.

304-308B SIGNALS AND SYSTEMS 3(3-0-6) (Co-requisite: 304-207A or 304-202A, B.) Honours section of 304-303; similar in content to 304-303 but taught in greater depth.

304-324A SMALL COMPUTER SYSTEMS 3(3-0-6) (Prerequisite: 304-021A,B or 308-210A,B. Recommended: 304-222A,B.) Components, basic machine structure, microprogrammed control, order code specification, assembly languages, branching mechanisms, subroutine organization, interrupt systems and interrupt programming, program statistics, peripheral device servicing, A/D and D/A programming, simple scheduling mechanisms, real-time operating system functions.

304-332B PROPERTIES OF SOLIDS 3(3-0-6). (Prerequisite: 198-321A.) Statistical properties of materials. Electrons in metals and semiconductors, free electrol theory of metals, energy bands. Conduction processes in semiconductors. Theory of the pn junction and bipolar transistor.

304-333A,B ELECTRONIC CIRCUITS 3(3-0-6). (Prerequisites: 304-131A, B or 304-136B, 304-202A, B* or 304-207A*. Recommended Co-requisite: 304-303A,B or 304-308B.) Multistage amplifiers; the operational amplifier. Feedback and compensation. Noise. Linear analog systems: the integrator, oscillators, tuned amplifier. Nonlinear analog systems: comparator, sample-and-hold circuits, logarithmic amplifier. Power circuits.

303-337B ELECTRONIC PROPERTIES OF SOLIDS 3(3-0-6). (Prerequisites: 198-321A or 198-271B, 304-131A,B or 304-136B.) Review of kinetic theory of gases, crystal lattices, X-ray diffraction, electrons in metals, drift velocity, mobility, free electron theory, density of states, Fermi energy, Kronig Penney model, energy bands, Brillouin zones, intrinsic semiconductor, extrinsic semiconductor, recombination, drift mobility determination, continuity equation, capacitance of pn junction, diode equation, bipolar transistor.

304-338B ELECTRONIC CIRCUITS 3(3-0-6) (Prerequisites: 304-136B or 304-131A,B, 304-207A or 304-202A,B. Recommended co-requisite: 304-308B.) Honours section of 304-333; similar in content to 304-333 but taught in greater depth.

304-352B ELECTROMAGNETIC WAVES 3(3-0-6). (Prerequisites: 304-251A or 304-256A, 303-182B or 303-187B.) Steady-state and transient analysis of wave propagation in uniformly distributed systems; energy and power transfer; models, scattering parameters and the Smith chart; measurements on distributed systems; dispersion, periodically distributed systems and the w-B diagram.

304-357B ELECTROMAGNETIC WAVES 3(3-0-6). (Prerequisites: 304-256A, 303-182B or 303-187B.) Honours section of 304-352; similar in content to 304-352 but taught in greater depth.

304-404A CONTROL SYSTEMS 3(3-0-6). (Prerequisites: 304-303A, B and 304-305B; or 304-308B and 189-384B.) Frequency response design: gain and phase margins, Nichols chart; lead, lag, and PID controllers. Discrete and sampled-data systems: convolution sum, the z-transform, transfer function, state space description; stability; bilinear transformation and design. Controllability and observability. Linear regulator problem: quadratic performance indices. Matrix Lyapunov equation and Riccati equation. Linear observers. Optimum feedback control of linear systems subject to stochastic disturbances. Stationary Kalman filter, separation theorem.

304-411A COMMUNICATION SYSTEMS 3(3-0-6). (Prerequisites: 304-303A,B or 304-308B, 304-305B or 189-384B.) Review of power spectral analysis and auto correlation; amplitude, single side-band modulation and demodulation; frequency and phase modulation, modulators and demodulators; stereo FM, pulse modulation, pulse width amplitude and position modulation; time and frequency multiplexing; pulse code modulation (PCM); quantization; phase shift and frequency shift keying; noise performance of various modulation schemes; representation of noise; threshold effects in PCM and FM; probability of error for pulse systems; concept of channel capacity.

304-425B COMPUTER ORGANIZATION AND ARCHITECTURE 3(3-0-6). (Prerequisite: 304-222A,B.) Recommended: 304-324A. Components, basic computer subassemblies. Minicomputer design, microprogramming, execution control. CPU memory timing problems, look ahead systems and pipeline computers. Array processors. Special features. Virtual memory organization. I/O Architecture. Case studies of advanced computer system organization.

304-443A INTEGRATED CIRCUIT TECHNOLOGY 3(3-0-6). (Prerequisite: 304-333A,B.) Alloyed contacts, diffusion techniques, diffusion theory, four point probe, epitaxial growth, silicon dioxide formation, photolithography, window opening, selected metallization, diode and transistor fabrication, junction depth determination, junction capacitance for general profile, fabrication of monolithic integrated circuits, isolation, junction capacitors, diffused resistors, mask making, device mounting, thin film passive components, thick film components, integrated circuit layout, theory of pnpn devices and unijunction transistors, theory of field effect transistor.

304-462B ELECTROMECHANICAL ENERGY CONVERSION II 3(3-0-6). (Prerequisite: 304-261A,B.) Fractional horse power motors. Solid-state motor control. The structure of machines including saliency, saturation and winding harmonics. Electromechanical transients and stability analysis.

304-463B HIGH VOLTAGE ENGINEERING 3(3-0-6). (Prerequisite: 304-251A,B or 304-256A.) Introduction to high voltage engineering. Gas discharges in uniform and non-uniform fields. Disruptive and corona discharges. Surface flashover and surface corona. Gases of high dielectric strength. Applications to basic problems of extra-high-voltage and ultra-high-voltage transmission. Corona in bundle conductors. Interference, audible noise and corona losses. Voltage distribution along insulator strings. Compact metal clad SF_6 substations. Modern high voltage laboratories. Testing techniques.

304-464A POWER SYSTEM ANALYSIS 3(3-0-6) (Prerequisite: 304-261A,B.) Steady-state and transient characteristics of three phase system components; steady-state load flow calculations in three phase networks, load distribution; faults; stability calculations in two machine systems including effects of faults and switching operations; techniques for improving stability limits.

304-470F TECHNICAL PAPER 2(0-0-6). After completion of four semesters of work, each student should consult his staff adviser for guidance in the selection of a suitable topic for a technical paper based on the student's non-university-course experience. The papers are due at the latest on entering the final semester.

304-471B ACOUSTICS 3(3-0-6). (Prerequisites: 304-202A, B, 304-352B or 304-357B.) This course is divided into three main topics: (1) TRANSDUCER DESIGN: wave fundamentals, directivity patterns, resonators and filters (muffler design), microphones and loudspeakers. (2) ENVIRONMENTAL ACOUSTICS: effects of noise on man, criteria for noise control, building acoustics, noise control outdoors. (3) UNDERWATER ACOUSTICS: communication in the sea, refraction, interference, sound channels, sonar, masking by noise.

304-472B COMMUNICATIONS TECHNOLOGY 3(3-0-6). (Prerequisite: 303-303A, B or 304-308B.) Theoretical and practical aspects of communications technology will be examined through the study of existing systems which are representative of the state of the art. Case-studies will be selected from areas such as satellite communications, radio astronomy, microwave systems, radar, television and sonar.

304-474B ELECTRONIC DESIGN 3(3-0-6). (Prerequisites: 304-222A,B, 304-303A,B or 304-308B, 304-333A,B or 304-338B. Recommended: 304-352B, 304-411A.) Analysis of complex electronic systems from the system design viewpoint. Factors affecting the choice of subsystem hardware; reliability, availability, cost of design and assembly. Identification of critical components and subsystems. The principles of electronic system design will be illustrated with examples drawn from the areas of instrumentation, television, radar, navigation and direction finding, broadband communication links, computers, and supervisory and control systems.

304-493A,B ELECTRICAL LABORATORY III 3(0-5-4). (Prerequisite: 304-292A,B. Co-requisite: 304-333A,B or 304-338B.) Each student selects a program in an area offered by the department. This program may be in the nature of a series of experiments covering some aspects of the area or a term-long project. The group size is usually two students and each student is required to present a seminar and contribute to a group technical report on a chosen topic. The director(s) of the area involved may require additional prerequisites and co-requisites by some, if not all, members of the group.

304-494A,B ELECTRICAL LABORATORY IV 3(0-5-4). (Prerequisite: 304-493A,B.) Similar to 304-493A,B. The material to be covered may be of a more open-ended nature than 304-493A,B. For diversification on the part of the student the area program chosen must be different from that of 304-493A,B.

304-499A,B ELECTRICAL LABORATORY IV 3(0-5-4). (Prerequisite: 304-292A,B; 304-333A,B.) Honours section of 304-494; similar in content to 304-494 but involving more challenging assignments.

304-501A FREQUENCY DESIGN OF LINEAR CONTROL SYSTEMS 3(3-0-6). (Prerequisite: 304-303A,B or 304-308B.) Frequency response design of linear control systems. Compensators, error constants. Sensitivity, two-degree-of-freedom design. Cascade and other multiloop designs. Feedforward. Frequency response design of multivariable linear control systems. Decoupling. Discrete systems, sequences, convolution, difference equations. The z-transform. Sampled-data systems and their design by frequency-domain techniques.

304-502B STATE SPACE METHODS IN LINEAR SYSTEMS 3(3-0-6). (Prerequistes: 304-501A.) State representation of linear systems. The state transition matrix. System modes and Jordan forms. Controllability and observability. Transfer functions and minimal representations. State representation of discrete and sampled-data systems. Canonical forms. Model control and pole placement by state feedback. Quadratic performance index, the Lyapunov matrix equation. Stability and Lyapunov functions. The optimal regulator problem. Dead-beat controllers. Disturbance compensation, feedforward. Linear state observers. Optimization of output-feedback controllers for min-max eigenvalue placement or minimization of a quadratic performance index.

304-512B DIGITAL SIGNAL PROCESSING 3(3-0-6). (Prerequisite: 304-303A,B or 304-308B.) Discrete-time linear systems theory, digital filter synthesis techniques, quantization effects in digital filters, discrete Fourier transforms including FFT algorithms, high-speed convolution and correlation techniques.

304-521A DIGITAL COMMUNICATION 3(3-0-6). (Prerequisites: 304-305B or 189-384B, 304-303A,B or 304-308B.) Introduction to digital transmission, digital data and performance criteria, discussion of digital transmission facilities; basic definitions; coding and framing formats; baseband pulse modulation, pulse amplitude and pulse frequency modulation, phase shift keying; signal spectra; demodulation techniques noting problems of framing and synchronization; performance on Gaussian channel, bandlimited channel characterization, pulse dispersion, adaptive and non-adaptive equalization, Gaussian and impulsive- noise, pulse jitter, repeaters and analysis; introduction to error control, parity checking, error detection, automatic repeat request performance estimates.

304-552B STATISTICAL COMMUNICATION THEORY 3(0-0-6). (Prerequisites: 304-305B or 189-384B, 304-303A, B or 304-308B.) Optimum receiver principles; vector channels and decision regions, matched filters, error evaluation for various signal sets; channel capacity, important channel models, non-white Gaussian noise, bandpass channels, random amplitude and phase, linear (amplitude, single side-band double side-band) modulation, twisted modulation, frequency modulation, phase modulation, bandwidth and weak noise suppression, phase-lock loop.

304-529A IMAGE PROCESSING AND COMMUNICATIONS 3(3-0-6). (Prerequisites: 304-021A,B, 304-303A,B or 304-308B.) Psychophysics of vision, properties of images; sampling, digitizing, and displaying images; geometric and algebraic processing, spatial filtering, image coding and transmission; binary image analysis, segmentation, descriptions of lines and shapes; representation, linguistic methods, software and hardware systems, applications; scene analysis.

304-531A REAL–TIME SYSTEMS 3(3-3-3). (Prerequisite: 304-222A,B, or 304-324A.) Real-time engineering applications of computers to on-line control communication systems and data acquisition. This course is concerned with aspects of hardware, software, the hardware-software interface and their integration into a completed system. The course requires the completion of individual or group projects using one of the department's mini- or micro- computers.

304-532A COMPUTER GRAPHICS 3(3-3-3). (Prerequisite: 304-324A.) Introduction to computer graphics systems and display devices: core or disc refreshed, storage tube, scan conversion systems; graphical input and interactive graphical techniques - light pen, joystick, Rand tablet; display files: graphics languages and data structures; 2D transformations; 3D computer graphics, hidden line removal and shading; graphics system design; applications. The course will consist of lecture material as well as a laboratory project involving the preparation and running of graphics programs on the PDP-15 and IBM 360 systems. (Alternate years, next given 75/76.)

304-533B TEXT PROCESSING 3(3-0-6). (Prerequisite: 304-324A.) Data editing by batch and on-line entry; manipulation of text and data. Concepts of type design and typography. Typesetting practice and technology. Production technique in printing industry as applied to letter, book and journal publication. Applications of numerical control techniques and computerized decision making to printing, particularly typesetting. (Alternate years, next given 76/77.)

304-543B NUMERICAL METHODS IN ELECTROMAGNETICS 3(3-0-6). (Prerequisite: 304-251A,B or 304-256A.) Mathematical representation of fields. Discrete approximations for continuous differential and integral operators. Methods for solving deterministic and eigenvalue problems by direct and iterative means.

304-561A ELECTRIC MACHINE DESIGN 3(3-0-6). (Prerequisite: 304-261A,B.) The output equations of electromagnetic apparatus. Specific electric and magnetic loading. Magnetic circuits. Time constants and power gain. Windings including pole amplitude modulation. Leakage inductances. Commutation interpoles and compensation. Per-unit values. (Alternate years, next given 75/76.)

304-562A. CONTINUUM ELECTROMECHANICS 3(3-0-6). (Prerequisite: 304-251A,B or 304-256A.) Quasi-static electromagnetic field equations. Field transformation in moving co-ordinate systems. Boundary conditions and constitutive relations for moving media. Magnetic diffusion and charge relaxation in moving media. Maxwell's stress tensor for the evaluation of force densities. Electromechanics of elastic solids and Newtonian fluids. Application of theories to magneto-hydrodynamics, electro-hydrodynamics, magnetic pumps, linear induction motor and magnetic levitation. (Alternate years, next given 76/77.)

304-564B CONTROL RECTIFIER CIRCUITS 3(3-0-6). (Prerequisite: 304-333A,B or 304-338B.) Simple polyphase rectifiers. Thyristor characteristics. Fully and semi-controlled bridges. Interphase transformers. Commutation, regulation and equivalent circuits. Harmonic content. Active loads. Cycloconverters. (Alternate years, next given 75/76.)

304-565B INVERTERS AND COPPER CIRCUITS 3(3-0-6). (Prerequisite: 304-333A,B or 304-338B.) Properties of circuits employing the forced commutation of thyristors to perform a switching function. Static and dynamic properties of thyristors and diodes. Constant voltage and constant current inverters, three phase inverters. Choppers. Motor loads. (Alternate years, next given 76/77.)

304-572A LASER ELECTRONICS 3(3-0-6). (Prerequisites; 198-271B, 304-332B or 304-337B.) Review of quantum mechanical and statistical mechanical concepts and techniques. Principle of amplification by stimulated emission of radiation; analysis of resonant cavity and travelling wave maser amplifiers; coherence, stability and noise; characteristics of gaseous, solid state and semi-conductor junction lasers. Nonlinear effects for modulation and detection of laser beams; applications to communication, measurements, signal processing and other fields as time permits.

304-573B MICROWAVE DEVICES AND CIRCUITS 3(3-0-6). (Prerequisites: 304-592A, 304-332B or 304-337B.) Gunn diodes. LSA mode operation; Gunn oscillators. Tunnel diodes, IMPATT and TRAPATT oscillators. Parasites in tunnel diode circuits; noise, microwave transistors: models; scattering parameter design of distributed amplifiers. High frequency diodes: limitations in sensitivity, noise figure and dynamic range. Varactor multipliers. Parametric amplifiers: noise in uncooled amplifiers; use of circulators in parametric amplifiers. (Alternate years, next given 76/77.)

304-575B OPTICAL AND MAGNETIC PROPERTIES OF SOLIDS 3(3-0-6). (Prerequisites: 304-352B or 304-357B, 304-332B.) Classical and quantum theories of polarization. Band theory of solids. Dispersion relations. Tensor description of anisotropic materials. The ray ellipsoid. Double refractions, birefringence dichroism, piezoelectricity, ferroelectricity. Classical and quantum theories of magnetization. Diamagnetism, paramagnetism, ferro- and ferri-magnetism. Magnetic domains. Ferrites and Garnets. Non-reciprocal microwave devices and magneto-optic devices which exploit crystal anisotropy. (Alternate years, next given 76/77.)

304-579A SEMICONDUCTOR DEVICES AND MODELS 3(3-0-6) (Prerequisite: 304-333A,B or 304-338B.) Systematic methods for obtaining useful models which relate device physics to terminal behaviour. The pn junction diode, junction-gate and MOS field-effect transistors, bipolar transistor: idealized devices, practical device geometries, applications. The transistor switch. Determination of model parameters by measurement. (Alternate years, next given 76/77.)

304-592A MICROWAVE THEORY AND TECHNIQUES 3(3-0-6). (Prerequisite: 304-352B or 304-357B.) Transmission lines and waveguides, surface waveguides, microwave circuit theory, impe-

dance matching and transformation, passive microwave devices, resonators, periodic structures and filters, microwave antennas.

304-593B ANTENNAS AND PROPAGATION 3(3-0-6). (Prerequisite:304-352B or 304-357B.) Near and far field behaviour or radiators; antennas as a boundary value problem; practical antenna parameters; wire antennas, antenna arrays, aperture methods of antenna analysis; measurement of input impedance, field patterns, gain and noise; point-to-point propagation, fading beyond horizon and long distance propagation, ionospheric, atmospheric and earth's surface considerations; tropospheric scatter.

304-596B COHERENT WAVE OPTICS 3(3-0-6). (Prerequisite: 304-352B or 304-357B.) Introduction to wave optics. Diffraction theory and geometrical optics including the Kirchoff-Huygens diffraction integral, Fermet's principle and Hamiltonian Formulations of Ray Optics. Lenses and lens waveguides. Optical Fourier transform and spatial filtering. Gaussian beams. Holography. Propagation characteristics of optical fibres and dielectric waveguides. Thin film (or slab) optical waveguides. Discussion of optical communication systems. (Alternate years, next given 76/77.)

OPTIMAL CONTROL THEORY 4(3-0-9). (Prerequisite: 304-404A or 304-502B.) Basic concepts of static optimization. Variational solutions for discrete - and continuous-time control problems. Pontryagin's maximum principle. Dynamic programming. Computational algorithms. Singular control problems. The linear regulator problem.

304-603B ESTIMATION AND STOCHASTIC CONTROL 4(3-0-9). (Prerequisites: 304-612A, 304-502B.) Properties of estimators; linear regressing. The innovations process. Innovations approach to optimal linear filtering for continuous-time and discrete-time processes. Smoothing and prediction. Properties of the Kalman filter. Optimal stochastic control of linear systems with direct state measurements. The certainty equivalence principle. Minimum-variance control. Estimation and control of discrete linear systems described by ARMA models. Stochastic control or nonlinear systems.

304-604A PARAMETER IDENTIFICATION AND ADAPTIVE CONTROL 4(3-0-9). (Prerequisite: 304-603B.) Least-squares, maximum likelihood and Bayesian estimates. Hypothesis testing. Identification of discrete systems described by ARMA models using least-squares, generalized least-squares and maximum likelihood. Instrumental variable methods. Stochastic approximation. Use of the extended Kalman filter. Bayesian estimation of systems taken from a finite population. Estimation of noise covariances. Adaptive control of discrete systems using one-step-ahead control laws, enforced separation and open-loop-feedback-optimal control (OLFO) laws. Use of specially-designed inputs. (Alternate years, next given 76/77.)

304-612A RANDOM PROCESSES 4(3-0-9). (Prerequisite: 304-305B or 189-384B.) Markov processes, Markov chains, correlation functions and spectra, renewal processes, queues, queuing networks.

304-613B COMPUTER-AIDED NETWORK ANALYSIS AND DESIGN 4(3-0-9) (Prerequisite: 304-303A, B or 304-308B.) Computer-aided techniques for the DC, transient and frequency-domain analysis of linear and nonlinear electronic networks; methods of sensitivity analysis; elementary concepts in optimization theory; application of optimization techniques to circuit design. (Alternate years, next given 75/76.)

304-614A NETWORK SYNTHESIS 4(3-0-9). (Prerequisite: 304-303A,B or 304-308B.) Properties of positive real functions; determination of system functions; synthesis of driving-point functions; syntheses of lossless two-ports and RC two-ports; approximation problems; synthesis of active networks. (Alternate years, next given 76/77.)

304-620B INFORMATION THEORY AND CODING 4(3-0-9). (Prerequisite: 304-305B or 189-384B.) Measure of information, limitations of measure, characterization of noisy channels, channel coding and capacity. Estimates for some real channels, source coding revisited (rate distortion), error coding techniques - real and imaginary, feedback and automatic repeat request channels. This course is intended to give the student an insight into the concepts and limitations of Information Theory along with a survey of current practice in error-correcting coding. (Alternate years, next given 75/76.)

304-622B ADVANCED COMMUNICATIONS SYSTEMS ANALYSIS 4(3-0-9). (Prerequisite: 304-522B.) This course will allow the student to study the foundations required for modelling advanced communication systems. Analysis of specific classes of systems such as telephone, satellite, troposcatter, microwave for both analog and digital data. (Alternate years, next given 75/76.)

304-625B ARTIFICIAL INTELLIGENCE 4(3-0-9). (Prerequisite: 304-529A.) Definition, models for an artificial intelligence, data structures, heuristic programming, learning, pattern recognition, man-machine interaction, practical applications and study of selected research topics. (Alternate years, next given 75/76.)

304-628B COMPUTER COMMUNICATIONS NETWORKS 4(3-0-9). (Prerequisites: 304-324A, 304-521A or 304-411A.) Classification of networks, voices, data, line-switching, message switching, packets; characterization of information sources; computer interface, terminal interface, network interface, queueing models, queueing networks, capacity versus delay; network system components, multiplexers, concentrators; topological design problems and algorithms; network control

and characterization; tree networks, reliability; non-tree network designs. (Alternate years, next given 76/77.)

304-636B REAL-TIME OPERATING SYSTEM DESIGN 4(3-0-9). (Prerequisite: 304-531A.) This course is intended for students interested in real-time applications of small computers. The course includes a study of three existing real-time operating systems as well as a design project. The course content includes the following: Task scheduling mechanisms, I/O organization, bulk storage organization, incorporation of service routines. Inter-computer communication, task co-ordination, multiple computer operating systems. (Alternate years, next given 76/77.)

304-637B COMPUTER SYSTEMS ANALYSIS 4(3-0-9). (Prerequisite: 304-531A.) Computer system specification, hardware-software trade-offs, selection of hardware components, problem solutions using interconnected computers, choice of programming languages, structured programming, technical organization and management. The course includes three case studies and a design project. (Alternate years, next given 75/76.)

304-638A ADVANCED COMPUTER DESIGN 4(3-0-9). (Prerequisite: 304-531A.) This course is intended for graduate students with a good knowledge of computer organization, structure and architecture and some knowledge of microprogramming. Topics in hardware technology include functional logic building blocks, arithmetic and non-arithmetic processors, memory utilization and storage management, sequencing subsystems, transmission and exchange. Determination of expected performance by simulation; computer-aided design. Specific examples of solutions to computer design problems. Selected topics on novel computer organizations such as array, cellular and variable-structure computers. (Alternate years, next given 76/77.)

304-641A APPLIED ELECTROMAGNETIC THEORY 4(3-0-9). (Prerequisite: 304-592A or 304-593B.) Mathematical techniques, analytical and numerical, for solving E. M. boundary value problems. Maxwell's equations, wave dispersion, waves in gyrotropic media, Huygen's principle and Fresnel diffraction, Babinet's principle; Green's functions and integral equations, angular spectrum of plane waves, cylindrical and spherical wave functions, perturbational and variational techniques. Waveguide, antenna, scattering and diffraction problems.

304-647A FINITE ELEMENTS IN ELECTROMAGNETICS 4(3-0-9). (Prerequisite: 304-543B.) Finite elements for the Helmholtz equation in the plane and in space. Elements for axisymmetric problems. Isoparametric and curvilinear elements; elements for nonlinear problems. Integral equations and the solution of antenna problems. Finite elements in parabolic problems. (Alternate years, next given 75/76.)

304-662A ELECTRIC MACHINE DYNAMICS 4(3-0-9). (Prerequisites: 304-261A,B, 304-502B.) Review of electric machine models. State-space formulation of nonlinear differential equations. Solutions through numerical integration, constant speed linearization. Models of control elements, loads, prime-movers, voltage regulators, transmission networks. State equations of integrated power system. Modal analysis of multimachine power system. Operating point stability. Transient stability analysis. Electromechanical resonance. (Alternate years, next given 75/76.)

304-677A,B EXPERIMENTAL TECHNIQUES IN SOLID STATE 4(0-6-6). (Prerequisite: 304-332B or 304-337B.) Experimental laboratory project in solid state involving the following. Techniques of laboratory preparation, fabrication and orientation of solid state samples and structures for experimental study. Use of special laboratory research apparatus. Measurement of electronic, optical and structural properties of samples and structures. Evaluation and analysis of electronic behaviour and performance. Interpretation of relevant physical processes and phenomena.

304-678A SPECIAL TOPICS IN SOLIDS I 4(3-0-9). (Prerequisite: 304-332B or 304-337B.) Discussion of topics in semiconductor electronics and electronic properties of materials in areas of current research to the department.

304-679B. SPECIAL TOPICS IN SOLIDS II 4(3-0-9). (Prerequisite: 304-332B or 304-337B.) Dielectric properties and molecular structure of solids and liquids. Dielectric theory and applications.

304-681A,B COLLOQUIUM IN ELECTRICAL ENGINEERING, 4 credits. Directed reading, seminar and discussion course in various subjects of current interest in electrical engineering research.

304-685B HIGH VOLTAGE ENGINEERING 4(3-0-9). (Prerequisite: 304-251A,B or 304-256A.) Electrical discharges in gases; uniform and non-uniform fields; corona discharges; the spark mechanism. Generation and measurement of high direct, alternating and impulse voltages. (Alternate years, next given 75/76.)

304-688A,B 304-689A,B RECENT ADVANCES IN ELECTRICAL ENGINEERING, 4 credits. Course content suited to the area of specialization of the lecturer.

5.6 DEPARTMENT OF MECHANICAL ENGINEERING

Chairman
J.W. Stachiewicz, M.Eng(McG.)

Professors
D.R. Axelrad, M.Eng.,(Sydney), D.Eng.Sc. (Tech. U. Vienna)
W. Bruce, M.A.Sc.(Tor.)
J.H.S. Lee, M.Sc.(M.I.T.), Ph.D.(McG.)
B.G. Newman, M.A.(Cantab.), Ph.D.(Sydney), F.R.Ae.S.
J.W. Stachiewicz, M.Eng.,(McG.)

Associate Professors
G.G. Bach, Ph.D.(McG.)
J.C. Cherna, Dipl.Eng.(Swiss Fed. Inst.)
G.I.Fekete, M.Eng., Ph.D.(McG.)
J.M. Forde, B.Eng., M.Eng.(McG.)
R. Knystautas, M.Eng., Ph.D.(McG.)
L. Kops, D.Sc.Eng.(Krakow Tech. U.)
C.L. Murphy, M.Eng., Ph.D.(McG.)
M.P. Paidoussis, B.Eng.(McG.), Ph.D.(Cantab.)
D. Pfeiffer, B.E.E.(Cornell)
J.W. Provan, B.Sc.(Strathclyde), M.Sc., Ph.D. (Colo.)
A.L. Thompson, B.A.(Bishop's), Ph.D.(McG.)
J.H.T. Wu, M.A.Sc.(Tor.), Ph.D.(McG.)
P.J. Zsombor-Murray, M.Eng., Ph.D.(McG.)

Assistant Professors,
A.M. Ahmed, B.Sc.(Dacca), Ph.D.(McG.)
C. Guirao, M.Sc.(France), Ph.D., (Calif.)
R. Hoffman, M.A.Sc.(Tor.) Ph.D.(Sask.)
F.J. Zwarts, M.Eng., Ph.D.(McG.)

Honorary Lecturer
D. Atack, B.Sc., Ph.D.(Leeds)

Research Associates
A.K. Elgabry, Ph.D.(Alexandria)

Research Assistant and Special Lecturer
V. Fangor, M.Eng,(Lwow)

Special Lecturers and Laboratory Superintendents
O. Muehling
L. Vroomen

Laboratory Superintendent
J. Kelly

Design Project Supervisors
Mr. D. May, Pulp and Paper Research Institute
Mr. J. Rushbrook, Beak Engineering Consultants

Associate Members
Dr. G.V. Bull, Space Research Corporation
Dr. D. Burke, Montreal General Hospital
Mr. R.G. Edwards, Canadair Ltd.
Dr. H. Luckert, Space Research Corporation
Dr. J. Miller, Montreal General Hospital

Mechanical Engineering

The prospective student, when trying to decide which branch of engineering to enter, may often ask himself this question: For what sort of a career will a Mechanical Engineering degree prepare me?

This question can best be answered by looking at the positions which our graduates hold today, and it is very revealing to see the extremely broad range of occupations in which they are engaged.

Typically, the first jobs after graduation will be in the design office, often in the estimating department, of a corporation where the young graduate will get an apprenticeship in the practical aspects of engineering design, the importance of cost factors, etc.

As he gains experience he will gradually be given more responsibility, be put in charge of complete projects and supervise the work of junior engineers. Finally, if he has the ability, he may become a section head and gradually be promoted to plant manager, vice-president or to other executive positions. This is a typical progression of a successful engineer in a large corporation, but many of our graduates follow different routes.

Some elect to take graduate studies to prepare themselves for advanced work, usually in research establishments, in consulting firms or in companies which have their own research and development departments; a growing number become interested in bio-mechanical engineering (some even take a medical degree); others gravitate towards systems engineering with heavy reliance on computer applications; some, after a few years of experience, form their own companies, often as Consulting Mechanical Engineers for building services (heating, air conditioning). Fields of engineering in which Mechanical Engineering graduates work, apart from those traditionally associated with mechanical engineering, include aeronautics, aerodynamics and aerospace, nuclear engineering, heat transfer equipment, transportation, construction, computers, industrial engineering and many, many others.

One may ask how is it possible to devise a curriculum which will satisfy such diverse needs, and the only answer is that we must first of all put a heavy stress on the knowledge of fundamental disciplines such as mathematics, physics, mechanics and thermodynamics, and then teach the students the basic approach to the synthesis and application of this knowledge towards the solution of practical problems.

The latter is done in the sequence of design and experimental engineering courses, which include project work involving creative design, and also actual construction and testing of equipment built by the students.

A broad range of interests may be satisfied by selecting appropriate elective courses from among those offered with a specific subject concentration, such as management, computer science, bio-engineering, systems engineering, etc. Faculty advisors will assist the student in these selections and approve their individual programs.

The Department also offers an Honours Program which is particularly suitable for those with a high aptitude in mathematics and physics and which gives a thorough grounding in the basic engineering sciences. The electives in this program can be utilized to take courses with a more applied engineering orientation or, if preferred, to obtain even more advanced training in applied mathematical and physical sciences.

Our diverse and well equipped laboratories include the machine tool laboratory where students learn modern production techniques and familiarize themselves with precision manufacturing equipment including numerically controlled machine tools; aerodynamics and gas dynamics laboratories containing several subsonic and supersonic wind-tunnels; dynamics and controls laboratory permitting study of dynamic behaviour and control of systems; energy transport and conversion laboratories which feature various types of engines and heat flow experiments; a laser laboratory where various applications and designs of lasers are studied; and finally a data-processing control computer (DATAC) laboratory to which much of the experimental equipment is connected, and in which students learn the most modern techniques of automatic data acquisition and processing.

While the program is demanding, it still seems to leave time for many extra-curricular activities and our students are active in such professional societies as the CSME (Canadian Society for Mechanical Engineering, a constituent society of the Engineering Institute of Canada), the SAE (Society of Automotive Engineers) and in various campus organizations.

The relations between the Faculty staff and the students are extremely close and there are frequently organized social functions in which students and professors meet over a glass of beer or wine to exchange views and to get to know each other better.

CURRICULUM FOR THE B.ENG. DEGREE IN MECHANICAL ENGINEERING (REGULAR)

Required Courses		Course Credit	
NON-DEPARTMENTAL SUBJECTS			
189-261A,B	Linear Algebra and Differential Equations I	3	
189-262A,B	Linear Algebra and Differential Equations II	3	
189-263A,B	Advanced Calculus	3	
189-264A,B	Introduction to Boundary Value Problems	3	
303-090A	Mechanics I	4	
303-107A,B	Solid Mechanics	4	
303-191A,B	Mechanics II	3	
304-181A,B	Electric Power	3	
304-283A,B	Electronics	3	
308-080A,B	Computers in Engineering	2	31
MECHANICAL ENGINEERING SUBJECTS			
305-040A	Thermodynamics I	3	
305-060A	Machine Tool Laboratory	2	
305-091A	Graphics	3	
305-114B	Dynamics of Mechanisms	3	
305-141B	Thermodynamics II	3	
305-150A	Engineering Statistics	2	
305-161B	Measurement Laboratory	2	
305-215A,B	Dynamics of Engineering Systems I	3	
305-221B	Mechanics of Deformable Solids	3	
305-230A	Fluid Mechanics I	3	
305-246A,B	Heat Transfer	3	
305-292A,B	Design I	3	
305-317A,B	Systems Control	3	
305-362B	Mechanical Laboratory I	2	
305-393A	Design IIa	3	
305-463D,F	Mechanical Laboratory IIa	4	
305-494B	Design IIb	3	48

Elective Courses

TECHNICAL ELECTIVES (all 3 credit courses)

305-220B	Statistical Mechanics
305-243A	Energy Conversion
305-272A	Machining Processes
305-273B	Production Systems
305-274B	Operations Research
305-275B	Numerical Control of Machine Tools
305-316B	Dynamics of Engineering Systems II
305-321A	Advanced Mechanics of Deformable Media
305-331B	Gas Dynamics
305-333B	Aerodynamics: Ideal Fluid Theory
305-334B	Turbomachinery
305-335A	Jet Propulsion
305-371B	Industrial Engineering
305-411B	Systems Control II
305-418B	Measurement Engineering
305-419B	Engineering Applications of Lasers and Holography
305-447A	Combustion
305-495A	Design IIIa
305-496B	Design IIIb
305-497B	Value Engineering

Approximately five courses to be selected from those offered by the Department or from other suitable undergraduate or graduate courses. **15**

GENERAL ELECTIVES

*Two or three courses	6
Total	**100**

*Students who have not taken a course in material science at the college level must include it in their university program.

CURRICULUM FOR THE B.ENG. DEGREE IN MECHANICAL ENGINEERING (HONOURS)

Required Courses

		Course Credit	
NON-DEPARTMENTAL SUBJECTS			
189-266A	Linear Algebra and Differential Equations I	3	
189-267B	Linear Algebra and Differential Equations II	3	
189-268A	Advanced Calculus	3	
189-269B	Introduction to Boundary Value	3	
189-385A	Complex Variables	3	
198-321A	Modern Physics	3	
303-090A	Mechanics I	4	
303-193B	Mechanics II H	3	
304-181A,B	Electric Power	3	
304-283A,B	Electronics	3	
308-080A,B	Computers in Engineering	2	
308-250A,B	Methods of Numerical Analysis	3	32
MECHANICAL ENGINEERING SUBJECTS			
305-040A	Thermodynamics I	3	
305-142A	Statistical Thermodynamics	3	
305-161B	Measurement Laboratory	2	
305-219B	Mechanics of Systems	3	
305-222A	Continuum Mechanics	3	

305-230A	Fluid Mechanics I	3	
305-264A	Mechanical Laboratory I H	2	
305-323B	Theory of Elasticity	3	
305-365B	Mechanical Laboratory II H	2	
305-403D	Thesis	6	
305-404B	Thesis	6	
305-452A	Mathematical Methods in Engineering I	3	
305-453B	Mathematical Methods in Engineering II	3	39

Elective Courses

TECHNICAL ELECTIVES

Five courses to be selected from those offered by the Department or from other suitable graduate or undergraduate courses. **15**

GENERAL ELECTIVES

Three courses (9 credits). 9

Total **99**

Courses Offered by the Department

Elective courses are indicated by the symbol •

305-040 THERMODYNAMICS I 3(3-1-5). Basic concepts: macroscopic vs. microscopic point of view; states and processes; conservation and transformation of energy. Phase equilibrium; equations of state; thermodynamic properties. Work and heat. First law of thermodynamics; energy equations; internal energy; enthalpy; specific heat of ideal gases. Thermodynamic processes: reversibility, polytropic processes, applications of first law. Second law of thermodynamics. Entropy changes in thermodynamic processes: principle of increase of entropy. Basic power and refrigeration cycles.
Professor Bruce

305-060A MACHINE TOOL LABORATORY 2(2-3-1). Basic machine tool laboratory measurements such as measurements of flatness, straightness, length, angle, surface texture, etc. Instruction and practice in the construction, operation and care of machine tools. Basic and advanced operating functions of lathes, shapers, drilling, milling and grinding machines. Making of small assemblies by individual students on machines tooled up for one-off jobs and for limited production runs. Introduction to numerical control.
Mr. Muehling and Staff

305-090A GRAPHICS 2(2-2-2). Descriptive geometry, pictorial and working drawings and conventions. Computer graphics: simple plotting, auxiliary view and general perspective transformation, contour mapping and introduction to kinematic animation. Drafting room and computer laboratory exercises are assigned. This course is intended for Civil Engineering students.
Professor Zsombor-Murray

305-091A GRAPHICS 3(3-3-3). Descriptive geometry, pictorial and working drawings and conventions. Computer graphics: simple plotting, auxiliary view and general perspective transformation, contour mapping and introduction to kinematic animation. Drafting room and computer laboratory exercises are assigned. During the last three to four weeks, students will be assigned a project involving simple mechanical design and/or computer graphics.
Professor Zsombor-Murray

305-114B DYNAMICS OF MECHANISMS 3(3-1-5). (Prerequisite: 303-090A.) First principles of analysis; vector geometry; motion; position; displacement; velocity; acceleration; force; inertia and its effects. Kinematic and dynamic analysis of rigid bodies in pure rotation and in pin-connected systems; dynamic balance. The engine complex. Rigid bodies in rolling contact; planetary gear-trains. Bodies in sliding contact; lower and higher sliding pairs. Cam analysis. Emphasis will be placed on graphical methods of solution.
Professor Ahmed

305-141B. THERMODYNAMICS II 3(3-1-5). (Prerequisite: 305-040A.) Irreversibility and availability, Gibbs and Helmholtz functions. Maxwell relations: generalized thermodynamic relations and charts; equations of state; Clapeyron equation, Joule-Thomson coefficient, volume expansivity and isothermal and adiabatic compressibility. Ideal and real gas and vapour mixtures, psychometry and air -conditioning processes. Reactive mixtures, stoichiometry of fuels, flame temperatures, dissociation and chemical equilibrium. Modified and improved power and refrigeration cycles.
Professor Bruce

305-142A STATISTICAL THERMODYNAMICS 3(3-1-5). (Prerequisite: 305-040A.) Classical and quantum mechanical descriptions of molecules, phase space and fundamental postulates of statistical thermodynamics. Gibbsian ensembles and thermodynamic functions, molecular interpretations of the laws of thermodynamics. Simple applications of statistical thermodynamics.
Professor Knystautas

305-144A HEAT ENGINEERING 3(3-1 1/2-4 1/2). (Prerequisite: 189-261A.) This is a course for Mining and Agricultural Engineering students. Basic principles of thermodynamics, heat transfer and fluid flow are reviewed. Applications of blowers, compressors, engines and heat pumps to mining and agriculture.
Professor Zwarts

305-145B MECHANICAL EQUIPMENT 3(2-3-4). (Prerequisite: 305-040A or equivalent.) This is a service course for non-mechanical engineers. Theoretical and practical aspects of fans, blowers, compressors, steam generation, engines and refrigeration.
Professor Forde

305-150A ENGINEERING STATISTICS 2(2-1-3). (Prerequisite: 189-261A,B.) Combinatorial analysis. Concept of random variable; distribution function; mean; variance; correlation; Binomial, Poisson, Normal, Uniform, Student's T, and F distributions. Law of large numbers; central limit theorem. Point and interval estimation; method of maximum likelihood. Hypothesis testing; goodness of fit. Experimental design: analysis of variance; regression analysis. Stochastic processes.
Professor Bach

305-161B MEASUREMENT LABORATORY 2(2-3-1). (Co-requisite: Knowledge of Fortran programming.) Basic experimental laboratory measurements, such as measurement of temperature, pressure, force, torque, small time intervals, velocity, acceleration, flow. Criteria for selection of instruments. Introduction to automatic data acquisition and processing using the DATAC Computer Laboratory, real time programming.
Mr. Vroomen

305-215A,B DYNAMICS OF ENGINEERING SYSTEMS I 3(3-1-5). (Prerequisite: 303-191B.) Free and forced vibrations of linear, one degree of freedom, damped and undamped systems. Applications to vibration transmission and isolation, vibration of beams, whirling of shafts. Multi-degree of freedom systems, coupled vibrations, distributed systems. Modelling of dynamic systems, transfer functions, linearization and lumping, block diagrams.
Professor Forde

305-219B MECHANICS OF SYSTEMS 3(3-1-5). (Prerequisite: 303-193B. Pre- or co-requisites: 189-269A,B 308-250B.) Langrangian and Hamiltonian dynamics. Variational methods. Discrete linear systems; classical and numerical solutions for conservative and non-conservative systems; matric function methods. Electrical-mechanical-acoustical analogues. Stability considerations and closed-loop systems. Vibration of distributed parameter systems. Energy methods. Non-linear vibrations; the phase plane and other methods of solution.
Professor Paidoussis

• **305-220B STATISTICAL MECHANICS 3(3-1-5).** (Prerequisite: 305-142A.) Classical mechanics, fundamental hypothesis, H-theorem, coarse graining and contraction, Liouville equation, perturbation theory of Bogoliubov, Frieman and Sandri, the kinetic equations of Boltzmann, Fokker-Planck, Vlasov and Lenard-Balescu, the hydro-dynamic equations and transport phenomena, stochastic processes, fluctuations, the Master equation, Onsager relations, Langevin equations and Brownian motion.
Professor Lee

305-221B MECHANICS OF DEFORMABLE SOLIDS 3(3-1-5). (Prerequisite: 303-107A,B.) Modern phenomenological theories of the behaviour of engineering materials. Stress and strain concepts and introduction to constitutive theory. Applications of theory of elasticity and thermoelasticity. Introduction to plasticity. Deviatoric stress and strain. Introduction to linear viscoelasticity. Simple mechanical models and the nature of viscoelastic behaviour.
Professor Axelrad

305-222A CONTINUUM MECHANICS 3(2-2-5). (Prerequisite: 303-193B; Co-requisite: 189-385A.) Definition of a continuum. The Cauchy stress concept which gives the balance of forces within a material. Vector and tensor fields. Strains and kinematics of deformation. Equations of motion. Thermodynamics of continua. The basic laws for predicting the behaviour of the continuum.
Professor Axelrad

305-230A FLUID MECHANICS I 3(3-1-5). (Prerequisite: 189-264B.) Review of relevant mechanics and thermodynamics: fluid properties; stress in a continuum; fluid kinematics; rates of strain, rotation. Control volume analysis; conservation of mass and of linear momentum; Euler and Bernoulli equations; introduction to Navier-Stokes equations. Dimensional analysis and dynamical similarity. Conservation of energy; compressible flow; speed of sound, flow with area change. Laminar and turbulent boundary layers. Turbulent jets, hydrodynamic lubrication.
Professor Newman

• **305-243A ENERGY CONVERSION 3(2-2-5).** (Prerequisite: 305-141B.) Principles of energy conversion; irreversible thermodynamics, unified conversion, plasma, electrochemical and semi-conductor theory. Applications to thermoelectric, thermionic, photovoltaic, M.H.D., fuel cells and other conversion systems. Discussion of energy sources and conversion devices for particular applications, i.e.: isolated systems, power stations, transportation, etc.
Professor Murphy

305-246A,B HEAT TRANSFER 3(3-1-5). (Prerequisite: 189-264B.) Steady state conduction with and without heat generation, extended surfaces. Unsteady state conduction in plates, cylinders and spheres. Convective heat transfer, boundary layer equations, dimensionless parameters, analogy between momentum, heat and mass transfer. Natural convection. Heat exchangers. Radiant heat transfer, black and grey body radiation. Interchange factors.
Professor Stachiewicz

305-264A MECHANICAL LABORATORY I H 2(0-3-3). (Prerequisite: 305-161B.) Candidates must, in addition, have completed courses in the Mechanical Engineering Program weighted at 30 credits (Minimum). Selected laboratory assignments integrated with the respective lecture courses.
Professor Knystautas

• **305-272A MACHINING PROCESSES 3(2-2-5).** (Prerequisite: 305-060A.) Mechanics of metal cutting: chip formation, cutting forces and energy considerations; action of cutting fluids; thermal aspects of cutting; vibrations in cutting. Importance of the machine-tool. Machinability, tool wear and tool life, economical criterion for the selection of cutting parameters. Conventional machining operations; mechanics of grinding; other abrasive processes. Unconventional machining processes: electro-discharge, electro-chemical, laser machining – their principles and areas of application. Effect of machining practice on surface integrity.
Professor Kops

• **305-273B PRODUCTION SYSTEMS 3(2-2-5).** (Pre- or Co-requisite: 305-494B.) Production function. Concepts of system approach in production. Analysis of product design. Value Engineering. Process planning. Network planning methods. Information systems and automation; NC machine tools. Scheduling and control of operations.
Professor Kops

• **305-274B SELECTED TOPICS IN OPERATIONS RESEARCH 3(3-1-5).** (Prerequisite: 305-150B.) Introduction to the general mathematical programming problem in the context of engineering design; linear programming, queueing theory, Monte Carlo simulation. The above techniques will be used to study the optimization of engineering systems. The applications of linear programming in its various manifestations will be examined in depth.
Professor Zsombor-Murray

305-275B NUMERICAL CONTROL OF MACHINE TOOLS 3(3-2-4). (Prerequisite or co-requisites: 305-060A, 305-091A, 308-080A or equivalent). This course is intended to give the student as broad an exposure as possible to the technology of numerically controlled machines with emphasis on the software aspects. The student will be given a number of programming assignments some requiring him to actually machine a prototype on the NC machines in the department. The topics covered are: Introduction to NC systems. Manual programming, standard commands, canned cycles, paper tape formats. Computer aided programming (using APT), geometric definitions, programming of tool motions, loops and macros. The post processing function. NC tape verification techniques. Survey of NC hardware. Tooling and fixtures for NC. Selection of parts suitable for NC machining. Economic factors in justifying NC machines. NC and quality control. The future for NC.
Professor Hoffman and Staff

305-292A,B DESIGN I 3(3-1-5). (Pre- or co-requisite: 305-060A, 305-091A or equivalent.) Introduction to design. Problem formulation; idea conception; feasibility study; preliminary design; computer-aided design; optimal design; reliability; hardware, etc. Manufacturing methods and processes; engineering materials. The student's creative ability will be developed by having him participate in a number of design projects. Case-study methods will be used to analyse actual design projects.
Professor Fekete

• **305-316B DYNAMICS OF ENGINEERING SYSTEMS II 3(3-1-5).** (Prerequisite: 305-215A,B.) More advanced topics in dynamics of mechanical systems, including non-linear systems, self-excited systems, etc. Application of analogue computer to the solution of problems in dynamics. A variety of cases, involving complete systems will be studied to illustrate the above material and to provide the student with some knowledge of the techniques of solution.
Professor Forde

305-317A,B SYSTEMS CONTROL 3(3-1-5). (Prerequisite: 305-215A,B.) Analysis of single variable linear, lumped-parameter, stationary, deterministic, continuous data, feedback control systems. Introduction to feedback control: open-loop vs. feedback control; history, examples, characteristics and cost of feedback control. Classical approach to initially-quiescent linear systems analysis. Generalized mathematical modelling of dynamic engineering systems. Transient, steady-state and frequency response and their inter-relationship in idealized feedback control systems. Time-domain and frequency-domain, absolute and relative stability analysis: Routh-Hurwitz criterion, root-locus method, Nyquist and Bode analysis, Nichols chart. Control action and compensation to improve performance. Examples of time-domain and frequency-domain design of compensators.
Professor Ahmed

• **305-321A ADVANCED MECHANICS OF DEFORMABLE MEDIA 3(3-1-5).** (Prerequisite: 305-221B.) Continuation and generalization of mechanics of deformable solids. Motion and flow. Analysis of thermodynamics for continuous media. Properties of thermomechanical continua. Fluids. Plasticity. Linear viscoelasticity. Thermoelasticity.
Professor Provan

305-323B THEORY OF ELASTICITY 3(2-2-5). (Prerequisite: 305-222A.) Basic equations of elasticity and thermoelasticity. Methods of solution of two and three-dimensional problems. Dynamic problems and wave propagation in solids. Inelastic response behaviour of solids.
Professor Axelrad

• **305-331B GAS DYNAMICS 3(3-1-5).** (Prerequisite: 305-230A.) Motion of sound waves. Isentropic flow. Normal shocks. Flow in nozzles, wind tunnels and shock tubes. Oblique shocks. Prandtl Meyer Flow. Flow in inlets and over airfoils. Flow with friction and heat addition. Magnetogasdynamics. Real gas effects. Rarefied flow. Experimental methods.
Professor Guirao

• **305-333B AERODYNAMICS: IDEAL FLUID THEORY 3(3-1-5).** (Prerequisite: 305-230A.) Subsonic aerodynamics. Kinematics; equations of motion, vorticity and circulation; solutions of Laplace's equation; conformal mapping; motion around simple bodies. Two-dimensional aerofoils. Three-dimensional flows; airscrews; low and high aspect ratio wings. Supplemented by demonstrations and experiments in the laboratory.
Professor Newman

• **305-334B TURBOMACHINERY 3(2-2-5).** (Prerequisite: 305-230A.) The course covers fundamental aspects of turbomachinery in a broad and general manner that will be useful to a wide range of mechanical engineering students and is designed to provide a firm base for more detailed study at graduate level. Topics will include: general concepts and definition of turbomachinery, generalized performance study by non-dimensional analysis, basic theories of energy transfer, fluid flow problems in turbomachinery, design problems, performance matching and stability, control, testing, general problem of propulsion.
Professor Murphy

• **305-335A JET PROPULSION 3(3-1-5).** (Prerequisite: 305-230A.) Thermodynamics of open cycles; internal aerodynamics; aerothermochemistry of propellants; nozzle designs and efficiency, aerodynamics of intake diffusers; problems associated with intake design.
Professor Wu

305-362B MECHANICAL LABORATORY I 2(0-3-3). (Prerequisite: 305-161B. Candidates must have in addition completed courses in the Mechanical Engineering Program weighted at 40 credits (minimum)). Experiments illustrating theory covered in courses on thermodynamics, mechanics, fluid dynamics, heat transfer.
Professor Zwarts and Staff

305-365B MECHANICAL LABORATORY II H 2(0-3-3). (Prerequisite: 305-264A.) Continuation of 305-264A.
Professor Knystautas

• **305-371B INDUSTRIAL ENGINEERING 3(3-1-5).** (Prerequisite: 305-150A.) Factory planning, plant location, layout and services, production line techniques, methods engineering, design of work systems, measurement of performance (time study, work sampling, synthetic time data), quality control systems, maintenance, safety.
Professor Cherna

305-393A DESIGN IIa 3(2-4-3). (Prerequisite: 305-292A,B. Pre- or co-requisite: 303-107A,B.) Continuation of Design I, introducing loading and stress calculations, component part design, power transmission and energy storage, friction, lubrication and wear, design using plastic materials, etc. Design projects will involve the application of knowledge acquired in the lectures and in the prerequisite courses to the solution of engineering design problems.
Professor Pfeiffer & Staff

305-403D THESIS (HONOURS) 6(0-6-12). (Prerequisite: Candidates must have completed courses in the Mechanical Engineering Program weighted at 60 credits (minimum)). This course, together with course 305-404B, involves a research or design project undertaken by each student, encompassing interrelated aspects of engineering theory and requiring a theoretical and/or experimental investigation. The student will work under the supervision of one or more staff members; his completed work will be submitted in the form of a thesis. The grade awarded for this part of the course depends on the assessment of the quality of theoretical and/or experimental work undertaken by the student.
Professor Paidoussis and Staff

305-404B THESIS (HONOURS) 3(0-3-6). (Corequisite: 305-403D.) This course is part of the same thesis project as for course 305-403D. The grade for this part of the course covers the orderly development and presentation of ideas, and their incorporation in the thesis.
Professor Paidoussis and Staff

• **305-411B SYSTEMS CONTROL II 3(3-1-5).** (Prerequisite: 305-317A.) Further topics in control systems engineering with emphasis on synthesis. Discrete-time systems, z-transforms. State-space representation of systems; controllability, observability, the state-transition matrix, design using modal

analysis. Statistical methods. Survey of system modelling and process parameter estimation techniques. Introduction to optimal control systems. The role of computers in control systems.
Professor Hoffman

• **305-418A MEASUREMENT ENGINEERING 3(3-1-5).** (Prerequisite: 305-317A.) The aim of this courses is to present in a unified manner the principles and techniques of gathering and "processing" valid and accurate "information". General principles of measurement, functional elements, transducers, systems. General performance characteristics of measurement elements and systems: sensitivity; linearity, loading effect, dynamic response, noise and feedback in measurement. General techniques of information processing, transmission and recording. Common measurement devices and their characteristics — motion, pressure, temperature, flow, heat flux measurement. Case studies. Principles developed in lectures will be illustrated by laboratory demonstrations.
Professor Ahmed

• **305-419B ENGINEERING APPLICATIONS OF LASERS AND HOLOGRAPHY 3(3-0-6).** (Prerequisite: 308-080A.) Wave optics, Fabry-Perot interferometer, Fresnel & Fraunhofer diffractions; laser physics, population inversion, frequency broadening, laser applications; holography principles, image position analysis, Fourier transform holograms, holography applications.
Professor Wu

• **305-477A COMBUSTION 3(3-1-5).** Selected topics concerned principally with combustion in prime movers, e.g. steam plants and various kinds of engines. Fundamentals of chemical kinetics of combustion reactions. Stability limits and flame speeds of laminar and turbulent diffusion flames, theories of flame propagation. Some causes and possible methods of reduction or elimination of air pollution from prime movers including effects of the physical properties and chemical composition of various fuels, fuel-air ratio, quenching, also discussion of carbon or soot formation. Method of analysis of combustion products including mass spectroscopy and gas chromatography.
Professor Thompson

305-452A MATHEMATICAL METHODS IN ENGINEERING I 3(2-2-5). (Prerequisite: Candidates must have completed courses in the Mechanical Engineering Program weighted at 60 credits (minimum).) The underlying theory and application of mathematical methods in fluid dynamics, vibration, stress and strain analysis, heat transfer, etc. The eigenvalue problem, methods in analysis.
Professor Provan

305-453B MATHEMATICAL METHODS IN ENGINEERING II 3(2-2-5). (Prerequisite: 305-452A.) Continuation of the underlying theory and application of mathematical methods in fluid dynamics, vibration, stress and strain analysis, heat transfer, etc. Spherical and cylindrical harmonics, Laplace and Fourier series and transforms, variational perturbation techniques, introduction to theory of distributions and generalized functions.
Professor Provan

305-463D,F MECHANICAL LABORATORY II 4(0-4-2). (Prerequisite: 305-362B.) A selection of laboratory projects will be offered and carried out by students working in small groups.
Professor Knystautas & Staff

304-494B DESIGN IIb 3(1-5-3). (Prerequisite: 305-393A.) Students will work in small groups on selected design projects with consultation by the staff. Lecture topics: use and selection of mechanical components, special purpose mechanisms, functional design of machine elements.
Professor Pfeiffer & Staff

• **305-495A DESIGN IIIa 3(0-6-3).** (Prerequisite: 305-494B.) Lectures will deal with the matrix of the design process, optimization techniques, fatigue design, using conventional or power spectral analysis techniques, composite materials, reliability, factors of safety and their prediction. In the design laboratory, a project will be given to individual students or small groups in the field of the student's interest. Four reports are required, with each student expected to produce a general arrangement drawing and design of one of the major components of the whole system in some detail. Whenever possible, special lectures will be provided by specialists in various fields of interest, either from the university staff or from industry.
Professor Pfeiffer and Mr. Edwards

305-496B DESIGN III 3(0-6-3). Continuation of Design IIIa.
Professor Pfeiffer & Mr. Edwards

305-497B VALUE ENGINEERING 3(0-8-1). (Prerequisites: 305-060, 305-292 and completion of 45 credits.) Senior students from other departments may take this course by arrangement with the instructor. Value Engineering is an in-depth analysis of an industrial product or process with a view to improving its design and/or performance so that it can be produced, or perform its task, at a lower cost. This is a Workshop type of course. Projects will be supplied by industrial firms and students will work together with industrial personnel, in teams of 5 or 6. Recommendations will be submitted to company executives to be considered for implementation.
Professor Pfeiffer & Staff

305-502A. TOPICS OF ADVANCED MATHEMATICS FOR ENGINEERS I. Various aspects of elementary set theory, topology, mappings, linear operators, functionals, functional analysis and variational principles, as applied to engineering research problems. (Text: Simmons; Introduction to Topology and Modern Analysis; McGraw-Hill.)
Professor Provan

305-503B. TOPICS OF ADVANCED MATHEMATICS FOR ENGINEERS II. (Prerequisite: 305-502A.) Various aspects of algebraic spaces, measure theory, Lebesque integration, probability algebra and the theory of distributions as applied to engineering research problems.
Professor Provan

305-507X NUMERICAL ANALYSIS FOR COMPUTER USERS I. Various topics from numerical analysis are selected with an eye to computer usage. Review of finite differences, interpolation and quadrature, ordinary differential equations.
Professor Bach

305-515A. INDUSTRIAL AERODYNAMICS. Characteristics of the earth's boundary layer, flow patterns around buildings and structures, their effect on the dispersal of pollutants, modeling and model testing, wind tunnel corrections, shelter provided by buildings, pressure distribution over buildings providing data for the structural designer, wind-induced oscillations of buildings and structures.
Professor Fekete

305-534A. CONTINUUM MECHANICS I. Mathematical preliminaries. The Cauchy and Piola stress tensors. Strain and deformation theory. Finite strains and deformation gradients. Rate of deformation tensor. General theory of continuous media. Internal energy. Entropy as a function in continuum theory.
Professors Axelrad or Provan

305-535B CONTINUUM MECHANICS II. (Prerequisite: 305-534A) Constitutive theory and material symmetry. Three-dimensional Navier equation of motion. Classical elasticity and elastic potential theory. The Papkovich-Neuber potential. Linear viscoelasticity. Metal plasticity and plastic constitutive equations. Linear thermoelasticity. The thermoelastic potential.
Professors Axelrad or Provan

305-603A, B or C. DESIGN PROJECT
Staff

305-604A, B or C. DESIGN PROJECT II
Staff

305-605A. APPLIED MATHEMATICS I
Professor Bach

305-606B. APPLIED MATHEMATICS II
Professor Bach

305-608Y. NUMERICAL ANALYSIS FOR COMPUTER USERS II.
Professor Bach

305-609B,C. SEMINAR - candidates for Masters degree
Professor Provan

305-610A. FUNDAMENTALS OF FLUID MECHANICS.
Professors Lee and Knystautas

305-611B. STEADY COMPRESSIBLE AERODYNAMICS.
Professor Wu

305-312B. VISCOUS FLOW AND BOUNDARY LAYER THEORY.
Professor Newman

305-613A. UNSTEADY GAS DYNAMICS.
Professors Knystautas & Lee

305-614B. NON-EQUILIBRIUM GAS DYNAMICS.
Professors Guirao, Lee & Knystautas

305-616B. AERODYNAMIC NOISE.
Professor Zwarts

305-621B. ADVANCED MACHINING PROCESSES.
Professor Kops

305-623A. MACHINE TOOL ENGINEERING.
Professor Cherna

305-624X. APPLIED PROCESS CONTROL.
Professor Zsombor-Murray & Mr. Vroomen

305-626B. SYNTHESIS OF MECHANISMS.
Professor Ahmed

305-626B. ADVANCED CONCEPTS OF ENGINEERING DESIGN.
Mr. Love

305-632X. ADVANCED STRESS ANALYSIS FOR ENGINEERS.
Professors Provan or Axelrad

305-633B. TRIBOLOGY.
Dr. Atack

305-640A. GENERAL SYSTEMS THEORY.
Professor Lee

305-641B. DYNAMICS OF COMPLEX SYSTEMS.
Professor Lee

305-642X. MECHANICS OF ENGINEERING SYSTEMS.
Professor Paidoussis

305-643Y. VIBRATIONS IN ENGINEERING SYSTEMS.
Professor Paidoussis

305-644A. NONLINEAR AND DISTRIBUTED PARAMETER CONTROL SYSTEMS.
Professor Hoffman

305-650A. HEAT TRANSFER.
Professor Stachiewicz

305-651Y. DESIGN OF HEAT TRANSFER EQUIPMENT.
Professor Stachiewicz

305-652B. DYNAMICS OF COMBUSTION.
Professors Knystautas & Lee

5.7 DEPARTMENT OF MINING AND METALLURGICAL ENGINEERING AND APPLIED GEOPHYSICS

Chairman
W.M. Williams, M.Sc.(Bristol.) Ph.D.(Tor.)

Professors
W.G. Davenport, M.A.Sc.(U.B.C.), Ph.D. (Lond.)
J.J. Jones, B.Eng.(McG.), Ph.D.(Cantab.)
T. Salman, M.Eng., Ph.D.(McG.)
W.M. Telford, M.Sc., Ph.D.(McG.)
W.M. Williams, M.Sc.(Bristol), Ph.D.(Tor.)

Associate Professors
J.E. Gruzleski, M.Sc.(Qu.), Ph.D.(Tor.)
R.I.L. Guthrie, B.Sc., Ph.D.(Lond.)
B.W. Mackenzie, M.S.(Rand.) D.Eng.Sc.(Col.)

R.R. MacLachan, B.Eng.(McG.), M.Sc.(Qu.)
G.W. Smith, M.Eng. Ph.D.(McG.)
W.T. Thompson, M.A.Sc., Ph.D.(Tor.)
J.E. Udd, M.Eng., Ph.D.(McG.)

Assistant Professors
P.A. Distin, B.Sc., Ph.D.(Lond.)
O.T. Djamgouz, M.Eng.(McG.)
O.G.Jensen, M.Sc., Ph.D.(U.B.C.)
C.C. Ku, M.Sc.(Wash.), Ph.D.(McG.)

Lecturers
J.A. Finch, M.Eng., Ph.D(McG.)
W.T. Yen, M.Sc., Ph.D.(McG.)

Senior Demonstrator
M. Firth, M.Eng.(McG.)

Special Lecturers
R.S. Boire,B.Com,(McG.),C.A.
J.P. Drolet,B.A.Sc.(Laval), M.Sc.(Col.)
T.E. Hawkins, B.Eng.(Alta.)

Senior Demonstrator
M. Firth, M.Eng.(McG.)

The Department of Mining and Metallurgical Engineering offers separate programs leading to the Bachelor of Engineering degree in Mining Engineering or in Metallurgical Engineering. Both curricula have been extensively redefined in recent years to take account of the new technology which has been developed both in the mining and the metallurgical industries. In addition to regular courses and laboratories, the curriculum includes seminars, colloquia, and student projects reinforced by field trips to metallurgical or mining operations throughout Ontario and Quebec. The training provided is designed to make a graduate useful and confident in his abilities by the time that he obtains his degree so that he can assume substantial responsbility soon after graduation.

Graduates in metallurgical engineering find opportunities in the metal producing, metal processing or metal consuming industries and their jobs may involve them in research, development, operations or management. Some make their careers in allied fields (such as ceramics or welding) or take up positions in consulting groups or with government departments.

Graduates in mining engineering are in demand not only in Canada but in other countries, particularly in Africa and Australia, which have large mining industries. Technical developments, e.g. in the operation of open pit mines and in under-ocean mining, have been important and rapid in recent years. These developments, combined with an international concern to preserve a decent environment, offer a genuine challenge to the imaginative student with a strong engineering interest. Students wishing to specialize in geophysical exploration may take appropriate elective courses in geophysics. Graduates specializing in this field may expect to find employment in the mine, oil and gas exploration industry.

The equipment operated by the Department is the best available, most of it being less than five years old. On the metallurgical side: an electron probe microanalyzer, and electron microscope; one of the largest university facilities in North America for melting and casting; computer facilities; x-ray diffraction machines; modern equipment for mechanical testing and deformation studies and a comprehensive range of analytical equipment. In mining: facilities for the testing of rocks under closely controlled conditions of temperature and humidity, a wide range of equipment for studying environmental factors of importance in mining (dust, illumination, ventilation, etc.), geophysical laboratories, and extensive facilities at Mont. St. Hilaire for mining research.

CURRICULUM FOR THE B.ENG. DEGREE IN METALLURGICAL ENGINEERING

Required Courses

NON-DEPARTMENTAL SUBJECTS

		Course Credit	
180-331A	Inorganic Chemistry of the Solid State	3	
189-261A	Linear Algebra and Differential Equations I	3	
189-262B	Linear Algebra and Differential Equations II	3	
189-263A	Advanced Calculus	3	
189-264B	Introduction to Boundary Value Problems	3	
303-005A,B	Mechanics I	4	
304-181A,B	Electric Power	3	
305-246A,B	Heat Transfer	3	
308-080A,B	Computers in Engineering	2	27

METALLURGICAL ENGINEERING SUBJECTS

306-011A,B	Fundamentals of Metallurgical Engineering	3	
306-012A	Engineering Thermodynamics	3	
306-013F	Technical Report I	2	
306-114F	Technical Report II	3	
306-115B	Instrumental Analysis	3	
306-140A	Applied Fluid Dynamics	3	
306-150B	Extractive Metallurgy I	3	
306-151B	Electrometallurgy	3	
306-152B	Hydrometallurgy	3	
306-160B	Heat Treatment and Phase Transformations	3	
306-161A	Solidification and Casting	3	
306-162B	Strengthening, Deformation and Fracture	3	
306-241A	Mineral Separation	3	
306-253B	Extractive Metallurgy II	3	
306-342A	Surface Chemistry of Mineral Separation	3	
306-355A	Process Engineering Metallurgy	3	
306-416B	Metallurgical Design	2	49

Elective Courses

Six courses, four of which must be selected from courses offered by the Department and one of which must be a Project. **18**

DEPARTMENTAL ELECTIVES

306-154A	Metallurgical Thermodynamics	3
306-158A	Corrosion Principles	3
306-263A	Advanced Physical Metallurgy	3
306-264B	Physical Metallurgy Project	3
306-443B	Mineral Separation Project	3
306-444B	Concentrator Circuit Analysis	3
306-456B	Steelmaking Processes	3
306-457A	Process Metallurgy Project	3

GENERAL ELECTIVES

One course	3
Total	**97**

CURRICULUM FOR THE B.ENG. DEGREE IN MINING ENGINEERING AND APPLIED GEOPHYSICS

Required Courses

		Course Credit	
NON-DEPARTMENTAL SUBJECTS			
186-210A	Mineralogy	3	
186-221A	General Geology	3	
186-232B	Structural Geology	3	
186-440B	Mineral Deposits	3	
189-261A	Linear Algebra and Differential Equations I	3	
189-262B	Linear Algebra and Differential Equations II	3	
189-263A	Advanced Calculus	3	
189-264B	Introduction to Boundary Value Problems	3	
303-005A,B	Mechanics I	4	
303-107A,B	Solid Mechanics	4	
304-181A,B	Electric Power	3	
308-080A,B	Computers in Engineering	2	37
MINING ENGINEERING COURSES			
306-001A	Introduction to the Mineral Industry	3	
306-101B	Mining Engineering Techniques	3	
306-123A	Mineral Industry Economics I	3	
306-140A	Applied Fluid Dynamics	3	
306-224B	Mineral Industry Economics II	3	
306-225A	Mathematical Applications in the Mineral Industry I	3	
306-227A	Materials Handling	3	
306-230B	Geophysical Exploration	3	
306-241A	Mineral Separation	3	
306-321B	Behaviour of Rock Structures	3	
306-326B	Mathematical Applications in the Mineral Industry II	3	
306-328B	Mine Environments	3	
306-420A	Mining Feasibility Study I	3	
306-420B	Mining Feasibility Study II	3	
306-429D	Research Project	5	47

Elective Courses

TECHNICAL ELECTIVES

Three courses to be chosen from those offered by the department or from other suitable graduates or undergraduate courses 9

DEPARTMENTAL ELECTIVES

306-323A	Applied Explosives	3
306-331A	Advanced Exploration Geophysics I	3
306-332A	Mathematical Applications in Geophysics	2
306-433B	Advanced Exploration Geophysics II	3
306-434B	Potential Theory in Geophysics	2
306-435B	Advanced Exploration Geophysics III	3
306-436A	Advanced Exploration Geophysics IV	3

GENERAL ELECTIVES

Two courses 4

Total **97**

Courses Offered By The Department

The courses in this department have been renumbered to conform with the following classification system. The first three numbers (i.e. 306) are the department code. The next digit is the level of instruction. The last two digits are classified as follows:

01 to 09	elementary mining courses.
10 to 19	elementary and general metallurgical courses.
20 to 29	general mining courses.
30 to 29	geophysics courses.
40 to 49	mineral processing courses.
50 to 59	extractive and process metallurgy courses.
60 to 69	physical metallurgy courses.
70 to 79	seminars

Courses In Mining And Metallurgical Engineering

Elective courses are preceded by the symbol •.

306-001A INTRODUCTION TO THE MINERAL INDUSTRY 3(3-3-3). An introduction to the mineral industry in which the basic parameters involved are developed from a mining engineering viewpoint. The Canadian mineral industry, exploration methods, drilling theory and methods, explosives theory and application to underground and surface mining, introduction to fragmentation of materials, introduction to mining environmental control.
Professors Djamgouz & Mackenzie

306-011A,B FUNDAMENTALS OF METALLURGICAL ENGINEERING 3(3-3-3). Introduction: scope and historical development, metals and the evolution of society, economic and geo-political factors, metals for tomorrow. *Mineral Processing:* minerals of economic importance — metallic (iron, copper, lead, zinc, gold), industrial (potash, asbestos, silica), identification of ore and gangue minerals, ore deposits, exploration, discovery, valuation of mineral deposits, the role and economic analysis of concentration operations. *Extractive Metallurgy:* pyrometallurgy (fuels, ore treatment and furnace processes in the ferrous and non-ferrous industries), hydrometallurgy (leaching, metal recovery and electro-refining of zinc, copper and nickel), halide metallurgy (chlorination (uranium) and fused salt electrolysis (aluminum) processes). *Physical Metallurgy:* crystal structure (defects, diffusion and deformation), phase diagrams, phase reactions and alloy systems, examination techniques (preparation, light and electron microscopy, electron micro-probe, X-ray diffraction and radiography).
Professor Davenport & Staff

306-012A ENGINEERING THERMODYNAMICS 3(3-1-5). Scope and nature of thermodynamics, classical versus microscopic approach. First Law, mechanical work and heat, applications to elastic deformation of solids, thermochemistry, elementary gaseous expansion processes. Second Law, Carnot cycle for ideal gas, Clausius Inequality, application to simple power and refrigeration cycles. Helmholtz and Gibbs functions, application to simple chemical processes. Third Law and absolute entropy. Phase equilibrium for a pure substance. Chemical equilibrium, applications involving gaseous mixtures or ideal solutions.
Professor Thompson

306-013F TECHNICAL REPORT I 2(0-0-6). A technical paper prepared in accordance with instructions from the Department.
Dr. Finch

306-015A,B MATERIALS SCIENCE 3(2-2-5). Historical significance, mechanical and physical behaviour, polymers and plastics, crystalline materials, phase diagrams, heat treatment, fabrication.
Professors Gruzleski & Williams

306-101B MINING ENGINEERING TECHNIQUES 3(3-3-3). (Prerequisite: 306-001A.) A study of mining engineering techniques and their application to the development of extractive methods for the exploitation of mineral deposits. Geodynamics, surface and underground mining operations, principles of mine surveying, introduction to materials handling, mining methods, stope and pillar mining, principles of open pit design, development of an underground system below an operating open pit.
Professor MacLachlan

306-114F TECHNICAL REPORT II 3(0-0-9). (Prerequisite: 306-013F.) A technical paper prepared in accordance with instructions from the Department, together with oral presentation.
Dr. Finch

306-115B INSTRUMENTAL ANALYSIS 3(2-3-4). (Prerequisite: 180-331A**.) Methods of sample preparation, UV and visible spectrophotometry, infra-red spectrophotometry, flame and atomic absorption spectrophotometry, emission spectroscopy, electro-deposition and coulometry, polarography, potentiometric titrations, gas chromatography, Leco train analysis, X-ray diffraction and fluorescence spectroscopy, radiotracer techniques.
Dr. Finch

306-123A MINERAL INDUSTRY ECONOMICS I 3(3-0-6). (Prerequisite: 306-001A.) Incorporation procedures, company direction and directorships, cost accounting and controls, company law, financial statements, federal taxation.
Mr. Boire

306-140A APPLIED FLUID DYNAMICS 3(2-1-6). (Prerequisite: 303-005A,B**.) Total energy balance, mechanical energy balance, viscosity, friction, Newtonian and non-Newtonian flow. Pipes, valves and fittings, compressible flow, draft. Flow through stacks and ventilation ducting, compressors, fans and blowers. Measurement of flow and pressure. Flow of solids through fluids, slurry transport (settling and non-settling), classification, thickening, filtering, fluidization, cyclones.
Professor Smith

306-150B EXTRACTIVE METALLURGY I 3(2-3-4). (Prerequisites: 306-011A,B**, 308-080A.) An examination of some of the operations and processes of extractive metallurgy and the need for control through the application of chemical and thermodynamic principles; stoichiometry and materials balances — ores, gangue minerals, fluxes and slags; enthalpy and heat balances — fuels, flame temperatures, operating temperatures, heat losses, refractories; free energy and process equilibria — process variables and their interactions, optimum conditions.
Professor Smith

306-151B ELECTROMETALLURGY 3(2-3-4). (Prerequisite: 306-012A.) Coulometry. Conductance and transference in electrolytes. Thermodynamics of electrolyte solutions. Electrochemistry of reversible cells, electrode potentials. Pourbaix diagrams: application to corrosion, leaching and electrodeposition. Irreversible electrode processes: application to corrosion and electrodeposition.
Professor Thompson

306-152B HYDROMETALLURGY 3(2-3-4). (Prerequisite: 306-011A,B.) Unit processes in hydrometallurgy: acid, alkaline and pressure leaching methods. Thermodynamic and kinetic aspects. Purification of leach liquors by ion exchange, solvent extraction and selective precipitation operations. Solid-liquid separation techniques. Recovery of metal values by cementation, electrowinning, and hydrogen precipitation methods. Contemporary plant design incorporating the above principles.
Professor Distin

• **306-154A METALLURGICAL THERMODYNAMICS 3(2-3-4).** (Prerequisite: 306-012A.) Binary metallic solution: relationships between partial molar properties, limiting laws, regular solutions and microscopic interpretation of partial molar quantities. Heterogeneous equilibria in binary systems and activity data approximations from phase diagrams. Ternary phase diagrams in systems where only one phase has variable composition. Dilute ternary and multi-component systems, interaction parameters. Concentrated ternary solutions, graphical Gibbs-Duhem integrations.
Professor Thompson

•**306-158A CORROSION PRINCIPLES 3(2-3-4).** Review of principles of metal oxidation in aqueous and non-aqueous environments with special reference to corrosion. Structure, properties, kinetics and growth mechanisms of oxide films, stress corrosion,corrosion fatigue, hydrogen embrittlement, carbide precipitation, cavitation, anodic and cathodic protection, protective coatings. Use of non-metallic materials. Corrosion in industrial processes, soils, and marine environments. Corrosion testing methods. Corrosion as a factor in design and selection of materials.
Professor Distin.

306-160B HEAT TREATMENT AND PHASE TRANSFORMATIONS 3(2-3-4). (Prerequisite: 306-011A,B*.) Precipitation, eutectoid reactions, austenite-martensite reaction, bainite formation, recovery, recrystallization, grain growth, secondary recrystallization. Industrial heat treatment of ferrous and non-ferrous metals based on these transformations.
Professor Williams

306-161A SOLIDIFICATION AND CASTING 3(2-3-4). (Prerequisite: 306-011A,B*.) Nucleation and grain refinement, freezing of pure metals, solute redistribution during solidification, constitutional undercooling, dendritic freezing, segregation phenomena, the freezing of gray, white, and nodular cast iron, malleable iron, industrial casting techniques, ingot structures.
Professor Gruzleski

306-162B STRENGTHENING, DEFORMATION AND FRACTURE 3(2-3-4). (Prerequisite: 306-011A,B*.) Strengthening of metals by: work hardening, grain size refinement, sub-structure strengthening, solute, precipitate, dispersion, order and martensitic hardening. Practical implications. Service failure and prevention, mechanisms of brittle and ductile fracture, creep and fatigue. Industrial shaping and forming, theories and processes.
Professor Jonas

306-224B MINERAL INDUSTRY ECONOMICS II 3(3-0-6). (Prerequisite: 306-123A.) Applications of economic analysis for corporate planning and the structuring of mineral policy in government organizations. The mineral conversion process, the mine in economic theory, Canadian mineral policy, case studies in mining company organization and planning.
Professor Mackenzie & Mr. Drolet

306-225A MATHEMATICAL APPLICATIONS IN THE MINERAL INDUSTRY I 3(3-0-6). (Prerequisites: 189-261A, 189-263A, 308-080A. Corequisites: 189-262B, 189-264B.) The application of probability theory and statistics to decision problems in the mineral industry. Treatment of data using statistical analysis and probability theory, or reserve estimation and grade control, statistical de-

cision theory applied to exploration strategy, mineral occurrence models, mineral market forecasting techniques.
Professors Ku & Mackenzie

306-227A MATERIALS HANDLING 3(3-3-3). (Prerequisite: 306-101B.) A study of the factors involved in the selection of methods for handling ores, raw materials, and other resources. Materials handling systems for underground and open cut mines, transportation of materials, comparative studies of alternative systems for selected cases, capital and operating costs of equipment. Candidates will prepare and present a colloquium on a selected topic.
Professor Djamgouz

306-230B GEOPHYSICAL EXPLORATION 3(2-2-5). (Co-requisites: 189-262B, 189-264B.) Applications of seismic, gravity, magnetic, electrical and radioactive methods in petroleum and mineral exploration.
Professor Jensen

306-241A MINERAL SEPARATION 3(2-3-4). (Prerequisites: 306-001A or 306-011A,B.) General discussion of minerals and ores. Size reduction and liberation. Screening and particle size determination. Handling of solids and pulps. Fundamentals of mineral concentration. Gravity, chemical, electrical, magnetic, and electrostatic separations. Introduction to cyanidation and flotation.
Dr. Finch

306-253B EXTRACTIVE METALLURGY II 3(2-3-4). (Prerequisite: 306-150B.) Equilibrium phase diagrams, phase separation. Non-equilibrium solidification, zone refining. Thermodynamics of metal reduction, roasting, refining processes, reaction efficiencies. Physical and chemical aspects of oxide slags and refractories. Analysis of developments in the production of lead, zinc, copper, and nickel. Metallurgy of the less common metals.
Professor Guthrie

•**306-263A ADVANCED PHYSICAL METALLURGY 3(2-2-5).** (Prerequisites: 306-160B, 306-161A, 306-162B.) A lecture and discussion course dealing with selected current topics in physical metallurgy, drawn from the general fields of solidification, mechanical metallurgy, heat treatment processes and alloy development.
Professor Gruzleski and Staff

•**306-264B PHYSICAL METALLURGY PROJECT 3(0-6-3).** (Prerequisites: 306-160B, 306-161A, 306-162B.) An experimental or theoretical project, based partly on the student's interests, on some topic in physical metallurgy, e.g. in solidification, deformation, heat treatment, alloying, instrumentation, powder metallurgy, joining processes.
Professor Gruzleski & Staff

306-321B BEHAVIOUR OF ROCK STRUCTURES 3(3-3-3). (Prerequisites: 303-107A,B, 306-101B, Co-requisite: 186-232B.) Summary of the contributions made by various disciplines to the field of rock mechanics, the state of present knowledge, application of basic principles to problems involving the design of competent structures in rock masses.
Professor Udd

•**306-323A APPLIED EXPLOSIVES 3(2-3-4).** The course is designed to introduce the engineering aspects of explosives relevant to their use in rock and ground excavation. The concepts of fuel-oxidizer mixes and the principles of various formulations such as dynamite slurries and dry mixes are reviewed. The concept of detonation and the physical factors related to detonation that govern the performance of many commercial explosive formulations are discussed. Initiation systems, blast damage and vibration control, blasting frozen ground, tunnelling and other topics are included. Basic concepts in drilling and blast patterns are presented. Legislation regarding explosives transport, handling, and storage are included.
Professor MacLachlan

306-326B MATHEMATICAL APPLICATIONS IN THE MINERAL INDUSTRY II 3(3-0-6) Prerequisite: 306-225A.) The application of management science techniques to decision problems in the mineral industry. Economic evaluation techniques, the mine development decision, Monte Carlo methods for the simulation of uncertainty, allocation theory, dynamic modelling and simulation of milling circuits, planning and scheduling techniques.
Professor Mackenzie

306-328B MINE ENVIRONMENTS 3(3-2-4). (Prerequisites: 306-001A, 306-140A.) The major elements of the course involve the characteristics of air contaminants, pathogenesis of pneumoconiosis, problems of noise and vibrations, principles of illumination and underground lighting, mine ventilation systems, and design features of dust control and make-up air supply systems. Candidates will prepare a technical paper on a selected topic.
Professor Djamgouz

•**306-331A ADVANCED EXPLORATION GEOPHYSICS I 3(2-3-4).** (Prerequisite: 306-230B.) Applications of gravity and magnetic methods in petroleum and mineral exploration with particular emphasis on instruments, field methods, and interpretation of results.
Professor Telford

•**306-332A MATHEMATICAL APPLICATIONS IN GEOPHYSICS 2(2-0-4).** (Prerequisite: 306-230B.) Vectors, elementary tensors, and relaxation methods applied to geophysical analysis.
Professor Ku

306-342A SURFACE CHEMISTRY OF MINERAL SEPARATION 3(2-3-4). (Prerequisite: 306-241A.) Chemical and physical thermodynamic factors underlying surface and interfacial phenomena. Fundamentals of flotation operations. Adsorption mechanisms in relation to floatability. Collection, activitation, depression of metallic and non-metallic minerals. Quantification of concentration operations. Principles of automation.
Professor Salman

306-355A PROCESS ENGINEERING METALLURGY 3(3-1-5). (Prerequisites: 305-246A*, 306-012A.) Analysis of processes involved in the winning, refining and treatment of metals with special emphasis on transport phenomena. Fick's Laws, interfacial equilibria, single and multicomponent mass transfer operations. Convective systems. Topochemical reactions. Dimensional analysis, pilot plants and modelling. Characteristics of linear and well-mixed reactors, tracer techniques.
Professor Guthrie

306-416B METALLURGICAL DESIGN 2(2-0-4). (Prerequisite: Satisfactory completion of the required courses in the relevant areas of the Metallurgical Engineering program. Departmental approval is necessary.) Design of new metallurgical plants, processes and products based on knowledge acquired in previous core courses, materials and heat balances, metal economics, design and optimization.
Professor Davenport

306-420A MINING FEASIBILITY STUDY I 3(0-3-6). (Prerequisites: 186-232B, 306-241A, 306-227A, 306-326B, 306-328B.) The course is a case study exercise in application of the specialist skills developed in the mining engineering program. The purpose of the course is to combine these skills in carrying out an appraisal of the technical feasibility and economic attractiveness of developing a mineral deposit, based on the results of an exploration program, and to select the most attractive alternative. Staff members are available for individual consultations and for the presentation of seminars as required. Students are required to present seminars on aspects of the case study analysis. Final individual reports are to be prepared to professional standards. Individual interpretations are encouraged.
Professor Djamgouz and Staff

306-421B MINING FEASIBILITY STUDY II 3(0-3-6). (Prerequisite: 306-420A.) Based on the results of 306-420A, students are required to complete the preliminary design and feasibility study of the mining system. Staff members are available for individual consultations and for the presentation of seminars as required. Students are required to present seminars on aspects of the case study analysis. Final individual reports are to be prepared to professional standards. Individual interests are encouraged and wide latitude of content is permitted in the preparation of the reports.
Professor Djamgouz and Staff

306-429D RESEARCH PROJECT 5(0-2-12). (Prerequisites: 306-227A, 306-328B, and others depending on the topic chosen.) To develop an understanding of independent study and research methods including problem definition, selection of approach, problem of solution and communication of results. Research topics, which may be principally experimental, theoretical or involve a critical review of the literature, will be chosen in consultation with individual staff members who will act in a supervisory capacity throughout the project.
Professor Mackenzie & Staff

•**306-433B ADVANCED EXPLORATION GEOPHYSICS II 3(2-3-4).** (Prerequisite: 306-331A and consultation with instructor.) Applications of electrical methods in petroleum and mineral exploration with particular emphasis on instruments, field operations and interpretation of results.
Professor Telford

•**306-434B POTENTIAL THEORY IN GEOPHYSICS 2(2-0-4).** (Prerequisite: 306-332A.) Applications of potential theory in gravity, electrostatics, magnetostatics, solution of Laplace's and Poisson's equations, earth's gravity and magnetic fields.
Professor Ku

•**306-435A ADVANCED EXPLORATION GEOPHYSICS III 3(2-3-4).** (Prerequisites: 306-230B and consultation with instructor.) Seismic methods in petroleum exploration, instrumentation, field operations, processing of data and interpretation of results.
Professor Jensen

•**306-436B ADVANCED EXPLORATION GEOPHYSICS IV 3(2-3-4).** (Prerequisite: 306-230B and consultation with instructor.) Seismic methods in mineral exploration and engineering geophysics. Radioactivity method, instrumentation and interpretation of results. Well logging techniques with particular emphasis on instrumentation, interpretation of petroleum well logs, applications in mineral exploration areas.
Professor Telford

•**306-443B MINERAL SEPARATION PROJECT 3(0-6-3).** (Prerequisites: 306-140A, 306-342A.) Ore samples will be given to groups of students to study possible methods of concentration. Open circuit feasibility tests and locked (or cycle) tests will be conducted to evaluate batch and continuous circuits. Economic feasibility of the ore deposit will have to be established and completed with a concentrator design.
Professor Salman & Staff

•**306-444B CONCENTRATOR CIRCUIT ANALYSIS 3(2-3-4).** (Prerequisite: 306-342A.) Preliminary mill design, flowsheet evaluation and concentration circuit analysis. Pulp density relationships, flow of pulp, flow of solids and liquids through a circuit.

Design of unit operations in series and in parallel. Circuit controls. Tailings disposal in relation to pollution and environmental control.
Professor Salman

•**306-456B STEELMAKING PROCESSES 3(2-2-5).** (Prerequisites: 306-253B*, 306-355A*.) Physicochemical, kinetic and economic aspects of the following: iron-making in blast furnaces, sintering operations, coke-making and steelmaking in electric, basic oxygen and open-hearth furnaces. Survey of associated pollution emissions and current abatement methods.
Professor Davenport

•**306-457A PROCESS METALLURGY PROJECT 3(0-6-3).** (Prerequisites: 306-151B, 306-152B, 306-253B. Co-requisite: 306-355A.) A wide variety of experimental projects in process metallurgy, covering the fields of hydro-, electro-, pyro-, and chemical metallurgy will be suggested by staff (or students) for detailed investigation and evaluation.
Professor Distin & Staff

V.S. Alagar
A. Greenberg
L. Kumar

Computer science is less than 30 years old, and in this short time has become a field of broad practical and theoretical importance. The creators of electronic calculating machines during the last world war solved many scientific computational problems, and rapid growth of computational numerical analysis followed. Mathematical techniques found applications beyond scientific and engineering problems, creating the new field of operations research. Computers began to be put to uses of such complexity that describing the problems became more difficult than the computations themselves. Instructing the computer became the specialized discipline of programming. Programmers needed languages to communicate with the machine and operating systems to control it, and the field of software was born. The discovery of non-numerical uses of computers led to fields as diverse as large scale data processing, information retrieval and artificial intelligence. On the theoretical side, the problems and applications of computers have created areas of study in the theory of formal languages, the theory of automata and the theory of computation.

Most of the areas of computer science require study at the postgraduate level, and this is the major emphasis of the School of Computer Science. Some of the postgraduate courses are open to suitably qualified senior undergraduates (see the *Announcement of The Faculty of Graduate Studies and Research,* Section 'E'). At the undergraduate level, a variety of courses is offered, concentrating on the development of programming skills, but including introductions to software, computer systems and numerical analysis.

Courses Offered By The School

N.B. All of the following courses are introductory and not more than one of them may be taken for credit:

308-070	Restricted to Architecture students
308-080	Restricted to Engineering students
308-100	Restricted to Arts students
308-200	Primarily for students of Mathematics, Physics, Chemistry
308-220	Primarily for students of Biology, Psychology and Social Sciences.

Note that continuation to other computer science courses is possible only from 308-080 or 308-200.

308-070A,B COMPUTERS AND ARCHITECTURE 2(1-2-3). A beginning course in computing designed to introduce general concepts in computing as well as a basic working knowledge of the programming language FORTRAN. Credit only for students in the School of Architecture. The course consists of 15 modules, containing videotape lectures, module booklets, interactive terminal sessions and assignments to be run on the computer.

308-080A,B COMPUTERS IN ENGINEERING 2(2-1-5). (Prerequisites: Differential and integral calculus. Co-requisite: linear algebra: determinants, vectors, matrix operations.) An introduction to computing and discussion of computing methods for engineering problems. Machine language; FORTRAN; numerical methods (roots of equations, quadrature, simultaneous linear equations, differential equations); use of library subroutines.
Professor Merrett

308-100A,B INTRODUCTION TO COMPUTING 3(1-2-6). A beginning course in computing designed to introduce general concepts in computing as well as a basic working knowledge of the programming language FORTRAN. This course is not available to Engineering students.
Staff

308-200A,B INTRODUCTION TO COMPUTER SCIENCE 3(2-0-7). (Prerequisite: 189-222 or equivalent.) Number systems; data representation; algorithm design; FORTRAN; computer methods including searching, sorting, solution of equations, numerical integration and matrix manipulation.
This course is not normally available to Engineering students, who must take either 308-080A or 304-021A, depending on their departmental requirements.
Staff

308-210A,B COMPUTER STRUCTURE AND ASSEMBLY LANGUAGE PROGRAMMING 3(2-0-7). (Prerequisite: 308-080A or 308-200.) Computer structure, machine language, instruction execution, addressing techniques, and digital representation of data. Symbolic coding and assembly systems, macro definition, program segmentation and linkage.
Professor Ratzer

308-220A,B DIGITAL COMPUTING FOR STATISTICAL ANALYSIS 3(3-0-6). (Prerequisite: 166-350A, 189-231A, or 204-204A.) The course introduces the student to computers and to their uses in the solution of statistical problems. Number systems, data representation, characteristics of a high-level programming language (FORTRAN). Methods of computer solution of statistical problems, random numbers, games of chance, simulation.

308-230A,B COMPUTERS IN DATA PROCESSING 3(2-0-7). (Prerequisite: 308-200 or equivalent programming experience.) Uses of computers for data processing, COBOL; job control language; system utility programs including sort/merge; file processing; comparison of languages in business-oriented applications.
Professor Burrage

308-250A,B NUMERICAL ANALYSIS 3(3-1-5). (Prerequisites: 189-286B or 189-288B, 308-080A, or 308-021A.) Solution techniques for linear, simultaneous, algebraic equations; iterative methods for the solution of nonlinear equations, interpolation and curve fitting, numerical integration by interpolative and quadrature methods, numerical integration of systems of differential equations, including initial value and boundary-value problems, relationship of differential equations to the eigenvalue problem, the matrix eigenvalue problem and its solutions.
Professor Bach (Mechanical Engineering), Professor Burrage

308-300A,B PROGRAMMING LANGUAGES 3(2-0-7). (Prerequisite: 308-210 or 304-021.) A study of scientific programming languages including PL/1, APL and GPSS. Introduction to theory of compilers and interpreters. Computer solution of non-numerical problems.
Professor Thorpe

308-305A COMPUTER SYSTEM ARCHITECTURE 3(3-0-6). (Prerequisite: 308-210.) A functional description of computer hardware. Hardware concepts and current technology. Memories, buffers, memory hierarchies and dynamic address translation. CPU characteristics, performance factors, overlap, parallel and pipeline systems. Microprogramming. Interrupt mechanism and clocks. Channels, control units, input devices including telecommunication equipment.
Mr. Greenberg

308-310B COMPUTER SYSTEMS AND ORGANIZATION 3(2-0-7). (Prerequisite: 308-300.) Control and scheduling of large information processing systems. Operating system software - resource allocation, dispatching, processors, access methods, job control languages, main storage management. Batch processing, multiprogramming, multiprocessing, time sharing.
Professor Valenti

308-315A INFORMATION STRUCTURES 3(2-1-6). (Prerequisite: 308-210 or 304-021A.) This course introduces the concepts of data storage and develops competence in data manipulation. The student is expected to write and run his own programs, mainly in FORTRAN. The course discusses the basic types of data structures, their theoretical properties and some of their applications. Contents: storage of arrays, applications to special matrices and scientific computation; queues and stacks, applications to compiler writing; sorting and searching; introduction to list processing and symbolic manipulation.
Professor Merrett

308-320B FILES AND DATA BASES 3(2-0-7). (Prerequisites: 308-230A, 308-315A.) PL/1 language essentials; data sets, files and JCL; sequential files; printing, sorting, updating, indexed sequential files;direct files; files of structured data; data bases.
Professor Merrett

308-415B PROGRAMMING LANGUAGE STRUCTURE AND COMPILERS 3(3-0-6). (Prerequisite: 308-315A. Recommended: 308-300.) An introduction to the structure of programming languages and techniques of compilation. A study of various programming languages and their structures from the point of view of implementation. An introduction to compilers and compiler writing. The student is expected to acquaint himself with the languages discussed and with compilation techniques by writing and running programs and compiler segments.
Professor Lalonde

308-425B HEURISTIC PROGRAMMING 3(3-0-6). (Prerequisite: 308-315). This course introduces heuristic as opposed to algorithmic concepts in problem solving, pattern recognition, learning and adaptation. The student is expected to write and run programs in the above areas. CONTENTS: Game trees; programs that play games; heuristic search procedures; programs that solve problems; learning programs; adaptive programs; question answering programs; pattern recognizing programs. **Professor Toussaint**

308-573B MINI-COMPUTERS. Characteristics of mini-computers. Their internal structure. Assembler and machine language programming with emphasis on PDPII.Assemblers, loaders and simulators for several machines. Manufacturers' supplied softward including operating system. Mini-computer applications. Students will be assigned "hands-on" projects.

308-610A INFORMATION STRUCTURES

308-611B DATA STRUCTURE AND LIST PROCESSING TECHNIQUES

308-614A COMPUTER METHODS IN SYSTEMS ANALYSIS I

308-615B COMPUTER METHODS IN SYSTEMS ANALYSIS II

308-620A PROGRAMMING LANGUAGES AND COMPILERS

308-621B THEORETICAL ASPECTS OF COMPILER CONSTRUCTION

308-624A HIGH-LEVEL COMPUTER LANGUAGES I

308-625B HIGH-LEVEL COMPUTER LANGUAGES II

308-630A FORMAL LANGUAGES

308-631B THEORY OF ALGORITHMS AND COMPUTATIONAL COMPLEXITY

308-640A NUMERICAL ALGORITHMS I

308-641B NUMERICAL ALGORITHMS II

308-644A PATTERN RECOGNITION

308-660A COMPUTER METHODS IN OPTIMIZATION I

308-661B COMPUTER METHODS IN OPTIMIZATION II

308-671B COMPUTER SYSTEMS AND ORGANIZATION

308-690A COMPUTER METHODS IN PROBABILITY AND STATISTICS I

308-691B COMPUTER METHODS IN PROBABILITY AND STATISTICS

308-750A ADVANCED TOPICS: THEORY

308-751B ADVANCED TOPICS: THEORY

308-752A ADVANCED TOPICS: PROGRAMMING

308-753B ADVANCED TOPICS: PROGRAMMING

308-754A ADVANCED TOPICS: SYSTEMS

308-755B ADVANCED TOPICS: SYSTEMS

308-756A ADVANCED TOPICS: APPLICATIONS

308-757B ADVANCED TOPICS: APPLICATIONS

6 CHOICE OF ELECTIVES

Students of the Faculty have a considerable choice of electives divided into the categories of general and technical. The choice while wide is limited by timetable considerations and by departmental regulations although the Faculty tries to arrange its timetable to provide maximum choice. The departments publish, in this *Announcement* and in separate documents, information regarding the choice of courses. Students should also consult their course advisers. Some general information applicable to all students of the Faculty is given below. This mainly covers the area of management, a topic of considerable importance to engineers, but also gives information on environmentally oriented courses and materials science.

COURSES IN MANAGEMENT FOR ENGINEERING STUDENTS

Many engineers begin to assume management functions within a few years of graduation. They can at this stage take up the study of economics, behavioural science and other management subjects. For students wishing to include such studies in their undergraduate program, the University provides, through our own Faculty and the Faculty of Management, a variety of suitable courses.

Three Faculty of Engineering courses are available, Engineering Economy, 300-010, is designed for U2 and U3 students and is not recommended for U1 students. It introduces the concept of costs into the evaluation of engineering projects and architectural proposals. Economic Environment, 300-011, provides an introduction to economics for students who have not taken a collegial course

in general economics. It is a prerequisite to Management, 300-112 which is an introduction to the principles of management. Seven courses are available, subject to timetable requirements, from the core program of the Faculty of Management. They are:

Accounting I	280-211A,B
Social Psychology	280-221A,B
Intro. to Organization Behaviour	280-222A,B
Organization Theory	280-323A,B
Finance I	280-341A,B
Managerial Economics	280-393A,B
Marketing Management	280-352B

Other courses from the core have considerable overlap with our own courses and thus are not available to our students.

Students interested in an overall view of management should take one or more of the following: 300-101, 300-011, 300-112.

Students wanting a more detailed treatment should choose: 300-011 or 154-200, followed by 280-323, are well adapted to engineering needs.

The following six courses form an integrated subprogram in Management: 280-211, 280-222, 280-323, 280-341, 280-393, 280-352. Prerequisite to entry to this program is satisfactory performance in a collegial course in general economics e.g. 383-915-71 or 383-920-71, or the McGill course 154-200, or the Faculty course 300-011. Since the program contains 18 credits it cannot be completed within the departmental general elective allowances. A student taking it must, therefore, either accept an additional load, take additional time, or have his department's permission to count some Management courses as technical electives. Students considering this sub-program should consult their advisor.

POLLUTION CONTROL

Most human activities affect the environment in some way. When the effect is appreciable and is generally judged to be deleterious it is called pollution. The control of pollution is an important and growing activity of engineers so that most areas of the Faculty are active in this area. While a basic engineering education is essential to professional work of this kind, students who are interested in orienting their program towards pollution control should note the following courses which are of direct relevance. These courses are divided into three groups; introductory, intermediate and advanced, which are respectively in general suitable for students in their first, second and third years. Since these courses are drawn from a wide spectrum of the Faculty, a student interested in pollution control may not have the stated prerequisite. In this case he should consult the professor in charge of the course regarding his suitability.

Introductory

300-030	The Environmental Aspects of Technology
302-204	Models of Socio-Technical Systems
303-110	Sanitary Engineering

Intermediate

302-271	Industrial Water Pollution Control
302-272	Industrial Air Pollution Control
303-230	Municipal Systems
303-231	Stream Pollution Control

Advanced

305-447	Combustion
306-328	Mine Environments

Non-engineering courses

154-425	Economics of Ecology
177-305	Environmental Biology
177-432	Limnology
180-307	Analytical Chemistry of Pollutants
495-471	Environment and the Law

A student wishing an overview of pollution control at a non-specialist level should take 300-303 and/or 302-204.

A student wishing to develop professional competence in the area should take either the sequence 302-271 and 272 or 303-110, 230 and 231. While there is significant overlap between the two sequences the viewpoints are different. The 302 series is considered from the point of view of the chemical engineer and the 303 series is considered from the point of view of the civil engineer. To these courses could well be added any of 305-447, 306-328 and 180-307. 305-447 is a guide to the processes which cause air pollution. 306-328, while having a specialized title, is valuable for all interested in hazardous atmospheres. 180-307 is a guide to the requirements and techniques of instrumentation. The other courses listed give insights into various aspects of pollution control which are covered by departments outside the Faculty.

Students wishing further advice should consult their advisor.

COMPUTER SCIENCE

McGill does not offer a first degree in Computer Science but offers an extensive range of courses for Engineering students interested in computers. The basic courses, given by the School of Computer Science, are:

Computers in Architecture	308-070A,B	2 credits
Computers in Engineering	308-080A,B	2 credits
Computer Structure and Assembly Language Programming	308-210A,B	2 credits
Numerical Analysis	308-250A,B	3 credits
Information Structures	308-315A	3 credits

Additional courses with significant Computer Science and Computer Engineering content are:

Computer Methods in Chemical Engineering	302-361A	3 credits
Process Control	302-311B	3 credits
Deterministic Systems	303-108B	3 credits
Construction Project Management	303-345A	3 credits
Introduction to Computers	304-021A,B	3 credits
Digital Systems Design	304-222A,B	3 credits
Small Computer Systems	304-324A	3 credits
Computer Organization and Architecture	304-425B	3 credits
Digital Signal Processing	304-512	3 credits
Digital Communications	304-521	3 credits
Image Processing and Communications	304-529	3 credits
Real-Time Systems	304-531	3 credits
Computer Graphics	304-532	3 credits
Text Processing	304-533	3 credits
Numerical Methods in Electromagnetics	304-543	3 credits
Graphics	305-091A	2 credits
Selected Topics in Operations Research	305-274B	3 credits
Numerical Control of Machine Tools	305-275B	3 credits
Programming Languages	308-300A,B	3 credits
Computer Systems Architecture	308-305A	3 credits
Computer Software Organization and Design	308-310B	3 credits
Files and Data Bases	308-320B	3 credits
Programming Language Structure and Compilers	308-415A	3 credits
Heuristic Programming	308-425B	3 credits

As the course numbers indicate, these courses are offered in a variety of departments at a variety of levels. Some will be required courses in the student's ordinary program; some will be courses in other departments which can be taken as technical electives. The student should consult with his adviser about the possibility and advisability of taking specific courses.

The following categories are a guideline to the content of the courses:

Programming and Programming Languages
304-021, 304-324, 305-091, 308-070, 308-080, 308-210, 308-300

Software Design
304-425, 304-529, 304-532, 304-533, 308-315, 308-305, 308-310, 308-320, 304-415, 308-425.

Hardware Design
304-222, 304-425, 304-512, 304-521, 304-532

Real-Time Processes
302-371, 304-541, 305-275

Operations Research
302-361, 303-108, 303-345, 305-274

Numerical Analysis
302-361, 304-543, 308-250

MATERIALS SCIENCE

Materials such as structural steel and reinforced concrete, high-alloy heat-resistant steels, composites such as fibreglass, polymers such as polyethylene and highly refined exotic materials such as germanium and silicon are of vital importance to engineers. A survey of the properties and characteristics of a wide range of such materials is provided by the elective, Materials Science 306-015A,B, offered by the Department of Mining and Metallurgical Engineering. The course 303-001A, Structural Materials, offered by the Department of Civil Engineering, treats similar material from a somewhat different viewpoint. Both courses are especially suitable for students in their first year. More advanced and specialized courses are provided by the departments and students should consult their departmental advisers regarding their choice.

ENVIRONMENTAL STUDIES

The University's Committee on Environmental Studies has assembled a number of courses which examine the relationship of man with the natural and constructed environment. These courses have few prerequisites so as to be available to a wide cross-section of students. Among them are two of our courses, Environmental Aspects of Technology, 300-030, and Models of Socio-Technical Systems, 302-204. The leaflet produced by the Committee of Environmental Studies should be consulted for details.

6.1 OUTSIDE DEPARTMENTS OFFERING COURSES FOR THE ENGINEERING CURRICULA

DEPARTMENT OF CHEMISTRY

Chairman
L.E. St.Pierre

Courses Offered by the Department

180-212A,B INTRODUCTORY ORGANIC CHEMISTRY I 4(3-3-6). (Prerequisites: 180-110A and 180-120B, or equivalent courses.) A survey of reactions to aliphatic and aromatic compounds including modern concepts of bonding, mechanisms, conformational analysis and spectra.
Professors Farrell & Ogilvie and Mrs. Heyge

180-213A,B INTRODUCTORY PHYSICAL CHEMISTRY I 3(3-0-6). (Prerequisites: 180-120B or equivalent; 189-120A,B and 189-121A,B or equivalent. First law of thermodynamics, enthalpy, thermochemistry, bond energies. Second law of thermodynamics: the entropy and free energy functions. Chemical and thermodynamic equilibrium states. Phase rule. Colligative properties of ideal solutions. Electrochemistry, electrochemical cells. Liquid and liquid surfaces. Chemical kinetics.
Professors Eisenberg & Patterson

180-250A SELECTED TOPICS IN ORGANIC AND PHYSICAL CHEMISTRY 3(3-0-6). (Prerequisites: 180-212A,B 180-213A,B Chemistry of amines alcohols, ethers, acids, esters and carbonyl compounds, and their sulphur analogues. Chemical kinetics and introduction to catalysis. Electrochemistry. The topics to be discussed will be of particular interest to students in chemical engineering.
Professors Eisenberg, Farrell & Grosser

180-331A INORGANIC CHEMISTRY OF THE SOLID STATE 3(3-0-6). (Prerequisites: 180-110A and 180-120B or equivalent) Primarily, but not exclusively, for engineers. Electronic structure and properties of the elements in relation to the Periodic Table. The solid state: structure, bonding, magnetic properties of metals and alloys. Descriptive chemistry of the metals.
Professor Hogan

DEPARTMENT OF GEOLOGICAL SCIENCES

Chairman
R. Doig

Courses Offered by the Department

186-210A INTRODUCTORY MINEROLOGY 3(2-3-4). Structures, composition and properties of the major rock-forming and ore minerals.
Professor Francis

186-221A GENERAL GEOLOGY 4(3-2-7). A survey course in physical geology with emphasis on economic and engineering aspects.
Professor Grice

186-232A STRUCTURAL GEOLOGY 3(2-3-4). (Prerequisite: 186-221A or eqivalent.) A systematic survey of rock structures, their origins and practical importance.
Professor Eakins

186-440B. MINERAL DEPOSITS 3(2-3-4). (Prerequisites: 186-210A, 186-232A.) Nature, origin, mode of occurence and classification of deposits of metallic and non-metallic minerals; typical occurrences; geographical distribution.
Professor MacLean

DEPARTMENT OF MATHEMATICS

Chairman
E. Rosenthall

Courses Offered by the Department

189-261 LINEAR ALGEBRA AND DIFFERENTIAL EQUATIONS I 3(3-1-5). Matrices and determinants, solution of systems of linear algebraic equations, introduction to vector spaces, linear dependence and independence, linear operators; first order differential equations; theory of linear differential equations; complex functions of a real variable and solution methods for linear constant coefficient equations; Laplace transform techniques.

189-262 LINEAR ALGEBRA AND DIFFERENTIAL EQUATIONS II 3(3-1-5). (Prerequisite: 189-261. Co-requisite: 189-263.) Series solution of variable coefficient linear differential equations; inner product spaces, eigenvalue problems, Sturm-Liouville Theory, orthonormal expansions; similarity transformations, matrix diagonalization, quadratic forms, solution techniques for systems of linear constant coefficient differential equations; numerical integration of differential equations.

189-263 ADVANCED CALCULUS 3(3-1-5). Partial derivatives, implicit functions, Jacogians; improper integrals, multiple integrals, arc lengths, surface area and volume, sequences and series; Taylor's theorem for one and several variables; minima and maxima of functions of several variables, constrained extrema.

189-264 INTRODUCTION TO BOUNDARY VALUE PROBLEMS 3(3-1-5). (Prerequisite: 189-263. Co-requisite: 189-262.) Scalar and vector fields, vector differential operators, orthogonal curvilinear coordinates; divergence theorem, Stokes' theorem, Green's theorem, partial differential equations of mathematical physics; boundary value problems, method of separation of variables, solution of Laplace, diffusion and wave equations by means of Fourier expansion techniques.

189-266 LINEAR ALGEBRA AND DIFFERENTIAL EQUATIONS I 3(3-1-5). Honours section of 189-261; similar in content, but taught in greater depth and with more challenging assignments.

189-267 LINEAR ALGEBRA AND DIFFERENTIAL EQUATIONS II 3(3-1-5). (Prerequisite: 189-266. Co-requisite: 189-268.) Honours section of 189-266; similar in content, but taught in greater depth and with more challenging assignments.

189-268 ADVANCED CALCULUS 3(3-1-5). Honours section of 189-263; similar in content, but taught in greater depth and with more challenging assignments.

189-269 INTRODUCTION TO BOUNDARY VALUE PROBLEMS 3(3-1-5). (Prerequisite: 189-268. Co-requisite: 189-267.) Honours section of 189-264; similar in content but taught in greater depth and with more challenging assignments.

189-381A FUNCTIONS OF A COMPLEX VARIABLE 3(3-0-6). Analytic functions, elementary functions, Cauchy-Goursat theorem and its consequences, power series, poles and residues, complex inversion theorem, conformal mapping, Schwartz-Christoffel Transformations, applications to problems in engineering and physics.

189-384B PROBABILITY 3(3-0-6). (Co-requisite: 189-288B.) Discrete probability distributions and random variables, probability densities and distribution functions, continuous random variables, expectation, sums of random variables, sampling theory, introduction to stochastic processes.

189-385A COMPLEX VARIABLES 3(3-0-6). Analytic functions, Cauchy-Riemann equations, Cauchy's theorem, residue calculus, inversion integral for Laplace transforms, conformal mapping, Poisson's integral formula, analytic continuation, Riemann surfaces, complex variable and integral transform methods of solution to boundary value problems.

DEPARTMENT OF PHYSICS

Chairman
J.M. Robson

COURSES OFFERED BY THE DEPARTMENT

198-271B. QUANTUM PHYSICS 3(3-0-6). Physical basis of quantum mechanics. The Schroedinger equation. Applications to problems in one dimension. The hydrogen atom. Electron spin and magnetic moment; the exclusion principle; quantum statistics. Periodic potentials.

198-321A. MODERN PHYSICS 3(3-0-6). (Prerequisite: 303-182 or 303-187.) Concepts of quantum mechanics; observables, states, operators. The Schroedinger equation; solution of one dimensional problems, potential well, potential barrier, periodic potential. The hydrogen atom. Particle statistics; Boltzmann, Fermi-Dirac distribution functions; applications to solids.

CALENDAR FOR SESSION 1975-76

1975

June 9 and 10	Convocations.
July 2	Last day for submitting completed applications for admission.*
August 18	Last day for submitting Doctoral theses (in time for Fall convocation).
August 25	Last day for submitting Master's theses (in time for Fall convocation).
September 8	Registration begins. Registration forms are to be completed in the departments. It is recommended that new students report to their departments not later than this date. Non-thesis forms to be returned to Thesis Office for Fall convocation.
September 16	Lectures begin, first term.
September 19	Last day to complete registration.
September 25	All reports on theses for Fall convocation must be returned to the Thesis Office.
October 14	Last day for holding Doctoral Orals for Fall convocation.
November 1	Last day for changes in first term and full term courses. (Some departments have earlier deadlines.)
November 5	Convocation.
December 15	Lectures end, first term.

1976

January 15	Last day for: (1) changing academic status in current session; (2) payment of second term fees; (3) January registration.
January 15	Lectures begin, second term.
February 1	Last day for applying for graduate fellowships.
February 2	Forms nominating examiners for student's thesis for Spring convocation are to be returned to the Thesis Office.
March 15	Last day for submitting Doctoral theses (in time for Spring convocation).
March 22	Last day for submitting Master's theses (in time for Spring convocation).
April 1	Usual date for announcing fellowships and other awards.
April 14	Lectures end, second term.
April 26	All reports on theses for Spring convocation must be returned to the Thesis Office.
May 10	Non-Thesis forms for Spring convocation must be returned to the Thesis Office.
	Last day for holding Doctoral Orals for Spring convocation.
June 2	Forms nominating examiners for student's thesis for Fall convocation are to be returned to the Thesis Office.
June 8 and 9	Convocations.

*Several departments follow a different rule. If you are in doubt, inquire of the department in which you wish to study.

COUNCIL OF THE FACULTY

Council consists of about 200 staff members and about 100 graduate student members.

MEMBERS OF THE FACULTY

Every full-time member of the teaching staff, who is actively engaged in the instruction of graduate students, is a member of the Faculty.

3 FACULTY REGULATIONS

GENERAL STATEMENT

1. The Faculty of Graduate Studies and Research administers programs leading to higher degrees and diplomas and recommends candidates to receive them. All communications should be directed to The Dean, Faculty of Graduate Studies and Research, McGill University, P.O. Box 6070, Station A, Montreal, Quebec H3C 3G1. The Dean's Office is in Dawson Hall.

The Faculty normally delegates most of its powers to an elected Council. The Council in turn elects an Executive Committee.

DEGREES AND DIPLOMAS

2. Graduate students may proceed to one of the following degrees: Master of Architecture (M.Arch.), Master of Arts (M.A.), Master of Business Administration (M.B.A.), Master of Civil Law (M.C.L.), Master of Commerce (M.Com.), Master of Education (M.Ed.), Master of Engineering (M.Eng.), Master of Engineering (Mining) [M.Eng. (Mining)], Master of Laws (LL.M.), Master of Library Science (M.L.S.), Master of Musical Arts (M.M.A.), Master of Nursing (Teaching) [M.N. (Teaching)], Master of Science (M.Sc.), Master of Science (Applied), [M.Sc. (Appl), Master of Sacred Theology (S.T.M.), Master of Social Work (M.S.W.), Master of Urban Planning (M.U.P.), Doctor of Civil Law (D.C.L.), Doctor of Education (D.Ed.), Doctor of Music (D.Mus.), Doctor of Philosophy (Ph.D.); or to a diploma in Air and Space Law, Advanced Social Work Practice, Epidemiology and Health, Mining Engineering, Engineering Aspects of Arid Land Development, Geological Sciences, Management.

DIPLOMAS

3. The Faculty offers the following Diplomas:
Air and Space Law
Advanced Social Work Practice
Epidemiology and Health
Engineering Aspects of Arid Land Development
Mining Engineering
Geological Sciences
Management

a) Candidates for diplomas must comply with Faculty and Department regulations. Attention is particularly directed to those quoted below.

b) Candidates, whose tuition will include regular, (i.e. day courses of a graduate department), must apply for admission to the Graduate Faculty prior to the beginning of their first session.

c) Candidates must register at the normal time and place. (See calendar of dates.)

d) Candidates, whose work for a diploma comprises courses administered by the Centre for Continuing Education, (i.e. evening courses), must register in the Centre at the beginning of each term. At the beginning of the final term, that in which they expect to complete all requirements for

the diploma, they must apply for admission to the Graduate Faculty and register therein.

e) Candidates for the Diploma in Management will obtain their Application Forms and Registration Forms at the office of the Centre for Continuing Education. When completed they should be returned to that office, together with the Registration Fee of $40, before February 1.

f) In some cases regular day-time students are required or permitted to take evening courses administered by the Centre for Continuing Education. Such students must register in the Centre also. Any graduate student, who fails to comply with this regulation, cannot receive credit for the work done there.

MASTER'S DEGREES

4. The Faculty offers Master's degrees of:

Architecture	Library Science
Arts	Musical Arts
Business Administration	Nursing (Teaching)
Education	Sacred Theology
Engineering	Science
Law	Social Work
	Urban Planning

Normal Procedures for the Master's Degree

4. a) Two full sessions of resident study at McGill University is the normal minimum requirement for a Master's degree. In exceptional circumstances some Master's degrees may be completed in one full session. The procedure to be followed in applying for admission and in completing registration is described below (Regulations 33 & 34). The candidate is required to pass in the courses which have been indicated to him by the department and which are recorded on his approved registration form (except such courses as are marked "not required") and he may also be required to pass a general examination in his major subject; the marks or grades he obtains in these examinations are part of his qualifications for the degree. The candidate for a research degree must also present a thesis on some topic connected with his major subject. The subject of the thesis may be entered upon the registration form and the title if not decided at that date must be subsequently submitted in writing through the chairman of the department concerned to the Dean's Office at least two months before the thesis is handed in. A thesis for the Master's degree, while not necessarily requiring an exhaustive review of work in the particular field of study, or a great deal of original scholarship, must show familiarity with previous work in the field and must demonstrate the ability to carry out research and to organize results, all of which must be presented in good literary style. The thesis will not normally exceed 100 pages; however, in some disciplines, shorter texts are preferred. *For further regulations regarding theses see Regulation 55.*

b) Candidates who intend to proceed later to a Doctoral degree should note the language requirements (Regulation 26) and are strongly advised to take the examination in at least one language while working for the Master's degree. Candidates for the master's degree in Religious Studies are required to pass an examination in one foreign language.

c) A Government laboratory may be approved by the Faculty as a research institution (see Regulation 19c).

d) **Teaching methods.**

A program of activities specifically designed to enable graduate students to improve their teaching abilities is available through many departments or the Centre for Learning and Development. Students should make arrangements to take this program through their department.

The Degree of Master of Architecture

5. a) Instruction for the degree of Master of Architecture is given in the following areas of study, which rank as "subjects."

Architectural Design
Housing

b) Candidates must hold the degree of Bachelor of Architecture or an equivalent degree, and their undergraduate rank must, in general, be equivalent to high second-class standing.

c) One only of the above subjects may be taken.

Each candidate is required to meet in personal conference, at least once a week, the professor under whose supervision he is preparing his thesis.

The Degree of Master of Arts

6. a) Instruction in the Faculty of Graduate Studies and Research leading to the degree of Master of Arts is provided in the following Departments of study:

Anthropology	History
Art History	Islamic Studies
Classics	Italian
Communications	Linguistics
Economics	Mathematics
Education	Philosophy
English	Political Science
French	Psychology
Geography	Religious Studies
German	Russian
Hispanic Languages and Literatures	Sociology

Studies in other subjects, including sciences and religious studies, may be undertaken as cognate courses with the permission of the Departments concerned.

b) Candidates must hold the B.A. degree or an acceptable equivalent degree. They must have obtained at least second class Honours at McGill University, or its equivalent elsewhere, in the subject or subjects which they propose to study.

The Degree of Master of Business Administration

7. The degree is offered in the Faculty of Management.

Applicants for admission must have high second class standing in undergraduate courses in Arts, Commerce, Engineering, etc. and submit satisfactory scores in the Princeton Admission Tests for Graduate Studies in Business.

The Degree of Master of Education

8. A detailed description of this degree can be obtained from the Director of Graduate Studies, Faculty of Education.

The Degree of Master of Engineering

9. a) Instruction for the degree of Master of Engineering is given in the following Departments of study, in which definite courses may be selected:

Chemical Engineering
Civil Engineering
Electrical Engineering
Mechanical Engineering
Mining and Metallurgical Engineering and Applied Geophysics

b) Candidates must hold the degree of Bachelor of Engineering, or an equivalent degree, and their undergraduate academic rank must, in general, be equivalent to high second-class standing.

c) The establishment of the degree of Master of Engineering does not prevent a properly qualified holder of the degree of Bachelor of Engineering, or the equivalent, from proceeding to the degree of Master of Science in pure science.

d) For the degree of Master of Engineering (Mining) see under Mining and Metallurgical Engineering in **Section E.**

Master's Degrees in Law

10. a) The degree of Master of Laws (LL.M.) is offered in the Institute of Air and Space Law and in the Institute of Comparative Law.

b) Applicants for admission to candidacy for the M.C.L. or LL.M. degrees must hold an acceptable degree in Law or equivalent qualifications. For further particulars see the entry under Law, or consult the Secretary of the Faculty of Law.

The Degree of Master of Library Science

11. This two-year postgraduate course requires for entrance a Bachelor's degree from an approved university. Courses in the humanities, sciences and social studies are preferred and a knowledge of at least one language other than English is expected.

For further information apply to the office of the Graduate School of Library Science.

Candidates should notify the Director of the Graduate School of Library Science of their intention to follow the course leading to the M.L.S. degree as early as possible, preferably before June 1.

The Degree of Master of Musical Arts

12. For the Degree of Master of Musical Arts see the details given under Music in **Section C.**

The Degree of Master of Nursing (Teaching)

13. For the degree of Master of Nursing (Teaching) see the details in the announcement for the School of Nursing.

The Degree of Master of Science

14. a) Instruction in the Faculty of Graduate Studies and Research leading to the degree of Master of Science is provided in the following Departments of study:

Agricultural Chemistry
Agricultural Engineering
Agronomy
Anatomy
Animal Science
Biochemistry
Biology
Chemistry
Computer Science
Crystallography
Electrical Communications
Entomology
Epidemiology and Health
Fluid Mechanics
Geography
Geological Sciences
Geophysics
Glaciology
Horticulture
Human Communication Disorders
Marine Sciences
Mathematics
Medicine, Experimental
Meteorology
Microbiology and Immunology
Microbiology (Macdonald College)
Mining and Metallurgical Engineering and Applied Geophysics
Neurology and Neurosurgery
Oral Surgery
Otolaryngology
Parasitology
Pathology
Pharmacology
Physics
Physiology
Plant Pathology
Prosthodontics and Restorative Dentistry
Psychiatry
Psychology
Radiology
Renewable Resources

Soil Science
Wildlife Biology
Surgery, Experimental

b) Candidates must hold a Bachelor's degree with at least second class standing in an Honours course at McGill University, or its equivalent. Candidates with an M.D. degree must have attained high standing.

The Degree of Master of Science (Applied)

15. The degree of Master of Science (Applied) was established in 1949, to permit approved departments to offer postgraduate training of a professional and vocational character, with less emphasis on theoretical knowledge and research than in other degrees of this Faculty but with no lower standards either for admission or for completion of requirements. Curricula of this type are at present available in the Departments of Computer Science, Geological Sciences (Engineering Geology, or Mineral Exploration), Human Communication Disorders, Microbiology and Immunology, Nursing, Physical Therapy and Psychology, whose statements should be consulted. For the M.Sc. (A) in Nursing or Physical Therapy, please consult the announcements of the School of Nursing or the School of Physical and Occupational Therapy.

The Degree of Master of Social Work

16. Inquiries should be directed to the School of Social Work, and the *Announcement* of that School should be consulted.

Master's Degree in Theology

17. Inquiries concerning the degree of *Sanctae Theologiae Magister* (S.T.M.) should be directed to the Dean of the Faculty of Religious Studies.

The Degree of Master of Urban Planning

18. The program requires a minimum of two years and a three-month internship with a member of a recognized planning association. It is open to students holding a bachelor's degree or equivalent in Anthropology, Architecture, Economics, Civil Engineering, Geography, Law, Management, Political Science, Social Work or Sociology, with adequate knowledge of quantitative techniques. Deadline for applications is March 15.

DOCTORAL DEGREES

Regulations for the D.C.L. Degree

19. See entry in **Section F.**

Regulations for the D.Ed. Degree

See entry in **Section G.**

Regulations for the D.Mus. Degree

See entry in **Section C.**

Regulations for the Ph.D. Degree

a) Candidates for the degree of Doctor of Philosophy must hold the degree of B.A. with Honours, or B.Sc. with Honours, or B.Eng., B.Com., B.Sc. (Agr.), B.D. or M.D., with at least good second-class standing in each case, from McGill University, or some equivalent qualification.

b) Many departments will require candidates who do not already hold an appropriate Master's degree to register for such a degree rather than for the Ph.D. degree directly; but may later recommend to the Executive Committee of the Faculty that candidates of undoubted promise should be allowed to proceed directly towards the Ph.D. degree without being required to submit a Master's thesis: in other cases, permission to proceed towards the Ph.D. degree may depend on the standing obtained in the Master's degree.

c) Candidates, must follow a course of at least three years' resident study at the University or associated institution of higher learning or research; this is a minimum requirement, and there is no guarantee that the work for the degree can be completed in this time. Two at least of these years must be spent at McGill University, and these should, if possible, include the final year. Departments, with the approval of the Executive Committee, may permit or require candidates to spend one session at another institution (for fees, etc., see Regulation 35); it is understood that this session must be one of full-time work, and that the institution selected must be able to provide expert supervision and facilities for research appropriate to the candidate, in the field selected. Candidates are therefore required to submit a program of the work projected and particulars of the institution selected, for approval by the Committee, before undertaking any such period of study. They must register at McGill as non-resident students; and the Committee may require progress reports from time to time or at the end of the period for which credit is claimed. The Faculty may make special exceptions to these general regulations concerning residence; it may permit McGill graduates, for example, to spend two years of study at approved institutions and to reside at McGill for the final year only. It is the custom for candidates to spend the greater part of each summer in work upon the thesis problem, and those who do not do so are unlikely to complete a satisfactory thesis in the prescribed minimum time; in certain subjects, e.g. in Agricultural Sciences, summer researches are indispensable.

20. A student who has obtained a Master's degree at McGill University or at an approved institution elsewhere, and is proceeding **in the same subject** to a Ph.D. degree may, on recommendation of the department, be permitted to count the work done for the former as the first year (Ph.D. I) of resident

study for the Doctor's degree (see Regulation 18c). The attention of students seeking admission on this basis is drawn to the language requirements (Regulation 26), for which they are advised to prepare themselves in advance.

21. Candidates must select one major subject (see Regulation 53d). Programs leading to the degree of Doctor of Philosophy are offered in the following major subjects.

Agricultural Chemistry
Agricultural Engineering
Agronomy
Anatomy
Animal Science
Anthropology
Art History
Biochemistry
Biology
Chemical Engineering
Chemistry
Civil Engineering
Classics
Computer Science
Economics
Electrical Engineering
English
Entomology
Epidemiology and Health
French
Geography
Geological Sciences
German
History
Human Communication Disorders
Islamic Studies
Linguistics
Marine Sciences
Mathematics
Mechanical Engineering
Medicine, Experimental
Meteorology
Microbiology and Immunology
Microbiology (Macdonald College)
Mining and Metallurgical Engineering and Applied Geophysics
Neurology and Neurosurgery
Parasitology
Pathology
Pharmacology
Philosophy
Physics
Physiology
Plant Pathology
Political Science
Psychology
Religious Studies
Renewable Resources
Russian
Sociology
Soil Science
Surgery, Experimental

22. **Ad hoc Ph.D's.** In special cases, other departments may be authorized to provide courses which will lead to this degree. Candidates desiring to proceed to the degree of Doctor of Philosophy in departments other than those mentioned above should, therefore, make direct application to the Dean of Graduate Studies and Research, asking whether courses in such subjects can be provided.

23. The course of study which the candidate desires to follow must, before he enters upon it, have been submitted to the Chairmen of the several departments concerned and have received their approval (see Regulation 32b).

24. **Comprehensive Examination.** The first two years (Ph.D. II) include instruction, training and direction in the candidate's field of study, with the object of providing a knowledge of the particular subject and its relation to cognate branches of learning and of preparation for independent investigation. The candidate's comprehensive examination is held at the end of the second year, unless otherwise specified by departmental regulations approved by the Faculty. This examination covers all graduate work previously taken by the candidate, including prescribed reading, and may also include any work fundamental thereto. The candidate must show a good general knowledge of the whole science or branch of learning which has been selected as the major subject. The examination may be written or oral or both. The result of this examination determines whether the candidate is allowed to proceed with candidature. The final years (Ph.D. III and, if necessary, IV) are devoted chiefly to the preparation of the thesis, the research for which is normally begun in the first year.

25. The candidate is also required to pass in the courses indicated by the department, and recorded on the approved Registration form, unless they have been marked "not required".

Language Requirements

26. a) **English.** Students whose mother tongue is not English may be required by the Chairman of their department to take, and pass, courses offered by the Centre for Continuing Education.

b) **Other Languages.** The following departments do not usually require an examination in languages other than English:

Agronomy
Animal Science
Biochemistry
Biology
Business Administration
Chemical Engineering
Chemistry
Civil Engineering
Electrical Engineering
Education
Geological Sciences
Law
Marine Sciences
Mechanical Engineering

Metallurgical Engineering
Meteorology
Microbiology and Immunology
Microbiology (Macdonald College)
Neurology and Neurosurgery
Nutrition
Parasitology
Pharmacology and Therapeutes
Physics
Physiology
Psychology
Renewable Resources
Soil Science
Surgery, Experimental

Students should inquire of these departments whether any other requirements have been substituted for those relating to languages.

c) All departments not listed above require proficiency in one or two languages other than English and normally conform to the following regulations. In all cases students should consult departmental regulations concerning language requirements.

Language requirements for the Ph.D. degree are met through demonstrated reading knowledge. The usual languages are French, German or Russian, but in particular instances another language may be offered on the recommendation of the department and by authorization of the Dean.

The normal examination requirements are:

(i) One examination in each of two of the following languages: French, German, Russian or such other modern language as may be authorized by the Dean.

OR

(ii) Two examinations in a single language. The first examination is comparable in difficulty with that indicated in (i) above; the second, normally written one year later, demands greater proficiency. *All* language requirements must be fulfilled and the marks reported to the Dean's Office *before* the Dean will accept the thesis.

d) Language Reading Proficiency Examinations in French, German or Russian will be conducted by those departments. Students may, however, demonstrate acceptable competence by a pass standing in undergraduate language courses taken at McGill under the following conditions:

(i) Two *full* courses in a language presented as a subject for admission to undergraduate study at McGill, OR

(ii) Three *full* courses in a language not presented as a subject for admission to undergraduate study at McGill.

e) Some Departments require candidates to take the Language Examinations administered by the Educational Testing Service, Princeton. See Regulation 45.

f) Candidates are expected to take at least one language examination in the first year of the Ph.D. course (Ph.D. I or Master's I) and the other not later than the second year (Ph.D. II). Registration forms (Regulation 33b) must indicate the student's intentions in this respect. Students admitted to the second year of the Ph.D. course (Regulation 20) must discharge their language requirements as early as possible. Registration forms which do not comply with these requirements may be rejected.

g) The Department of German offers a course open to candidates for the Ph.D. degree and designed to help them to acquire the necessary reading knowledge of the language: two hours per week. A similar course is offered in Russian and in French. (See the entries of these three departments in this announcement, Section C.)

Thesis

27. a) The thesis for the Ph.D. degree must display original scholarship expressed in satisfactory literary form and be a distinct contribution to knowledge. The subject of this thesis must have been approved, in writing, by the Chairman of the Department in which the major subject is taken, at least twelve months before the date of the final examination; the exact title may be decided later (Regulation 55). In both instances, the candidate is responsible for seeing that this information is conveyed in writing to the Dean's Office.

b) Seven copies of the thesis must be provided by the candidate. Of these, two copies will be retained by the University and five copies returned to the candidate. (Some Departments may require one or more additional copies.)

c) The regulations concerning theses are stated in Regulation 55.

Special regulations for the Ph.D. degree in particular departments are stated in the entries of these departments.

28. **Oral Examination.** After the thesis has been received and approved, a final oral examination is held on the subject of the thesis and subjects intimately related to it. This is conducted in the presence of a Committee of at least five members approved by the Dean of the Faculty on behalf of the Executive Committee, and presided over by him or by a Pro-dean nominated by him. The Chairman of the candidate's department and his Director of Studies are regularly invited to be members of the Committee; one member of the Committee is appointed from outside the candidate's department.

COURSES AT MACDONALD COLLEGE

29. a) Graduate students who are taking the major part of their work at Macdonald College may go into residence there and may take, when required, other graduate courses given at the Montreal Campus.

b) Students wishing to reside at Macdonald College should send in their application for accommodation to the Registrar, Macdonald

College, Quebec, H0A 1C0, as soon as possible.

c) Any fees in connection with courses taken at Macdonald College are payable through the Secretary of Macdonald College.

CLASSES OF STUDENTS

30. a) Those admitted to the Faculty as regular students studying for a higher degree or diploma are termed "graduate students."

b) **Qualifying students.** Some students, whose academic degrees and standing entitle them to serious consideration for admission to graduate studies, but who are considered inadequately prepared in the subject selected may, with the permission of the department concerned, and of the Dean be admitted to one *"Qualifying Year"*. The courses to be taken in a *"Qualifying Year"* will be prescribed by the department concerned. "Qualifying students" are registered in the Graduate Faculty, *but not as candidates for a degree*. Only one qualifying year is permitted. In cases where a department recommends a change of registration from "Qualifying Year" to "Master's Degree 1st Year" this change must be implemented prior to January 15. For registration procedures, see Regulations 33b and 34. Completion of the work of the qualifying year does not automatically entitle the student to proceed towards a degree. Students who are ineligible for a qualifying year may apply to the appropriate undergraduate faculty for admission as regular or special students, and seek admission to the Graduate Faculty at a later date.

c) **Special students.** Qualified students who are permitted to take one or at most two courses in the Graduate Faculty, without intention of proceeding to a degree or diploma awarded by this Faculty, are termed "special students of the Graduate Faculty". In the same category are included students carrying on research in McGill laboratories, without intention of proceeding to a degree. For fees see Regulation 35. If graduate "special students" subsequently become candidates for higher degrees, they may receive academic credit for relevant graduate courses taken as special students. Students who wish to take further undergraduate courses only, should register as "special students" in the undergraduate faculty concerned, even if they already hold degrees.

d) **Regular students.** "Regular students" are those students who are proceeding to a degree and who in any given session are attending classes or receiving regular guidance or consultation from any member of the staff, or who wish to write preliminary or comprehensive examinations, or who are making use of the university's libraries or laboratories or other facilities, either on a full-time or half-time basis; for "additional session students" see Regulations 34 and 35d

e) **Non-resident students.** "Non-resident students" are those students who have obtained permission from the Executive Committee of the Faculty to spend a required year of residence at another university or who have obtained permission from the Associate Dean of the Faculty to take a leave of absence from the university before the required years of residence have been completed. Such permission must be obtained *before* the beginning of the session in which the student will be absent.

f) Regular graduate students taking courses through the Centre for Continuing Education for credit towards a degree must complete two registrations, one with Continuing Education and one with the Graduate Faculty, though one fee covers both.

g) Interns, residents and fellows on the staffs of teaching hospitals, associated with the University, and candidates for diplomas in anaesthesia and psychiatry, are considered graduate students.

h) **Full-time lecturers.** Only staff with the rank of Full-time Lecturer may enrol as candidates for a degree and may pay reduced fees. They may only enrol as half-time students and must apply each year for the reduced registration fee. (Forms are available for this purpose in the Graduate Faculty Office).

Note: No staff member above the rank of lecturer may be a candidate for a degree at the University.

i) **Visiting students.** "Visiting students" are those students who are registered in a degree program at another university and who have obtained written permission from both universities to take a course(s) for credit towards that degree program. Students studying in the Province of Quebec who are in this category are eligible for a transfer of fees as well as a transfer of credit if the required permission is obtained on special forms. These forms are available from the Faculty Records Office or the Registrar's Office.

ADMISSION

31. Advanced courses of instruction are offered to students who are graduates of any university of recognized standing, and who have at least second class honours, or the equivalent of at least second class honours as granted by McGill University, in the subject in which they desire to take their major work. This implies a standing in the upper half of the undergraduate class, at least, and a considerable amount of specialization, for example 36 semester hours of lectures in the subject selected. Admission to these advanced courses does not in itself imply candidacy for a higher degree or diploma. Every student admitted to the Faculty is, however, attached to one or other of the departments thereof, which is primarily responsible for guiding his studies.

This Faculty subscribes to the resolution passed by the Canadian Association of Graduate

Schools and does not favour the pass/fail system of grading as a means of entrance.

32. The attention of applicants for admission to the Faculty is directed to the Graduate Record Examination (Education Testing Service, Princeton, N.J. 08540). This examination consists of a relatively advanced test in the candidate's specialty, and a general test of his attainments in the several basic fields of knowledge, for which no special preparation is required or recommended. It is offered at many centres, including Montreal, several times a year; the entire examination occupies some eight hours, and the total fee does not exceed $20.00. Applicants to the Graduate School of Business must submit scores on the Admission Tests for Graduate Studies in Business. Only some departments uniformly require applicants to write the examination, but applicants to any department who have written it should submit their records therein. This credential is of special importance in the case of applicants whose education has been interrupted, or has not led directly towards graduate study in the subject selected. In such cases the department has the right to insist on a report from the Graduate Record Examination or some similar test. High standing in this examination will not by itself guarantee admission. The Miller Analogies Test may be used similarly. Some departments of the Faculty of Education also require the taking of various tests.

In cases of doubt as to proficiency in English, an applicant may be required to submit the results of tests administered by the Educational Testing Service.

APPLICATION, REGISTRATION

33. a) Applications for admission should be made on special printed forms which may be obtained at the Dean's Office. Applicants (with some exceptions) who are *not* McGill graduates are required to ask two instructors familiar with their work to send letters of recommendation to the Dean. All applicants must themselves send, or ask the appropriate university authorities to send, two certified copies of their complete university-level academic record to date. For McGill graduates the appropriate authority is the Registrar.

Note: A fee of $15.00 in Canadian funds *must* accompany each application from a graduate of a university other than McGill, otherwise *it cannot be considered*. This sum must be in negotiable form, such as a bank draft or money order (but not in cash), at the current rate of exchange, and will not be refunded.

It is desirable to submit a list of the titles of courses taken in the major subject, since transcripts often give code numbers only. The applicant should also indicate the branch of the major subject in which further study is desired. Completed applications, with supporting documents, should reach the Dean's Office on or before July 3. (Note: *Several Departments set much earlier deadlines.)* Applications received after the prescribed dates may not be considered unless this concession is recommended by the Department concerned. Candidates will be notified of acceptance or refusal as speedily as possible.

The programs leading to master's degrees in Education normally begin with a Summer School, so that there are different dates for application and registration in this case. Candidates for higher degrees in Education should consult that Faculty beforehand as to application deadlines, date of commencement of courses and other details.

b) Approved candidates must consult the department in which they intend to study, with regard to choice of courses and subject of investigation. Formal application for permission to attend the courses selected, and for approval of the subject of investigation, must then be made on the appropriate Registration Forms obtainable in the department. Language examinations (Regulation 26) should be entered on these forms, if required. These forms require the signature of the candidate, of the chairman of the department concerned, and of the professor appointed to act as director of the candidate's research or supervisor of his thesis, and are normally completed in consultation with the department; students are warned that it may take a week to arrange and complete such consultations. Registration takes place in September. The department may send the completed forms to the Dean's Office at any time but certainly not later than September 19. Full instructions concerning registration will be supplied by each department. A delay in registration will involve a late fee penalty. Candidates should in any case be prepared to attend the regular courses of instruction, which begin on or shortly after September 16.

34. a) The Registration Forms will be scrutinized by the Dean on behalf of the Executive Committee of the Faculty, and if approval is given the student's identity card will be validated at a time and place determined by the Registrar's Office. The student will be told what fees to pay and where to obtain a validated identity card when he registers. The student may meanwhile attend lectures, etc., on the assumption that the registration will be approved, but will not be given credit for attendance until final approval has been given. "Resident students" must register between September 8 and 19 inclusive. The prescribed penalty for late registration is $10 between September 22 and October 2 and $25 thereafter. Students may pay their fees in two instalments. However, a first payment must be made within ten days of the date of registration. There is a penalty for late payment of fees.

Any change in academic status must be implemented before January 15, with the approval of the chairman of the department and the Dean's Office.

b) Candidates whose studies extend over more

than two years must register as above, at the commencement of each year of their program; if they have not so registered at the beginning of the academic year, *they are not eligible* to receive their degrees at the following Convocations.

c) Candidates who have completed their courses and their residence requirement but have not yet completed their thesis must enrol with the Dean's Office by registration through their department at the beginning of each session, and pay a registration fee of $40.00 in order to maintain a connection with the university. Student services and student society fees are payable in addition to the registration fee if the candidate wishes to obtain a valid identity card.

d) Candidates, who, through failure to register as above, have severed their connection with the University can be reinstated only (1) if the department concerned so recommends, in writing, suggesting the imposition of such conditions as seem desirable, and (2) after paying a fee of $40.00 for each session during which they were not registered, such readmission fees not to include the fee for the session for which readmission may be granted.

e) For students who first registered in all degree programs before or during the 1973/74 session and for students who first registered in a degree program other than a Master's degree program, the following regulation applies:

By annual registration, as above, candidates may maintain their connection with the University **for five years** after completing their course and residence requirements; thereafter, they may re-register only if the department concerned so recommends, in writing, suggesting the imposition of such conditions as may seem desirable. The object of this regulation is to encourage candidates to complete their theses and qualify for their degrees without undue delay.

For students who first registered in Master's degree programs in the 1974/75 session, the following regulation applies:

Candidates for Master's degrees must complete the degree within four years of initial registration. If the degree is pursued on a less than full-time basis it must be completed within five years of initial registration. Thereafter, students may register for *one more year only* provided the Department concerned so recommends to the Faculty, in writing, giving reasons and suggesting the imposition of such conditions as may seem desirable. After this extension no further registration will be permitted and the student must withdraw from the University.

A student who wishes to submit a thesis, or to complete outstanding degree requirements, after this withdrawal may do so only on the recommendation of the Department concerned and a fee of $100.00 will be charged for re-registration in addition to any other fees required.

f) In some departments, it is possible to admit selected candidates at unusual times, for example at the beginning of the second term. In such an event registration *must* be completed by January

15. g) Regulations concerning application and registration for the Diplomas awarded by this Faculty will be found in Regulations 33 and 34 above.

h) Students registered in the Graduate Faculty who are taking evening courses for credit must also be registered with the Centre for Continuing Education; otherwise their marks will not be sent to the Graduate Faculty. Where an extension course is entered on a graduate student's registration form as a prescribed part of his degree requirements, no additional fee will be charged to the student provided the fees already paid are sufficient to cover the total cost of all courses taken.

FEES, PREMIUMS, DUES

TUITION FEES

The University reserves the right to change any fee without notice. No degree or diploma will be released until all fees are paid in full.

35. a) **Full-time.** The tuition fee for a full-time session of resident study in a degree program or a Qualifying Year (e.g. the first required year for a Master's degree or each of the three required years for a doctoral degree) is $570.00.

The second year of a master's program is $285.00. Dentistry students in Oral Surgery must pay $570.00 in the second year, and $285.00 in the third year.

b) **Half-time.** The tuition fee for a half-session of full-time study or for a session of half-time study in a degree program (see Regulation 53) is $285.00.

c) **Part-time.** Students registered in degree programs specifically designated "part-time" by the Faculty may be permitted to pay tuition fees on a per course basis. The per course fee varies according to each course. A full course is *approximately* $114.00 and a half course is *approximately* $57.00.

d) **Additional session.** Candidates requiring an additional session beyond the required years for the Master's degree or the three required years for a doctoral degree must pay a registration fee of $40.00.

e) **Non-resident.** The registration fee is usually $40.00 unless otherwise specified by the Executive Committee or the Associate Dean of the Faculty. (see Regulation 30c).

f) **Special.** A "special student" is not enrolled for any degree program and tuition fees are assessed on a per course basis. A full course is *approximately* $114.00 and a half course is *approximately* $57.00 though the fees vary according to each course. A special student carrying on research in McGill laboratories, but not taking courses, will normally pay the cost of one full course per session (approximately $114.00).

g) **Visiting.** Students enrolled in degree programs at a university outside the Province of Quebec must pay tuition fees as stated for special students in Regulation 35f above unless they are full-time in which case they must pay the full-time tuition fee of $570.00. Students enrolled in degree programs at another university in the Province of Quebec are eligible for a transfer of fees (see Regulation 30i).

N.B. Beginning with the 1974/75 session, all students registering in a Master's program for the first time must have paid a minimum tuition fee of $855.00 by the time of graduation unless permitted to graduate after one academic session in which case a minimum tuition fee of $570 must have been paid by the time of graduation. (Exception: a Master's degree in Oral Surgery requires a minimum tuition fee of $1425.).

Students entering the second year of a program who have not been registered in the first year of the same program at McGill must pay a tuition fee of $570.00. Part-time students in this category must have paid a minimum of $570.00 before graduation.

Diploma students normally permitted to enter the second year of a Master's program, without requiring additional courses after having completed the diploma program, pay a tuition fee of $285.00. Part-time students in this category must have paid a minimum tuition fee of $285.00 before graduation. Students must pay extra for courses taken that are not required for the degree.

36. French Summer School students, who wish to proceed to the M.A. degree, must take a preliminary summer session, followed by four (with thesis) or five (without thesis) summer sessions. In exceptional circumstances a student may be exempted from the preliminary session. At the successful completion of the second regular session, all students are required to apply for and obtain admission to the Faculty of Graduate Studies (see Regulation 33a). They are to register formally therein (Regulations 33b and 34) at a time and place to be announced. Fees for the preliminary session and for each of the four following sessions are $50.00 deposit plus $400.00 for Canadian students, $50.00 deposit plus $450.00 for non-Canadian students. These include participation in the cultural and social activities of the School. Fees for the sixth session (required of candidates proceeding without thesis) are $135.00 for Canadian students, $165.00 for non-Canadian. If the submission of a thesis is delayed beyond the normal date, the candidate must pay an additional registration fee of $40.00 at the beginning of each session until the thesis has been accepted.

GRADUATION FEE

37. A $10.00 fee will be charged to all students when they graduate. This fee covers the cost of a cap and gown for those students attending convocation and it covers mailing and handling charges for those students *in absentia.*

38. A $40.00 registration and graduation fee is charged of students receiving the diplomas in Management, after tuition in the Centre for Continuing Education.

ADDITIONAL FEES

39. Upon payment of the fees required for student services and student societies, graduate students are entitled to the following:

a) Medical examination (compulsory); daily consultation service and hospital treatment.

b) Access to the gymnasium, swimming pool, and tennis courts.

c) Opportunities for exercise with various athletic clubs and eligibility for intercollegiate and other teams.

d) Admission (by identity card) to the students' section at all intercollegiate games played at McGill.

e) At Macdonald College slightly different rules apply, see also Regulation 41.

40. At Macdonald College, graduate students are entitled to medical attendance, major operations excepted, on the same basis as other students. Graduate students at Macdonald College are entitled to participate in the activities of the various organizations under the Students' Council and to have one representative on the Students' Council. Graduate students at Macdonald College are required to pay an additional Students' Activities Fee.

41. **Notice to all resident students and to all those accepted to enter the Faculty WHO ARE NOT CANADIAN CITIZENS AND WHO ARE NOT LANDED IMMIGRANTS:**

In the Province of Quebec, holders of student visas cannot establish legal residence in the Province and therefore do not qualify for inclusion in the Quebec Health Insurance Plan. As a result such students who need hospitalization may find themselves facing very heavy financial charges. Senate has therefore ruled that from September 1, 1967, all non-Canadian students will be required to enter into the Health Insurance Plan operated by the Canadian Premier Life Insurance Company.

Students must make arrangements to pay the premium through the Student Aid Office.

A descriptive leaflet is available from the Dean's Office or the Student Aid Office. For additional information apply to the office of the Insurance Company.

Post-doctoral Fellows registered with the University also come under the same insurance provisions.

RE-SUBMISSION FEE

42. A candidate whose thesis is judged unsatisfactory by the examiners may be permitted by the Faculty to present a revised thesis, for a subsequent Convocation, upon payment of the following resubmission fees:

Master's degree .....$ 75.00
Doctoral degree $100.00

If a new session of study is entered the student will be required to pay the normal fees for that session in addition to the re-submission fees.

43. A staff candidate on deposition of a thesis is required to pay a thesis-examination fee in the amount of $75.00 for a Master's thesis and $100.00 for a Ph.D. thesis.

44. Fees for supplemental examinations, granted under special circumstances by permission of the Dean on the recommendation of the department, are payable in advance at $10.00 per paper ($15.00 for examinations written at the Centre for Continuing Education). A student who has failed in any required course and has not received permission to attempt a supplemental examination will be required to withdraw. Only under exceptional circumstances may permission be granted by the Dean, on the recommendation of the department, for the student to repeat any such course. In such a case the student may be required to pay the fee charged to special students for the course in question in addition to fees applicable under Regulations 35 and 42, but does not pay for supplemental examinations.

45. There is no fee for the language examinations for Ph.D. candidates (see Regulation 26) when these are taken. If, however, a department elects to require its candidates for degrees to take the language tests of the Educational Testing Service, Princeton, the candidate must himself meet the costs involved.

STUDENT SOCIETY AND STUDENT SERVICE FEES

46. *All students,* with the exception of those classed as "non-resident" students or "additional session" students who do not wish to hold a valid Identity card, are required to pay fees for students' societies and students' services in addition to any tuition fees. The University, on behalf of the Students' Societies and Students' Services, collects the following fees: $29.50 for student societies and $60.00 for student services for a full-time year of study (This includes Visiting students taking a full-time year of study at McGill.); $29.50 for student societies and $30.00 for student services for a half-time year of study and for the second year of a Master's program; students in programs designated "part-time" special and visiting students, pay according to the number of courses taken. The minimum for "part-time" students is $15.00 for student societies and $15.00 for student services (excluding Athletics but at the discretion of the Director of Athletics, a student may participate in the Athletics program upon payment of an additional $30.00).

Macdonald College student society fees are $34.00. The Student Services fees will remain as above.

Any questions concerning the above student fees should be directed to the Dean of Students.

PAYMENT

47. All fees are payable in Canadian currency.

48. Fees are due and payable at the Cashier's Office, F. Cyril James Administration Building, within ten days of registration. (Macdonald College students must pay their fees at the Cashier's Office at Macdonald College.) If paid in instalments the second is due on January 15 (see Regulation 50).

49 Students who have not paid their fees will have their registration cancelled and no credit will be given for work done during that period.

50. Late fees are also charged as follows:
Registration, after September 19 .....$10.00
Registration, after October 2 .....$25.00
Payment of fees, after 10 days
after registration, up to 30 days $10.00
Payment of fees, after 30 days.....$25.00

FELLOWSHIPS, SCHOLARSHIPS, AND PRIZES

51. Details of fellowships, scholarships, prizes, and loan funds available for graduate students will be found in the Booklet entitled "Postgraduate Awards, Fellowships and Bursaries", obtainable from the Registrar and the Fellowships Office. In this booklet can also be found a list of the various cultural exchange programs providing scholarships to students wishing to pursue their studies abroad. Information pertaining to these and application forms can be obtained from the Cultural Exchange Service of the Graduate Faculty.

Fellowships open to graduate students fall into three groups. Some are awarded by institutions or bodies other than McGill, which have their own regulations and their own application forms, obtainable from them. Secondly, there are those for which application should be made to the Dean of the Graduate Faculty; application forms should be obtained from the Fellowships Office; and all of these applications should be completed by February 1. Thirdly, there are those for which application should be made to some other designated professor or official at McGill University; in most of these cases no form is required and a brief letter of application is sufficient.

The probability of foreign students obtaining financial aid from the Graduate Faculty in the first year of enrolment is small.

Application *by Canadian students* for a fellowship and financial aid in general should be made on forms obtainable from the Fellowships Office and preceded or accompanied by an application for admission to this Faculty (unless

the candidate is already a student therein), accompanied by the usual supporting documents such as transcripts and letters of recommendation. The awarding committees will base their nominations upon these documents, and will announce their awards on April 1. As far as possible each applicant will be considered for every award for which he is eligible. It is perfectly in order for a student to apply for admission to the Faculty with the proviso that admission cannot be accepted unless financial aid can also be made available. Such a proviso does not obligate the University in any way.

Applicants for fellowships and scholarships should note that these are awarded on a competitive basis, in the light of established academic merit.

Application by *non-Canadian students* for fellowships and financial aid should be made directly to the departments in which they plan to study.

DEMONSTRATORSHIPS AND ASSISTANTSHIPS

52. Most of the departments which offer laboratory courses require the services of some graduate students as demonstrators. These may be employed up to 12 hours weekly during the session without losing status as full-time graduate students.

Some of these departments are also able to pay graduate students as Research Assistants from special research funds, and in most, though not all, cases the research in question can be used by the student for his thesis. Some of the departments in the humanities and social sciences are able to employ graduate students as Teaching Assistants. In all cases the appointment is recommended by the Chairman of the department concerned on the basis of the documents supplied along with the application for admission.

It is not the policy of the University to waive tuition or other fees for Demonstrators, Assistants, or Fellows, though in some cases a fellowship may consist of a basic stipend plus the amount of the fees, while certain graduate scholarships cover the cost of fees only. Generally speaking, demonstratorships and fellowships provide subsistence throughout the academic session only, while research assistantships may run throughout the calendar year (though some are available in the summer months only); in no case are the funds adequate to defray any part of the cost of coming from or returning to a distant country.

4 GENERAL RULES CONCERNING HIGHER DEGREES

53. a) A graduate student is expected to devote his full time to his courses, reading, and research in each session counted towards completion of residence requirements. Members of the teaching staff of the University who are also students in the Graduate Faculty and who give more than three hours of lectures or six hours of conference work or twelve hours of supervisory work in laboratories and allied services per week, and other students doing an equivalent amount of additional work inside or outside the University must spread at least one of the required years over two years, may not obtain the Master's degree in one year, and will require at least four years for the Ph.D. degree. At least one of the years required for either degree must be spread over two sessions, in each of which such students will be registered as *half-time* students and will pay a tuition fee of $285.00.

b) No student may be registered in two degree programs or in two departments or faculties concurrently without special permission granted by the Executive Committee of the Faculty. Letters of recommendation must be received from the Chairman of each department concerned.

c) A research degree is granted in the Faculty of Graduate Studies essentially for work in one subject, known as the student's *major subject*. Certain allied or "cognate" courses in other subjects may be permitted or required; these must be entered on the Registration Form, which must show whether the courses are to be taken for credit, including examination, or merely attended, and which must be signed by the chairman of the departments concerned.

d) No specified number of course credits is required for research degrees. The department concerned will examine the applicant's previous training, undergraduate and graduate, and then decide how many of the available courses in the major subject and related fields are required to bring the candidate to the proper level for the master's or doctoral degrees. Due account will be taken of all relevant courses passed at any recognized university or college.

e) Non-research degrees, which are generally of an applied or professional character, normally specify the course program which the candidate must follow.

f) A candidate with a given higher degree may be permitted to proceed to a second degree of the same kind, *but in another subject*, provided that the usual requirements for the degree are entirely fulfilled and approved as usual by the department concerned. In the computation of fees for such a second degree, no account will be taken of the student's previous registration in the Graduate Faculty.

g) Programs of work towards higher degrees in inter-disciplinary fields may be undertaken by special arrangement. All such programs must be submitted to the Dean for approval.

h) Students should note that the above rules apply to the Faculty as a whole; a department may have additional rules of its own.

MARKS

54. Classification of marks: 100-80% – A; 79-65% – B; Below 65% Failure.

Some departments evaluate performance (in seminars only) by the grades: Pass, Fail.

Students who obtain marks between 55 and 64% in courses not required for the degree sought may, on recommendation of the major department, be recorded as having "passed at the undergraduate level".

Students who have failed in required examinations are permitted to write supplemental examinations only on the recommendation of the major department and with the permission of the Dean (see Regulation 44).

Students qualifying for admission will be expected to obtain 65% or better in all courses.

Transcripts can be obtained on application to the Registrar's Office, F. Cyril James Administration Building (in respect to "day courses") or to the Centre for Continuing Education, 772 Sherbrooke St. West (in respect to "evening courses"). A fee will be charged.

REGULATIONS CONCERNING THESES

DATES OF DEPOSITION

55. For graduation at the spring convocation, the deadline for deposition of theses is near the end of March, for Fall convocation near the end of August. For the exact dates, the "Calendar of Dates" should be consulted. The deadlines for doctoral theses are one week earlier than those for master's theses.

Due to unforeseen delays with Examiners, an absolute guarantee cannot be given that all procedures will be complete in time for Convocation, even where the deadlines are met. Every effort will be made, however, and incidents of this kind of delay are rare.

PROCEDURES AFTER DEPOSITION

After a *doctoral* thesis has been handed in, it is submitted to the Examiners. The final oral examination is not held until after the Examiners have reported favourably, usually about four weeks after deposition. After all the requirements have been met, and if the next convocation is some time away, the Dean will issue (on request) a certificate stating that the candidate will be recommended to Faculty for the award of the degree at the next convocation.

Guidelines for the disposition of Examiners' reports and the organisation and conduct of Oral Examinations may be obtained from the Thesis office. At any stage during the procedures, candidates have the right of appeal to the Dean or Associate Dean.

The procedures are similar but simpler for the *master's* thesis and there is no final Oral Examination.

REGISTRATION AND FEES

A thesis can only be submitted by a candidate, i.e., a student registered for the degree in question. In order to remain a candidate, a student must remain registered. If all requirements are met, including deposition of the thesis by the registration date in September, then no fee will be charged. Otherwise either a $40.00 registration fee or the appropriate tuition fee will be assessed. Candidates should note also that a fee of $10.00 for graduation will be charged. (Full information on fees is given in Regulations 35-50).

NOTICE OF DEPOSITION OF THESIS

Formal notice of the title of a thesis to be deposited must be filed in the Dean's office by the Departmental Chairman, together with the Nomination of Examiners, by 1 June (for Fall convocation) or by 1 February (for Spring convocation). No subsequent change of title, whether originated by the candidate or any other source, will be accepted unless the change is officially requested by the Department, at least one month before the thesis is deposited. The notice should be the result of consultation between the candidate, the thesis supervisor and the department. All three share the responsibility for the prompt completion of this important formality.

The appointment of the Examiners, and communication with them, is the duty and the privilege of the Dean.

ORIGINALITY AND HISTORICAL INTRODUCTION

a) The candidate should clearly indicate in the preface, or by a separate statement at the beginning or end of the thesis, what elements in the thesis he considers to be contributions to original knowledge. This requirement is mandatory for a doctoral thesis and is recommended in other cases. Theses should also contain an appropriate historical statement of previous relevant work or investigation: "appropriate" does *not* necessarily mean long or exhaustive.

b) The candidate is required to declare, *generally* in the preface, and *specifically* in the text, the extent to which assistance has been given by members of the staff, fellow-students, technicians, or others, in the collection of the material, the design and construction of apparatus, the performance of experiments, and the preparation of the thesis in general. This regulation does not apply to the normal supervision and advice given by the thesis supervisor.

TYPOGRAPHICAL AND OTHER SPECIFICATIONS

Approved theses for higher degrees are later bound and placed in the Library and are made available to the National Library of Canada. Candidates for

such degrees are therefore advised that the Faculty of Graduate Studies and Research requires thesis to be prepared in accordance with the following specifications. *Theses not so prepared will not be accepted unless the Executive Committee of Council has given its agreement in advance.*

a) Three copies of a master's thesis and seven copies of a doctoral thesis must be submitted; in each instance two of these will be retained by the University. Copy 1 will be preserved in the University Library.

Departments desiring copies for other collections should arrange for these with the candidate. One copy of the master's thesis and five of a doctoral thesis will be returned to the candidate.

b) The thesis may be typed with double, or one and one-half spacing, with lines about 6½ inches wide, or in two single spaced parallel columns. Offset or xerographic reproduction of all copies is permissible, but copies 1 and 2 especially must be of high quality. Coated paper will not be accepted.

Diagrams should be drawn with India ink on rag paper or reproduced by photographic, offset or xerographic processes. Diagrams, numerical or summary tables, and parts of the Table of Contents, may appear on left-hand pages (on the back of other material) where this aids in the layout and the general readability of the text. In such cases it may be desirable not to number these left-hand pages, but to identify them as opposite stated page number.

c) The left-hand margin must have a uniform width of not less than 1½ inches; this rule also applies to diagrams, etc. The right-hand margin need not be aligned but it should be well-defined at approximately a half-inch width. Drawings, maps, plates, etc., if larger than the prescribed page, may be folded so that the flap is not larger than 7 x 11 inches. Larger drawings, maps, etc., must be folded down to not more than 7 x 10 inches, so that they may be placed in pockets in the binding.

d) Footnotes may be placed either at the bottom of each page or collected at the end of each chapter.

e) The pages constituting each copy of the thesis should be assembled in approved binders. The pages should be perforated near the left-hand edge with punch holes approximately 8½ inches between centres, and should then be assembled and firmly bound, by means of the holes, between stiff covers for protection. The 8½ x 11 "Acco-press" binders supplied by the University Bookstore are recommended. Spring binders will not be accepted. On the outside of each binder must be written clearly the name of the candidate, full title of thesis, department, degree sought, date and copy number. The candidate should also affix to the spine of each copy a label showing clearly his surname and the degree for which he is a candidate, together with the copy number.

f) The thesis must be free from typographical and other errors. If copies are deficient in the above respects they will be returned for correction. If these corrections are very numerous the granting of the degree may be delayed on this account.

g) Every thesis should have an adequate table of contents and thorough bibliography of the subject. Immediately following the title page, there should be an Abstract, giving a summary of the thesis, not exceeding 150 words. The rules above regarding format, margins, etc., should be observed with regard to the abstract. Every copy of the thesis must have an English and French abstract. When the language of the thesis is neither English nor French, an English version is required as well as a version in that language and a French version is invited. It is understood that the thesis supervisor has approved the text of the abstract.

h) The student has the option*, subject to the approval of the Department, of producing the thesis in the form of an original paper, or papers, suitable for submission to learned journals for publication. In this case the thesis must still conform to the requirements previously mentioned in the paragraph on "Typographical and other Specifications" and in the paragraph concerning "Supplementary Documents". In such a case, a full introduction, and other material (e.g. experimental data or details of equipment and experimental design) may need to be provided in addition. If more than one manuscript is included, connecting text and joint summary-conclusions are required. A mere collection of manuscripts is not acceptable; nor can reprints of published papers be accepted. The present regulations on "Supplementary Documents" should be cited in the introduction.

Candidates are warned that the preparation of the typescript always takes longer than is expected and that sufficient time for checking the typescript carefully for errors before the thesis is deposited must be allowed.

The use of SI units for Masters and Ph.D. theses is strongly recommended. Where such units are not presently in common usage, the first time a unit is used, the SI equivalent should be stated in a footnote.

It is a Faculty objective that the use of SI units in theses be mandatory by the academic year 1979-80.

* This option is extended to 1976.

SUPPLEMENTARY DOCUMENTS

At the time of deposition of the thesis, the following additional documents must accompany the thesis.

a) Two waiver forms for the University Library; one for the National Library. (Obtainable from the thesis office).

b) On separate sheets of paper, a short title of the thesis, of less than 56 characters including spaces, which will appear along the spine of bound copies.

c) Two additional copies of each Abstract, as described under "Typographical and other Specifications". These copies should show the title of the thesis, the name of the author, the name of the department and of the degree sought.

d) For doctoral theses, the form required by Dissertation Abstracts (obtainable from Thesis Office) together with another copy of the Abstract and of the title page of the thesis.

Notes re:

a) Unless there is a specific arrangement to the contrary previously approved by the Dean, copies of accepted theses are deposited in the University Library and a microfilm of the original is placed in the National Library at Ottawa. These Libraries are authorized to make the thesis available for consultation or to distribute microfilm or other copies. The waiver forms are to provide for this arrangement. Unless these documents accompany the thesis, it will not be accepted.

b) Abstracts are bound into volumes which are filed for reference in the University Library and in the Thesis Office.

RESUBMISSION

If a thesis is failed it cannot be submitted again in revised form without the permission of Faculty Council. A fee of $75.00 is required for the resubmission of a Master's thesis and $100.00 for a Doctoral thesis. These fees partially cover the cost to the University of having the thesis re-examined. More details about resubmission procedures are contained in the *Guidelines* referred to in Regulation 55, under "Procedures after Deposition", paragraph 2.

5 LIBRARIES

56. All resident graduate students have access to the main collection, the McLennan Library, containing over 860,000 volumes. The building also houses a number of special collections, such as the Blacker Library of Zoology and the Blackader-Lauterman Library of Architecture and Art. Libraries of the Engineering, Law and Religious Studies Faculties are housed in their respective buildings. The Medical Library, located in the McIntyre Medical Sciences Building, includes much of the material for the medical sciences, and a separate room contains the Osler Library which is devoted principally to medical history. There are special libraries such as Macdonald College Library, Islamic Institute Library, and Libraries of the schools of Library Science, Social Work, Nursing and Management. The Allan Memorial Institute and the Montreal Neurological Institute both have associate libraries. A number of departments maintain special libraries. The most extensive are in Chemistry, Geology, and Physics grouped together in the Physical Sciences Centre, and in Biology located in the Stewart Biological Sciences Building.

All university collections may be consulted by resident graduate students, though the hours for reading and the conditions under which books may be consulted or borrowed are not the same in all cases.

6 RESEARCH

POLICY, PATENTS, FELLOWS, ASSOCIATES

RESEARCH POLICY STATEMENT

General

57. (1) Research in the University is relevant for the general benefit of man, as well as for a host of specific purposes. We are convinced that research flourishes only in a climate of liberty. Since the conditions for good research in our many disciplines are quite different we have eschewed detailed regulations or attempts to cover all eventualities with blanket rules. Instead, individual investigators must to a large extent assume direct responsibility for the intellectual and ethical quality of their work.

The Vice-Principal (Research), acting on behalf of the Principal, has an overriding responsibility, but it is recognized that he is not in a position to examine applications, study progress reports, and monitor research activity, in sufficient detail to be able to detect any possibe departure from acceptable standards in the work of our colleagues. Even if elaborate and expensive means could be found to enable administrative officers to exercise such detailed surveillance, it would be foolish to engage in such practice. In a community of responsible scholars, guidance is appropriate; censure may be appropriate after the event; but the detailed investigation of colleagues' intentions is not.

Much research, sponsored through contracts or otherwise, has some orientation to a mission, with the consequence that the sponsor may have priority interests in the result and may wish to impose restrictions either on the use of the data or the results, or both. Some of the restrictions asked for may be reasonable, but some are not.

It is the purpose of this document to establish some guidelines for all in the University, staff and students, in the pursuit of their research. A particular purpose is to protect research workers against committing themselves to unreasonable restrictions and to other conditions which may run counter to our accepted notions of the integrity of university research.

A serious social responsibility rests on the individual members of the community who are

best equipped through special knowledge to remain aware of the consequences of research activity, and the possibility of malign application must be balanced by them against potential benefits.

"Defence contracts"

(2) The University does not allow its professors, students or facilities to be engaged in secret military research sponsored by civilian or military agencies. There is but one exception to this restriction. We are prepared, in principle, to consider applications for the prosecution of research concerned with the defence of Canada and sponsored by Canadian agencies. If such a project is brought forward, and when the Vice-Principal (Research) is satisfied that it is Canadian and defensive in character, he will refer it to the Executive Committee, and if the Executive Committee approves, the application will be allowed to stand. If the project is then initiated, the Vice-Principal and the Executive Committee will report its existence to Faculty Council, though restricted details will not be divulged at that time.

Official secrecy based on constitutional or public policy grounds

(3) Certain kinds of research data in the custody of governments and other agencies are covered by restrictions to protect the privacy of individuals or business firms. These restrictions may make it necessary to limit the use or publication of data to comply with law or policy on confidential personal data. There may also be constitutional restrictions on the disclosure of findings, until they have been made public in the proper manner, through tabling in Parliament for example. Similarly, research done for commissions or committees of inquiry may be protected from premature disclosure.

If the restriction is not such as to prevent the eventual use of the material by students or staff researchers for thesis use or publication, these restrictions are not unreasonable, though the question of the time limits is subject to clearly defined university policy described below. If the research cannot be freely used by students, it is not, generally speaking, appropriate for thesis research.

We will not accept unqualified secrecy rules; nor will we accept requests for delays in publication in excess of one year, though the Executive Committee has the right to accede to requests to three years in exceptional cases.

Commercial contracts

(4) In some kinds of work, at least limited commercial security is necessary to protect commercial application by the sponsor. Since in many areas we should not turn down all involvements with commercial sponsors, careful distinctions become necessary. Those contracts in which all or a major portion of the activity is concerned with the application of available knowledge to the solution of a problem, fall under the guidelines of the next section (5). In those contracts which are predominantly concerned with fundamental research, we refuse contracts with unconditional secrecy clauses, but accept contracts where we obtain agreement regarding at least the following elements:

(a) the interests of students involved, especially with respect to the examination of their theses, must not be jeopardized;
(b) the investigators' rights to publish the non-commercial aspects of the work must not be restricted;
(c) where the commercial aspects of the work are intimately intertwined with the basic findings, only limited periods of delay in the right to publication can be accepted.

Consulting

(5) Consulting may often be an academically worthwhile pursuit, particularly in professional faculties. Society often requires assistance which only the university has the expertise to provide. The professor should select his consulting work so that it enhances his research and teaching activities. The collection of information and perhaps some measure of control may be necessary by the professor's academic supervisor who should request information annually from the professor concerning the nature of his consulting work, the amount of time spent and money earned.

There are several types of consulting, but for the purposes of research policy, only those types need be considered which involve the employment of students, the use of University facilities or are undertaken within a contract to which the University is party. When graduate students are used, Graduate Faculty is involved. If the student is employed on routine work separate from his academic program, the amount of time spent and money earned is of concern. If the work is an integral part of his academic program, the student must be given adequate freedom to pursue a worthwhile piece of research and, at the same time, the work performed must be a product of the student's own efforts and not those of his colleagues. The University is opposed to students deriving their basic financial support from the private consulting contracts of faculty members. If University facilities are used, then the University should be apprised through the academic supervisor, and recompensed for the use of these facilities.

The University endeavours to obtain, in contracts for consulting, freedom to publish the academically interesting aspects of the work within a definite time limitation which is usually two years. The University should only agree to assign patent rights arising specifically out of work done for the sponsor and then only when the sponsor undertakes to complete the application for the patent within, say, two years. Professors should also endeavour in their private consulting agreements to follow the same guidelines.

The delay of publication

(6) Occasions arise where delays to the publication of the results of research may be justified. Instances of this, and the procedures to be followed, have already been mentioned. In connection with theses submitted by graduate students, circulation of the thesis through the University library or the National Archives may be stopped at the student's request for a period up to one year, if a patent application is pending, or if the premature disclosure is otherwise likely to jeopardize subsequent research; in such cases, the Executive Committee of the Faculty reviews the request and, if it approves, subsequently reports it to Faculty Council.

Procedures to obtain research support

(7) When a member of the University staff wishes to undertake research involving the use of the University's facilities, or when the funds are to be used to support activities in which students or post-doctoral fellows are to be engaged as part of their educational experience, the University considers the activity to be part of its pattern of research and the following procedures apply:

All applications to external agencies for support of University research must, in the first place, be submitted to the chairman of the applicant's department for endorsement. In some faculties, the Dean's signature is also to be solicited, in others not; applicants should inform themselves on this point. Applications are then to be routed to either the Research Grants Office or the Research Contracts Office for review and signature by the Vice-Principal (Research).

If an award is subsequently made, it will be made to the University to administer. An account will be opened by the Special Funds Accountant for the investigator to draw upon. All such funds will be accounted for as part of the University's research income and will be reported by the Chief Accountant in the normal way.

(The above is an abbreviation of "Elements of a Research Policy for McGill University". Copies of the complete document are available in the Faculty's Research Grants and Research Contracts Offices.)

PATENTS

UNIVERSITY PATENT POLICY

Principles and Objectives

58. (1) The University recognizes as a fundamental principle that it should maintain complete freedom of research and the unrestricted dissemination of information. Research done solely in anticipation of profit is incompatible with the aims of the University. Nevertheless, it is recognized that in the course of its research activities, ideas or processes may be developed on which, in the public interest, patents should be sought. The University and the inventor have a responsibility to promote the effective development and utilization of such discoveries, and to insure that they will not be restricted in their use in a way which is detrimental to the public interest.

(2) It is also recognized that the effective development of patents based on their research activities have occasionally provided Universities with revenues which have made possible the encouragement of further research both in the field in which the patent was developed and in the University as a whole.

Rights of the University, the Inventor, and Supporting Agencies

(1) The University affirms its interest in all patentable discoveries or inventions of members of its academic, technical or administrative staff, or by students registered in its Faculties, or by other personnel engaged in its teaching or investigative programs, which are made in the course of the performance of their duties within or without the University, or which are made possible by a measure of University support.

(2) The University affirms that it will provide recognition to inventors through a share in the proceeds from their inventions in the following ways:

i) The inventor and his academic associates will profit indirectly, through the allotment by the University of at least a portion of its income from the invention to their research programs.

ii) A modest fraction of the profit should be given to the inventor himself, in order to encourage him to bring his invention to the patentable stage and to patent it under the auspices of the University, and to provide him with a measure of direct reward that does not depend upon his continuing employment at the University.

iii) The desires of the inventor with respect to the use of any surplus of revenues derived from his patents will be considered.

(3) The University affirms the principle that revenues from patentable inventions should normally be devoted to the further support of research.

(4) Under the terms of certain contracts and agreements undertaken by the University on behalf of members of the University with various agencies of government or other supporting bodies, the University and the grantee may be required to assign patent rights to the granting or contracting agency. The University recognizes the equity of outside sponsors of research with respect to patentable discoveries made under such grants, and retains the right to enter into such agreements when they do not conflict with its basic objectives.

(5) Notwithstanding the above, the University does not consider that it has an interest in the exploitation of the work of members of the University undertaken in their capacity as consultants to outside bodies, nor in cases in which the invention results from the demonstrably

private research of the University member.

(6) The University affirms that nothing in this policy statement has reference to revenue derived from royalties from copyrights on work which has been published.

(7) Acceptance of this policy is a condition of employment by the University, and of registration as a student, and of being accepted in any capacity in any University controlled laboratory or program, and it is understood that no member of the University will enter into any patent negotiations wihout informing the University by writing to the Dean of Graduate Studies and Research that he is doing so.

(8) Procedures for implementing this Policy are deposited with the Secretary of the Board of Governors and the Dean of the Faculty of Graduate Studies and Research, from whom copies may be obtained. Representations relating to this Policy and its emplementation should be made to the Dean for the consideration of the University Patents Committee.

UNIVERSITY PATENT PROCEDURES

59. a) The evaluation and development of inventions and discoveries involves time, expense and specialized knowledge which the University cannot normally provide. It will therefore enter into non-exclusive agreements with outside bodies which provide these services, when the aims of these bodies are consistent with the University's objectives. In particular, such agreements will be negotiated with non-profit organizations specialized in this field such as Canadian Patents and Development Limited in Ottawa, and the Research Corporation in New York City.

b) A Patents Committee exists to implement the University's Patent Policy, as set out in the Statutes, to advise personnel on procedure for dealing with patent matters, and to act as the University's agent in dealing with those bodies with which it has contracted for the exploitation of patents. The Committee consists of a chairman appointed by the Principal from the academic staff of the University, the Dean of the Faculty of Graduate Studies and Research or someone delegated by him to represent that Faculty, a member designated by the Board of Governors, and one other faculty member selected by the Executive Committee of the Graduate Faculty. The member designated by the Board of Governors is a member *ex officio* and the University Research Grants Officer acts as non-voting Secretary to the Committee. The inventor or a representative chosen by him, and the Dean of his Faculty, are also non-voting members of the Committee when it is considering a particular invention.

c) The University member shall notify the Dean of the Faculty of Graduate Studies and Research and through him the Patents Committee of any inventions or discoveries made by him in the course of his university duties which seem to him to be of a patentable nature. He shall, when required, submit to the Patents Committee all information needed for the evaluation of the discovery and the application for patent rights, and give the University permission to disclose that information, under such safeguards as the Patents Committee may determine, to other qualified and interested persons.

d) The Patents Committee shall decide whether or not to submit any given invention or discoveries to one of the agencies representing the patent interests of the University. If no action is taken on the part of the University within a period of six months, or such lesser period as the inventor may show is necessary to protect his rights, full title to the invention and to any revenue which may be subsequently derived from it will revert to the inventor who may proceed on his own account if he so desires.

e) In those cases in which the agency (such as Canadian Patents Development Limited or Research Corporation) to which the University, on the recommendation of its Patents Committee, has submitted an invention for development, decides that it does not wish to proceed with a patent application, the Committee may in consultation with the inventor, consult other technical experts for advice, to decide whether to recommend that the University undertake the patent application on its own initiative.

f) A faculty member, student or other person to whom these procedures may apply, shall have the right to appeal to the Principal decisions of the Patents Committee which he considers unjust. In the instance where the matter at issue is whether the University has interest in the invention, the faculty member, student or other person shall accept the findings of an arbitrator acceptable to, and appointed by himself and the university, the cost of such arbitration being shared equally by the two parties to the arbitration. In the event that the University and the inventor fail to agree upon an arbitrator, within thirty days of a formal invitation to do so, either party may request the appointment of an arbitrator from the President of the Montreal Board of Trade who shall appoint the arbitrator forthwith.

g) The University's agreements with the corporations charged with developing its patents will follow the normal pattern of agreements made between these corporations and universities. The inventor or inventors shall normally receive 15% of the gross proceeds of the invention; the remainder, will be divided between the University and the Corporations in accordance with the terms of the agreements. In the case in which there is more than one inventor, the distribution of the inventors' share shall be made on the recommendation of the co-inventors or, in the absence of such a recommendation, by the Patents Committee. The University's share shall normally be devoted to the support of research, special recognition being given to the laboratory, department or faculty in which the discovery was made. In general, at least one-half of the University's share shall be so allocated, provided that such a distribution is consistent with general University budgetary

policies. The proportion may, however, vary with the magnitude of the benefit derived from the patent.

h) If an invention that appears to be patentable is made by a student registered in the University and using University facilities, he shall in consultation with his Director or the Chairman of his department submit it to the Patents Committee for consideration. His submission will then be dealt with in the same way as applications by staff members.

POST-DOCTORAL FELLOWS

60. Post-doctoral fellows are junior Ph.D. graduates engaged by a member of the University's academic staff to assist him in his research. Medical post-doctoral fellows possess the M.D. degree. Post-doctoral fellows may register with the Faculty through the Dean's Office (or in the case of medical post-doctoral fellows, through the Office of the Dean of Medicine) and receive thereby a university identity card, library and other staff privileges. They thereby become liable to the provisions of the Health Insurance Plan (see Regulation 41).

RESEARCH ASSOCIATES

61. This title is intended to provide recognition and status on the University records for senior investigators who are neither candidates for a degree nor members of the regular teaching staff of McGill University, but are attached temporarily to a department because their assistance is required in the interests of a current program of research.

A Research Associate will normally hold the Ph.D. degree or an equivalent qualification.

Any grant which a Research Associate may receive must be either from McGill University or from some other institution promoting the advancement of learning, and must be paid solely for the furtherance of the research that he is pursuing and not for instruction or demonstration. A Research Associate may, however, with the permission of the Faculty, act as a director of research for graduate students associated with him.

OFFICE OF INDUSTRIAL RESEARCH

The Office of Industrial Research, an organization supported by the Federal Government, exists to promote interactions and to negotiate research contracts between industry and the University.

Macdonald College

A1 DEPARTMENT OF AGRICULTURAL CHEMISTRY

The Department works in liaison with the Department of Agricultural Physics and the Department of Renewable Resources, Macdonald College.

STAFF

Professors – B.E. BAKER *(Chairman);* P.A. ANASTASSIADIS
Professor Emeritus – R.H. COMMON
Associate Professor – G.O. HENNEBERRY
Assistant Professors – T. BEVERIDGE; H.J. HUECKEL

REQUIREMENTS

REQUIREMENTS FOR THE M.Sc. DEGREE

(1) Candidates are required to have the B.Sc. (Agr.) degree with honours standing or an equivalent qualification. Students holding a B.Sc. degree may be accepted if they have appropriate undergraduate work in chemistry with sufficient biology; otherwise a qualifying year will be required.

(2) Candidates for the M.Sc. degree are required to take the examinations in two courses for higher degrees given in the Department.

(3) Candidates may be required to take the examination in one of the cognate courses listed below.

Either Statistical Methods II (Department of Agricultural Physics 360-610A,B) *or* Isotopic Tracer Techniques (Department of Agricultural Physics 338-602B) *or* Advanced Animal Biochemistry (Department of Animal Science 342-650D) *or* Reproductive Physiology (Department of Animal Science 342-422B) *or* Digital Computing (Mathematics 360-203A).

(4) Candidates are required to complete an acceptable research project and to submit an acceptable thesis on their research.

REQUIREMENTS FOR THE Ph.D. DEGREE

Candidates will be judged principally by their ability in research. Course work will be arranged with other departments at Macdonald College to meet individual needs. Special arrangements for course work may be made with the McGill Departments of Chemistry, Biochemistry and Experimental Medicine. Candidates should normally be prepared to take the Comprehensive Preliminary Examination by the end of the first year in which they are candidates for the Ph.D. degree. Candidates are required to pass an examination in translation from French into English (126-790D). Candidates *may* be required to pass a similar examination in a second language.

COURSES FOR HIGHER DEGREES

332-651A FOOD ANALYSIS I. (2 lectures and one lab. period.) Proximate analysis. Chemical examinations of sugars, starches, cereals, oil seeds, fat and fat products, fruits, dairy and meat products. Vitamins, food colours, flavours. Contaminants. Physiochemical methods used in food analysis.
Professors Anastassiadis and Common

332-652B FOOD ANALYSIS II. (2 lectures and one lab. period). A specialized course on the principal analytical techniques used for analysis of carbohydrate, lipid, protein and vitamin constituents of foods and feedstuffs, and for detection and determination of chemical additives and contaminants.
Professors Anastassiadis and Common

332-663B INDUSTRIAL UTILIZATION OF FARM PRODUCTS. (2 lectures, second term). The composition and structure of food systems including meat, milk, wheat and vegetable oils; the chemistry involved in certain industrial processes that utilize these farm products.
Professors Baker, Common and Anastassiadis

332-664D GRADUATE SEMINAR. (1 hour).
Staff

332-700D COMPREHENSIVE PRELIMINARY EXAMINATION. (See paragraph 23 of Faculty Regulations).

A2 DEPARTMENT OF AGRICULTURAL ENGINEERING

The Department offers facilities for research work in the areas of water control, agricultural structures, plant and animal environment engineering, properties of agricultural products, agricultural waste management, agricultural machinery and food engineering leading to the degrees of Master of Science and Doctor of Philosophy.

Candidates for M.Sc. and Ph.D. degrees should indicate in some detail their fields of special interest when making application for admission.

STAFF

Professor – R.S. BROUGHTON
Associate Professor – J.R. OGILVIE *(Chairman)*
Assistant Professors – E.R. NORRIS; E. McKYES; A. MARQUIS; R. KOK

REQUIREMENTS

LANGUAGE REQUIREMENTS

Fluency in one of the official Canadian languages and a reading ability in the other is a requirement for an advanced degree. This requirement will be waived for non-Canadian students who can demonstrate a fluency in one of the official Canadian languages and a reading ability in any other language in which there is significant literature in their field of research. The two official languages in Canada are English and French. Suitable courses are available on both campuses.

REQUIREMENTS FOR THE M.Sc. DEGREE

The program for candidates for the M.Sc. degree will be developed in consultation with the candidate's research director and will normally include a minimum of eight term courses plus a thesis submitted in accordance with the rules of the Faculty. Courses will be selected from those offered in the Agricultural Engineering Department and those in such other departments as Agronomy, Animal Science, Civil Engineering, Mathematics, Mechanical Engineering, Soil Science and Economics.

REQUIREMENTS FOR THE Ph.D. DEGREE

(1) Candidates for the Ph.D. degree will normally register for the M.Sc. degree in the first instance. In cases where the research work is proceeding very satisfactorily, or where the equivalent of the M.Sc. degree has been completed at another university, candidates may be permitted to proceed directly to the Ph.D. degree.

(2) Courses of study selected for a Ph.D. program will depend on the existing academic qualifications of the candidate and on those needed for effective prosecution of research. Candidates are encouraged to undertake an additional course of study of their own choice in some field of the humanities, sciences or engineering not directly related to their research. The program will be established by consultation of the candidate with accommittee that will include his research director and at least one other professor. Normally from six to twelve term courses will be required beyond the M.Sc. degree.

(3) Students who take their B.Sc. and M.Sc. at McGill University may be required to spend one session in study at another university.

(4) A comprehensive examination, Agricultural Engineering 336-701D, will be taken either late in the Ph.D. 2, or early in the Ph.D. 3 registration year, to qualify to proceed to the completion of the Ph.D. degree.

COURSES FOR HIGHER DEGREES

336-511B AGRICULTURAL AND EARTHMOVING POWER MACHINERY. An advanced treatment of off-road vehicle design. Topics include performance characteristics, internal combustion engines, analysis of power transmission devices, distribution of stresses between wheeled or tracked vehicles and soil, mobility and pull efficiency, soil cutting, earthmoving, plowing, ripping and transport, wheel and track, steering geometries, vehicle morphology.
Professor McKyes

336-602A ENVIRONMENT CONTROL IN AGRICULTURAL STRUCTURES. (3 lectures, 2 hour laboratory). A study of the environmental effects of housing on stored crops and animals. The production, maintenance, and control of the environment. The effects of the interior environment on structural components.
Professor Marquis

336-603D GRADUATE SEMINAR. (1 hour).
Professor Ogilvie and Staff

***336-604B RESEARCH INSTRUMENTATION.** (2 lectures, 2 hour laboratory, odd numbered years). A systematic study of the underlying physical principles and operation of the sensing devices, amplifiers and recorders used in research.
Professor Norris

336-605B FUNCTIONAL ANALYSIS OF AGRICULTURAL MACHINES. (2 lectures, odd-numbered years). Theoretical analysis of unit operations to be performed by various tillage and harvesting machines. These analyses will consider

the physical and biological properties of the materials affected by the machines.
Professor Norris

336-606A LAND DRAINAGE ENGINEERING. (3 lectures, odd-numbered years). Land drainage in relation to soils and crops. Design of regional drainage systems, stability of ditches, ice problems. Design of subsurface drainage systems. Theories of flow into drain tubes. Hydraulics of wells. Drainage of irrigated lands. Water table control.
Professor Broughton

***336-607B ENGINEERING ASPECTS OF PLANT ENVIRONMENT.** (3 lectures, even-numbered years). The energy budget of the earth's surface. Laminar and turbulent flow in the air layer near plant-covered ground. Evaporation and transpiration. Artificial protection against advection and radiation frosts. The use of artificial means to improve the environment of plants. Control of environment in plant growth structures.
Professor Marquis and Staff

336-608A,B SPECIAL PROBLEMS IN AGRICULTURAL ENGINEERING. (2 conferences, either term). Laboratory, field and library studies and reports on special problems related to Agricultural Engineering that are not covered in the regular course work.
Professor Norris and Staff

***336-609A HYDROLOGY.** (2 lectures, even-numbered years). A fundamental course in Hydrology. Topics covered include: the inter-relationships between precipitation, interception, infiltration, evapo-transpiration, and surface runoff; analysis of precipitation and streamflow data; use of hydrographs; hydraulics of groundwater and wells; used and replenishment of groundwater; evaporation and transpiration; irrigation water requirements.
Professor Broughton

336-701D COMPREHENSIVE EXAMINATION IN AGRICULTURAL ENGINEERING.
Staff

A3 DEPARTMENT OF AGRICULTURAL PHYSICS

STAFF

Professor – R.H. DOUGLAS *(Chairman)*
Associate Professors – N.N. BARTHAKUR; P. SCHUEPP
Assistant Professor – M.A. FANOUS
Professor Emeritus – W. ROWLES

COURSE FOR HIGHER DEGREES

The course below may form part of the required courses for graduate students in Physics, or may be taken by students in other departments as a cognate subject.

***338-602B ISOTOPIC TRACER TECHNIQUES.** (2 lectures and 1 four-hour lab., second term; Prerequisite: 338-303A or equivalent). An advanced practical course designed to introduce qualified students to laboratory equipment and techniques required for tracer experiments. The theory and use of end-window and windowless G.M. counters, proportional counters, scintillation counters both solid and liquid types, and a Nier type mass spectrometer will be studied.
Professor Barthakur

360-610A,B STATISTICAL METHODS II. (3 hours lectures and 2 hours lab.; Prerequisite: 360-201A or equivalent). Multiple, curvilinear and stepwise regression; partial and multiple linear correlation; simple analysis of covariance; cross and nested classifications; analysis of variance of disproportionate data: split-plot techniques; orthogonal comparisons; transformation.
Professor Fanous

360-612B MATHEMATICAL METHODS. (3 hours lectures; Prerequisite: 360-205B, Differential Equations, or equivalent). Partial differential equations and boundary-value problems; Fourier analysis and series solutions; Laplace Transforms; numerical methods; special topics.
Professors Schuepp and Kok

360-613B TECHNIQUES OF STATISTICAL ANALYSIS. (3 hours lectures; Prerequisite: 360-610A or equivalent). Non-parametric methods; multiple analysis of covariance; multivariate methods; sensitivity testing.
Professor Fanous

A4 DEPARTMENT OF AGRONOMY

The research program of the department is concerned with most phases of agronomic investigations, with particular emphasis on problems in plant breeding and crop physiology.

STAFF

Professors – H.R. KLINCK *(on leave)*; H.A. STEPPLER *(Chairman)*
Associate Professor – N.C. LAWSON
Assistant Professors – G. GENDRON

REQUIREMENTS

In addition to *The General Regulations* of the Faculty of Graduate Studies, the Agronomy Department has the following requirements:

REQUIREMENTS FOR THE M.Sc. DEGREE

(1) Candidates are required to have the B.Sc. (Agr.) degree with high standing, or an equivalent qualification, with sufficient basic training in the courses chosen for the higher degree. Students who lack such training must take the required courses of the undergraduate years, as well as courses in such other topics as the department may require.

(2) Students will be required to take courses 340-604D and 340-609D in each year of resident study, and courses 340-607C, 340-610B, and at least one other course of those listed. In addition, they may be required to take courses in cognate subjects.

(3) Since the research problems generally involve field experimentation, students will require at least 18 months and more frequently two years to complete the research and hence the requirements for the degree.

REQUIREMENTS FOR THE Ph.D. DEGREE

(1) Candidates must have an M.Sc. degree with specialization in Agronomy and a high standing achieved in both course work and thesis.

(2) Students will be judged primarily by their ability to conduct research.

(3) Students will be required to take course 340-701D. Courses 340-604D and 304-609D will be taken in each year of resident study. Students may also be directed to take such other courses in Agronomy or cognate subjects as the department requires. Students who take their M.Sc. at McGill may be required to spend one session in study at another University (see paragraph 18c of Faculty Regulations).

COURSES FOR HIGHER DEGREES

340-604D SEMINAR. (1 hour). Weekly meetings; each student will present at least one seminar each term. All students must register for this course each year.
Staff

340-605B FORAGE CROP EXPERIMENTATION. (2 lectures). The conduct of forage experiments and methods of estimating parameters; current literature used as basis for discussion.
Professor Steppler

340-606D PLANT BREEDING. (3 lectures). A directed reading and discussion course on plant reproduction, systems of mating, genetics and cytology as applied to the improvement of existing cultivars of plants and the development of new ones.
Professor Lawson

340-607C METHODS OF AGRONOMIC RESEARCH. (3 hours, May to September). A summer course to acquaint the student with the techniques of agronomic research in use in the experimental fields.
Professor Steppler and Staff

340-608D SPECIAL TOPICS. (3 lectures). Prescribed reading, conference and practical work on selected topics within agronomy.
Staff

340-609D ADVANCES IN AGRONOMY. (1 lecture). One-hour discussions by students and staff on technical topics of current interest in agronomy. The organization of agronomic research and agronomic groups will be considered.
Professor Steppler and Staff

340-610B DESIGN OF EXPERIMENTS. (3 lectures; Prerequisite: Math. 360-610A or equivalent). The design and analysis of experiments, with particular reference to agricultural research; factorials, incomplete block and lattice designs.
Professor Steppler

340-701D COMPREHENSIVE EXAMINATION IN AGRONOMY. (See paragraph 23 of Faculty Regulations).
Staff

NOTE: A lecture may be replaced by a laboratory period of at least two hours.

A5 DEPARTMENT OF ANIMAL SCIENCE

The department provides laboratory and library facilities for research work leading to the degrees of Master of Science and Doctor of Philosophy in each of the following disciplines:

Animal Genetics
Animal Physiology
Nutrition

STAFF

Professors — S. TOUCHBURN *(Chairman) (Nutrition);* E. DONEFER *(Nutrition)*
Associate Professors — R.D. BAKER *(Physiology);* R.B. BUCHLAND *(Animal Genetics and Physiology);* A. FARMER *(Nutrition);* J.E. MOXLEY *(Animal Genetics)*
Assistant Professors — T. HARTSOCK *(Nutrition);* B.W. KENNEDY *(Animal Genetics);* P.C. LAGUE *(Physiology);* H.J. HUECKEL *(Nutrition)*

REQUIREMENTS FOR ADVANCED DEGREES

Candidates are required to have either a Bachelor's degree in Agriculture or a B.Sc. degree with specialization in biology, biochemistry or food science with honours standing or its equivalent.

UNDERGRADUATE COURSES

A candidate will be required to complete undergraduate courses in Animal Science or in the basic sciences when his background in his elected discipline is inadequate.

342-301B PRINCIPLES OF ANIMAL BREEDING.

342-311B ANIMAL PATHOLOGY.

342-323A MAMMALIAN PHYSIOLOGY.

342-422B REPRODUCTIVE PHYSIOLOGY.

342-330A FUNDAMENTALS OF NUTRITION.

342-331B FUNDAMENTALS OF HUMAN NUTRITION.

342-332B APPLIED ANIMAL NUTRITION.

342-424B METABOLIC ENDOCRINOLOGY AND GASTROINTESTINAL PHYSIOLOGY.

342-432A ADVANCED ANIMAL NUTRITION.

Candidates may be required to take one or more of the following courses on the Montreal campus:

516-602A ADVANCED ENDOCRINOLOGY – STEROID HORMONES.

516-603B ADVANCED ENDOCRINOLOGY – NITROGEN CONTAINING HORMONES.

COURSE REQUIREMENTS BY DEPARTMENT

In addition to the departmental courses indicated below, all candidates will be required to complete any cognate courses prescribed by their director of research. The completion of an acceptable thesis based upon the candidate's own research will be required.

Animal Genetics

(a) M.Sc. PROGRAM – At least one of the following courses (342-603A, 342-604B, 342-602D) plus 342-690D and at least 2 additional courses selected in consultation with director of research.

(b) Ph.D. PROGRAM – At least two of the following courses (342-603A, 342-601B, 342-602D, 342-722D) or their equivalent plus 342-690D and 342-700D and at least 2 additional courses selected in consultation with director of research.

Animal Physiology

(a) M.Sc. PROGRAM – Courses 342-621D, 342-650D and 342-690D plus at least one additional course selected in consultation with director of research.

(b) Ph.D. PROGRAM – 342-621D, 342-650D or their equivalents and 342-690D and 342-700D and at least two additional courses selected in consultation with director of research.

Nutrition

(a) M.Sc. PROGRAM – Courses 342-631D, 342-632D, 342-650D, 342-690D and at least one additional course selected in consultation with research director.

(b) Ph.D. PROGRAM – Required courses for M.Sc. program or their equivalent plus 342-690D, 342-700D and at least two additional courses selected in consultation with research director.

GRADUATE COURSES

***342-603A PHYSIOLOGICAL GENETICS OF DOMESTIC ANIMALS.** (2 lectures). A consideration of biochemical and physiological variation in domestic animals as related to productive traits.
Professor Buckland

***342-602D PROBLEMS IN ANIMAL BREEDING.** (2 lectures). A consideration of statistical tools used for the genetic improvement of animals.
Professor Kennedy

342-604B POPULATION GENETICS. (2 lectures). A consideration of the problems involved in the improvement of animals and the application of genetics in their solution.
Professor Moxley

***342-621D ADVANCED PHYSIOLOGY OF ANIMALS.** (2 lectures, 1 lab.). Studies on the organization and function of animal systems, from the viewpoints of cellular and mammalian physiology. An experimental approach is used to investigate major areas of physiology such as nervous integration, circulation of body fluids, muscle contraction, intermediary metabolism, temperature regulation, and hormonal co-ordination.
Professor Baker and Staff

342-631D EXPERIMENTAL TECHNIQUES IN NUTRITION. (1 lecture, 1 lab.). A series of lectures and laboratories of nutritional experimentation and surveys. Emphasis will be placed on the design and conduct of nutrition studies, selection of experimental animals, chemical and biological assays, statistical analysis, interpretation of data and preparation of technical reports.
Nutrition Staff

342-632D ADVANCED NUTRITION. (2 lectures). A series of lectures and discussions on subjects of current interest in nutrition, with

special reference to energy, amino acids, vitamins and minerals, their quantitative requirements and metabolic interrelationships.
Nutrition Staff

342-650D ADVANCED ANIMAL BIOCHEMISTRY. (2 lectures). Enzymology and biological oxidation; intermediary metabolism of carbohydrates, lipids, proteins and other compounds of nitrogen; endocrinological aspects of metabolism; metabolic roles of inorganic ions, vitamins and growth factors.
Staff

342-690D SEMINAR. (1 hour).
Staff

342-691D SPECIAL PROJECTS IN ANIMAL SCIENCE. (2 hour lab. — one term). For students who undertake a research or library project not offered in other courses.
Staff

342-701D DOCTORAL COMPREHENSIVE EXAMINATIONS. (See paragraph 23 of Faculty Regulations).

342-722D MAMMALIAN AND AVIAN GERM CELLS. (2 lectures, 1 lab. — one term; Prerequisite: Animal Science 342-322B or equivalent). Problem-oriented investigation of the recent theories and developments on the formation, transportation, and livability of spermatozoa and ova within the body, and their metabolism and preservation *in vitro*.
Professors Baker and Buckland

342-730D COLLOQUIUM IN NUTRITION. (1 lecture; Prerequisite: Animal Science 342-632D). Discussions on recent developments in nutrition. Oral and written presentations by students will be emphasized.
Nutrition Staff

342-731D ADVANCED RUMINANT NUTRITION. (2 lectures; Prerequisites: Animal Science 342-424B and 342-650D or equivalent). A series of discussions on the organization and function of the ruminant digestive system, methods of study and factors which influence digestion.
Professors Jones and Donefer

A6 DEPARTMENT OF BIOLOGY

COURSES GIVEN AT MACDONALD COLLEGE

Several of the following courses will be offered according to demand.
(consult staff)

177-670A CYTOLOGY. (2 hours and one laboratory period). An intensive study of the cell with emphasis on the nucleus, nuclear division, chromosome morphology, chromosome aberrations, euploidy and aneuploidy, and chromosome behaviour in hybrids.
Professor W. Grant

177-671B CYTOGENETICS. A study of cytological and genetical topics at an advanced level including polyploidy, apomixis and parthenogenesis, chromosome and gene replication, sex determination, and karyotype analysis.
Professor W. Grant

177-673A MUTAGENESIS AND RADIATION BIOLOGY. A study of the nature of mutations and the genetic effects of radiation and chemical mutagens on plants and animals and in crop improvement.
Professor W. Grant

177-675B STATISTICAL METHODS IN GENETICS. A presentation and discussion of statistical methods of analysing genetic changes in populations of domestic animals and plants, with particular reference to pedigrees, heterosis, selection, etc.
Professor H. Tyson

A7 DEPARTMENT OF ENTOMOLOGY AND LYMAN ENTOMOLOGICAL MUSEUM AND RESEARCH LABORATORY

A liberal interpretation is put on the term Entomology. Excellent laboratory and library facilities are available for the courses listed below and for research. The Lyman Entomological Museum and Research Laboratory also provides excellent facilities for students of taxonomy. By an informal arrangement, part of a student's research may be done at the Biosystematics Research Institute, including the National Insect Collection, Ottawa, within reasonable distance of the Department. Students may be recommended to take undergraduate courses or courses offered by other departments of the University, either as part of their major work or as cognate subjects. All members of the graduate school are expected to take an active part in all departmental seminars and to address at least one seminar meeting per year. For those with credit in 350-695D, this may take the form of a Research Report.

The Lyman Entomological Museum and Research Laboratory, although integrated with it, is not administratively a part of the Department of

Entomology, but it is academically staffed by, and all its students are registered in, that department. The Lyman Entomological Museum and Research Laboratory is exclusively a research and teaching institution.

STAFF

Professors — F.O. MORRISON; E.M. DuPORTE *(Emeritus);* D.K. McE. KEVAN *(Director, Lyman Entomological Museum and Research Laboratory);* J.E. McFARLANE; V.R. VICKERY *(Curator, Lyman Entomological Museum and Research Laboratory)*

Associate Professor — R.K. STEWART *(Chairman)*

Assistant Professors — F.E.A. ALI KHAN; S.B. HILL

Associate Members of Department — *Professors* E. MEEROVITCH *(Institute of Parasitology)* and J.R. BIDER *(Wildlife Biology)*

Guest Lecturers — H.F. HOWDEN; E.J. LeROUX; E.E. LINDQUIST; J.F. McALPINE and R.R.M. MASON *(Entomological Research Institute, Ottawa)*

REQUIREMENTS

REQUIREMENTS FOR THE M.Sc. DEGREE

Candidates for admission must have had (1) satisfactory previous training in mathematics, physical sciences and biology; and (2) have obtained at least a second class Bachelor's degree in Zoology or Entomology, or the equivalent. For students who satisfy these conditions the minimum period of study is two years. Students whose equivalent courses are deficient in Entomology may be required to take a qualifying year in which mainly advanced undergraduate courses are taken.

In addition to presenting a thesis the student shall take such courses and write such examinations as are deemed necessary by the Chairman of the Department in consultation with the candidate's research director. Normally this amounts to a minimum of two full graduate courses (or their equivalent) in addition to 350-695D.

The candidate will normally be expected to spend at least one summer session in full-time research on the Macdonald Campus or, under suitable direction, at some other approved institution. Preliminary studies may begin before the opening of the academic year.

REQUIREMENTS FOR THE Ph.D. DEGREE

Students who have obtained a high standing in the M.Sc. degree in Entomology or its equivalent (including the M.Sc. degree in Zoology, with a sound entomological background), may proceed to the Ph.D. degree in two additional years. Under certain circumstances students holding a Bachelor's degree of high standing may change their registration from the M.Sc. degree to the Ph.D. degree or may even register directly for the Ph.D. degree with the consent of the Chairman of the Department and the Faculty of Graduate Studies and Research. However, before these students are allowed to enter third year, they must pass an examination to determine their fitness to proceed. This will normally take the form of the comprehensive examination (350-701D) taken by all Ph.D. candidates before proceeding to a second year of residence of the Macdonald Campus. Three years of residence are required of such students.

In addition to presenting a thesis the candidate may be required to take such courses and pass such examinations as are decided upon in consultation with the Chairman of the Department and the director of his research. Normally no course work (other than a Seminar) will be required during the final year and not usually more than one full course (or its equivalent) during the preceeding year for candidates already possessing an M.Sc. degree of McGill University or its equivalent. Candidates may, however, be advised or required to attend courses bearing on their research work, or to make up deficiencies, at any time during their period of resident study.

Participation in seminars will be taken into consideration in the final assessment of the candidate. Language requirements are in accordance with Faculty regulations. Two languages, other than English, will normally be required (selected from French 126-790D, German 129-790D and Russian 141-790D).

Ph.D. candidates may be permitted to spend one of their years of full-time study at an approved university or research institution other than McGill University, provided that they spend at least two academic sessions in residence at McGill University. The candidate may be required to spend the equivalent of two summer sessions in fulltime research on the Macdonald Campus or, under suitable direction, at some other approved institution. Preliminary studies may begin before the opening of the academic year.

Candidates for M.Sc. or Ph.D. degrees should indicate in some detail their fields of special interest when making application for admission. Facilities are available for research in most branches of entomology and in related fields, but candidates with special problems should consult the Chairman of the Department in advance.

COURSES FOR HIGHER DEGREES

350-610D ADVANCED TAXONOMY AND ZOOGEOGRAPHY.
Professors Kevan and Vickery

350-625A GENERAL INSECT ECOLOGY.
Professor Stewart

350-631A SOIL FAUNA.
Professors Hill and Kevan

350-632B SOIL ECOLOGY.
Professors Hill and Kevan

350-635B AQUATIC ENTOMOLOGY.
Professor Ali Khan

350-640D ADVANCED ECONOMIC ENTOMOLOGY.
Professor Morrison

350-660A,B EARLY HISTORY OF ENTOMOLOGY. (Reading knowledge of German required).
Professor Kevan

350-695D SEMINAR AND RESEARCH REVIEW. (Two meetings weekly).
Professor Morrison and Staff

350-701D Ph.D. COMPREHENSIVE EXAMINATION.
Entomology Staff and Others

350-715D ADVANCED INSECT MORPHOLOGY.
Professors Stewart and DuPorte

350-720D ADVANCED INSECT PHYSIOLOGY.
Professor McFarlane

350-726B INSECT POPULATION DYNAMICS.
Professor Stewart

350-727D GENERAL INSECT ECOLOGY AND POPULATION DYNAMICS. (includes 350-625A and 350-726B).
Professor Stewart

350-733D SOIL ZOOLOGY. (Includes 631A and 632B).
Professors Hill and Kevan

350-750A,B VETERINARY AND MEDICAL ENTOMOLOGY. (Given only irregularly by special arrangement when demand sufficient).
Professor Kevan, assisted by professors Meerovitch and Ali Khan

366-680D NEMATOLOGY.
Professor Estey

374-605D WILDLIFE ECOLOGY.
Professor Bider

391-640C APPLIED PARASITOLOGY.
Professor Meerovitch

A8 DEPARTMENT OF HORTICULTURE

STAFF

Associate Professors — C.D. TAPER *(Chairman)*; JEAN DAVID
Assistant Professor — B.B. BIBLE
Sessional Lecturers — L. PERRON; S. WIGDOR

REQUIREMENTS FOR THE M.Sc. DEGREE

If the M.Sc. is taken in Fruit or Vegetable Production the candidate must take courses 358-695D and 358-610D or 358-615D, and a minimum of two full courses selected from the following: 360-610A (Statistical Methods II), 340-610B (Design of Experiments), 358-625A (Crop Physiology), 358-630B (Crop Physiology), 177-670A (Cytology), 177-671B (Cytogenetics), 358-620D (Fruit and Vegetable Preservation), or other courses in related subjects.

If the M.Sc. is taken in Food Preservation the candidate must take courses 358-695D and 358-620D, 362-442A (Food Microbiology and Sanitation), and at least one additional course as required by the director of the candidate's research.

COURSES FOR THE M.Sc. DEGREE

Adequate laboratory and library facilities are available for the courses listed below and for research.

358-610D POMOLOGY. The biology of pomological species, and the technology of orchard and small fruit production; major aspects, significant research, recent advances.
Professor Taper

358-615D VEGETABLE CROPS. Discussion and reading assignments on the application of plant physiology and other sciences to the production of vegetable crops.
Professor Bible

358-620D FRUIT AND VEGETABLE PRESERVATION. Lectures and reading assignments on the fundamental processes and recent developments in the techniques of fruit and vegetable preservation.
Professor David

358-625A CROP PHYSIOLOGY: GROWTH AND DEVELOPMENT. A study of plant growth and development as related to the improvement of agronomic and horticultural crops, with emphasis on plant hormones, phytochrome, germination, growth, flowering, fruit development, and senescence. These topics will be reviewed in discussion sessions with each student contributing both oral and written presentations.
Professor Bible

358-630B CROP PHYSIOLOGY: PLANT PROCESSES. A study of plant metabolic phenomena as related to the improvement of agronomic and horticultural crops, with emphasis on plant mineral nutrition, translocation, water relations, photosynthesis and respiration. (Course format as stated under course 358-625A).
Professor Bible

358-635D SPECIAL TOPICS. Prescribed reading, conference and practical work on one or more selected topics within horticulture, such as research

methods, plant propagation, tropical crops, storage and landscape materials.
Professor Taper and Staff

358-695D SEMINAR. Weekly meetings; each student will present at least one seminar each term. All students must register for this course each year.
Staff

A9 DEPARTMENT OF MICROBIOLOGY

Adequate laboratory and library facilities are available for courses leading to higher degrees, and for research. Candidates for the higher degree must meet the course requirements satisfactorily but are judged principally by their research ability. Normally in this Department the research problem will be on microbial physiology and bio-chemistry or on microbiological aspects of soil, food or water.

STAFF

Professors — A.C. BLACKWOOD; R. KNOWLES; R.A. MacLEOD *(Chairman);* C.E. TANNER *(Parasitology)*
Associate Professors — W. DeVOE; E.S. IDZIAK; J.M. INGRAM
Lecturer — G. ROBERTSON
Associate Member — H.M. SCHULMAN *(Lady Davis Institute)*

REQUIREMENTS

REQUIREMENTS FOR THE M.Sc. DEGREE

Candidates are required to have the B.Sc. degree in the Biological Sciences, preferably with a Major in Microbiology or its equivalent. Students with a B.Sc. degree in other disciplines or majors who lack sufficient training will be required to take either a qualifying year or undergraduate courses sufficient to ensure a good general knowledge of microbiology. Students with sufficient training and graduate level standing (B or higher) will be required to take part in Graduate Seminars as well as pass examinations in graduate courses selected in consultation with the Thesis Supervisor and the Department Chairman. The candidate must present a satisfactory thesis based on his own research.

REQUIREMENTS FOR THE Ph.D. DEGREE:

Candidates, normally, are required to have received an M.Sc. degree or its equivalent. The candidate must demonstrate a sound critical approach to and a capacity for research and must complete an original problem and present a satisfactory thesis based on his research. In addition, the candidate will be required to take examinations in courses given by this department or in cognate subjects given at Macdonald College or at the Montreal Campus and to take part in the Graduate Seminar in each year of residence. The candidate will be required to take an oral or written comprehensive examination (Course 362-701D) no later than the end of the Ph.D. 2 year.

COURSES FOR HIGHER DEGREES

362-760D PHYSIOLOGY OF MICROORGANISMS. (2 hours). Selected topics on physiological mechanisms associated with the life and growth of microbial cells: biosynthetic pathways; transport mechanisms; intermediary metabolism of carbohydrates, fats and proteins; utilization of special compounds; other current topics.
Professor Ingram and Staff

362-761D SOIL MICROBIOLOGY. (2 hours). A consideration of recent advances in selected aspects of soil microbiology; autotrophs, nitrogen relationships, microfauna, soil-borne pathogens, antibiotics in soil, degradation of recalcitrant molecules, etc.
Professor Knowles

362-762D MICROBIAL BIOCHEMISTRY. (2 hours). Nutritional requirements of microorganisms considered in relation to the biosynthetic capacities of the cells; biochemical genetics and enzyme formation; enzyme kinetics and intra- and extracellular enzymatic mechanisms. Stress will be placed on the comparative biochemistry of microbial and other types of living cells.
Professor MacLeod

362-763D INVITATION LECTURES IN MICROBIOLOGY. (1 hour). Prominent scientists, actively engaged in research will be invited to present a series of lectures in the field of their research interest. The speakers and their topics will be chosen to complement the offerings of the permanent staff.

362-769D GRADUATE SEMINAR. (1 hour). All graduate students are required to present seminars on selected topics and to prepare and discuss reports from the current literature.
Staff

362-701D COMPREHENSIVE EXAMINATION. (See paragraph 23 of Faculty Regulations).
Staff

A10 INSTITUTE OF PARASITOLOGY

The Institute has full animal, laboratory and library facilities to conduct research into all aspects of Animal Parasitology. Candidates for either the M.Sc. or the Ph.D. degree should possess an honours degree in a biological subject, or in medicine or veterinary science. Previous experience in Parasitology is less important than a sound background in experimental biology.

STAFF

Professors — EUGENE MEEROVITCH; C.E. TANNER
Associate Professors — NEIL A. CROLL *(Director)*; R.P. HARPUR
Assistant Professors — GAETAN M. FAUBERT; PIERRE VIENS
Research Associates — M.E. RAU; J.E. McLAUGHLIN; S. MJUGE

REQUIREMENTS

REQUIREMENTS FOR THE M.Sc. DEGREE

Candidates with insufficient background will be required to spend a qualifying year of study. Those already at an acceptable standard may proceed to 391-600D. Candidates will be required to write a full research proposal and demonstrate an understanding of research techniques, and to successfully perform in an oral examination within the first 6 months of their registration, to fulfil the requirements of 391-600D. While the emphasis is on research, evidence of satisfactory completion of 391-600D and 391-603D is compulsory before submission of the thesis together with any other course in related subjects which may be required. While in the Institute all students are required to participate in Seminar course 391-605D. A minimum of two years is needed to complete all the requirements, although in exceptional circumstances it may be one year.

REQUIREMENTS FOR THE Ph.D. DEGREE

Candidates will normally hold a Master's degree in a biological science, but in exceptional circumstances very well qualified students may proceed directly to a Ph.D. registration. Candidates will be required, as soon as they are ready, but always within 6 months, to proceed to 391-700D. For this, a full research proposal and an understanding of experimental techniques must be successfully demonstrated in an oral examination. Course 391-703D is compulsory thereafter, together with any other course in related subjects which may be required. Evidence of satisfactory completion of 391-700D and 391-703D is compulsory before submission of the thesis. While in the Institute, all students are required to participate in the (Institutional) seminars (391-605D). A minimum of three years residence is necessary to complete the requirements.

COURSES FOR HIGHER DEGREES

391-504C APPLIED PARASITOLOGY. An intensive course lasting three weeks, usually offered at the end of regular lectures in the spring.
Professor Meerovitch

391-600D PRELIMINARY ORAL EXAMINATION FOR M.Sc. CANDIDATES.

391-603D ADVANCED PARASITOLOGY. Lectures, laboratory work, and assigned reading on selected topics in Parasitology and related fields.
Professor Harpur and Staff

391-605D PARASITOLOGY SEMINAR. A course of informal discussion on current problems and concepts in Parasitology and related fields. All students are required to participate throughout their time at the Institute.

391-700D PRELIMINARY ORAL EXAMINATION FOR Ph.D. CANDIDATES.
Supervisor and Staff

391-703D COMPREHENSIVE COURSE FOR Ph.D. CANDIDATES. A course of reading, essays, and tutorials, designed to fit the needs of individual candidates.
Staff

A11 DEPARTMENT OF PLANT PATHOLOGY

Laboratory, greenhouse, and library facilities are available for research leading to higher degrees. The main research interests in the department are in disease physiology, epidemiology and biology of disease, root diseases caused by fungi and nematodes, viral components produced in mixed virus infections, and history of plant pathology.

STAFF

Professors — R.H. ESTEY *(Chairman)*; R.-L. PELLETIER; W.E. SACKSTON *(On leave)*
Assistant Professors — J.F. PETERSON; M.A. VISWANATHAN; D.W. WOODLAND *(Curator McGill University Herbarium)*
Research Associate — C.H. HOGGER

REQUIREMENTS

REQUIREMENTS FOR THE M.Sc. DEGREE

Candidates are required to have honours or a good second class standing in botany, microbiology, or a related biological science, with sound training in mathematics, physics and chemistry. All candidates will be evaluated by an interview before a course program is outlined. Courses required in the candidate's program may be from the department's offerings or from other departments, and must be approved by the candidate's advisory committee.

The candidate must present a satisfactory thesis based on original research.

REQUIREMENTS FOR THE Ph.D. DEGREE

Students who have high academic standing in the M.Sc. degree program in Plant Pathology at McGill University, or its equivalent, may proceed to the Ph.D. degree. Students will be required to pass the Ph.D. preliminary examination (oral and/or written) before being admitted as a candidate for the Ph.D. degree. A program of courses must be approved by the student's advisory committee.

Candidates for the Ph.D. degree are required to have a working knowledge of English or French and a reading knowledge of the other or another language in which there is an extensive literature pertaining to their field of research.

Candidates will be examined at the completion of their studies to ensure that they have a good general knowledge of their field.

Each candidate is required to submit a satisfactory thesis based on original research and to defend it before the thesis committee.

COURSES FOR HIGHER DEGREES

366-602B DISEASES OF FIELD AND FOREST CROPS.
Professor Viswanathan

***366-603B DISEASES OF HORTICULTURAL CROPS.**
Professor Viswanathan

366-604A PLANT PATHOLOGY RESEARCH METHODS.
Professor Pelletier and Staff

366-607B PLANT VIRUS DISEASES.
Professor Peterson

366-608E PLANT VIROLOGY METHODS.
Professor Peterson

366-610A or B. HISTORY OF PLANT PATHOLOGY.
Professor Estey

***366-620A ADVANCED MYCOLOGY.**
Professor Estey

366-660D SEMINAR (one meeting weekly).
Professor Pelletier and Staff

366-680A NEMATOLOGY.
Professor Estey

366-681B NEMATODE DISEASES OF PLANTS.
Professor Estey

366-690D TAXONOMY AND ECOLOGY OF ECONOMIC PLANTS.
Professor Woodland

366-700D Ph.D. PRELIMINARY EXAMINATION.

366-701D Ph.D. COMPREHENSIVE EXAMINATION.

***366-710D PRINCIPLES OF PLANT PATHOLOGY.**
Professor Pelletier

366-730D ADVANCED PLANT PATHOLOGY.
Professor Pelletier

A12 DEPARTMENT OF RENEWABLE RESOURCES

The Department offers research facilities for studies in Soil Science and Wildlife Biology leading to the degrees of Master of Science and Doctor of Philosophy. Studies in community resource development are possible under special arrangements.

STAFF

Professors — H.G. DION; A.F. MacKENZIE *(Chairman)*; B.P. WARKENTIN
Associate Professors — J.R. BIDER; A.R.C. JONES; J.D. MacARTHUR; J.F.G. MILLETTE
Assistant Professors — G. BACHMAN; M. CHEVRIER; E. FILLMORE; J. GEROLS; R. TITMAN; M. VAN LIEROP

REQUIREMENTS

REQUIREMENTS FOR THE M.Sc. DEGREE

Candidates are required to have a Bachelor's degree with a sufficient background in the appropriate basic sciences. Students will be required to make up undergraduate courses in soils, wildlife biology or the basic sciences when their background work is considered inadequate.

The degree work will include course requirements, satisfactory performance in examinations as required by the Department, and presentation of a thesis based upon the candidate's own research work.

REQUIREMENTS FOR THE Ph.D. DEGREE

Candidates are normally required to hold an M.Sc. degree. The candidates will be judged primarily on ability to conduct an original and independent research study.

The work for the degree will include course work as required by the research problem and the candidate's background, satisfactory performance in examinations including the comprehensive examination, and satisfactory completion of research work and the thesis.

COURSES FOR HIGHER DEGREES

372-602D CHEMISTRY AND FERTILITY OF SOILS. (2 lectures per week, one term). Discussion of significant research in chemistry, movement and uptake of plant nutrients; composition and properties of soil organic matter; analytical techniques.
Professor MacKenzie

372-610D PEDOLOGY. (2 lectures per week, one term). Processes of profile development, principles of classification, comparative taxonomy, land utilization.
Professor Millette

372-620D PHYSICAL PROPERTIES OF SOILS. (2 lectures per week, one term). Structure and fabric, water retention and movement in soils, diffusion of gases, heat transfer. Applications to soil strength, infiltration and evaporation of water, soil temperature and freezing.
Professor Warkentin

***372-630D SOIL MINERALOGY.** (2 lectures per week, one term). Structure and indentification of minerals, weathering, properties of clay surfaces, adsorption on clays, ion exchange.
Professors MacKenzie and Warkentin

372-640D GRADUATE SEMINAR. (1 hour per week). Discussions of selected topics in soil science. Reports to be prepared and presented by students.
Staff

372-700D Ph.D. PRELIMINARY EXAMINATION.
Staff and Others

372-701D Ph.D. COMPREHENSIVE EXAMINATION.
Staff and Others

374-602B CONSERVATION ECOLOGY.
Professor Bider

374-605D WILDLIFE ECOLOGY.
Professor Bider

McGill University

Faculty of Graduate Studies and Research 1975-76

Section "B"

Biological Sciences

Note: Courses marked with an asterisk (*) are not offered in 1975-76. The letters, which form part of course numbers, have the following significance:

A — Fall term course
B — Winter term course
C — Summer term course
D — Full session course (Fall and Winter terms)

B1 BELLAIR RESEARCH INSTITUTE

The Bellairs Research Institute is situated on the St. James coast of the Island of Barbados. The Institute was established through the donation of the late Commander Carlyon Bellairs who left his estate on the island in trust to the University for the support of a research institute. The Institute emphasizes Marine Biology (see under Marine Sciences Centre) and Tropical Climatology (see under Geography). It also holds every other year a field course in Tropical Marine Ecology. Information relating to the Institute and its activities may be obtained from the Director, The Bellairs Research Institute, St. James, Barbados, West Indies, or from the Director of the Marine Sciences Centre.

B2 DEPARTMENT OF BIOCHEMISTRY

STAFF

Professors — A.F. GRAHAM *(Chairman)*; M.J. FRASER; E.A. HOSEIN; D. RUBINSTEIN; S. SOLOMON; T.L. SOURKES; J.H. SPENCER; L.S. WOLFE

Associate Professors — R. BLOSTEIN; P.E. BRAUN; D.T. DENHARDT; ROSE M. JOHNSTONE; A.R. WASSERMAN

Assistant Professors — ELEANOR M. HARPUR; R.E. MacKENZIE; E.A. MEIGHEN; S. MILLWARD; W. MUSHYNSKI

Lecturer — M.R. REESAL

Associate Members — M.K. BIRMINGHAM *(Psychiatry)*; J. DUPRE *(Exp. Medicine)*; D. EDWARD *(Exp. Surgery)*; W.C. GALLEY *(Chemistry)*; L. GOODFRIEND *(Exp. Medicine)*; L.M. JERRY *(Exp. Medicine)*; H. PAPPIUS *(Exp. Neurochemistry)*; C. SCRIVER *(Pediatrics)*; J. SHUSTER *(Exp. Medicine)*

REQUIREMENTS

Students must submit with their applications for admission the results of the Graduate Record Examination (aptitude test, and achievement test in Biology or Chemistry), three letters of recommendation and a brief resumé indicating in as much detail as possible their particular field of interest for graduate study and the reasons for choosing this specific area.

Students who have satisfactorily completed an Honours course in Biochemistry and who have been accepted as research students by the Department and by a research director approved by the Department may register for the M.Sc. degree which usually involves a two-year program. Following completion of one year of study in the Department, suitable candidates may be allowed to proceed directly to the Ph.D. degree depending on the ability they display in research and course work.

A program of courses for each student is determined by the individual research director in consultation with the Chairman of the Department's Graduate Advisory Committee. Students who have not obtained a suitable Honours degree or its equivalent will be required to take a qualifying year or otherwise make up for defiencies.

Candidates who have obtained the M.Sc. degree with satisfactory standing from this department or who have completed an acceptable M.Sc. program at another university, enter the graduate program at the Ph.D. level.

Research projects deal with the biochemistry of erythrocytes, liver, brain, muscle, chloroplasts, endocrine organs, nucleic acids, peptides, lipids, and transport phenomena. These projects are conducted in departmental laboratories, the Biochemistry Laboratories of the Allan Memorial Institute of Psychiatry, the Laboratory of Experimental Neurochemistry of the Montreal Neurological Institute, the University Clinics of the Montreal General and the Royal Victoria Hospitals and in certain other laboratories.

There is no second language requirement for Ph.D. students, except where individual research directors wish to make such a requirement for their own students. Students whose mother tongue is not English must be proficient in English and may be required to take a remedial English course if the research director deems this necessary.

COURSES FOR HIGHER DEGREES

GRADUATE-LEVEL COURSES

***507-602A TOPICS IN MOLECULAR BIOLOGY.** (Admission by permission of instructor only.)
Professors Fraser and Millward

507-503B IMMUNOCHEMISTRY. (Admission by permission of instructor only.)
Professors Shuster and Jerry
(University Clinic, Montreal General Hospital; University Clinic, Royal Victoria Hospital)

ADVANCED UNDERGRADUATE COURSES

507-302D METABOLISM AND REGULATION. (Prerequisite: Biology 177-201D; Co-requisite: Biology 177-301A, 302B.)
Professor Johnstone and Staff

507-404B BIOPHYSICAL CHEMISTRY. (Prerequisites: Chemistry 180-204A, 214B or

213A, 223B required; Chemistry 180-313A recommended. This course is also listed as Chemistry 180-404B.)
Professors Meighen and Galley (Chemistry)

507-450B PROTEIN STRUCTURE AND FUNCTION. (Prerequisites: Biology 177-301A, 302B.)
Professors Mackenzie and Meighen

507-454A NUCLEIC ACIDS. (Prerequisites: Biology 177-301A, 302B; Biochemistry 507-302D.)
Professors Denhart and Spencer

507-455B NEUROCHEMISTRY. (Prerequisites: Biochemistry 507-302D and Biology 177-301A, 302B.)
Professors Sourkes, Wolfe and Staff

SEMINARS

There are three series of seminars: the junior seminar consists of a presentation by each student near the end of his M.Sc. program or at the beginning of his Ph.D. program on the subject of his recent or on-going research. The senior seminar consists of a presentation by every third or later year Ph.D. candidate on the subject of his recent research. Departmental staff seminars consist of presentations by members of staff and visiting scientists outlining their work with their collaborators. Graduate students are required to attend all the above seminars and certain informal seminars, and are encouraged to attend relevant scientific meetings.

B3 DEPARTMENT OF BIOLOGY

The Department of Biology has available a brochure describing the admission and degree requirements for the M.Sc. and Ph.D. in Biology. A summary of the research interests of each staff member is included. Enquiries concerning admission should be directed to the Secretary of the Graduate Training Program, Department of Biology.

The research interests of the department are focussed on four main areas, namely: Human Genetics, Ecology, Cell Molecular and Developmental Biology, and Neurobiology and Behaviour. There are also individual staff members whose work lies outside these areas. Courses available include specialized senior undergraduate courses (see Science Faculty Calendar) as well as those restricted to graduate students.

STAFF

Professors — W.G. BOLL; E.R. BOOTHROYD; P.S.B. DIGBY, F.C. FRASER *(on leave)*; S.P. GIBBS; P.R. GRANT; W.F. GRANT; G.A. MACLACHLAN *(on leave)*; J. MARSDEN *(Chairman)*; J.D. METRAKOS; B.B. MUKHERHEE; C.M. WILSON

Associate Professors — A.N. AUCLAIR *(on leave)*; A.H. BUSSEY; R. CHASE; M.E. GOLDSTEIN; J. KALFF; E. KAFER-BOOTHROYD; W.C. LEGGETT; R.E. LEMON; G.A. MANLEY; V. PASZTOR; R.J. POOLE; R. SATTLER; R. SINCLAIR; K. SITTMANN; J.L. SOUTHIN; D. TRASLER; H. TYSON; N. WOLFSON

Assistant Professors — B. BRANDHORST; D.R. FROMSON; D. KRAMER; R. LEVINE; D. MADISON; R. PETERS; D.P.S. VERMA

OTHER McGILL STAFF WITH GRADUATE STUDENTS OR TEACHING RESPONSIBILITIES IN THE BIOLOGY DEPARTMENT

Professors — R. CARROLL *(Redpath Museum)*; M.J. DUNBAR *(Marine Sciences)*; J. LEWIS *(Redpath Museum)*; R.A. MACLEOD *(Microbiology)*; J.E. McFARLANE *(Entomology)*

Associate Professors — C. LALLI *(Marine Sciences)*; C.R. SCRIVER *(Montreal Children's Hospital)*

Assistant Professors — R. GOLD *(Montreal Children's Hospital)*; P. HECHTMAN *(Montreal Children's Hospital)*; E. MITCHELL *(Fisheries Research Board)*; L. PINSKY *(Jewish General Hospital)*; H. REISWIG *(Redpath Museum)*; H.M. SCHULMAN *(Jewish General Hospital)*

COURSES FOR HIGHER DEGREES

GENERAL COURSES

177-650, 177-651, 177-652 (A, B or C). RECENT ADVANCES IN BIOLOGY. Directed reading, seminar and discussion courses in various subjects of current interest in biological research.

177-655, 177-656 (A B or C). LABORATORY PROJECTS AND TECHNIQUES. Directed training in selected methods used in various areas of current interest in biological research.

177-700D DOCTORAL QUALIFYING EXAMINATION. This will be an oral qualifying examination arranged by members of the candidate's Supervisory Committee within 15 months of registration.

177-702D Ph.D. SEMINAR. Doctoral candidates are required to give a public oral presentation of their major results before submitting a thesis.

LANGUAGE EXAMINATION. At the discretion

of their Supervisory Committee doctoral candidates may be required to demonstrate facility in a foreign language.

SPECIFIC COURSES

177-500C ADVANCED TECHNIQUES IN CELL AND MOLECULAR BIOLOGY. (1 lecture and 6-8 laboratory hours per day, during a 3-4 week summer session, starting 1976; Prerequisites: 177-301A, 302B and permission of the instructor.) This course is intended for selected cell and molecular biology honours and graduate students. Techniques used are those involved in molecular studies of transcriptional and translational regulation in eucaryotic cells, e.g. nucleic acid and protein synthesis *in vitro, de novo* synthesis of enzymes, nucleic acid hybridization, cell fractionation and analytical methods, etc.
Professor Verma

177-575A ADVANCES IN POPULATION GENETICS. (2 lectures, 1 conference; Prerequisites: 177-373A, 177-325A or 177-372B.) Discussion of recent advances in genetics relevant to population biologists in ecology and human genetics.
Professors Sittmann and Tyson

177-587B COMPARATIVE METABOLIC PHYSIOLOGY. (1 lecture hour, 1 seminar; Prerequisite: 177-385B.) The topic will vary from year to year and will relate to some specific aspect of comparative neurophysiology such as control of neurosecretion, invertebrate neurendocrine systems, developmental neurobiology. Graduate students taking the course will be required to prepare a documented term paper as well as giving a seminar.
Professor Marsden

177-588A ADVANCED NEUROBIOLOGY. (2 hours seminar; Prerequisite: 177-386A or permission of instructor.) Discussion primarily of important current research. Topics emphasize cellular neurophysiology and the functional organization of nervous systems. Includes both vertebrate and invertebrate material.
Staff

†**177-617A DEVELOPMENTAL MAMMALIAN GENETICS.** (3 hours; lectures and conferences; Prerequisites: 180-204A, 180-222A, B, 177-274A or 177-202B, 177-303A, 177-310B; 177-372B recommended; and permission of instructor required.) An advanced course for final year students where the main emphasis will be on experiments where gene differences altering development or environmentally-induced differences in embryonic development throw light on the processes of normal mammalian development. Graduate students taking this course at the graduate level are given additional assignments.
Professor Trasler

†**177-622D TOPICS IN GENETICS REGULATION AND RECOMBINATION.** (Irregular schedule of seminars or conferences; Prerequisites: 177-274A or 202B, 177-301A, B; 177-310B recommended.) Investigation and discussion of recent advances in molecular genetics, including genetic regulation of protein synthesis, DNA-repair, recombination, etc., and their relevance to studies in higher organisms, including man. Graduate students are expected to collect up-to-date references for some of the topics.
Professor Kafer-Boothroyd

†**177-627A ECOSYSTEMS.** (2 hours lectures, 3 hours laboratory; Prerequisite: 177-305A; Not given in 1975-76, given 1976-77.) A comparative study of North American ecosystems including arctic tundra, grassland, and coniferous, deciduous, and tropical rain forests. Emphasis is given to functional attributes such as energy and nutrient flux, system regulation, productivity, and efficiency. Systems analysis and the relevance of these properties to management of individual ecosystems will be discussed. A special reading assignment will be required of graduate students.
Professor Auclair

†**177-629A PHYSIOLOGICAL PLANT ECOLOGY.** (2 hours lectures, 3 hours laboratory; Prerequisite: 177-305A.) A consideration of physiological responses and adaptations of plants to their environment. Contemporary approaches to the measurement and study of relevant physiological and micro-environmental parameters will also be presented. In addition to the regular requirements graduate students will carry out an independent research project.
Professor Oechel

†**177-632A LIMNOLOGY.** (2 hours lectures; Prerequisite: 177-305A.) A study of the physical, chemical and biological characteristics of fresh-water, with emphasis on the role of the plankton in the economy of lakes. Undergraduate students prepare one literature review while two are required of graduate students.
Professor Kalff

†**177-633A LIMNOLOGY LABORATORY.** (5 hours laboratory/field trip per week; Pre and Corequisites: 177-305A, 177-632A and permission of instructor.) A laboratory and field trip course on the physical, chemical and biological characteristics of lakes. This course is given in conjunction with Biology 177-632A; restricted enrolment. For additional graduate student requirements see Biology 177-632A.
Professor Kalff

†**177-642D BIOLOGICAL OCEANOGRAPHY.** An introduction to the physical and chemical factors of the marine environment, the ecological divisions of the ocean, history and methods of marine research. An ecological account of marine populations in relation to their physical and chemical environment; marine plankton and production processes, marine pollution. Additional

assignments will be required of graduate students.
Professors Dunbar, Lalli and Lewis

†**177-665B TOPICS IN PLANT BIOCHEMISTRY.** (3 hours; Lectures and discussion; Prerequisites: 177-201D; 177-303A, 507-352D recommended; Not given in 1975-76, given in 1976-77.) A review by lectures, seminars and discussion of important advances in recent years, e.g. molecular structures of macromolecules, biosynthetic processes, mechanisms of hormone action, metabolic regulation. Graduate students enrolled in this course will be expected to take more responsibility for discussion and review than undergraduates.
Professor MacLachlan

†**177-676B HUMAN BIOCHEMICAL GENETICS.** (3 hours lectures with some student participation; Prerequisites: 177-201D, 177-274A or 177-202B, 180-302A, 189-231A, B.) An up-to-date and comprehensive account of the biochemical aspects of human genetics, and relationship of this knowledge to broader questions including evolution, eugenics and treatment of genetic disease. Graduate students will be required to submit a hypothetical grant application.
Professors Gold, Pinsky and Scriver

†**177-680A TECHNIQUES IN ELECTRON MICROSCOPY.** (5 hours laboratory; Prerequisite: Permission of instructor.) An intensive course in the techniques of electron microscopy for students who intend to do research on cell ultrastructure.
Professor Gibbs

†**177-693D ADVANCES IN ANIMAL BEHAVIOUR.** (2 hours seminar; Prerequisite: Permission of instructor.) A senior course reviewing topics of current interest, ranging from the behaviour of lower invertebrages to social interactions of higher vertebrates. An independent contribution will be required of graduate students, either in the form of seminar or as a discussion leader on special topics.
Professors Madison and Lemon

†*Awaiting approval.*

COURSES GIVEN AT MACDONALD COLLEGE

Several of the following courses will be offered according to demand (consult staff).

177-670A CYTOLOGY. (2 hours and one laboratory period.) An intensive study of the cell with emphasis on the nucleus, nuclear division, chromosome morphology, chromosome aberrations, euploidy and aneuploidy, and chromosome behaviour in hybrids.
Professor W. Grant

177-671B CYTOGENETICS. A study of cytological and genetical topics at an advanced level including polyploidy, apomixis and parthenogenesis, chromosome and gene replication, sex determination, and karyotype analysis.
Professor W. Grant

177-672B MICROBIAL GENETICS. An analysis of recent progress in the genetics of microorganisms including viruses, bacteria, yeasts, paramecia, algae and fungi.
Professor W. Grant

177-673A MUTAGENESIS AND RADIATION BIOLOGY. A study of the nature of mutations and the genetic effects of radiation and chemical mutagens on plants and animals and in crop improvement.
Professor W. Grant

177-675B STATISTICAL METHODS IN GENETICS. A presentation and discussion of statistical methods of analysing genetic changes in populations of domestic animals and plants, with particular reference to pedigrees, heterosis, selection, etc.
Professor H. Tyson

B4 MARINE SCIENCES CENTRE

Graduate students will take such courses, including cognate courses in other departments, as are considered necessary for their training and for the development of their particular fields of specialization. All students are expected to take courses 395-442D, 395-660D, and 395-309A, or equivalent. Primary emphasis for both the M.Sc. and Ph.D. degrees is placed upon research and thesis presentation. The comprehensive examination for the Ph.D. candidates usually takes place at the end of the second year of study; it covers the whole field of marine science but allows for the specialized interests and training of each student in Botany, Zoology, Microbiology, Physics or Geology.

Students are accepted on the basis of first or second class honours degree in an appropriate subject, or high standing in general science; a qualifying year in addition to the minimum degree requirement may be necessary, at the discretion of the Chairman or Vice-Chairman.

The Marine Sciences Centre is inter-departmental in scope, emphasizing the essential inter-disciplinary nature of the science of Oceanography. Excellent laboratory and library facilities are available for research, and opportunities for field work exist in the Arctic, the estuary of the St. Lawrence river, the Gulf of St. Lawrence, the Canadian Eastern Seaboard, and at the Bellairs Research Institute at Barbados. The special research interests of the Centre include the physics of sea ice, the energy exchange between atmosphere and hydrosphere, marine climatology,

the dynamics of estuaries, marine bacteria, growth and life cycles of marine organisms, marine productivity, marine biogeography and sedimentation.

The Redpath Museum of McGill University offers teaching and research facilities in marine biology and keeps extensive plankton collections.

STAFF

Professors – M.J. DUNBAR *(Biology) (Chairman)*; E.R. POUNDER *(Physics) (Vice-Chairman)*; J.B. LEWIS *(Director, Redpath Museum)*; M.P. LANGLEBEN *(Physics)*
Associate Professors – B.F. D'ANGLEJAN; C.M. LALLI
Assistant Professors – R.G. INGRAM; F. SANDER *(Director, Bellairs Research Institute)*; D.C. MacLELLAN
Research Assistant – SUSAN WOODS
Associate Members – SVENN ORVIG *(Meteorology)*; M.E. GOLDSTEIN *(Biology)*; R.A. MACLEOD *(Microbiology)*; S.B. SAVAGE *(Civil Eng.)*; ROGER KNOWLES *(Microbiology)*; E.W. MOUNTJOY *(Geology)*; H.M. REISWIG *(Redpath Museum)*; R. HESSE *(Geology)*
Honorary Professor (part-time) – G. LAROCHE
Honorary Research Fellow – PAUL MONTREUIL *(Director, Montreal Aquarium)*

COURSES FOR HIGHER DEGREES

ADVANCED UNDERGRADUATE COURSES

177-442D BIOLOGICAL OCEANOGRAPHY. (3 hours lectures and labs.) Physical and chemical parameters of the environment and their influence on marine life; ecological divisions of the ocean; descriptions of marine life; plankton biology and biogeography; history and methods of marine research; ecology of benthic organisms; primary and secondary production in the ocean; marine fisheries; marine microbiology; pollution; migration.
Professors Lewis, Lalli and Dunbar

198-309A DESCRIPTIVE OCEANOGRAPHY. (3 hours.) Major physical and chemical properties of sea water; methods of measurements, space and time distribution. The geostrophic approximation and the dynamic method. General features of the oceanic circulation.
Professors d'Anglejan and Ingram

198-319B INTRODUCTION TO DYNAMICAL OCEANOGRAPHY. (3 hours.) Equations of motion. Geostrophy. Boundary layers. Horizontal wind-driven circulation. Waves and tides.
Professor Ingram

GRADUATE COURSES

395-636D ADVANCED ZOOLOGY OF THE MOLLUSCA AND CRUSTACEA. (3 hours.) Description of the marine Mollusca and Crustacea. Evolution, ecology and functional morphology. Feeding mechanisms, reproductive patterns and interactions with other marine organisms.
Professor Lalli

395-639A TROPICAL MARINE ECOLOGY. (2 hours lectures and labs.) The ecology of marine organisms and marine communities of tropical oceans.
Professor Lewis

395-645A WATER POLLUTION: BIOLOGICAL ASPECTS. (1 hour.) Aspects of freshwater and saltwater uses, with emphasis on marine environments, critical definitions of water quality, means of assessing water quality, the role and importance of biological responses in the identification and evaluation of water pollution, and a review of water treatment techniques, the biological impact of pollution on coastal areas, estuaries, rivers and lakes. Marine pollution is also discussed from the global point of view as a worldwide phenomenon.
Professor Laroche

395-660D SEMINAR IN GENERAL OCEANOGRAPHY. (2 hours.) Advanced seminar course on research in salt water environments, with emphasis on contemporary work. Discussion of the original literature, recent advances and basic theory.
Staff

395-691D ADVANCED MARINE ECOLOGY. (2 hour seminar.) Primary and secondary production; physiological ecology, population dynamics, distribution analysis, and diversity of marine organisms.
Professor Lalli

395-695A PHYSICS OF THE OCEAN. (3 hours.) General circulation on "Beta" plane, wind and thermally driven flows. Two layer models. Boundary currents.
Professor Ingram

395-696B SEMINAR COURSE IN PHYSICAL OCEANOGRAPHY. (2 hours.) Theoretical aspects of the general oceanic circulation.
Professor Ingram

395-697B MARINE GEOLOGY AND GEOCHEMISTRY. (3 hours.) Recent studies relating to the geophysics of the ocean basins and pelagic sedimentation. Geophysical observations and morphology of the ocean basins. Geochemistry of pelagic deposits in relation to terrigenous sources, life processes and sea water composition. Deep sea stratigraphy; methods of correlation; the sedimentary record.
Professor d'Anglejan

395-698B TOPICS IN OCEANOGRAPHY. (3 hours.) Interdisciplinary studies of selected topics, including: waves and tides, estuaries, short and

long term cycles, factors controlling the vertical distribution of organisms, particulate matter and sedimentation.
Staff

395-721D SEDIMENTS AND MARINE GEOLOGY.* (2 hour seminar lectures and assignments Classical and recent research concerning principles of sedimentation, sedimentary environments including deltas, tidal flats, continental shelf and slope, geosynclines, ocean basins, submarine canyons, ocean currents, turbidity currents, sediment geochemistry, reefs, ocean structure.
Professors d'Anglejan, Hesse and Mountjoy

B5 DEPARTMENT OF MICROBIOLOGY AND IMMUNOLOGY

STAFF

Professors — S.I. VAS *(Chairman)*; B.H. MATHESON; J.W. STEVENSON; W. YAPHE
Associate Professors — Z. ALI-KHAN; C.A. BUTAS; E.C.S. CHAN; P.M. COOKE; J. de VRIES; P. GILL; L. KAPICA; G.K. RICHARDS; H.G. ROBSON; R. SIBOO
Assistant Professors — A.F. DOSS; J. GORDON; V. GROH; R. HAND; E. MANKIEWICZ; L. MARTINEZ; J.L. MEAKINS; J. MENDELSON
Lecturer — S. NOMMIK
Demonstrator — C. SHAW
Teaching Assistants — D. CRISTEANU; L. THERRIEN
*Part-time.

REQUIREMENTS

Candidates are required to hold a B.Sc. degree with at least second class Honours or the equivalent in Microbiology and Immunology or the M.D. degree with high standing in Microbiology, Biochemistry and Pathology.

Those who do not meet the above qualifications may be required to take longer than normal to complete course requirements.

The clinical laboratory services in bacteriology, virology and mycology are available to candidates as a means of instruction and as a source of material for study.

REQUIREMENTS FOR THE M.Sc. DEGREE

The following requirements must be satisfied.

(1) Presentation of a satisfactory thesis.

(2) Attendance at courses 528-602D and 528-703D and presentation of at least two seminar topics during the year.

(3) Formal courses with examination where needed (528-501D, 528-525B, 528-527B — see below).

REQUIREMENTS FOR THE Ph.D. DEGREE

Following satisfactory completion of the work for the M.Sc. degree candidates may present themselves for examination for the Ph.D. degree after not less than two full years of research and the presentation of a satisfactory thesis. However, certain other requirements must also be fulfilled:

(a) Attendance at courses 528-702D and 528-703D with the presentation of at least two seminar topics each year.

(2) A comprehensive examination in Microbiology and Immunology (Course 528-701D) must be passed. It is held during the final year of study and at a time not later than six months before submission of the thesis.

COURSES FOR HIGHER DEGREES

ADVANCED UNDERGRADUATE COURSES

528-313B PARASITOLOGY.*

528-315B THE PATHOGENIC FUNGI.

528-421A SYSTEMATIC BACTERIOLOGY.

528-422A PATHOGENIC BACTERIA.

528-423A MICROBIAL PHYSIOLOGY.

528-424A FUNDAMENTAL VIROLOGY.

GRADUATE COURSES

528-501D ADVANCED MICROBIOLOGICAL TECHNIQUES.

528-525B PATHOGENIC VIRUSES.

528-527B INFECTIOUS IMMUNOLOGY.

528-601D COMPREHENSIVE EXAMINATION FOR M.Sc. CANDIDATES.

526-602D GRADUATE SEMINAR. M.Sc. LEVEL.

528-701D COMPREHENSIVE EXAMINATION FOR Ph.D. CANDIDATES.

526-702D GRADUATE SEMINAR. Ph.D. LEVEL. (Lectures and discussions once a week. All graduate students are required to participate.)

528-703D CURRENT TOPICS IN MICROBIOLOGY AND IMMUNOLOGY. (Discussion groups.)

B6 DEPARTMENT OF PHYSIOLOGY

ADMISSION

Students who have completed an Honours Program in Physiology or some other appropriate undergraduate program and who have been accepted by a research director and by the Department may register for the M.Sc. degree. After one year of study in the Department those M.Sc. students who display a high standard in research and course work may be permitted to proceed directly to the Ph.D. degree. Those students who do not enter the Ph.D. program at the end of M.Sc. 1 may be permitted to write an M.Sc. thesis. Students who obtain an M.Sc. degree may apply for entrance into the Ph.D. program.

COURSE REQUIREMENTS

Research Seminars – M.Sc. Students are required to give at least one seminar before submission of their thesis or before being permitted to enter a Ph.D. program. Ph.D. students are required to give a seminar at least once every two years. **Comprehensive Examination in Physiology** – required for the M.Sc. and/or the Ph.D. degree to show broad knowledge of Physiology and the capacity to integrate this knowledge at the intermediate level. **Other Course Work** – Students are usually expected to complete at least two of the Department's advanced or graduate courses in their first year. Other course requirements will depend on their field of study.

STAFF

Professors – J. MILIC-EMILI *(Chairman)*; R.I. BIRKS; T.M.S. CHANG; B.A. COOPER; J.H. DIRKS; P. GOLD; K. KRNJEVIC; F.C. MacINTOSH; G. MELVILL-JONES

Associate Professors – M.W. COHEN; D.R. FIRTH; W.S. LAPP; M. LEVY; G. MANDL; C. POLOSA; P. SEKELJ

Assistant Professors – M.M. FROJMOVIC; V. KLISSOURAS; P. KONGSHAVN; M. MACKEY; P. NOBLE; J.S. OUTERBRIDGE; A. WECHSLER; P. WELDON; R.L. WILLIAMS

Lecturer – M. HAZUCHA

Associate Members – R.F.P. CRONIN *(Prof. Medicine)*; B.O. DUBROVSKY *(Assist. Prof., Psychiatry)*; E. FALLEN *(Assist. Prof., Medicine)*; H.L. GOLDSMITH *(Prof., Exp. Medicine)*; C.A. GORESKY *(Prof., Medicine)*; P.T. MACKLEM *(Prof., Medicine)*; J.M. McKENZIE *(Prof., Exp. Medicine)*; M.M. MORRIS *(Assist. Prof., Anaesthesia)*; D.H. MOSCOVITCH *(Assist. Prof., Otoryngology)*; J.F. SEELY *(Assist. Prof., Exp. Medicine)*

COURSES FOR HIGHER DEGREES

All courses are half courses except for 552-507D which is a full course.

552-502A EXERCISE PHYSIOLOGY. Offered in conjunction with the Faculty of Education.
Professor Klissouras

552-507D ADVANCED APPLIED RESPIRATORY PHYSIOLOGY. Offered in conjunction with the Department of Experimental Medicine.
Professor Engel

552-508A ADVANCED RENAL PHYSIOLOGY. Offered in conjunction with the Department of Experimental Medicine.
Professors Dirks, Levy and Seely

552-512A PHYSICAL METHODS IN BIOLOGICAL RESEARCH. Offered in conjunction with the Department of Experimental Medicine.
Professors Murphy and Ross

552-513A CELLULAR IMMUNOLOGY. Offered in conjunction with the Department of Experimental Medicine.
Professors Lapp and Gold

552-514B IMMUNOLOGY SEMINARS. Offered in conjunction with the Department of Experimental Medicine.
Professors Lapp and Gold

552-515A PHYSIOLOGY OF BLOOD I. Offered in conjunction with the Department of Experimental Medicine.
Professor Cooper

552-516B PHYSIOLOGY OF BLOOD II. Offered in conjunction with the Department of Experimental Medicine.
Professor Cooper

552-517B PHYSIOLOGICAL SUPPORT SYSTEMS.
Professor Chang

552-605B DYNAMICS AND CONTROL IN PHYSIOLOGICAL SYSTEMS. Offered in conjunction with Biomedical Engineering.
Professor Outerbridge

552-606A ADVANCED APPLIED CARDIOVASCULAR PHYSIOLOGY. Offered in conjunction with the Department of Experimental Medicine.
Professors Fallen and Goldsmith

552-610B BIOPHYSICS.
Professor Mackey

552-631B SELECTED TOPICS IN APPLIED IMMUNOLOGY.
Professor Kongshavn

B7 DEPARTMENT OF PSYCHOLOGY

Graduate work in the Department of Psychology follows two main lines; experimental-theoretical and applied. Work in experimental-theoretical psychology leads to the M.A., M.Sc. and Ph.D. degrees in human experimental, physiological, personality, social, child, psycholinguistics, quantitative, and psychological research in relation to education. Work in applied psychology leads to the Ph.D. degree in clinical psychology, and the M.Sc. (Applied) degree program is offered in certain particular fields.

Facilities for advanced research in a variety of fields are available within the Department itself. In addition, arrangements with the Departments of Psychology at the Allan Memorial Institute, Montreal Children's Hospital, Queen Mary Veterans' Hospital, the Douglas Hospital, and Jewish General Hospital, permit graduate students to undertake research in the hospital setting.

For full information about all programs, financial aid, and for application forms, contact the Graduate Admissions Secretary, Department of Psychology, McGill University, P.O. Box 6070, Montreal, Canada H3C 3G1. Telephone 392-5742.

STAFF

Professors — D. BINDRA *(Chairman)*; D.G. DOEHRING; VIRGINIA DOUGLAS; G.A. FERGUSON; D.O. HEBB; R. KANUNGO; W.E. LAMBERT; R.B. MALMO; R. MELZACK; BRENDA MILNER; P.M. MILNER; E.G. POSER; M.S. RABINOVITCH; MURIEL STERN

Associate Professors — A.S. BREGMAN; M. CORBALLIS; D.C. DONDERI; J. MACNAMARA; A.A.J. MARLEY; R.O. PIHL; J.O. RAMSAY; T.R. SHULTZ; D. TAYLOR; G.R. TUCKER; N. WHITE; BLOSSOM WIGDOR; S. YULIS

Assistant Professors — FRANCES ABOUD; I.M. BINIK; SUSAN CAMPBELL; K. CLARK; M.S. CUMMINS; D. KUCH; J. MacDOUGALL; C. OLSON; W.E. PIPER; J. WRIGHT; A. ZOLOVICH

Sessional Lecturer — ERIKA GUTBRODT

Clinical Consultants — S. BENAROYA; N. GREENBERG; P. GREGOIRE; G. NEMETH; A. PUTTERMAN

REQUIREMENTS

Admission to graduate work will depend on an evaluation of the student's research interests and aptitude for original contributions to knowledge or for professional contributions in the applied field. The usual requirement for admission is an honours or major degree (B.A. or B.Sc.) in Psychology. This includes an introductory course plus six full courses (each equivalent to six semester hours). Experimental psychology, the theoretical development of modern ideas in psychology, and statistical methods as applied to psychological problems (equivalent to an introductory course) are essential. A knowledge of elementary physiology, physics or chemistry, and modern developments in other related biological or social sciences is desirable. An applicant who holds a Bachelor's degree but who has not met these usual requirements should consult a faculty member in his or her area of interest to determine which (if any) courses must be completed before the application can be considered. A student with insufficient preparation may qualify for graduate work by registering in the Faculty of Arts or the Faculty of Science, and following an appropriate course of study. Such registration requires the permission of the Department; the Department will not recommend the registration of qualifying students in the Faculty of Graduate Studies and Research.

NOTE: Applicants should submit to the Graduate Admissions Secretary by February 1: a completed application form, two copies of the personal academic background form, two copies of all university transcripts, two letters of recommendation, Miller Analogies and/or Graduate Record Examination scores, and a personal letter, outlining their experience, interests and objectives in psychology. Applicants should note that the deadline for many scholarships and fellowships is two to three months earlier than the February deadline.

REQUIREMENTS FOR M.A. AND M.Sc. DEGREES

Candidates must demonstrate a sound knowledge of modern theory, of its historical development, and of the logic of statistical methods as used in psychological experiments. They will be expected to have an understanding of the main lines of current work in other than their own particular field of specialization.

All candidates must take courses 204-650A, 204-651B and 204-660D and in addition any other course specified by the Department. The primary concern of the candidate, however, is his thesis. For this the exploratory work, at least, should get under way early in the year. A comprehensive written or oral examination will be held which, in conjunction with the thesis itself, will determine the candidate's final standing for the degree.

REQUIREMENTS FOR THE Ph.D. DEGREE

The candidate for the Ph.D. degree in the theoretical-experimental program must demonstrate a broad scholarship, mastery of

current theoretical issues in psychology and their historical development, and a detailed knowledge of his special field. Preliminary examinations will be held at two stages; one at the conclusion of the Master's year and one at the conclusion of the following year. These examinations may be written, or oral, or both, at the discretion of the Department. These examinations will include a general paper on modern theoretical issues and history, and a special paper on one of the following: comparative and physiological psychology, learning and perception, social psychology and personality, measurement, developmental psychology or any other appropriate area.

Candidates for the Ph.D. degree in clinical psychology must demonstrate a high standard of scholarship in psychology and aptitude for the professional application of psychological knowledge. The clinical program is designed primarily to train senior personnel for work in hospitals and clinics. A number of avenues of specialization are, however, possible. Some students may wish to prepare themselves for careers in university teaching or clinical research; others may have an interest in behaviour disorders in the fields of developmental or educational psychology. The time necessary to attain the degree is four years beyond the B.A. or B.Sc. degrees. No intermediate or terminal M.A. or M.Sc. degrees are awarded to students in the Ph.D. clinical program. All students are required to write a thesis and demonstrate research capabilities.

The Department of Psychology does not ordinarily require an examination in a foreign language.

COURSES AND SEMINARS FOR HIGHER DEGREES

204-454D LABORATORY METHODS IN PSYCHOBIOLOGY.

204-455D RESEARCH METHODS IN PSYCHOLINGUISTICS.

204-601D Reference number for comprehensive examination written by candidates for the M.A., M.Sc., or M.Sc. (Appl.) degree.

204-615D INTELLIGENCE AND PERSONALITY. (3 hours.)

204-630A PSYCHOPATHOLOGY. (1½ hours.)

***204-635D ADVANCED EDUCATIONAL PSYCHOLOGY.** (3 hours.)

204-640D DESIGNING, DEVELOPING AND EVALUATING INSTRUCTIONAL SYSTEMS. (3 hours.)

204-641D BEHAVIOUR DEVIATIONS. Appraisal and Modification. (3 hours.)

204-650A ADVANCED STATISTICS I. A course in advanced statistics with specialization in experimental design. (3 hours.)

204-651B ADVANCED STATISTICS II. A course in advanced statistics with specialization in regression techniques. (3 hours.)

204-660D PSYCHOLOGICAL THEORY. (3 hours.) Seminar designed as an introduction to more advanced graduate courses.

204-670D RESEARCH PROBLEMS IN CLINICAL PSYCHOLOGY. (1 hour.)

204-690D COMPUTERIZED LABORATORY METHODS IN PSYCHOLOGY. (3 hours.)

204-701D Reference number for comprehensive preliminary Ph.D. examinations.

204-702F SUMMER INTERNSHIP – JUNIOR.

204-703F SUMMER INTERNSHIP – SENIOR.

204-704D SPECIALIZED PRACTICUM.

204-705D Reference number for research project of M.Sc. (Appl.) students.

204-710D ADVANCED EXPERIMENTAL PSYCHOLOGY. (2 hours.)

204-711D ADVANCED EXPERIMENTAL PSYCHOLOGY. (2 hours.)

204-712D ADVANCED EXPERIMENTAL PSYCHOLOGY. (2 hours.)

204-715D COMPARATIVE AND PHYSIOLOGICAL PSYCHOLOGY. (2 hours.)

204-716D COMPARATIVE AND PHYSIOLOGICAL PSYCHOLOGY. (2 hours.)

204-717D COMPARATIVE AND PHYSIOLOGICAL PSYCHOLOGY. (2 hours.)

204-740D QUANTITATIVE METHODS IN PSYCHOLOGY. (2 hours.)

204-760D PROBLEMS OF LEARNING AND PERCEPTION. (3 hours.)

204-770D ADVANCED SEMINAR ON CLINICAL PROBLEMS. (2 hours.)

204-780D SPECIAL TOPICS IN CLINICAL PSYCHOLOGY. (2 hours.)

B8 WILDLIFE BIOLOGY

Qualified students interested in undertaking graduate studies in the area of Wildlife Biology should consult the Chairman, and/or Professor J.R. Bider, Department of Renewable Resources, Macdonald College. Special programs of study are available to such students.

McGill University

C1 DEPARTMENT OF ART HISTORY

STAFF

Professors — W.O. JUDKINS *(Chairman);* GEORGE GALAVARIS *(Director of Graduate Studies)*

Associate Professors — ROSEMARIE BERGMANN; R.N. BERTOS

Assistant Professor — T. GLEN; R. WINDSOR LISCOMBE

REQUIREMENTS

ADMISSION

For admission to the M.A. or Ph.D. programs, candidates are normally expected to have a B.A. degree with Honours, either in Art History alone or in Art History and one other related subject — or the equivalent, i.e. one-third to one-half of the candidate's undergraduate courses in an integrated program, passed with appropriate standing. For candidates from institutions not offering such undergraduate programs, provision is made for preliminary studies qualifying the candidate for admission to graduate work. Courses in studio practice do not count. Please see, also, the language requirements given under the degree programs below. Applications and supporting documents should be submitted by January 31.

REQUIREMENTS FOR THE M.A. DEGREE

1) Ten half-courses approved by the Department, six in the first graduate year.
2) Written *general* examination on the History of Art.
3) Oral examination on one of the following five fields to which the proposed thesis topic belongs: Ancient, Mediaeval, Renaissance, Baroque — to 1750, Modern — from 1750.
4) Thesis on a topic approved by the Department from the candidate's chosen field of specialization.

Language requirements for the M.A. degree: reading knowledge of English and French and a minimum of one additional approved classical or modern language, before admission to the second year of the M.A. program.

REQUIREMENTS FOR THE Ph.D. DEGREE

Normally, the first year of the Ph.D. program will be spent fulfilling the first-year requirements of the M.A. degree. In appropriate cases the Department may, at the end of the first year, advise the student to bypass the M.A., enter the second year of the Ph.D. program and proceed to the Ph.D. qualifying examinations consisting of, 1) a written *comprehensive* examination on the History of Art, and 2) an oral examination on one of the following five fields of specialization chosen by the candidate: Ancient, Mediaeval, Renaissance, Baroque — to 1750, Modern — from 1750. These are normally taken at the end of the second year.

The candidate may be permitted or advised to spend one of the three resident years required by Graduate Faculty regulation at another approved university.

Only with the permission of the Department can those holding the M.A. degree proceed to the Ph.D. qualifying examinations, and those who have passed the Ph.D. qualifying examinations, or their equivalent, proceed to the doctorate.

Language requirements for the Ph.D. degree: reading knowledge of three modern languages and at least one classical language, approved by the Department.

The requirements for the Ph.D. degree are fulfilled with the completion of the dissertation and its successful oral defence. The Department is prepared to direct dissertations in the following fields: Ancient, Byzantine, Mediaeval, Renaissance (Italian and Northern) and others, by special arrangement, wherein adequate supervision and resources can be provided.

COURSES FOR HIGHER DEGREES

GRADUATE COURSES

Lists of the courses being offered in the session under consideration are available from the Department on request.

123-611A or B GREEK AND ROMAN ARCHAEOLOGY.

123-612A or B MEDIAEVAL ART AND ARCHAEOLOGY.

123-613A or B ART OF THE ITALIAN RENAISSANCE.

123-614A or B NORTHERN RENAISSANCE ART.

123-615A or B BAROQUE ART AND ARCHITECTURE.

123-616A or B 19TH CENTURY PAINTING AND SCULPTURE.

123-617A or B CONTEMPORARY ART AND CRITICISM.

123-618A or B RENAISSANCE AND POST-RENAISSANCE STUDIES I.
123-619A or B RENAISSANCE AND POST-RENAISSANCE STUDIES II.

123-621A or B STUDIES IN GREEK AND ROMAN SCULPTURE.

123-622A or B SEMINAR IN THE ART OF BYZANTIUM.

123-623A or B PROBLEMS IN WESTERN MEDIAEVAL ARCHITECTURE AND SCULPTURE.

123-624A or B STUDIES IN MANUSCRIPT ILLUMINATION.

123-631A or B ARTISTIC THEORY IN THE RENAISSANCE.

123-632A or B GREEK MYTHOLOGY IN ITALIAN RENAISSANCE ART.

123-633A or B STUDIES IN THE GRAPHIC ARTS.

123-634A or B RESEARCH IN MODERN ARCHITECTURE: – 1750 TO THE PRESENT.

123-635A or B SEMINAR IN URBAN PLANNING AND TOPOGRAPHY.

123-636A or B STUDIES OF DRAWINGS.

123-637A or B PROBLEMS IN THE HISTORY OF TASTE AND CRITICISM.

FOURTH YEAR UNDERGRADUATE (FULL) COURSES FOR WHICH GRADUATE CREDIT IS GIVEN

123-413D WESTERN MEDIAEVAL PAINTING.

123-430D EVOLVING CONCEPTS OF THE DISCIPLINE OF ART HISTORY.

123-440D THE VISUAL LANGUAGE OF ARTISTIC EXPRESSION.

C2 DEPARTMENT OF CLASSICS

NOTE: For detailed information concerning the M.A. and Ph.D. Degrees in Classics, please inquire of the Department of Classics.

STAFF

Professors – C.D. GORDON; P.F. McCULLAGH; ALBERT SCHACHTER *(On leave)*
Associate Professors – ANNA FARMAKIDES; J.M. FOSSEY; M.J. SILVERTHORNE; P.V. TOMASZUK; PAOLO VIVANGE; G.M. WOLOCH
Assistant Professor – G.L. SNIDER *(Chairman)*

GRADUATE COURSES IN CLASSICS

A limited number of courses and seminars is offered each year. Course content is, generally speaking, fitted to the requirements of individual students.

Numbering System for Courses

The second digit after the dash (–) signifies the content of the courses:

1 – Greek Poetry, 2 – Greek Prose, 3 – Latin Poetry, 4 – Latin Prose, 5 – Non-literary, 6 – Non-literary, 7 – Reading Course, 8 – Reading Course.

The third digit signifies the session in which the course is offered, viz. 5 signifies 1975-76.

The following numbers have been reserved for 1975-76. From them the courses to be given in 1975-76 will be chosen. Note that the numbers of courses which are actually given will be followed by the letters A, B, or D, depending on whether they are half or full courses.

114-615 and 715 GREEK POETRY (e.g. drama, lyric).

114-625 and 725 GREEK PROSE (e.g. historians, orators, philosophers).

114-635 and 735 LATIN POETRY (e.g. drama, elegy, epic).

114-645 and 745 LATIN PROSE (e.g. historians, orators, philosophers).

114-655 and 755 NON-LITARY SUBJECTS (e.g. archaeology, epigraphy, history, religion, philosophy).

114-665 and 765 NON-LITERARY SUBJECTS (e.g. archaeology, epigraphy, history, religion, philosophy).

114-675 and 775 INTENSIVE READING COURSES.

114-685 and 785 INTENSIVE READING COURSES.

In addition, certain courses listed in the Undergraduate Calendar of the Faculty of Arts may be taken by graduate students, with the permission of the Department.

C3 DEPARTMENT OF ENGLISH

STAFF

Professors – PETER BUITENHUIS: C.D. CECIL; L. DUDEK; *(on leave);* JOYCE HEMLOW *(part-time);* ALAN HEUSER; ALEC LUCAS;

HUGH MacLENNAN; A.E. MALLOCH (on leave); H.A. McPHERSON *(on leave)*

Associate Professors — BHARATI BLAISE; MICHAEL BRISTOL; MARGARET BRUCE; DESMOND COLE; D.C. FRYE; IRWIN GOPNIK; SLAVA KLIMA *(on leave);* P.H. OHLIN; *(Chairman);* P.H. PIEHLER; MARTIN PUHVEL; RONALD REICHERTZ; JOHN RIPLEY *(on leave);* BRIAN ROBINSON; JOSEPH RONSLEY *(on leave);* DARKO SUVIN; B.F. WEEMS III; W.C. WEES

Assistant Professors — H. ANDERSON; W.T. BOOTH *(Assistant to the Chairman);* D.F. BOUCHARD; ABBOTT CONWAY; M. DAVISON; M. DORSINVILLE; L.T. DUER; L.T. ELLIOTT; A. GOLDBERG; C.A.E. HEPPNER; W.P. HILLGARTNER; LEANORE LIEBLEIN; Y. LINDEMAN *(on leave);* D.S. RUBIN *(on leave);* MARC SIMON *(on leave);* ROBERT TEMBECK; DAVID WILLIAMS

Special Lecturer — J. LANGUIRAND

REQUIREMENTS

APPLICATIONS

Letters of recommendation are required of *all* applicants. Applications close March 31, 1976. Completed applications and supporting material for persons seeking Teaching Fellowships should reach the Department by January 31, 1976.

THE M.A. DEGREE

Candidates admitted from an Honours program in English (or an equivalent) may complete the degree in one year. Persons with insufficient English courses may apply for a Qualifying year. Further information may be obtained from the departmental office.

THE Ph.D. DEGREE

The number of entrants to the doctoral program is severely limited. Highly qualified applicants are admitted to the first year from an Honours Program in English (or its equivalent). Qualified applicants who have already completed a Master's degree in English are admitted to the second year of the program. Two years are normally devoted to preparation of a comprehensive examination, and a third year to research. The language requirement must be fulfilled before comprehensives may be undertaken.

It is the policy of the Department to urge candidates to complete the Ph.D. program within four years. A candidate intending to submit the thesis to meet the deadline for Spring Convocation must give notice of this intention before January 1. A candidate intending to meet the deadline for Autumn Convocation must give such notice before May 1. A detailed description of the program may be obtained from the departmental office; see also section 3 of the Faculty regulations.

COURSES FOR HIGHER DEGREES

The following is a list of courses offered on a rotational basis. A list of courses to be given in 1975/76 will be available from the departmental office.

120-447D CROSSCURRENTS IN 18TH CENTURY ENGLISH AND EUROPEAN LITERATURES. (Prerequisite: A reading knowledge of French).

For 500 level courses, please see the Undergraduate Announcement.

110-602A BIBLIOGRAPHY.

110-603B PREPARATORY STUDIES. *In 1975-76, the M.A. THESIS.*

110-604A OLD ENGLISH LANGUAGE AND PROSE LITERATURE. Prose included in Sweet, *Anglo-Saxon Reader.*

110-605B OLD ENGLISH HEROIC POETRY. Emphasis on *Beowulf* (ed. Klaeber). Open to students who have taken English 120-604A, or its equivalent elsewhere.

110-606A INTRODUCTION TO MIDDLE ENGLISH LITERATURE.

110-608A CHAUCER. *The Canterbury Tales.*

110-609B CHAUCER. *Troilus and Criseyde,* and other poems.

110-610A DEVOTIONAL LITERATURE.

110-611D LITERARY CRITICISM.

110-612D THE TRANSITION FROM THE MIDDLE AGES TO THE RENAISSANCE.

110-615D SHAKESPEARE.

110-616D ELIZABETHAN AND JACOBEAN DRAMA.

110-640D THE AMERICAN NOVEL.

110-650D 19TH CENTURY THOUGHT.

110-660D STUDIES IN SCIENCE FICTION.

110-661A SEMINAR.

110-665A STUDIES IN AMERICAN LITERATURE AND INTELLECTUAL HISTORY.

110-670D COMPARATIVE LITERARY STUDIES.

110-671A DESIGNING EFFECTIVE COMMUNICATION.

110-680D CANADIAN LITARATURE.

110-687D INTERMEDIATE RESEARCH SEMINAR.

110-688B STUDIES IN DRAMATIC FORM: An Analysis of Theatrical Production.

110-689D INTERMEDIATE RESEARCH SEMINAR.

110-690D INTRODUCTORY SEMINAR OF SPECIAL STUDIES.

110-706B MIDDLE ENGLISH LITERATURE. *Gawain and the Green Knight* (ed. Tolkien and Gordon) and *Pearl* (ed. Gordon).

110-707A THE ARTHURIAN LEGEND.

110-708B ALLEGORY: STUDIES IN A LITERARY MODE.

110-710D RENAISSANCE STUDIES.

110-712A MARLOWE AND ELIZABETHAN TRAGEDY.

110-714A SPENSER AND 16TH CENTURY POETRY.

110-716A SPECIAL STUDIES IN SHAKESPEARE.

110-718B BEN JONSON AND JACOBEAN COMEDY.

110-722D MILTON.

110-724B COMEDY.

110-726A DEFOE AND SWIFT: NARRATIVE PROSE.

110-727B POPE AND THE AUGUSTAN AGE.
110-728A JOHNSON AND HIS CIRCLE: THE LATER 18TH CENTURY.

110-730A WORDSWORTH AND COLERIDGE: ROMANTIC THEORY AND POETRY.

110-731D 19TH CENTURY STUDIES.

110-732A ARNOLD: POETRY AND CRITICISM.

110-733B THE VICTORIAN NOVEL.

110-734A HENRY JAMES: STUDIES IN FICTION.

110-735D SPECIAL STUDIES IN CRITICISM.

110-736D HOPKINS, YEATS, AND ELIOT: MODERN BRITISH POETRY.

110-737A MODERN AMERICAN DRAMA

110-740D STUDIES IN SYMBOLISM.

110-746A THE 19TH CENTURY.

110-756D DRAMA OF THE 20TH CENTURY.

110-757A MODERN DRAMA.

110-760A JAMES JOYCE AND HIS MILIEU.

110-761D 20TH CENTURY NOVELISTS.

110-765D THEORY AND PRACTICE OF TRANSLATION.

110-770D STUDIES IN AMERICAN LITERATURE.

110-775D RECENT AMERICAN AND CANADIAN LITERATURE.

110-776A FILM THEORY.

110-780D ANALOGY AND METAPHOR: STUDIES IN LITERARY FORMS.

110-781D STUDIES IN COMMUNICATIONS.

110-784D LANGUAGE, LINGUISTICS AND LITERATURE.

110-785A STUDIES IN LITERARY THEORY.

110-786D ADVANCED RESEARCH SEMINAR.

110-787D ADVANCED RESEARCH SEMINAR.

110-788B STUDIES IN DRAMATIC FORM: An Approach to the Semiotics of Dramatic Performance, with special reference to the work of Bertholdt Brecht.

110-789D ADVANCED SEMINAR OF SPECIAL STUDIES.

COURSES RESTRICTED TO Ph.D. CANDIDATES

110-701D DOCTORAL COMPREHENSIVE EXAMINATION.

110-702D EDITORIAL AND TEXTUAL STUDIES.

110-703D GENRE STUDIES.

110-704D THEMATIC STUDIES.

110-705D PERIOD STUDIES.

110-745D INTRODUCTORY SEMINAR FOR Ph.D. STUDENTS.

COMMUNICATIONS STUDIES

Inquiries and applications should be addressed to Professor Hugo McPherson.

C4 DEPARTMENTS OF FRENCH LANGUAGE AND LITERATURE

STAFF

Professors — G.-P. COLLET; J. ETHIER-BLAIS *(on leave);* J.E.L. LAUNAY

JONES; RUSSELL G. McGILLIVRAY; J.-C. MORISOT; M. RABOTIN; D.W. STEEDMAN; J. TERRASSE; L.C. VAN DELFT; ROBERT VIGNEAULT

Assistant Professors — J.-P. BOUCHER; ISIDA CREMONA; J.-C. LEMYZE *(on leave);* A.

MAUGEY; G. PASCAL; F. RICARD; Y. RIVARD; ANDRE SMITH; IRENE STAROSTA; A. TICHOUX

REQUIREMENTS

ADMISSION

The Qualifying Year

Promising candidates with gaps in their previous preparation may be admitted to a *Qualifying Year* designed to bring them up to the desired level of competence. Successful completion of a Qualifying Year will secure admission into the M.A. course held in the session following such completion. Only full-time students are admitted to a Qualifying Year.

Graduate Record Examination

All applicants for admission to the Department originating from a College or University in the U.S. must submit *Graduate Record Examination scores.* Applications will not be examined unless this additional information is supplied.

English Requirement

All M.A. and Ph.D. candidates must submit evidence of competence in English, or take a Department test in that language.

REQUIREMENTS FOR THE M.A. DEGREE

All full-time M.A. students registering for the first time in September 1975 will take 4 full approved courses (or their equivalent).

Degree requirements will be met *in toto* through the submission of a thesis on a topic approved by the Department and researched under the direction of a departmental thesis director. Faculty regulations allow such candidates three years, after completion of their course work, for submission of their thesis. While the thesis is in preparation, candidates must register for each session in September both with the Department and with the Faculty.

Candidates may be admitted to the M.A. course as full-time or half-time students, with appropriate adjustment of fees.

Regulations for the M.A. Degree Taken in the French Summer School

All work carried on towards an M.A. degree in the French Summer School is under the control and supervision of the Department of French in the Faculty of Graduate Studies of the University. For detailed information about courses and regulations, please refer to current *French Summer School Announcement.*

REQUIREMENTS FOR THE Ph.D. DEGREE

Minimum admission requirement for the Ph.D. course is a first degree equivalent to a McGill B.A. degree with Honours in French. Applicants should submit to the Department in good time transcripts of college grades and Graduate Record Examination, evidence of their competence in oral and written French, and letters of recommendation.

The program consists of a minimum of three years' work, together with a thesis. A candidate registering in 1975 will normally satisfy the requirement for the first year by taking four full courses, or its equivalent. Completion of that program will allow students unable to proceed to the Ph.D. degree to obtain the M.A. degree subsequently.

Candidates holding an M.A. degree in French from a recognized University may be admitted to second year. In that year a student is expected to take four approved graduate courses, or its equivalent.

The Preliminary Examination is normally taken in the third year. Candidates are not permitted to sit that examination before they have passed competence tests in French language, one or two approved foreign languages and, eventually, English. Departmental requirements of special concern to Ph.D. students are obtainable from the departmental Secretariat.

After passing their preliminary examinations, candidates are allowed five years to submit a satisfactory thesis, on a subject approved by the Department and prepared under the direction of a member of the departmental staff. After the thesis has been approved by Faculty appointed examiners, an oral defence must take place in Montreal.

C5 DEPARTMENT OF GERMAN

STAFF

Professor – A. ARNOLD

Associate Professors – M. BIRCHER; V.R. BLOCK; E. GALLATI; T. GOLDSMITH-REBER; A. HSIA; H.J. MAITRE; H. RICHTER; J. SCHMIDT; I. SCHUSTER

Visiting Professor – M. DURZAK

REQUIREMENTS

In order to be admitted to graduate work in German the candidate must have a B.A. degree with Honours or Joint Honours in German from McGill University, or hold an equivalent degree from another college or university of recognized standing, or have completed a course of studies of equivalent value at such an institution.

Candidates who do not possess these prerequisites may, with special permission, enter the department as qualifying students for the purpose of completing these preliminary studies. In order to be admitted to graduate work in German, the candidate must have

a) considerable fluency in German (all lectures are in German),
b) a good knowledge of German literature from the Baroque period to the 20th century,
c) a good knowledge of the History of the German Language. Students may satisfy this requirement by completing German 129-500A, 129-501B and/or 129-510A, 129-511B during their first graduate year at McGill.

Graduate students holding a Teaching Assistantship or who are otherwise employed will normally not be allowed to take more than four half courses a year. Teaching Assistants are required to attend a seminar on Teaching Methods. If a student's knowledge of English is adjudged inadequate, he may be required to attend an approved course in that language. All graduate students are required to attend, each session, the staff-student colloquium on special problems.

REQUIREMENTS FOR THE M.A. DEGREE

At least the equivalent of four full courses must be taken. Students are encouraged to complete one quarter of their course load in another discipline.

Students are not, as a rule, able to earn the M.A. degree in less than two years. They are expected to begin work on their thesis after the end of the first session. The thesis should be roughly 80 to 100 pages in length, should reveal ability to organize the material under discussion,

and should be succinct and relevant. After the session in which they complete their course work, students are required to pass a comprehensive examination.

REQUIREMENTS FOR THE Ph.D. DEGREE

After completing the B.A. degree with Honours or the equivalent, a student has normally to take the equivalent of eight full courses. After completing the M.A. degree or its equivalent, a student must take at least the equivalent of four full courses. Students are encouraged to complete one quarter of their course load in another discipline.

After the session in which a candidate completes his course work, he will be required to pass a comprehensive examination. Candidates will be required to pass a reading test in one language other than English and German. Usually this language is French, but for those specializing in German Literature before 1600 the test may be in Latin.

Original research leading to new insights is a prerequisite for the acceptance of a Ph.D. thesis. After acceptance of the thesis, the candidate has to defend his thesis before a committee.

As a rule, it will take a candidate at least four years after the B.A. degree to complete the requirements for the Ph.D. degree. Students who have not spent an appreciable length of time in a German speaking country are advised to spend one year at a university in such a country, for which credit may be given in the above program.

COURSES FOR HIGHER DEGREES

Courses are normally given in the form of seminars, and may be rated as full or half courses. Each year, the Department publishes a list of those offerings which will be available in the ensuing session. These lists are available from the departmental Secretary or from the Graduate Faculty office, normally in the month of May.

Each year the Department offers courses in some of the following areas:

129-605-09, 705-09A, B MEDIAEVAL GERMAN LITERATURE.

129-61014, 710-14A, B GERMAN LITERATURE IN THE AGE OF THE RENAISSANCE AND THE REFORMATION.

129-615-19, 715-19A, B GERMAN LITERATURE OF THE BAROQUE AND ROCOCO.

129-620-24, 720-24A, B GERMAN LITERATURE OF THE ENLIGHTENMENT.

129-625-29, 725-29A, B GERMAN LITERATURE OF THE STURM AND DRANG PERIOD.

129-630-34, 730-34A, B GERMAN CLASSICISM.

129-635-39, 735-39A, B GERMAN ROMANTICISM.

129-640-44, 740-44A, B GERMAN REALISM AND EARLY NATURALISM.

129-645-49, 745-49A, B GERMAN LITERATURE IN THE 20TH CENTURY.

129-650-54, 750-54A, B GERMAN LINGUISTICS AND PHILOLOGY.

129-655-59, 755-59A, B LITERARY THEORY AND CRITICISM.

129-660-64, 760-64A, B COMPARATIVE LITERATURE STUDIES.

129-665-69, 765-69A, B SEMINAR ON TEACHING METHODS.

129-670-74, 770-74A, B STAFF-STUDENT SEMINAR ON LITERARY PROBLEMS.

129-675A, B RESEARCH SEMINAR.

Ph.D. LANGUAGE TESTS

For Ph.D. candidates who are required to pass a reading test in German the following course is offered.

129-004D GERMAN. READING COURSE. (2 hours; *Text:* H. Jannach; *German for Reading Knowledge*, 2nd edition. Van – Nostrand – Reinhold Co.) Method and Practice of Translation. This course is intended for students preparing to fulfil the language requirement for the Ph.D. degree.
Professor Block

C6 DEPARTMENT OF HISPANIC STUDIES

STAFF

Professor – S. LIPP *(Chairman)*
Associate Professors – M. AMASUNO; M. HARVEY; N. MARTINEZ; A. MICHALSKI; V. OUIMETTE; J. SANCHEZ; V. UGALDE-CUESTA

REQUIREMENTS FOR THE M.A. DEGREE

In order to be admitted to graduate work in Spanish, the candidate must fulfil the following prerequisites:

a) Candidates must possess a B.A. degree with Honours or in certain cases Joint Honours in Spanish from McGill University, or an equivalent

degree from another college or university of recognized standing.

b) Candidates who do not possess the above prerequisites may, with special permission, enter the Department as qualifying students for the purpose of completing these preliminary studies.

Graduate students holding a Teaching Assistantship or who are otherwise employed will normally not be allowed to take more than two full courses a year. If a student's knowledge of English is deemed inadequate, he may be required to attend an approved course in that language.

Candidates must take the equivalent of four full courses. It is strongly recommended that the half course on Methods of Literary Analysis, be taken in the first year. The other courses may be spread over a period of not more than two years.

Within six months after completion of course work, candidates will normally be expected to pass a comprehensive examination, after which they will present a thesis of 80 to 100 pages. (See *Faculty Regulations* for deadlines).

COURSES FOR THE M.A. DEGREE

144-600D M.A. COMPREHENSIVE EXAMINATION.

144-602A METHODS OF LITERARY ANALYSIS.
Professor Martinez

144-613B PROBLEMS IN SPANISH MORPHOLOGY.
Professor Amasuno

144-621A *La Celestina.*
Professor Amasuno

144-633B QUEVEDO.
Professor Ugalde

144-652A ROMANTIC DRAMA – SPAIN.
Professor Harvey

144-664A THE DICTATORSHIP AND THE SECOND REPUBLIC IN LITERATURE.
Professor Ouimette

144-681A MARTI.
Professor Sanchez

144-682B EL INDIO EN LA LITERATURA HISPANOAMERICANA.
Professor Sanchez

144-694B THE NOVEL OF THE MEXICAN REVOLUTION.
Professor Lipp

144-697A, B READING COURSE.

144-698A, B READING COURSE.

144-699A, B READING COURSE.

144-790D Ph.D. LANGUAGE REQUIREMENT.
(For students in other departments).

*Qualified students wishing to pursue their studies towards a Ph.D. in Spanish should consult the chairman of the Department.

C7 INSTITUTE OF ISLAMIC STUDIES

The institute offers courses, and undertakes to direct research in preparation for the M.A. and Ph.D. degrees in Islamic Studies. Two years of resident study are normally required for the M.A. degree, five for the Ph.D. degree.

The Institute is concerned with the faith of Muslims, and with the Islamic tradition involving the society and the civilization to which it gave rise and to which it is currently related. The Institute's special emphasis is on the faith as a contemporary and living force; and on the major change through which the civilization and society are currently going. It would seek such understanding as will enable outsiders to observe those changes intelligently, Muslims to participate in them intelligently, and both to communicate.

From September 1975, a joint cooperative program will become effective between the Duncan Black Macdonald Center for the Study of Islam and Christian-Muslim Relations of the Hartford Seminary Foundation, and the Institute of Islamic Studies. The program will be conducted on the McGill campus. Three faculty members from the Hartford Seminary Foundation will join the staff of the Institute.

Candidates for degrees in Islamic Studies may, with the consent of those departments, be permitted or required to take relevant courses offered by the Departments of History, Economics and Political Science, Philosophy, Comparative Religion, etc. In special cases these departments also recognize participation in relevant courses offered by the Institute as contributing to their own advanced degrees. Such participation by students from other departments is welcomed by the Institute.

The Institute stresses competence in language. At the master's level, one Islamic language is required, normally Arabic. For doctorate work, all students, Muslim and Western must have a reading knowledge of *either* French or German, preferably both (for access to Western scholarship on Islam) *and* two Islamic languages, of which one will normally be Arabic.

STAFF

Professors – C.J. ADAMS *(Director);* AHMAD ABU-HAKIMA; NIYAZI BERKES; WILLEM A. BIJLEFELD; TOSHIHIKO IZUTSU; DONALD P. LITTLE *(Assistant Director)*

Associate Professors – ISSA J. BOULLATA; WADI HADDAD *(on leave)*; HERMANN LANDOLT; RICHARD N. VERDERY

Research Associate – MEHDI MUHAQQIQ

Librarian – MUZAFFAR ALI

Specialist Librarians – JERZY GUTKOWSKI; JAN WERYHO

COURSES FOR HIGHER DEGREES

397-602D SURVEY OF ISLAMIC PHILOSOPHY. (3 hours). A history of the attempts of Muslim thinkers to adapt Greek philosophy to Islamic revelation; study of the Translation Movement, the Mu'tazila, and the rise of Kalam; readings in al-Kindi, al-Farabi, Ibn Sina, Ibn Rushd, al-Razi, and other important Muslim philosophers.
Professor Izutsu

397-603B INTRODUCTION TO RESEARCH MATERIALS FOR ISLAMIC STUDIES. (1 hour). A practical introduction to the materials academically available for these studies. Some preliminary discussion of research methods, of the preparation of reports and essays; documentation; transliteration. Particular attention is given to the special reference books and serials used in the field.
Mr. Ali

397-604D INTRODUCTION TO THE ISLAMIC TRADITION. (3 hours). A course to introduce the uninitiated student to major aspects of the Islamic tradition: Jahiliyah times, the Prophet, Qur'an, Hadith, Kalam, Shari'ah, Falsafah, Tasawwuf, Shi'ah and the sects, Institutions, and Modern Developments. Emphasis is given to the principal Islamic and Western sources in each of these areas.
Professor Adams

397-605D ARABIC LITERATURE: A.D. c500-1970s. (3 hours). A survey of the literature of the Arabs in pre-Islamic times with special emphasis on the *mu'allagat*. Developments following the rise of Islam and its influence on literary production in prose and poetry, emphasizing selected poets and writers and considering new themes, genres, and thought in the Umayyad and the 'Abbasid periods. A condensed treatment of Arabic literature between the fall of Baghdad in 1258 and the Napoleonic war in the Middle East, and a more detailed study of the Arab literary renaissance in the nineteenth century and the development of fiction, drama, and poetry in the twentieth century. No knowledge of Arabic is required for this course. Use will be made of available English translations.

397-610D HISTORY OF ISLAMIC CIVILIZATION: THE CLASSICAL PERIOD. (3 hours). The origins of the early Islamic state in Arabia and the Umawi Caliphate. The growth of an Islamic civilization, and the 'Abbasi Empire until the Seljuk period. The rise of the Fatimis. The Caliphate of Cordoba.
Professors Little and Verdery

***397-611D HISTORY OF ISLAMIC CIVILIZATION: THE MEDIAEVAL PERIOD.** (3 hours). The Seljuks, and the mediaeval synthesis. The Moors in Spain and North Africa. The Crusades. The Mongols and the destruction of the Baghdad Caliphate. The Mamluk, Persian, Turkish and Indian Empires until 1700.
Professor Little

397-614D THE HISTORY OF ISLAMIC INDIA. The Arabs in India; the establishment of the Delhi Sultanate; the interaction of Islam and Hinduism. The Mughals: political history; social, intellectual, and religious trends. The fall of the Mughals and the end of Muslim rule in India.

397-621D INTRODUCTORY ARABIC.

397-622D LOWER INTERMEDIATE ARABIC.

397-623D HIGHER INTERMEDIATE ARABIC.

397-625D ADVANCED ARABIC. (3 hours). Critical reading of texts in a particular field; for example, readings in the historians, with Professor Little; or in the theologians, in connection with Islamics 702 below, or the legists, in connection with Islamics 706. As the content may vary, this course may be repeated for credit.

397-631D INTRODUCTORY TURKISH.

397-632D LOWER INTERMEDIATE TURKISH.

397-633D HIGHER INTERMEDIATE TURKISH.

397-634D ADVANCED TURKISH. (This course will normally be related to Islamics 722 below; Prerequisite: Islamics 397-622D or 397-641D).

397-641D INTRODUCTORY PERSIAN.

397-642D LOWER INTERMEDIATE PERSIAN.

397-643D HIGHER INTERMEDIATE PERSIAN.

397-644D ADVANCED PERSIAN. (Prerequisite: Islamics 397-622D).

397-651D INTRODUCTORY URDU.

397-652D LOWER INTERMEDIATE URDU.

397-653D HIGHER INTERMEDIATE URDU.

397-654D ADVANCED URDU. (Prerequisite: Islamics 397-622D or 397-641D).

397-670D ISLAMIC ART AND ARCHITECTURE. Study of the development of Islamic art and architecture as related to the principles of Islam as a religion and regional traditions.

397-700D Ph.D. PRELIMINARY EXAMINATION IN ISLAMICS. RESEARCH SEMINAR. For all students writing theses and of all others engaged in research. (Seminar 2 hours).
Professor Adams and Staff

Several of the following seminars will be given each year.

397-702D ISLAMIC THEOLOGY: SEMINAR ON A SPECIAL QUESTION. (2 hours). The problem considered will vary from year to year. The course may, therefore, be repeated for credit.
Professor Izutsu

397-703D READING IN CLASSICAL ARABIC PHILOSOPHERS. (Seminar 2 hours). Consideration of the development of philosophic thought among the Muslims, and its relation to the

late Greek background; with special reference to Ibn Sina (Avicenna). Some of his writings, especially the *Kitab al-Najat,* or al-Ghazzali's *Tahafut*, will be read in Arabic. The prose of *falsafah* in classical Islamic culture and thought.
Professor Izutsu

*397-704D **ISLAMIC THEOLOGY.** (Seminar, 2 hours). A study of significant aspects of the Muslims' attempt to give intellectual to their faith in different periods in the past.
Professor Izutsu

397-705D THE SOCIAL INSTITUTIONS OF ISLAM. I. Government and State. (Seminar 2 hours). A survey of the evolution of the various patterns and concrete manifestations of Muslim political theory and practice through the classical and mediaeval periods of Islamic history. The rise of modern states and political problems in various Muslim countries.
Professor Berkes

*397-706D **THE SOCIAL INSTITUTIONS OF ISLAM.** II. Law. (Seminar 2 hours). The role of law in Islamic thought and society, considered historically in terms of its theological, political, and sociological aspects. The impact of modern legal systems and ideas, contemporary movements of codification, and the problems of legislation.
Professor Berkes

*397-707D **SEMANTICS OF THE QUR'AN.** (Seminar 2 hours). An analytical study of Qur'an vocabulary. By applying the methods of analysis that are being developed in structural and field semantics to the verses of the Qur'an, the aim is to isolate the general conceptual scheme that underlies the Weltanschauung of the sacred book of Islam.
Professor Izutsu

*397-710D **SHI'AH THOUGHT.** (Seminar 2 hours). A history of thought among the Shi'ah with consideration of important thinkers, movements and books.

397-721D ISLAMIC DEVELOPMENTS IN THE MODERN ARAB WORLD. (Seminar 2 hours). Internal reform movements and responses to external pressure, 1800 to the present.
Professor Verdery

397-722D THE DEVELOPMENT OF SECULARISM IN MODERN TURKEY. (Seminar 2 hours). An analysis of the transition from Ottoman institutions and ideas to those of contemporary Turkey. After considering the 18th century attempts at reform, attention is given to the changes during the *Tanzimat*, "Young Turk", and Republican periods, as a preparation for an understanding of contemporary problems raised by secularization.
Professor Berkes

*397-723D **ISLAMIC DEVELOPMENTS IN MODERN INDIA AND PAKISTAN.** (Seminar 2 hours). Significant movements in Islamic thought and political action, since the Mughul downfall. The influence of Sirhindi; Waliyullah and his school; the Mujahidin; 1857. De'oband; aligarh; Azad and Muslim participation in Indian nationalism; Iqbal; Pakistan. The Munir Report; Pakistan constitutional and ideological issues; Muslims in India since partition.
Professor Adams

*397-724D **DEVELOPMENT OF THE ISLAMIC TRADITION IN INDONESIA.** (2 hours). Pre-Islamic background. The arrival of the Islamic tradition; Javanese elements in its development, and Hukum Adat. Muslim states versus the Dutch company; the Padri war. Islamic policy of the Dutch. Recent Islamic movements and political parties (Sarekat Islam, Muhammadijah, Masjumi, Nahdatul Ulama, Persatuan Islam, M.I.A.I., etc.). Nationalism.

*397-725D **THE ISLAMIC HISTORY OF WEST AFRICA.** (2 hours). A study of an Islamic role in the development of institutions and ideas in the western and central Sudan, from the 11th century to the present day with special reference to (i) relations with the wider Muslim World, (ii) sources, literary and archaeological, for a study of this area.

*397-726D **ISLAMIC DEVELOPMENTS IN MODERN IRAN.** (2 hours).

397-727D MODERN HISTORY OF THE ARABIAN GULF STATES. The history of the Arabian Peninsula in modern times with special emphasis on the Gulf States. Concentration will be on Saudi Arabia, Kuwait, Bahrain, Qatar, the Union of the Arab Amirates, and 'Uman from the 18th century to the present.
Professor A. Abu-Hakimah

397-728D ISLAMIC DEVELOPMENTS IN MODERN NORTH AFRICA. The relationship of the Maghrib to the Muslim East and Europe in mediaeval and modern times. Religious developments in North Africa before and after European conquest. The growth of nationalism in Libya, Tunisia, Algeria and Morocco. The interaction of Arab and French culture and its effect on Islam.

397-729D ISLAM AND THE WEST. (Seminar, 2 hours). Muslim views of the 'West' — especially Christianity — and the 'Western' views of Islam from the ninth until the nineteenth century, with particular attention to extant primary sources.

397-730B THE STUDY OF ISLAM IN EUROPE AND NORTH AMERICA SINCE THE EARLY 19TH CENTURY. (2 hours). A critical study of the extent to which cultural and ideological trends in the West since the early 19th century are reflected in and have influenced Western academic descriptions and interpretations of Islam.

397-731D ISLAM IN THE MODERN WORLD. (Seminar 2 hours). A conspectus of the Islamic world's response to the internal decline in the eighteenth century and external encroachment in the nineteenth. A comparative study of constitutional developments, religious reform movements, nationalism, etc.
Professor Berkes

397-740D THE MYSTICAL TRADITION OF ISLAM (SUFISM). (Seminar 2 hours). An historical and analytical study of great Sufis, their writings and their central problems. Emphasis will be laid upon reading Sufi texts in Arabic and Persian. As the content of the course will vary, this course may be repeated for credit.
Professor Landolt

***397-750D SOCIAL AND ECONOMIC DEVELOPMENT IN MUSLIM COUNTRIES.** (Seminar 2 hours). A study of development problems in the light of an historical survey of various reform policies in different countries; contemporary ideas of, and policy towards, development as shown in economic, technical, political and educational measures; with emphasis on the relevance of Islamic values to development problems.
Professor Berkes

397-760D MUSLIM HISTORIOGRAPHY. (Seminar 2 hours). Readings in historical writings and consideration of the critical problems arising from the use of such materials.
Professor Little

397-762D MODERN ARABIC LITERATURE. (Seminar, 2 hours). A study of the trends in Arabic poetry since the beginning of the modern Arab literary renaissance, with special attention to selected poets from the neo-classical, the romantic, and the realist schools of the twentieth century, and a consideration of changes in poetic form leading from traditional metrical designs to free verse and prose-poems. An examination of the development of the Arabic novel and short story in the twentieth century, with attention to fictional techniques and to selected themes as expressions of the social and ideological change in the modern Arab world. A knowledge of Higher Intermediate or Advanced Arabic is required.

***397-761D IRAN FROM THE MONGOLS TO THE SAFAVIDS.** (Seminar 2 hours). Historical developments in Iran, Iraq and Anatolia after 1258. The Ilkhanids and post-Mongol successor "states". The Turkman dynasties: Qara-Goyunlu. Shi'ism, Sufism, and the rise of the Safavids in 1500.

397-777A ISLAMIC PHILOSOPHY. (Seminar, 3 hours). Consideration of the development of philosophic thought among the Muslims. Classical Arabic writings will be used.

C8 DEPARTMENT OF ITALIAN LANGUAGE AND LITERATURE

STAFF

Professor – A. D'ANDREA *(Chairman)*
Associate Professor – MICHELANGELO PICONE, PAMELA D. STEWART

REQUIREMENTS

The B.A. degree with Honours or Joint Honours in Italian as granted by McGill University or its equivalent constitutes the minimum requirement. Applicants who do not have this prerequisite may be accepted for a Qualifying Year.

REQUIREMENTS FOR THE M.A. DEGREE

The general Faculty regulations concerning the M.A. degree, as stated in sections 4 and 6 of the Calendar, apply.

One year of course work and a thesis are required. As a rule, students must take three full approved courses, of which one will be Italian 132-680D (Seminar on Literary Problems). After they have completed their course work, students are required to pass a comprehensive examination.

Course work, the comprehensive examination and the thesis must show that students have an unquestionably sound knowledge of the language, that they are familiar with all periods of the literature and have a first-hand knowledge of the major literary works, and that they have developed the skills necessary to carry out scholarly research.

COURSES FOR THE M.A. DEGREE†

132-360D SEMINAR ON ITALIAN STYLISTICS AND COMPOSITION.

132-461A DANTE: *The Divine Comedy.*

***132-462B PETRARCH AND PETRARCHISM.**

132-464B MACHIAVELLI: *The Prince.*

132-605B HISTORY OF THE ITALIAN LANGUAGE. Origins and development of the Italian language with a discussion of relevant texts.

132-610B BIBLIOGRAPHY OF ITALIAN LITERATURE. An introduction to the methods of research in the study of Italian Literature with a survey of the basic bibliographic apparatus. A half course, generally required of all students.

132-620A HISTORY OF LITERARY CRITICISM. Major trends in Italian literary criticism with a discussion of outstanding works of criticism.

132-630A PROBLEMS IN TEXTUAL CRITICISM. An introduction to the methods of establishing a critical text with examples taken from Italian literature.

132-640D ITALIAN LITERATURE AND THE WESTERN CULTURAL TRADITION. A study of certain aspects of Italian literature in relation to the literatures of other Western countries.

132-680D SEMINAR ON LITERARY PROBLEMS. Staff-Student discussions of particularly important and difficult texts. A full course, compulsory for all students.

†Qualified students wishing to pursue their studies towards a Ph.D. in Italian should consult the chairman of the Department.

C9 DEPARTMENT OF LINGUISTICS

STAFF

Professors — C.D. ELLIS *(Chairman)*; A.A. RIGAULT
Associate Professors — MYRNA GOPNIK, D. LIGHTFOOT, M. PARADIS
Assistant Professor — G.L. PIGGOTT, I. BELLERT
Sessional Lecturer — G.R. TUCKER *(Assistant Professor, Department of Psychology)*

REQUIREMENTS

ADMISSION

Candidates must hold a B.A. degree with Honours or Joint Honours in Linguistics as granted by McGill University, or its equivalent. Applicants may be required to submit to an examination in order to determine their competence. If in the judgment of the department the student has not reached the expected level of competence, he may be required to take a Qualifying Year and/or attend a summer institute of linguistics. The final date for acceptance by the Department of applications for graduate study is July 3.

REQUIREMENTS FOR THE M.A. and Ph.D. DEGREES

1. **Degree of Master of Arts.** The M.A. degree requires one year of course work of not less than three approved full courses, a comprehensive evaluation covering two areas of the field not covered in course work (see below 104-601D) and a thesis. Minimum admission requirement is normally a first degree equivalent to a McGill B.A. degree with Honours in Linguistics. Promising candidates with gaps in their preparation may be admitted to a *Qualifying Year* and/or advised to attend a summer institute of linguistics.
2. **Degree of Doctor of Philosophy:** a) Candidates holding a B.A. degree with Honours in Linguistics will, upon admission, follow a program of at least three years. This will include three full courses and comprehensive Evaluation I (see below 104-601D) to be completed before the beginning of the second year, two further full courses and Comprehensive Evaluation II (see below 104-701D) to be completed before the beginning of the third year and a doctoral thesis, research for which will normally occupy the third year.
b) Candidates holding a McGill M.A. in Linguistics and who, in the judgment of the Department, possess the qualifications of Ph.D. candidates will follow a further two-year program approved on an individual basis by the Department. This will include not less than two approved, full courses, a second comprehensive evaluation (see below 104-701D), to be successfully completed before beginning work on the thesis, and a doctoral thesis, research for which will normally occupy the second of the two years required for the program.
c) Candidates holding an M.A. in Linguistics from a recognized university upon admission to McGill must follow a program of at least two years, including not less than three approved full courses, Comprehensive Evaluations I and II (see below 104-601D and 104-701D) and a doctoral thesis, research for which will normally occupy the second of the two years required for the program.
(Two half courses may be counted as the equivalent of one full course in paragraphs a) b) and c) above.

COURSES FOR HIGHER DEGREES

GRADUATE COURSES

104-601D M.A. COMPREHENSIVE EVALUATION. (Two presentations).

104-610D EXPERIMENTAL PHONETICS. Speech as a motor behaviour and as an acoustical phenomenon. Speech perception. Experimentation in the Phonetics Research Laboratory.
Professor Rigault

104-620D CURRENT ISSUES IN SOCIOLINGUISTICS. An examination of the methodological and theoretical issues raised in the study of linguistic variation, including field methods, quantitative analysis, refinements in

linguistic theory, and implications for language change.

140-630A GENERATIVE PHONOLOGY. This course presents a rapid overview of the principles and methods of generative phonological theory. We shall examine some of the formal properties of phonological systems in general, with particular attention to the insights which the theory of generative phonology brings to bear on such systems. Some attention will be devoted to the basic differences between this theory and other theories of phonological structure. A detailed examination will be made of the theoretical position outlined in Chomsky and Halle (1968) *The Sound Pattern of English.*
Professor Piggott

104-631B ISSUES IN GENERATIVE PHONOLOGY. This course is oriented towards current issues in phonological theory. Among the issues on which the course will focus are the following, (a) problems of lexical representation, (b) ordering of phonological rules, (c) the segmental cycle in phonology, (d) deviational constraints and rule conspiracies, (e) global conditions on rules, etc.
Professor Piggott

104-640A PROBLEMS IN HISTORICAL LINGUISTICS. Problems in the history (attested) or prehistory (reconstructed) of languages, illustrating linguistic change as change of some part of a generative grammar.
Professor Piggott

104-641B ISSUES IN HISTORICAL LINGUISTICS. Implications of historical change for formal synchronic grammars.
Professor Piggott

***104-660D PROBLEMS IN THE THEORY OF SEMANTICS.** An investigation of various theories of semantics (e.g., those of Frege, Tarski, Wittgenstein, Austin, Chomsky, Katz, Lakoff) with particular attention to the assumptions each theory makes about what it must explain and the kinds of evidence which it accepts.
Professor Gopnik

104-670D RESEARCH METHODS IN PSYCHOLINGUISTICS. (Also listed as Psychology 204-455). Various research approaches which have been used by psychologists and linguists will be critically evaluated. Later each student will select and conduct a major research project which he will discuss with other seminar members during the course of the year. The use of basic, relevant methodological tools will be reviewed and the effects of experimenter expectancy will be discussed. Seminar, no lectures.
Professor Tucker

104-701D Ph.D. COMPREHENSIVE EVALUATION.

***104-730D COMPARATIVE ALGONQUIAN.** A study of the structural relations between present-day Algonquian languages, leading to reconstruction of proto-forms; consideration of evidence for possible, wider (genetic) links with other indigenous language families.
Professor Ellis

104-750D LINGUISTIC THEORY. A study of various theories of Linguistics (e.g. those of de Saussure, Sapir, Bloomfield, Harris, Chomsky) with particular attention to the assumptions and rules of procedure of each theory and the change in these assumptions and rules from one theory to another.
Professor Gopnik

104-760A SYNTAX AND SEMANTICS I. Developments in lexicalist syntax and semantic interpretation rules. Particular emphasis on 'trace theory' and the notion of enriching surface structure to make it the sole basis for semantic interpretation rules.
Professor Lightfoot

104-761B SYNTAX AND SEMANTICS II. Historical change in syntactic systems, viewed from a transformational generative perspective. Implications for linguistic theory. Particular emphasis on changes in the base component and evidence for a syntactic 'opacity principle' predicting such changes.
Professor Lightfoot

***104-770D PROBLEMS OF LANGUAGE CONTACT.** The influence of one language on another in the performance of individuals and in the history of speech communities. The sociocultural setting for bilingualism, the measurement of bilingual behaviour, and national language planning.

104-780A SELECTED TOPICS I.

104-781B SELECTED TOPICS II.

104-782A SELECTED TOPICS III.

104-783B SELECTED TOPICS IV.

104-784D SELECTED TOPICS V.

104-786D SELECTED TOPICS VI.

ADVANCED UNDERGRADUATE COURSES

Students deficient in certain areas may be required to take some of the following *undergraduate courses* in addition to full graduate courses.

104-350A INTRODUCTION TO GENERAL PHONETICS.

104-351B PHONOLOGY.

104-360A THEORY OF MORPHOLOGY AND SYNTAX.

104-361B SEMINAR IN MORPHOLOGY AND SYNTAX.

104-400A THEORY AND METHODS OF HISTORICAL LINGUISTICS.

104-401B SEMINAR IN HISTORICAL LINGUISTICS.

104-461B ADVANCED SYNTAX.

104-471B FIELD METHODS OF LINGUISTICS.

104-482D FIELD OR RESEARCH PROJECT.

104-490A SEMINAR IN LINGUISTIC THEORY.

C10 MUSIC

STAFF

Professor — M. DUCHOW; K. JONES
Visiting Professors — E. VALCARCEL, M. BERTONCINI
Associate Professors — B. HAMBRAEUS; A. LANZA; B. MATHER *(on leave 1975-76)*; P. PEDERSEN
Assistant Professors — B. CHERNEY; P. HELMER; P. MARKS; B. MINORGAN; J. REA

PROGRAMS

Graduate study in the Faculty of Music is available in three areas: (a) Composition, (b) Musicology, and (c) Theory. The Master of Musical Arts Degree is offered in all three areas. Interdisciplinary studies involving Musicology or Theory are encouraged. The Doctor of Music degree is offered in Composition. A limited number of teaching assistantships are available. Inquiries should be directed to the Chairman, Department of Theory, Faculty of Music.

ADMISSION

Applicants for the M.M.A. degree must hold a B.Mus. in the area of specialization or a B.A. degree with major or honours in music including considerable work done in the area of specialization. Applicants are requested to submit samples of work done in their special area. They may also be required to take placement tests in Analysis, History, and Theory. Applicants found to be deficient in any area may be required to take certain undergraduate courses. A reading knowledge of German is strongly recommended as a prerequisite for graduate work in Musicology.

Applicants for the D.Mus. degree must hold an M.M.A. in composition, or its equivalent, and must submit scores and/or tapes of their compositions at the time of application.

REQUIREMENTS FOR THE M.M.A. DEGREE

In all programs a minimum number of formal courses are prescribed. The student's major work is expected to be thesis research or composition which will be done under the supervision of an advisor. This work, as well as any additional courses and/or individual study which the department considers necessary, constitutes the central part of this program.

The M.M.A. degree normally requires one year for applicants who have the equivalent of this University's B.Mus. with Honours in the area of specialization.

COMPOSITION

(a) 219-630D. Seminar in Twentieth Century Music.
(b) One approved full course elective.
(c) Language reading examination in one of: French, German, or Italian.
(d) Thesis Composition. The candidate will be required to attend regular composition tutorials.

MUSICOLOGY

(a) 219-680A and 219-681B. Seminar in Musicology.
(b) Language reading examinations in German and one additional language related to the candidate's field of research.
(c) The candidate will be required to attend regular tutorials.
(d) Thesis. The candidate will undertake supervised research leading to a thesis which will be an investigation in depth in some specialized field of musicology.

THEORY

(a) 219-650D. Seminar in Music Theory.
(b) Language reading examination in one of: French, German, or Italian.
(c) The candidate will be required to attend regular tutorials.
(d) Thesis. The candidate will undertake supervised research leading to a thesis which will be an investigation in depth in some specialized field of music theory.

REQUIREMENTS FOR THE D.MUS. DEGREE

(a) 219-722D. Doctoral Composition Tutorial (for two years).
(b) Two approved full courses electives.
(c) Comprehensive examinations.
(d) Composition Performance. The candidate must present a concert of his/her compositions.
(e) Thesis: A musical composition of major dimensions together with a written analysis of the work. The thesis must be defended in an oral examination.

Details concerning the comprehensive examinations, composition performance, thesis, and academic regulations are available from the Secretary, Graduate Committee, Faculty of Music.

A minimum of two years' residence is required beyond the M.M.A. in composition, or its equivalent.

COURSES FOR HIGHER DEGREES

GRADUATE COURSES

219-622D COMPOSITION TUTORIAL.
Staff

219-623A ELECTRONIC MUSIC SEMINAR I. (3 hours seminar, 4 hours studio work).
Professor Bertoncini

219-624B ELECTRONIC MUSIC SEMINAR II. (3 hours seminar, 4 hours studio work).
Professor Lanza

219-625D MUSIC NOTATION SEMINAR. (3 hours).
Professor Hambraeus

219-630D SEMINAR IN TWENTIETH CENTURY MUSIC. (3 hours).
Professors Bertoncini and Valcarcel

219-641A ADVANCED COUNTERPOINT I. (2 hours).
Professor Jones

219-642B ADVANCED COUNTERPOINT II. (2 hours).
Professor Jones

219-649D THEORY TUTORIAL.
Staff

***219-650D SEMINAR IN MUSIC THEORY.** (3 hours).

***219-652D COMPUTER APPLICATIONS IN MUSIC.** (3 hours).
Professor Pedersen

***219-653B MUSIC AESTHETICS AND CRITICISM.** (3 hours).

219-679D MUSICOLOGY TUTORIAL.
Staff

219-680A SEMINAR IN MUSICOLOGY. (3 hours).

219-681B SEMINAR IN MUSICOLOGY. (3 hours).
Professor Minorgan

219-690A SEMINAR IN PERFORMANCE PRACTICE. (3 hours).
Professor Helmer

219-691B SEMINAR IN PERFORMANCE PRACTICE. (3 hours).
Professor Helmer

219-722D DOCTORAL COMPOSITION TUTORIAL.
Staff

ADVANCED UNDERGRADUATE COURSES

Students deficient in certain areas may be required to take some of the following undergraduate courses in addition to their required graduate courses.

211-322D TONAL COUNTERPOINT.
211-323D MODAL COUNTERPOINT.
211-327D ANALYSIS (19TH CENTURY).
214-380A MEDIAEVAL MUSIC.
214-381A RENAISSANCE MUSIC.
214-382B BAROQUE MUSIC.
214-383A CLASSICAL MUSIC.
214-384B ROMANTIC MUSIC.
214-385B TWENTIETH CENTURY MUSIC.
214-394B SPECIAL TOPIC SEMINAR.
211-422D FUGUE.
211-423D ADVANCED HARMONY.
211-427D ANALYSIS (20TH CENTURY).
211-429D PROSEMINAR IN MUSIC THEORY.
214-489B HISTORY OF MUSIC THEORY.
214-496B HONOURS TUTORIAL.
214-499D PROSEMINAR IN MUSICOLOGY.

C11 DEPARTMENT OF PHILOSOPHY

STAFF

Professors — H.M. BRACKEN; M. BUNGE *(on leave)*; R. KLIBANSKY; A.J. McKINNON *(Chairman)*; A. MONTEFIORE *(Part-time)*; R.H. POPKIN *(Part-time)*; C. TAYLOR; J.A. TRENTMAN

Associate Professors — D.F. NORTON; J. ROBINSON; W. SHEA; J.D.B. WALKER

Visiting Associate Professor — R. STORRS McCALL

Assistant Professors — G. DI GIOVANNI; WARREN HARVEY; J. McGILVRAY

Visiting Assistant Professor — ANIL K. GUPTA

REQUIREMENTS

ADMISSION

Before entering upon a course of graduate studies, a student will normally have completed an Honours B.A. in Philosophy, or its equivalent, that is, a degree for which he or she has devoted one third to one half of his curriculum to philosophy.

The applicant's competence in the subject should include the following:

(1) A general knowledge of the history of Western philosophy, Greek, Mediaeval, Modern.

(2) A systematic knowledge of the main philosophical disciplines, in their contemporary as well as historical contexts: logic, ethics, epistemology, and metaphysics.

(3) An ability to present, in written form, clear and substantial reconstruction and analysis of the materials normally studied in the areas mentioned in (1) and (2).

To demonstrate their competence in these areas applicants must submit transcripts of academic work, two letters of recommendation from persons with whom they have studied, and at least one substantial example (approximately 15-20 typewritten pages) of their written philosophical work. In addition, applicants are urged to submit scores (Aptitude Test only) of the Graduate Record Examination. Applications and supporting documents should be submitted by March 15.

REQUIREMENTS FOR THE M.A. DEGREE

A program consistent with the requirements specified in the Faculty Regulation will be arranged for each student. This will include at least three full courses, or the equivalent, during the first year.

REQUIREMENTS FOR THE Ph.D. DEGREE

Students entering the Ph.D. program will follow a course of studies decided upon in consultation with their Advisory Committees. Each Ph.D. student will complete courses on diverse aspects of philosophy, and prepare for oral Comprehensive Examinations in 1) Epistemology and Metaphysics; 2) Ethics; and 3) History of Philosophy. Competence in Logic must also be demonstrated, either by written examination or by completion, with a grade of 'B' or higher, of a course approved by the Department. These examinations are to be taken at the beginning of the students' third year in the program.

The special interests of each student will be taken into account when his or her course of studies is decided, and examination papers are decided upon. In addition, all candidates must pass reading examinations in two (approved) languages other than their mother tongue. As soon as the Comprehensive Examinations are passed, the student will begin work on a dissertation. Dissertation topics must be selected within the research areas in which the Department can provide proper supervision, and within the linguistic competence of the student.

Students who enter the program without an M.A. degree or previous graduate work may be expected to complete such a degree before being advanced to the Ph.D. program.

COURSES FOR HIGHER DEGREES

107-210A INTRODUCTION TO DEDUCTIVE LOGIC. (3 hours). The propositional and predicate calculi.

107-210B INTRODUCTION TO DEDUCTIVE LOGIC. The propositional and predicate calculi.
Professor Gupta

***107-401D SEMINAR IN THE HISTORY OF ETHICS.**

***107-404D MORAL PHILOSOPHY.** Introduction to Ethics. A critical examination of the concepts of liberty and justice with a consideration of a number of contemporary moral, political, and educational debates.

***107-406A PHILOSOPHY AND LITERATURE.**

107-407B PHILOSOPHY AND LITERATURE.
Staff

107-445D SCIENCE AND PHILOSOPHY IN THE SEVENTEENTH CENTURY.
Professor Shea

107-510D INTERMEDIATE LOGIC. (Prerequisite: one introductory course in logic). Advanced topics in logic including some consideration of semantic issues.
Professor Gupta

***107-511D MEDIAEVAL LOGIC AND GRAMMAR.**

***107-513A RECENT AND CONTEMPORARY BRITISH PHILOSOPHY.**

***107-514B RECENT AND CONTEMPORARY BRITISH PHILOSOPHY.**

***107-517D PROBLEMS IN SEMANTICS.**

***107-520D METHODOLOGY AND PHILOSOPHY OF SCIENCE.**

***107-523A FORMAL METHODS IN PHILOSOPHY AND THE SOCIAL SCIENCES.** (3 hours)

***107-524B FORMAL METHODS IN PHILOSOPHY AND THE SOCIAL SCIENCES.** (3 hours).

***107-527A PHILOSOPHY OF PHYSICS.**

***107-528B PHILOSOPHY OF PHYSICS.**

***107-531A SEMINAR IN PHILOSOPHY OF RELIGION.**

***107-532B SEMINAR IN PHILOSOPHY OF RELIGION.**

107-541A SEMINAR IN ANCIENT PHILOSOPHY. (3 hours) *Topic for 1975-76:* Aristotle. An advanced course for students who

have had a survey course in Greek Philosophy. The course will concentrate on a careful consideration of primary texts. The main work to be discussed will be the Nicamachean Ethics.
Professor Trentman

***107-542B SEMINAR IN ANCIENT PHILOSOPHY.** (3 hours).

***107-544D SEMINAR IN THE HISTORY OF PHILOSOPHY.**

107-548A LEGAL AND MORAL PHILOSOPHY OF THE JEWISH TRADITION. Readings of philosophical texts in Hebrew, chosen in conjunction with interests of participating students.
Professor Harvey

107-549B LEGAL AND MORAL PHILOSOPHY OF THE JEWISH TRADITION. Continuation of 548A.
Professor Harvey

107-522D THEMES IN THE HISTORY OF JEWISH PHILOSOPHY.
Professor Popkin

107-555A SEMINAR IN 17TH AND 18TH CENTURY PHILOSOPHY. *Topic for 1975-76:* Bayle & Berkeley.
Professor Bracken

107-556B SEMINAR IN 17TH AND 18TH CENTURY PHILOSOPHY. *Topic for 1975-76:* Descartes and the Cartesians.
Professor Bracken

107-558D SEMINAR IN HEGEL. *Topic for 1975-76:* Hegel's Concept of Spirit.
Professor Walker

107-563D SEMINAR IN KIERKEGAARD. *Topic for 1975-76:* Kierkegaard's Social & Political Thought.
Professor McKinnon

107-565D SEMINAR IN KANT. *Topic for 1975-76:* The Critique of Pure Reason.
Professor DiGiovanni

***107-572D PHILOSOPHY OF POLITICS.**

107-581D METAPHYSICS, DIALECTICS, LOGIC AND EPISTEMOLOGY. *Topic for 1975-76:* Issues of event-identity.
Professor McCall

107-583A SEMINAR IN SYSTEMATIC PHILOSOPHY. (3 hours). Discussion of advanced issues in semantics and philosophy of logic. Prerequisite: permission of the instructor.
Professor Gupta

107-584B SEMINAR IN SYSTEMATIC PHILOSOPHY. *Topic for 1975-76:* Wittgenstein: A discussion of several issues in Wittgenstein's work, including language games and forms of life. The course will focus on the *Philosophical Investigations.*
Professor McGilvray

***107-585A METAPHYSICS.**

107-586B METAPHYSICS. *Topic for 1975-76:* Spinoza.
Professor Harvey

107-587A SEMINAR IN PROBLEMS OF PHILOSOPHY. Advanced research seminar.
Professors McGilvray and Norton

107-588B SEMINAR IN PROBLEMS OF PHILOSOPHY. Advanced research seminar.
Professors McGilvray and Norton

107-593A SEMINAR IN PHILOSOPHY. *Topic for 1975-76:* The development of modern theories of linguistic meaning; the enlightenment view (Hobbes, Locke, Condillac); the "expressivist reaction" (Herder); and the transition through Kant and Hegel to contemporary theories.
Professor Taylor

107-594B SEMINAR IN PHILOSOPHY. *Topic for 1975-76:* Scottish Philosophy.
Professor Norton

107-705D GUIDED RESEARCH IN ETHICS.

107-710D GUIDED RESEARCH IN LOGIC.

107-720D GUIDED RESEARCH IN PHILOSOPHY OF SCIENCE.

107-730D GUIDED RESEARCH IN PHILOSOPHY OF RELIGION.

107-740D GUIDED RESEARCH IN ANCIENT PHILOSOPHY.

107-750D GUIDED RESEARCH IN MEDIAEVAL PHILOSOPHY.

107-760D GUIDED RESEARCH IN HISTORY OF PHILOSOPHY.

107-770D GUIDED RESEARCH IN PHILOSOPHY OF POLITICS.

107-780D GUIDED RESEARCH IN EPISTEMOLOGY AND METAPHYSICS.

Several courses primarily philosophical in content are available in other departments. Note in particular the offerings in Classics, Jewish Studies, and the Islamics Institute.

C12 RELIGIOUS STUDIES

STAFF

Professors — J.C. McLELLAND *(Dean)*; C.J. ADAMS; S.B. FROST; G. JOHNSTON; J.C. KIRBY
Associate Professors — J.A. BOORMAN; R.C.

CULLEY; D.J. HALL; D.N. MacMILLAN; H.K. MARKELL; M. PEASTON; D.R. RUNNALLS; R.W. STEVENSON
Assistant Professors – E.K. MALLOY

REQUIREMENTS

Requirements for admission to the courses leading to the degrees of M.A., S.T.M. and Ph.D. are stated in the General Information and Faculty Regulations section of this Announcement. Further information is given in the *Announcement of the Faculty of Religious Studies.*

COURSES FOR HIGHER DEGREES

The staff offers each session a selection from the following list of courses, and is prepared to guide students in thesis research on approved topics, within any of the following fields: Old Testament language and literature; New Testament language and literature; Church History; Comparative Study; Christian Theology, including Theological Ethics; Philosophy and Psychology of Religion. To each approved student appropriate courses will be assigned, on occasion including courses offered by other Departments such as Education (Catholic Theology), Art History, Philosophy, History, Classics, Jewish Studies, or Islamic Studies. Graduate students in these Departments may be permitted or required to take courses currently offered in Religious Studies.

Adequate library facilities are available in the William and Henry Birks Building and elsewhere in the University for the courses listed, and for research.

All are half-courses unless otherwise noted.

A course may not be offered if fewer than six students register.

AREA A (BIBLICAL)

260-602A JEREMIAH TO MALACHI; THE DECLINE OF PROPHECY.
S.B. Frost

***260-603B THE DANIEL APOCALYPSE.**
S.B. Frost

260-605B INTERPRETERS OF THE RELIGION AND FAITH OF ANCIENT ISRAEL.
R.C. Culley

***260-606A FORESHADOWINGS OF THE EUCHARIST IN THE OLD TESTAMENT.**
W. Lawlor

***260-607A STUDIES IN THE BIBLICAL NARRATIVE TRADITIONS.**
R.C. Culley

***260-610A RECENT INTERPRETATIONS OF MARK.**
J.C. Kirby

260-612A THE PASSION NARRATIVE IN THE FOUR GOSPELS.
J.C. Kirby

***260-613B NEW TESTAMENT ETHICS.**
G. Johnston

***260-614B THE GOSPEL OF JOHN.**
G. Johnston

***260-615B THE HOLY SPIRIT IN THE NEW TESTAMENT.**
G. Johnston

***260-616A LES PARABOLES DE JESUS.**
J.C. Kirby

***260-617C THE EPISTLE TO THE EPHESIANS.**
J.C. Kirby

***260-618B THE CHURCH IN THE NEW TESTAMENT.**
G. Johnston

260-619B THE RESURRECTION IN THE NEW TESTAMENT.
J.C. Kirby

AREA B (HISTORICAL)

***260-620B WORSHIP IN THE NEW TESTAMENT.**
J.C. Kirby

260-621A ROMAN CATHOLICISM FROM 1870 TO THE PRESENT.
H.K. Markell

***260-622B THE MODERN LITURGICAL MOVEMENT.**
J.C. Kirby

C.J. Adams

397-703D ISLAMIC THEOLOGY.
I. Izutsu

SPECIAL STUDIES

260-680A/680B/690D OLD TESTAMENT.

260-681A/681B/691D NEW TESTAMENT.

260-682A/682B/692D HISTORY OF CHRISTIANITY.

260-683A/683B/693D CHRISTIAN THEOLOGY.

260-684A/684B/694D PHILOSOPHY OF RELIGION.

260-685A/685B/695D ETHICAL PROBLEMS.

260-686A/686B/696D RELIGIOUS PSYCHOLOGY.

260-687A/687B/697D COMPARATIVE RELIGION.

These are tutorial courses designed to meet the research needs of individual students at Master's or Doctor's level in the various disciplines.

ELECTIVE COURSES IN OTHER DEPARTMENTS

With the consent of the Dean of Religious Studies and the instructor concerned, graduate students may choose one or more of the following related courses, provided they are being offered.

123-612B *Art History* – MEDIAEVAL ART AND ARCHAELOGY.

123-622A THE ART OF BYZANTIUM.

114-653D and 114-753D. *Classics* – NON-LITERARY SUBJECTS.

110-610B *English* – DEVOTIONAL LITERATURE.

101-607D *History* – RELIGIOUS AND IDEOLOGICAL MOVEMENTS IN THE UNITED KINGDOM AND WESTERN EUROPE 1815-1914.

101-616D PHILOSOPHY OF HISTORY.

107-401D *Philosophy* – HISTORY OF ETHICS.

107-431A PHILOSOPHY OF RELIGION.

107-432B PHILOSOPHY OF RELIGION.

C13 DEPARTMENT OF RUSSIAN AND SLAVIC STUDIES

STAFF

Professor – J.G. NICHOLSON *(Chairman)*
Visiting Professors – J. Y LE GUILLOU; R.V. PLETNEV
Associate Professors – P.M. AUSTIN *(on leave)*; A.V. FODOR
Assistant Professors – LUDMILA BAUER; IRENE PAVILANIS

REQUIREMENTS

Original research work and the scholarly qualities of the thesis are the principal criteria for conferring a graduate degree in Russian. Two distinct fields of graduate work are recognized – Russian language

and Russian literature respectively. It is expected that most students will enter the literary field with a minority showing research interest in philology and linguistics. However, both groups are appropriately provided for.

The general rules of the Faculty apply and are outlined in the first part of this calendar in the Section under — "The Degree of Master of Arts" — and in the Section under — "Regulations for the Degree of Doctor of Philosophy (Ph.D.)." The minimum academic requirement is normally a high second class standing in Honours Russian. Further, the Department must be convinced that the candidate for admission has an aptitude for research work and will be able to make an original contribution to knowledge. The Department will usually require candidates to demonstrate a useful reading knowledge, for research purposes, of at least one other Slavic language. In addition a knowledge of French and, preferably, also German, is desirable. Any necessary preparation to fulfil these requirements will be offered within the Department or elsewhere at McGill. On an experimental and reciprocal basis certain graduate courses may be taken by arrangement at the Université de Montréal.

REQUIREMENTS FOR THE M.A. AND Ph.D. DEGREES

Details of the requirements for the M.A. and Ph.D. degrees may be obtained by applying directly to the Chairman of the Department.

COURSES FOR HIGHER DEGREES

141-601D M.A. COMPREHENSIVE EXAMINATION.
Staff

141-610D CHURCH SLAVONIC.
Professor J.-Y. LeGuillou

141-620D SECOND SLAVIC LANGUAGE AND CIVILIZATION.
Professor Nicholson and Staff

141-630D EARLY HISTORY OF THE SLAVIC LANGUAGES.
Professor Nicholson

141-640D THE BALTO-SLAVIC HYPOTHESIS.
Professor Pavilanis

141-650D HISTORY OF THE RUSSIAN LANGUAGE.
Professor Nicholson

141-660D PRE-PETRINE RUSSIAN LITERATURE.
Professor Leguillou

141-670D RUSSIAN LITERATURE OF THE 18TH CENTURY.
Professor Pletnev

141-680D SEMINAR ON SPECIAL AUTHORS OF 19TH CENTURY.
Professor Pavilanis and Staff

141-681D SEMINAR ON RUSSIAN ROMANTICISM.
Staff

141-690D DEVELOPMENT OF RUSSIAN LITERARY CRITICISM.
Professor Fodor and Staff

141-700D Ph.D. PRELIMINARY EXAMINATION.
Staff

141-701D Ph.D. COMPREHENSIVE EXAMINATION.
Professor Nicholson and Staff

141-710D SEMINAR ON THE Ph.D. COMPREHENSIVE EXAMINATION.
Professor Fodor and Staff

141-720D FIRST SEMINAR ON SPECIAL TOPICS.
Professor Nicholson

141-721D SECOND SEMINAR ON SPECIAL TOPICS.
Professor Fodor and Staff

141-722D THIRD SEMINAR ON SPECIAL TOPICS.
Professor Pavilanis and Staff

Ph.D. LANGUAGE TESTS

For Ph.D. candidates in other departments who require Russian for research and in satisfaction of the language requirement the following courses is offered.

141-212D RUSSIAN READING COURSE. (3 hours, both terms). This course enables the student to use written Russian as a useful research tool.
Staff

141-790D RUSSIAN AS A LANGUAGE REQUIREMENT FOR THE Ph.D. See "Ph.D. Language Tests" and consult the Department.

GRADUATE STUDIES & RESEARCH IN THE MEDICAL SCIENCES

1. Departments wholly located in the Faculty of Medicine may accept as candidates for research degrees those who have received the M.D. or equivalent degree. A candidate who does not have the M.D. or equivalent degree may be accepted if a suitable schedule of course work is included as part of his graduate education program. Departments located partly in the Medical and partly in the Arts and Sciences Faculties may accept as candidates for basic science research degrees students who have an Honours or major Bachelor's degree or its equivalent.

2. A candidate for a research degree in a clinical department will be required to give evidence of above-average ability.

3. A candidate for the M.Sc. research degree in a clinical department will be recommended to Graduate Faculty by the Dean of the Faculty of Medicine. This recommendation will be based on a review of proposals of candidates by the Graduate Study Committee of the appropriate clinical departments. The candidate must fulfil his program of course work and present a thesis acceptable to the Graduate Faculty.

4. A candidate for the Ph.D. research degree in a clinical department will be recommended to the Graduate Faculty by the Dean of the Faculty of Medicine. This recommendation will be based on a review of proposals of candidates by the Graduate Study Committee of the appropriate clinical departments. If, in addition to the M.D. degree, he possesses the M.Sc. degree of this Univeristy or its equivalent, he will be required to spend two years in the Graduate Faculty in academic residence. He must fulfil his program of course work and present a thesis acceptable to the Graduate Faculty.

5. The Graduate Studies Medical Committee supplies the Dean of the Graduate Faculty in October of each year with a list of those members of the Medical Faculty who are authorized to be directors of the graduate students in the departments of the Medical Faculty.

Inquiries concerning research in the clinical aspects of medicine may be in the first instance directed to:

Associate Dean for Graduate Studies and Research

D1 DEPARTMENT OF ANATOMY

STAFF

Professors – Y.W. CLERMONT *(Chairman);* C.P. LEBLOND; D.G. OSMOND

Associate Professors – B.M. KOPRIWA; P.K. LALA; D. LAWRERENCE: N.J. NADLER; H. WARSHAWSKY

Assistant Professors – G.C. BENNETT; J.J.M. BERGERON; E. DANIELS; M.F. LALLI; M. WEINSTOCK; W.E. WILSON

Lecturers – C.E. SMITH; J. WARD; P. WELLS

REQUIREMENTS

The department offers facilities for research work leading to the degrees of Master of Science and Doctor of Philosophy in Anatomy. The emphasis may be on Microscopic or Gross Anatomy or Embryology.

For registration as a graduate student, the candidate must hold a B.Sc. or M.D. degree or any equivalent degree, as judged by the Faculty, and must have displayed general proficiency in biological studies. Letters of recommendation are required for all applicants.

For the M.Sc. and Ph.D. degrees, the students must demonstrate ability to conduct original research and complete a series of courses with high standing. In addition to the preparation of a thesis based on original research, Ph.D. candidates will write a comprehensive examination after the end of the Second year.

Ph.D. candidates must pass reading examinations in *one,* or in *two* languages other than English, as prescribed by the Chairman on the registration forms.

When the emphasis is on Gross Anatomy or Embryology, the students will take 504-614D (Human Anatomy), 504-622A (Neuro-Anatomy), 504-632D (Experimental Morphology) and 504-481B (Human Embryology and Development). Ph.D. candidates will be required to take courses such as 504-723D (Advanced Neuro-Anatomy) and 504-663D (Histology) and to extend their knowledge of Anatomy at an advanced level, including the use of technical procedures.

When the emphasis is on Microscopic Anatomy, students will take 504-663D (Histology), 504-533D (Experimental Morphology) and 504-481B (Human Embryology and Development). Candidates for the Ph.D. degree will be required to take courses such as 504-614D (Human Anatomy), 504-622B (Neuro-Anatomy), and General Pathology.

ADVANCED UNDERGRADUATE AND GRADUATE COURSES

504-311A HUMAN MUSCULO-SKELETAL ANATOMY. Introduction to regional human anatomy devoted to a study of the skeleton and muscular system of the limbs and back, and the neuro-vascular structures in these regions.

504-312B HUMAN VISCERAL ANATOMY. An introductory course in regional human anatomy of the head, neck and trunk, including the visceral systems (circulatory, respiratory, digestive and urogenital systems).

504-462D DYNAMIC HISTOLOGY. An advanced course to cover topics such as cell cycle, cell population kinetics and turnover of cell components.

504-481B HUMAN EMBRYOLOGY AND DEVELOPMENT. A comprehensive study of human developmental anatomy.

504-533D EXPERIMENTAL MORPHOLOGY. A lecture and practical course on the use of experimental techniques applicable to morphological research. This course stresses methods currently used in the Department, such as radioisotopic tracers, radioautography, light and electron microscopy.

504-614D HUMAN ANATOMY. A complete dissection of the human body is integrated with the anatomy course of lectures, tutorials and audiovisual presentations designed for medical students (504-121M). This course includes developmental, surface and radiological anatomy.

504-615D APPLIED ANATOMY. Lectures and demonstrations for surgeons in training.

504-622B NEURO-ANATOMY. This is part of a joint course including Neuro-physiology (524-121M).

504-663D HISTOLOGY. The study of the cytology and structure of tissues and organ. Course designed for medical students (504-131M).

504-701D Ph.D. COMPREHENSIVE EXAMINATION.

504-723D ADVANCED NEURO-ANATOMY. Seminar course at the Montreal Neurological Institute.

D2 DEPARTMENT OF BIOCHEMISTRY

STAFF

Professors – A.F. GRAHAM *(Chairman);* M.J. FRASER; D. RUBINSTEIN; S. SOLOMON; T.L. SOURKES; J.H. SPENCER; L.S. WOLFE

Associate Professors – R. BLOSTEIN; P.E. BRAUN; D.T. DENHARDT; E.A. HOSEIN; ROSE M. JOHNSTONE; A.R. WASSERMAN

Assistant Professors – ELEANOR M. HARPUR; R.E. MacKENZIE; E.A. MEIGHEN; L.S. MILLWARD; M. MUSHYNSKI

Lecturer – M.R. REESAL

Associate Members – M.K. BIRMINGHAM *(Psychiatry);* J. DUPRE *(Exp. Medicine);* D. EDWARD *(Exp. Surgery);* W.C. GALLEY *(Chemistry);* L. GOODFRIEND *(Exp. Medicine);* L.M. JERRY *(Exp. Medicine);* H. PAPPIUS *(Exp. Neurochemistry);* C. SCRIVER *(Paediatrics);* J. SHUSTER *(Exp. Medicine)*

REQUIREMENTS

Students must submit with their application for admission the results of the Graduate Record Examination (aptitude test, and achievement test in Biology or Chemistry), three letters of recommendation and a brief resumé indicating in as much detail as possible their particular field of interest for graduate study and the reasons for choosing this specific area.

Students who have satisfactorily completed an Honours course in Biochemistry and who have been accepted as research students by the Department and by a research director approved by the Department may register for the M.Sc. degree, which usually involves a two-year program. Following completion of one year of study in the Department, suitable candidates may be allowed to proceed directly to the Ph.D. degree, depending on the ability they display in research and course work.

Program of courses for each student is determined by the individual research director in consultation with the Chairman of the Department's Graduate Advisory Committee. Students who have not obtained a suitable Honours degree or its equivalent will be required to take a qualifying year or otherwise make up for deficiencies.

Candidates who have obtained the M.Sc. degree with satisfactory standing from this department or who have completed an acceptable M.Sc. program at another university enter the graduate program at the Ph.D. level.

Research work is carried on in the Department laboratories where projects deal with the biochemistry of erythrocytes, liver, brain, muscle, chloroplasts, endocrine organs, nucleic acids, peptides, lipids, and transport phenomena. These projects are conducted in departmental laboratories, the Biochemistry Laboratories of the Allan Memorial Institute of Psychiatry, the Laboratory of Experimental Neurochemistry of the Montreal Neurological Institute, the University Clinics of the Montreal General and the Royal Victoria Hospitals and in certain other laboratories.

There is no second language requirement for Ph.D. students, except where individual research directors wish to make such a requirement for their

own students. Students whose mother tongue is not English must be proficient in English and may be required to take a remedial English course if the research director deems this necessary.

COURSES FOR HIGHER DEGREES

GRADUATE LEVEL COURSES

***507-602A TOPICS IN MOLECULAR BIOLOGY.** (Admission by permission of instructor only).
Professors Fraser and Millward

***507-503B IMMUNOCHEMISTRY.** (Admission by permission of instructor only).
Professors Shuster and Jerry

(University Clinic, Montreal General Hospital; University Clinic, Royal Victoria Hospital)

ADVANCED UNDERGRADUATE COURSES

507-302D METABOLISM AND REGULATION. (Prerequisite: Biology 177-201D; Corequisite: Biology 177-301A, 302B).
Professor Johnstone and Staff

507-404B BIOPHYSICAL CHEMISTRY. (Prerequisites: Chemistry 180-204A, 214B or 213A, 223B required; Chemistry 180-313A recommended. This course is also listed as Chemistry 180-404B).
Professors Meighen and Galley (Chemistry)

507-450A PROTEIN STRUCTURE AND FUNCTION. (Prerequisites: Biology 177-301A, 302B).
Professors MacKenzie and Meighen

507-454A NUCLEIC ACIDS. (Prerequisites: Biology 177-301A, 302B; Biochemistry 302D).
Professors Denhardt and Spencer

507-455B NEUROCHEMISTRY. (Prerequisites: Biochemistry 507-302D and Biology 177-301A, 302B).
Professors Sourkes, Wolfe and Staff

SEMINARS

There are three series of seminars: the junior seminar consists of a presentation by each student near the end of his M.Sc. program or the beginning of his Ph.D. program, on the subject of his recent or on-going research. The senior seminar consists of a presentation by every third or later year Ph.D. candidate on his research. Departmental staff seminars consist of presentations by members of staff and visiting scientists outlining their work with their collaborators. Graduate students are required to attend all the above seminars and certain informal seminars, and are encouraged to attend relevant scientific meetings.

D3 BIOMEDICAL ENGINEERING UNIT

The academic program of the Unit is designed to enable qualified graduate students to pursue interdisciplinary studies in Engineering and Medicine. This program has been structured mainly for engineers, but applicants from the biological and medical sciences are encouraged. Graduate students for the M.Sc., M.Eng., and Ph.D. degrees will be registered in the Faculty of Graduate Studies and Research through appropriate departments.

Current research in the Unit is concerned with neuromuscular control, especially in posture and eye movement: mechanics of the normal and scoliotic spine: physiology of vestibular, auditory and mechano-receptors: neural communication theory: diagnostic techniques and signal processing in otology, encephalography and cardiology: sensory aids: systems analysis of hospital units.

Opportunities for interdisciplinary research also exist in a number of departments in the Faculties of Engineering and Medicine.

STAFF

Associate Professor — J.S. OUTERBRIDGE *(Acting Director)*
Assistant Professors — R. DEMERS; H.C. LEE; D.H. MOSCOVITCH; J.L. NEAL
Research and Teaching Associates — A. AHMED *(Mechanical Engineering);* P.R. BELANGER *(Electrical Engineering);* D.L. BURKE *(Orthopaedic Surgery);* T.R. FENTON *(Cardiology);* R.B. GLENHILL *(Orthopaedic Surgery);* P. GLOOR *(Neurophysiology);* R. HOFFMAN *(Mechanical Engineering);* J. IVES *(Neurophysiology);* G.A. KLASSEN *(Cardiology);* M.D. LEVINE *(Electrical Engineering);* G. MELVILL JONES *(Aviation Medical Research Unit);* J. MILLER *(Orthopaedic Surgery)*

COURSES FOR HIGHER DEGREES

Note that all courses are not given every year.

399-611B BIOLOGICAL CONTROL SYSTEM THEORY. (3 lectures, second term). Control system structure and information flow: homeostasis and neuromuscular systems; neuromuscular control, locomotion, oculomotor system, respiration, the human operator, thermo-regulation, cardiovascular control, endocrine control systems; adaptive and optimizing control structure and theory, performance criteria; growth, positive feedback and mutual causality.

399-613B SENSORY COMMUNICATION THEORY. (3 lectures, second term). Sensory receptors and neural coding; signal transmission and aspects of information processing in the vestibular, auditory, and visual systems; neural modelling; methods of pulse frequency modulation; analysis of multi-unit multipath neural systems; information processing in theoretical neural networks. Student projects.
Professor Lee

399-621B ENGINEERING BIOPHYSICCS. B. (3 lectures, first term). Biochemical thermodynamics; criteria for equilibrium; phase equilibrium; chemical reaction equilibrium; the equilibrium constant, electro-chemical cell potentials, ATP degradation; chemical kinetics; fluid flow; mass transfer; biological role of water; bio-macromolecules; proteins, nucleic acids, polysaccarides, polyelectrolytes; biological effects of ionizing radiation; buffers, osmotic pressure, acid-base balance.

Professor Neal

399-622A ENGINEERING BIOPHYSICS. (3 lectures, second term). Membranes: structure, electrical properties, passive transport, active transport; models of membrane; nerve conduction. Biological control at molecular level. Microscopy. X-Ray diffraction. Radioactivity. Biophysical instrumentation and measurements.

399-623B PRINCIPLES OF MEDICAL SCIENCE. (2 lectures, second term. Prerequisite: Physiology 552-211D or equivalent). This course is designed to acquaint engineers with the principles and techniques of clinical practice and research, emphasizing those areas where bio-engineering may contribute. Sessions are held in the McGill-associated hospitals, each led by a medical specialist. Specialized areas studied include: diagnosis; iron metabolism; ECG's, pacemakers and intensive-care cardiac units; respiratory function, disease and xenon measurements; artificial dialysis; general and orthopaedic surgery.
Staff

399-631B BIOMEDICAL ENGINEERING TECHNIQUES AND INSTRUMENTATION. (3 lectures, second term). Selected topics in the area of application of technology, systems theory and computer science to problems in health care. The level of presentation will assume adequate mathematical and technological background, including differential equations, transform techniques, basic instrumentation and computer programming. The material presented in this course changes every year allowing in-depth exploration of different areas of biomedical engineering activity. Major areas of itnerest are: methods of bio-signal analysis, computer evaluation of ECG, industrial engineering methods in hospitals, computer applications in clinical laboratories and intensive care units, health information systems. Structured student projects are part of this course.
Staff

399-641A SYSTEM CONCEPTS AND COMPUTER APPLICATIONS FOR BIOLOGY AND MEDICINE. (2 lectures, 2 laboratories, first term). Basic concepts and methods necessary for the application of computer and system techniques in physiology and medicine. The course is designed to enable the life scientist to utilize recent practical and theoretical advances in engineering and data analysis. In the laboratories, participants will be given the opportunity to use various computers and work on particular problems of their choice.

D4 DENTISTRY

STAFF

75/76

Professors – E.R. AMBROSE
Associate Professors – K.C. BENTLY *(Director – Oral Surgery);* R.F. HARVEY; R.G. JONES; J.J. McCARTHY; E.P. MILLAR; H. ROSEN *(Director – Restorative Dentistry and Prosthodontics)*
Assistant Professors – D. KEPRON; B. SEDLEZKY; D.S. SHAPIRO; J.W. STAMM; J.D. TOWNSEND
Lecturer – G.L. FREEDMAN
Guest Lecturers – J. FISET; D.C. GORDON; H.L. MUSSELLS; F.E. SHAMY; H. SKURNIK; J. VALIQUETTE; J. VINCELLI

REQUIREMENTS FOR THE DIPLOMA IN RESTORATIVE DENTISTRY AND PROSTHODONTICS

This program provides the student with a year of valuable experience in Prosthodontics (Restorative Dentistry) but it does not prepare him for the practice of a specialty. Admission is restricted to candidates who hold a D.D.S. or equivalent degree with good standing from an approved institution. Duration of the course is 12 months beginning in September. It consists of didactic lectures, case presentation seminars, treatment of clinical cases under supervision, report on clinical cases and teaching assistantships. For further information apply to Dr. Harry Rosen, Faculty of Dentistry.

MASTER'S PROGRAMS

Enquiries about a master's program in Oral Surgery should be addressed to Dr. K.C. Bentley, Director or Oral Surgery, Faculty of Dentistry and enquiries about a masters program in Restorative Dentistry and Prosthodontics should be addressed to Dr. H. Rosen, Director of Restorative Dentistry and Prosthodontics, Faculty of Dentistry.

D5 DEPARTMENT OF EPIDEMIOLOGY AND HEALTH

STAFF

Professors – R.O. OSEASOHN *(Chairman);* M.R. BECKLAKE; S.S. LEE; F.D.K. LIDDELL; A.D. McDONALD; J.C. McDONALD

Associate Professors – D.G. BATES; D.D. DAUPHINEE; L. DAVIGNON; P.V. PELNAR

Assistant Professors – S. DUCIC; G. EYSSEN; F.R. FENTON; R. FLETCHER; S. FLETCHER; G.W. GIBBS; J. HOEY; I. HOROWITZ; J.W. LELLA; J.G. LOHRENZ; J.-C. MARTIN; S.H. SHAPIRO; J.W.R. STAMM; N. STEINMETZ

Lecturers – D.C. BEWS; H. GHEZZO; A.K. PATERSON; B. POLLACK; R. WEST; F.M.M. WHITE

REQUIREMENTS

ADMISSION

Candidates for the Diploma will normally be medical or dental graduates of above-average ability. Candidates for higher degrees will either be such medical or dental graduates or be graduates in a relevant subject. M.Sc. candidates must hold at least a B.Sc. with second class Honours or equivalent, and for the Ph.D. must hold an acceptable Master's degree or equivalent. Candidates for the M.Sc. or Ph.D. program must present a thesis on some topic in epidemiology, community health, environmental health, occupational health, health care evaluation or medical statistics.

DIPLOMA

A course of study in community health sciences of one academic year. Students must complete at a satisfactory level or be exempted from eight courses. In addition, each student will be expected to undertake a project investigation and write a report on it.

M. Sc.

Candidates must pass examinations in (or be exempted from) 10 courses or otherwise pass a comprehensive general examination. The student must thereafter submit a thesis on an approved subject of research.

Ph.D.

After at least one year's instruction, training and direction, the student must satisfy the Department of his knowledge of the particular subject and of the general field of epidemiology. To this end, students may be required to take some or all of the courses listed below. The candidate must submit a thesis, but no earlier than a year after this comprehensive examination.

COURSES FOR HIGHER DEGREES AND DIPLOMA

513-010D PRINCIPLES OF DATA PROCESSING IN HEALTH SCIENCES. Lectures, demonstrations and supervised practical work covering: basic data handling on unit-record devices, use of statistical packages, McGill computing resources and procedures and introduction to programming and basic systems analysis, and discussion of wider applications of computers in medicine.

513-602A PRINCIPLES OF HEALTH STATISTICS. An introductory course concerned with measures of population, health and health service utilization; standardization; life tables and survivorship; cohorts and competing risks; and comparative health statistics.

513-604D GRADUATE SEMINARS. Scientific meetings and seminars of departmental interest.

513-605D COURSE FOR M.Sc. AND Ph.D. CANDIDATES. Prescribed course of study to meet a candidate's particular requirements.

513-606A PRINCIPLES OF EPIDEMIOLOGIC INVESTIGATION. An introductory course covering: the epidemiological approach in medicine and the uses of epidemiology; epidemiologic procedures in cross-sectional and cohort surveys, case-control studies and clinical trials; and casual factors in disease.

513-607A PRINCIPLES OF INFERENTIAL STATISTICS IN MEDICINE. An introductory course covering the following topics: variability and the need for statistics; confidence and significance; decisions; some basic statistical techniques; recognition of problems where these techniques are not applicable; design of experiments in relation to available tools of analysis.

513-608B ADVANCED EPIDEMIOLOGY. During this course a small number of selected topics within epidemiology or health care research are reviewed by the students. A tutor is available for each topic and students are asked to review the present state of knowledge and suggest practical lines for further investigation. The course provides much time for personal study and requires participation in seminars and written presentation.

513-609A PRINCIPLES OF MEASUREMENT IN EPIDEMIOLOGIC SURVEY. Lectures, discussion and field visits to examine, with experts from different fields, principles in the measurement of man and his environment of epidermiologic interest.

513-611B ELECTIVE IN HEALTH CARE RESEARCH METHODS. Detailed study through seminars, guided reading, etc. of the application of methods used by epidemiologists, clinical researchers and social scientists in the assessment of demand, need, efficiency and effectiveness in relation to health services.

513-612B ELECTIVE IN ENVIRONMENTAL HEALTH. An elective course providing opportunity for detailed study by seminars, guided reading, visits and assignments, to acquaint the student with principles of assessment of interactions between man and environment and with principles and organisation of prevention of damage to health from environmental hazards.

513-613B SPECIAL TOPICS IN EPIDEMIOLOGY AND HEALTH: ELECTIVE. A course providing opportunity for detailed study by seminars, guided reading, visits, practicals, assignments, etc. of an elected and approved topic of epidemiological importance.

513-614B PUBLIC POLICY IN THE HEALTH FIELD. A multidisciplinary course, examining, in seminars, through guided reading, etc., the evolution of public policy in the health field and its implementation, particularly in Quebec. The roles of various faculties and departments of McGill are placed in the context of existing Federal and Provincial policy, statutes and regulations.

513-621B STATISTICAL PROCEDURES IN MEDICINE. Lectures, discussion and guided practical work in the statistical procedures required in epidemiology, clinical research and health care studies, including univariate and multivariate parametric and non-parametric techniques.

513-622D SEMINAR ON THE APPLICATIONS OF STATISTICS IN THE HEALTH SCIENCES. Two overlapping series of seminars. In one, the students will be taught about the statistical problems arising in a wide range of current projects in the Faculty of Medicine; in the other, the students will make presentations providing solutions to these problems.

513-623B PROTOCOL FORMULATION IN HEALTH SCIENCES RESEARCH. Lectures and discussion, including student presentations, covering: scientific method; basic design; sampling and stratification; patient allocation and matching; bias and error; degrees of freedom and trial size; missing values; development of further hypotheses.

D6 SCHOOL OF HUMAN COMMUNICATION DISORDERS

The School of Human Communication Disorders offers both professional and research training. The research program leads to the M.Sc. and Ph.D. degrees.

STAFF

Professor – D.G. DOEHRING *(Research Director);* D. LING *(on leave)*
Associate Professor – K.K. CHARAN *(Director)*
Assistant Professors – B. BARTHOLOMEUS *(On leave);* N. CHAN; A.H. LING; M. SEITZ
Part-time teaching staff – Assistant Professors – S. MATTINGLY; D. MOSCOVITCH; C. REED
Sessional lecturers – L. DOWSON; J. DUDLEY; D. LECKIE; J. REED

REQUIREMENTS

REQUIREMENTS FOR THE M.Sc. (APPLIED) DEGREE

A limited number of candidates with undergraduate standing equivalent to a B average (3.0 on a four point scale) or better are accepted each year from McGill and elsewhere. Because of the rapidly-changing state of knowledge regarding speech and hearing disorders, emphasis is placed upon understanding of fundamental principles and critical evaluation of current methods rather than upon the teaching of specific techniques for diagnosis and therapy. Every effort is made to encourage active participation in the learning process in order that the student is prepared to function as a creative professional worker rather than as a technician.

This is normally a two-year program for which all candidates are required to present undergraduate preparation in closely allied areas appropriate to plans for specialization. The prerequisite subjects are three courses in psychology, and a course in statistical methods or an equivalent course. A knowledge of physics, mathematics, physiology, phonetics, linguistics, and modern developments in other related social sciences is desirable. In some cases, a qualifying year may be required before admission as a candidate for a degree. Candidates will normally follow a program in course work selected from those listed below. Each course is subdivided into several topics which may be presented by several different instructors. A three-month internship will be taken after the second year.

All relevant documents pertaining to the application must be received by March 31. Applications completed after this date may not be considered because of restricted enrolment.

REQUIREMENTS FOR THE M.Sc. AND Ph.D. DEGREES

Selected candidates may be nominated to the Faculty for a program of studies leading to the M.Sc. and Ph.D. degrees. In most cases, only applicants with prior training in some aspect of human communication disorders will be accepted as candidates for research degrees. An examination in a foreign language is not required.

COURSES FOR HIGHER DEGREES

401-610D BASIC SCIENCE OF HUMAN COMMUNICATION.

401-611D AUDIOLOGY AND AURAL REHABILITATION.

401-612D PHYSIOLOGY OF SPEECH AND HEARING.

401-613D SPEECH AND LANGUAGE PATHOLOGY.

401-620D ADVANCED LANGUAGE PATHOLOGY.

401-621D ADVANCED AUDIOLOGY.

401-622D ADVANCED SPEECH PATHOLOGY.

401-623D REHABILITATION OF THE AURALLY HANDICAPPED.

401-630D PRACTICUM.

401-640D RESEARCH METHODS.

401-641D INDEPENDENT PROJECT.

401-650D SEMINAR IN HUMAN COMMUNICATION DISORDERS.

401-660D LECTURES AND RESEARCH ON SELECTED ADVANCED TOPICS.

D8 DEPARTMENT OF MICROBIOLOGY AND IMMUNOLOGY

STAFF

Professors – S.I. VAS *(Chairman);* B.H. MATHESON; J.W. STEVENSON; W. YAPHE
Associate Professors – Z. ALI-KHAN; C.A. BUTAS; E.C.S. CHAN; P.M. COOKE; J. de VRIES*; P. GILL; L. KAPICA; G.K. RICHARDS*; H.G. ROBSON; R. SIBOO
Assistant Professors–A.F.DOSS,I.B.FABRIKANT; J. GORDON; V. GROH; R. HAND; E. MANKIEWICZ*; L. MARTINEZ; J.L. MEAKINS; J. MENDELSON*
Lecturer – S. NOMMIK*
Demonstrator – C. SHAW*

**Part-time.*

REQUIREMENTS

Candidates are required to hold a B.Sc. degree with at least second class Honours or the equivalent in Microbiology and Immunology or the M.D. degree with high standing in Microbiology, Biochemistry and Pathology. Those who do not meet the above qualifications may be required to take a two-year Master's program in order to complete course requirements.

REQUIREMENTS FOR THE M.Sc. DEGREE

Candidates who satisfy the general qualifications above may present themselves for examination for the M.Sc. degree after not less than one full year of research. The following requirements must be satisfied: (1) Presentation of a satisfactory thesis. (2) Attendance at Courses 528-602D and 528-703D and presentation of at least two seminar topics during the year. (3) Formal courses with examination where necessary (528-501D, 528-525B, 528-527B – see below).

REQUIREMENTS FOR THE Ph.D. DEGREE

Following satisfactory completion of the work for the M.Sc. degree candidates may present themselves for examination for the Ph.D. degree after not less than two full years of research. The candidate will be judged principally on his research ability and on the presentation of a satisfactory thesis. However, certain other requirements must

also be fulfilled: (1) Attendance of Courses 528-702D and 528-703D with the presentation of at least two seminar topics each year. (2) A comprehensive examination in Microbiology and Immunology (Course 528-701D) must be passed. It is held during the final year of study and at a time not later than six months before submission of the thesis.

COURSES FOR HIGHER DEGREES

SPECIAL FACILITIES: The clinical laboratory services in bacteriology, virology and mycology are available to candidates as a means of instruction and as a source of material for study.

ADVANCED UNDERGRADUATE COURSES

528-313B PARASITOLOGY.*
528-315B THE PATHOGENIC FUNGI.
528-422B PATHOGENIC BACTERIA.
528-423A MICROBIAL PHYSIOLOGY.
528-424A FUNDAMENTAL VIROLOGY.
528-425B PATHOGENIC VIRUSES.

GRADUATE COURSES

528-501D ADVANCED MICROBIOLOGICAL TECHNIQUES.
nstruction and as a source of material for study.

ADVANCED UNDERGRADUATE COURSES

528-313B PARASITOLOGY.*

528-315B THE PATHOGENIC FUNGI.

528-422B PATHOGENIC BACTERIA.

528-423A MICROBIAL PHYSIOLOGY.

528-424A FUNDAMENTAL VIROLOGY.

528-425B PATHOGENIC VIRUSES.

GRADUATE COURSES

528-501D ADVANCED MICROBIOLOGICAL TECHNIQUES.

528-525B PATHOGENIC VIRUSES.

528-527B INFECTIOUS IMMUNOLOGY.

528-602D GRADUATE SEMINAR – MASTER'S LEVEL.

528-701D COMPREHENSIVE EXAMINATION FOR Ph.D. CANDIDATES.

528-702D GRADUATE SEMINAR – Ph.D. LEVEL. Lectures and discussions once a week. All graduate students are required to participate.

528-703D CURRENT TOPICS IN MICROBIOLOGY AND IMMUNOLOGY. (Discussion groups with guest speakers)

D9 DEPARTMENT OF NEUROLOGY AND NEUROSURGERY

STAFF

Professors – W.H. FEINDEL *(Chairman);* D. BAXTER; G. BERTRAND; R. GILBERT; P. GLOOR; F.L. McNAUGHTON; BRENDA MILNER; T.B. RASMUSSEN; J.P. ROBB; J. STRATFORD; L. WOLFE

Associate Professors – A. AGUAYO; F. ANDERMANN; J. BLUNDELL; S. CARPENTER; J.B.R. COSGROVE; R. ETHIER; I. HELLER; GEORGE KARPATI; D. LAWRENCE; J. MARTIN; G. MATHIESON; HANNA PAPPIUS; A.L. SHERWIN; D. TROP; G. WATTERS

Assistant Professors – G. BRAY; R. CATCHLOVE; C. DILA; A.A. EISEN; M.H. FINLAYSON; R. FORD; B. GRAHAM; R. HANSEBOUT; I. LIBMAN; D. MELANCON; KATHERINE METRAKOS; MARY MORRIS; A. MORTON; A. OLIVIER; S. PRELEVIC; M. RASMINSKY; L. RENAUD; W.F.T. TATLOW; ELIZABETH WILKINSON; J. WOODS; L. YAMAMOTO*Lecturers*

Lecturers – EVA ANDERMANN; M. AUBE; G. BELANGER; L. CUADRADO; R. HOLLENBERG; P. HUMPHREYS; J.R. IVES; W. OLANOW; S. ROTHMANN; W. SHEREMATA; CLARA STRAUSS; L. TAYLOR; C. THOMPSON; B. YOUNGE

REQUIREMENTS

ADMISSION

Candidates for graduate degrees must first meet the general qualifications and requirements for admission to the Graduate School (for M.Sc. degrees see Section 4 and for Ph.D. degrees see Sections 18-27 of Faculty Regulations). A candidate must advise his prospective Research Director of his intent to enrol in a graduate study program leading to either an M.Sc. or a Ph.D. degree by May 15. The candidate's study program must be approved by 1) the director of the candidate's research and 2) by the Committee of Graduate Studies of the Department of Neurology and Neurosurgery. Registration as a graduate student cannot take place without the approval of this Committee.

The M.Sc. program is a two-year program. In exceptional cases upon recommendation by the Committee of Graduate Studies of the Department of Neurology and Neurosurgery this requirement may be reduced to a one year program for students who spend one full year of laboratory research.

The Ph.D. Program is a three-year program. For M.D.s it is not necessary to obtain an M.Sc. first.

COURSE REQUIREMENTS

a) NEUROSCIENCES SEMINAR. (Courses 531-602H) for two years with satisfactory examination at the end of each year. This seminar represents the "core program" of the graduate studies program of the Department of Neurology and Neurosurgery. The complete course extends over two years.

b) SELECTED BASIC SCIENCE COURSES from undergraduate or graduate programs in other departments or special courses in subdepartments within the Department of Neurology and Neurosurgery. The courses will be selected at the beginning of the student's Graduate Program after discussion with the candidate's Research Director and the Committee of Graduate Studies of the Department of Neurology and Neurosurgery. The courses will be selected to fill in or complement the student's background in the particular specialty of his graduate studies. Satisfactory credit for these courses has to be obtained. The method whereby the candidate is to be given credit is left to the discretion of the course directors involved and of the Director of the candidate's research, and will require some form of examination or an acceptable substitute.

c) SPECIALTY DISCUSSION GROUP AND SEMINARS. These seminars will be given informally in the various subdepartments and laboratories of the Department of Neurology and Neurosurgery. Recent developments and ideas will be reviewed with particular emphasis on critical discussion of current literature and experimental designs. No formal credit is required except for a reasonably regular record of attendance and active participation in seminar work.

d) PRESENTATION OF A THESIS. The final draft of the thesis has to be submitted to the candidate's Research Director at least 60 days before the deadline for submission of the final copy to the Faculty of Graduate Studies and Research.

GRADUATE COURSES

531-602H NEUROSCIENCES SEMINAR. Presentation and discussion of representative topics in the Neurosciences. This course covers scientific aspects of Clinical Neurology and Neurosurgery and the Basic Neurosciences. The complete course extends over two years and represents two course units.

SPECIALTY DISCUSSION GROUPS AND SEMINARS. For details, see above under "Requirements" and Faculty of Medicine Calendar.

D10 DEPARTMENT OF OTOLARYNGOLOGY

STAFF

Professors – J.D. BAXTER *(Chairman);* D.G. DOEHRING; D. LING *(on leave)*
Associate Professors – K.K. CHARAN; R.H. McCOY; J.S. OUTERBRIDGE; E.J. SMITH
Assistant Professors – E. ATTIA; B. BARTHOLOMEUS; A. GROSSMAN; M. MENDELSOHN; D. MOSCOVITCH; W.H. NOVICK; G. SHIMO
Lecturers – H. CAPLAN; A. COHEN; A. KATSARKAS; R. LAFLEUR; M.N. LEVITT; R.W. MacMILLAN

REQUIREMENTS FOR THE M.Sc. DEGREE

Students must hold an M.D. degree with appropriate prerequisites.

The major part of the student's time will be spent in research and a thesis covering this work will be the major requirement for the degree. In addition the student will be required to attend certain courses given in the Department and in cooperating departments.

GRADUATE COURSES

540-602D ADVANCED COURSE IN PHYSIOLOGY, HISTOPATHOLOGY AND CLINICAL OTOLARYNGOLOGY.

540-603D LECTURES IN BASIC SCIENCES OF OTOLARYNGOLOGY.
Each student will be required to take certain courses in cognate subjects, such as Neuroanatomy, Neurophysiology, Medical Statistics and Physiology Instrumentation. The courses to be taken will depend upon the candidate's background and the research problem being studied.

D11 DEPARTMENT OF PATHOLOGY

STAFF

Professors – ROBERT H. MORE *(Chairman);* R. BOLANDE; W.P. DUGUID; S.N. HUANG; D.S. KAHN; M. LEWIS; G. RONA; H. SHELDON; G. TREMBLAY
Associate Professors – S. CARPENTIER; J.C. HOGG; K.G. MARSHALL; D.M. MURRAY;

B.I. WEIGENSBERG
Assistant Professors – M.L. de CHAMPLAIN; A. FERENCZY; R.D.C. FORBES; I. HUTTNER; J.O. LOUGH; MOINUDDIN; J.B. RICHARDSON; T. SEEMAYER; J.L. WEBB;
Lecturers – P. BOLDUC; D. KALOUSEK

REQUIREMENTS

Ordinarily candidates for a graduate degree in Pathology should have received an M.D., D.V.M. or D.D.S. Students who have obtained a B.A. or B.Sc. or other degree may be considered for postgraduate training. At the end of the first postgraduate year, the candidate must demonstrate a satisfactory knowledge of general and special pathology, and of the methodology in his field of interest. Work published or accepted for publication during enrolment in the doctorate program is suitable for partial fulfilment of these requirements. Three years residence is normally required of a Ph.D. candidate. There is no language requirement for a doctorate in Pathology.

COURSES FOR HIGHER DEGREES

546-121M GENERAL BIOLOGY OF DISEASE. A co-ordinated course to be presented by the Departments of Epidemiology and Health, Genetics, Microbiology and Immunology, and Pathology during the third and fourth quarters. The course will be centred around the concept that disease results through the interaction of host and environmental factors.

Professor More and Staff

546-221M SPECIAL BIOLOGY OF DISEASE. A twenty-three week co-ordinated program during the first, second and third quarters which will present a general introduction followed by an organ-system approach to diséase.
Professor More and Staff

546-300A PRINCIPLES OF DISEASE. This course is an introduction to the study of disease. It is concerned with changes in normal structure and function and their causes at the host, tissue and cellular level. It considers the concepts of health and disease, and uses examples drawn from history, animal experiments and human experience in medicine. It is suitable for all students in biology. Students in U2/U3 will receive preference. There are no laboratories but students are expected to participate in seminars and a major paper is required.
Professor Sheldon

546-321M CLINICAL PATHOLOGICAL CONFERENCE. Weekly, prepared discussion in small group.
Professor Knaack

546-606D CLINICAL PATHOLOGY COURSES.
Professor Reesal

546-607A BIOCHEMICAL PATHOLOGY. A consideration of biochemical alterations involved in disease states.

546-608A BIOCHEMICAL AND ULTRASTRUCTURAL ASPECTS OF BLOOD. Ultrastructural and biochemical features of blood elements.

546-609A CELL REACTION TO MICROBIOLOGICAL AGENTS.

546-621B HEMATOPATHOLOGY.

546-701D COMPREHENSIVE EXAMINATION FOR Ph.D. CANDIDATES.
Supervisor and Staff

SCHEDULED GRADUATE SEMINARS (Pathology Institute)

The student may be expected to attend certain scheduled Departmental Seminars.

546-610D AUTOPSY REVIEW CONFERENCE. (2 hours/week).
Professor Huang

546-611D SURGICAL REVIEW CONFERENCE. (2 hours/week).
Professor Seemayer

546-612D COMPLETED CASE CONFERENCE. (1 hour/week).
Professors Huang and Seemayer

546-613D DEPARTMENTAL RESEARCH SEMINAR. (1 hour/week).
Professor Forbes

D12 DEPARTMENT OF PHARMACOLOGY AND THERAPEUTICS

The department offers work leading to the M.Sc. and Ph.D. degrees for students who have completed the B.Sc., M.Sc., M.D. or an equivalent degree with high academic standing. All applicants including McGill students are usually required to take the Graduate Record Examination Aptitude Test and to have letters of recommendation. Except for certain students holding the M.D. degree, the M.Sc. in pharmacology is not recommended as a primary objective. In addition to work in this department, students may be required to make up deficiencies in ancillary subjects such as biochemistry and physiology. Facilities are available for work in neuropharmacology, cardiovascular and renal pharmacology, autonomic pharmacology,

biochemical pharmacology, drug metabolism, and clinical pharmacology. A student is usually expected to undertake studies in several of these areas before selecting one for his thesis work.

Inquiries relating to all aspects of graduate study should be directed to the Director of Graduate Studies, Department of Pharmacology and Therapeutics as early as possible in each academic year.

STAFF

Professors – M. NICKERSON *(Chairman);* J. LOWENTHAL; J.R. RUEDY
As sociate Professors – B.G. BENFEY; B. COLLIER; N.R. EADE; A.H. NEIMS; R.I. OGILVIE; A.M. TENENHOUSE; J.M. TRIFARO
Assistant Professors – R. CAPEK; L.W.K. CHUNG; B. ESPLIN; M. KOVACS; G. KUNOS; P.J. McLEOD; R.E. RANGNO; J.B. RICHARDSON; B.I. SASYNIUK; M.S. YONG
Lecturers – J. ARANDA; R.O. DAVIES; F. HERR; W. LASKEY; G. OSHIRO; D.S. SITAR; J. WEYMAN

COURSES FOR HIGHER DEGREES

A basic course in Pharmacology is required for graduate students who have not previously taken an equivalent course. This is usually 549-461D (GENERAL PHARMACOLOGY) which includes consideration of the effects and mechanism of action of the more important groups of drugs.

The following courses are designed primarily for graduate students, but may be attended by others under special circumstances. These courses are given in a variable sequence depending on the interests and requirements of graduate students enrolled in the department.

***549-702B BIOCHEMICAL PHARMACOLOGY.** Interaction of natural and synthetic chemicals with subcellular or molecular entities in living systems.

549-703A NEUROPHARMACOLOGY. The basic actions of drugs affecting axonal conduction and synaptic transmission, with particular emphasis on the central nervous system.

549-704B DRUG DISTRIBUTION, METABOLISM AND EXCRETION. Mechanisms by which the body handles endogenous and foreign chemicals and the effects of these processes on the characteristics of drug action.

***549-705B CARDIOVASCULAR REGULATION AND DRUG ACTION.** Homeostatic regulation of cardiovascular function and its modification by drugs.

***549-706A CHEMICAL MEDIATORS AND AUTONOMIC DRUGS.** Interactions of drugs and chemical mediators to mimic, augment or inhibit responses to peripheral nerve activity.

***549-707A MOLECULAR PHARMACOLOGY.** Actions of drugs on specific tissue receptors; relationship of physical and chemical properties to the characteristics of drug action.

D13 SCHOOL OF PHYSICAL AND OCCUPATIONAL THERAPY

75/76

STAFF

Associate Professor – HELEN M. GAULT
Assistant Professors – ANNE-MARIE van DAELE; EDITH ASTON; JOAN WARD; PATRICIA WELLS

MASTERS PROGRAM

Enquiries concerning a masters program in Physical Therapy should be addressed to Professor van Daele, School of Physical and Occupational Therapy.

D14 DEPARTMENT OF PHYSIOLOGY

ADMISSION:

Students who have completed an Honours Program in Physiology or some other appropriate undergraduate program and who have been accepted by a research director and by the Department may register for the M.Sc. degree. After one year of study in the Department those M.Sc. students who display a high standard in research and course work may be permitted to proceed directly to the Ph.D. degree. Those students who do not enter the Ph.D. program at the end of M.Sc. 1 may be permitted to write an M.Sc. thesis. Students who obtain an M.Sc. degree may apply for entrance into the Ph.D. program.

COURSE REQUIREMENTS:

Research Seminars – M.Sc. students are required to give at least one seminar before submission of their thesis or before being permitted to enter a Ph.D. program. Ph.D. students are required to give a seminar at least once every two years. *Comprehensive Examination in Physiology* – required for the M.Sc. and/or the Ph.D. degree to show broad knowledge of Physiology and the

capacity to integrate this knowledge at the intermediate level. *Other Course Work* – Students are usually expected to complete at least two of the Department's advanced or graduate courses in their first year. Other course requirements will depend on their field of study.

The main research interests of the Department are at present the chemical and electrical behaviour of the nervous system, electron microscopy and muscle physiology, the release of physiologically active substances from tissues, transplantation reactions and tissue specificity, respiratory mechanics and control of ventilation, studies of sodium excretion in experimental edema, the biophysics of the muscle and of mechanoreceptors, labyrinthine responses to acceleration, enzyme technology, artificial kidneys, the study of the effects of air pollutants on the human lung, hemostasis, fetal and neonatal circulation.

STAFF

Professors – J. MILIC-EMILI *(Chairman);* R.I. BIRKS; T.M.S. CHANG; B.A. COOPER; J.H. DIRKS; P. GOLD; K. KRNJEVIC; F.C. MacINTOSH; G. MELVILL-JONES
Associate Professors – M.W. COHEN; D.R. FIRTH; W.S. LAPP; M. LEVY; G. MANDL; C. POLOSA; P. SEKELJ
Assistant Professors – M.M. FROJMOVIC; V. KLISSOURAS; P. KONGSHAVN; M. MACKEY; P. NOBLE; J.S. OUTERBRIDGE; A. WECHSLER; P. WELDON; R.L. WILLIAMS
Lecturers – M. HAZUCHA
Associate Members – R.F.P. CRONIN *(Prof., Med.);* B.O. DUBROVSKY *(As sist. Prof. Psychiatry);* E. FALLEN *(Assist. Prof. Medicine);* H.L. GOLDSMITH *(Prof. Exp. Medicine);* C.A. GORESKY *(Prof. Medicine);* P.T. MACKLEM *(Prof. Medicine);* J.M. McKENZIE *(Prof. Exp. Medicine);* M.M. MORRIS *(Assist. Prof. Anaesthesia);* D.H. MOSCOVITCH *(Assist. Prof. Otolaryngology);* J.F. SEELY *(As sist. Prof. Exp. Medicine)*

COURSES FOR HIGHER DEGREES

All courses are half courses except for 552-507D which is a full course.

552-502A EXERCISE PHYSIOLOGY. Offered in conjunction with the Faculty of Education.
Professor Klissouras

552-507D ADVANCED APPLIED RESPIRATORY PHYSIOLOGY. Offered in conjunction with the Department of Experimental Medicine.
Professor Engel

552-508A ADVANCED RENAL PHYSIOLOGY. Offered in conjunction with the Department of Experimental Medicine.
Professors Dirks, Levy and Seely

552-513A CELLULAR IMMUNOLOGY. Offered in conjunction with the Department of Experimental Medicine.
Professors Lapp and Gold

552-514B IMMUNOLOGY SEMINARS. Offered in conjunction with the Department of Experimental Medicine.
Professors Lapp and Gold

552-515A PHYSIOLOGY OF BLOOD I. Offered in conjunction with the Department of Experimental Medicine.
Professor Cooper

552-516B PHYSIOLOGY OF BLOOD II. Offered in conjunction with the Department of Experimental Medicine.
Professor Cooper

552-517B PHYSIOLOGICAL SUPPORT SYSTEMS.
Professor Chang

552-605B DYNAMICS AND CONTROL IN PHYSIOLOGICAL SYSTEMS. Offered in conjunction with Biomedical Engineering.
Professor Outerbridge

552-606A ADVANCED APPLIED CARDIOVASCULAR PHYSIOLOGY. Offered in conjunction with the Department of Experimental Medicine.
Professors Fallen and Goldsmith

552-610B BIOPHYSICS.
Professor Mackey

552-612A PHYSICAL METHODS IN BIOLOGICAL RESEARCH. Offered in conjunction with the Department of Experimental Medicine.
B. Murphy and D. Ross

552-631B SELECTED TOPICS IN APPLIED IMMUNOLOGY.
Professor Kongshavn

D15 DEPARTMENT OF PSYCHIATRY

STAFF

Professors – M. DONGIER *(Chairman);* M.K. BIRMINGHAM; H. CAPLAN; H. KRAVITZ; H.E. LEHMANN; A.W. MacLEOD; R.B. MALMO; A.M. MANN; H.B.M. MURPHY; T.L. SOURKES
Professor (Associate Member) – L.J. POIRIER
Professors Emeritus – R.A. CLEGHORN; E.D. WITTKOWER
Visiting Professor – P. SIFNEOS
Associate Professors – F. AZIMA; T.A. BAN; B.M. CORMIER; I.S. DISHER; P.G. EDGELL; W.D. ENGELS; F. ENGELSMANN; R.B. FELDMAN;

B.A. GIBBARD; B. GRAD; L. GRATTON; L.G. HISEY; E.P. LESTER; J.G. LOHRENZ; F.W. LUNDELL; D.J. McCLURE; H.F. MULLER; J. NAIMAN; R. PITTINGER; E.G. POSER; R.H. PRINCE; J.J. SIGAL; L. SOLYOM; J.R. UNWIN; H. WARNES; G. WEISS

Associate Professors (Associate Members) — J.A. CORSON; V.A. KRAL

Assistant Professors — N.R. ALDOUS; M.M. AMIN; J.V. ANANTHARAMAIAH; C.C.J. ANGLIKER; S. BARZA; J. BEAUBIEN; P.R. BECK; C. BOS; C. CAHILL; C.H. CAHN; J. CUMBERLAND; H. DAVANLOO; E.G. DEBBANE; S. DONGIER-MONTAGNAC; B. DUBROVSKY; S.Z. DUDEK; F. FENTON; H. GRAUER; H.A. GUTTMAN; G.P. HARNOIS; B.R. HUNT; S. LAL; A.P.N. LEE; J.W. LELLA; D.C. LEVIN; E.D. LEVINSON; J.G. MAGUIRE; G.F. MORGENSTERN; J.C. NEGRETE; G. PETERFY; D. PIVNICKI; M.S. RABINOVITCH; R.A. RAMSAY; C.C. SMITH; S. STEIN; G.C. TAYLOR; G. TURCOT; L. VACAFLOR; S. WILNER; N. WISEBORD; C. YUNG

Lecturers — E.H. ACHONG; R. ARBITMAN; K. ARVANITAKIS; H. AST; A. BARTOVA; P. BELIVEAU; C. BENIERAKIS; S. BIKADOROFF; L. BUFFETT; S. CAMPBELL; A.J. CARRE; G. CHOUINARD; J.D. CUTHILL; H.A. EVANS; P. GREGOIRE; L. GUERETTE; L. HECHTMAN; L. HUAPAYA; P. KACHANOFF; R. KELLER; T. KOLIVAKIS; I. KRAULIS; F.E. KRISTOF; C. LAROCHE; G. LAROCHELLE; F. LEAL; J. LEVY; G. LOW; H.P. MALMO; A.F. MESZAROS; R.C. MONKS; A.K. MULLER; N.P.V. NAIR; E. NALTCHAYAN; C. NOVELLA; D.P. NOWLIS; J.M. PAIEMENT; I. REBNER; B.M. ROBERTSON; M. ROMER; P.D.L. ROPER; J. RUIZ-NAVARRO; M. SALIB; P.D. SCULLY; R.W. SHEPARD; S.P. SIMONS; R.M. SMITH; A.A. SURKIS; D. TSANG; D.J. WOOD; S.N. YOUNG

REQUIREMENTS FOR THE M.Sc. DEGREE

Admission is restricted to candidates who hold an M.D. degree with good standing from an approved institution, and who have had not less than three years postgraduate training in Psychiatry in an approved centre.

The degree usually requires two years, but, under special circumstances, may be accomplished in one, spent wholly in research. The thesis topic and research subject must be approved beforehand by a committee headed by the Chairman of the Department of Psychiatry, and by the Dean of the Faculty of Graduate Studies and Research. The problem studied may belong to a clinical field, but a rigorous investigative approach must be utilized.

Adequate library and laboratory facilities are available in the Department of Psychiatry and are located in the Allan Memorial Institute of the Royal Victoria Hospital.

COGNATE SUBJECTS

Each student will be required to take certain courses in cognate subjects, such as Biochemistry, Endocrinology, Neurophysiology, Psychology, Sociology or Statistics. These will be determined upon the basis of the special field of Psychiatry in which the candidate's research work is being carried out.

GRADUATE PROGRAM IN TRANSCULTURAL PSYCHIATRY

1. The purposes of this program are:
   (a) to train researchers from psychiatry, anthropology and related disciplines for work in the borderland between cultural anthropology and international psychiatry;
   (b) to orient mental health practitioners and administrators from underdeveloped countries towards the need to consider the cultural backgrounds of their peoples; and to assist them in doing so.
2. The needs of trainees in this field being so varied, and also so influenced by their own backgrounds, the main emphasis in this program is on individual tuition and on the selection of courses in different departments to strengthen areas of knowledge and experience relevant to the individual's needs. Field experience under supervision is arranged as necessary, and two core courses are provided.
3. The M.Sc. in Psychiatry will be granted to suitably trained medical graduates upon the completion of an approved thesis.
4. For non-medical graduates the program can usually be taken in *part* fulfilment of the requirements for a Ph.D. or other higher degree, subject to the normal regulations of the departments concerned.

COURSES

555-711D CULTURE, PERSONALITY AND PSYCHOPATHOLOGY.
Professor Murphy and Staff

D16 DEPARTMENT OF DIAGNOSTIC RADIOLOGY

Application for admission as candidates for the M.Sc. degree will be considered from graduates in Medicine, Dentistry or Veterinary Medicine. Whose interests are directly concerned with the application of ionizing radiation in investigation and diagnosis. The normal admission standards of the Faculty will apply. Two years may be required to complete qualification for the degree in order to

include adequate knowledge of the fundamental sciences. Further information may be obtained from the Chairman of the Department.

D17 DEPARTMENT OF SURGERY

21-1/76

[Division of Surgical Research]

STAFF

Professors — A. THOMPSON *(Chairman);* L.D. MacLEAN; D.R. MURPHY
Associate Professors — DEIDRE M. WALDRON-EDWARD; J. GORDON; E.J. HINCHEY; S.C. SKORYNA
Assistant Professors — H.S. HIMAL; A.H. McARDLE
Lecturers — ANNA DANIEL; L. GREENBERG; C.A. LAURIN; N.M. SCHEINER; Y. TANAKA

Research Laboratories	*Directors*
Donner Building	J. GORDON
Montreal General Hospital	E.J. HINCHEY
Royal Victoria Hospital	H. SHIZGAL
Montreal Children's Hospital	A.D. MacKENZIE

REQUIREMENTS

Residents in Surgery in the teaching hospitals are eligible to enter the graduate program. Other applicants outside the surgical training program, who possess an M.D. or B.Sc. degree or equivalent may be admitted by special arrangement. The minimum full time residence for a Master's degree for those in the surgical training program is one year: for others it is two years. The minimum full-time residence for a Ph.D. program is three years for all candidates. All candidates registering for a degree must have a research director approved by the Chairman of the Department, or by his opposite in the other teaching hospitals.

The main research interests in the Department are at present; transplantation, experimental carcinogenesis, cardiovascular surgery, gastroenterology, shock water and electrolyte metabolism, and the effects of thermal injury. In addition, several research projects are conducted in surgical specialties. In view of these varied interests, only one seminar course is made compulsory for all candidates; two others are recommended.

Additional courses are to be selected on the basis of each candidate's field of research, in consultation with his research director.

COURSES RECOMMENDED

519-502D SURGICAL ANATOMY. 1 hour weekly and demonstrations in anatomy laboratory to undergraduate medical students or an equivalent course in another basic science department.

177-373A BIOMETRY. 2 hours lectures, 2 hours laboratory. *(See Faculty of Science announcement under Biology).*

SCHEDULED GRADUATE SEMINARS

The Royal Victoria Hospital (1 hour per week)

CARDIOVASCULAR-THORACIC CONFERENCE.
ACCIDENT SURGERY SEMINAR.
GENERAL SURGERY SEMINAR.
NEOPLASTIC SEMINAR.
COMBINED MEDICAL-SURGICAL GASTROINTESTINAL CONFERENCE.
SURGICAL LITERATURE SEMINAR (RECENT ADVANCES).
TRANSPLANTATION CONFERENCE.
ORTHOPAEDIC CONFERENCE.
PLASTIC SURGERY SEMINAR.
SURGICAL GRAND ROUNDS.

The Montreal General Hospital (1 hour per week, or in some cases alternate week)

RESEARCH SEMINARS, UNIVERSITY SURGICAL CLINIC.
GASTROENTEROLOGY CONFERENCE.†
OPHTHALMOLOGY CONFERENCE.
CARDIOVASCULAR-THORACIC CONFERENCE.
GENITO-URINARY CONFERENCE.
NEUROSURGERY CONFERENCE.
TUMOUR BOARD CONFERENCE.
COMBINED MEDICAL-SURGICAL CONFERENCE.†
TRAUMA CONFERENCE.
COMBINED SURGICAL CONFERENCE.†
ORTHOPAEDIC CONFERENCE.
CARDIAC CONFERENCE.†

Assistant Professor — Y. TANAKA
Research Associates and Consultants — B.B. BIBLE *(Nutrition);* M.A. FRANKLIN *(Microbiology);* R.G. FRASER *(Radiology);* W.F. GRANT *(Cytogenetics);* C.C. HARRIS *(Haematology);* A. HURLBURT *(Biochemistry);* K.C. HONG *(Marine Biochemistry);* D.S. KAHN *(Pathology);* P.V. KINGSTON *(Clinical*

Investigation); F.D. LIDDELL *(Epidemiology and Statistics);* E. ROSENTHALL *(Mathematics);* M.A. VISWANATHAN *(Plant Physiology)*

The Institute was established in 1959 to provide an interdisciplinary research facility and graduate education in enterology. The research program correlates different fields, such as botany, zoology, bacteriology, physics, chemistry and clinical investigation, in problems concerning the alimentary canal and nutrition. The policy of the Institute since its inception is to encourage interdepartmental activity, as well as integrate interdisciplinary research in relation to the digestive system.

E1 SCHOOL OF ARCHITECTURE

STAFF

Professors – JOHN BLAND; PETER COLLINS; NORBERT SCHOENAUER *(on leave)*; STUART WILSON
Associate Professors – BRUCE ANDERSON; JOSEPH BAKER *(on leave)*; DEREK DRUMMOND; *(Acting Director)*; BRIAN McCLOSKEY; JOHN SCHREIBER; RADOSLAV ZUK
Assistant Professor – WITOLD RYBCZYNSKI

REQUIREMENTS FOR THE M. Arch. DEGREE

The Master of Architecture degree is a post-professional degree and is offered in the areas of Architectural Design and Housing. Students holding the McGill B.Arch. degree with at least second class standing or having equivalent professional qualification, are eligible to proceed to the M.Arch. degree.
N.B. Information concerning duration of program, documents required of applicants, etc. may be obtained from the Secretary of the School of Architecture. The application deadline is March 15.

COURSES

ARCHITECTURAL DESIGN

Students in Architectural Design are required to complete 30 credits of course work which must include Architectural Design I and II, Graduate Seminar I and II and additional courses to be approved by the thesis adviser. In addition they are required to submit a thesis approved by the Director of the School and by the Faculty.

HOUSING

Students in Housing are required to complete 30 credits of course work which must include one of the following courses, Urban Housing I and II, Minimum Cost Housing I and II, Shelter Systems for Developing Societies I and II or Community Design Workshop I and II, as well as the Graduate Seminar I and II and additional courses to be approved by the thesis adviser. In addition, they are required to submit a thesis approved by the Director of the School and by the Faculty.

301-205A HISTORY OF HOUSING. (2 hours.)
Professor Schoenauer

301-610A, 301-611B ARCHITECTURAL DESIGN I, II. (2 hours tutorial and studio work)
Professors Bland, Zuk and Staff

301-615A, 301-616B GRADUATE SEMINAR I, II. (2 hours.)
Staff and Visitors

301-620A, 301-621B URBAN HOUSING I, II. (2 hours tutorial and studio work)
Professor Schoenauer

301-625B HOUSING THEORY (2 hours.)
Professor Schoenauer

301-630A, 301-631B MINIMUM COST HOUSING I, II (2 hours tutorial and studio work.)
Professor Rybczynski

301-640A, 301-641B SHELTER SYSTEMS FOR DEVELOPING SOCIETIES I, II. (2 hours tutorial and studio work)
Professor McCloskey

301-644C SHELTER FIELD OPERATIONS. (Supervised field work)

301-650A, 301-651B COMMUNITY DESIGN WORKSHOP I, II. (2 hours tutorial and studio work.)
Professor Baker

E2 BIOMEDICAL ENGINEERING UNIT

The academic program of the Unit is designed to enable qualified graduate students to pursue interdisciplinary studies in engineering and medicine. The program has been structured mainly for engineers, but applicants from the biological and medical sciences are encouraged. Graduate students for the M.Sc., M.Eng., and Ph.D. degrees will be registered in the Faculty of Graduate Studies & Research through appropriate departments.

Current research in the Unit is concerned with neuromuscular control, especially in posture and eye movement; mechanics of the normal and scoliotic spine; physiology of vestibular, auditory and mechano-receptors; neurol communication theory; diagnostic techniques and signal processing in otology, encephalography and cardiology; sensory aids; systems analysis of hospital units.

Opportunities for interdisciplinary research also exist in a number of departments in the Faculties of Engineering and Medicine.

COURSES FOR HIGHER DEGREES

Note that all courses are not necessarily given every year. Prospective students are advised to inquire in September for details (Local 4328).

399-611B BIOLOGICAL CONTROL SYSTEM THEORY. (3 lectures, second term.) Control system structure and information flow: homeostasis and neuromuscular systems; neuromuscular control, locomotion, oculomotor system, respiration, the human operator, thermo-regulation, cardiovascular control, endocrine control systems; adaptive and optimizing control structure and theory, performance criteria, growth, positive feedback and mutual causality.

399-613B SENSORY COMMUNICATION THEORY. (3 lectures, second term.) Sensory receptors and neural coding; signal transmission and aspects of information processing in the vestibular, auditory, and visual systems; neural modelling; methods of pulse frequency modulation; analysis of multi-unit multipath neural systems; information processing in theoretical neural networks. Student Projects.
Professor Lee

399-621B ENGINEERING BIOPHYSICS B. (3 lectures, second term.) Biochemical thermodynamics; criterion for equilibrium; phase equilibrium; chemical reaction equilibrium; the equilibrium constant, electro-chemical cell potentials, ATP degradation; chemical kinetics; fluid flow; mass transfer; biological role of water; bio-macromolecules; proteins, nucleic acids, polysaccharides, polyelecrolytes; biological effects of ionizing radiation; buffers, osmotic pressure, acid-base balance.
Professor Neal

399-622A ENGINEERING BIOPHYSICS A. (3 lectures, first term.) Membranes; structure, electrical properties, passive transport, active transport; models of membrane; nerve conduction. Biological control at molecular level. Microscopy. X-ray diffraction. Radioactivity. Biophysical instrumentation and measurements.

399-623B PRINCIPLES OF MEDICAL SCIENCE. (2 lectures, second term; Prerequisite: Physiology 552-211D or equivalent.) This course is designed to acquaint engineers with the principles and techniques of clinical practice and research, emphasizing those areas where bioengineering may contribute. Sessions are held in the McGill-associated hospitals, each led by a medical specialist. Specialized areas studied include: diagnosis; iron metabolism; ECG's pacemakers and intensive-care cardiac units; respiratory function, disease and xenon measurements; artificial dialysis; general and orthopaedic surgery.
Staff

399-631B BIOMEDICAL ENGINEERING TECHNIQUES AND INSTRUMENTATION. (3 lectures second term.) Selected topics in the area of application of technology, systems theory and computer science to problems in health care. The level of presentation will assume adequate mathematical and technological background, including differential equations, transform techniques, basic instrumentation and computer programming. The material presented in this course changes every year allowing in-depth exploration of different areas of biomedical engineering activity. Major areas of interest are methods of bio-signal-analysis, computer evaluation of ECG, industrial engineering methods in hospitals, computer application in clinical laboratories and intensive care units, health information systems.

399-641A SYSTEM CONCEPTS AND COMPUTER APPLICATIONS FOR BIOLOGY AND MEDICINE. (2 lectures, 2 laboratories, first term.) Basic concepts and methods necessary for the application of computer and system techniques in physiology and medicine. The course is designed to enable the life scientist to utilize recent practical and theoretical advances in engineering and data analysis. In the laboratories, participants will be given the opportunity to use various computers and work on particular problems of their choice.

E3 DEPARTMENT OF CHEMICAL ENGINEERING

STAFF

Professors – W.J.M. DOUGLAS *(Chairman);* J.M. DEALY; M.R. KAMAL; G.A. RATCLIFF *(on leave)*

Associate Professors – T.J. BOYLE; J.M. CHARRIER; O.M. FULLER; J.R. GRACE; J. VERA; M.E. WEBER

Assistant Professor – A.S. MUJUMDAR; B. VOLESKY

Special Lecturers – M. AVEDESIAN; N.E. COOKE; F. EL HOSSEINY; R. LEVESQUE; A. RUDZINSKI

Senior Research Associate – W.H. GAUVIN
Research Associates – J. BRUNET
Associate Members – H.L. GOLDSMITH *(Experimental Medicine)*; J.L. NEAL *(Paediatrics)*

DEGREE REQUIREMENTS

Advanced courses and laboratory facilities are available for graduate study leading to the M.Eng. and Ph.D. degrees in Chemical Engineering. Before making formal application for admission to the Dean, applicants should write to the Chairman of the Department, from whom additional information on Departmental research and on financial support is available.

REQUIREMENTS FOR THE M.Eng. DEGREE

A student may satisfy the requirements for the degree by completing one of the following options:

A) 45 credits including a maximum of 24 credits in courses of which at least 15 credits are graduate chemical engineering courses. The balance of the requirements should be devoted to a research project leading to the submission of a thesis.

B) 45 credits including at least 24 credits of graduate chemical engineering courses and at least three approved courses outside the Department of Chemical Engineering selected in one area to constitute a "minor". The student is required to take 5 to 9 credits towards completing a chemical engineering design or research project leading to a project report.

At least one full session (or two half sessions) of resident study at McGill University is required for this degree. This is a minimum requirement, and it will usually require more than this period to complete the work for the degree.

REQUIREMENTS FOR THE Ph.D. DEGREE

Candidates with a bachelor's degree in chemical engineering normally register for the M.Eng. degree in the first instance.

Candidates with an acceptable master's degree or equivalent from another university will normally proceed directly to the Ph.D. degree. The course work undertaken by a Ph.D. candidate will be decided in the light of his academic qualifications, the requirements of his research, and his own interests.

Minimum time requirement is two years beyond the M.Eng. degree (or equivalent elsewhere).

GENERAL

There are no language requirements for either degree. All students must demonstrate a proficiency in digital computer programming and give a research colloquium.

RESEARCH

Research may be undertaken in any branch of Chemical Engineering or in related fields. Current projects are in the following areas: fluid and particle dynamics, mass transfer, heat transfer and cryogenics, diffusion, combustion, ion exchange, chemical and biochemical reactor design, coupled transport processes, air and water pollution control, thermodynamics, mixing, solid-liquid separation, catalysis, rheology, biological and microbial processes, gas-liquid contacting, reactions in electric discharge, polymer processing and mechanical properties, food processing, process simulation and systems engineering.

The Department has two professionally-staffed workshops, one specializing in mechanical construction, the other in electronics. In addition, a student shop and a dark-room are available. Among the special purpose laboratories are two constant-temperature rooms.

Specialized equipment in the department includes: a laser doppler anemometer system, a Mach-Zender interferometer and He-Ne laser, d.c. arc and r.f. induction plasma generators and reactors, transient response equipment, a horizontal and a vertical wind tunnel, turbulence analysis equipment, ultrasonic vibration generators, high speed analog to digital convertor, instrumentation grade tape recorder, thermal diffusivity apparatus, differential scanning calorimeter, thermogravimetric analyser, capillary rheometer, large amplitude rheometer, cone-and-plate viscometer. Instron mechanical test apparatus, vibrating capacitor electrometer. Couette dispersion apparatus, mechanical spectrometer, injection molding machine, extruder, high speed photography facilities, photo-optical data analyser, particle counter, continuous dilution calorimeter and total pressure apparatus for thermodynamic measurements, fermentation equipment, sterilizer-autoclave. The Department has a complete range of analytical equipment including UV, IR and atomic absorption spectrometers, beta and gamma scintillation spectrometers, and a variety of gas chromatography apparatus.

Access to an IBM 360/75 digital computer is provided either through conventional batch processing or through a time-sharing terminal located in the Department. A General Electric GEPAC 4020 Computer, installed in the Engineering Building, is used for data logging of experiments and processing of logged data. The computer can accept analogy signals (DC volts, frequency, time interval and resistance) from many experiments simultaneously. The Department has approximately 100 input channels to the GEPAC in its laboratories. In addition, the Department has an EAI TR-20 analog computer, a programmable electronic calculator and a mini computer for process control.

COURSES FOR HIGHER DEGREES

Courses are given if registration is sufficient. Symbols preceding course numbers have the following significance:

† Courses given every year if sufficient registration.

†† Courses given every second year if sufficient registration.

††† Courses given if sufficient student interest and registration

†† **302-594B FERMENTATION ENGINEERING.** (2 hours, 1 term.) Engineering aspects of biochemical and microbiological processes. Design and scale-up of fermentation equipment. Oxygen transfer. Instrumentation, Agitation and aeration. Sterilization techniques. Recovery and application of enzymes. Immobilized enzyme process. Separation techniques including reverse osmosis and ultrafiltration.

Professor Volesky

†302-611A HEAT, MASS AND MOMENTUM TRANSPORT. (3 hours, 2 term.) Unified treatment of the transport of mass, momentum and energy.

Professor Douglas

302-614C APPLIED TRANSPORT PHENOMENA. Transport phenomena strategy, formulation of physical and mathematical models; analytic, numerical, and approximate solutions; application to problems from a range of industries.

†302-621B THERMODYNAMICS (3 hours, 1 term.) Review of thermodynamic principles. The foundations of thermodynamics with application of its methodology in the field of multicomponent, multiphase, multireaction ideal and non-ideal systems. A detailed study of equilibrium and stability of thermodynamic systems with emphasis on the construction of phase diagrams.

Professor Dealy

†302-631A FOUNDATIONS OF FLUID MECHANICS. (3 hours, 1 term.) Review of basic concepts and equations; flow of inviscid fluids including conformal mapping, axisymmetric flows, and free streamline theories; creeping flows; Stoke's solution and the Oseen linearization for flow past spheres; empirical and statistical approaches to the study of turbulence; boundary layer theory; drag on solid bodies; introduction to rheology, multiphase flows, and the study of instabilities.

Professor Grace

†302-641B CHEMICAL REACTION ENGINEERING. (3 hours, 1 term.) Interpretation of chemical reaction data, especially for heterogeneous systems. Residence time, complete segregation, maximum mixedness, other advanced concepts. Reactor design.

Staff

††302-652A,B PRINCIPLES AND PRACTICE (2 hours, 1 term.) Fundamentals of drying and the application of these fundamentals to various industrial processes. Fundamentals of drying; Psychrometry; absorption; transport phenomena in porous media; heat transfer in laminar and turbulent flows, to particles, beds, and surfaces; evaporation from drops and surfaces; simultaneous heat and mass transfer; drying characteristics for batch and continuous drying. Industrial drying: applications to areas such as drying of paper, pharmaceuticals, food products, grain; spray drying, freeze drying, fluidized bed drying. Design project.

†302-653C ADVANCED PROCESS DESIGN (3 hours, 1 term.) Advanced techniques and concepts in the design of chemical processing plant and equipment.

Staff

†302-661A MATHEMATICAL METHODS IN CHEMICAL ENGINEERING. (3 hours, 1 term.) Calculus of variations, Pontryagin's maximum principle, approximate solution to differential equations (direct variational methods), discrete maximum principle, selected applications in optimization, transport phenomena, and irreversible thermodynamics.

Staff

†302-662A COMPUTATIONAL METHODS (2 hours, 1 term.) Selected topics of value in chemical engineering, including integration and solution of sets of differential equations, curve fitting, and optimum-seeking methods

Staff

302-663A,B. SIMILITUDE, MODELS, AND SCALING. The determination of similarity criteria by dimensional analysis and inspectional analysis; the regime concept, distorted models, quasi-similar models, analog modelling, and modelling by differential scaling. These concepts and methods will be applied in cases that relate to boundary value problems in research and to the scale up (or down) of industrial processes.

†302-681A POLYMER CHEMICAL ENGINEERING. (3 hours 1 term.) The application of chemical engineering fundamentals to the preparation of processing of polymers. Classification and characterization of polymers, reaction media and kinetics of polymerization, reactor design, viscoelasticity and rheology, processing techniques, extrusion, molding, composite formation, adhesion, etc.

Professor Kamal

302-682B ENGINEERING PROPERTIES OF POLYMERIC MATERIALS Mechanical and transport properties of non-crystallizing and crystallizing thermoplastics, rigid thermosets, fibers, films, elastometers and composites with particle and fiber reinforcement. Elasticity, visco-elasticity, ultimate properties, diffusion of liquids and gases, thermal and electrical properties.

†††302-691D SELECTED TOPICS IN CHEMICAL ENGINEERING. (1 to 3 hours, 1 term. May be given twice a year).

†302-695A,B,C PROJECT IN CHEMICAL ENGINEERING Independent work, under the general direction of a full-time staff member of the Chemical Engineering department, on a problem of industrially-oriented design or research. The work

must lead to a comprehensive project report.
Staff

†302-696A,B,C **EXTENDED PROJECT** Extended independent work on a problem of industrially-oriented design or research, leading to a comprehensive project report.
Staff

††302-712B **HEAT TRANSFER.** (2 hours, 1 term.) Advanced treatment of heat transfer in convection, boiling and in particulate systems. Application of numerical methods and correlation of data.
Professor Weber

††302-713B **MASS TRANSFER.** (2 hours, 1 term.) Study of diffusive and convective mass transfer across interfaces. Turbulent transport and the transport of ions. Film and penetration theories and methods of predicting mass transfer rates for bubbles, drops, and plane surfaces.
Professor Weber

†††302-732B **RHEOLOGY OF LIQUIDS.** (1 hour, 1 term.) Rational mechanics, formulation of rheological models, purely viscous fluids, linear and nonlinear viscoelasticity, viscometric flows, extensional flows, experimental methods; laboratory demonstrations.
Professor Dealy

†††302-733B **MIXING** (2 hours, 1 term.) Basic definitions and concepts; molecular, eddy, and bulk diffusion; solids mixing; macromixing and micromixing and their influence on conversion and selectivity in chemical reactors; reactor models; mixing of viscous liquids; turbulent mixing in stirred tanks.
Professor Grace

†††302-742A **INTRODUCTION TO CATALYTIC PROCESSES.** (2 hours, 1 term.) Physical structures of solid catalysis, effects of structure on selectivity and activity, catalyst life and regeneration, standard methods of catalyst preparation special preparation methods, properties of catalysis for homogeneous reactions, examples of solid catalysis in the chemical industry.
Professor Fuller

††302-751B **FLUIDIZATION.** (2 hours, 1 term.) Incipient fluidization. Equations of Continuity and Motion. Regimes of fluidization. Liquid-fluidized beds. Bubble phenomena. Mixing. Heat and mass transfer. Elutriation. Chemical reactor models. Design and scale-up problems. Applications.
Professor Grace

††302-771A **PROCESS DYNAMICS AND CONTROL.** (2 hours. 1 term.) Mathematical modelling of industrial processes. Dynamic characteristics of models and real processes. Modal analysis and control of processes.
Professor Fuller

†302-783A **SPECIAL TOPICS IN POLYMER ENGINEERING.** (3 hours, 1 term.) Seminars and discussions on selected advanced problems of polymer engineering.
Professors Kamal, Charrier and Dealy

††302-793A,B **BUBBLES, DROPS AND PARTICLES.** (2 hours, 1 term.) Mechanics and transfer processes of gas bubbles, liquid drops and solid particles in motion through fluids. Analogies and important differences between the three types of fundamental particles. Motion and transfer processes at low and high Reynolds and Peclet numbers, wall effects, influence of surface active impurities, and other interfacial effects, turbulence effects, unsteady motion, effects of transpiration. Particle/particle interactions are not considered in detail. Course intended to cover the fundamentals of the particles which are basic to much of engineering practice and to many phenomena.
Staff

E4 DEPARTMENT OF CHEMISTRY

STAFF

Professors – L.E. ST.PIERRE *(Chairman)* B. BELLEAU; G.C.B. CAVE; J.T. EDWARD; A EISENBERG; D.F.R. GILSON; D.N. HARPP; J.F. HARROD; G.E. JUST; S.G. MASON; M. ONYSZCHUK; D. PATTERSON; A.S. PERLIN; R.F. ROBERTSON; C.A. WINKLER; L. YAFFE;

Associate Professors – I.S. BUTLER; T.H. CHAN; P.G. FARRELL; J.M. FRESCO; W.C. GALLEY; A.E. GROSSER; K.K. OGILVIE; D.J. SIMKIN; M.A. WHITEHEAD

Assistant Professor – A.G. SHAVER

Senior Research Associate – D.A.I. GORING

Research Associates – H. BOLKER; R. ST.JOHN MANLEY; A.A. ROBERTSON

Associate Members – G. DONNAY *(Crystal Chemistry);* H.L. GOLDSMITH *(Medicine);* G.B. SAHA *(Nuclear Medicine)*

REQUIREMENTS

ADMISSION

The minimum academic standard for admission is normally a high second class standing. Applicants from other institutions should have an academic background equivalent to that of a McGill graduate in honours chemistry or major in chemistry. If possible a candidate should specify the field of research in which he is interested

All inquiries concerning graduate work in the Department of Chemistry should be addressed to the Chairman of the Admissions Committee, Department of Chemistry.

REQUIREMENTS FOR THE M.Sc. AND Ph.D. DEGREES

1. Students must take such examinations as may be required in (a) assigned courses given in the Department of Chemistry, (b) assigned cognate courses given in other departments, (c) assigned foreign languages.

Courses are assigned after taking into consideration the student's previous training and the field of his research interest.

2. Students must complete successfully a research project and submit an acceptable thesis thereon.
3. Students must satisfy the examiners in an oral examination on the thesis and related subjects (required only of candidates for the Ph.D. degree).
4. All the usual requirements of the Faculty of Graduate Studies and Research must be satisfied.

FINANCIAL ASSISTANCE

Financial assistance for accepted graduate students who do not hold fellowships or scholarships is normally available in the form of laboratory demonstratorships/assistantships, and occasionally by payment from research funds. Graduate students who are awarded an assistantship are required to devote between 6-8 contact hours per week during the academic session of their teaching duties. Financial assistance during the four summer months is provided from research funds.

EXAMINATIONS IN CHEMISTRY

1. Examinations in assigned courses are normally taken by the candidates in January and May. In special circumstances, and with the permission of the Department and the Faculty, they may be taken in September.
2. A candidate for the Ph.D. degree shall pass all such examinations, other than those in certain special courses, before the final year, except in special circumstances and then only with the approval of the Department.

RESEARCH IN CHEMISTRY

Members of the Department of Chemistry are active in directing research in the following fields:

ANALYTICAL

Molecular complexes; solvation and polymerization in non-aqueous solutions; complex ions; metal ion separations; hydration and solvation in solvent extraction; kinetic processes in analytical chemistry; specific ion electrodes.

BIO-ORGANIC

Enzyme chemistry; protein and nucleic acid structure and function; active site stereochemistry; molecular basis of regulation and pharmacological action.

BIOPHYSICAL

Excited electronic states of proteins and nucleic acids; spectroscopic probes of biopolymer conformation; sensitized photochemistry in biopolymers; dynamics of protein and nucleic acid conformations.

COLLOID AND POLYMER

Monomolecular layers; solution properties of high polymers; molecular morphology; electrokinetics; absorption; rheology and stability of dispersions; phase transitions in polymers; polymer reinforcement; radiation effects and solid-state polymerization; mechanisms of polymerization reactions; wetting and spreading; the glass transition; molecular dynamics and polymer properties; ionic polymers; cellulose and paper; carbohydrate biopolymers; pollution abatement; polymer melt rheology; synthetic latices; rheo- and electro-optical phenomena.

INORGANIC

Germanium and silicon chemistry; coordination of Group III, IV and V halides; inorganic polymers; I.R. laser Raman, N.M.R., N.Q.R., and mass spectra of inorganic and organometallic complexes; inorganic reaction mechanisms; catalysis.

ORGANIC

Synthesis and structure of heterocyclic compounds; steroids; natural products; carbohydrates; cellulose; lignin; reactions in strong acids; photo-chemistry; plant-growth regulators; organic sulphur, phosphorus, and silicon chemistry; stereochistry; ^{13}C NMR; reaction mechanisms; charge transfer complexes; new synthetic methods; conformational analysis; solvation effects; substituent effects; polymer supports.

PHYSICAL

Molecular beams; laser excited elementary reactions; matrix isolation of radicals; high resolution and "wide line" N.M.R.; Mössbauer Effect spectroscopy; nuclear quadrupole resonance; electron spin resonance; emission and absorption spectroscopy; addition agents in the electrodeposition of metals.

RADIOCHEMISTRY AND NUCLEAR CHEMISTRY

Elucidation of nuclear reactions using the McGill synchrocyclotron and Chalk River nuclear reactors; fission and spallation reactions; decay scheme studies; characteristation of new radioactive species.

THEORETICAL

Ab initio and semi-empirical molecular orbital theory; d-orbitals; population analysis; self-consistent coulomb and overlap integral calculations; atom and molecule scattering theory; theory of transport processes; chemical kinetics in gases and liquids.

COURSES FOR HIGHER DEGREES

ADVANCED UNDERGRADUATE COURSES

Any of the following courses may be required of a student who is admitted to the Graduate Faculty if the equivalent has not been taken previously. Descriptions of these courses may be found in the Faculty of Science Announcement.

180-352B STRUCTURAL ORGANIC CHEMISTRY (3 lectures)

180-353A SURFACE CHEMISTRY. (1 lecture)

180-356A INTRODUCTORY QUANTUM CHEMISTRY (2 lectures)

180-372B SYNTHETIC ORGANIC CHEMISTRY. (3 lectures)

180-381A CHEMISTRY OF THE TRANSITION ELEMENTS. (3 lectures)

180-383B INTRODUCTORY STATISTICAL MECHANICS. (1 lecture)

180-387D ANALYTICAL CHEMISTRY. (1 lecture and 3 hours laboratory.)

180-392D INTEGRATED INORGANIC/ORGANIC LABORATORY. (4 hours)

180-404B PHYSICAL CHEMISTRY OF BIOPOLYMERS.

180-452A PHYSICAL ORGANIC CHEMISTRY.

180-455B INTRODUCTORY POLYMER CHEMISTRY

180-457B INSTRUMENTAL METHODS OF ANALYSIS.

180-475A CHEMICAL KINETICS

180-477A ELECTROANALYTICAL CHEMISTRY.

180-481A,B MODERN TOPICS IN INORGANIC CHEMISTRY.

180-482A ADVANCED ORGANIC CHEMISTRY.

180-485A SURFACE AND COLLOID CHEMISTRY.

180-487A SELECTED TOPICS IN MODERN ANALYTICAL CHEMISTRY.

180-493A INTRODUCTION TO STATISTICAL THERMODYNAMICS.

180-497B ANALYTICAL SPECTROSCOPY.

GRADUATE COURSES

180-602A NUCLEAR MAGNETIC RESONANCE SPECTROSCOPY. A general survey of nuclear magnetic resonance spectroscopy. The analysis of first and second order spectra. Theory of chemical shifts and coupling constants. Applications of n.m.r. in various areas of chemistry will be discussed.
Professor Gilson

180-603B INFRARED AND RAMAN SPECTROSCOPY. Applications of group theory to vibrational spectroscopy; theory of molecular vibrations; determination of molecular structures and vibrational assignments; instrumental design and experimental techniques; "group" frequencies; recent developments.
Professor Butler

180-605B ELECTRONIC SPECTROSCOPY. Theory of electronic spectra of molecules including organic molecules and inorganic complexes. Energy levels, molecular symmetry and selection rules; vibrational interactions with electronic states. A discussion of current experimental techniques including; absorption, fluorescence, phosphorescence, circular dichroism, magnetic circular dichroism, and photo electron spectroscopy.

180-621A RECENT ADVANCES IN ORGANIC CHEMISTRY. The mechanisms of the most common organic reactions, from studies of reactions in the current literature. Reference text; R. Breslow, "Organic Reaction Mechanisms" (Benjamin).
Professor Edward

180-622A HETEROCYCLIC COMPOUNDS. The properties and reactions of heterocyclic compounds, especially aromatic derivatives, and considerations of the mechanisms of these reactions. The spectroscopy of heteroaromatic compounds.

180-623B ORGANIC STEREOCHEMISTRY. Recent advances in conformational analysis, with particular reference to steroids, alkaloids, and carbohydrates, application of optical rotation, rotary dispersion, u.v., i.r., and n.m.r. spectroscopy to conformational problems.
Professor Edward

180-624B SPECIAL TOPICS IN ORGANIC CHEMISTRY. An advanced course in mechanistic and structural organic chemistry, together with detailed consideration of special topics; these topics will be decided just prior to the session and may include photo-chemistry, organic chemistry of sulphur and phosphorus, some aspects of medicinal chemistry etc. Further details may be obtained from the instructor.
Professor Farrell and Staff

180-625B ORGANOMETALLIC CHEMISTRY. The course covers topics of current interest in the field. Intended for advanced graduate students who are doing research in organometallic chemistry.
Staff

180-626D CHEMICAL CONTROL OF LIFE PROCESSES. Topics of current interest in medicinal chemistry; molecular pharmacology; the chemical synthesis and mode of action of drugs; receptor chemistry; drug design; chemotherapy; active site chemistry.
Professor Belleau and Staff

180-631D SELECTED TOPICS IN ANALYTICAL CHEMISTRY. A directed reading course with individual student-professor conferences, and intended mainly for students specializing in analytical chemistry. Topics are chosen to meet the individual needs of each student.
Professors Cave and Fresco

180-645A QUANTUM MECHANICS. Brief review of solvable problems in nonrelativistic quantum mechanics; perturbation theories, time-dependent and time-independent; angular momentum, spin and rotation group; semiclassical theory of radiation; light scattering. Rayleigh and Ramant; theory of scattering; second quantization; theory of many-electron systems and its application to molecules and atoms.
Professor Whitehead

180-646A STATISTICAL THERMODYNAMICS. Fundamental hypotheses; microcanonical, canonical grand canonical ensembles; ideal gases, monatomic, diatomic, and polyatomic; chemical equilibria; Meyer's theory of cluster expansion; distribution functions for liquids; lattice statistics; quantum statistics.
Professor Eu

180-666D SPECIAL TOPICS. Critical and original essays are required on various subjects of current interest in chemistry.
Staff

180-671A ORGANIC CHEMISTRY OF SYNTHETIC AND NATURAL POLYMERS. A survey presenting an integral view of polymer chemistry with equal emphasis on both natural and synthetic polymers. All biopolymers are included: polysaccharides, proteins, nucleic acids, rubbers, and lignins.
Dr. Bolker

180-672A THE POLYMER SOLID STATE. Melting and crystallization phenomena in linear high polymers; crystal structure, defects, and morphology in macromolecular crystals.
Dr. Manley

180-673B POLYMERS IN SOLUTIONS. Thermodynamics of regular and of polymer solutions; osmotic pressure; phase separations; polymer configuations; light scattering; ultracentrifugation; viscometry; gel permeation chromatography; polyelectrolytes.
Dr. Goring and Professor Patterson

180-674B INTRODUCTORY PHYSICAL CHEMISTRY OF POLYMERS. A survey course on the structure of polymers; kinetics and mechanisms of polymer synthesis; molecular weight distributions; polymer configurations and the thermodynamics of polymer solutions; rubber, elasticity, osmometry and viscosity.
Professor St. Pierre

180-675B MECHANICAL PROPERTIES AND RHEOLOGY OF POLYMERS. Mechanical properties of polymers; glass transition, visco-elasticity, rubber elasticity, failure. Relation to molecular properties; mechanical spectroscopy, dielectric properties, birefringence.
Dr. Robertson and Professor Eisenberg

180-681A SELECTED TOPICS IN RADIOCHEMISTRY. This course is intended for graduate students who may be using radio-active tracers in their future work. The fundamentals of radioactivity are discussed, types of radiations which are encountered, methods of measurement of these radiations, radio-chemical separations, design of radio-chemical laboratories and health precautions to be taken. In addition to this, some lectures will be devoted to selected topics such as activation analysis. 14C dating, determination of the age of the earth by radioactive methods, energy production in the sun and stars, etc.
Professor Yaffe

180-682D NUCLEAR CHEMISTRY. Radioactivity; nuclear models; liquid drop, shell, Nilsson, and Fermi gas; a-decay; b-decay; y-decay; nuclear reactions, nuclear fission.
Professor Hogan

180-720D COLLOQUIUM. Each student is required to participate in Research Colloquia which are held regularly in the department. These involve the presentation and discussion of papers dealing either with the student's own research or with recent research publications.

E5 DEPARTMENT OF CIVIL ENGINEERING AND APPLIED MECHANICS

Advanced courses of instruction and laboratory facilities are available for engineering graduate students desiring to proceed to the degrees of M.Eng. and Ph.D.

Graduate studies and research are at present being conducted in the fields of structures and structural mechanics, fluid mechanics and hydraulics, soil behaviour, soil mechanics and foundations, traffic and transportation engineering, sanitary and municipal engineering, and urban and environmental systems engineering.

STAFF

Professors – P.J. HARRIS; R.G. REDWOOD *(Chairman)*; B. STAFFORD SMITH; R.N. YONG

Associate Professors – R.G. COX; R.D. JAPP; M.S. MIRZA; J.C. OSLER; A. PAKALNINS; S.B. SAVAGE; D.A. SELBY; C.J. TURKSTRA *(on leave)*

Assistant Professors – V.J. CHU; A.R. COOK; F.L. HART; E. McKYES; D. MITCHELL; D. PANAGIOTAKOPOULOS; G.R. THOMAS

REQUIREMENTS

ADMISSION

The general rules of the Faculty apply and are detailed at the beginning of the calendar. The minimum academic standard for admission is normally a high second class standing.

REQUIREMENTS FOR THE M.Eng. DEGREE

Candidates may satisfy the requirements for this degree by following one of two options; in Option A, 30 credits of course work are normally required, plus a research thesis; in Option B, a total of 45 credits are required, consisting of 36 to 40 credits of course work, plus a project. All courses have a weight of 4 credits, with the exception of 303-664A, which is weighted at 5 credits. It is usually required that a student take a course in mathematical methods appropriate to his interests, and other courses must be determined in consultation with the candidate's director of studies or research. In Option A a thesis describing the candidate's research is to be submitted in accordance with the rules of the Faculty of Graduate Studies and Research. At least one full session (or two half sessions) of resident study at McGill University is required for the degree. This is a minimum requirement, and usually a longer period will be necessary.

REQUIREMENTS FOR THE Ph.D. DEGREE

Candidates normally register for the M.Eng. degree, Option A, in the first instance. However, candidates who have a Master's degree acceptable to the Department may be considered for direct registration for the Ph.D. degree. The Ph.D. program consists of a research project and courses as required to develop the candidate's background. Candidates are expected to take a comprehensive preliminary oral examination within the first year of their Ph.D. registration. They must fulfil the requirements outlined in the general rules of the Faculty. There is no foreign language requirement.

COURSES FOR HIGHER DEGREES

303-602B FINITE ELEMENT ANALYSIS. Prerequisite: 303-608A.) Development of simple and high order two and three dimensional, plate bending and shell elements. Displacement models, stress and hybrid models. Applications with emphasis on the static solution of two and three dimensional solids.
Professor Thomas

* **303-603B STRUCTURAL DYNAMICS.** General theory of structural response to periodic and aperiodic forces. Spectrum methods. Numerical methods. Earthquake analysis.
Professor Turkstra

* **303-604B THEORY OF PLATES AND SHELLS.** Analysis of stress and deformation of plates bent by transverse loads. Plates on elastic supports. Energy and approximate methods of solution. Anisotropic plates. Membrane theory of shells. General theory of cylindrical shells. Symmetrical bending of shells of revolution. Applications of theory to plate and shell structures.
Professor Harris

303-605A STABILITY OF STRUCTURES. Beams subject to axial and lateral loads. Columns with various end conditions. Buckling of frames. Buckling beyond the proportional limit. Columns of variable cross section. Latticed columns. Lateral buckling of beams. Buckling of plates and shells.
Professor Redwood

* **303-606B PLASTIC STRUCTURAL ANALYSIS.** Basic theorems. Limit analysis and elastic-plastic deflections of frames. Frame instability and strain hardening effects. Non-proportional loading. Minimum weight design.
Professor Redwood

* **303-607B DESIGN IN METALS.** Physical properties of metals, residual stresses, design concepts. Column theories, column strength, beam-column design, structural frames. Plastic design concepts, ultimate strength, axial forces with bending shear forces with bending . Economic design considerations.
Professor Redwood

303-608A ADVANCED STRUCTURAL ANALYSIS. Advanced topics in matrix analysis, substructures, transfer matrices, rank technique, mixed methods, finite differences applied to continua, computation methods, structural optimization, fully stressed design, minimum weight design by mathematical programming.
Professor Thomas

* **303-609A STRUCTURAL SAFETY.** Structural safety analysis and code formulation based on probabilistic models and decision concepts. Elementary reliability analysis — classical and approximate solutions. System reliability. Formulations suitable for implementation in codes. Applications in modern building codes.
Professor Turkstra

* **303-610B SPECIAL TOPICS IN STRUCTURAL MECHANICS.** Special problems in the theory and design of structures. These may include topics in the theories of elasticity and plasticity and advanced theories of shell structures.

303-618A DESIGN IN CONCRETE I. Concrete physical properties, creep, shrinkage; review of ultimate strength design; combined loadings; design of frames and flat plates limit design, yield line theory; prestressed concrete, partial prestressing and load balancing. The course will include group projects.
Professor Mirza

303-619B DESIGN IN CONCRETE II. Design topics will be selected from among the following: shear walls and deep beams, slender members, applications of probabilistic concepts to structural concrete design, analysis and design of folded plates, cylindrical shells, tanks, arches and bridges, special topics in prestressed concrete.
Professors Harris and Mirza

303-620B STRUCTURAL MODELS. Structural model; direct and indirect models; demonstration models; theory, similitude and dimensional analysis; materials, fabrication, loading and instrumentation techniques; confidence levels; research projects to illustrate the use of qualitative and quantitative models to study structural behaviour.
Professor Mirza

***303-621A BEHAVIOUR OF CONCRETE STRUCTURES.** Behaviour of reinforced and prestressed concrete members in flexure, shear, torsion and combined modes of loading. Forces at steel-concrete interface. Crack propagation and failure.
Professor Mirza

***303-640A TRANSPORTATION ENGINEERING I.** Technological characteristics of various modes of transport, integration of models into a transportation system. Theory of transportation networks, shortest route and minimum cost equilibrium models.
Professor Cook

***303-641B TRANSPORTATION ENGINEERING II.** (Prerequisite: 303-640A.) Analysis of data to develop models to predict future traffic and design future networks. Techniques for evaluating alternative plans, feasibility analysis of transportation systems.
Professor Cook

303-642B TRANSPORTATION SYSTEMS ANALYSIS. Quantitative analysis and forecasting of urban and regional travel demand; trip generation, trip distribution, Modal split analysis, trip assignment, and transport-related land use models; design and synthesis of transportation systems.

303-645B TRAFFIC FLOW AND CONTROL. (Prerequisite: a course in probability and statistics.) Characteristics of traffic flow, microscopic and macroscopic flow theories, theory and application of traffic control techniques, traffic signal systems, expressway surveillance and control.
Professor Cook

***303-650A DISTRIBUTION AND COLLECTION SYSTEMS.** Principles and practice of water transmission, distribution and storage design. Surface drainage and wastewater collection systems. Analysis, reinforcing and modification of existing systems. Economic aspects of systems and transmission.
Professor Pakalnins

***303-651A THEORY OF WATER TREATMENT.** Physical chemical and microbiological aspects of surface, ground and treated waters. Gravimetric, volumetric and instrumental analysis of water samples. Principles of conventional and advanced water treatment methods for public water supplies. Water conditioning for industrial uses. Synthesis of treatment operation to produce water of a specific gravity.
Professor Pakalnins

***303-652B THEORY OF WASTEWATER TREATMENT.** Waste surveys, wastewater characteristics and laboratory analyses. Ecology metabolism and population kinetics of micro-organisms, and their role in the various waste treatment processes. Conventional and advanced physical, chemical and biological processes of domestic and industrial waste treatment.
Professor Pakalnins

***303-653A STREAM POLLUTION AND CONTROL.** Physical and chemical pollution and bacterial contamination of surface and groundwaters. Environmental health aspects of pollution. Planning and practice of pollution surveys. Data analysis and reports. Analysis of stream water quality and waste discharge standards in North America and Europe. Correlation and control of the discharge conditions and the degree of water and wastewater treatment, domestic and industrial.
Professor Pakalnins

***303-654B SANITARY ENGINEERING DESIGN.** Complete problems in site selection, layout and design of water and wastewater treatment plants. Control and economic aspects of primary, secondary and tertiary plant operation.
Professor Pakalnins

***303-655A WATER RESOURCES ENGINEERING.** Legal, economic, conservational and technological aspects of the use of water resources. The concept of existing supplies and resource allocation. Planning factors and related problems of land use. Analysis of water quality management in North America and abroad.
Professor Pakalnins

303-656A SYSTEMS ANALYSIS ENGINEERING. Introduction to systems analysis and mathematical optimization; structuring and solution of mathematical programming models with emphasis on linear and dynamic programming; sensitivity analysis and trade-off among design factors; application of systems analysis techniques to the solution of complex problems in the private and public sectors.
Professor Panagiotakopoulos

***303-664A MATHEMATICAL METHODS IN ENGINEERING RESEARCH.** Vectors, tensors, and matrices and applications in engineering research; potential theory. Boundary value problems, integral transforms, asymptotic and similar solutions. Variational methods.
Professor Savage and Staff

303-665B APPLIED ELASTICITY AND TENSOR CALCULUS. Scalars, vectors and tensors; second order symmetric tensors, principal axes, eigenvectors and eigenvalues; the stress and strain tensors; homogeneous isotropic materials; plane stress and plane strain; stress functions in cartesian and polar coordinates; complex variable methods in two-dimensional elasticity; torsion of non-circular sections; strain energy methods; theories of elastic breakdown.
Professor Harris

***303-666B URBAN AND ENVIRONMENTAL ENGINEERING SYSTEMS** (Prerequisite: 303-656A and probability theory.) Advanced topics in the application of mathematical programming techniques and probability theory to the solution of urban and environmental engineering problems.
Professor Panagiotakopoulos

303-667A PLASTICITY. Criteria for yielding; Ideal behaviour, elastic-plastic, ideal plastic, rigid plastic; Non-ideal behaviour, work hardening, strain hardening; Physics of plastic behaviour, yield and failure; Principal stress space, ideal and non-ideal; Yield surfaces; Stability Postulates; Plastic Potential; St. Venant's Postulate; Plastic stress-strain relations, Levy-Mises, Prandtl-Reuss; Uniqueness; Limite Theorems.
Professor Yong

* **303-670B WATER WAVES AND ALLIED MOTIONS.** Motions of seas and rivers and their interaction with bottom and shore; deep and shallow water surface waves of all types, dispersion and non-linearity; conservation equations, wave interaction; internal waves; inertial waves.
Professor Savage

303-672A HYDRAULICS I. Design of channels for non-uniform flow; computation of backwater curves, effect of ice and obstructions. Computations of unsteady flow in open channels; abrupt waves, flood waves, tidal propagation. Navigation locks: manifold design. Water intakes.
Professor Savage

* **303-673B HYDRAULICS II.** Water hammer in pipe systems. Surge tanks: purpose, types and design. Turbines and turbine governing: design of hydraulic turbines; governing stability and response. Cavitation.
Professor Chu

* **303-674A FLUID MECHANICS OF POLLUTION I.** Application of fluid mechanics to problems in water pollution control; Mixing, dilution and dispersion of pollutants discharged into lakes, rivers, estuaries, and oceans; Salinity intrusion in estuaries and its effects on dispersion; Biochemical oxygen demand and dissolved oxygen as water quality indicators; Mixing in stratified flow; Thermal pollution; Sewage disposal in the ocean outfall; Oceanic diffusion processes; Oil pollution.
Professor Chu

303-675A FLUID MECHANICS OF POLLUTION II. Application of fluid mechanics to problems of air pollution; Properties and sources of air pollution; Atmospheric turbulent diffusion; Characteristics of atmosphere boundary layers; Stable and unstable atmosphere; Aerodynamics of plumes; Wind tunnel modelling and similitude; Coagulation and setting of particles; Visibility and pollution.
Professor Cox

303-680A FUNDAMENTALS OF SOIL BEHAVIOUR. Physical and chemical properties of clays; clay-water interaction, soil structure, soil-water potential. Infiltration and diffusion, volume changes. Soil strength parameters, pore water pressures and parameters.
Professor Yong

303-681B ENGINEERING ASPECTS OF SOIL BEHAVIOUR. (Prerequisite: 303-680A.) Consolidation phenomenon, shear strength of cohesive soils, granular soil strength, soil freezing, soil dynamics, creep properties. Equilibrium and compatibility. Yield criteria.
Professor Yong

303-682A APPLIED SOIL MECHANICS. Composition and properties of natural soils and rock; geologic processes of formation and alteration, site investigations, evaluation of engineering properties for design applications. Case records involving influence of in-situ properties on predicted versus actual performance. Compaction, statistical compaction control. Improvement of soil and rock properties.
Professor Osler

303-683B ADVANCED FOUNDATION DESIGN. Design of shallow foundations, bearing capacity and settlement, combined footings and rafts; eccentric and inclined loads, footings in slopes, machine foundations. Deep foundations; caissons and piers, piles, pile groups, tension piles. Tunnels and tunnel linings, flexible culverts. Earth pressures, retaining walls, sheeting and bracing, cofferdams. Case records of foundation performance including failures.
Professor Osler

303-684B GROUNDWATER AND SEEPAGE. Flow of incompressible fluids through porous media, fundamentals of groundwater flow, confined and unconfined flow, conformal mapping, graphical flow nets and the use of analogs, flow through earth structures, transient flow surfaces, numerical solutions by means of digital computers.
Professor Japp

***303-685B DRAINAGE ENGINEERING.** Hydraulics of wells, pumping tests, theories of flow into auger holes and drain tubes, seepage from canals and ditches, seepage control in earth structures, soil stabilization by drainage, relief wells, sand drains, foundation drainage and construction de-watering. Surface drainage problems and unsaturated flow.
Professor Japp

***303-686A EARTHWORK ENGINEERING.** Design and construction of earth and rock fills, stability, improvement of stability with berms, etc.; techniques of fill placement over soft ground, induced pore pressures during fill placement. Stability of cuts in soil and rock, techniques of analysis, influence of pore pressures on stability. Intereaction between embankments and adjoining structures, such as abutments. Case records of embankment performance and failures.
Professor Osler

***303-687B PAVEMENT DESIGN.** Types and properties of bituminous materials,, laboratory testing; design of bituminous concrete mixes, construction control. Analysis of rigid and flexible pavement systems using elastic and viscoelastic theory. Design of airfield and highway pavements. Moisture content changes beneath pavements, frost action and frost susceptibility of soils, soil stabilization. Pavement evaluation and strengthtening.
Professor Osler

***303-688A SOIL DYNAMICS.** Basic system dynamics, wave propagation in solids, wave propagation in soils, constitutive relations, dynamic equilibrium and stability, yielding, strain-rate effects, behaviour of soils subjected to cyclic and impulsive loadings.
Professor Japp

***303-689B DYNAMICS OF FOUNDATIONS AND EARTH STRUCTURES.** Design of foundations subjected to vibratory and impulsive loadings, evaluation of dynamic soil properties, lumped mass analogies, earthquake effects in slope stability and earth-work structures.
Professor Japp

303-690D RESEARCH PROJECT. This project relates to the M.Eng., Option B, degree.

***303-724B ADVANCED TOPICS IN CONCRETE STRUCTURES.** Seminar approach to current research topics in the field of concrete structures

303-771B SPECIAL TOPICS IN FLUID MECHANICS. After the development of the general equations of motion, emphasis will be placed on various mathematical methods applied to problems in fluid mechanics. Similarity methods; singular perturbation analysis; method of characteristics; integral methods. Examples will be chosen from various fields.
Professor Savage

***303-791A PHYSICS AND CHEMISTRY OF SOILS I.** Crystallographic structure of soil particles, clay-water electrolyse systems, X-Ray and D.T.A. studies, concepts of soil water, potentials in soil-water systems.
Professor Yong

***303-792A MECHANICS OF PARTICULATE MEDIA.** (Prerequisite 303-667B.) Properties of particulate media, contact theory, equilibirium and compatibility, elastic-plastic problems, single phase and two phase systems. Yield criteria, critical state analyses, micro and macro analysis, stress distribution, arching effects, bulk flow problems.
Professor Yong

***303-793B PHYSICS AND CHEMISTRY OF SOILS II.** (Prerequisite: 303-791A.) Thermodynamics of clay-water interaction, soil freezing, ion and base exchange, clay-water interaction and environmental effects in relation to engineering properties.
Professor Yong

***303-794A SPECIAL TOPICS IN SOIL MECHANICS.** Special problems in research, theory, application and design related to Soil Mechanics.
Professor Yong

E6 SCHOOL OF COMPUTER SCIENCE

The School of Computer Science provides instruction and research at the graduate level in theory and applications of computer science. Its programs are based on close cooperation with computer science activities in other departments of the University. It offers programs leading to the degrees M.Sc., M.Sc. (Applied) and Ph.D. in Computer Science, with courses predominantly from those outlined below, augmented by courses in other departments, and with research activities directed either by the staff of the School or members of associated Faculties for candidates interested in particular computer applications.

STAFF

Professors — G. MARSAGLIA *(Director)*; W.D. THORPE
Associate Professors — T.H. MERRETT; C.C. PAIGE; G.F.G. RATZER; A.M. VALENTI
Assistant Professors — K. ANANTHANARAYANAN; D.J. BURRAGE; N. MAROVAC; M.N. NEWBORN; R.A. RECKHOW; G.L. TOUSSAINT
Lecturer — A. GREENBERG

REQUIREMENTS

REQUIREMENTS FOR THE M.Sc. DEGREE

Candidates with a good background in mathematics and experience in computer programming may be admitted to this program. Candidates who have inadequate backgrounds may be admitted but will be required to take additional qualifying courses. Each candidate's program will be planned individually, taking into account his background and interests. His adviser will be responsible for providing a balanced program,

subject to review by the staff of the School.

Two programs are offered, leading respectively to the degrees of M.Sc. and M.Sc. (Applied).

M.Sc.

Normal requirements are a thesis and six half-year courses. Courses will be chosen with guidance by the candidates' adviser, subject to approval by the staff of the School.

M.Sc. (APPLIED)

This is a two-year program, normal requirements for which are nine half-year courses and three computer applications projects. The projects are to be supervised by different faculty members. Candidates may obtain approval of the staff of the School to combine two or all three projects into an enlarged project. Courses will be chosen with guidance by the candidates' adviser, subject to approval by the staff of the School. The application deadline for all programs is 1 April.

COURSES FOR HIGHER DEGREES

308-573B MINI-COMPUTERS (3 hours) Characteristics of mini computers; their internal structure. Assembler and machine language programming with emphasis on PDPII. Assemblers, loaders and simulators for several machines. Manufactures' supplied software including operating system. Mini computer applications. Students will be assigned "hands-on" projects.
Professor Ratzer

308-610A INFORMATION STRUCTURES. (3 hours.) Theory and practice of storing and manipulating numerical and non-numerical data. Records, files, lists, strings, stacks, trees, graphs. Accessing and storage, sorting and searching. Combinatorial studies of complexity and efficiency of algorithms for data manipulation.
Professor Lalonde

308-611B DATA STRUCTURE AND LIST PROCESSING TECHNIQUES. (3 hours.) This half-course is intended for those who wish to study computer programming techniques intensively. Topics involve discussion and comparison of programming techniques for creation, deletion and manipulation of different types of lists and tree structures. Their application to symbol manipulation.

308-614A COMPUTER METHODS IN SYSTEMS ANALYSIS I. (3 hours.) This half-course is intended for those who wish to develop an analytical approach to economic, commercial and industrial problems which involve complex systems of highly interactive components. The emphasis on computer simulation will be complemented by discussion of the underlying theory. Topics: discrete simulation — queuing theory, inventory theory, applications to operating systems, continuous simulation. Special languages and application packages: GPSS, GASPII, Simscrip II.
Professor Merrett

308-615B COMPUTER METHODS IN SYSTEMS ANALYSIS II. (3 hours.) This half-course is concerned with the structure, organisation and retrieval of information with emphasis on computer and data base techniques. Applications to commercial problems and library science are discussed. Topics: Dictionaries. Logical, statistical and syntactical analysis of information. Retrieval. File organisation. Data base retrieval systems. Evaluation of computer methods. Applications.
Professor Merrett

308-620A PROGRAMMING LANGUAGES AND COMPILERS. (3 hours.) The structure of programming languages. Syntax and semantics of algorithmic languages. List processing, string manipulating and simulation languages. Compilers, interpreters, translators and processors.

308-621B THEORETICAL ASPECTS OF COMPILER CONSTRUCTION. (3 hours.) Context-free grammars and formal definition of programming languages. Top-down and bottom-up syntactical analysis. Precedence analysis, LR(K) grammars and other special classes allowing effective analysis. Syntax directed transductions and push-down assemblers. Other parsing machines. Generalized stack techniques.

308-624A HIGH-LEVEL COMPUTER LANGUAGES I. (3 hours.) Comparative studies and advanced concepts in high-level computer languages, selected from ALGOL 60, APL PL/1, COBOL, SNOBOL and others.

308-625B HIGH-LEVEL COMPUTER LANGUAGES II. (3 hours.) An intensive study of recent developments in high-level language construction and development with particular emphasis on new concepts and implementation.

308-630A FORMAL LANGUAGES AND AUTOMATA THEORY. (3 hours.) Languages, phrase structure grammars. The Chomsky hierachy: regular, context-free, context-sensitive and type O languages and their corresponding recognition devices. Reductions on grammars; normal forms; operations on languages; closure properties and decidability results. Applications to programming languages.

308-631B THEORY OF ALGORITHMS AND COMPUTATIONAL COMPLEXITY. (3 hours.) Algorithms of Markov. The universal algorithm. Turing machines. Computability: recursive functions and Church's thesis. Post correspondence problem and other undecidable problems. Computational complexity; machine-based complexity; time and space requirements for various computations. Random access machines and other models for digital computers. Efficiency of algorithms.
Professor Butler

308-640A NUMERICAL ALGORITHMS I. (3 hours.) Computers are unable to represent all real numbers exactly, and as a result many computed answers differ drastically from their true mathematical results. This course explains how this can occur, and how we can avoid such disasters. Many of the important algorithms in computational linear algebra will be covered, including those for solution of equations, least squares, eigenvalues, singular values, generalized inverses, and linear programming. The emphasis will be on numerical stability of algorithms and efficient usage of the computer.
Professor Paige

308-641B NUMERICAL ALGORITHMS II. (3 hours.) The study and use of computational algorithms for solving non-linear algebraic equations in one and in several variables; approximation using polynomials, splines, and fourier series; fast transforms; ordinary and partial differential equations. Important computational properties such as numerical stability of algorithms and economy of computer time and storage will be considered. Required background includes a previous numerical course and FORTRAN programming.
Professor Paige

308-644A PATTERN RECOGNITION I. (3 hours.) Feature extraction methods in organisms and machines. Preprocessing techniques. Trainable pattern classifiers. Discriminant functions and their implementation via parametric and non-parametric training. Threshold logic units and perceptrons. The statistical approach to pattern recognition. Sequential classification. The approximation of probability distributions in classifier structure design. Estimation of density functions. Experimental methodology and applications.
Professor Toussaint

308-645B PATTERN RECOGNITION II. (Prerequisite 308-644A). Design and analysis of pattern recognition experiments. Estimation of misclassification. Nonparametric techniques in classification and density estimation. Sequential classification. Automatic feature evaluation and selection. Unsupervised learning and clustering. Compound decision theory and the use of context. Applications.

308-650A COMBINATION ALGORITHMS I. (3 hours.) Network Flows: Maximal flows, solution by the labelling method, capacitated modes, flows in undirected or mixed networks. Relation to linear programming. Shortest paths and minimal cost algorithms, with application to the transportation problems, the optimal assignment problem, the warehousing problem. Multiterminal networks. Equivalent networks. Computers of large problems.

308-651B COMBINATORIAL ALGORITHMS II. (3 hours.) Topics in constructive graph theory including various algorithms for determining isomorphism, planarity and connectivity of graphs, finding longest paths; generation procedures for various classes of graphs. This course is a continuation of 308-650A.

308-660A NUMERICAL METHODS IN OPTIMIZATION I. (3 hours.) The use of computers in solving unconstrained and constrained optimization problems. Direct search, gradient, quasi-Newton, and penalty function techniques. Methods which treat the constraints directly, as for example in linear programming. A numerical approach will be taken and students will program and develop algorithms for solving large problems on the computer. Required background includes computational linear algebra, FORTRAN, and hopefully, ALGOL.
Professor Paige

308-661B NUMERICAL METHODS IN OPTIMIZATION II. (3 hours; prerequisite: 308-660A.) The use of computers in solving large or complex optimization problems. Emphasis on recently developed techniques in optimization. Extension of gradient methods to constrained problems. New fast and numerically stable algorithms for linear programming. Lagrange parameter techniques. Students will program techniques for different optimization problems, and compare them for accuracy, efficiency, and general usefulness.
Professor Paige

308-666A COMPUTER METHODS IN OPERATIONS RESEARCH I. (3 hours.) Use of the computer in problems arising in operations research. Resource allocation, inventory and production control. Applications of linear programming and its extensions.
Staff

308-667B COMPUTER METHODS IN OPERATIONS RESEARCH II. (3 hours; prerequisite: 308-666A.) Critical path planning and scheduling. Simulation. Applications of queuing theory. Monte Carlo theory, graph theory. Network flows. Applied dynamic programming.
Staff

308-671B COMPUTER SYSTEMS AND ORGANIZATION. (3 hours.) Control and scheduling of large information processing systems. Operating system software – resource allocation, dispatching, processors, access methods, job control language, main storage management. Batch processing, multiprogramming, multiprocessing, time sharing.
Professor Valenti

308-690A COMPUTER METHODS IN PROBABILITY AND STATISTICS I. (3 hours.) The use of random numbers in distribution theory, goodness of fit, power and robustness of tests, geometric probability. Algorithms and programs for analysis of data.
Professor Marsaglia

308-691B COMPUTER METHODS IN PROBABILITY AND STATISTICS II. (3 hours; prerequisite 308-690A.) A continuation of 690A. Algorithms and programs for statistical analysis,

particularly multivariate analysis, time series and the estimation of distribution and density functions.
Professor Marsaglia

308-698A MONTE CARLO AND SIMULATION I. (3 hours.) Random numbers and how to get them, decide if they are any good and what to do with them.
Professor Marsaglia

308-699B MONTE CARLO AND SIMULATION II. (3 hours; prerequisite: 308-698A.) A continuation of 698A. Applications of Monte Carlo (computer programs that use random numbers) to simulation problems, statistics, probability and operations research.
Professor Marsaglia

308-730D THE COMPUTER IN MATHEMATICAL RESEARCH. (3 hours.) Examples of computer aided research in pure mathematics; number theory, combinatorial theory, finite geometries and configurations, group theory, graph theory, probability and mathematical statistics. Conversely, recent trends in pure mathematics arising from developments in computer science.
Professor McKay

308-760A ADVANCED TOPICS: THEORY I.
308-761B ADVANCED TOPICS: THEORY II.
308-762B ADVANCED TOPICS: PROGRAMMING I.
308-763B ADVANCED TOPICS: PROGRAMMING II.
308-764A ADVANCED TOPICS: SYSTEMS I.
308-765B ADVANCED TOPICS: SYSTEMS II.
308-766A ADVANCED TOPICS: APPLICATIONS I.
308-767B ADVANCED TOPICS: APPLICATIONS II.

E7 CRYSTALLOGRAPHY

Students wishing to undertake graduate studies in Crystallography should submit their application to G. Donnay, Professor of Crystallography. Applications will be assessed by an interdisciplinary committee, appointed for the purpose, and if the application is accepted an appropriate program of study and research will be arranged.

GRADUATE COURSES

186-502B CRYSTAL-STRUCTURE ANALYSIS. (2 Credits; 2 lectures.) Elements of crystallography and diffraction physics basic to structure determination. Choice of crystal; principles underlying photographic and counter methods of collecting intensity data. Data reduction. F^2 synthesis. The phase problem. Trial and error methods, heavy-atom techniques, direct methods. Electron-density calculation. Refinement of structure.
Professor Donnay

186-503D CRYSTAL-STRUCTURE DETERMINATION. (6 Credits; 6 hours laboratory; Prerequisite 186-211A, or 502B) Techniques of structure determination applied to a research problem.
Professor Donnay

186-504B CRYSTAL SYMMETRY. (2 Credits; 2 lectures.) Derivation of the 32 crystallographic point groups (the geometric crystal classes), 14 translation groups (the Bravais lattices), 73 arithmetic crystal classes (isomorphic with symmorphic space groups) and 230 space groups. Atomic site symmetry vs crystal-structure symmetry. Effect of solid solutions on crystal symmetry. Symmetry information to be gained from X-ray diffraction: powder diagrams vs single-crystal patterns. Generalized symmetry applied to twinning and magnetic structures.
Professor Donnay

E8 DEPARTMENT OF ELECTRICAL ENGINEERING

The department is excellently equipped for research and has special interests in the following areas; control engineering, communications, computers, microwave optics, solid state electronics, dynamics of machines and power modulators, high voltage phenomena, network theory, acoustics and surge voltage phenomena. Departmental computing facilities include a PDP-8 interfaced with a PDP-15/40 which are used to study real time computing, graphics, speech, and automatic classification of medical data. The facilities are in addition to the 360/75 and the 370/155 computers operated by the university.

Facilities for study in the microwave area include two anechoic chambers with automatic field intensity and phase plotters. Vacuum deposition and r-f sputtering apparatus are used for the fabrication of solid state devices, as are electromagnets for measurements of the electrical and magnetic properties of solids. Cryogenic facilities are also available. There is a fully equipped laboratory for the study of electric machine dynamics, and also laboratory facilities for high-voltage phenomena.

STAFF

Professors – E.L. ADLER; M.L. BLOSTEIN; R.P. COMSA; G.L. d'OMBRAIN; G.W. FARNELL; T.J.F. PAVLASEK; P. SILVESTER *(Chairman)*; G. ZAMES
Associate Professors – P.R. BÉLANGER; C.H. CHAMPNESS; C. FENGLER; M.J. FERGUSON; M. FUKADA; A.A. GUNDJIAN; M.D. LEVINE; A.S. MALOWANY; N. RUMIN; E. SIGURDSON; F. SPITZER; G.L. YIP
Assistant Professors – P. KABAL; R. KWONG, H.C. LEE; B.T. OOI; A. REEVES
Lecturers – C.W. BRADLEY; K.L. FRASER
Special Lecturers – B.J. GEVAY; M.A. MARIN

REQUIREMENTS

REQUIREMENTS FOR THE MASTER'S DEGREE

Candidates who fulfil the general requirements of the Graduate Faculty and who possess a first degree in engineering may be accepted for a course of study leading to the M.Eng. degree. The program normally consists of six courses and a thesis project. The average time taken to complete the requirements is one calendar year plus one academic year.

REQUIREMENTS FOR THE Ph.D. DEGREE

Candidates who fulfil the general requirements of the Graduate Faculty and who possess a Master's degree in Engineering may be accepted for a course of study leading to the Ph.D. degree in Electrical Engineering. The minimum time taken to complete the requirements is two years. In exceptional circumstances a candidate may be accepted for the Ph.D. degree who does not possess a Master's degree but he will be registered first as Master's candidate.

COURSES FOR HIGHER DEGREES

Not all of these courses are given every year.

304-501A FREQUENCY DESIGN OF LINEAR CONTROL SYSTEMS 3(3-0-6). (Prerequisite: 304-303A,B or 304-308B.) Frequency response design of linear control systems. Compensators, error constants. Sensitivity, two-degree-of-freedom design. Cascade and other multiloop designs. Feed-forward. Frequency response design of multivariable linear control systems. Decoupling. Discrete systems, sequences, convolution, difference equations. The z-transform. Sampled-data systems and their design by frequency-domain techniques.

304-502B STATE SPACE METHODS IN LINEAR SYSTEMS 3(3-0-6). (Prerequisites: 304-501A.) State representation of linear systems. The state transition matrix. System modes and Jordan forms. Controllability and observability. Transfer functions and minimal representations. State representation of discrete and sampled-data systems. Canonical forms. Model control and pole placement by state feedback. Quadratic performance index, the Lyapunov matrix equation. Stability and Lyapunov functions. The optimal regulator problem. Dead-beat controllers. Disturbance compensation, feedforward. Linear state observers. Optimization of output-feedback controllers for min-max eigenvalue placement or minimization of a quadratic performance index.

304-512B DIGITAL SIGNAL PROCESSING 3(3-0-6). (Prerequisite: 304-303A,B or 304-308B.) Discrete-time linear systems theory, digital filter synthesis techniques, quantization effects in digital filters, discrete Fourier transforms including FFT algorithms, high-speed convolution and correlation techniques.

304-521A DIGITAL COMMUNICATION 3(3-0-6). (Prerequisites: 304-305B or 189-384B, 304-303A,B or 304-308B.) Introduction to digital transmission, digital data and performance criteria, discussion of digital transmission facilities; basic definitions; coding and framing formats; baseband pulse modulation, pulse amplitude and pulse frequency modulation, phase shift keying; signal spectra; demodulation techniques noting problems of framing and synchronization; performance on Gaussian channel, bandlimited channel characterization, pulse dispersion, adaptive and non-adaptive equalization, Gaussian and impulsive-noise, pulse jitter, repeaters and analysis; introduction to error control, parity checking, error detection, automatic repeat request performance estimates.

304-552B STATISTICAL COMMUNICATION THEORY 3(0-0-6). (Prerequisites: 304-305B or 189-384B, 304-303A,B or 304-308B.) Optimum receiver principles; vector channels and decision regions, matched filters, error evaluation for various signal sets; channel capacity, important channel models, non-white Gaussian noise, bandpass channels, random amplitude and phase, linear (amplitude, single side-band double side-band) modulation, twisted modulation, frequency modulation, phase modulation, bandwidth and weak noise suppression, phase-lock loop.

304-529A IMAGE PROCESSING AND COMMUNICATIONS 3(3-0-6). (Prerequisites: 304-021A,B, 304-303A,B or 304-308B.) Psychophysics of vision, properties of images; sampling, digitizing, and displaying images; geometric and algebraic processing, spatial filtering, image coding and transmission; binary image analysis, segmentation, descriptions of lines and shapes; representation, linguistic methods, software and hardware systems, applications; scene analysis.

304-531A REAL-TIME SYSTEMS 3(3-3-3). (Prerequisite: 304-222A,B or 304-324A.) Real-time engineering applications of computers to on-line control communication systems and data acquisition. This course is concerned with aspects of hardware, software, the hardware-software interface and their integration into a completed system. The course requires the completion of individual or group projects using one of the department's mini- or micro-computers.

304-532A COMPUTER GRAPHICS 3(3-3-3). (Prerequisite: 304-324A.) Introduction to computer graphics systems and display devices: core or disc refreshed, storage tube, scan conversion systems; graphical input and interactive graphical techniques — light pen, joystick, Rand tablet; display files: graphics languages and data structures; 2D transformations; 3D computer graphics, hidden line removal and shading; graphics system design; applications. The course will consist of lecture material as well as a laboratory project involving the preparation and running of graphics programs on the PDP-15 and IBM 360 systems. (Alternate years, next given 75/76.)

304-533B TEXT PROCESSING 3(3-0-6). (Prerequisite: 304-324A.) Data editing by batch and online entry; manipulation of text and data. Concepts of type design and typography. Typesetting practice and technology. Production technique in printing industry as applied to letter, book and journal publication. Applications of numerical control techniques and computerized decision making to printing, particularly typesetting. (Alternate years, next given 76/77.)

304-543B NUMERICAL METHODS IN ELECTROMAGNETICS 3(3-0-6). (Prerequisite: 304-251A,B or 304-256A.) Mathematical representation of fields. Discrete approximations for continuous differential and integral operators. Methods for solving deterministic and eigenvalue problems by direct and iterative means.

304-561A ELECTRIC MACHINE DESIGN 3(3-0-6). (Prerequisite: 304-261A,B.) The output equations of electromagnetic apparatus. Specific electric and magnetic loading. Magnetic circuits. Time constants and power gain. Windings including pole amplitude modulation. Leakage inductances. Commutation interpoles and compensation. Per unit values. (Alternate years, next given 75/76.)

304-562A CONTINUUM ELECTROMECHANICS 3(3-0-6). (Prerequisite: 304-251A, B or 304-256A.) Quasi-static electromagnetic field equations. Field transformation in moving co-ordinate systems. Boundary conditions and constitutive relations for moving media. Magnetic diffusion and charge relaxation in moving media. Maxwell's stress tensor for the evaluation of force densities. Electromechanics of elastic solids and Newtonian fluids. Application of theories to magneto-hydrodynamics, electro-hydrodynamics, magnetic pumps, linear induction motor and magnetic levitation. (Alternate years, next given 76/77.)

304-564B CONTROL RECTIFIER CIRCUITS 3(3-0-6). (Prerequisite: 304-333A,B or 304-338B.) Simple polyphase rectifiers. Thyristor characteristics. Fully and semi-controlled bridges. Interphase transformers. Commutation, regulation and equivalent circuits. Harmonic content. Active loads. Cycloconverters. (Alternate years, next given 75/76.)

304-565B INVERTERS AND COPPER CIRCUITS 3(3-0-6). (Prerequisite: 304-333A,B or 304-338B.) Properties of circuits employing the forced commutation of thyristors to perform a switching function. Static and dynamic properties of thyristors and diodes. Constant voltage and constant current inverters, three phase inverters. Choppers. Motor loads. (Alternate years, next given 76/77.)

304-572A LASER ELECTRONICS 3(3-0-6). Prerequisites: 198-271B, 304-332B or 304-337B.) Review of quantum mechanical and statistical mechanical concepts and techniques. Principle of amplification by stimulated emission of radiation; analysis of resonant cavity and travelling wave maser amplifiers; coherence, stability and noise; characteristics of gaseous, solid state and semi-conductor junction lasers. Nonlinear effects for modulation and detection of laser beams; applications to communication, measurements, signal processing and other fields as time permits.

304-573B MICROWAVE DEVICES AND CIRCUITS 3(3-0-6). (Prerequisites: 304-592A, 304-332B or 304-337B.) Gunn diodes. LSA mode operation; Gunn oscillators. Tunnel diodes, IMPATT and TRAPATT oscillators. Parasites in tunnel diode circuits; noise, microwave transistors: models; scattering parameter design of distributed amplifiers. High frequency diodes: limitations in sensitivity, noise figure and dynamic range. Varactor multipliers. Parametric amplifiers: noise in uncooled amplifiers; use of circulators in parametric amplifiers. (Alternate years, next given 76/77.)

304-575B OPTICAL AND MAGNETIC PROPERTIES OF SOLIDS 3(3-0-6). (Prerequisites: 304-352B or 304-357B, 304-332B.) Classical and quantum theories of polarization. Band theory of solids. Dispersion relations. Tensor description of anisotropic materials. The ray ellipsoid. Double refractions, birefringence dichroism, piezoelectricity, ferroelectricity. Classical and quantum theories of magnetization. Diamagnetism, paramagnetism, ferro- and ferri-magnetism. Magnetic domains. Ferrites and Garnets. Non-reciprocal microwave devices and magneto-optic devices which exploit crystal anisotropy. (Alternate years, next given 76/77.)

304-579A SEMICONDUCTOR DEVICES AND MODELS 3(3-0-6). (Prerequisite: 304-333A,B or 304-338B.) Systematic methods for obtaining useful models which relate device physics to terminal behaviour. The pn junction diode, junction-gate and MOS field-effect transistors, bipolar transistor: idealized devices, practical

device geometries, applications. The transistor switch. Determination of model parameters by measurement. (Alternate years, next given 76/77.)

304-592A MICROWAVE THEORY AND TECHNIQUES 3(3-0-6). (Prerequisite: 304-352B or 304-357B.) Transmission lines and waveguides, surface waveguides, microwave circuit theory, impedance matching and transformation, passive microwave devices, resonators, periodic structures and filters, microwave antennas.

304-593B ANTENNAS AND PROPAGATION 3(3-0-6). (Prerequisite: 304-352B or 304-357B.) Near and far field behaviour or radiators; antennas as a boundary value problem; practical antenna parameters; wire antennas, antenna arrays, aperture methods of antenna analysis; measurement of input impedance, field patterns, gain and noise; point-to-point propagation, fading beyond horizon and long distance propagation, ionospheric, atmospheric and earth's surface considerations; tropospheric scatter.

304-596B COHERENT WAVE OPTICS 3(3-0-6). (Prerequisite: 304-352B or 304-357B.) Introduction to wave optics. Diffraction theory and geometrical optics including the Kirchoff-Huygens diffraction integral, Fermet's principle and Hamiltonian Formulations of Ray Optics. Lenses and lens waveguides. Optical Fourier transform and spatial filtering. Gaussian beams. Holography. Propagation characteristics of optical fibres and dielectric waveguides. Thin film (or slab) optical waveguides. Discussion of optical communication systems. (Alternate years, next given 76/77.)

304-602A OPTIMAL CONTROL THEORY 4(3-0-9). (Prerequisite: 304-404A or 304-502B.) Basic concepts of static optimization. Variational solutions for discrete — and continuous-time control problems. Pontryagin's maximum principle. Dynamic programming. Computational algorithms. Singular control problems. The linear regulator problem.

304-603B ESTIMATION AND STOCHASTIC CONTROL 4(3-0-9). Prerequisites: 304-612A, 304-502B.) Properties of estimators; linear regressing. The innovations process. Innovations approach to optimal linear filtering for continuous-time and discrete-time processes. Smoothing and prediction. Properties of the Kalman filter. Optimal stochastic control of linear systems with direct state measurements. The certainty equivalence principle. Minimum-variance control. Estimation and control of discrete linear systems described by ARMA models. Stochastic control or nonlinear systems.

304-604A PARAMETER IDENTIFICATION AND ADAPTIVE CONTROL 4(3-0-9). (Prerequisite: 304-603B.) Least-squares, maximum likelihood and Bayesian estimates. Hypothesis testing. Identification of discrete systems described by ARMA models using least-squares, generalized least-squares and maximum likelihood. Instrumental variable methods. Stochastic approximation. Use of the extended Kalman filter. Bayesian estimation of systems taken from a finite population. Estimation of noise covariances. Adaptive control of discrete systems using one-step-ahead control laws, enforced separation and open-loop-feedback-optimal control (OLFO) laws. Use of specially-designed inputs. (Alternate years, next given 76/77.)

304-612A RANDOM PROCESSES 4(3-0-9). (Prerequisite: 304-305B or 189-384B.) Markov processes, Markov chains, correlation functions and spectra, renewal processes, queues, queuing networks.

304-613B COMPUTER-AIDED NETWORK ANALYSIS AND DESIGN 4(3-0-9). (Prerequisite: 304-303A,B or 304-308B.) Computer-aided techniques for the DC, transient and frequency-domain analysis of linear and nonlinear electronic networks; methods of sensitivity analysis; elementary concepts in optimization theory; application of optimization techniques to circuit design. (Alternate years, next given 75/76.)

304-614A NETWORK SYNTHESIS 4(3-0-9). (Prerequisite: 304-303A,B or 304-308B.) Properties of positive real functions; determination of system functions; synthesis of driving-point functions; syntheses of lossless two-port and RC two-ports; approximation problems; synthesis of active networks. (Alternate years, next given 76/77.)

304-620B INFORMATION THEORY AND CODING 4(3-0-9). (Prerequisite: 304-305B or 189-384B.) Measure of information, limitations of measure, characterization of noisy channels, channel coding and capacity. Estimates for some real channels, source coding revisited (rate distortion), error coding techniques — real and imaginary, feedback and automatic repeat request channels. This course is intended to give the student an insight into the concepts and limitations of Information Theory along with a survey of current practice in error-correcting coding. (Alternate years, next given 75/76.)

304-622B ADVANCED COMMUNICATIONS SYSTEMS ANALYSIS 4(3-0-9). (Prerequisite: 304-522B.) This course will allow the student to study the foundations required for modelling advanced communication systems. Analysis of specific classes of systems such as telephone, satellite, troposcatter, microwave for both analog and digital data. (Alternate years, next given 75/76.)

304-625B ARTIFICIAL INTELLIGENCE 4(3-0-9). (Prerequisite: 304-529A.) Definition, models for an artificial intelligence, data structures, heuristic programming, learning, pattern recognition, man-machine interaction, practical applications and study of selected research topics. (Alternate years, next given 75/76.)

304-628B COMPUTER COMMUNICATIONS NETWORKS 4(3-0-9). (Prerequisites: 304-324A,

304-521A or 304-411A.) Classification of networks, voices, data, line-switching, message switching, packets; characterization of information sources; computer interface, terminal interface, network interface, queuing models, queuing networks, capacity versus delay; network system components, multiplexers, concentrators; topological design problems and algorithms; network control and characterization; tree networks, reliability; non-tree network designs. (Alternate years, next given 76/77.)

304-636B REAL-TIME OPERATING SYSTEM DESIGN 4(3-0-9). (Prerequisite: 304-531A.) This course is intended for students interested in real-time applications of small computers. The course includes a study of three existing real-time operating systems as well as a design project. The course content includes the following: Task scheduling mechanisms, I/O organization, bulk storage organization, incorporation of service routines. Inter-computer communication, task co-ordination, multiple computer operating systems. (Alternate years, next given 76/77.)

304-637B COMPUTER SYSTEMS ANALYSIS 4(3-0-9). (Prerequisite: 304-531A.) Computer system specification, hardware-software trade-offs, selection of hardware components, problem solutions using interconnected computers, choice of programming languages, structured programming, technical organization and management. The course includes three case studies and a design project. (Alternate years, next given 75/76.)

304-638A ADVANCED COMPUTER DESIGN 4(3-0-9). (Prerequisite: 304-531A.) This course is intended for graduate students with a good knowledge of computer organization, structure and architecture and some knowledge of micro-programming. Topics in hardware technology include functional logic building blocks, arithmetic and non-arithmetic processors, memory utilization and storage management, sequencing subsystems, transmission and exchange. Determination of expected performance by simulation; computer-aided design. Specific examples of solutions to computer design problems. Selected topics on novel computer organizations such as array, cellular and variable-structure computers. (Alternate years, next given 76/77.)

304-641A APPLIED ELECTROMAGNETIC THEORY 4(3-0-9). (Prerequisite: 304-592A or 304-593B.) Mathematical techniques, analytical and numerical, for solving E. M. boundary value problems. Maxwell's equations, wave dispersion, waves in gyrotropic media, Huygen's principle and Fresnel diffraction, Babinet's principle; Green's functions and integral equations, angular spectrum of plane waves, cylindrical and spherical wave functions, perturbational and variational techniques. Waveguide, antenna, scattering and diffraction problems.

304-647A FINITE ELEMENTS IN ELECTROMAGNETICS 4(3-0-9). (Prerequisite: 304-543B.) Finite elements for the Helmholtz equation in the plane and in space. Elements for axisymmetric problems. Isoparametric and curvilinear elements; elements for nonlinear problems. Integral equations and the solution of antenna problems. Finite elements in parabolic problems. (Alternate years, next given 75/76.)

304-662A ELECTRIC MACHINE DYNAMICS 4(3-0-9). (Prerequisites: 304-261A,B, 304-502B.) Review of electric machine models. State-space formulation of nonlinear differential equations. Solutions through numerical integration, constant speed linearization. Models of control elements, loads, prime-movers, voltage regulators, transmission networks. State equations of integrated power system. Modal analysis of multimachine power system. Operating point stability. Transient stability analysis. Electromechanical resonance. (Alternate years, next given 75/76.)

304-677A,B EXPERIMENTAL TECHNIQUES IN SOLID STATE 4(0-6-6). (Prerequisite: 304-332B or 304-337B.) Experimental laboratory project in solid state involving the following. Techniques of laboratory preparation, fabrication and orientation of solid state samples and structures for experimental study. Use of special laboratory research apparatus. Measurement of electronic, optical and structural properties of samples and structures. Evaluation and analysis of electronic behaviour and performance. Interpretation of relevant physical processes and phenomena.

304-678A SPECIAL TOPICS IN SOLIDS I 4(3-0-9). (Prerequisite: 304-332B or 304-337B.) Discussion of topics in semiconductor electronics and electronic properties of materials in areas of current research to the department.

304-679B SPECIAL TOPICS IN SOLIDS II 4(3-0-9). (Prerequisite: 304-332B or 304-337B.) Dielectric properties and molecular structure of solids and liquids. Dielectric theory and applications.

304-681A,B COLLOQUIUM IN ELECTRICAL ENGINEERING. 4 credits. Directed reading, seminar and discussion course in various subjects of current interest in electrical engineering research.

304-685B HIGH VOLTAGE ENGINEERING 4(3-0-9). (Prerequisite: 304-251A,B or 304-256A.) Electrical discharges in gases; uniform and non-uniform fields; corona discharges; the spark mechanism. Generation and measurement of high direct, alternating and impulse voltages. (Alternate years, next given 75/76.)

304-688A,B 304-689A,B RECENT ADVANCES IN ELECTRICAL ENGINEERING. 4 credits. Course content suited to the area of specialization of the lecturer.

E9 DEPARTMENT OF GEOGRAPHY

STAFF

Professors — J.B. BIRD; B.J. GARNIER; T.L. HILLS; T. LLOYD

Associate Professors — W. ARMSTRONG; M.A. CARSON; R.N. DRUMMOND; J.M. GILMOUR; P.G. HOLLAND; J. LUNDGREN *(on leave 1975-76)*; B.H. MASSAM; J.T. PARRY; E. WADDELL; R.C. ZIMMERMANN

Assistant Professors — J.J. DRAKE; G.O. EWING; W.B. KEMP; T. MOORE; F.H. NICHOLSON *(Director, Subarctic Research Laboratory, Schefferville, Que.)*; S. OLSON; L. VEILLEUX *(Part-Time)*

Honorary Staff — F. MULLER

REQUIREMENTS

ADMISSION: M.A. and M.Sc. DEGREES

Attention is directed to the Faculty of Graduate Studies admission regulations outlined in the General Information and Faculty Regulations section headed "Admission".

Applicants not satisfying these conditions but with primary undergraduate specialization in a cognate field may register for the M.A. or M.Sc. degree in Geography in certain circumstances, but in general they will be required to register for a qualifying year, as will all others who have deficiencies in their preparation but are otherwise judged to be qualified.

Candidates must:

1. pass written (and in some cases oral) examinations in at least two full graduate courses, at least one of which is in the Geography Department;
2. attend the Graduate Colloquium, Geography 181-631D and such additional courses in Geography or cognate subjects as the Chairman and the student's director of research think fit. The additional courses may be for audit or examination;
3. submit a thesis in an appropriate area of geographical inquiry. The quality of the thesis will determine the final standing of the student.

REQUIREMENTS FOR THE M.Sc. DEGREE

Candidates must:

1. pass written (and in some cases oral) examinations in at least five half graduate courses; three selected from Geography 183-611A, B to Geography 615A, B; one selected from Geography 183-632A, B to Geography 183-635A, B; and one selected either from the list of Geography courses, or from the courses taught in any other department in the University.
2. attend the Graduate Colloquium, Geography 181-631D and such additional courses in Geography or cognate subjects as the Chairman and the student's director of research think fit.
3. submit a thesis in an appropriate area of geographical inquiry. The quality of the thesis will determine the final standing of the student.

ADMISSION: Ph.D. DEGREE

Students who have attained high standing in the Master's degree in Geography at McGill may be permitted to proceed to the Ph.D. in two further years. Rarely, a student may be allowed to register for the Ph.D. degree without having first taken the Master's degree. The normal duration of a program, including field work where required, is three years. Normally, the Department will restrict admission to the Ph.D. program to students prepared to work in one of the fields of human or physical geography in which specialized supervision is offered. These, which cover a wide range of systematic areas, are listed in documents available from the Department.

REQUIREMENTS FOR THE Ph.D. DEGREE

Candidates must:

1. remedy any deficiencies in their formal training in geography and necessary cognate subjects;
2. submit themselves for a comprehensive examination (183-701D) comprising prepared papers and an oral examination. Competence in certain fields may be tested separately, but as a necessary part of this examination;
3. submit a thesis based on original research in human or physical geography;
4. attend the Graduate Colloquium. Geography 181-631D, during one of their resident years, and other courses as determined individually;
5. comply with a language requirement if this is so recommended by the student's committee.

To satisfy these requirements, the candidate may take any of the graduate or undergraduate courses offered by the Department.

COURSES AND SEMINARS FOR HIGHER DEGREES

All courses meet once each week.

183-602A URBAN GEOGRAPHY, PART I. A critical review of environmental and spatial preference and perception in an urban context, together with an introduction to appropriate measurement and scaling techniques.
Professor Ewing

183-603B URBAN GEOGRAPHY, PART II. Allocation-location problems in the public and private sectors; urban model-building; urban politics.
Professors Massam and Olson

183-604A ECONOMIC GEOGRAPHY, PART I. A geographical study of the phenomenon of entrepreneurship; its logistical, organizational and locational characteristics; scale of operation; the different forms of entrepreneurship in the economic geography of different levels of economic development.
Staff

183-605B ECONOMIC GEOGRAPHY, PART II. A critical review of research on manufacturing industry, with particular emphasis on (a) the analysis of industrial agglomeration, (b) manufacturing in economically disadvantaged areas, (c) some geographical aspects of the multinational corporation, and (d) innovation and technology transfer.
Professor Gilmour

183-606A GEOGRAPHY AND DEVELOPMENT, PART I. A review of the spatial problems of economic development in countries of the developing world, together with an examination of processes generating spatial inequality. Ecological considerations in economic development.
Professor Hills and Staff

183-607B GEOGRAPHY AND DEVELOPMENT, PART II. An examination of development problems in rural and urban areas of the Third World, with emphasis on agrarian structures and the social geography of urbanization. Regional emphasis will vary according to the interests of members of the seminar.
Professor Hills and Staff

183-608D CULTURAL GEOGRAPHY. Discussion of theoretical concepts and methods of analysis in the study of cultural adaptation, developing a cross-cultural perspective in the analysis of both urban and rural cultural systems. The use of systems analysis; energy and information flow in relation to behaviour; adaptive strategies. Analysis of specific cultural systems and issues.
Professors Kemp, Waddell and Staff

183-609B HUMAN GEOGRAPHY: SOCIAL AND BEHAVIOURAL PROBLEMS. A survey of the treatment of society, social institutions and the individual as units of analysis within geography. Explanation and cognitive description in human geography.

183-611A,B ADVANCED CLIMATOLOGY. An advanced study of the principles of physical climatology and their application to the spatial variations and characteristics of energy and water balances in rural and urban environments.
Professor Garnier and Staff

183-612A,B ADVANCED PHYSIOGRAPHY. An analysis of recent advances in geomorphology.
Professors Bird and Carson

183-613A,B ADVANCED BIOGEOGRAPHY. An examination of the history, methods and objectives of biogeography, with emphasis on plants.
Professors Holland and Zimmermann

183-614A, B SOILS AND WEATHERING. An examination of the major processes operating in soils; weathering reactions, pedogenetic processes, and soil nutrient relationships. The course will include laboratory work and a small project to illustrate the main techniques.
Professor Moore

183-615A,B HYDROLOGY AND WATER RESOURCES. An analysis of recent developments in hydrology, with emphasis on their applications to geographical problems. Snowmelt systems and the hydrological effects of basin development.
Professor Drake

183-622A,B HUMID TROPICAL ENVIRONMENTS A geographical approach to the study of sample rain-forest and savanna landscapes of the humid topics, with special attention to the human impact on the balance between forest and savanna.
Professor Hills

183-623A SEMINAR ON REGIONAL RESEARCH, PART I. Presentation of background, and discussion of research interests of varied nature, in a region of common interest to a group of graduate students and staff. Regions will vary according to interest; probable selections will include Quebec, the Gulf of St. Lawrence and the Maritimes, the Arctic and Northlands, the Caribbean, tropical Latin America.
Staff

183-624B SEMINAR ON REGIONAL RESEARCH, PART II. (See course 183-623A for description.)
Staff

186-631D METHODS OF GEOGRAPHICAL RESEARCH. A review of the accepted methods of research in geographical problems, in both physical and human fields. The approach will be practical, and will require the presentation of formal research papers for criticism and discussion.
Staff

183-632A,B ADVANCED CARTOGRAPHY. A systematic examination of modern geographic-cartographic techniques for the collection, evaluation, presentation and reproduction of spatially distributed data. Practical experience in the laboratory, the photographic darkroom field work and visits to cartographic agencies are an integral part of the course.
Professor Drummond

183-633A,B REMOTE SENSING. (Not available to students registered in Geography 183-635A,B.) A review of aircraft and spacecraft remote sensing systems and their applications.
Staff

183-634A,B QUANTITATIVE METHODS IN GEOGRAPHY. An examination of certain techniques in geographic research and their limitations. Emphasis is directed to the use of

correlation and regression analysis, and to multivariate extensions of these techniques.
Professor Carson

183-635A,B INTERPRETATION METHODS: AIR PHOTOS AND IMAGERY. (Not available to students registered in Geography 183-633A,B.) Basic photogrammetry and interpretation procedures for aircraft and spacecraft photography and imagery.
Professor Parry

McGILL SUBARCTIC RESEARCH LABORATORY

This laboratory (under the direction of Professor Nicholson) is at Knob Lake (Schefferville), in the heart of Labrador-Ungava. Facilities exist for research in most aspects of physical geography. Extensive field programs are arranged. All inquiries should be addressed to the Chairman, Geography Department.

E10 DEPARTMENT OF GEOLOGICAL SCIENCES

Opportunities for advanced study and research in Geology, Geochemistry and Geophysics are available to qualified students. Graduate programs leading to the M.Sc., M.Sc. (Applied), and Ph.D. degrees and to a diploma are offered.
Financial assistance is available in the form of demonstratorships, research assistantships and some scholarships.

STAFF

Professors – GABRIELLE DONNAY; J.A. ELSON; E.W. MOUNTJOY; V.A. SAULL; C.W. STEARN; J.S. STEVENSON
Associate Professors – R. DOIG *(Chairman)*; P.R. EAKINS; R.H. GRICE; R. HESSE; W.H. MacLEAN; R.F. MARTIN; G.R. WEBBER
Assistant Professors – D. FRANCIS; A.J. HYNES
Research Associates – A. BECKER; J.D.H. DONNAY
With the assistance of – R.N. YONG and J.C. OSLER *(Civil Engineering and Applied Mechanics)*; O.G. JENSEN; C.C. KU; B.W. MacKENZIE; W.M. TELFORD and J.E. UDD *(Mining Engineering and Applied Geophysics)*; B. d'ANGLEJAN *(Marine Sciences)*; R.L. CARROLL *(Redpath Museum)*

REQUIREMENTS

ADMISSION

Candidates are to indicate their field, or fields, of interest when making formal applications for admission. Specific inquiries concerning the department should be addressed to the Supervisor of Graduate Students, Department of Geological Sciences.
Applications and all supporting documents should be received in the department before July 1st for admission the following September.

ELIGIBILITY

Applicants should have an academic background equivalent to that of a McGill graduate in the honours or the major in geology course. The admissions committee may modify the requirements in keeping with the field of graduate study proposed. In some cases a qualifying year may be required. (See paragraph 30, Graduate Faculty Regulations.)

M.Sc. DEGREE

The M.Sc. degree program include (a) three courses to be chosen with the approval of the research director and departmental chairman and (b) a thesis to be submitted according to the rules of the faculty (see paragraph 54, Graduate Faculty Regulations.)

Ph.D. DEGREE

The Ph.D. degree program includes (a) an approved program of courses to be selected in consultation with the student's director of research according to the student's particular interest and training (b) Comprehensive oral examinations at the end of the Ph.D. II year (See paragraph 27, Graduate Faculty Regulations) (c) Research and Ph.D. thesis followed by an oral examination (see paragraph 28, Graduate Faculty Regulations). There are no language requirements for the Ph.D. degree.

DIPLOMA

a) Applicants for the diploma must fulfill the requirements for entry into the Graduate Faculty and McGill University and for graduate study in the Department of Geological Sciences, as stated in the Announcement.
b) The diploma will be awarded for the successful completion of one academic year of graduate studies comprising at least 3 graduate courses to be chosen with the approval of the Department.
c) Students who are awarded the diploma with high standing may be allowed to proceed to a higher degree and will be given appropriate credit towards such a degree. Students wishing to keep open the possibility of entering either the M.Sc. course with thesis or the M.Sc. (Applied) course are advised to follow a program which will satisfy the first year requirements for these courses.

M.Sc. (APPLIED) DEGREE

Two options are offered in the two-year non-thesis program for the M.Sc. (Applied) degree: A–Mineral Exploration and B–Engineering Geology.

Option A – Mineral Exploration

The general aim of this two-year course is to train students to be capable of planning and carrying out effective exploration for mineral deposits, and of valuing mineral deposits in various stages of development and production. Such students must be provided with:

1. a sound theoretical and practical background in the use of modern techniques of exploration,
2. additional information on the economic and technical considerations which distinguish ore bodies from other mineral deposits,
3. some insight into the legal and financial aspects of mineral exploration.

Applicants must have fulfilled the requirements for graduation in either (a) the McGill B.Sc. Honours or Major program in Geological Sciences or its equivalent, or (b) the McGill B.Eng. program in Mining, or its equivalent. They must have taken the following courses or their equivalents:

GEOLOGY 186-344B ORE MINERALS.
GEOLOGY 186-441 MINERAL DEPOSITS.
COMPUTER SCIENCE 308-200A.

If the total number of deficiencies is too great the student may have to take a "Qualifying year" (see paragraph 30b, General Information and Faculty Regulations, Faculty of Graduate Studies and Research).

To provide a sound background to the problems of Mineral Exploration and allow a degree of specialization the curriculum consists of:

a) 8 "core" or essential courses.
b) 4 optional courses approved by the departmental Director of Graduate Studies.

Applicants who have been working in industry for one or more years after graduation should provide one reference from industry and one from a former professor. Applicants coming directly from an undergraduate program must provide the normal (2) references from former professors.

HONOURS GEOLOGICAL SCIENCES GRADUATE – FIRST YEAR

GEOLOGY 186-612A APPLIED STRUCTURAL GEOLOGY.
GEOLOGY 186-602D GEOLOGICAL COLLOQUIUM.
GEOLOGY 186-702D PHOTOGEOLOGY.
GEOLOGY 186-604D PETROLOGY OF MINERAL DEPOSITS.
MINING 306-225A and 306-326B MATHEMATICAL APPLICATIONS IN THE MINERAL INDUSTRY I AND II.
MINING 306-331A and 306-433B ADVANCED EXPLORATION GEOPHYSICS I AND II.

MINING ENGINEERING GRADUATES – FIRST YEAR

Mining Engineering graduates will be accepted but in the above program will substitute courses required for the Honours Geology degree for the engineering subjects they have already had.

COMMON SECOND YEAR

GEOLOGY 186-605D MINERAL EXPLORATION and MINING GEOLOGY.
GEOLOGY 186-606D APPLIED GEOCHEMISTRY.
GEOLOGY 186-713D ADVANCED ECONOMIC GEOLOGY.
RECOMMENDED OPTIONS

RECOMMENDED OPTIONS

GEOLOGY 186-716D ECONOMIC GEOLOGY LABORATORY
GEOLOGY 186-430B GEOLOGY OF ENERGY SOURCES
GEOLOGY 186-603A ENGINEERING GEOLOGY
GEOLOGY 186-609B GROUNDWATER GEOLOGY
GEOLOGY 186-720D ASSIGNED READINGS AND SEMINAR
METALLURGY 306-241A MINERAL SEPARATION
MINING 306-101B MINING ENGINEERING TECHNIQUES
MINING 306-123A and 306-224B MINERAL INDUSTRY ECONOMICS I AND II.
MINING 306-625D MINERAL INDUSTRY ECONOMICS
MINING 306-420A MINING FEASIBILITY STUDIES I
MINING 306-436B ADVANCED EXPLORATION GEOPHYSICS IV

Candidates obtaining this degree with distinction may be accepted as candidates for the Ph.D. degree.

Candidates wishing to apply for Professional Engineer (P.Eng.) status must take 3 specified one-term courses in engineering. These may be taken as electives.

Option B – Engineering Geology

The purpose of the two-year non-thesis graduate program in engineering geology is to enable geologists and engineers to develop an ability to apply knowledge of geological factors to the design, construction and maintenance of engineering structures.

During the first year of the two-year course, geology graduates and engineering graduates will follow different programs to broaden their basic knowledge and to bring both groups to a comparable level. Programs of a minimum of five full courses will be selected by the department according to the candidate's background and interest from the courses listed below. Appropriate substitutions may be approved. In the second year, the program will consist of four prescribed courses, as set forth in the following list of courses.

HONOURS GEOLOGICAL SCIENCES GRADUATES – FIRST YEAR

GEOLOGY 186-603A ENGINEERING GEOLOGY
GEOLOGY 186-609B GROUND WATER GEOLOGY
GEOLOGY 186-702D PHOTOGEOLOGY
GEOLOGY 186-706D ADVANCED SEDIMENTOLOGY
GEOLOGY 186-707D GEOMORPHOLOGY
GEOLOGY 186-714D GLACIAL AND PLEISTOCENE GEOLOGY
GEOLOGY 186-715A INSTRUMENTAL ANALYSIS
GEOLOGY 186-721D RECENT SEDIMENTS AND MARINE GEOLOGY
MATHEMATICS 189-314A and 189-315B ADVANCED CALCULUS AND DIFFERENTIAL EQUATIONS
ENGINEERING 303-212A SOIL MECHANICS
ENGINEERING 303-317B FOUNDATIONS
ENGINEERING 303-653A STREAM POLLUTION AND CONTROL
COMPUTER SCIENCE 308-200A or B INTRODUCTION TO DIGITAL COMPUTERS.
MINING 306-230A GEOPHYSICAL EXPLORATION
MINING 306-321B BEHAVIOUR OF ROCK STRUCTURES

ENGINEERING GRADUATES – FIRST YEAR

Basic geology courses as necessary.
GEOLOGY 186-603A ENGINEERING GEOLOGY
GEOLOGY 186-609B GROUND WATER GEOLOGY
ENGINEERING 303-212A SOIL MECHANICS

SUMMER VACATION PROJECT

All candidates will work for at least two months on an approved engineering geology project. A report of this work will be required as part of the Geology 186-722D course in the second year program.

COMMON SECOND YEAR

GEOLOGY 186-722D ADVANCED ENGINEERING GEOLOGY.
GEOLOGY 186-723D ADVANCED SOIL MECHANICS. Or one other soil mechanics course as approved.
GEOLOGY 186-720D ASSIGNED READINGS AND SEMINAR or AN APPROVED OPTION. TWO TERMS OF ROCK MECHANICS or OTHER APPROVED COURSES.

GRADUATE COURSES

186-501A GEOLOGY FOR ENGINEERS. (2 hours lectures, 2 hours laboratory; 1st ter.) An introduction to general geology.
Professor Grice

186-502B CRYSTAL-STRUCTURE ANALYSIS. (2 lectures.) Elements of crystallography and diffraction physics basic to structure determination. Choice of crystal; principles underlying photographic and counter methods of collecting intensity data. Data reduction. F^2 synthesis. The phase problem. Trial and error methods, heavy-atom techniques, direct methods. Electrondensity calculation. Refinement of structure.
Professor Donnay

186-503D CRYSTAL-STRUCTURE DETERMINATION. (6 hours laboratory; Prerequisite 186-211A, or 502B.) Techniques of structure determination applied to a research problem.
Professor Donnay

186-504B CRYSTAL SYMMETRY. (2 lectures.) Derivation of the 32 crystallographic point groups (the geometric crystal classes), 14 translation groups (the Bravais lattices), 73 arithmetic crystal classes (isomorphic with symmorphic space groups) and 230 space groups. Atomic site symmetry vs crystal-structure symmetry. Effect of solid solutions on crystal symmetry. Symmetry information to be gained from X-ray diffraction; powder diagrams vs single-crystal patterns. Generalized symmetry applied to twinning and magnetic structures.
Professor Donnay

186-534D ADVANCED INVERTEBRATE PALEONTOLOGY. (2 hours lectures, 1 hour seminar.) Bias of fossil record; relationship of the phyla; taxonomy, classification, paleoecology, functional morphology and evolution of fossil invertebrates.
Professor Stearn

186-535D PHOTOGEOLOGY. (2 lectures, 2 hours laboratory.) The interpretation of rock lithology and structure and surface deposits from air photographs, elementary photogrammetry.
Professor Elson

186-602D GEOLOGICAL COLLOQUIUM. (2 hours lectures or seminar and assignments.)

Introduction to graduate work in the geological sciences. The general course divisions are philosophy and history of the geological sciences, contemporary geological research, and socio-political relations of the earth sciences.
Professor Saull

186-603A ENGINEERING GEOLOGY. (2 hours lecture, 2 hours laboratory.) Introduction to the application of geology in Civil Engineering.
Professor Grice

186-604D PETROLOGY OF MINERAL DEPOSITS. (2 hours lectures or seminar, 3 hours laboratory.) Petrographic study of fresh and altered rocks associated with ore-deposits and discussion of processes involved in their formation.
Professor Stevenson

***186-605D MINERAL EXPLORATION AND MINING GEOLOGY.** (2 hours lectures, 2 hours laboratory and assigned problems.) Methods of searching for mineral deposits; modern exploration programs; development of mineral deposits; evaluation of mineral deposits.
Professor Eakins

186-606D APPLIED GEOCHEMISTRY. (2 hours seminar and three hours laboratory.) Principles governing the distribution of elements, particularly in the secondary stage of the geochemical cycle; the use of geochemistry in mineral exploration. Individual projects in applied geochemistry.
Professor Webber

186-609B GROUND WATER GEOLOGY. (2 hours lectures or seminar; 2 hours laboratory.) Introduction to the geological aspects of ground water occurence and chemistry and to elementary ground water flow and well problems.
Professor Grice

186-610D PROBLEMS IN GEOLOGICAL SCIENCES. (2 hours lectures.) Recent advances in the fields of geological time and the stratigraphic record, materials and processes of the crust, global tectonics and planetary geology, environmental geology and resources.

***186-611D STRUCTURAL ANALYSIS OF DEFORMED ROCKS.** (2 hours.) Lectures, seminars, and laboratory studies covering modern topics in structural geology.
Professor Helmstaedt

***186-612 APPLIED STRUCTURAL GEOLOGY.** (2 hours lectures or seminar and 3 hours lab. of problems.)
Professor Eakins

186-700D PRELIMINARY DOCTORAL EXAMINATION.

186-703D ADVANCED MINERALOGY. (4 hours lectures or seminar and laboratory.) Discussion of the chemical and optical variations, and current classifications within the more important mineral groups. The laboratory gives practice in the precise microscopic identification of individual members of these groups using oil immersion and universal stage techniques.
Professor Stevenson

186-704D GEOCHEMISTRY. (2 hours lectures or seminar and assignments.) Current problems in geochemistry and cosmochemistry.
Professors Francis, Saull and Webber

186-705D PETROLOGY. (2 hours lectures or seminar.) Selected topics on recent theoretical and experimental work in igneous and metamorphic petrology.
Professors Francis and Martin

***186-706D ADVANCED SEDIMENTOLOGY.** (2 hours lectures or seminar and 3 hours laboratory.) Classical and recent papers on sedimentary rocks, processes and environments of transport, deposition and lithification, sedimentary mineral deposits. Basin evolution. Methods of study of sedimentary rocks and statistics.
Professors Hesse and Mountjoy

186-707D GEOMORPHOLOGY. (2 hours lectures or seminar, and problems.) Geological interpretation of topography, surficial processes and deposits.
Professor Elson

***186-708D ADVANCED STRATIGRAPHY.** (2 hours lectures or seminar, laboratory work.) Problems of the stratigraphy of North America. The geological evolution of the continent as it is recorded in the Paleozoic, Mesozoic, and Cenozoic sedimentary rocks.
Professor Stearn

186-709D GEOLOGY OF PETROLEUM. (2 hours lectures or seminar.) Theories of hydrocarbon and petroleum origin; migration of petroleum; character of the reservoir and condition of fluids and gases in it. Structural traps, stratigraphic traps. A brief survey of the petroleum resources of the world. Classical and recent papers on petroleum geology are discussed.
Professor Mountjoy

186-711D MINERALOGY OF CRYSTALLINE ROCKS. (2 hours lectures or seminar.) A survey of the mineralogy of igneous and metamorphic rocks.
Professor Martin

186-712D X-RAY CRYSTALLOGRAPHY. (6 hours laboratory; Prerequisite: Geology 186-211A.) Techniques of x-ray diffraction applied to a crystallographic research problem.
Professor Donnay

186-713D ADVANCED ECONOMIC GEOLOGY. (4 hours lectures or seminar and assigned problems.) Ore genesis, discussion of physical-chemical aspects and classic examples; world distribution of mineral resources.
Professor MacLean

***186-714D GLACIAL AND PLEISTOCENE GEOLOGY.** (2 hours lectures or seminar.) Glacial geology and the effects of glacial climates in peripheral areas; stratigraphy and chronology of the Quaternary Era.
Professor Elson

186-715A INSTRUMENTAL ANALYSIS. (1 hour lecture, 3 hours laboratory.) Application of instrumental methods of analysis to materials of geological interest. Electron microprobe, optical spectography, x-ray spectrometry, x-ray diffraction, atomic absorption.
Professors MacLean and Webber

186-716D ECONOMIC GEOLOGY LABORATORY. (3 hours laboratory per week.) Study of suites of ores and rocks from important mining districts. Specific projects may be undertaken.
Professor MacLean

186-717D ADVANCED EARTH PHYSICS. (3 hours lectures or seminar and assignments.) Discussion of selected topics in earth physics.
Professors Saull and Telford

186-719D ISOTOPE GEOLOGY. (2 hours lectures or seminar.) The nature of isotopes; mass spectrometry; geochronology; significance of certain isotope ratios in minerals and rocks.
Professor Doig

186-720D ASSIGNED READINGS AND SEMINAR. Field of study and director to be specified.

186-721D RECENT SEDIMENTS AND MARINE GEOLOGY. (Also Marine Sciences 395-721D.) (2 hours seminar, lectures and assignments.) Emphasizes recent research concerning sediments, sedimentary processes, and structure of continental margins, ocean basins and mid-ocean ridges. Sediment diagenesis. Chemistry of sea-water and sediments. Evolution of ocean basins; sea-floor spreading and plate tectonics.
Professors d'Anglejan, Hesse and Mountjoy

186-722D ADVANCED ENGINEERING GEOLOGY. (2 hours seminar, 2 hours laboratory or assignments.) Application of knowledge of geological materials and processes in the investigation, design, construction and maintenance of foundations and other engineering projects.
Professor Grice

E11 MARINE SCIENCES CENTRE

Graduate students will take such courses, including courses in other departments, as are considered necessary for their training and for the development of the particular fields of specialization. All students are expected to take courses 395-440A, 395-441B (for these two courses, see Section B), 395-660D and 395-309A. Primary emphasis for both the M.Sc. and Ph.D. degrees is placed upon research and thesis presentation. The comprehensive examination for the Ph.D. candidates usually takes place at the end of the second year of study. It covers the whole field of marine science but allows for the specialized interests and training of each student, in Botany, Zoology, Microbiology, Physics or Geology.

Students are accepted on the basis of a first or second class honours degree in an appropriate subject, or high standing in general science; a qualifying year in addition to the minimum degree requirement may be necessary, at the discretion of the Chairman or Vice-Chairman.

The Marine Sciences Centre is inter-departmental in scope, emphasizing the essential inter-disciplinary nature of the science of Oceanography. Excellent laboratory and library facilities are available for research, and opportunities for field work exist in the Arctic, the estuary of the St. Lawrence river, the Gulf of St. Lawrence, the Canadian Eastern Seabord, and at the Bellairs Research Institute at Barbados. The special research interests of the Centre include the physics of sea ice, the energy exchange between the atmosphere and hydrosphere, marine climatology, the dynamics of estuaries, marine bacteria, growth and life cycles of marine organisms, marine productivity marine biogeography and sedimentation.

Courses in the Physical Sciences are listed here; the whole list of courses offered (biological as well as physical) can be found in Section "B" of this *Announcement.*

STAFF

Professors – M.J. DUNBAR *(Biology) (Chairman);* E.R. POUNDER *(Physics) (Vice-Chairman);* M.P. LANGLEBEN *(Physics);* J.B. LEWIS *(Director, Redpath Museum)*
Associate Professsors – B.F. d'ANGLEJAN; C.M. LALLI
Assistant Professors – R.G. INGRAM; D.C. MACLELLAN; F. SANDER *(Director, Bellairs Research Institute)*
Research Associate – R.S. STEG
Research Assistant – SUSAN WOODS
Associate Members – M.E. GOLDSTEIN *(Biology);* R. HESSE *(Geology);* ROGER KNOWLES *(Microbiology);* R.A. MACLEOD *(Microbiology);* E.W. MOUNTJOY *(Geology);* SVENN ORVIG *(Meteorology);* H.M. REISWIG *(Redpath Museum);* S.B. SAVAGE *(Civil Eng.)*
Honorary Professor (part-time) – G. LAROCHE
Honorary Research Fellow – PAUL MONTREUIL *(Director, Montreal Aquarium)*

COURSES FOR HIGHER DEGREES

ADVANCED UNDERGRADUATE COURSES

198-309A DESCRIPTIVE OCEANOGRAPHY. (3 hours.) Major physical and chemical properties

of sea water; methods of measurements, space and time distribution. The geostrophic approximation and the dynamic method. General features of the oceanic circulation.
Professors d'Anglejan and Ingram

198-319B INTRODUCTION TO DYNAMICAL OCEANOGRAPHY. (3 hours.) Equations of motion. Geostrophy. Boundary layers. Horizontal wind-driven circulation. Waves and tides.
Professor Ingram

GRADUATE COURSES

395-660D SEMINAR IN GENERAL OCEANOGRAPHY. (2 hours.) An advanced seminar course on research in salt water environments, with emphasis on contemporary work. Discussion of the orginal literature, recent advances and basic theory.
Staff

E12 DEPARTMENT OF MATHEMATICS

STAFF

Professors – E. ROSENTHALL *(Chairman)*; M. BARR *(On leave)*; I. CONNELL; C. HERZ; H. KAUFMAN; J. LAMBEK; W. MOSER; H. RUBEN; V. SESHADRI; C. SOLIN *(On leave)*; J. TAYLOR
Professor – (Visiting 1975-76) – J. DUGUNDJI
Associate Professors – S. MELAMED *(Assistant Chairman)*; W. BROWN; J. CHOKSI; C. COSTLEY; S. DRURY; A. EVANS; D. GILDENHUYS; K. GOWRISANKARAN; M. HERSCHORN; W. JONSSON; E. KOUNIAS; J. LABUTE *(On leave)*; B. LAWRUK; M. MAKKAI *(On leave)*; A. MATHAI; S. NEGREPONTIS *(On leave)*; T. OKUBO *(On leave)*; B. RATTRAY; R. RIGELHOF; C. ROTH; N. SANCHO; G. SCHMIDT; G. STYAN *(On leave)*; D. SUSSMAN; K. TAM; J. TURNER; R. VERMES
Associate Professors (Visiting 1975-76) – E. THOMAS, Z. ZIEGLER
Assistant Professors – W. ANDERSON; M. BUNGE *(On leave)*; W. LANGFORD; S. MASLOWE; T. PAPAIOANNOU; E. ROWLINSON; P. RUSSELL; D. WOLFSON; S. ZLOBEC
Assistant Professors – (Visiting 1975-76) – W. FLEISSNER; R. STERN
Research Visitors 1975-76 – J.A. BEACHY; R. DIACONESCU; J. FISCHER; G. KLINCSEK; M. PFENDER; P. ROBERTS; S. SHNIDER; L. STOUT; A. SWETT; A. de la TORRE

NOTE: A brochure "Information for Graduate Students in Mathematics" supplements the information contained in this Announcement and should be obtained from the Department.

REQUIREMENTS

MASTER's DEGREES

Three distinct programs are offered. Students who follow the General program (recommended for those intending to continue for the Ph.D. degree) must pass three full courses in mathematics. A student must register in 189-572D, 189-581D and 189-583A unless he has previously taken the equivalent. In special cases 189-372D may be substituted for 189-572D. There are two applied programs designed for students intending to pursue a career in industry and business after obtaining the Master's degree. In the Applied Mathematics program, students are required to pass three (in some instances four) full courses in mathematics. The requirements in the Applied Statistics program are normally four full courses, at least three of which must be taken in the Department of Mathematics. Courses are chosen after consultation with members of staff. All three programs require participation in assigned seminars and submission of a thesis. The thesis need not be an original contribution to knowledge, but may be of an expository nature.

Ph.D. DEGREE

To complete a Ph.D. program the student must: (a) pass six approved courses beyond the Bachelor's level; (b) pass a Comprehensive Examination consisting of a written Part A, which is concerned with his general mathematical background, and an oral Part B concerned with his specialities; (c) demonstrate facility in reading mathematical articles in English and French as well as one further language (e.g. German or Russian); (d) submit a thesis judged to be an original contribution to knowledge.

COURSES

This Announcement is prepared early in the calendar year and will be modified by the time the academic year begins. An updated supplement is available at the Department Office and should be consulted. These changes will be important to a sensible choice of program.

NOTE: WITH THE CONSENT OF THE INSTRUCTOR, PREREQUISITES AND COREQUISITES FOR COURSES MAY BE WAIVED IN INDIVIDUAL CASES.

***189-461D COMBINATORIAL MATHEMATICS.** (6 Credits; Prerequisites: 189-242A or equivalent and 189-246A, B or equivalent. This course will be given in alternate years.) After a study of fundamentals (partitions and compositions, principle of inclusion and exclusion, etc.) students will be introduced to combinatorial aspects of several fields (graph theory, designs, set theory, group theory, geometry, number theory, etc.) from classical up to an including current research.

189-478A NUMERICAL ANALYSIS (3 Credits; prerequisite: 189-372D. Basic error analysis; numerical solutions of non-linear equations by fixed point methods, interpolation, numerical integration and numerical solutions of ordinary differential equations.

189-479B NUMERICAL ANALYSIS. (3 Credits; Prerequisite: 189-271D, 478A.) Numerical analysis in normed spaces. Finite and infinite systems of equations. Integral, ordinary and partial differential equations. Finite differences. Numerical realization of the Ritz-Galerkin methods. Convergence and stability of numerical algorithms.

189-489A MATHEMATICAL LOGIC. (3 Credits.) Propositional calculus and first order predicate calculus; completeness, compactness and normal from theorems; theorems of Harbrand, Craig, Beth and Gentzen.

189-490B MATHEMATICAL LOGIC. (3 Credits.) In alternate years either (1) an introduction to recursion theory, undecidability theorems of Godel and Church, recusively enumerable sets, degrees; or (2) an introduction to model theory, ultraproducts, saturated models, elimination of quantities, decidability.

***189-551A COMPLEX ANALYSIS I.** (3 Credits.) Maximum modulus theorem. Rouche's theorem, Weierstrass and Vitali's theorem on convergence of holomorphic functions. Normal families. Conformal mapping, harmonic functions. Entire and meromorphic functions.

***189-552B COMPLEX ANALYSIS II.** (3 Credits.) Selected topics from the theory of a complex variable.

189-555D FLUID DYNAMICS. (6 Credits.) Kinematics. Dynamics of general fluid. Inviscid fluids. Navier-Stokes equations. Exact solutions of the Navier-Stokes equations. Perturbation methods. Flow at small Reynolds number. Flow at high Reynolds number. Stability.

189-556D MATHEMATICAL STATICS. (6 Credits.) Probability and distribution theory including discussion of some basic distributions in p-space. Regression and correlation theory. Laws of large numbers and central limit theorem. Sampling theory (including large-sample theory). Likelihood functions and information matrices. Hypothesis testing, estimation theory and decision theory. Distribution-free procedures.

189-571D DIFFERENTIAL GEOMETRY. (6 Credits; Prerequisite: 189-380D.) The geometry of differential manifolds.

189-572D REAL AND COMPLEX ANALYSIS. (8 Credits; Prequisites: 189-271D, 189-372D.) The theory of measure and integration, basic Hilbert and Banach space theory, complex analysis from a modern viewpoint.

189-574A ORDINARY DIFFERENTIAL EQUATIONS. (3 Credits; Prerequisite: 189-374D.) Topics to be selected from the following; existence and uniqueness theorems, dependence of solutions on parameter and initial data, stability theory, perturbation methods, singular points, periodic systems, two point boundary-value problems.

189-575B PARTIAL DIFFERENTIAL EQUATIONS. (3 Credits; Prerequisite: 189-374D.) A continuation of topics introduced in 189-374D.

189-581D HIGHER ALGEBRA. (6 Credits; Prerequisite: 189-371D or equivalent.) The rudiments of category theory, including adjoint functors; noetherian, artinian and semi-simple rings, representations of finite groups; a continuation of commutative algebra, prime ideals, localisation and completion; some algebraic number theory and a deeper study of field extensions.

189-583A TOPOLOGICAL SPACES. (3 Credits.) Bases, connectedness, convergence, product and quotient spaces, metrization, compactness, function spaces.

***189-585A INTEGRAL EQUATIONS AND TRANSFORMS** (3 Credits.) Introduction to the theory of Hilbert spaces. Fredholm and Volterra integral equations; exact and approximate solutions. Equations with Hermitian kernels. Hilbert-Schmidt theorem and consequences. Representation formulas for the solutions of initial and boundary value problems. Green's functions. Integral Transforms. Applications.

***189-586B ADVANCED BOUNDARY AND INITIAL VALUE PROBLEMS.** (3 Credits; Prerequisites: 189-316B, 374D, or equivalent.) Partial differential equations of applied mathematics. Dirichlet and Newmann problems; complex variable methods. Homogeneous and non-homogeneous problems; Green's functions, integral transform methods, variational techniques. Pertubation theory. Applications.

189-587D ADVANCED PROBABILITY THEORY. (6 Credits.) Distribution functions on R^1. Basic measure and integration theory, with special reference to probability measures on (R^1, B^1) and their correspondence with distribution functions. Random variables. Expectation, including basic inequalities. Independence. Conditional probability. Convergence concepts, laws of large numbers. Characteristic functions. Central limit theorem and its ramifications. Random walks.

189-588D ALGEBRAIC TOPOLOGY. (6 Credits.) Introduction to homology and homotopy.

*189-630D TENSORIAL OPERATORS AND APPLICATIONS. Tensor analysis. Algebra of tensorial sets and operators. Recoupling of triple and quadruple products. The Racah coefficients. Applications.

*189-631D ASYMPTOTIC APPROXIMATIONS AND PERTURBATION METHODS. Asymptotic series. Summation. Asymptotic estimation of integrals: Laplace method. Saddle point method. Asymptotic solutions of differential equations. Regular and singular perturbations.

*189-632D MATHEMATICAL THEORY OF ELECTRICITY AND MAGNETISM.

*189-633D MATHEMATICAL THEORY OF ELASTICITY. Analysis of stress and strain in linear and non-linear elasticity; stress-strain relations; fundamental equations; fundamental solutions; vibrations in elastic media; torsion and flexure; variational methods; plates and shells; stability of elastic systems.

*189-634A INFORMATION THEORY. Measures of information; channel models and coding theorems; noiseless coding; error-correcting codes; information sources; generalized measures of information and their characterization; applications.

189-635A NUMERICAL ANALYSIS. Error analysis, fixed point theorem and roots of equations, interpolation and numerical integration. Solution of initial value problem in differential equations.

189-636B NUMERICAL ANALYSIS. Inversion of matrices and eigenvalue problems, partial differential equations, linear programming.

189-640D ADVANCED THEORY OF GROUPS. Semigroups. Isomorphism. Isomorphism theorems. Jordan-Hoelder-Schreier theorem. Krull-Schmidt theorem. Topics selected from the following; abelian groups, solvable and nilpotent groups. Free groups. Matrix representation of linear algebras, groups and the theory of group characters. Additional topics to suit the class.

*189-650D CALCULUS OF VARIATIONS. The first variation and the Eulerian characteristic equation, the second variation, Legendre's test and the theory of conjugate points; isoperimetrical problems; integrals with variable end points and Hilbert's integrals. Strong variations and the Welerstrassian E function. Hamilton's principle and the principle of least action.

*189-651D FOURIER TRANSFORMS. Fourier, Laplace and Mellin transforms, applications to probability; generalized Fourier transforms, Watson and Bochner transforms; integral and dual integral equations.

189-652D FUNCTIONAL ANALYSIS. Linear operators on Hilbert and Banach spaces, results in special spaces. Riesz representation theorem, spectral theory.

189-653A ORDINARY DIFFERENTIAL EQUATIONS. Existence and uniqueness theorems; approximation methods, systems of equations; boundary and eigenvalue problems; stability theory.

189-654D PARTIAL DIFFERENTIAL EQUATIONS. Study of equations of eliptic, parabolic, and hyperbolic types; singular solutions, Green's function; application of Fourier Series and integrals; variational methods.

*189-655D SPECIAL FUNCTIONS.

189-656D FOURIER SERIES AND APPROXIMATION. Approximation in function spaces; orthogonal sets of functions and general Fourier series; orthogonal polynomials; trigonometrical Fourier series; almost periodic functions.

189-657B INTRODUCTION TO INTEGRAL EQUATIONS. Resume of finite dimensional linear algebra; types of linear integral equations; Hilbert's theory; Schmidt's theory of the symmetric kernel; applications to boundary value problems of linear differential equations and to almost periodic functions.

*189-658B INTEGRATION IN LOCALLY COMPACT SPACES. Radon measures, and Riesz representation theorem.

*189-659A TOPOLOGICAL VECTOR SPACES. Basic properties of locally convex spaces. Hahn-Banach theorem.

189-660B DIFFERENTIAL GEOMETRY. Smooth maps on open subsets of Rn, implicit function theorem, submanifolds of Rn. Metric invariants of curves. Induced metric and affine connection on submanifolds of Rn. Relative properties of surfaces. Differentiable manifolds and maps, tangent spaces, tensors and differential forms. Riemann metrics and affine connections.

189-663B SPECIAL TOPICS IN DIFFERENTIAL EQUATIONS.

*189-670A RANDOM PROCESSES. Basic concepts, stationary and nonstationary processes, correlation functions, power spectra, linear systems, mean square periodicity and Fourier series, sampling theorems, series expansions, linear mean square estimation.

189-671A APPLICATIONS OF STOCHASTIC PROCESSES. Discrete parameter Markov chains, including branching processes and simple random walks. Limit theorems and ergodic properties of Markov chains. Continuous parameter Markov chains, including the general birth and death process. Selected topics from the following areas: renewal processes, queuing theory, Brownian motion, storage and inventory, statistical inference for stochastic processes.

*189-672A ESTIMATION The theory of point and set estimation of parameters in statistical models. This includes Bayesian and decision-theoretic approaches.

***189-673B TESTS OF HYPOTHESES.** A systematic study of the modern theory of testing statistical hypotheses, with applications.

***189-674A EXPERIMENTAL DESIGN.** Galois fields, finite projective and Euclidean geometries. Balanced incomplete block designs. Latin squares and orthogonal arrays. Partially balanced incomplete block designs, construction, various association schemes, self-dual designs. Partially balanced incomplete block designs with two associate classes, group-divisible designs, triangular association schemes.

189-675A NONPARAMETRIC STATISTICS. Theoretical aspects of order statistics; distributions, moments, product moments. Tests based on the sample distribution function; statistics of the Kolmogorov-Smirnov type. Applied aspects of various nonparametric tests: description, illustration, theoretical justification, comparisons.

189-676B MULTIVARIATE ANALYSIS. Properties of the multivariate normal distribution. Central and noncentral Wishart distribution. Statistical inference for multivariate normal populations. Hotelling's T^2. The product-moment correlation coefficient. Canonical correlations. Multivariate linear models. Principal components. Factor analysis.

***189-677D DECISION THEORY.** Formulation of the statistical decision problem. Bayes and minimax solutions. Hypothesis testing and estimation from the point of view of decision theory. Sequential analysis.

189-678A ADVANCED STATISTICAL METHODS I. Statistical data analysis, with special reference to applications of the main statistical methods to problems in medicine, biology, chemistry, etc. Extensive use of computer methods, especially subroutine packages for statistical data description, display, and analysis.

189-679B ADVANCED STATISTICAL METHODS II. Continuation of 189-678A.

189-681B TIME SERIES ANALYSIS. Stationary stochastic processes, autocovariance and autocovariance generating functions, spectral distribution function and spectral density, the periodogram. Model estimation, likelihood function, estimation for autogressive, moving average and mixed processes, computer simulation, diagnostic checking, tests with residuals. Estimation of spectral density; Bartlett, Daniell, Blackman-Tukey spectral windows. Asymptotic moments of spectral estimates.

189-682A MATRIX THEORY WITH STATISTICAL AND OTHER APPLICATIONS. Inequalities for trace and rank. Generalized inverses; idempotent matrices. Schur complements. Factorizations into triangular and diagonal form; singular values. Normal matrices. Albegraic and geometric multiplicity. Computational procedures: Householder transformations, condition number. Applications to least squares. Courant-Fischer minimax theorem; related inequalities. Quadratic forms in normal variables; characteristic function, chisquaredness, independence.

189-683B LINEAR MODELS. General univariate linear models with full rank and with less than full rank. Best linear unbiased estimators. General linear hypothesis. Computational procedures. Weighted least squares. Analysis of variance with equal and unequal numbers in cells. Latin squares, complete factorial designs. Prediction and confidence bands, multiple comparisons. Random effects models.

Graduate Seminars
189-702D, 189-703D, 189-704D, 189-705D, 189-706D, 189-708D, 189-709D, 189-710D, 189-711D, 189-712D, 189-713D, 189-714D, 189-715D, 189-716D, 189-717D, 189-718D, 189-719D, 189-720D, 189-721D.

Areas of mathematics and topics will be selected to suit the needs of the students and will be given by various members of the staff.

189-740B READING COURSE IN ALGEBRA. A study of some advanced textbook or selection of papers under the direction of members of the Department.

189-741D RINGS. Rings and modules; the Artin-Wedderburn structure theorem; the radical; central simple algebras and the Brauer group; multiplicative ideal theory. Additional topics to suit the class.

189-742D HOMOLOGICAL ALGEBRA. Modules; diagrams; free, injective, projective and flat modules; the tensor product, the Hom-functor; derived functors, dimension theory; local rings; cohomology of groups.

189-743D THEORY OF CATEGORIES. Categories, functors, natural transformations. Adjoint functors and limits. Embedding and completions. Algebraic categories and standard constructions. Abelian and homological categories. Categories and the foundations of mathematics.

189-744D ANALYTIC NUMBER THEORY. Arithmetical functions, elementary theory of the distribution of primes; proof of the prime number theorem, Dirichlet's theorem on number of primes in arithmetic progression; asymptotic and convergent formulas for the partition of n.

189-745D ALGEBRAIC NUMBERS. Topics selected from the following: integral closure; unique factorization domains; Dedekind domains; valuation theory; completion and local fields; ramification and the different; cyclotomic fields and explicit reciprocity laws, the theory of units, adeles and ideles.

189-746B LIE GROUPS AND ALGEBRAS. Representation of linear groups and their Lie algebras. Commutative, nilpotent and solvable ideals of Lie algebras. Classification of classical simple Lie groups by means of Cartan's

sub-algebras. Weights of irreducible representation and structure of semi-simple Lie algebras.

189-750D READING COURSE IN ANALYSIS. A study of some advanced textbook or selection of papers under the direction of members of the Department.

189-751A HARMONIC ANALYSIS I. This course is an introduction to the subject. Topics covered: elementary theory of topological groups with particular emphasis on the locally compact case; translation invariant measures; fundamental theory of harmonic analysis on locally compact abelian groups; representations of compact groups, fundamental theory of harmonic analysis for compact groups. (NOTE: Useful corequisite 189-652D.)

189-752D FUNCTION ALGEBRAS.

***189-753D RINGS OF CONTINUOUS FUNCTIONS.** Ring C(X) of continuous real-valued functions on a space X. Ideals of C(X). Compact spaces, Stone-Cech compactification. Order properties of the residue class fields and compact spaces. The Katetov-Shirota theorem. Stone-Cech compactification of the discrete space of positive integers. Topics on ultrafilters.

189-754B INTRODUCTION TO DISTRIBUTIONS. Test functions, generalized functions, application to partial differential equations.

189-760D READING COURSE IN GEOMETRY AND TOPOLOGY. A study of some advanced textbook or selection of papers under the direction of members of the Department.

189-761D TOPICS IN GEOMETRY. Selected topics.

189-762D ALGEBRAIC GEOMETRY. Affine and projective varieties. Rational functions on a variety. Multiplicity for zero-dimensional intersections. Bezout's theorem in the projective plane. Birational and biregular correspondences. Geometry on a plane curve and the Riemann-Roch theorem.

189-763D THEORY OF SHEAVES. A study of sheaf theory and its application to other branches of mathematics. Topics included are: the cohomology of sheaves. Cech singular cohomology, spectral sequences, duality theorems.

189-771A THEORY OF STOCHASTIC PROCESSES. Kolmogorov-Daniell existence theorem for stochastic processes. Separable and measurable stochastic processes. Stopping times. The Brownian motion and Poisson processes, and their properties. Martingales and the principal martingale convergence theorems. Probability measures on metric spaces. Donsker's central limit theorem.

189-772B TOPICS IN STOCHASTIC PROCESSES. Selected topics from one or more of the following areas: Markov chains, general theory of Markov processes diffusion processes and stochastic integral equations, stationary processes, processes with independent increments, random fields.

189-773D THEORY OF GAMES. The minimax theorem of Von Neumann. Finite games and solutions — simple two person games — discrete and finite symmetric games. Isomorphism of games and symmetric equivalence. Reduction of game matrices. Infinite games. Minimax principle by the theory of operators, elements of linear programming.

189-775B HARMONIC ANALYSIS II. The course includes a selection of more advanced topics in harmonic analysis and its applications from: absolutely convergent fourier series and related topics; almost periodic functions; invariant means on topological groups; singular integral pseudo-differential operators; harmonic analysis on lie groups; harmonic analysis on compact abelian groups with ordered dual-disc and polydisc algebras.

E13 DEPARTMENT OF MECHANICAL ENGINEERING

Advanced courses and laboratory facilities are offered for graduate study leading to the M.Eng. and the Ph.D. degrees in Mechanical Engineering.

Graduate studies and research are at present being conducted in the fields of fluid mechanics, mechanics of solids, aerodynamics, heat transfer, gasdynamics, aeroballistics, mechanical design hydroelasticity, conventional and unconventional machining processes, machine tool design and automatic control systems. Current problems deal with such matters as high temperature measurements; air intakes at hypersonic speeds; reactive turbulent free-mixing flow; mixing and supersonic combustion; imploding gaseous detonation; shock stability and attenuation; supersonic aerodynamics; shock boundary layer interactions; fluidic and other control systems; pressure, temperature, turbulence phenomena; jets and wakes; wall jets in subsonic flow; coanda effect; boundary layer control; heat transfer characteristics of flat plates, finned surfaces, two-phase systems, free and forced convection; friction and wear; materials at high rates of strain; viscoelastic behaviour of materials; micro-mechanics of solids, stress holography, advanced continuum mechanics; flow-induced vibration, hydroelastic stability, random vibration of shells; mechanical properties of fibrous media; electrochemical machining, grinding, thermal deformation of machine tools; mathematical modelling of processes for control systems and control applications.

Facilities include wind tunnels, water tunnel, a high enthalpy jet, shock chambers and tubes, high temperature chambers for testing materials and machine tools for conventional and unconventional (ECM. EDM.) methods of machining. The laboratories are equipped with advanced instrumentation including X-ray equipment, lasers, hot-wire anemometers and a data acquisition and control computer with remote-access terminals.

STAFF

Professors – J.W. STACHIEWICZ *(Chairman)*; D.R. AXELRAD; W. BRUCE; J.H.S. LEE; B.G. NEWMAN *(On leave)*

Associate Professors – G.G. BACH; J.C. CHERNA; G. FEKETE; J.M. FORDE; R. KNYSTAUTAS; L. KOPS; C.L. MURPHY; M.P. PAIDOUSSIS; D. PFEIFFER; J.W. PROVAN; A.L. THOMPSON; J.H.T. WU; P.J. ZSOMBOR-MURRAY

Assistant Professors – A.M. AHMED; CHRISTIANNE GUIRAO; R. HOFFMAN

Honorary Lecturers – D. ATACK

Special Lecturer – L.J. VROOMEN

REQUIREMENTS

Admission

The general rules of the Faculty apply. Candidates who come from other institutions are expected to have an academic background equivalent to the undergraduate curriculum in mechanical engineering at McGill or to make up any deficiencies in a qualifying year. The minimum academic standard for admission is normally a high second class standing. Applicants are requested to state in as much detail as possible their particular field of interest for graduate study.

Requirements for the M.Eng. (Option A) Degree

This is an option in which a research thesis, course 305-609 and six other courses that are necessary for progress in their selected field of research are required. Normally other courses are required and are selected in consultation with the candidate's director of research. Selections are made from those listed below, from courses offered by other engineering departments or from cognate courses given in other faculties. All qualified students are accepted tentatively pending their performance in this course work. Their registration is confirmed at the end of the second semester. Students who do not hold an undergraduate engineering (or equivalent) degree and who are accepted into this option will register for the degree M.Sc.. This applies particularly to students engaged in interdisciplinary research. A thesis describing the candidate's research is to be submitted in accordance with the rules of the Faculty and is the major requirement for the degree

Requirements for the M.Eng. (Option B) Degree

This is a course-type of Master's degree which requires twelve graduate courses, including a design project which is equivalent to two semester courses, and the seminar course 305-609. Of the remaining nine courses a maximum of three may be taken from courses offered by other engineering departments or from cognate courses given in other faculties. A departmental supervisor will be appointed for each incoming student and the student's design project will be approved by the department's Option B Committee.

Requirements for the Ph.D. Degree

Candidates normally register for the M.Eng. degree in the first instance. However, in exceptional cases where the research work is proceeding very satisfactorily, or where the equivalent of the M.Eng. degree has been completed at another university, candidates may be permitted to proceed directly to the Ph.D. degree without submitting a master's thesis as long as they have satisfied the course requirements for the M.Eng. degree. Courses of study selected for a Ph.D. program will depend upon the existing academic qualifications of the candidate and those needs for effective prosecution of research. Candidates are encouraged to undertake an additional course of study of their own choice and of two years duration in some field of the humanities or in one of the sciences not directly related to their research. Candidates are required to pass a preliminary oral examination within about 6 mounts of their initial registration for the Ph.D. degree.

COURSES FOR HIGHER DEGREES

In the 1974-75 academic 61 graduate students were registered in the Department. Of the 38 courses listed below, 7 were not given and 10 were cancelled due to lack of numbers.

The following courses available in the undergraduate curriculum of the Mechanical Engineering Department may be selected for Graduate credit provided that both of the following conditions are met:

i) it is recommended by the candidate's supervisor,

ii) no equivalent course was taken during the candidate's undergraduate program.

305-142A STATISTICAL THERMODYNAMICS

***305-220B STATISTICAL MECHANICS**

305-272A MACHINING PROCESSES

305-331B GAS DYNAMICS

***305-333B AERODYNAMICS: IDEAL FLUID THEORY**

305-411B SYSTEMS CONTROL II

305-502A TOPICS OF ADVANCED MATHEMATICS FOR ENGINEERS I. Various aspects of elementary set theory, topology, mappings, linear operators, functionals, functional analysis and variational principles, as applied to engineering research problems. (Text: Simmons: introduction to Topology and Modern Analysis; McGraw-Hill).
J.W. Provan

305-503B TOPICS OF ADVANCED MATHEMATICS FOR ENGINEERS II. Prerequisite: 305-502A. Various aspects of algebraic spaces, measure theory, Lebesque integration, probability algebra and the theory of distributions as applied to engineering research problems.
J.W. Provan

305-507X NUMERICAL ANALYSIS FOR COMPUTER USERS I. Various topics from numerical analysis are selected with an eye to computer usage. Review of finite differences, interpolation and quadrature, ordinary differential equations.
G.G. Bach

305-515A INDUSTRIAL AERODYNAMIICS. Characteristics of the earth's boundary layer, flow patterns around buildings and structures, their effect on the dispersal of pollutants, modelling and model testing, wind tunnel corrections, shelter provided by buildings, pressure distribution over buildings providing data for the structural designer, wind-induced oscillations of buildings and structures.
G.I. Fekete

305-534A CONTINUUM MECHANICS I. Mathematical preliminaries. The Cauchy and Piola stress tensors. Strain and deformation theory. Finite strains and deformation gradients. Rate of deformation tensor. General theory of continuous media. Internal energy. Entropy as a functional in continuum theory.
D.R. Axelrad or J.W. Provan

305-535B CONTINUUM MECHANICS II. Prerequisite: 305-534A. Constitutive theory and material symmetry. Three-dimensional Navier equation of motion. Classical elasticity and elastic potential theory. The Papkovich-Neuber Potential. Linear viscoelasticity. Metal plasticity and plastic constitutive equations. Linear thermoelasticity. The thermoelastic potential.
D.R. Axelrad or J.W. Provan

305-603A,B, or C DESIGN PROJECT I. A design project undertaken under the direct supervision of at least one staff member. Examination entails the writing of a report which is examined internally by the supervisor and another staff member appointed by the Option B Committee of the Mechanical Engineering Department.
Staff

305-604A, B, or C DESIGN PROJECT II. A continuation of 305-603A, B, or C.

305-605A APPLIED MATHEMATICS I. Cartesian tensors and an introduction to curvilinear tensors. A review of differential equations and a development of mathematical techniques, such as Fourier series and transform techniques, leading to their solution. Partial differential equations and approximate methods of solution.
G.G. Bach

305-606B APPLIED MATHEMATICS II. Prerequisite: 305-605A. Applications of the techniques developed in 305-605A to problems in stress analysis, fluid dynamics, heat transfer, chemical diffusion and vibrations. Elementary numerical analysis.
G.G. Bach

305-608Y NUMERICAL ANALYSIS FOR COMPUTER USERS II. Prerequisite: 305-507X or equivalent. Partial differential equations, matrices, Monte-Carlo methods, linear programming and statistics.
G.G. Bach

305-609B,C SEMINAR. All candidates for a Masters degree are required to participate and to deliver one paper dealing with their particular area of research or interest.
J.W. Provan

305-610A FUNDAMENTALS OF FLUID MECHANICS. Origin of macroscopic properties of continuous media (pressure, density, temperature, transport coefficients) and reconciliation with molecular structure of matter. The generalized Bolzmann and hydrodynamic equations. Continuum formulation of the hydrodynamic and magneto-hydrodynamic equations. Dimensional analysis and parametric studies of the Navier-Stokes equations. Selected examples of exact solutions. Flow between parallel plates with heat transfer and electromagnetic forces. Couette flow and flow between rotating cylinders (incompressible and compressible). Suddenly-accelerated flat plate. Normal shock structure. Parametric expansion of the Navier-Stokes equation and the classification of the various classes of fluid motions (i.e., Stokes, potential, subsonic, supersonic, hypersonic, etc.)
J.H.S. Lee and R. Knystautas

305-611B STEADY COMPRESSIBLE AERODYNAMICS. Expansion and compression waves in two-dimensional homenergic and irrotational flow. Prandtl-Glauert and Gothert similarity rules for subsonic and supersonic flow. Crocco theorem of vorticity. Shock formation in a supersonic flow over a curved wall. Method of characteristics for two-dimensional and axially symmetric flow. Two-dimensional and axially symmetric supersonic nozzles and jets. Ackeret supersonic aerofoil theory. Supersonic flow past wings of finite span. Axially symmetric supersonic, isentropic and non-isentropic flow over a cone. Shock bifurcation in ducts. Boundary layer separation owing to shock wave. Shock reflection from boundary layer on flat plate. Methods of

measurement and supersonic wind tunnel testing.
J.H.T. Wu

***305-612B VISCOUS FLOW AND BOUNDARY LAYER THEORY** The Navier-Stokes equations exact solutions. Laminar boundary layer equations. Separation methods of solution. Compressible laminar boundary layer. Significance of Prandtl number. Numerical methods of solution. Stability of laminar flow and the causes of transition to turbulence. Incompressible turbulent boundary layer. Momentum and energy equations. Scales of turbulence. Law of the wall, roughness and the prediction of skin friction. Prediction of the turbulent boundary using integral and field methods. Self-preserving turbulent flows including wakes and jets. Methods of measurement. Extension to compressible flow.
B.G. Newman

305-613B UNSTEADY GAS DYNAMICS. Thermodynamic concepts; basic conservation equations; accoustic theory; waves of finite amplitude; shock formation; gasdynamic theory of shocks; method of characteristics; wave interactions; variable channel area flows; Chester-Chisnell-Whitham theory; cylindrical and spherical flows; dynamics of blast and implosion waves; propagation into uniform, variable density and discontinuous media; self-similar and non-similar methods of solution; applications to internal and external non-steady flows, cavitation bubbles, hypervelocity impact, astrophysical problems and other physical phenomena.
R. Knystautas and J.H.S. Lee

305-614B NON-EQUILIBRIUM GAS DYNAMMICS. Introduction to atomic and molecular structures and relation to radiation. Statistical thermodynamics and kinetic theory of real gas, partition functions, mixed gas, reacting gas, equilibrium theory, non-equilibrium theory. Collision theory, elastic and inelastic collisions, ionization, breakdown in gases, principle of detailed balancing. Interaction of radiation with matter, spectra, line boadenings, population inversions, lasers. Flow with vibrational and chemical non-equilibirium rate equations, relaxation processes, nozzle flow.
C. Guiro, J.H.S. Lee, R. Knystautas

305-616B AERODYNAMIC NOISE. Aero-acoustic equations. Lighthill's theory of aerodynamic sound. Source, dipole and quadrupole radiation. Relevant concepts from random process theory. Curle's theory of the influence of solid boundaries. Theories of jet noise and propeller noise. Physical characteristics of the noise of jets, wakes, boundary layers, separated flow, propellers, fans, combustion and compressors. Techniques of noise suppression.

305-621B ADVANCED MACHINING PROCESSES. Prerequisite: 305-272A. Metal behaviour under cutting conditions. Machining accuracy of NC machine tools. Machinability concept and application. Some design considerations of cutting tools; optimization of tool shape. Recent developments in abrasive processes. Some theoretical and practical aspects of electro-discharge and electrochemical machining . Lasers in manufacturing. Surface integrity in unconventional machining. System approach in manufacturing.
L. Kops

305-623B MACHINE TOOL ENGINEERING. Common design features of machine tools. Elements of machine tools. Machine tools for production in large series: automatics, transfer machines and production, line technology, line balancing, group technology, numerically controlled machines and machining centers, design of N/C tooling systems, fixturing for N/C large machine tool system. Economic parameters.
J.C. Cherna

305-624A APPLIED PROCESS CONTROL. Hardware and software aspects of real time computers in process control and related applications. Fundamental hardware. Digital and analogue transducers, actuators, filters, interfaces and processors. Fundamental software: Process assembler language and machine architecture, real time operating systems, process oriented subsystems, interrupts, drivers, service routines. (An application assignment is given).
P.J. Zsombor-Murray and L.J. Vroomen

***305-625B SYNTHESIS OF MECHANISMS.** Review of kinematics and dynamics of plane motion mechanisms. Kinematics of Space Mechanisms: First principles: Coordinates and displacement of a rigid body, instantaneous screws, velocity and acceleration of rigid bodies, inertia and its effects. Application: graphical and matrix methods of analysis. systhesis of mechanisms: gross motion of mechanisms, synthesis for finite displacement, function generation and path generation, synthesis for kinematic parameters, synthesis for dynamic parameters, introduction to the synthesis of space mechanisms involving both graphical and analytical techniques.
A.M. Ahmed

305-626B ADVANCED CONCEPTS OF ENGINEERING DESIGN. The Morphology of the Engineering Design Process. Systems Engineering: Formulation of the problem system; complex systems under constraints; applications to products, equipments and socio-economic-technical systems. Models for the creative process. Algorithms for creative synthesis solution space, morphological analysis, separation of synthesis and analysis, value engineering, synectics, boundary shifting. Feasibility analysis in the technical, economic and use environments. Modelling for simulation and optimization; choice of computer programs for continuous and stochastic models. Decision making and resource allocation. Utility functions, decisions matrix, decision criteria and decision trees. Rational choice among alternative design strategies with probabilistic outcomes.
Staff

305-627B COMPUTER-AIDED MECHANICAL DESIGN. Computer graphics, automated draughting, function visualization. Interactive techniques and the engineering design process. Two — and three—dimensional curve fitting. Optimization, layout, and packaging problems. Stress and force analysis. Network and flow analysis. Project planning and scheduling techniques. The course is conducted on a seminar and informal lecture basis. Students will review topics on a broad basis but will concentrate on two topics, writing original programming in one of these.
D. Pfeiffer

305-632A ADVANCED STRESS ANALYSIS FOR ENGINEERS. Review of small displacement theory of elasticity. Variational principles. Finite strains. The strain energy function and the principle of potential energy. Thermoelastic problems. Deformation and flow theory of plasticity. Response characteristics of viscoelastic materials.
J.W. Provan or D.R. Axelrad

305-633B TRIBOLOGY. Friction; wear; solid lubrication, boundary lubrication; externally pressurized bearings; fluid film lubrication; rolling contact bearings; bearing selection and design; lubricant chemistry; films and loops.
D. Atack

305-640A GENERAL SYSTEMS THEORY. An introduction to mathematical modelling of general systems. Fundamental concepts of state variables and phase representations, geometry of phase portraits, singular points. Bifurcations stability and jump phenomena. Mechanisms of growth and decay, saturation time-lag cyclical fluctuation, feedback, hierachy and structure formation. Application of thermodynamic concepts in the modelling of systems. Examples and practice in the formulation of models of industrial and environmental systems involving social, economic, ecological and biological factors.
J.H.S. Lee

305-641B DYNAMICS OF COMPLEX SYSTEMS. Formulation and analysis of non-deterministic, complex systems, non-linear rate equations with periodic and random coefficients. Hamiltonian formulations, concept of contraction and levels of macroscopic description ensemble representations. Macro-variables and macroscopic laws, system response to random inputs. Gaussian-Markov processes, functional space, correlations and power spectrum. Application of biosystems. Emphasis of the course is on the application of techniques to physical complex systems.
J.H.S. Lee

305-642A MECHANICS OF ENGINEERING SYSTEMS. Variational methods in mechanics. Hamilton's principle and the equations of motion of engineering systems. Lagrangian formulations of discrete and continuous systems. Hamiltonian dynamics, Routh's procedure. Canonical transformations and the Hamilton-Jacobi method. General methods of discretizing continuous systems. Dynamic behaviour of linear and non-linear systems. Phase-space representation. Liapunov's definition of stability. Response of engineering systems to deterministic inputs by classical methods (matrix method).
M.P. Paidoussis

305-643B VIBRATIONS IN ENGINEERING SYSTEMS. Review of analysis of linear continuous systems by classical methods. Response to deterministic and random excitation. Discretization of continuous systems; receptance, transfer-matrix, finite element, Galerkin methods. General linear algebra methods for analysis of linear systems; classical, numerical, matric function techniques. Response of generalized systems (non-diagonal mass, stiffness and dissipation matrices) to deterministic and random loads. Application to selected mechanical, electrical and accoustical systems. Introduction to the analysis of nonlinear systems.
M.P. Paidousis

305-644A NONLINEAR CONTROL SYSTEMS. Review of some attributes of nonlinear system dynamics. Phase-plane analysis of low-order nonlinear systems, singular points in the phase plane. Analysis of relay systems with the Tsypkin locus Sinusoidal-input describing functions, steady-state and transient oscillations in nonlinear systems, multiple-input describing functions and stabilization of nonlinear systems by means of high frequency dither signals. Random input describing functions. Applications of the second method of Liapunov to nonlinear control system design and stability analysis. Lure's theorem and Popov's method. Introduction to the analysis and design of control systems for distributed parameter processes.
R. Hoffman

***305-650A HEAT TRANSFER.** A study of more advanced topics in steady and transient heat flow by conduction, convection and radiation. New developments in heat transfer theory and techniques.
J.W. Stachiewicz

305-651B DESIGN OF HEAT TRANSFER EQUIPMENT. The design of heat transfer equipment with special attention to the design of shell-and-tube heat exchangers, coolers, heaters, condensers; also, the design of air and gas heat exchangers for gas turbines. The main stress will be on the thermal aspects of the design but mechanical features will also be discussed.
J.W. Stachiewicz

***305-652B DYNAMICS OF COMBUSTION.** Summary of basic thermodynamics, statistical mechanics, fluid dynamics and chemical kinetics. Conservation equations for multicomponent reacting systems. Interface boundary conditions. Diffusion flames, droplet and particle combustion. Steady laminar pre-mixed gas flames. Mechanisms of flame propagation. Flammability limits. Flame

quenching. Non-steady phenomena in flames. Cellular structure. Steady and non-steady turbulent flames. Spray combustion. Detonative combustion. One-dimensional steady detonation waves. Initiation of detonation. Detonational instability and structure.
R. Knystautas and J.H.W. Lee

305-700A, B, C DOCTORAL PRELIMINARY EXAMINATION.
Staff

305-722A, B SELECTED TOPICS IN MACHINING PROCESSES. Prerequisite: 305-572A. A study of more advanced topics in metal cutting, abrasive processes and unconventional methods of machining. New trends and developments in material removal theory and techniques.
L. Kops

305-734A MICROMECHANICS I. Prerequisites: 305-534A and 305-535B. Corequisite: 305-502A. Probabilistic concepts in Micromechanics. Stochastic functions and random processes. Statistical mechanics of structured solids. Microstates and the Master equation of structural solids.
D.R. Axelrad

305-735B MICROMECHANICS II. Prerequisite: 305-734A. Corequisite: 305-503B. Probabilistic deformation theory of structured solids. Review of deterministic kinematics. Models of structured solids. The Markovian approximation to the deformation process. Probabilistic constitutive theory and the material functional. Applications to polycrystalline solids and fibrous networks.
D.R. Axelrad

305-745A ADVANCED DYNAMICS OF ENGINEERING SYSTEMS. State vector analysis of engineering systems. Liapunov's stability analysis and application to stationary linear systems. General dynamic and Eulerian stability methods for linear distributed parameter systems. Selected topics in non-linear mechanics. Methods of analysis of non-linear systems. Introduction to aeroelastic phenomena and discussion of selected topics in aerohydroelasticity.
M.P. Paidoussis

E14 DEPARTMENT OF METEOROLOGY

STAFF

Professors – SVENN ORVIG *(Chairman)*; W.F. HITSCHFELD; J.S. MARSHALL; R.R. ROGERS
Associate Professors – J.F. DEROME; P.E. MERILEES; E. VOWINCKEL
Assistant Professor – H.G. LEIGHTON
Research Associate – C. WARNER

REQUIREMENTS

M.Sc. candidates may enter with a bachelor's degree with honours in Physics or Mathematics and Physics, or a bachelor's degree in Engineering Physics, but in any case only with standing acceptable to the Department. The program then consists of courses 195-651D to 195-656D, and culminates in research towards a thesis. Research is normally started after the spring examinations of the first session; it *can* be completed by the autumn, but typically will require a full year, till the end of the second session. Candidates entering with a bachelor's degree with honours in Meteorology can replace some of these courses by instruction in seminar, and can commence their research without delay. Candidates with some postgraduate training or experience in Meteorology may receive credit for this.

Students with a Master's degree in meteorology or equivalent qualification, again with standing acceptable to the Department, may register for the Ph.D. degree. The ordinary requirements concerning thesis and preliminary examination will apply. The work consists principally of research with one of McGill's research groups, active in dynamic and synoptic meteorology and climatology, and the Stormy Weather Group in physical meteorology, especially precipitation physics. The candidate will be required to attend research seminars and to take a small number of courses, in this or other departments, as appropriate.

COURSES FOR HIGHER DEGREES

195-651D PHYSICAL METEOROLOGY. (2 hours; *Texts* – Mason, *Physics of clouds:* Oxford; Kondratyev, *Radiative heat exchange in the atmosphere:* Pergamon.) Thermodynamics of the atmosphere. Instability and convection. Cloud physics and storm structure. Radar applications. Solar and terrestrial radiation. Radiation calculations and diagrams. Energy budget of the atmosphere.
Professors Rogers, Leighton and Hitschfeld

195-652D DYNAMIC AND NUMERICAL METEOROLOGY. (2 hours; *Texts* – Haltiner, *Numerical Weather Prediction:* Wiley; Holton, *An Introduction to Dynamic Meteorology;* Academic Press.) The equations of motion. Circulation and vorticity, development theorems. Linear perturbations, instability. Mathematical models of the atmosphere; application of difference equations and their numerical solution.
Professors Derome and Merilees

195-653D CLIMATOLOGY. (1 hour; *Texts* — Sellers. *Physical Climatology:* Un. of Chicago; Critchfield, General Climatology: Prentice-Hall.) The general circulation of the atmosphere and the ocean. Climatic classification. The heat and water balance, climatic change.
Professor Orvig

195-654D SYNOPTIC METEOROLOGY. (4 hours.) A laboratory course to complement Meteorology 195-651D to 195-653D. Analysis of weather charts and diagrams, forecast techniques, diagnostic treatment of atmospheric dynamics and weather processes. Modern statistical and computer methods are used wherever suitable.
Professor Vowinckel and Staff

195-655D SEMINARS "TOPICS IN METEOROLOGY". (1 hour.) One-hour discussions on special topics in meteorology, e.g. hurricanes; tornadoes; charge generation; ozone.
Staff

195-656D DAILY WEATHER DISCUSSION. (2½ hours.) One-half hour briefing on the current weather situation.
Professor Vowinckel

195-700D Ph.D. COMPREHENSIVE. (Cognate Subjects.)

195-701D Ph.D. COMPREHENSIVE. (General.)

195-751D SEMINAR IN PHYSICAL METEOROLOGY. (2 hours.) A research seminar in topics in atmosphere physics.
Professors Marshall and Rogers

195-752D SEMINAR IN DYNAMIC METEOROLOGY. (2 hours.) A research seminar on theoretical and numerical aspects of current general-circulation studies.
Professors Derome and Merilees

195-753D SEMINAR IN CLIMATOLOGY. (2 hours.) A research seminar in topics from synoptic and physical climatology.
Professors Orvig and Vowinckel

E15 DEPARTMENT OF MINING AND METALLURGICAL ENGINEERING

Graduate programs leading to the M.Eng., M.Sc. and Ph.D. degrees are available for research in Rock Mechanics, Mining Environments, Mineral Economics, Materials Handling, Applied Geophysics, Electrochemistry, Chemical and Process Metallurgy, Mineral Dressing and related Surface Chemistry, Physical and Mechanical Metallurgy. Course programs leading to the M.Eng. (Min.) degree and the Diploma in Mining Engineering are also available.

Special programs are available for those holding degrees in subjects other than Metallurgy or Mining, e.g. Chemistry, Physics, Engineering, Geology, etc.

STAFF

Professors — W.M. WILLIAMS *(Chairman)*; W.G. DAVENPORT; J.J. JONAS; T. SALMAN; W.M. TELFORD
Associate Professors — J.E. GRUZLESKI; R.I.L. GUTHRIE; B.W. MACKENZIE; R.R. MacLACHLAN; G.W. SMITH; W.T. THOMPSON; J.E. UDD
Assistant Professors — P.A. DISTIN; O.T. DJAMGOUZ; J.A. FINCH; O.G. JENSEN
Lecturers — M. BILODEAU; M. FIRTH; D. TROTTER
Sessional Lecturers — R.S. BOIRE; J.-P. DROLET; T.E. HAWKINS; M.J. LUTON

REQUIREMENTS

REQUIREMENTS FOR THE M.Eng. AND M.Sc. DEGREES

The M.Eng. degree is open to graduates holding the B.Eng. degree or its equivalent in Metallurgical Engineering, Mining Engineering, Geophysics or related fields. The M.Sc. degree is open to graduates holding the B.Sc. degree or its equivalent in Metallurgy, Geophysics, Geology or related fields. In both cases, at least a high second class standing at the undergraduate level is required.

A candidate must pass courses assigned by the Department. These will be selected from courses offered by the Department and cognate courses given by other departments. The selection will be based upon a consideration of the student's previous training and research interests.

A candidate will be required to participate in an appropriate Research Seminar course.

A candidate must submit an acceptable thesis based upon research successfully completed by the candidate.

REQUIREMENTS FOR THE GRADUATE DIPLOMA IN MINING ENGINEERING

This Diploma is open to graduates of suitable standing in any branch of engineering or applied science. The Department provides a course of study during the academic year: this is normally followed by five months of approved experience within the mining industry. Candidates will be required to take an integrated group of courses, selected in consultation with the Department and bearing in mind their previous academic training.

REQUIREMENTS FOR THE M.Eng. (Mining) DEGREE

The first year of the program involves four months approved experience within the mining industry, followed by eight months of academic study at McGill University. The academic program has been

designed to advance diversely-trained graduates to a uniform level of postgraduate academic proficiency within the Mining Engineering discipline and to provide them with the important concepts and analytical techniques necessary for a more problem-oriented second year. The second year provides a sequence of advanced courses, detailed below, together with a dissertation which is handled as an individual research project throughout the academic year. The course work is supplemented by a second four month period of approved experience within the mining industry.

Applicants with a degree in Mining Engineering will be considered for admission to a twelve month program leading to the same degree.

The courses required in the second year are:

306-602D HUMAN RELATIONS IN THE MINERAL INDUSTRY.

306-604D MANAGEMENT-LABOUR RELATIONS.

306-622D MINING ENVIRONMENTS.

306-623D GROUND CONTROL AND FRAGMENTATION.

306-624D MATERIALS HANDLING IN MINES.

306-625D MINERAL INDUSTRY ECONOMICS.

306-628D DISSERTATION.

REQUIREMENTS FOR THE Ph.D. DEGREE

A candidate for this degree must normally hold an acceptable Master's degree in Metallurgy, Metallurgical Engineering, Mining Engineering, Geophysics, or a related field. The Ph.D. degree will be awarded in the appropriate field.

A candidate must pass courses assigned by the Department. These will be selected on the basis of the student's previous training and research interests.

A candidate will be required to participate in an appropriate Research Seminar course.

Candidates are expected to take a preliminary examination within the first year of their Ph.D. registration.

A candidate must submit an acceptable thesis based upon research successfully completed by the candidate and must satisfy the examiners in an oral examination on the thesis and related topics.

A candidate must also satisfy general faculty regulations relating to Ph.D. degrees.

COURSES FOR HIGHER DEGREES

The courses in this department have been renumbered to conform with the following classification system. The first three numbers (i.e. 306) are the department code. The next digit is the level of instruction. The last two digits are classified as follows:

01 to 29	**general mining courses.**
30 to 39	**geophysics courses.**
40 to 49	**mineral processing courses.**
50 to 59	**extractive and process metallurgy courses.**
60 to 69	**physical metallurgy courses.**
70 to 79	**seminars.**

GRADUATE COURSES OFFERED BY THE DEPARTMENT

306-602D HUMAN RELATIONS IN THE MINERAL INDUSTRY. (80-84 hours.)

(A) **ORGANIZATIONAL HUMAN BEHAVIOUR.** A general study of the interrelationships of human, social, technical and organizational forces which underlie actions and procedures of people in work situations.

(B) **MINING ORGANIZATIONAL PROBLEMS.** Organizational structures: performance assessments; procedures re employee selection, promotion, communication, operational problems; principles of job control and job training; inter-personal relationships.

Mr. Hawkins

***306-604D MANAGEMENT-LABOUR RELATIONS.** (80-84 hours.) History and character of Canadian (and U.S.) labour movements; problems re conduct of labour relations under collective bargaining processes; management-union relationships; public policy; critical national negotiations.

Mr. Hawkins

306-606D MINERAL/METAL PRODUCTION. (80-84 hours.)

***306-608D THE MARKETING OF MINERAL PRODUCTS.** (80-84 hours.)

306-620A ROCK MECHANICS I. (2 hours.) A study of the effects of rock properties and ground stresses on problems of mine design.

Professor Udd

306-621B ROCK MECHANICS II. (2 hours, alternate weeks, 3 hours laboratory.) The application of the principles of strength of materials to the analysis of problems of ground control.

Professor Udd

306-622D MINING ENVIRONMENTS. (80-84 hours.) Hygienic aspects of the mining environment; radiation hazards and control; noise, airborne contaminants and ventilation; design principles for dust control and air conditioning systems; fan theory and application; illumination theory and design; control of noise and vibrations.

Professor Maclachlan

306-623D GROUND CONTROL AND FRAGMENTATION. (80-84 hours.)

Geo-mechanics, soil and rock mechanics applied to mining operations and mine design; theory of models; deformation, flow and behaviour of fragmented geologic materials; the properties and behaviour of compacted hydraulic/pneumatic stope fill and problems associated therewith.
Professor Udd

306-624D MATERIALS HANDLING IN MINES. (80-84 hours.) Critical analysis of solid materials transportation systems; critical analysis of fluid/fluo-solids transporting systems, including mine drainage, ventilation networks, compressed air reticulation, and hydraulic stowage; mathematical models, operational research; analogue and digital computer applications; influence of selected systems upon mine design and layout.
Professor Djamgouz

306-625D MINERAL INDUSTRY ECONOMICS. (80-84 hours.) The course covers a broad range of decision-making problems in the mineral industry, including the mine development decision, economic problems confronting the mining company — corporate planning, exploration strategy, mine finance and mineral market forecasting — and mineral policy problems (such as taxation and regional development).
Professor Mackenzie

306-626D ANALYSIS OF QUANTITATIVE DATA. (80-84 hours.)

306-627D MINERAL INDUSTRY DECISION-MAKING. (80-84 hours.)

306-628D DISSERTATION. (80-84 hours.) A comprehensive study of mineral technology or economics applied to specific minerals industry cases.
Staff

306-630D INTERPRETATIVE METHODS IN APPLIED GEOPHYSICS. Analysis of geophysical data in seismic, magnetic, gravity and electrical prospecting.
Professors Ku and Telford

306-640D ADVANCED MINERAL PROCESSING. (80-84 hours per session.) Modern advances in mineral processing techniques on-stream analysis.
Professor Davenport

306-641D MINERAL DRESSING AND MILL DESIGN. (2 hours.) Physical and chemical treatments for the recovery of valuable minerals in ore. The application of techniques embodying gravity concentration, electrostatic and magnetic separations, and flotation with emphasis on mill design.
Professor Salman

306-642D MINERAL DRESSING. (2 hours.) Mineral separations and recoveries by flotation. Studies of sorption processes and surface reactions.
Professor Salman

306-650D TRANSPORT PHENOMENA IN PROCESS ENGINEERING METALLURGY. (2 hours.) Theoretical studies of selected processes for the smelting and refining of metals. Metallurgical applications of heat, mass and momentum transfer theories.
Professors Davenport and Guthrie

306-651D TOPICS IN CHEMICAL METALLURGY. (2 hours.) Applications of physical chemistry to extractive metallurgy with emphasis on thermodynamics and electrochemistry; recent developments in extractive metallurgical research.
Professor Thompson

306-653A, B TRANSPORT PHENOMENA IN PROCESS METALLURGY. Process metallurgical applications of heat, mass and momentum transport theories. Methods of numerical solution in the analysis of: continuous casting, ingot solidification, soaking pits, hot mill operations, alloy addition methods in steel-making, etc. Students are assigned individual computer projects and present a report plus seminar on their findings.

306-655A, B ADVANCED METALLURGICAL PROCESS ANALYSIS. Metal extraction processes are analysed from the points of view of metals recovery, raw materials usage and energy requirements. Techniques which can be used to minimize energy consumption are examined in detail. Optimization models are developed. Students examine and report on the metallurgical and economic feasibility of recently developed processes.

306-660D APPLIED X-RAYS. (4 hours.) X-Ray diffraction methods and their application to chemical analysis, alloying, grain size determination, preferred orientations, deformation annealing and single crystal studies; fluorescence analysis; introduction to radiography and micro-radiography; electron probe micro-analysis.
Professor Smith

306-661B ADVANCED METALLURGICAL DESIGN. (3 hours.) A discussion and laboratory course, supplemented by detailed written reports, dealing with metallurgical design problems. Special attention will be given to problems in corrosion, weld design, casting, prevention of metal fatigue, heat effects and materials selection.
Professor Williams

306-662A CRYSTAL GROWTH AND SOLIDIFICATION OF METALS. (3 hours.) The kinetics of freezing and the structure of the solid-liquid interface. Methods of single crystal growth; growth imperfections in single crystals. Dendritic freezing in pure materials. Alloy freezing and the redistribution of solute; morphological stability during freezing, Eutectic freezing with particular reference to cast irons.
Professor Gruzleski

306-663A DEFECT STRUCTURE AND MECHANICAL PROPERTIES OF METALS. (3 hours.) Elastic compliances and rigidities; stress and strain deviators; yield criteria; vacancies and diffusion; topology of dislocations and stacking

faults; self-energy of dislocations; dislocation interactions with point, line and surface defects; plastic deformation of single crystals and poly-crystals; work hardening and recovery processes.
Professor Jonas

306-664B THERMAL AND ATHERMAL DEFORMATION PROCESSES. (3 hours.) Empirical approaches to experimental results; elementary rate theory; introduction to activation free energies, enthalpies and entropies; physical significance of activation areas and volumes; experimental determination of activation parameters; rate theory applied to high temperature deformation; periodic internal stress models; rate theory applied to low temperature deformation; athermal deformation processes.
Professor Jonas

306-670D RESEARCH SEMINAR for students registered for a Master's degree in Metallurgy.
Staff

306-672D ROCK MECHANICS AND GEOPHYSICS SEMINAR. Selected topics in Rock Mechanics and Geophysics will be presented by students and staff members.
Staff

306-673D MINING ENGINEERING SEMINAR. For students registered in the Diploma or M.Eng. (Min.) program.
Staff

306-674D EARTH PHYSICS SEMINAR. Students and staff members will present selected and current topics under the following general headings; cosmology; seismology; earth's gravity, magnetic and electric fields; thermal history; tectonophysics; celestial mechanics.
Geophysics Staff

306-675D APPLIED GEOPHYSICS SEMINAR. Case histories in petroleum and mineral exploration; well-logging methods; geophysical methods applied particularly to mining and civil engineering problems. (Course given in collaboration with Ecole Polytechnique.)
Geophysics Staff

306-765D TOPICS IN ADVANCED PHYSICAL METALLURGY. (2 hours.) Topics selected from recent research in physical metallurgy.
Staff

306-766A, B STRENGTHENING AND FRACTURE OF METALS. (3 hours.) Strengthening mechanisms in metals: superalloy and order hardening, solute, precipitate, and dispersion hardening, grain boundary and sub-boundary hardening; theories of lattice friction; discontinuous yielding and dynamic strain aging; grain boundary sliding, dynamic recrystallization and superplasticity; mechanisms of ductile and brittle fracture.
Professor Jonas

306-771D RESEARCH SEMINAR for students registered in a Ph.D. program in Metallurgy.
Staff

306-776D MINING RESEARCH SEMINAR. For students registered in a Ph.D. program.
STAFF

*Not being offered in 1975-76.

UNDERGRADUATE COURSES

The following undergraduate courses are available to graduate students who have not taken an equivalent course.

306-123A MINERAL INDUSTRY ECONOMICS I.
Mr. Boire

306-225A MATHEMATICAL APPLICATIONS IN THE MINERAL INDUSTRY I.
Professors Ku and Mackenzie

306-224B MINERAL INDUSTRY ECONOMICS II.
Professor Beasley, and Messrs. Hawkins and Drolet

306-230A GEOPHYSICAL EXPLORATION.
Professor Jensen

306-321A BEHAVIOUR OF ROCK STRUCTURES.
Professor Udd

306-326B MATHEMATICAL APPLICATIONS IN THE MINERAL INDUSTRY II.
Professor Mackenzie

306-331A ADVANCED EXPLORATION GEOPHYSICS I.
Professor Telford

306-332B MATHEMATICAL APPLICATIONS IN GEOPHYSICS.
Professor Ku

306-422B MINING FEASIBILITY STUDIES.
Professor Djamgouz

306-433B ADVANCED EXPLORATION GEOPHYSICS II.
Professor Telford

306-434B POTENTIAL THEORY IN GEOPHYSICS.
Professor Ku

306-435B ADVANCED EXPLORATION GEOPHYSICS III.
Professor Jensen

306-436B ADVANCED EXPLORATION GEOPHYSICS IV.
Professor Telford

E16 DEPARTMENT OF PHYSICS

STAFF

Professors — J.M. ROBSON *(Chairman)*; R.E.

BELL; A. CONTOGOURIS; G.W. FARNELL; F.T. HEDGCOCK; W.F. HITSCHFELD; C-S LAM; M.P. LANGLEBEN; B. MARGOLIS; S-K MARK; J.S. MARSHALL; W.M. MARTIN; *(Assistant Chairman)*; E.R. POUNDER; R.T. SHARP; D.G. STAIRS; E.J. STANSBURY; D.R. STEVENSON; P.R. WALLACE

Associate Professors — J.R. ADDISON; J.E. CRAWFORD; S. DAS GUPTA; N.B. de TAKACSY; R. HENZI; J.E. KITCHING; J. K-P LEE; J.F. MATHISON; R.B. MOORE; T.F. MORRIS; W.B. MUIR; P.M. PATEL; D.G. RYAN; J.M. TRISCHUK; D. WALSH; M. ZUCKERMANN *(on leave)*

Assistant Professors — G.L. AUSTIN; R. HARRIS; M.M. SHAPIRO; J.O. STROM-OLSEN

Visiting Associate Professor — A.I. McPHERSON

FIELDS OF RESEARCH

HIGH-ENERGY PHYSICS

Theoretical: The interests of the McGill high energy theoreticians range from studies of the properties of elementary particles, considerations of the physics of elementary particle reactions, to quantum field theory and applications of group theory. A special feature of some of the work is the close association with nuclear physics both as an aid to understanding particles and also in the use of high energy reactions to further our knowledge of the properties of nuclei.

Experimental: Members of this group are engaged in counter and spark chamber experiments at the Berkeley, Brookhaven and Batavia proton synchrotons. These experiments are concerned with boson spectroscopy, kaon regeneration, pion and muon nucleon interactions and tests of symmetry violation in elementary particle interactions. Experiments at the 500 GeV N.A.L. accelerator are in progress.

ICE-RESEARCH PROJECT

Interest centres on ice dynamics — response of floating ice to wind, current and tide — and electrical properties of sea ice. Field experiments in the Gulf of St. Lawrence are in progress. Participation is being planned in a large scale, international cooperative experiment in the Arctic Ocean.

NUCLEAR PHYSICS

Theoretical: The structure of light nuclei is currently being studied by a combination of shell model and deformed Hartree-Fock techniques. Coupled-channel formalism is being applied to investigate both inelastic scattering and particle transfer reactions that may proceed by a two-step mechanism.

Experimental (Foster Radiation Laboratory Group): The nuclear physics program at the Foster Radiation Laboratory centres around a 100 MeV proton synchrocyclotron and a data collection system using fixed wire spectrum analysers at various locations in the Laboratory, interfaced to a central computer. There exists, also, a research program centred on a beam line from the van de Graaff tandem accelerator at the Laboratoire de Physique Nucléaire of the Université de Montréal.

Experimental (Neutron physics): The experimental program is aimed at isolating a beam of neutrons whose velocity is only a few metres per second. The source of neutrons is a high flux nuclear reactor at the Chalk River Nuclear Laboratories and the very slow neutrons are isolated by their special properties of total reflection. They will be used for experiments on the fundamental properties of neutrons, including their radioactive decay and their interaction with the gravitational field.

SOLID-STATE PHYSICS

Theoretical: Interest centres on metals and semiconductors in strong magnetic fields, superconductivity and magnetism.

Experimental (Eaton Electronics Laboratory Group): Interest centres on paramagnetic resonance and relaxation, properties of metal, alloys and semiconductors.

Experimental (Magnet Laboratory Group — Longueuil, P.Q.): The laboratory contains a nitrogen liquefaction plant, a 600 HP helium refrigerator and liquefier, a 250 K-Oe hybrid cryogenic-superconducting solenoid and pulsed magnets which can produce fields up to 700 K-Oe. Currently studies are being carried out on the properties of antiferromagnetic solids, high field superconductors, and magnetic properties of metals.

STORMY-WEATHER GROUP

This group uses the McGill Radar Weather Observatory at Ste. Anne de Bellevue which is equipped with a weather radar of outstanding capability. It records stormy weather in all seasons, supplemented in summer by three radio-direction-finding stations for lightning and three wide-angle-camera stations for stereoscopic cloud photography. There is also a program of cloud-temperature measurement by radiometric photography.

INFORMATION' REGULATIONS AND REQUIREMENTS

1. Application for Admission

Inquiries should be addressed to The Chairman, Graduate Admissions Committee, Department of Physics.

2. Financial Assistance

Graduate students in Physics who are not recipients of Fellowships or Scholarships receive financial assistance in the form of a) Research Assistantships, or b) Laboratory

Demonstratorships. The total award at the M.Sc. level is $5000/annum and at the Ph.D. level is $5500/annum.

3. Qualifying Students

(See Section 30b, Graduate Faculty Regulations.)

4. M.Sc. Requirements

a) Research and M.Sc. thesis thereon. b) Physics 198-610B. c) The equivalent of four half-courses to be chosen with the approval of the supervisor of the student's research and the Chairman of the Department, one of which must lie outside the candidate's field of specialization. 198-612A and 198-613B cannot be used to satisfy this latter requirement. Exceptional cases involving equivalent courses taken prior to registration in the Graduate Faculty will be considered on their merits by the Department.

5. Preliminary Examinations for the Ph.D. Degree

Candidates for the Ph.D. degree are required to take Preliminary Examinations.

6. Ph.D. Language Requirements

(See Section 26, Graduate Faculty Regulations.)

7. Ph.D. Course Requirement

An approved course of study for each candidate will be chosen in consultation with the candidate's research director and the Chairman.

8. Ph.D. Thesis

(See Sections 27 and 28, Graduate Faculty Regulations.)

9. Colloquia in Seminars

All graduate students are expected to participate in Department colloquia organized by the McGill Physical Society. Participation is also expected in the specialized seminars of the various research groups.

10. Courses Offered

Some of the following courses may not be offered in 1975-76. It is advisable to consult the office of the Chairman of the Physics Department.

ADVANCED UNDERGRADUATE AND GRADUATE COURSES

198-514B GENERAL RELATIVITY. (3 hours.) Transition from special to general relativity. Non-Euclidian geometry. The basic laws of physics in covariant form. Einstein's equations. Newton's theory of gravitation as an approximation. Propagation of gravitation. Rigorous solutions of the field equations. Cosmology.
Professor Henzi

198-551A QUANTUM THEORY. (3 hours.) General formulation, scattering theory, WKBJ approximation, time-dependent perturbation theory and applications, angular momentum, relativistic wave equations.
Professor Contogouris

198-552D ELECTROMAGNETIC THEORY. (3 hours.) Electrostatics, boundary value problems, magnetostatics. Maxwell's equations. Wave equations, waveguides, radiation, multipoles and vector spherical harmonics.
Professor Crawford

198-557A NUCLEAR PHYSICS. (3 hours.) General nuclear properties, nucleon-nucleon interaction and scattering theory, radioactivity, nuclear models, nuclear reactions.
Professor Robson

198-558A SOLID STATE PHYSICS. (3 hours.) Properties of crystals, lattice vibrations and thermal properties of insulators, free electron model and band structure, semiconductors, metals, optical properties.
Professor Harris; Dr. Cochrane

198-567B PARTICLE PHYSICS. (3 hours.) Basic interactions and symmetries, kinematics, scattering theory, phase space, symmetry and statistics, boson and baryon spectra, experimental techniques.
Professor Stairs

***198-602D BASIC PHYSICS FOR HIGH SCHOOL TEACHERS.** *A full course for M.Ed. students only.* This course covers the basic principles of Classical Physics stressing those actively taught in high schools. The level is such as to stimulate a clear understanding of the implications of these principles in Modern Physics. The physical principles involved in many everyday phenomena will be explored in some depth. Formal topics include mechanics, Thermal Physics, Waves, Optics and Electromagnetism. Prerequisite: CEGEP-level course in Calculus or equivalent and teaching experience in Physics.

***198-603C PHYSICAL MEASUREMENT.** *A full course for M.Ed. students only.* This will be basically a laboratory course interspersed with lectures and seminars. Experimental techniques, instrumentation and data analysis will be stressed in the development and carrying out of experiments specifically oriented towards a High School Program. This will include experiments where the result is unknown to the experimenter. Prerequisite: 198-602D.

***198-604D MODERN PHYSICS.** *A full course for M.Ed. students only.* The aim of this course is to enable the student to understand the concepts leading to modern physics as well as some of the more spectacular recent developments. Topics include Atomic and Nuclear Physics, Solid State Physics, Modern Optics and Astrophysics. Prerequisite: 198-602D.
Professor Mathison

198-610B ADVANCED QUANTUM MECHANICS. (3 hours.) Basic theory of Quantum Mechanics; treatment of special topics: theory of angular momentum, perturbation theory, scattering-theory, many-body problems; the Dirac Theory; quantization of the electromagnetic field.
Professor Margolis

198-612A ADVANCED MATHEMATICAL PHYSICS. (3 hours.) Selected topics from differential equations, Green's functions and integral equations; applications to physics.

198-613B ADVANCED MATHEMATICAL PHYSICS. (3 hours.) Group representation theory with application to physics.

***198-616A CLOUD PHYSICS.** (3 hours.) Introduction to cloud physics.
Professor Marshall

198-617B ICE PHYSICS. (3 hours.) Acoustical, electrical, mechanical and thermal properties of sea ice and fresh-water ice, energy exchange in the atmosphere-ice-ocean system; ice movement.
Professors Pounder and Langleben

198-618B SOLID STATE PHYSICS. (3 hours.) Lattices and their excitations; the theory and properties of normal and superconduction metals, semiconductors and their applications; magnetism.
Professor Ström-Olsen

198-700D PRELIMINARY Ph.D. EXAMINATION.

198-710D QUANTUM FIELD THEORY. (3 hours.) The content of the course includes discussions on relativistic single particle wave functions, quantized fields and their symmetry properties, perturbation theory and applications, as well as the use of analytic properties of relativistic quantum fields.
Professor Lam

***198-712D MANY-BODY PROBLEMS.** (3 hours.) Modern topics in many-body problems, including field-theoretical methods; applications to electron-electron and electron-phonon interactions in solids; plasmons; special topics in magnetism, superconductivity and superfluidity.

***198-714D EXPERIMENTAL SOLID STATE PHYSICS.** (3 hours.) Topics, reflecting the interests of the students and the faculty involved, will be selected from the following experimental research areas: experimental low temperature solid state physics techniques; magnetism; electron transport phenomena; fermiology, propagation of electromagnetic waves in solids including resonance effects; semiconductors; superconductivity; electronic structure of alloys; properties of insulators.
Professors Hedgcock and Walsh

198-716D THEORETICAL SOLID STATE PHYSICS. (2 hours.) Second quantization; Wick's theorem; Thermodynamic Green's functions; Feynman diagrams. Superconductivity: experimental introduction; phenomenological theories, Landau-Grinsburg theory; pure superconductors and superconducting alloys; Magnetism: Hubbard's model for narrow band transition metals, ferromagnetism and antiferromagnetism in itinerant electron systems; Fedder-Martin model for Chromium; Green's function formulation of response theory; application to theory of spin waves in magnetic metals.
Professor Wallace

***198-718A SPECIAL TOPICS IN SOLID STATE PHYSICS.** (3 hours.) Specialized discussion of current problems in solid state physics.
Professor Walsh

198-720D EXPERIMENTAL NUCLEAR PHYSICS. (3 hours.) The course covers the fundamentals of experimentation in nuclear physics; properties of nuclear states; nuclear reactions; electromagnetic and beta decays; and the application of current theories to experimental results.
Professor Mark

198-723A THEORETICAL NUCLEAR PHYSICS (I) (3 hours.) Scattering Theory, Reaction Theory.
Professor Das Gupta

198-724B THEORETICAL NUCLEAR PHYSICS (II) (3 hours.) Nuclear Structure, beta-decay, gamma-radiation.
Professor de Takacsy

***198-726D EXPERIMENTAL HIGH ENERGY PHYSICS.** (3 hours.) High energy linear and circular accelerators — detailed design considerations in the NAL 500 GeV proton accelerator, the SLAC 20 GeV electron linear accelerator and CERN Intersecting Storage Rings, future prospects; beam design; high energy detectors — scintillation counters; spark chambers, bubble chambers and new proposals; kinematics; particle classification; spin and partly determination; discrete symmetries; internal symmetries; high energy two-body reactions; multiparticle production; Quark model.

***198-728D THEORETICAL HIGH ENERGY PHYSICS.** (3 hours.) Theory and phenomenology of strong, electromagnetic and weak interactions; particle classification schemes, high energy reactions, including Regge theory and dispersion relations; electromagnetic form factors and weak interaction decay phenomena.

198-730A SPECIAL TOPICS IN HIGH ENERGY PHYSICS (I). (3 hours.) Specialized discussion of some current problems in theoretical particle physics.
Professor Margolis

198-731B SPECIAL TOPICS IN HIGH ENERGY PHYSICS (II). (3 hours.) Specialized discussion of some current problems in particle physics.
Professor Stairs

***198-740D ADVANCED ASTROPHYSICS.** (3 hours.) A survey of modern theories including stellar atmospheres, energy sources, stellar structure and evolution; magnetohydrodynamics.

198-799D SEMINARS. Each of the research groups in High Energy Physics, Ice Physics, Nuclear Physics, Solid State Physics and Stormy Weather Physics organises research seminars to be presented by students, staff and visitors. Ph.D. candidates are required to attend and participate in the seminars organized in their field of specialisation.

E17 URBAN PLANNING PROGRAM

The objective of the Urban Planning Program is to produce qualified professional urban planners, for both the public and private sectors. Students are expected on completion of the program to have acquired basic planning skills, a broad view of urban studies and a field of specialization. To achieve these objectives the teaching and research activities within the program are organized within the context of the broader urban studies and research effort at McGill.

STAFF

Associate Professor – DAVID FARLEY *(Director)*
Associate Professor – BRYAN H. MASSAM
Assistant Professor – JEANNE M. WOLFE
Visiting Professor – BLANCH LEMCO VAN GINKEL
Part-time Lecturers – MORRIS CHARNEY; JANE M. GLENN; LLOYD SANKEY

REQUIREMENTS FOR THE M.U.P. DEGREE

The M.U.P. degree is open to students holding a bachelor's degree or equivalent in Anthropology, Architecture, Economics, Civil Engineering, Geography, Law, Management, Political Science, Social Work, or Sociology, with adequate knowledge of quantitative techniques.

The program in Urban Planning requires a *minimum* of two years, including a basic core of required studies and a selection of courses from a group of recommended electives. It emphasizes sponsored research to be carried out by staff and students and the development of a particular area of expertise for each student based on his background.

A three month internship with a member of a recognized planning association is required.

N.B. Deadline for applications is March 15.

COURSES

Group A – Core Knowledge (All required/no substitution)

409-610A MAN AND HIS ENVIRONMENT I

409-611B MAN AND HIS ENVIRONMENT II

409-612B THEORY OF PLANNING

409-613A/B APPLIED QUANTITATIVE TECHNIQUES

409-603D PLANNING PROJECTS I

409-604A PLANNING PROJECTS II

409-606B SUPERVISED RESEARCH SEMINAR

409-602D SUPERVISED RESEARCH PROJECT

Internship (Minimum three months).

In addition to courses in Group A, students are required to complete seven half courses, a minimum of four from Group B (highly recommended electives).

Group B – Development and Refinement (A minimum of 4 half courses required).

301-205A HISTORY OF HOUSING

301-621B HOUSING THEORY

483-145B LAW (PROPERTY IVA – LAND USE PLANNING)

303-640A TRANSPORTATION ENGINEERING I (URBAN TRANSPORTATION PLANNING)

303-641B TRANSPORTATION ENGINEERING II (TRANSPORTATION SYSTEMS ANALYSIS)

409-607D READING COURSE – URBAN PLANNING

301-232A STRUCTURE OF CITIES

154-468A URBAN AND REGIONAL ECONOMICS

301-431A CIVIC DESIGN

407-637A HOUSING POLICY

407-625A COMMUNITY ORGANIZATION

151-321B URBAN ANTHROPOLOGY

166-222B URBAN SOCIOLOGY

183-412B ADVANCED URBAN GEOGRAPHY

154-425D ECONOMICS OF ECOLOGY

Group C – Specialization (A minimum of three half courses required. May include courses selected from Group B.)

Macdonald College

Faculty of Graduate Studies and Research 1975-76

Section "F"

Social Sciences Allied Sciences

Note: Courses marked with an asterisk (*) are not offered in 1975-76. The letters, which form part of course numbers, have the following significance:

A — Fall term course
B — Winter term course
C — Summer term course
D — Full session course (Fall and Winter terms)

F1 DEPARTMENT OF ANTHROPOLOGY

STAFF

Professors — PETER C.W. GUTKIND *(on leave 1975-76)*; RICHARD F. SALISBURY; BRUCE G. TRIGGER

Associate Professors — DAN R. ARONSON; FUMIKO IKAWA-SMITH *(Chairman)*; PHILIP C. SALZMAN *(on leave 1975-76)*

Assistant Professors — BERNARD ARCAND; GEORGE GMELCH; CARMEN LAMBERT; JEROME ROUSSEAU; PETER SINDELL *(on leave 1975-76)*

PROGRAMS

The department offers training leading to the degrees of Master of Arts and Doctor of Philosophy in Anthropology. Admission is normally to the M.A. program, except in cases in which a student already has an M.A. in Anthropology or an allied discipline. It is expected, however, that most applicants will be oriented towards achievement of the Ph.D.

The graduate program is designed to encourage productive scholarship and intellectual growth while training professional anthropologists at the same time. The early part of a candidate's graduate career is designed to encourage the exploration of new areas and to develop competences within a range of the total spectrum of the discipline. The latter part emphasizes the development of specialist research skills. The degree requirements are, therefore, aimed at giving maximum freedom to individual directions within anthropology while also stimulating early choice-making, quick progress, and immediate and full evaluation. In this light the duration of the M.A. or Ph.D. program is flexible, and will take into account especially the differential backgrounds with which candidates start. As a general guide, however, it is assumed that most of the requirements for the M.A., except the thesis, will be completed within a year of entry, and that the candidate will start Ph.D. field work within two to three years of the beginning of his M.A. program.

Towards maximizing freedom and accomplishment, the student-adviser relationship is crucial. After an orientation program in the early fall the beginning graduate student will choose an adviser with whom he will work out at least the broad outlines and general timetable for the completion of his requirements. The major part of his M.A. work will be done in tutorials with individual members of staff. Evaluation by the department will be made as each tutorial is completed, and there is no comprehensive examination.

Prospective students should write for full descriptive materials and applications *directly to the Graduate Secretary of the Department.*

Students must submit with their applications the results of the Aptitude Tests of the Graduate Record Examination, arrangements to take which should be made directly with the Educational Testing Service, Box 955, Princeton, New Jersey 08540, U.S.A. In addition to the normal application a statement concerning the student's plans, aims, and interests within anthropology is required.

A number of teaching assistantships are available to graduate students in the Department. Students who wish to be considered for such assistantships should inform the Graduate Adviser of the Department. Scholarships are also available from the University, and are applied for directly to the Fellowship Office of the Faculty of Graduate Studies and Research. Students should also apply for Canada Council and other outside fellowships whenever possible.

Applications for graduate admission must reach the Department not later than 1 March if applicants wish to be considered for September admission, although in exceptional cases later applications might be considered. Applicants can expect to hear the outcome of their application by about 1 April.

REQUIREMENTS

REQUIREMENTS FOR THE M.A. DEGREE

Demonstration of competence in five topics of anthropology: e.g. political anthropology, economic anthropology, archaelogy, methodology, etc. is required. Information available from the Department defines and specifies the competences to be gained.

The presentation and defence of a thesis proposal and the completion of a short thesis demonstrating the ability to, and the experience of, having carried an anthropological research project through all its stages — planning on the theoretical, methodological and ethnographic level, gathering data, and writing up of results.

REQUIREMENTS FOR THE Ph.D. DEGREE

Completion of all requirements for the M.A. degree. If a student holds an M.A. from a university other than McGill, he may be asked to make up any deficiencies in his prior training before continuing on to the remaining requirements.

The candidate must (1) demonstrate competence in the foreign language most relevant to his research plans. He should do this before taking his preliminary examination; (2) pass a preliminary oral examination, which will cover three fields of the discipline related to the student's research topic. One field will be a detailed understanding of the ethnology of, and research possibilities in, one of the major culture

areas of the world. The other two special fields will be topics for which departmental supervision is available. The examination will emphasis the relation of the three fields to the field research that the candidate proposes; (3) orally present a fieldwork proposal, often, but not necessarily, conjointly with the preliminary examination; (4) carry out fieldwork and present and orally defend a completed thesis.

COURSES FOR HIGHER DEGREES

N.B. Courses at the 400-level are primarily oriented towards third-year undergraduates. Not all the seminars at the 600- and 700-levels are given in any one year.

151-402B SEMINAR ON CONTEMPORARY ANTHROPOLOGICAL THEORY.
Professor Salisbury

151-403B CURRENT PROBLEMS IN ARCHAEOLOGICAL THEORY.
Professor Ikawa-Smith

151-404B TOPICS IN PSYCHOLOGICAL ANTHROPOLOGY.
Staff

151-413B DECIPHERMENT OF ANCIENT SCRIPTS.
Professor Trigger

151-415A PROBLEMS IN AFRICAN ANTHROPOLOGY.
Professor Aronson

151-420B THE USE OF MATHEMATICS IN ANTHROPOLOGY.
Professor Rousseau

151-421A TOPICS IN URBAN ANTHROPOLOGY.
Staff

151-422A HISTORY, IDEOLOGY AND THEORY IN SOCIAL CHANGE AND MODERNIZATION OF NON-WESTERN SOCIETIES.
Professor Gutkind

151-680A M.A. TUTORIAL READING.
Staff

151-681B M.A. TUTORIAL READING.
Staff

151-682A M.A. TUTORIAL READING.
Staff

151-683B M.A. TUTORIAL READING.
Staff

151-684D M.A. TUTORIAL READING.
Staff

151-700D Ph.D. PRELIMINARY EXAMINATION.

151-702A SEMINAR: ETHNOHISTORY METHOD.
Professor Trigger

151-710B SEMINAR: RELIGION.
Professor Rousseau

151-716A SEMINAR: TOPICS IN THE ANTHROPOLOGY OF COMPLEX SOCIETIES.
Staff

151-720B SEMINAR: POLITICAL ANTHROPOLOGY.
Staff

151-723B SEMINAR: CONTEMPORARY SOCIAL INSTITUTIONS IN AFRICA.

151-724B SEMINAR: CONTEMPORARY SOCIAL INSTITUTIONS OF THE CARIBBEAN.*

151-725B SEMINAR: NORTHERN RESEARCH.
Staff

152-726B SEMINAR: MIDDLE EASTERN ANTHROPOLOGY.
Staff

151-730D ANTHROPOLOGY WORKSHOP.
Staff

151-755A SEMINAR: RESEARCH METHODS.

151-770B SEMINAR: THEORETICAL PROBLEMS AND CONCEPTS IN THE STRUCTURE OF CULTURE.
Professor Arcand

151-775A SEMINAR: ANTHROPOLOGY OF DEVELOPMENT.
Professor Salisbury

151-780A READING AND RESEARCH.
Staff

151-781B READING AND RESEARCH.

151-782A SEMINAR: URBANISM.
Professor Aronson

151-783B SEMINAR: MIGRATION.
Professor Aronson

F2 CENTRE FOR DEVELOPING AREA STUDIES

Director — PROFESSOR R. SALISBURY

The main function of the Centre is to encourage and coordinate interest in developing-area studies in the social sciences and to draw attention to the necessary links with the applied sciences both at McGill and in cooperation with other institutions through the agency of an Advisory Board and a small Executive Committee. To further this end, the Centre offers weekly informal workshops directed chiefly to McGill graduate students and organizes public lectures by visiting speakers.

COURSES AND SEMINARS

The list given below is provided for reference

purposes only and represents all the courses offered by the University which could be of immediate interest to students of "development".

*ANTHROPOLY 151-423A IDEOLOGY AND CONCEPTS IN SOCIAL ANTHROPOLOGY.
Professor Gutkind

*ANTHROPOLOGY 151-450B THIRD WORLD PEASANTRIES: THE CHANGE FROM RURALITY OF URBAN PROLETARIANS.
Professor Gutkind

ANTHROPOLOGY 151-716A SEMINAR: Topics in the anthropology of complex societies.
Staff

ANTHROPOLOGY 151-723B SEMINAR: CONTEMPORARY SOCIAL INSTITUTIONS IN AFRICA.

ANTHROPOLOGY 151-724B SEMINAR: CONTEMPORARY SOCIAL INSTITUTIONS OF THE CARIBBEAN.

ANTHROPOLOGY 151-775A SEMINAR: ANTHROPOLOGY OF DEVELOPMENT.
Professor Salisbury

ECONOMICS 154-736B TECHNIQUES OF DEVELOPMENT PLANNING. A study of long-term planning to bring about structural changes in the economy and raise growth and employment rates. Emphasis is on underdeveloped countries and underdeveloped regions.

ECONOMICS 154-742B ECONOMIC AND POLITICAL DEVELOPMENT. This course will discuss the continuing Canadian problems of unemployment, inflation and foreign ownership, the Harrod question. Are monetary and fiscal policies enough? the necessary integration of all elements of economic policy including trade, exchange rate, competition, resource and growth objectives.
Professor Kierans

ECONOMICS 154-782B* AGRICULTURAL POLICY. The nature and objectives of policy; use of economic analysis as a guide to formation and appraisal of agricultural policy; fallacies; the time dimension; reconciliation of conflicts; problems confronting agriculture – instability, inter-industry and interregional inequality, poverty and inefficiency; policies for achieving greater economic welfare and progress.

GEOGRAPHY 183-605B ECONOMIC GEOGRAPHY PART II.

GEOGRAPHY 183-609B* HUMAN GEOGRAPHY: SOCIAL AND BEHAVIOURAL PROBLEMS.

GEOGRAPHY 183-622B HUMID TROPICAL ENVIRONMENTS.

POLITICAL SCIENCE 160-647A POLITICAL DEVELOPMENT IN THE NEW NATIONS.

POLITICAL SCIENCE 160-747B POLITICS OF DEVELOPING AREAS.

POLITICAL SCIENCE 160-748B* SOUTH ASIAN POLITICS.

Seminars in the field of "development" are also offered on request by the Brace Research Institute and the Faculty of Engineering:

AGRICULTURAL ENGINEERING 336-602A ENVIRONMENT CONTROL IN AGRICULTURAL STRUCTURE. A study of the environmental effects of housing on plants and animals. The production, maintenance and control of the environment. The effects of the interior environment on structured components.
Professor Ogilvie

AGRICULTURAL ENGINEERING 336-609A HYDROLOGY. A fundamental course in hydrology. Topics covered include the inter-relationships between precipitation, interception, infiltration, evapotranspiration, and surface run-off; analysis of precipitation and streamflow data, use of hydrograph; hydraulics of groundwater; use and replenishment of groundwater; evaporation and transpiration; irrigation water requirements.
Professor Broughton

NOTE: Further information about the Centre's plans and activities may be obtained by writing to the Director.

F3 DEPARTMENT OF ECONOMICS

STAFF

Professors – A. ASIMAKOPULOS *(Chairman)*; E.F. BEACH *(on leave 1975-76)*; I. BRECHER; E. KIERANS; J.C. WELDON; H.R.C. WRIGHT

Associate Professors – A. DEUTSCH; A.H. FENICHEL; M. FRANKMAN; J.A. GALBRAITH; C. GREEN *(on leave 1975-76)*; J. HANDA; S.H. INGERMAN; J. ITON; D.J. KHAZZOOM; J. KURIEN; K. LEVITT; M.A. LOUTFI; M.F. LOUTFI; L.A. SODERSTROM; T. VELK; A. VICAS

Assistant Professors – P. DAVENPORT; G. GRANTHAM; F. MARTIN; R. NAYLOR

This announcement is prepared early in the calendar year, and so is likely to need modification by the time the academic year begins. A mimeographed supplement is available at the Department Office, and should be consulted. Changed are not likely to be numerous, but in some instances may be important to a sensible choice or program.

REQUIREMENTS

ADMISSION

Students holding a B.A. degree may be eligible for admission. Preparation equivalent to a McGill Honours Program in Economics is the normal requirement. Students who have deficiencies in their preparation but are otherwise judged to be qualified are admitted to a qualifying year, in which they undertake advanced undergraduate work.

Lectures and examinations in the graduate program in Economics are organized around 11 broad fields: (1) Agricultural Economics; (2) Econometrics; (3) Economic Development; (4) Economic History; (5) Economic Theory; (6) Industrial Organization; (7) International Trade; (8) Labour Economics; (9) Mathematical Economics; (10) Money and Banking; (11) Public Finance.

Courses at the 600 level will be offered in most of these fields in each session, and when such a course cannot be offered in a particular field a reading course, with tutorial assistance, will be made available. Students who have not previously passed a suitable course in Statistics must take the undergraduate honours statistics course. Economics 154-357D. A two-semester course in the history of economic thought is also a prerequisite for a graduate degree in economics, and students who have not taken such a course will be required to take Economics 154-350D. Courses at the 700 level (seminars) are offered in most of the 11 fields listed above. They are generally given in the second term and have as a prerequisite the corresponding 600 level courses.

REQUIREMENTS FOR THE M.A. DEGREE

The Master's degree in Economics is obtained after successful completion of the Graduate General Examination, course and seminar requirements, and a thesis. The minimum passing grade for graduate courses and examinations is 65 percent. A well prepared student should not require more than 12 calendar months to complete the degree requirements.

1. The Graduate General Examination consists of two comprehensive examinations. Each M.A. student must write two papers:

i) a five hour comprehensive examination in economic theory (micro and macro) and

ii) a three hour comprehensive examination in another field chosen by the student from the 11 listed above (excluding Mathematical Economics).

The courses in Economic Theory, 154-611D and 154-621D, help prepare the student for the comprehensive examination in theory, and the appropriately named 600 level course provides assistance in preparing for the other field examination; but it is the responsibility of the student to ensure that he is adequately prepared for the whole of his fields.

2. The student must obtain at least 65 percent in an approved 600 level one-term course in a field other than economic theory or his comprehensive field. This course may be in another discipline.

3. Successfully complete the requirements of one 700 level course (seminar).

4. Complete a Master's thesis, the subject of which must be approved by the Research Committee. The paper written for one of the student's seminars (700 level courses) often forms the basis of his thesis.

REQUIREMENTS FOR THE Ph.D. DEGREE

The requirements for the doctoral degree are:

(1) Successful completion of the Graduate General Written examination in economic theory and in two other special fields, (2) three 700 level seminars, (3) successful completion of the Quantitative Methods course (665A) unless Econometrics is one of the student's fields, (4) a language requirement, (5) successful completion of the Ph.D. Oral Comprehensive examination (normally in the same fields as in (1), (6) a dissertation, (7) three years of residence.

McGill students must normally receive a minimum grade of 70% in the Graduate General Examination to be considered for the doctoral program. Students who obtain an average of at least 75% in this examination and in their course and seminar requirements may be permitted to proceed directly to the Ph.D. programme without completing a Master's thesis.

Candidates from other universities will be considered for admission to the doctoral program if they possess an M.A. degree and have a good academic record. They will be required to take the Graduate General Examination at the same time as the M.A. students before they can proceed to their Ph.D. Oral Comprehensive Examination. At the first examination period they must write the economic theory paper and one of the special field examinations, but they can postpone the second special field examination until the second examination period. Students whose performance, as judged by their results in the Graduate General Examination and their seminars, is considered to be inadequate for Ph.D. work, may be asked to withdraw from the Ph.D. program.

In the first year of the Ph.D. program the student is strongly advised to take the two economic theory courses 154-611D and 154-621D and the seminars 154-720A, Microeconomics and 154-722B, Macroeconomics which are usually given in the second term. These are designed to cover the economic theory requirements for the Ph.D. students. Three seminars will be required (one of which might have been taken as part of the M.A. program at McGill). The passing grade in each course or seminar is 65%. In addition, students must take 154-665A (Quantitative Methods in Economics).

The student must pass examinations in translating into English from an unseen text in two approved modern languages, or an examination in

translating one language at an advanced level.

The student may, if he chooses, satisfy the language requirement by passing an examination involving the translation of an unseen text in English into French, at an advanced level.

If the candidate's mother tongue is not English, the Graduate Faculty may, if the Department so recommends, exempt that student from one of the two required language tests. An examination in mathematics may be substituted for one of the language requirements.

The student must pass an Oral Comprehensive Examination (154-799D) in three fields. One of these must be Economic Theory (including History of Economic Thought) while the remaining two are to be chosen from among the fields listed earlier (excluding Mathematical Economics). Before taking this examination the student must have passed comprehensive examinations in economic theory and *two* special fields. At the Ph.D. level, a student is designated either a Pass or a Failure. A student who fails the Oral Comprehensive Examination may resit that examination after a minimum of three months has elapsed, and will be re-examined in all three fields.

The student must write a doctoral dissertation which makes an original contribution to the literature. The topic must be approved by the Research Committee and the dissertation will be supervised by a three-man committee, whose Chairman is the student's Director of Research. It must be passed by an external examiner as well as his/her committee.

COURSES FOR HIGHER DEGREES

154-601D M.A. GRADUATE GENERAL WRITTEN EXAMINATION.

154-602A ECONOMIC HISTORY. Selected topics in European and North-American economic history are investigated from the standpoint of the interplay of institutional change and quantitative growth.
Professor Naylor

154-611D MICROECONOMICS. A systematic course in the elements of microeconomic theory deemed essential for the Graduate General Examination.
Professors Weldon and Kurien

154-621D MACROECONOMICS. A systematic course in the elements of macroeconomic theory deemed essential for the Graduate General Examination.
Professors Davenport and Ingerman

154-622A PUBLIC FINANCE. An analysis of the public revenue and expenditure structure and its effects on resource uses and income distribution. Analysis of the effects of fiscal policy upon the level of employment, prices, and the rate of economic growth.
Professor Kierans

154-623A MONEY AND BANKING. An examination of the effects of money, near monies and financial institutions upon the structure and operations of an economic system.
Professor Handa

154-624A INTERNATIONAL ECONOMICS. A detailed examination of theories and policies in international trade and finance.
Professor Vicas

154-631A HISTORICAL EXPERIENCE OF ECONOMIC DEVELOPMENT. Examination of historical patterns of development in relation to currently less developed countries.

154-633D MATHEMATICS FOR ECONOMICSTS. (Non-credit.) An introduction to the techniques of calculus and linear algebra frequently encountered in economic theory and econometrics.
Professors Handa and Khazzoom

154-634A ECONOMIC DEVELOPMENT. A systematic treatment of the characteristics and problems of economic development in underdeveloped countries.
Professor Brecher

154-641A LABOUR ECONOMICS. A synthesis of theoretical developments in the area of labour economics with stress upon problems of empirical testing.
Professor Soderstrom

***154-650A SELECTED TOPICS IN HISTORY OF ECONOMIC THOUGHT.**

154-662A INTRODUCTION TO ECONOMETRICS.
Professor Khazzoom

154-664B ECONOMETRICS. A discussion of Economic Methods of handling errors in variables, autoregression, multicolliniarity, heteroscedasticity, lagged variables, dummy variables, and the handling of simultaneous equations.
Professor Khazzoom

154-665A QUANTITATIVE METHODS. A survey of quantitative methods frequently used in economic research. Special emphasis will be placed upon the formulation and evaluation of econometric models. Illustrations will be drawn from the existing empirical literature in economics. Required for all Ph.D. students who have not taken Econometrics as a field.
Professor Soderstrom

***154-667A-668B MATHEMATICAL ECONOMICS.** A mathematical treatment of basic economic theory.

154-701D Ph.D. GRADUATE GENERAL WRITTEN EXAMINATION.

154-702B ECONOMIC HISTORY. A study of the historical background to economic growth and change in one country during a limited period of modern history. Other countries and other periods

will be taken into account for purposes of comparison.
Staff

154-711B THEORY OF THE FIRM. A specialized study of the theory of the process of the firm.

154-712B PUBLIC FINANCE. Selected topics in public finance.
Professor Kierans

***154-713B WELFARE ECONOMICS.** This course is intended for graduate students who have had a course in advanced theory and who, in particular, are well acquainted with modern demand theory. It is intended as a supplement to descriptive and analytical economics.

154-720A MICROECONOMICS. Topics in microeconomics. This course is normally a prerequisite for the general oral examination for the Ph.D. degree in economics.
Professor Weldon

154-721B ADVANCED MONETARY THEORY. This seminar will examine selected topics in monetary theory, the theory of monetary policy, and the history of monetary institutions. It is suggested that students read *Stabilization Policies*, The Commission on Money and Credit, Prentice Hall, 1963; *Readings in Money National Income and Stabilization Policy* by Smith and Teigen, published by Irwin, pp. 1-118, and Chapter 13 of Friedman and Swartz's *Monetary History* in order to get a feeling for the course material. Seminar participants will be asked to prepare at least one paper.
Professor Handa

154-722B MACROECONOMICS. A systematic examination of selected topics in Macroeconomics. This course is normally required as a prerequisite for the general oral examination for the Ph.D. in economics.
Professor Asimakopulos

154-724B INTERNATIONAL ECONOMICS. Selected problems in international trade, foreign exchange and international movements of capital.
Professors Frankman and Vicas

154-725B COST BENEFIT ANALYSIS. A detailed discussion of the development and scope of the subject. Particular applications of cost-benefit techniques examining the uses made of them in the fields of water-resource development, transport, land usage, health, education and other areas of public enterprise operation.
Professor Iton

***154-731B CANADA–UNITED STATES ECONOMIC RELATIONS.** A study of key issues affecting economic relations between Canada and the United States. Among the topics analyzed will be foreign investment, the balance of payments, business fluctuations and commercial and agricultural policies.

***154-732B TRANSPORTATION.** A study of the economics of transportation; its relation to the general body of economic theory; government regulation with emphasis on factors that fashion it.

154-734B ECONOMIC DEVELOPMENT. Problems of economic growth and planning in selected underdeveloped countries. This seminar is also listed in the Centre for Developing Area Studies.
Professor Levitt

***154-735D GOVERNMENT REGULATION OF BUSINESS.** Economic and legal problems in government promotion and maintenance of competitive industry. Major attention will be devoted to Canada, with comparisons to be drawn from United States and European experience. This seminar is given jointly by the Faculty of Law and the Department of Economics.
Professors Jones and Vicas

***154-736B TECHNIQUES OF DEVELOPMENT PLANNING.** A study of long-term planning to bring about structural changes in the economy and raise growth and employment rates. Emphasis is on underdeveloped countries and underdeveloped regions.

154-741B ADVANCED LABOUR ECONOMICS. A combined lecture and research seminar covering selected theoretical and policy issues in labour economics.
Professor Ingerman

154-742B ECONOMIC AND POLITICAL DEVELOPMENT. This course will discuss the continuing Canadian problems of unemployment, inflation and foreign ownership, the Harrod question, Are monetary and fiscal policies enough?, the necessary integration of all elements of economic policy including trade, exchange rate, competition, resource and growth objectives.
Professor Kierans

154-744B HEALTH ECONOMICS. The emphasis in this seminar will be on describing and analyzing the structure and performance of the Canadian health system, though some attention will be given to recent attempts by the federal and provincial governments to deal with current problems in this field. Readings will be selected from the economics and health literature.
Professor Soderstrom

160-745B MACHINERY OF GOVERNMENT. This seminar will consist of a detailed examination of a problem in Canadian government and administration. Problems will include topics dealing with cabinet government, parliamentary organization, federalism, public administration and the impact of political forces on them.
Professors Kierans, Mallory and Weldon

***154-750A SELECTED TOPICS IN ECONOMICS.** This seminar will deal with topics of interest to the students and staff who are organizing the seminar. These topics will be in areas other than those covered by existing seminars

and particular attention will be paid to critiques of neoclassical economic theory.
Students and Staff

***154-761A INPUT-OUTPUT ANALYSIS, LINEAR PROGRAMMING AND MULTISECTORAL ECONOMIC MODELS.** National Economic Accounting, including Input-Output, and Flow of Funds accounts. Analytical uses relating to the impact of public and other expenditures on income, imports, savings, employment, etc.
Professor Levitt

154-762D ECONOMETRICS. Econometric theory and application.
Professor Khazzoom

***154-767B APPLIED QUANTITATIVE ECONOMICS.** Co-ordinated quantitative research projects under the guidance of the instructor to increase facility in quantitative research.

***154-781A AGRICULTURAL ECONOMICS.** The nature of agricultural production; the economics of size in agriculture; intensity of production; the pricing mechanism for farm products; agriculture in world commerce, FAO, ITO; the role of agriculture in the Canadian economy; economic problems confronting the Canadian farm industry.

***154-782B AGRICULTURAL POLICY.** The nature and objectives of policy; use of economic analysis as a guide to formation and appraisal of agricultural policy; fallacies; the time dimension; reconciliation of conflicts; problems confronting agriculture — instability, inter-industry and interregional inequality, poverty and inefficiency; policies for achieving greater economic welfare and progress.

154-799D Ph.D. ORAL COMPREHENSIVE EXAMINATION.

NON-CREDIT AND QUALIFYING-YEAR COURSES IN ECONOMICS

154-241D THE INTERNATIONAL ECONOMY SINCE 1850.
Professor Wright

154-250D INTRODUCTION TO ECONOMIC THEORY.
Professor Asimakopulos

154-301A MODERN ECONOMIC HISTORY OF SOUTH ASIA.
Professor Iton

154-311D NORTH AMERICAN ECONOMIC DEVELOPMENT.
Professors Davenport, Fenichel and Naylor

154-350D HISTORY OF ECONOMIC THOUGHT.
Professors Vicas and Brecher

154-352D MACROECONOMICS.
Professor Handa

154-357D ECONOMIC STATISTICS.

154-404D TRANSPORTATION.
Mr. Romoff

154-408D PUBLIC FINANCE.
Professor Deutsch

154-411A THE QUEBEC ECONOMY.
Professor Davenport

154-426D LABOUR ECONOMICS.
Professor Soderstrom

154-450D ADVANCED ECONOMIC THEORY.
Professors Asimakopulos and Weldon

154-451B SEMINAR IN ECONOMIC HISTORY.
Professor Grantham

154-453D INTERNATIONAL ECONOMICS.
Professor Brecher

154-458D MONEY AND BANKING.
Professor Velk

F4 FRENCH CANADA STUDIES PROGRAM CENTRE D'ETUDES CANADIENNES FRANCAISE

STAFF

Director — Professor MAX DORSINVILLE

PROGRAM

In 1963-64 McGill University established a French Canada Studies Program. Much of the energies and resources of the Program are devoted to research and teaching with a view to making McGill a centre of advanced study and original research in this area.

Graduate students may register with the French Canada Studies Program should their main field of study be French Canada. They should apply directly to the French Canada Studies Program which will then contact the relevant department in order to ascertain if the department is prepared to receive the applicant as a degree candidate and to appoint a co-director of research. The Director of the French Canada Studies Program, or his representative, and the departmental appointee will then act jointly and watch over the interests of the applicant.

Graduate students taking courses dealing in whole or in part with French Canada, or who are studying French Canada as their special field of study, are cordially invited to make use of the reference, documentation and bibliographical facilities of the French Canada Studies Program.

En 1963, un Centre d'Etudes canadiennes-françaises fut créé à l'Université McGill. En collaboration avec les autres Départements de l'Université, le but de ce Centre est d'assurer un enseignement et de développer la recherche à un niveau supérieur, sur divers aspects du Canada français.

Les étudiants qui désirent poursuivre des études en vue de l'obtention d'une maîtrise ou d'un doctorat en études canadiennes-françaises doivent agir de la manière suivante: L'étudiant gradué fait sa demande d'admission directement au Centre d'Etudes canadiennes-françaises. Celui-ci s'assure auprès du Département concerné que le candidat est suffisamment qualifié et l'accepte au niveau de la maîtrise ou du doctorat, suivant le cas. Le Directeur du Centre d'Etudes canadiennes-françaises, ou son délégué, et un représentant du Département dirigent conjointement les travaux de l'étudiant.

Les étudiants dont les cours portent, en tout ou en partie, sur le Canada français, ou qui se spécialisent dans ce domaine sont invités à se prévaloir du service de référence, de documentation et de bibliographie du Centre d'Etudes canadiennes-françaises.

COURSE

***157-626A PROBLEMES POLITIQUES DU QUEBEC.** Quels sont les principaux modèles qui ont été proposés pour expliquer l'évolution de la société québécoise: le modèle historique, le modèle sociologique, le modèle marxiste? Quelles sont les principales querelles scientifiques ayant cours dans les interprétations historiques et contemporaines de la société québécoise: l'importance de la conquête, l'impact des structures mentales sur le retard économique du Québec, le rôle du clergé, le Révolution tranquille, la lutte pour l'indépendance politique.
Professeur Daniel Latouche

157-627B ETUDES EMPIRIQUES DE LA SOCIETE QUEBECOISE. Ce séminaire est réservé aux étudiants qui sont intéressés à mener à bien ou à participer à des études empiriques sur certains aspects de la réalité québécoise. Parmi les thèmes suggérés, mentionnons le fédéralisme canadien, le mouvement indépendiste québécois, les relations inter-ethniques au Canada, les mouvements de gauche au Québec. Le but du séminaire est de permettre à l'étudiant d'appliquer concrètement les instruments d'analyse qu'il possède.

F5 DEPARTMENT OF GEOGRAPHY

STAFF

Professors — J.B. BIRD; B.J. GARNIER *(Chairman)*; T.L. HILLS; T. LLOYD
Associate Professors — W. ARMSTRONG; M.A. CARSON; R.N. DRUMMOND; J.M. GILMOUR; P.G. HOLLAND; J. LUNDGREN *(on leave 1975-76)*; B.H. MASSAM; J.T. PARRY; E. WADDELL; R.C. ZIMMERMANN
Assistant Professors — J.J. DRAKE; G.O. EWING; W.B. KEMP; T. MOORE; F.H. NICHOLSON *(Director, Subarctic Research Laboratory, Schefferville, Que.)*; S. OLSON; L. VEILLEUX *(Part-time)*
Honorary Staff — F. MÜLLER

REQUIREMENTS

ADMISSION: M.A. and M.Sc. Degrees

Attention is directed to the Faculty of Graduate Studies admission regulations outlined in the General Information and Faculty Regulations section headed "Admission".

Applicants not satisfying these conditions but with primary undergraduate specialization in a cognate field may register for the M.A. or M.Sc. degree in Geography in certain circumstances, but in general they will be required to register for a qualifying year, as will all others who have deficiencies in their preparation but are otherwise judged to be qualified.

REQUIREMENTS FOR THE M.A. DEGREE

Candidates must:

(1) pass written (and in some cases oral) examinations in at least two full graduate courses, at least one of which is in the Geography Departement;

(2) attend the Graduate Colloquium, Geography 184-631D and such additional courses in Geography or cognate subjects as the Chairman and the student's director of research think fit. The additional courses may be for audit or examination;

(3) submit a thesis in an appropriate area of geographical inquiry.

The quality of the thesis will determine the final standing of the student.

REQUIREMENTS FOR THE M.Sc. DEGREE

Candidates must:

(1) pass written (and in some cases oral) examinations in at least five half graduate courses: three selected from Geography 183-611A, B to Geography 183-615A, B; one selected from Geography 183-636A, B to Geography 183-635A, B; and one selected either from the entire list of Geography courses, or from the courses taught in any other department in the University.

(2) attend the Graduate Colloquium, Geography 183-631D, and such additional courses in Geography or cognate subjects as the Chairman and the student's director of research think fit.

(3) submit a thesis in an appropriate area of geographical inquiry.

The quality of the thesis will determine the final standing of the student.

ADMISSION: Ph.D. Degree

Students who have attained high standing in the Master's degree in Geography at McGill may be permitted to proceed to the Ph.D. in two further years. Rarely, a student may be allowed to register for the Ph.D. degree without having first taken the Master's degree. The normal duration of a program, including field work where required, is three years.

Normally, the Department will restrict admission to the Ph.D. program to students prepared to work in one of the fields of human or physical geography in which specialized supervision is offered. These, which cover a wide range of systematic areas, are listed in documents available from the Department.

REQUIREMENTS FOR THE Ph.D. DEGREE

Candidates must:

(1) remedy any deficiencies in their formal training in geography and necessary cognate subjects;

(2) submit themselves for a comprehensive examination (183-701D) comprising prepared papers and an oral examination. Competence in certain fields may be tested separately, but as a necessary part of this examination;

(3) submit a thesis based on original research in human or physical geography;

(4) attend the Graduate Colloquium, Geography 183-631D, during one of their resident years, and other courses as determined individually;

(5) comply with a language requirement if this is so recommended by the student's committee.

To satisfy these requirements, the candidate may take any of the graduate or undergraduate courses offered by the Department.

COURSES AND SEMINARS FOR HIGHER DEGREES

All courses meet once in each week.

183-602A URBAN GEOGRAPHY, PART I. A critical review of environmental and spatial preference and perception in an urban context, together with an introduction to appropriate measurement and scaling techniques.
Professor Ewing

183-603B URBAN GEOGRAPHY, PART II. Allocation-location problems in the public and private sectors; urban model-building; urban politics.
Professors Massam and Olson

183-604A ECONOMIC GEOGRAPHY, PART I. A geographical study of the phenomenon of entrepreneurship; its logistical, organizational and locational characteristics; scale of operation; the different forms of entrepreneurship in the economic geography of different levels of economic development.
Staff

183-605B ECONOMIC GEOGRAPHY, PART II. A critical review of research on manufacturing industry, with particular emphasis on (a) the analysis of industrial agglomeration, (b) manufacturing in economically disadvantaged areas, (c) some geographical aspects of the multinational corporation, and (d) innovation and technology transfer.
Professor Gilmour

183-606A GEOGRAPHY AND DEVELOPMENT, PART I. A review of the spatial problems of economic development in countries of the developing world, together with an examination of processes generating spatial inequality. Ecological considerations in economic development.
Professor Hills and Staff

183-607B GEOGRAPHY AND DEVELOPMENT, PART II. An examination of development problems in rural and urban areas of the Third World, with emphasis on agrarian structures and the social geography of urbanization. Regional emphasis will vary according to the interests of members of the seminar.
Professor Hills and Staff

183-608D CULTURAL GEOGRAPHY. Discussion of theoretical concepts and methods of analysis in the study of cultural adaptation, developing a cross-cultural perspective in the analysis of both urban and rural cultural systems. The use of systems analysis; energy and information flow in relation to behaviour; adaptive strategies. Analysis of specific cultural systems and issues.
Professors Kemp, Waddell and Staff

183-609A, B HUMAN GEOGRAPHY: SOCIAL AND BEHAVIOURAL PROBLEMS. A survey of

the treatment of society, social institutions and the individual as units of analysis within geography. Explanation and cognitive description in human geography.

183-611A, B ADVANCED CLIMATOLOGY. An advanced study of the principles of physical climatology and their application to the spatial variations and characteristics of energy and water balances in rural and urban environments.
Professor Garnier and Staff

183-612A, B ADVANCED PHYSIOGRAPHY. An analysis of recent advances in geomorphology.
Professors Bird and Carson

183-613A, B ADVANCED BIOGEOGRAPHY. An examination of the history, methods and objectives of biogeography, with emphasis on plants.
Professors Holland and Zimmermann

183-614A, B SOILS AND WEATHERING. An examination of the major processes operating in soils: weathering reactions, pedogenetic processes, and soil nutrient relationships. The course will include laboratory work and a small project to illustrate the main techniques.
Professor Moore

183-615A, B HYDROLOGY AND WATER RESOURCES. An analysis of recent developments in hydrology, with emphasis on their applications to geographical problems. Snowmelt systems and the hydrological effects of basin development.
Professor Drake

183-622A, B HUMID TROPICAL ENVIRONMENTS. A geographical approach to the study of sample rain-forest and savanna landscapes of the humid tropics, with special attention to the human impact on the balance between forest and savanna.
Professor Hills

183-623A SEMINAR ON REGIONAL RESEARCH, PART I. Presentation of background, and discussion of research interest of varied nature, in a region of common interest to a group of graduate students and staff. Regions will vary according to interest; probable selections will include Québec, the Gulf of St. Lawrence and the Maritimes, the Arctic and Northlands, the Caribbean, tropical Latin America.
Staff

183-624B SEMINAR ON REGIONAL RESEARCH, PART II. (See course 183-623A for description.)
Staff

183-631D METHODS OF GEOGRAPHICAL RESEARCH. A review of the accepted methods of research in geographical problems, in both physical and human fields. The approach will be practical, and will require the presentation of formal research papers for criticism and discussion.
Staff

183-632A, B ADVANCED CARTOGRAPHY. A systematic examination of modern geographic-cartographic techniques for the collection, evaluation, presentation and reproduction of spatially distributed data. Practical experience in the laboratory, the photographic darkroom, field work and visits to cartographic agencies are an integral part of the course.
Professor Drummond

183-633A, B REMOTE SENSING. (Not available to students registered in Geography 183-635A, B.) A review of aircraft and spacecraft remote sensing systems and their applications.
Staff

183-634A, B QUANTITATIVE METHODS IN GEOGRAPHY. An examination of certain techniques in geographic research and their limitations. Emphasis is directed to the use of correlation and regression analysis, and to multivariate extensions of these techniques.
Professor Carson

183-635A, B* INTERPRETATION METHODS: AIR PHOTOS AND IMAGERY. (Not available to students registered in Geography 183-633A, B.) Basic photogrammetry and interpretation procedures for aircraft and spacecraft photography and imagery.
Professor Parry

McGILL SUBARCTIC RESEARCH LABORATORY

This laboratory (under the direction of Professor Nicholson) is at Knob Lake (Schefferville), in the heart of Labrador-Ungava. Facilities exist for research in most aspects of physical geography. Extensive field programs are arranged. All inquiries should be addressed to the Chairman, Geography Department.

F6 DEPARTMENT OF HISTORY

STAFF

Professors — C.C. BAYLEY; V. BOSS; P.C. HOFFMANN; H. SENIOR; R. VOGEL
Associate Professors — P.H. BOULLE; L.L. LaPIERRE; P.T.K. LIN; M.P. MAXWELL; A.R. RIGGS
Assistant Professors — M.J. ECHENBERG; J.W. HELLMAN *(on leave)*; ELLA LAFFEY; C.I. MILLER; S.J. RANDALL *(Chairman)*; J.H. THOMPSON; H.S. WEINROTH *(on leave)*; B.J. YOUNGE
Visiting Staff — PROFESSOR W. LEITSCH; ASSISTANT PROFESSOR A.Z. HERTZ
Visiting Lecturers — Y. OTA; R.W. SHORTHOUSE

REQUIREMENTS

ADMISSION

Candidates should submit their applications before 15 March 1976.

Ph.D. LANGUAGE REQUIREMENTS

Candidates must offer one foreign language for examination purposes and they must also demonstrate a reading knowledge of such other languages as are required for research purposes in their major field. The Department expects that candidates will have successfully demonstrated competence in the one required language by the end of their Ph.D. 3 year.

REQUIREMENTS FOR THE M.A. DEGREE

Candidates applying for a Master's degree in History are required to possess an Honours B.A. which may be in History alone or in History and one other subject. When taken in History alone it must include eleven full courses taken in prescribed sequence, together with certain other approved courses notably in foreign languages. Graduate students who enter without this qualification may find it necessary to make good any deficiency in their undergraduate program and the Department is prepared to facilitate this.

Candidates may choose to proceed in one of two ways:

1. Candidates may proceed to the degree by the successful completion of the work of one (other than History 101-650D) of the Graduate Seminars listed below and by submitting an M.A. thesis, in the area of their special interest.

2. Candidates may proceed to the degree by:

a) the successful completion of the work of History 101-616D, Seminar in the Philosophy of History (if not available, another seminar should be taken);

b) the successful completion of the work in two further seminars one of which will represent the candidate's major field of interest and the other his minor field,

c) a Research Paper (History 101-650D) in the candidate's major field.

101-650D RESEARCH PAPER IN MAJOR FIELD. This research paper must demonstrate the candidate's ability to do independent work in his major field of interest. It may not be presented before the completion of a full year (one academic session and a summer) of residence in the university. Permission may be given for the summer study to be undertaken at another institution. Regulations concerning the research paper may be obtained from the Department.

101-655D Candidates whose major interest lies in fields in which no seminar is offered may, with the consent of their Director of Studies, offer extra tutorial work and such other seminar work as designated by their Director.

Candidates should check with the Department with regard to graduate seminars in view of the possibility that not all the seminars listed will be available.

REQUIREMENTS FOR THE Ph.D. DEGREE

An M.A. in History is the prerequisite for all candidates applying to enter the Ph.D. program. Candidates at the end of the first resident year are required to pass an oral comprehensive examination consisting of:

101-702D Comprehensive examination in major field.

101-703D Comprehensive examination in first minor field.

101-704D Comprehensive examination in second minor field.

Candidates must consult with their Director of Studies at the beginning of their Ph.D. work in order to determine their minor fields.

With the completion of the oral comprehensive examination, candidates may proceed with their doctoral dissertation.

The Department is prepared to direct theses of Graduate students in the following fields:

British History

a) England in the Middle Ages.
b) Scotland and Ireland in the 16th, 17th and 18th centuries.
c) British History, social and political: Tudor-Stuart and 19th century.
d) British Imperial Policy: 1714-1914.
e) Certain aspects of British Foreign Policy since 1815.

Canadian History

a) The Canadian West.
b) The social and economic history of Montreal, 1800-1900.
c) The History of Lower Canada and Quebec in the 19th century.
d) Aspects of the History of French Canada in the modern period.
e) Canadian-American relations.

United States History

a) The history of the United States in the late colonial period.

European History

a) The constitutional development of the Hol Roman Empire in the 13th century.
b) The Reformation.
c) Aspects of the History of France.
d) Aspects of German History since 1800.

e) Aspects of the history of western Europe 1870-1914.
f) Russian and Soviet History.
g) Aspects of the history of Slavonic Europe.
h) War and Society in Modern Europe.
i) Certain aspects of the history of European-Chinese relations.
j) Aspects of Intellectual History of Modern Europe.
k) Certain aspects of the History of Science from the 16th century.

Non-European History

a) Aspects of West African History.
b) Aspects of 20th Century Chinese History.
c) Aspects of 20th Century Latin America.

The Redpath Library is well equipped with printed sources for the periods and subjects mentioned above, and students pursuing research in Canadian History will be required, as occasion arises, to avail themselves of the manuscript resources of the Public Archives at Ottawa and the Provincial Archives at Quebec, and of parochial and other records in Montreal and its vicinity.

However, the Department may require candidates to spend one year in research at another university or repository of archives.

GRADUATE SEMINARS AND COURSES

*104-601D SEMINAR: COLONIAL AMERICA.
Professor Riggs

*101-605D SEMINAR: MODERN EUROPEAN INTELLECTUAL HISTORY.
Professor Hellman

*101-607D SEMINAR: RELIGIOUS AND IDEOLOGICAL MOVEMENTS IN THE UNITED KINGDOM AND WESTERN EUROPE 1815-1914.
Professor Senior

*101-608D SEMINAR: SIXTEENTH AND SEVENTEENTH CENTURY BRITAIN.
Professor Maxwell

*101-610D SEMINAR: FRENCH COLONIES AND EXTERNAL COMMERCE IN THE EIGHTEENTH CENTURY.
Professor Boulle

101-612D SEMINAR: GERMAN NATIONAL SOCIALISM.
Professor Hoffmann

101-614D SEMINAR: SOCIAL MOVEMENTS IN WESTERN EUROPE IN THE LATER MIDDLE AGES.
Professor Bayley

*101-616D SEMINAR: PHILOSOPHY OF HISTORY.

101-624D SEMINAR: SOCIO-POLITICAL DEVELOPMENT IN BRITAIN 1815-1926.
Professor Shorthouse

*101-626D SEMINAR: THE WESTERNIZATION OF RUSSIA.
Professor Boss

101-643D SEMINAR: PROBLEMS IN CANADIAN HISTORY TO 1867.
Professor Dechêne

101-652D SEMINAR: PROBLEMS IN CANADIAN HISTORY, 1867-1967.
Professor Miller

101-668D ASPECTS OF EAST ASIAN HISTORY.
Professor Ota

*101-671D SEMINAR: AMERICAN SOCIETY FROM THE CIVIL WAR TO 1920.
Professor Randall

101-696D SEMINAR: REVOLUTIONS IN EASTERN EUROPE AND RUSSIA.
Professor Hertz

F7 LAW

DEGREES

The higher degrees in law are the M.C.L. (Master of Civil Law), the LL.M. (Master of Laws) and the D.C.L. (Doctor of Civil Law), as offered by the Institute of Air and Space Law, and the Institute of Comparative Law. All graduate students except those registered in the Institute of Air and Space Law come under the direction of the Institute of Comparative Law.

REQUIREMENTS FOR THE M.C.L. OR LL.M. DEGREE

See the general regulations of the Faculty of Graduate Studies and Research on requirements for the Master's degree.

Candidates for admission to M.C.L. or LL.M. programs must hold the degree of B.C.L., with at least second class honours, from McGill University, or its equivalent, and satisfy the linguistic and other requirements of the Institute of his study. A candidate must follow the courses prescribed by the Institute, including cognate courses in other departments of study, submit an acceptable thesis and, if required by the Institute, undergo an oral examination designed to test the general knowledge of the field of the research studies.

The degree may be completed, by well-qualified and capable students, within one calendar year, but if all degree requirements have not been completed within this time an additional full academic session in residence is necessary. In exceptional circumstances, the Executive Committee of the Faculty of Graduate Studies and Research may grant an exemption from the requirement of a second residential year at McGill to a candidate

who has failed to complete all the requirements for the master's degree within one year.

REQUIREMENTS FOR THE D.C.L. DEGREE

The program of each Institute consists of a minimum of three years' work from the first registration of the candidate. Only an applicant of proven legal scholarship of high merit will be admitted to candidacy for this degree and normally a candidate should be the holder of both a general degree and a law degree. In the case of a candidate who holds the M.C.L. or LL.M. degree of McGill or its equivalent from another university, two years of resident study beyond the master's degree are required but may be reduced to one year with the approval of the Executive Committee of the Graduate Faculty on the recommendation of the Graduate Studies Committee of the Faculty of Law. In general, this non-resident year should be spent at another university or similar institution. An applicant must satisfy the linguistic and other requirements of the Institute of his study and, as a rule, an Institute will not permit a candidate who is not the holder of an appropriate master's degree, or its equivalent, to register directly for the D.C.L. but require him to register for the M.C.L. or LL.M. A candidate for the M.C.L. or LL.M. degree of McGill, who, upon the completion of his first year of resident study, shows considerable promise may, upon the recommendation of the Institute of his study, be permitted to proceed to the second year of the D.C.L. program without being required to submit a Master's thesis.

At a stage in the program of his studies as determined by the Institute a candidate must pass an oral examination, the purpose of which is to test his general knowledge of the field of his research studies. Further, a candidate will be required to defend his thesis before a jury appointed by the Faculty of Graduate Studies and Research and consisting of five adjudicants, including at least two who are not members of the Faculty of Law. To qualify for the degree the thesis submitted must be a significant contribution to legal scholarship, evidencing in concept and execution the individual work of the candidate, and in form suitable for publication.

INSTITUTE OF AIR AND SPACE LAW

STAFF

Professors – NICOLAS M. MATTE *(Director)*; MAXWELL COHEN; H.R. HAHLO; I.A. VLASIC

Associate Professor – M.A. BRADLEY

DEGREES AND DIPLOMA

The Institute of Air and Space Law operates within the Faculty of Law. The Institute provides facilities for advanced study and research in Air and Space Law and related problems of international law for highly qualified law graduates or others with appropriate qualifications. The Institute offers a Diploma in Air and Space Law and the degrees of Master of Laws (LL.M.) and Doctor of Civil Law (D.C.L.).

Diploma

Applicants for admission must hold, a law degree of high standing from an approved Law School in any part of the world, or must have an equivalent professional standing. Working competence in the English language is required but examinations and other written work may be presented in French. All candidates must present evidence of the subjects covered in their prior law studies and of their scholastic or professional standing together with two suitable references.

A candidate who satisfies the residence requirements of one session and who passes the prescribed examinations will be awarded the Diploma in Air and Space Law.

The prescribed courses are:

387-611D PUBLIC INTERNATIONAL AIR LAW.

387-612D PRIVATE INTERNATIONAL AIR LAW.

387-613D GOVERNMENT REGULATION OF CIVIL AVIATION.

387-614D SPACE LAW.

387-615D ECONOMICS OF AIR TRANSPORT.

387-616D INTRODUCTION TO CIVIL AND COMMON LAW.

387-617D TERM PAPER.

The Director may require additional courses of particular candidates.

Degree of Master of Laws

A working competence in the English language is required but examinations and written work including theses may be presented in either English or French. All candidates must present evidence of the subjects covered in their prior law studies and of their scholastic or professional standing together with two suitable references.

The prescribed courses are as those set out above for the Diploma, but in addition the candidates must present an acceptable thesis on a subject approved by the Director. No candidate may receive the Diploma and the Master's degree for the same course of studies. A candidate who has already received the Diploma in Air and Space Law may be accepted as a candidate for the Master's Degree, but he will be required to spend one additional academic session in residence, and he may also be required to undertake additional

course work beyond the course work already performed for the Diploma, in addition to the thesis. All candidates must be in residence for one academic session but are advised to remain in residence for at least one calendar year.

Degree of Doctor of Civil Law

The degree of Doctor of Civil Law is predominantly a research degree, and it will be awarded on the basis of a thesis that presents an original contribution to the development of Legal Science. A working competence in the English language is required, but the thesis may be presented in either French or English. All candidates must present evidence of the subjects covered in their prior law studies and of their scholastic and professional standing together with two suitable references.

The Director may, in his discretion, require any candidate for the D.C.L. degree to attend one or more courses or seminars in the field of the candidate's thesis or in related subjects and satisfactorily to complete any examination requirements in those subjects. The Degree of D.C.L. will be awarded only after completion of three years from the first registration of the candidate for the D.C.L. degree. In the case of a candidate who holds the M.C.L. or LL.M. degree of McGill or its equivalent from another university, two years of resident study beyond the master's degree are required but may be reduced to one year with the approval of the Executive Committee of the Graduate Faculty on the recommendation of the Graduate Studies Committee of the Faculty of Law. In general, this non-resident year should be spent at another university or similar institution.

INSTITUTE OF COMPARATIVE LAW

The Institute of Comparative Law operates within the Faculty of Law. As a centre for comparative legal studies the Institute provides facilities for graduate work, advanced studies and field research in areas of Public and Private Law. The Institute offers the degrees of Master of Laws (LL.M.), Master of Civil Law (M.C.L.) and of Doctor of Civil Law (D.C.L.).

STAFF

Professors — P.-A. CREPEAU *(Director)*; MAXWELL COHEN; H.R. HAHLO; P. MEYER; I.A. VLASIC; D.W.M. WATERS
Associate Professor — J.E.C. BRIERLEY
Assistant Professors — H.P. GLENN; P.W. SLAYTON

REQUIREMENTS FOR MASTER OF LAWS AND MASTER OF CIVIL LAW DEGREES

An applicant must hold the degree of B.C.L. or LL.B. with at least second class honours from McGill University, or its equivalent.

An adequate working knowledge of the English and French languages is required from all applicants. Applicants who wish to pursue studies which in the opinion of the Director require knowledge of a language other than English or French must possess adequate working knowledge of that language.

All applicants must present satisfactory evidence of the subjects covered in their prior law studies, of their scholastic or professional standing, and of their linguistic proficiency in English and French, together with not less than two suitable references.

Courses and Registration

Candidates for the Master's Degree must spend at least one academic year in residence. There is no uniform program of studies which every candidate must take. Each candidate follows a program of studies, determined by the Director, which in as far as possible is fashioned to meet his particular needs as determined by his prior legal experience and his aspirations.

As a rule a candidate must take in each of the two terms of the academic year a minimum of three courses which must include whatever courses in comparative law of international law the Institute may prescribe, the course in Introduction to Comparative Law provided by the Institute, which extends over both terms. A candidate with a civil law background will normally be required to select at least one undergraduate course from the common law program, while a candidate with a common law background will normally be required to select at least one undergraduate course from the civil law program. The remaining courses may be selected, subject to the Director's approval, from the seminars provided by the Institute and any of the courses forming part of the curriculum for the B.C.L. or LL.B.

Each candidate will be required to submit a thesis on a subject approved by the Director either by the end of July following the academic year in which he first registered or at such date thereafter as might be determined by the Director. In the latter case, the thesis, with the leave of the Director, may be prepared *in absentia.*

In order to be allowed to submit a thesis, a candidate must have obtained a mark of at least 65% in each of the courses or seminars for which he registered.

Examinations, term papers and theses may be written either in English or French.

REQUIREMENTS FOR DEGREE OF DOCTOR OF CIVIL LAW

Candidates for the degree of Doctor of Civil Law must hold the degree of B.C.L. or LL.B. from McGill University or its equivalent from another university. As a rule a candidate who does not already hold a master's degree will be required to

complete the master's degree before being accepted for the doctoral program. A candidate who has obtained the master's degree from another university will, as a rule, be required to complete the courses prescribed for the first year of the master's degree. If his performance is not of sufficiently high standard to justify admission to the doctoral program, he will not be permitted to proceed any further, but may be permitted to submit a master's thesis to qualify for the master's degree. If his performance is of sufficiently high standard, he may be permitted to proceed to the second year of the doctoral program without being required to submit a master's thesis.

The degree of Doctor of Civil Law is predominantly a research degree, and will be awarded on the basis of a thesis that represents an original contribution to the development of legal science. The thesis may be presented in English or French. All prospective candidates must present evidence of the subjects covered in their prior law studies and of their scholastic and professional standing together with two suitable references. The degree will be awarded, at the earliest, after the completion of three years from the first postgraduate registration of the candidate at McGill University. In the case of a candidate who holds the M.C.L. or LL.M. degree of McGill or its equivalent from another university, two years of resident study beyond the master's degree are required but may be reduced to one year with the approval of the Executive Committee of the Graduate Faculty on the recommendation of the Graduate Studies Committee of the Faculty of Law. In general, this non-resident year should be spent at another university or similar institution.

F8 DEPARTMENT OF POLITICAL SCIENCE

This Announcement is prepared early in the calendar year and so is likely to need modification by the time the academic year begins. A mimeographed supplement is available at the Department Office, and it is essential for graduate students to consult this supplement in order to obtain a more complete description of the M.A. and Ph.D. programs.

STAFF

Professors — MICHAEL BRECHER *(on leave 1975-76)*; JAMES R. MALLORY; BALDEV NAYAR; CHARLES TAYLOR

Associate Professors — THOMAS BRUNEAU; PETER GOUREVITCH; FRANK KUNZ *(Chairman)*; PAUL NOBLE; JANICE STEIN; MICHAEL STEIN; BLEMA STEINBERG; HAROLD WALLER

Assistant Professors — BARBARA HASKEL *(on leave 1975-76)*; DANIEL LATOUCHE; SAMUEL NOUMOFF; PHILIP SABETTI; HAROLD SARF; JOHN SHINGLER *(on leave 2nd term, 1975-76)*; PAULINE VAILLANCOURT

REQUIREMENTS

ADMISSION

Students holding a B.A. degree may be eligible for admission. Preparation equivalent to a McGill Honours Program in Political Science is a desirable requirement. Students who have deficiencies in their preparation but are otherwise judged to be qualified are admitted to a qualifying year, in which they undertake advanced undergraduate work.

Normal deadline for applications for admission to the Department is February 15. Applications must be received by that time in order to guarantee the fullest consideration. All applicants, including those who have done their undergraduate work at McGill, must submit two letters of reference. The department awards a number of teaching assistantships each year. The deadline for applications for these awards is March 1.

REQUIREMENTS FOR THE M.A. DEGREE

There are three requirements:

1. Seven one-term courses of which at least one must be a seminar; at least four of the courses must be at the graduate level in Political Science.
2. A written comprehensive examination in one of the following five fields: Political Philosophy, Comparative Politics (Developed Countries), Comparative Politics (Developing Countries), Canadian Government and Politics, International Relations; or an Oral Admission Examination for those students wishing to proceed to the Ph.D. program.
3. A thesis to demonstrate proficiency in research.

Candidates for the M.A. degree follow a program approved on an individual basis by the Department. All students who wish to be considered for the Ph.D. program are evaluated on the basis of their M.A. program. Only a small number of students are permitted to go on for their doctorate. A pass for the M.A. degree does not necessarily imply permission to proceed to the doctorate.

REQUIREMENTS FOR THE Ph.D. DEGREE

There are six requirements:

1. Ph.D. students are required to take the equivalent of 6 one-term courses in addition to those they have taken at the M.A. level. Of these 6 courses, at least 3 must be at the 600 or 700 level in political science. By the time the student

finishes his course work for the Ph.D., he must complete a total of at least three 700 level seminars in political science, including any taken in his M.A. year. The remaining courses may be chosen from among approved courses in Political Science or related disciplines, but should be at the graduate level whenever possible. With the approval of the Certification Committee, a student may take a reading course on some special subject as part of his program, providing he is able to find a faculty member who is willing to direct his work. Students should note that whereas 65% is the minimum passing grade, doctoral students are expected to maintain an average of at least 70%.

2. Students will be expected to do course work in three of the five fields offered by the Department. In two of these fields, the student will be required to write a comprehensive examination (see below), while in the third field the requirement will be met by the successful completion of two courses or seminars at the graduate level. In the third field the student must have his course program approved by the coordinator for the areas in which he is specializing.

3. Ph.D. students are required to take 2 written comprehensive examinations from among the following fields: (1) Canadian Government and Politics; (2) Comparative Politics (Developing Countries); (3) Comparative Politics (Developed Countries); (4) Political Philosophy; (5) International Relations. No student may write the comprehensives until he has completed his course work. The exams may be written together or separately. They are given each September, January and May.

4. Ph.D. students are required to take an oral comprehensive examination after they have passed their written comprehensives.

5. The student must pass an examination in unseen translation from two modern languages (other than English) at the elementary level or from one modern language (other than English) at the advanced level.

6. Dissertation.

COURSES FOR HIGHER DEGREES

160-601D M.A. GRADUATE GENERAL WRITTEN EXAMINATION.

160-612A EMPIRICAL METHODS. Fundamental principles of empirical research, in which the emphasis will be placed on acquainting the student with the techniques most commonly used by political scientists. The topics include the design of research projects, procedure in carrying out research, problems of measurement, survey research, scaling, data processing, and data analysis.
Professor Black

***160-613B SELECTED THEMES IN POLITICAL PHILOSOPHY.** In the Spring of 1976 the seminar will examine the political thought of the American Revolution including its expression in both England and America.
Professor Shingler

***160-614A CLASSICAL POLITICAL THOUGHT.** An examination of the origins of the Western tradition of political philosophy, with concentration on the major classical texts: Plato's *Republic* and selected Platonic dialogues. Aristotle's *Nichomachean Ethics,* Cicero's *De Re Publica.*
Professor Shingler

***160-615B POLITICAL PHILOSOPHY.** A textual examination of selected writers dealing with important themes in the mediaeval and early modern periods: the nature of justice and law; the meaning of reason and knowledge; the basis of order and authority; the relationship of man to nature; the interpretation of history.

160-616A MODERN POLITICAL ANALYSIS. An introduction to the concepts underlying modern approaches to the study of politics. The scope of the discipline will be delineated and the foundations of empirical research, including the philosophy and methodology of science, especially as these apply to social science, will be considered. Various alternatives and critiques will be presented and evaluated.
Professor Waller

***160-617B PROBLEMS IN POLITICAL THEORY.** Analysis of selected themes in political theory drawing upon recent developments in contemporary philosophy and psychology. Topics will include: The concept of the self-other relation in theories of politics, the character of political action in contemporary political structures, functions of symbols and myths in political theory and action, and the study of various modes of exploring the human condition.
Professor Sarf

***160-619B FUNDAMENTAL CONCEPTS OF POLITICAL THEORY.** This seminar will explore the philosophical and human foundations of political-theoretical activity, and consider political theory as a tradition. Questions concerning the nature of theoretical perception, the intentions which motivate political theorists, the different genre of theories, and the basic purposes, nature and forms of theory shall be considered. Both modern and classic texts will be used to explore the nature of theoretical discourse and the problematics of man and society to which political theory is a response.
Professor Sarf

160-621A THE CANADIAN POLITICAL PROCESS. A critical evaluation of concepts drawn from comparative politics and behavioural studies and their application to selected problems in Canadian politics. The topics include political socialization and political culture, political communications, élites, political groups, political

protest, political leadership and administrative responsiveness.
Professor M. Stein

***157-626A PROBLEMES POLITIQUES DU QUEBEC.** Quels sont les principaux modèles qui ont été proposés pour expliquer l'évolution de la société québécoise: le modèle historique, le modèle sociologique, le modèle marxiste? Quelles sont les principales querelles scientifiques ayant cours dans les interprétations historiques et contemporaines de la société québécoise: l'importance de la conquête, l'impact des structures mentales sur le retard économique du Québec, le rôle du clergé, la Révolution tranquille, la lutte pour l'indépendance politique.
Professor Latouche

160-627B ETUDES EMPIRIQUES DE LA SOCIETE QUEBECOISE. Ce séminaire est réservé aux étudiants qui sont intéressés à mener à bien ou à participer à des études empiriques sur certains aspects de la réalité québécoise. Parmi les thèmes suggérés, mentionnons le fédéralisme canadien, le mouvement indépendiste québécois, les relations inter-ethniques au Canada, les mouvements de gauche au Québec. Le but du séminaire est de permettre à l'étudiant d'appliquer concrètement les instruments d'analyse qu'il possède.
Professor Latouche

160-628A COMPARATIVE POLITICS. An analysis of differing models of the role of the state in bourgeois democratic political systems: the classical liberal view, the pluralist view, and the neo-Marxist views. The arguments will be studied through reading of both theoretical and empirical materials. Examples will be drawn from both West European and North American experience.
Professor Gourevitch

***160-637B COMPARATIVE PUBLIC ADMINISTRATION.** This is an advanced course in the theories of public administration and the application to different systems in comparative perspective.

160-647A POLITICAL DEVELOPMENT. Review of theoretical and empirical literature on modernization and development; analysis of key elements in the development process — internal and external compulsions, social mobilization and institutionalization, economic development and social justice, integration; discussion of different models and strategies.
Professor Nayar

160-649A THE MASS APPROACH TO POLITICAL DEVELOPMENT: CHINA. An examination of the strategy of political and socio-economic development in contemporary China. Specific attention will be devoted to cultural and ideological foundations of socialization, mechanisms of policy adjustment, political and Party organization, decentralization, bureaucracy, and concepts such as telescoping of historic stages, goal motivation, and model emulation.
Professor Noumoff

***160-671B THE THEORY AND EXPERIENCE OF REGIONAL INTEGRATION.** In 1976-77 the topic will be "Canadian-American Relations: International, Transnational or Integrated?" which will examine the relevant portions of the literature on integration and transnational relations in comparison to traditional inter-state relations in order better to understand the relations between Canada and the United States. The course will read theoretical material and case studies. Each student will choose a problem in Canadian-American relations and examine the applicability of the available framework to his case. Discussion of weekly readings and a seminar length paper will be expected.
Professor Haskel

160-675A INTERNATIONAL SYSTEMS. This course will examine some of the central problem areas in the study of international systems: stratification, interdependence, power and influence, conflict and conflict-management, alliances, international organization and integration. In 1975-76, these problem areas will be explored in the context of regional systems of developing states (the Middle East, Asia, Africa, Latin America).
Professor Noble

160-676A RESEARCH METHODS IN INTERNATIONAL RELATIONS. (Prerequisite: 160-612A and either 160-678A or 160-679A). An advanced seminar designed for doctoral students. This course will examine alternative research strategies currently being used to explore major theoretical problems in international relations. Students will be expected to read several research projects in depth and to critically assess the advantages and disadvantages of their research design.
Professor J. Stein

***160-677A INTERNATIONAL CRISES.** A theoretical and comparative analysis of state behaviour under crisis conditions. Several methods will first be explored: neo-traditional; decision-making; stimulus-response; bureaucratic politics; event data; repetition-reaction; and systemic. Thereafter, with active student participation, in the form of a work-shop, the seminar will compare the following crises using the Brecher-Steinberg-Stein analytic framework; 1914; Korean War (1950); Berlin (1948, 1961); Cuba (1962); Sino-India (1962); Indo-Pakistan (1965); Arab-Israel (1967). Hypotheses on state behaviour will be tested with the evidence uncovered by these case studies.

160-678B STATE BEHAVIOUR. The course will explore representative theoretical and empirical studies which examine components of the foreign policy-making process. An attempt will be made to relate these components to foreign

policy behaviour and to assess the utility and validity of alternative theoretical approaches.
Professor Steinberg

***160-679A INTERNATIONAL CONFLICT.** An examination of the literature dealing with international conflict. Topics to be covered include the sources of international conflict, bargaining, strategies and dynamics of conflict, crisis behaviour, and the management of international conflict.

160-690A, B READING IN POLITICAL SCIENCE. A graduate student may take one reading course per academic year in a particular field and under the supervision of a member of staff.

160-700D Ph.D. ORAL ADMISSION EXAMINATION.

160-701D Ph.D. GRADUATE GENERAL WRITTEN EXAMINATION, First Field.

160-702D Ph.D. GRADUATE GENERAL WRITTEN EXAMINATION, Second Field.

SEMINARS

***160-715B POLITICAL THEORY.** A seminar in contemporary political science, with reference also to political philosophy and to the psychological bases and sociological affiliations of politics.
Professor Taylor

160-721A FEDERALISM. The seminar will deal in a comparative manner with the political problems of federal societies. Topics for discussion will include theories of federalism, conflict pluralism, integration and communal segmentation, federal constitutional traditions and institutional forms. Research will be conducted into selected aspects of Canada and other federal societies.
Professors Kunz, Mallory and M. Stein

160-724A AFRICAN POLITICS. The seminar deals with selected problems in contemporary comparative African politics and political thought. The work of the seminar centres around research papers prepared and presented by participants.
Professor Kunz

***160-726A CANADIAN LEGISLATURES.** The seminar will examine, in the light of recent research, the role of parliament and provincial legislatures in Canada in the policy-making process. Recent important changes in machinery (e.g. the expansion of committees) will be evaluated in the light of the changing character of Canadian politics and of questions of constitutional theory.
Professor Mallory

160-728B COMPARATIVE POLITICS. For students planning field research, particularly but not exclusively in Western Europe, Canada, and the United States. Training in use of primary source materials; discussion of examples of current work; consideration of research problems and designs. Students present their own projects.
Professor Gourevitch

***160-731B POLITICAL IDEOLOGIES.** This research seminar deals with selected problems of comparative political ideologies, their origins, functions and relationship to political action and institutions.
Professor Kunz

154-742B ECONOMIC AND POLITICAL DEVELOPMENT. This course will discuss the continuing Canadian problems of unemployment, inflation and foreign ownership, the Harrod question, Are monetary and fiscal policies enough? , the necessary integration of all elements of economic policy including trade, exchange rate, competition, resource and growth objectives.
Professor Kierans

160-745B MACHINERY OF GOVERNMENT. This seminar will consist of a detailed examination of a problem in Canadian government and administration. Problems will include topics dealing with cabinet government, parliamentary organization, federalism, public administration and the impact of political forces on them.
Professors Mallory, Kierans and Weldon

160-747B RICH NATIONS AND POOR NATIONS: DEPENDENCE AND DEVELOPMENT. Research oriented seminar on the problems of dependence and development in the Third World.
Professor Nayar

***160-748B SOUTH ASIAN POLITICS.** An investigation into key political problems of India and Pakistan in their social and economic setting.

***160-749A ASIAN POLITICAL PHILOSOPHY.** A graduate seminar designed to permit students with some training in either Asia or Philosophy to examine either the historic or contemporary policy of East, South, South-East, or West Asia.
Professor Noumoff

***160-778B COMPARATIVE ANALYSIS OF FOREIGN POLICY.** (Prerequisite: 160-677A.) A research seminar dealing with selected topics in foreign policy. Students will be expected to undertake original research from primary sources within their areas of interest.

160-779B COMPARATIVE ANALYSIS OF INTERNATIONAL CONFLICT. A research seminar devoted to the analysis of conflict in the contemporary international system. In 1975-76, this seminar will deal with the strategy, tactics and dynamics of international conflicts. Students will be expected to undertake original research in their areas of interest with a view to developing hypotheses concerning these questions. Among the possible areas of concentration are conflicts between developing and developed states and the Arab Israeli conflict.
Professor Noble

160-780A/781B READING SEMINAR. A research seminar on a topic that is not covered in the regular seminars, but which is of interest to a group of students and a faculty member. The exact topic for the research papers will be determined by mutual agreement among students and faculty members involved.
Staff

160-799D Ph.D. ORAL COMPREHENSIVE EXAMINATION.

UNDERGRADUATE COURSES FOR QUALIFYING YEAR AND GRADUATE STUDENTS

When it is appropriate to his program, a graduate student may take an undergraduate course approved by his adviser. These courses are listed in the *Announcement of the Faculties of Arts, Science* and in the annual course list prepared by the Department in the Fall.

F9 PSYCHOLOGY

STAFF

Professors — D. BINDRA *(Chairman)*; D.G. DOEHRING; VIRGINIA DOUGLAS; G.A. FERGUSON; D.O. HEBB; R. KANUNGO; W.E. LAMBERT; R.B. MALMO; RONALD MELZACK; BRENDA MILNER; P.M. MILNER; E.G. POSER; M.S. RABINOVITCH; MURIEL STERN

Associate Professors — A.S. BREGMAN; MICHAEL CORBALLIS; D.C. DONDERI; JOHN MACNAMARA; A.A.J. MARLEY; R.O. PIHL; J.O. RAMSAY; T.R. SHULTZ; D. TAYLOR; G.R. TUCKER; N. WHITE; BLOSSOM WIGDOR; S. YULIS

Assistant Professors — FRANCES ABOUD; I.M. BINIK; SUSAN CAMPBELL; K. CLARK; M.S. CUMMINS; D. KUCH; J. MacDOUGALL; C.L. OLSON; W.E. PIPER; J. WRIGHT; A. ZOLOVICK

Sessional Lecturers — ERIKA GUTBRODT

Clinical Consultants — S. BENAROYA; N. GREENBERG; P. GREGOIRE; G. NEMETH; A. PUTTERMAN

PROGRAMS

Graduate work in the Department of Psychology follows two main lines: experimental-theoretical and applied. Work in experimental-theoretical psychology leads to the M.A., M.Sc. and Ph.D. degrees in human experimental, physiological, personality, social, child, psycholinguistics, quantitative, and psychological research in relation to education. Work in applied psychology leads to the Ph.D. degree in clinical psychology, and the M.Sc. (Applied) degree program is offered in certain particular fields.

Facilities for advanced research in a variety of fields are available within the Department itself. In addition, arrangements with the Departments of Psychology at the Allan Memorial Institute, Montreal Children's Hospital, Queen Mary Veterans' Hospital, the Douglas Hospital, and Jewish General Hospital, permit graduate students to undertake research in the hospital setting.

For full information about all programs, financial aid, and for application forms, contact the Graduate Admissions Secretary, Department of Psychology, McGill University, P.O. Box 6070, Station A, Canada H3C 3G1. Telephone 392-5742.

REQUIREMENTS

ADMISSION

Admission to graduate work will depend on an evaluation of the student's research interests and aptitude for original contributions to knowledge or for professional contributions in the applied field. The usual requirement for admission is an honours or majors degree (B.A. or B.Sc.) in Psychology. This includes an introductory course plus six full courses (each equivalent to six semester hours). Experimental psychology, the theoretical development of modern ideas in psychology, and statistical methods as applied to psychological problems (equivalent to an introductory course) are essential. A knowledge of elementary physiology, physics or chemistry, and modern developments in other related biological or social sciences is desirable. An applicant who holds a Bachelor's degree but who has not met these usual requirements should consult a faculty member in his or her area of interest to determine which (if any) courses must be completed before the application can be considered. A student with insufficient preparation may qualify for graduate work by registering in the Faculty of Arts or the Faculty of Science, and following an appropriate course of study. Such registration requires the permission of the Department; the Department will not recommend the registration of qualifying students in the Faculty of Graduate Studies and Research.

NOTE: Applicants should submit to the Graduate Admissions Secretary by February 1: a completed application form, two copies of the personal academic background form, two copies of all university transcripts, two letters of recommendation, Miller Analogies and/or Graduate Record Examination scores, and a personal letter, outlining their experience, interests and objectives in psychology. Applicants should note that the deadline for many scholarships and fellowships is two to three months earlier than the February deadline.

REQUIREMENTS FOR THE M.A. AND M.Sc. DEGREES

Candidates must demonstrate a sound knowledge of modern theory, of its historical development, and of the logic of statistical methods as used in psychological experiment. They will be expected to have an understanding of the main lines of current work in other than their own particular field of specialization.

All candidates must take courses 204-650A, 204-650B and 204-660D, and in addition any other course specified by the Department. The primary concern of the candidate, however, is his thesis. For this the exploratory work, at least, should get under way early in the year. A comprehensive written or oral examination will be held which, in conjunction with the thesis itself, will determine the candidate's final standing for the degree.

REQUIREMENTS FOR THE Ph.D. DEGREE

The candidate for the Ph.D. degree in the theoretical-experimental program must demonstrate a broad scholarship, mastery of current theoretical issues in psychology and their historical development, and a detailed knowledge of his special field. Preliminary examinations will be held at two stages; one at the conclusion of the Master's year and one at the conclusion of the following year. These examinations may be written or oral, or both, at the discretion of the Department. These examinations will include a general paper on modern theoretical issues and history, and a special paper on one of the following: comparative and physiological psychology, learning and perception, social psychology and personality, measurement, developmental psychology, or any other appropriate area.

Candidates for the Ph.D. degree in clinical psychology must demonstrate a high standard of scholarship in psychology and aptitude for the professional application of psychological knowledge. The clinical program is designed primarily to train senior personnel for work in hospitals and clinics. A number of avenues of specialization are, however, possible. Some students may wish to prepare themselves for careers in university teaching or clinical research; others may have an interest in behaviour disorders in the fields of developmental or educational psychology. The time necessary to attain the degree is four years beyond the B.A. or B.Sc. degrees. No intermediate or terminal M.A. or M.Sc. degrees are awarded to students in the Ph.D. clinical program. All students are required to write a thesis and demonstrate research capabilities.

The Department of Psychology does not ordinarily require an examination in a foreign language.

COURSES AND SEMINARS

204-454D LABORATORY METHODS IN PSYCHOBIOLOGY.

204-455D RESEARCH METHODS IN PSYCHOLINGUISTICS.

204-601D Reference number for comprehensive examination written by candidates for the M.A., M.Sc., or M.Sc. (Appl.) degree.

204-615D INTELLIGENCE AND PERSONALITY. (3 hours).

204-630A PSYCHOPATHOLOGY. (1½ hours).

***204-635D ADVANCED EDUCATIONAL PSYCHOLOGY.** (3 hours).

204-640D DESIGNING, DEVELOPING AND EVALUATING INSTRUCTIONAL SYSTEMS. (3 hours).

204-641D BEHAVIOUR DEVIATIONS. (3 hours) Appraisal and Modification.

204-650A ADVANCED STATISTICS I. A course in advanced statistics with specialization in experimental design. (3 hours).

204-651B ADVANCED STATISTICS II. A course in advanced statistics with specialization in regression techniques. (3 hours).

204-660D PSYCHOLOGICAL THEORY. (3 hours) Seminar designed as an introduction to more advanced graduate courses.

204-670D RESEARCH PROBLEMS IN CLINICAL PSYCHOLOGY. (1 hour).

204-701D Reference number for comprehensive preliminary Ph.D. examinations.

204-702F SUMMER INTERNESHIP – JUNIOR.

204-703F SUMMER INTERNESHIP – SENIOR.

204-704D SPECIALIZED PRACTICUM.

204-705D Reference number for research project of M.Sc. (Appl.) candidates.

204-710D ADVANCED EXPERIMENTAL PSYCHOLOGY. (2 hours).

204-711D ADVANCED EXPERIMENTAL PSYCHOLOGY. (2 hours).

204-712D ADVANCED EXPERIMENTAL PSYCHOLOGY. (2 hours).

204-715D COMPARATIVE AND PHYSIOLOGICAL PSYCHOLOGY. (2 hours).

204-716D COMPARATIVE AND PHYSIOLOGICAL PSYCHOLOGY. (2 hours).

204-717D COMPARATIVE AND PHYSIOLOGICAL PSYCHOLOGY. (2 hours).

204-740D QUANTITATIVE METHODS IN PSYCHOLOGY. (2 hours).

204-770D ADVANCED SEMINAR ON CLINICAL PROBLEMS. (2 hours).

204-780D SPECIAL TOPICS IN CLINICAL PSYCHOLOGY. (2 hours).

F10 DEPARTMENT OF SOCIOLOGY

STAFF

Professors — WILLIAM A. WESTLEY *(Chairman)*; DAVID N. SOLOMON *(on leave 1975-76)*; RICHARD HAMILTON *(on leave 1974-75)*; MAURICE PINARD; IMMANUEL WALLERSTEIN *(on leave 1975-76)*

Associate Professors — ROGER G. KROHN; GERTRUDE ROBINSON *(on leave 1975-76)*; DONALD VON ESCHEN

Assistant Professors — MICHAEL P. CARROLL; WILLIAM W. EATON; PHILIP EHRENSAFT; ULI LOCHER; PRUDENCE RAINS; MICHAEL SMITH; MALCOLM SPECTOR

REQUIREMENTS

The Department offers training leading to the degrees of Master of Arts and Doctor of Philosophy in Sociology. For admission to candidacy, applicants must have a Bachelor's degree based upon a record of at least second class standing and preferably an undergraduate specialization in Sociology equivalent to the honours B.A. degree of McGill University. For a detailed description of courses open to graduate and undergraduates, and of preparation required of McGill University honours students, candidates should consult the Announcement of the Faculties of Arts, Science.

ADMISSION

For an application to be considered, it is essential that applicants submit with their applications the results of the Aptitude Test of the Graduate Record Examination. In addition, applicants who have specialized in Sociology and who wish to be considered for admission directly into the one-year M.A. program or into the Ph.D. program must also submit the results of the Advanced Test in Sociology of the Graduate Record Examinations. Arrangements to take these examinations should be made directly with the Educational Testing Service, Box 955, Princeton, New Jersey 08540, USA.

In addition, each applicant is asked to submit two letters of recommendation and a transcript of his university-level grades along with examples of his/her written work. The deadline for completed applications is March 1.

Candidates who lack sufficient preparation in Sociology, but whose academic record justifies eventual admission to the graduate program, must register for a qualifying year during which they are required to take courses to widen their knowledge of Sociology. These courses are normally those which are open to graduate and undergraduate students. Candidates must achieve at least second class standing in these courses and an average across all courses of at least 75 per cent; in general, they must, in the opinion of the Department, have achieved sufficient preparation in the subject matter of Sociology before they will be allowed to proceed further into graduate work. Courses in statistics, research methods and sociological theory are required of all qualifying candidates.

A number of teaching and research assistantships are available to qualified graduate students. Students who wish to be considered for such assistantships should inform the Graduate Adviser of the Department. In most circumstances, students who accept assistantships may expect to spend longer than the minimum time to complete their degrees.

REQUIREMENTS FOR THE M.A. DEGREE

The program of study is designed to give the candidate an advanced understanding of some major fields of Sociology and to provide him with research experience through the preparation of a short thesis. A minimum of one year of graduate study is required. The program will normally include three courses per term. For some candidates, additional courses may be required if, in the opinion of the Department, the candidate lacks sufficient preparation. A thesis is required of all candidates. In addition, candidates are required to demonstrate a knowledge of some particular area in Sociology by passing an examination in that area.

Further details about the requirements are available and can be obtained from the Graduate Secretary in the Department.

REQUIREMENTS FOR THE Ph.D. DEGREE

A minimum of three years of study is required. The first year of the Ph.D. program is identical with the program for the M.A. degree. Admission to study for the Ph.D. degree is therefore usually granted to students only after they have attained the M.A. degree in Sociology with high standing. They are then permitted to proceed to the Ph.D. degree in two further years of study subject to the examination, language and thesis requirements mentioned below. Only students who are very well prepared can expect to complete the total program in the minimum time.

An applicant who has received a master's degree at a university other than McGill should submit a

copy of his thesis or evidence of equivalent research experience with his application for admission.

Examination Requirements

Candidates must take four examinations. These will include examinations in:

(1) sociological theory, and

(2) three of the special fields of Sociology

One of these special fields can be that on which the candidate was examined in the M.A. program if that examination was passed with distinction.

These examinations must be completed and the student's candidacy for the degree established no later than the end of the third year of graduate study.

Language Requirement

Candidates must demonstrate ability to read French with high proficiency or to read another language which is relevant to the candidate's field of research. The language requirement should be met by the end of the third Ph.D. year.

Thesis Requirement

Candidates are required to submit a thesis on an approved topic. Approval of the topic will usually follow submission of a research proposal. Further details on the requirement and regulations for theses and for the fields in which the Department is prepared to direct research may be obtained from the Graduate Secretary of the Department.

COURSES AND SEMINARS

All three, four and five hundred level courses listed in the Faculty of Arts announcement are open to graduate students as preparation and recommended prerequisites for participation in research seminars. Students must complete a three or four hundred level course or its equivalent in a subject area as a prerequisite for a seminar in that area.

166-503A SEMINAR: THEORETICAL PARADIGMS IN SOCIOLOGY.
Professor Carroll

166-504B SEMINAR: QUANTITATIVE METHODS OF SOCIAL RESEARCH.
Professor Eaton

166-552B SEMINAR: CURRENT SOCIOLOGICAL THEORY.
Professor Krohn

***166-615A SEMINAR: THE SOCIOLOGY OF MEDICINE.**
Professor Solomon

***166-618A SEMINAR: THE SOCIOLOGY OF WORK.**
Professor Westley

***166-620A SEMINAR: SOCIAL MOVEMENTS.**
Professor Von Eschen

166-622B SEMINAR: PROBLEMS IN MASS COMMUNICATIONS.
Professor Theall

166-627A SEMINAR: POLITICAL SOCIOLOGY.
Professor Hamilton

166-631B SEMINAR: CORPORATIONS & SOCIETY.
Professor Ehrensaft

166-640A SEMINAR: QUALITATIVE METHODS OF SOCIAL RESEARCH.
Professor Rains

***166-661B SEMINAR: SOCIOLOGY OF KNOWLEDGE.**
Professor Krohn

166-670A SEMINAR: COMPARATIVE URBANIZATION IN THE THIRD WORLD.
Professor Locher

***166-671A SEMINAR: DEVIANCE & SOCIAL CONTROL.**
Professor Rains

***166-672B SEMINAR: SOCIAL CHANGE.**
Professor Wallerstein

166-680D SEMINAR: APPLIED SOCIOLOGY AND ALTERNATIVE ORGANIZATIONS.
Professors Smith & Westley

166-681D SEMINAR: COLLEGIUM ON SOCIAL MOVEMENTS.
Professors Pinard & Von Eschen

***166-682B SEMINAR: ECONOMIC SOCIOLOGY.**
Professors Krohn & Ehrensaft

***166-683D SEMINAR: WORLD SYSTEM.**
Professors Wallerstein & Ehrensaft

***166-684D SEMINAR: DEVIANCE AND THE LABELING PERSPECTIVE.**
Professors Rains & Spector

166-720A/B READING IN SOCIAL THEORY.
Staff

166-730A/B READING AND RESEARCH.
Staff

***110-671A SEMINAR: DESIGNING EFFECTIVE COMMUNICATION.**
Professor Hillgartner
See English Department for description.

GENERAL INFORMATION

The Faculty of Education offers programs leading to M.A., M.Ed., and D.Ed. degrees. The M.A. degree provides opportunities for suitably qualified teachers to deepen their knowledge and to gain some facility in research in a major area of education. At present the areas in which students may elect to specialize are Educational Administration, Comparative Education, Educational Psychology, Educational Guidance, Physical Education, History and Philosophy of Education. Students complete their degree by presenting a thesis in the area of their specialization.

The structure of the M.Ed. degree is different since its purpose is to enable candidates to gain added competence in a professional field, e.g., in the teaching of a specific school subject or in counselling, administration, special education or reading. The courses leading to M.Ed. degrees in teaching subjects such as mathematics or geography are taken partly in the subject department concerned and partly in the Faculty of Education. There is no formal thesis in the M.Ed. degree programs but students may submit a paper or project-report as part of their work, or, in some cases, they may have a period of internship.

The Faculty has one formal doctoral program. This is a professional degree in Counsellor Education which is intended to enable selected students who have already attained the level of the M.Ed. in Counsellor Education to continue their studies in breadth and depth and to carry out a significant inquiry to be reported as a doctoral thesis.

At present the Faculty of Education does not offer a formal program leading to a Ph.D. However, under the Regulation set out in paragraph 21 of the Calendar of the Faculty of Graduate Studies and Research it is possible for exceptionally well qualified candidates to proceed to the degree of Ph.D. by making direct application to the Dean of the Faculty of Graduate Studies and Research. Such candidates should have a very clear idea at the outset of the area of their prospective research.

Entrance Requirements for M.A. and M.Ed. Degrees

Candidates must normally hold an undergraduate degree from a recognized university, with second class standing in at least one continuation subject, and also a Permanent Quebec Teaching Diploma, or its equivalent, with a second class standing. Exceptionally well-qualified candidates may sometimes be admitted to masters' degrees in certain departments before they have completed the two years of probationary teaching necessary for the Permanent Teaching Diploma. The holders of McGill Honours, or similar degrees in appropriate disciplines such as Philosophy, History or Psychology, may be admitted directly to M.A. programs offered in the educational aspects of the same discipline, but the master's degree awarded to such candidates does not certify them to teach in public schools.

Certain departments have additional entrance requirements. These are noted after the list of courses in the departments concerned.

Length of Study for M.A. and M.Ed. Degrees

Most programs can be completed by full time or half time study or by a mixture of both. A Summer School program is offered but it is not normally possible to complete degrees wholly by summer attendance.

All masters' degrees in the Faculty of Education take two years of full time study, or the equivalent in Summer School and part time work, to complete.

Entrance Requirements for D.Ed. Degree in Counsellor Education

Candidates for the Doctoral program in Counsellor Education must hold the degree of M.Ed. (Counsellor Education) of McGill University, or its equivalent, and have maintained

good second class standing in the degree. In addition applicants for the program must supply personal and educational data, take prescribed tests and engage in an interview procedure. For otherwise acceptable candidates who do not meet the academic requirements, courses of qualifying study may be prescribed.

There is no second language requirement.

Length of Study for D.Ed. Degree in Counsellor Education

A minimum period of two years of full time study, including the summer session between the two academic years, is required to complete the D.Ed. degree.

Fees

Students must register every year and must be registered for the Session in which they graduate. For tuition fees see the General Information and Faculty Regulations Section.

Applications

Applications for admission to the Faculty of Graduate Studies and Research for degrees in Education should be made to the *Director of Graduate Studies, Faculty of Education, McGill University, 3700 McTavish St., Montreal H3A 1Y2, P.Q.* Summer session and Winter session candidates in Counsellor Education and Educational Administration, are required to apply by March 1. Other candidates applying for admission for the first time and wishing to start in the Summer session must apply before April 1, and those interested in commencing studies in the fall must apply by July 3. Applications in some programs will close prior to these deadlines when all places have been filled.

NOTE: Admission to the Faculty of Graduate Studies and Research for graduate programs in Education is made by the Dean of the Graduate Faculty on the basis of undergraduate record and satisfactory professional training. Admission to the appropriate courses is made by the individual departments of the Faculty of Education, and where appropriate, by the departments concerned in other Faculties in consultation with the Faculty of Education.

DEPARTMENT OF COUNSELLOR EDUCATION

Professor – FLORENT DUMONT (Chairman)

M.A. Counsellor Education Required Courses

The following courses are offered by the Department of Educational Psychology.

414-602D THE USE OF STATISTICS IN EDUCATIONAL PROCEDURES.

414-621D THESIS PREPARATION. This course is offered jointly by the Departments of Educational Psychology and Counsellor Education.

The following courses are described in the M.Ed. Counsellor Education program.

412-602A,B PHILOSOPHY OF GUIDANCE. (Half Course).

412-603A,B THEORIES OF PERSONALITY. (Half Course).

412-605A,B INTRODUCTION TO THEORIES IN COUNSELLING. (Half Course).

412-640A,B ADOLESCENT DEVELOPMENT. (Half Course).

412-641A,B PSYCHOLOGICAL TESTING. (Half Course).

Optional Courses

With the approval of the Department, students must elect one half course from the Department of Counsellor Education and one full course from the Faculty of Education or other Faculties of the University.

Additional Entrance Requirements

As for M.Ed. Counsellor Education.

M.Ed. COUNSELLOR EDUCATION

The Department offers three majors: Elementary School Counselling, Secondary School Counselling and Student Personnel Services (College and University). Each applicant must select a major when making application.

Required Courses Common to All Three Majors

412-602A,B PHILOSOPHY OF GUIDANCE. (Half Course). Philosophical foundations of guidance; history, growth, and recent trends of the guidance movement. Orientation to the field in respect to the functions, scope, organization, and administration of counselling services.

412-603A,B THEORIES OF PERSONALITY. (Half Course). Study and comparison of contemporary theories of personality. Emphasis upon theories having significance for counselling and assessment principles. Recent research in personality theory.

412-604A,B DYNAMICS OF GROUP WORK. (Half Course). Study of group organization, with opportunity to develop skills in group leadership. Interpretation of group interaction and typical roles played by members in groups.

412-605A,B INTRODUCTION TO THEORIES IN COUNSELLING. (Half Course). Correlation and interpretation of counselling data and the study of individual cases. Emphasis on the process in counselling, the counselling relationship, and counselling techniques.

412-611A,B INDIVIDUAL TESTING. (Half Course). This course is intended to make the student familiar with the individual tests in common use and to give him some degree of proficiency in their application. Special emphasis will be placed on the Binet and Wechsler scales. There will be opportunities for diagnostic testing under supervision.

414-610A,B EDUCATIONAL MEASUREMENT. (Half Course). See M.A. Educational Psychology.

Required Courses in Elementary School Counselling Major

***412-620A, ADVANCED CHILD PSYCHOLOGY.** (Half Course). Study of the growing person from birth to pre-adolescence with emphasis on the background and methods as well as research on the principles of child development, disturbances in child development, various areas of development, and characteristics of different age levels.

***412-621A,B PSYCHOLOGICAL TESTING IN THE ELEMENTARY SCHOOL.** (Half Course). Group testing in the elementary school, including readiness, reading, diagnostic, intelligence, interest, aptitude, and other tests.

***412-622A,B TRENDS IN ELEMENTARY SCHOOL COUNSELLING.** (Half Course). Social, psychological, educational factors in vocational development of elementary school children. Implications of the elementary curriculum for career planning and decision making. Functions, relationships, organization, and administration of guidance in elementary education.

***412-623A,B INTRODUCTION: THE EXCEPTIONAL CHILD.** (Half Course). Nature, identification, cause, and treatment of children's disabilities and their influence on emotional, social, educational, and vocational adjustment. Special services required for exceptional children to develop to their maximum capacities.

***412-625A PRACTICUM IN ELEMENTARY SCHOOL COUNSELLING.** Practices in counselling Adapting to counselling sessions person to person, educational, occupational, and social relationships. Practice with individual cases.

412-626B PRACTICUM IN ELEMENTARY SCHOOL COUNSELLING. (See 412-625A for description).

412-639D INTERNSHIP IN ELEMENTARY SCHOOL COUNSELLING. (One Full Year). Study, observation, and practice at respective levels in selected settings; integration of theory and practice through Faculty supervision of experience, group seminar, and individual conferences.

Required Courses in Secondary School Counselling Major

412-604A,B ADOLESCENT DEVELOPMENT. (Half Course). Normal development of adolescents through young adulthood. Problems and concerns of adolescence which occur with physical, social and personal development, in the context of family and school adjustment.

***412-641A,B PSYCHOLOGICAL TESTING.** (Half Course). Theory and application of group tests appropriate for adolescents and adults. Specific instruments; intelligence, aptitude, interest and personality, analyzed in terms of basic concepts, reliability, validity, and practical utilization.

412-642A,B INFORMATION SERVICES IN THE SECONDARY SCHOOL. (Half Course). Procedures and systems of utilizing and communicating social, educational, and occupational information and materials. Structure of occupations; theories of vocational development.

412-663A,B ORGANIZATION AND ADMINISTRATION OF SCHOOL PERSONNEL SERVICES. (Half Course). The functions, relationships, organization, and administration of guidance services in the secondary school and student personnel services.

***412-645A PRACTICUM IN SECONDARY SCHOOL COUNSELLING.** (See course description for 412-625/626).

412-646B PRACTICUM IN SECONDARY SCHOOL COUNSELLING. (See above).

412-659D INTERNSHIP IN SECONDARY SCHOOL COUNSELLING. (One Full Year). See course description for 412-639D in the Elementary School Counselling Major.

Required Courses in Student Personnel Services Major

412-640A,B ADOLESCENT DEVELOPMENT. (Half Course). See course description in Secondary School Counselling Major.

***412-641A,B. PSYCHOLOGICAL TESTING.** (Half Course). See course description in Secondary School Counselling Major.

412-662A,B INFORMATION SERVICES IN STUDENT PERSONNEL WORK. (Half Course). See course description for 412-642A,B in the Secondary School Counselling Major.

412-663A,B ORGANIZATION AND ADMINISTRATION OF SCHOOL PERSONNEL SERVICES. (Half Course). See course description in Secondary School Counselling Major.

412-665A PRACTICUM IN STUDENT PERSONNEL COUNSELLING. (See course description for 412-625/626).

412-666B PRACTICUM IN STUDENT PERSONNEL COUNSELLING. (See above).

412-679D INTERNSHIP IN STUDENT PERSONNEL COUNSELLING. (One Full Year). See course description for 412-639D in the Elementary School Counselling Major.

NOTE: The program more than meets the requirements for admission to membership of the Professional Corporation of Guidance Counsellors of Quebec.

Additional Entrance Requirements

1) Normally, the first step is to secure an interview with the Chairman of the Department. This may be waived for prospective students residing at a great distance from the University.
2) Additional forms must be filed for admission to the Department.
3) Each student is required to take a battery of standardized tests.
4) The Miller's Analogies Test.
5) The Graduate Record Examination (Verbal and Quantitative elements). This requirement may be waived for certain applicants. The Department Chairman will inform applicants further during their interviews.

D.Ed. COUNSELLOR EDUCATION

The Department offers three majors: Elementary School Counselling, Secondary School Counselling and Student Personnel Counselling (College and University). Each applicant must select a major when making application.

The offerings in the doctoral program consist of courses in three areas: Foundations of Education, Related Disciplines, and Counselling Psychology.

Foundations of Education

Each candidate, in consultation with the Department, will select a minimum of two courses from the following:

†**411-462D DEVELOPMENT AND ADMINISTRATION OF THE SCHOOL CURRICULUM.**

† **413-617D HISTORICAL FOUNDATIONS OF CONTEMPORARY EDUCATION.**

† **413-627D PHILOSOPHIC ANALYSIS OF THE PROBLEMS OF EDUCATION.**

† **414-635D STUDIES IN EDUCATIONAL PSYCHOLOGY: LEARNING AND INTELLIGENCE.**

†Descriptions for these courses may be found in the programs of the appropriate Departments.

Related Disciplines

Each candidate, in consultation with the Department, will select one or more full courses from offerings in related disciplines available in the University.

Counselling Psychology

All candidates will take the following courses:

***412-620A,B ADVANCED CHILD PSYCHOLOGY.** (Half Course). Study of the growing person from birth to pre-adolescence with emphasis on the background and methods as well as research on the principles of child development, disturbances in child development, various areas of development, and characteristics of different age levels.

412-709D ADVANCED THEORY: COUNSELLING MODELS AND SYSTEMS AND SMALL GROUP COUNSELLING. Advanced study of the counselling relationship and process with comparison between the contemporary models and systems. Emphasis on the phenomenological behavioural and analytic models; research findings relative to these models and implications for counselling practice. Applicability of these models to small group counselling, including methods and problems of groups in counselling; research studies and analysis of small group interaction.

***412-710A,B THE DISORGANIZED PERSONALITY.** (Half Course). Nature of disorganized behaviour and the adjustment process; adjustment and learning; variety of adjustment reactions; major adjustment mechanisms; the effect of unconscious psychological processes upon behaviour; consideration of the implications for counselling.

412-711D ADVANCED METHODS OF EDUCATIONAL STUDY AND RESEARCH DESIGN. Statistical methods as applied to educational data and problems are systematically studied, including topics such as: correlation and regression, analysis of variance, and other tests of significance including selected non-parametric techniques. Training is given in identifying research problems and organizing useful means for research, and interpreting and reporting observed phenomena.

Required Courses in Elementary School Counselling Major

***412-717D SEMINAR: INDIVIDUAL ANALYSIS AND PROGRAMS FOR EXCEPTIONALITY.** Advanced study of diagnostic instruments, with emphasis upon the analysis, interpretation, and integration of all pertinent data; use of projectives, especially in play activities; implications for learning and adjustment problems of the elementary school child.

Identification and needs of exceptionality; special emphasis on programs that have been developed from the education of the exceptional child; study of relevant research dealing with the physical, mental, emotional, and social traits of all types of exceptional children.

***412-787D SEMINAR: RESEARCH PROBLEMS IN ELEMENTARY SCHOOL COUNSELLING.** The seminar will consist of supervised study of selected topics for the particular option selected. These will be reported on in the seminar and their implications for research discussed. Current research and professional problems in counselling common to all levels will be covered with emphasis on recent literature. Some of these problems are:

unified philosophy of the field, ethics of the profession, and legal responsibilities.

412-797D SUPERVISED FIELD WORK IN ELEMENTARY COUNSELLING. (One Full Year). Study, observation, and practice at respective levels in selected settings; integration of theory and practice through supervision of experience, group seminar and individual conferences.

***412-720D SEMINAR: CAREER DEVELOPMENT THEORY, PHILOSOPHY AND ORGANIZATION OF EDUCATIONAL PERSONNEL SERVICES.** Contributions of contemporary career theories to the understanding of the processes and the determinants of career choice and adjustment; life stages and career patterns in personal and vocational development; study of selected problems, designs and outcomes of research in career development.

Analysis of the inter-related functions of all types of specialized student personnel workers with particular reference to their role in the total educational program, such as: admission practices, social systems, provision for advisement and counselling, student activities and self-government, administration of financial aid, faculty-student relations, and the principles governing the scope of such services and adapting them to educational institutions of various sizes and levels.

***412-789D SEMINAR: RESEARCH PROBLEMS IN SECONDARY SCHOOL COUNSELLING.** See course description for 412-787D in the Elementary School Counselling Major.

412-796D SUPERVISED FIELD WORK IN SECONDARY SCHOOL COUNSELLING. (One Full Year). See course description for 412-797D in the Elementary School Counselling Major.

Required Courses in Student Personnel Counselling Major

***412-720D SEMINAR: CAREER DEVELOPMENT THEORY, PHILOSOPHY AND ORGANIZATION OF EDUCATIONAL PERSONNEL SERVICES.** See course description in Secondary School Counselling Major.

***412-788D SEMINAR: RESEARCH PROBLEMS IN STUDENT PERSONNEL SERVICES.** See course description for 412-787D in the Elementary School Counselling Major.

412-798D SUPERVISED FIELD WORK IN STUDENT PERSONNEL SERVICES. (One Full Year). See course description for 412-797D in the Elementary School Counselling Major.

Candidates having special interests and needs not met by other available courses may register for the following:

412-770D INDIVIDUAL READING. Candidates may, with the consent of the Department, elect this individual reading and conference course in lieu of one of the above courses.

All students must register for and complete the following:

412-701D COMPREHENSIVE EXAMINATION. THESIS. The thesis must display original scholarship expressed in satisfactory literary form and be a distinct contribution to knowledge.

DEPARTMENT OF EDUCATION IN ENGLISH

Professor – J.M. O'HARA (Chairman)

M.Ed. TEACHING OF READING

Professor – F.P. GREENE *(Program Director);* R.A. EARLE, *(Associate Program Director)*

Required Courses in Reading

427-665D ADVANCED STUDY OF READING INSTRUCTION. Principles, approaches, techniques and materials for teaching reading in the Elementary and Secondary School within the context of total language development; stimulation of desirable reading habits and tastes, provision for individual differences, evaluation and reporting of pupil progress; observation of effective practices in schools.

427-666D AND 427-667D. DIAGNOSIS AND TREATMENT OF READING DISABILITY. (Two related and sequential full courses which cannot be taken separately.) Causes, diagnosis and treatment of reading disability including neurological, physiological, psychological and social factors; use of diagnosis instruments, construction of informal diagnosis measures; observation of diagnosis and treatment in schools, clinics and hospitals; supervised individual case studies including diagnosis and treatment.

***427-668A,B INSTRUCTION FOR PUPILS LEARNING ENGLISH AS A SECOND LANGUAGE.** (Half Course). The general body of knowledge common to all second language teaching and learning; modern English structure in a second language perspective based on applied linguistics; teaching techniques and media.

NOTE: A practicum is an integral part of this course.

427-669A,B SUPERVISION OF THE TEACHING OF READING. (Half Course). Problems of organization, administration, supervision and curriculum development in reading with particular emphasis on non-graded patterns of instruction and on provision for individual differences in rates and levels of achievement; the evaluation of instructional materials and equipment; the organization of workshops and in-service training.

427-670D SPECIAL PAPER ON THE TEACHING OF READING. Selection and exploration of a specific aspect of the teaching of reading, under

the guidance of a faculty adviser; scholarly presentations of a survey and critique of the literature, and of conclusions arrived at by an original treatment.

***427-671D PRACTICUM IN READING.** Instruction of groups and individuals at various levels and various rates or learning; conferences and the preparation of case studies.

Options

The equivalent of two full graduate courses approved by the student's adviser. These must include either 414-610A,B EDUCATIONAL MEASUREMENT (Half Course) and 414-645A,B DIAGNOSIS AND ASSESSMENT OF LEARNING PROBLEMS (Half Course) or 414-602D THE USE OF STATISTICS IN EDUCATIONAL PROCEDURES (Full Course). The remaining courses are to be selected with the approval of the Department.

Additional Entrance Requirements

1) The candidate must demonstrate familarity with the procedures commonly used in the teaching of reading. This requirement will normally be met by possessing a Reading Diploma from McGill or its equivalent. Before applying, interested persons are strongly encouraged to meet one of the staff to talk over the program. Call 392-8888 for an appointment or write the Reading Centre.

2) The candidate's undergraduate record must show a suitable concentration in English, Psychology, or Education. Work record must show appropriate experiences of both regular classroom and reading or other special settings.

3) Four letters of recommendation are required: two from past university level instructors; one from an education supervisor; one from the candidate indicating knowledge of the program, personal goals and any additional information which might be helpful to the decision committees.

4) Applications will close each spring as space in the program is filled.

DEPARTMENT OF EDUCATIONAL ADMINISTRATION

Professor – RONALD H. TALI (Chairman)

M.Ed. EDUCATIONAL ADMINISTRATION

Professor – G.B. ISHERWOOD *(Program Director)*

Required Courses

411-612D PRINCIPLES OF EDUCATIONAL ADMINISTRATION. This introductory course deals with the following topics: administration as a field of study, organizations, administrative behaviour, personnel administration, communications. *First Course.*

414-610A,B EDUCATIONAL MEASUREMENT. (Half Course). See M.Ed. Special Education.

411-621D THESIS PREPARATION. Seminars for the thesis to include the definition of a problem, research design, methodology and the supervision of the thisis. Successful presentation of the thesis completes the requirements for this course. Pre-requisites: 411-623D, 411-612D, 414-610A,B.

411-623D THEORY AND RESEARCH IN EDUCATIONAL ADMINISTRATION. The contribution of recent research findings particularly in sociology and social psychology to an understanding of organizational structure leadership, decision making and motivation in the administration of schools and school systems. Prerequisite 411-612D Co-requisite 414-610A,B.

either

411-655A,B CASE STUDIES IN ELEMENTARY SCHOOL ADMINISTRATION. (Half Course). The interpretation and discussion of Case Studies relevant to the elementary scene in Quebec through the use of role playing discussion, video-taping and simulation exercises. *(Last Course).*

or

411-656A,B CASE STUDIES IN SECONDARY SCHOOL ADMINISTRATION. (Half Course). The interpretation and discussion of Case Studies relevant to the secondary scene in Quebec through the use of role playing discussion, video-taping and simulation exercises. *(Last Course).*

Options

One and one half courses approved by the student's Adviser.

Additional Entrance Requirements

1) Minimum of three years of teaching experience.

2) Statements of academic experience, professional teacher training, teaching experience and future career plans.

3) Two letters of recommendation from administrative superiors attesting to the candidate's potential as an administrator should be forwarded directly to the Chairman, Department of Educational Administration.

M. Ed. EDUCATIONAL ADMINISTRATION

Professor – R.H. TALI *(Program Director)*

Required Courses

411-612D PRINCIPLES OF EDUCATIONAL ADMINISTRATION. See M.A. Educational Administration. *First Course.*

414-610A,B EDUCATIONAL MEASUREMENT. (Half Course). See M.Ed. Special Education.

either

411-655A,B CASE STUDIES IN ELEMENTARY ADMINISTRATION. See M.A. Educational Administration. *Last Course.*

or

411-656A,B CASE STUDIES IN SECONDARY ADMINISTRATION. See M.A. Educational Administration. *Last Course.*

Options in Educational Administration

The equivalent of six additional full courses must be taken. At least four of these from the following:

411-623D THEORY AND RESEARCH IN EDUCATIONAL ADMINISTRATION. See M.A. Educational Administration.

411-630A,B ADMINISTRATION OF EDUCATION IN QUEBEC. (Half Course). Consideration of the system of education in Quebec. The focus will be, first, on the basic legal framework of education in Quebec and the principal legal documents, and second, on the educational system in interaction with other social systems and with society as a whole.

***411-631D ADMINISTRATION OF EDUCATION IN CANADA.** This course is intended to provide an overview of the structures of education, federally and provincially. Organization, legislation, and provincial commission reports are studied. Comparisons and contrasts between provincial educational programs are considered, with particular emphasis on education in the Province of Quebec.

***411-632D SCHOOL FINANCE AND THE ECONOMICS OF EDUCATION.** (A foundation course in revenue income for education in Canada, in general and in the Province of Quebec specifically, as it relates to the ongoing process of budget and school management.

411-635A,B FISCAL ACCOUNTABILITY FOR THE SCHOOLS. (Half Course). Consideration of the schools' responsibility to the public in maintaining high quality education within the limitations of accountability and organizational framework. Budgeting and evaluation of pupil progress will be studied as the measures of the schools' fulfilment of responsibility.

***411-642D DEVELOPMENT AND ADMINISTRATION OF THE SCHOOL CURRICULUM.** This course deals with the development of the school curriculum at various age levels and in different settings with the organization of the school and the classroom to implement curricular plans. A study will be made of a variety of organizational schemes and of their development and implementation.

411-645A,B PRACTICUM IN THE SUPERVISION OF INSTRUCTION. (Half Course). Investigation of past and current theory and research dealing with supervision. Leadership and evaluation as roles of supervision will be analyzed in the school setting, with emphasis placed on supervision as the improvement of instruction and learning. Practical experience will include supervision of student teaching.

411-646A,B EDUCATIONAL PLANNING AND MANAGEMENT. (Half Course). An introduction to the theories, techniques, computational methods and evaluation criteria relevant to the design, development and operation of education systems, at the school and school district levels will be examined and related to educational practices, and traditions.

411-647A,B RESOURCE UTILIZATION IN EDUCATION SYSTEMS. (Half Course). An introduction to planning - programming - budgeting systems in education. The historical development, theoretical foundations, mechanics, potentialities and limitations of this approach to resource utilization analysis and planning will be discussed with particular reference to those aspects of alternative approaches employed in a proposal for educational systems.

***411-660A,B COMMUNITY RELATIONS IN EDUCATION.** (Half Course). The basic objectives of this course include: The development of school-community analytical skills based upon relevant sociological and political concepts and techniques; the development of skill in establishing and maintaining effective methods of school-community liaison.

411-661A,B POLITICS OF EDUCATIONAL DECISION MAKING. (Half Course). A study of the nature of political and social constraints within which school systems operate at the local, provincial and federal levels. The contributions of such basic social sciences as political science, political sociology and social psychology will be considered.

***411-662A,B POLICY-MAKING IN EDUCATION AT THE PROVINCIAL LEVEL.** (Half Course). The process and sources of influence involved in the development and implementation of educational policies at the level of the Provincial Government.

411-663A,B POLICY-MAKING IN EDUCATION AT THE LOCAL LEVEL. (Half Course). The process and sources of influence involved in the development and implementation of educational policies within the local school district.

***411-664A,B RESEARCH SEMINAR ON THE POLITICS OF EDUCATION.** (Half Course). Seminar on theory and research relevant to the study of the political aspects of educational systems.

411-671A,B THE PRINCIPALSHIP. (Half Course). A study of the principalship from the perspective of role theory. Analysis of theoretical positions and the findings of recent research into

the work of a school principal in terms of role conflict. Both theoretical statements and recent research related to the principalship will be considered.

411-673A,B LEADERSHIP THEORY AND EDUCATIONAL ORGANIZATIONS. (Half Course). A study of past and contemporary notions of leadership. The role of the leader in organizations staffed with professionals. The relationship between leadership and personnel and organizational concepts.

411-674A,B ORGANIZATION THEORY AND EDUCATION. (Half Course). A study of contemporary organization theory and the school as an organization. The interplay between structural concepts such as authority, hierarchy and centralization will be considered along with human behavior in organizations.

411-681A,B PRACTICUM IN THE ADMINISTRATION OF INSTRUCTION I. (Half Course). A directed analysis of the administrative experience. On-the-job field studies will be developed and interpreted. Departmental consultation and evaluation will be provided on an individual basis and will focus on specific field experience.

411-682A,B PRACTICUM IN THE ADMINISTRATION OF INSTRUCTION II. (Half Course). Directed implementation of planned change in an educational organization including observation and evaluation of the effects of change. This experience may be provided on the job, or through simulation or games techniques. Departmental consultation will be provided on an individual basis.

***411-683 PRACTICUM IN THE ADMINISTRATION OF INSTRUCTION III.** (Half Course). Planned observation of a specific aspect of administration in a school setting. Practices observed will be examined for their implication of educational systems and for their feasibility in the students' own situation.

Options in Other Departments

Courses taken outside the Department of Educational Administration must support the candidate's program and have the approval of the program director.

Additional Entrance Requirements.

See M.A. Educational Administration.

DEPARTMENT OF EDUCATIONAL PSYCHOLOGY AND SOCIOLOGY

Professor – HOWARD STUTT (Chairman)

M.A. EDUCATIONAL PSYCHOLOGY

Professor – R. EDWARDS *(Program Director)*

Required Courses

414-602D THE USES OF STATISTICS IN EDUCATIONAL PROCEDURES. Tests of differences and relations, analysis of variance, univariate regression, covariance, goodness of fit, scaling and redistribution of scores. Use of calculators and computers. Specific attention to research interpretation, nonparametric techniques, assigning appropriate statistical models.

NOTE: (1) Prerequisite course: 414-610A,B EDUCATIONAL MEASUREMENT (Half Course), which may not be taken concurrently. Students who have not completed 414-610A,B or its equivalent are advised to complete this prerequisite in the session immediately preceding the session in which they register for 414-602D.

(2) Students also registering for 414-621D Seminars are advised to do so concurrently with 414-602D.

(3) 414-602D will normally only be offered during the winter sessions.

414-615D STUDIES IN EDUCATIONAL PSYCHOLOGY: CHILD DEVELOPMENT AND PERSONALITY. An analysis of the theoretical and research literature in child and adolescent development with particular attention to the major theories of personality. Applications to teaching and other aspects of education.

414-621D THESIS PREPARATION. Seminars on procedures of research and experimental design dealing with the identification of research problems, the collection of data and the analysis and reporting of results. Supervision of the thesis. Successful presentation of the thesis completes the requirements for this course. It is recommended that students attend the seminars concurrently with 414-602D.

414-635D STUDIES IN EDUCATIONAL PSYCHOLOGY: LEARNING AND INTELLIGENCE. The learning section of this course includes an examination of current conceptualizations of learning with emphasis on those from which applications have been made to the educational process. The second section of the course deals with theories of intelligence and intellectual processes. Normally, a student admitted to this course will have completed 414-602D, or its equivalent. Full time students may, with the written consent of the instructors of both 414-602D and 414-635D, take these courses concurrently during the winter sessions.

414-655D RECENT DEVELOPMENTS IN COGNITIVE PSYCHOLOGY. A study of recent developments in cognitive psychology, this course of lectures and seminars will trace the development of the ideas of Plaget, Bruner, Osgood, Ausubel, Berlyne and others who have influenced recent work in this area. Other models of cognitive functioning will also be examined, and attempts made to relate these to theories of intellectual development. Normally, a student who is admitted

to this course will have completed 414-635D, or its equivalent.

Option

MINIMUM OF ONE FULL COURSE.

With the approval of the Department a minimum of one full course must be chosen from 414-603D — Reading Course, 414-614D — Sociology of Education, from graduate level courses in Education or from courses offered by other Departments of the University.

414-614D SOCIOLOGY OF EDUCATION. Specific topics in this course differ somewhat from year to year but in general they deal with education in relation to society as a whole, educational organizations related to each other, the socialization process and the place of education in that process, and the social psychology of learning.

Additional Entrance Requirements

1) Statements of academic experience, professional teacher training, teaching experience and future career plans.

2) An introductory half course in statistics should form part of the undergraduate program of the prospective candidate. Students accepted who have not taken such a course will be required to take 414-610A,B Educational Measurement, or an acceptable substitute. See M.Ed. Special Education for course description of 414-610A,B.

M.Ed. SPECIAL EDUCATION

Professor — D. SOKOLYK *(Program Director)*

The program will include a minimum of six full courses followed by an internship. The requirements of the internship will in most cases be satisfied through an assignment to a Special Education position in a local school.

Students will usually include in their program the Special Education courses listed below. However, students with special qualifications or interests may with the approval of the Department concerned substitute other graduate level courses offered by the Faculty of Education or by other faculties of the University.

Special Education Courses

414-642A/414-643B EDUCATION OF EXCEPTIONAL CHILDREN. (Half Courses). Two related and sequential half courses. Introduction to programs and problems of educating handicapped or gifted children.

414-645A,B DIAGNOSIS AND ASSESSMENT OF LEARNING PROBLEMS. (Half Course). Principles and procedures in the education of pupil growth and achievement and in the diagnosis of the causes of poor achievement. Emphasis will be given to the use and interpretation of tests to be given by the class teacher. Reference will be made to the use by the teacher of tests given outside the classroom by guidance counsellors or psychologists.

414-646A,B PRACTICUM: DIAGNOSIS AND ASSESSMENT OF LEARNING PROBLEMS. (Half Course). Practice in the administration and interpretation of individual and group tests; use of other-than-teacher test results; collection and use of other pertinent data.

414-653A,B INDIVIDUALIZED CURRICULA AND SPECIAL TEACHING METHODOLOGY. (Half Course). Methodology and curricula for pupils of different types of exceptionality and at different stages of development; materials, activities, records, grading.

414-654A,B PRACTICUM: INDIVIDUALIZED CURRICULA AND SPECIAL TEACHING METHODOLOGY. (Half Course). An opportunity will be given to develop individual teaching programs for selected exceptional children. Practice will be given in the use of specialized teaching techniques.

†**414-656D CLINIC: REMEDIATION OF SELECTED LEARNING DIFFICULTIES.** Participation as a special education teacher in an interdisciplinary team; planning and carrying out of remedial programs for individual pupils; working with parents of children with learning difficulties.

414-661A,B INTERNSHIP I. (Half Course). Analysis and practice in teaching skills or an equivalent supervised experience.

414-662A,B INTERNSHIP II. (Half Course). The student will be supervised while practising as a special educator.

414-663A,B INTERNSHIP III. (Half Course). A workshop seminar dealing with models of teaching and curriculum content in specific subject areas.

414-664A,B INTERNSHIP IV. (Half Course). A supervised practicum with the student functioning in a leadership role or as a consultant in a (summer) learning center or equivalent setting.

†*At present courses 414-656D include participation as a junior staff member in the Learning Centre under the direction of Dr. M.S. Rabinovitch of the Department of Psychology of McGill.*

Additional Admission Requirements

An introductory half course in statistics should form part of the undergraduate program of the prospective candidate. Students accepted who have not taken such a course will be required to take 414-610A,B — Educational Measurement, or an acceptable substitute.

414-610A,B EDUCATIONAL MEASUREMENT. (Half Course). Statistical measurements in education; graphs, charts, frequency distributions, central tendencies, dispersion, correlation, and sampling errors.

NOTE: Prerequisite to 414-602D. THE USES OF STATISTICS IN EDUCATIONAL PROCEDURES. These courses may not be taken concurrently.

DEPARTMENT OF PHYSICAL EDUCATION

Professor – R.E. WILKINSON (Chairman)

M.A. PHYSICAL EDUCATION

Professor – JOHN CHOMAY *(Program Director)*

Required Courses

414-602D THE USE OF STATISTICS IN EDUCATIONAL PROCEDURES. See M.A. Educational Psychology.

434-621D THESIS PREPARATION. Seminars on procedures of research and experimental design dealing with the identification of research problems, the collection of data and the analysis and reporting of results. Supervision of the thesis. Successful presentation of the thesis completes the requirements for this course.

Physical Education Courses

A minimum of one full course from the following:

***434-662D ADVANCED EXERCISE PHYSIOLOGY.†** A comprehensive treatment of the behaviour of physiological processes in response to exercise. Emphasis is given in such areas as: nature of muscular activity, regulation during exercise, effects of physical training, genetic, nongenetic and environmental factors limiting the individual's adaptive value. A laboratory program is designed to familiarize the student with methods and problems of ergophysiological research.

†Offered in conjunction with the Faculty of Medicine.

***434-603D ADVANCED KINESIOLOGY.** Mechanics of human movement and their analysis in terms of the contribution of skeletal, nervous and muscular systems. Analysis is done primarily through cinemaphotographic and electromyographic techniques.

***434-664D PSYCHOLOGY OF MOTOR PERFORMANCE.** Study of the application and analysis of psychological principles and theories to motor learning and performance. Emphasis on selected aspects such as individual differences, transfer, interference, stress, reminiscence and factors affecting motor performance.

Optional Courses

TWO FULL COURSES.

Two additional courses, as approved by the Department, may be chosen from the Physical Education options above, from graduate level courses in the Faculty of Education, or from other faculties of the University.

Additional Admission Requirements

An undergraduate degree with a major in Physical Education, or its equivalent, from a recognized university.

DEPARTMENT OF SOCIAL FOUNDATIONS OF EDUCATION

Professor – J.K. JOBLING (Chairman)

M.A. DEGREES

The Department offers Master of Arts degrees in three areas: Comparative Education (Dr. J.P. LIPKIN *Program Director*), History of Education (Dr. J.K. JOBLING, *Program Director*), and Philosophy of Education (Dr. N.G. COCCALIS, *Program Director*). The appropriate courses will be chosen in consultation with the Chairman of the Department.

Special Entrance Requirements

1) Normally, students should have an Honours standing or a similar standing in an appropriate academic field.

2) Well qualified students may be admitted to the program without teaching experience.

Program Requirements

Students are required to complete five full courses, one of which must be 413-621D – Thesis Preparation, and a thesis. In addition to Department courses listed below, students may, with Departmental approval, elect courses from other departments of the Faculty of Education or from other faculties of the University. Normally only one Reading Course may be taken.

413-603D READING COURSE.

***413-610D SOCIAL FOUNDATIONS OF EDUCATION.** An examination of education and society through the eyes of educational historians, educational philosophers, educational sociologists, and comparative educators. Particular attention will be devoted to persistent educational problems at home and abroad.

***413-615D SELECTED ISSUES IN CONTEMPORARY EDUCATION.** In-depth analysis of a limited number of issues and problems in education. Three to five contemporary problems will be selected and a variety of approaches used. The following are some examples of issues that may be selected: education and the future; moral education; teacher education; foundations of curriculum.

***413-616A,B READING COURSE.** (Half Course).

***413-617D HISTORICAL FOUNDATIONS OF CONTEMPORARY EDUCATION.** A study of contemporary issues in education against an historical background. Some of the questions treated in depth will be the changing relations of church and state in education; the problems of

mass education; the evolving concept of the university; the impact of the "second industrial revolution" on the school.

413-620D STUDIES IN COMPARATIVE EDUCATION. This course seeks to inform the student of contemporary educational developments in selected modern countries and in developing areas, and to familiarize him with some of the techniques and methods used in comparing different systems of education.

413-621D THESIS PREPARATION. Seminars on research procedures, location and extraction of data and presentation of findings. Supervision of the thesis. Successful presentation of the thesis completes the requirements for this course.

***413-627D PHILOSOPHICAL ANALYSIS AND THE PROBLEMS OF EDUCATION.** An examination of philosophical methods such as logical analysis, linguistic analysis and phenomenology, together with an exploration of their function in the clarification of educational issues.

***413-637D DEVELOPMENT OF EDUCATION IN CANADA.** A cultural treatment of education in Canada from its beginnings to the present.

***413-640D COMPARATIVE STUDIES IN EDUCATION IN WESTERN EUROPE.** The course treats in depth contemporary education in France and Germany in relation to the social forces impinging on it from 1800 to the present.

413-641D COMPARATIVE STUDY OF EDUCATION IN DEVELOPING NATIONS. An analysis of education in selected Asian, African and Latin-American nations with special emphasis on the role of education in nation building.

***413-647D HISTORY OF EDUCATION IN FRENCH CANADA.** Consideration of the ideas and institutions relating to education in French Canada from the sixteenth century to the twentieth, with particular attention to the historical antecedents of contemporary problems.

***413-657D LEADING EDUCATIONAL THINKERS.** A study in depth of the ideas of prominent educational thinkers. Selection will be made from among such writers as Plato, Aquinas, Rousseau, Kant, Maritain, Dewey, Whitehead, Russell and McLuhan.

413-667D HISTORY OF EDUCATION IN THE 19TH CENTURY. An analysis of the cultural forces that helped shape education in the century of Darwin, Marx, and Freud. Attention will be given to the impact of nationalism, colonialism, and industrialism on educational development.

413-677D ADVANCED PHILOSOPHY OF EDUCATION. An inquiry into significant philosophic questions such as the nature of educational theory, ways of knowing, justification of judgments in education, the relations of science, philosophy and religion in education.

M.Ed. DEGREES IN TEACHING SUBJECTS

(in the appropriate departments)

The program normally takes two years, one of which is usually of full time study, but arrangements can sometimes be made for half time study. At present only degrees in teaching of Chemistry, Biology, French as a Second Language, Geography, History and Physics are offered by part time study in their entirety. Others will be offered for 1975 but arrangements have not yet been completed. Inquiries for degrees in teaching subjects should be made to the Director of Graduate Studies in Education.

Program Requirements

1) *First Year* – Individually prescribed program in the teaching subject. This will be taken under the direction of the appropriate department.

2) Second Year – (a) Tutorial or seminar courses, in the teaching of the subject. These are under the direction of the Faculty of Education or are given jointly by the Faculty of Education and the department concerned. (b) The submission of a paper or project report on the teaching of the subject.

Additional Entrance Requirements

1) Recommendation for teaching ability.

2) For the M.Ed. degree in Teaching French, at least one introductory course in linguistics should have been completed. An interview is required with representatives of the Departments of Education in Second Languages and French Language and Literature.

1.3 FACULTY

Emeritus Professor

FRANK R. SCOTT, C.C., Q.C., B.A.(Bishop's and Oxon.), B.Litt.(Oxon.), B.C.L. (McG.) F.R.S.C., LL.D (Dalhousie, Man. Queen's, U.B.C., Sask., Osgoode, McG., Laval), D.C.L.(Bishop's, Windsor), D.Litt. (Sir G. Wms. and Tor.) D-es-Jur.(Montr.) **Emeritus Professor**

Professors

JOHN E.C. BRIERLEY, B.A.(Bishop's), B.C.L.(McG.), Docteur de l'Université de Paris (Droit)

YVES CARON, B.A. LL.L.(Montr.), LL.M.(Col.), D.Phil.(Oxon.)

MAXWELL COHEN, Q.C., B.A., LL.B.(Man.), LL.M.(Northwestern), LL.D.(U.N.B., Man., York), D.C.L.(Bishop's)
Macdonald Professor of Law

PAUL-A. CRÉPEAU, Q.C., B.A. L.Ph.(Ott.), LL.L.(Montr.), B.C.L.(Oxon.), Docteur de l'Université de Paris (Droit), LL.D.(Ott.)
Wainwright Senior Fellow

JOHN W. DURNFORD, B.A. B.C.L.(McG.)

PERRY MEYER, Q.C., B.A., B.C.L.(McG.)

IVAN A. VLASIC, B.C.L.(Zag.), LL.M.(McG.), LL.M., J.S.D.(Yale)

DONOVAN W.M. WATERS, B.A., B.C.L., M.A. (Oxon.), Ph.D.(Lond.)
Gale Professor of Law

Associate Professors

MARTIN BRADLEY, LL.B.(Mel.), LL.M.(McG.)

DAVID CAYNE, B.A., B.C.L.(McG.), LL.M. (U. of Cal.)

IRWIN COTLER, B.A., B.C.L.(McG.), LL.M.(Yale)

RICHARD ALAN FIELD, LL.B.(Hons.)(Bristol), LL.M.(L.S.Ec.)

WILLIAM F. FOSTER, LL.B.(Hons.) (Auck.), LL.M.(U.B.C.)

H.PATRICK GLENN,B.A.(U.B.C.),LL.B.(Queen's), LL.M.(Harv.), Docteur en droit (Strasbourg) (Strasbourg)

JANE M. GLENN, B.A., LL.B.(Queen's), Docteur de l'Université de Strasbourg(Droit)

ETHEL GROFFIER ATALA, Docteur de l'Université Libre de Brux., D.C.L.(McG.)

PETER M. JACOBSON, B.A., LL.B.(Hons.) (Sydney), LL.M.(Penn.)

STEPHEN A. SCOTT, B.A., B.C.L.(McG.), D.Phil. (Oxon.)

RONALD B. SKLAR, B.S.(N.Y.U.), LL.B. (Brooklyn), LL.M.(Northwestern), LL.M.(Yale)

PHILIP SLAYTON, B.A.(Hons.)(Man.), B.A., B.C.L., M.A.(Oxon.)

Assistant Professors

DAVID PHILLIP JONES, B.A.(Hons.)(McG.), B.A. (Hons. Juris), B.C.L.(Oxon.)

FRANCINE VALLEE-OULLET, B.A. LL.L. (Montr.), B.C.L.(Oxon.)

ELIAHU MARGALIOTH, M. Jur.(Hebrew), LL.M.(McG.), Diplôme Superieur de Droit Comparé(Strasbourg), Ph.D.(Cantab.)
Visiting Assistant Professor

PETER P.C. HAANAPPEL, B.C.L.(V.U. Adam.), D.E.S.(F.I.E.D.C.), LL.M.(McG.)
Teaching Fellow

Retired Professors in Residence

HERMAN ROBERT HAHLO, Dr. Jur.(Halle), LL.B., LL.D. (Hon.) (Witwatersrand)

JOHN P. HUMPHREY, Q.C., B.Com., B.A., B.C.L., Ph.D.(McG.), Doctor of the U. of Algiers; Doctor Social Sciences (Ott.), LL.D.(Carleton, Dalhousie and St. Thomas)
Retired Gale Professor of Law

Sessional Lecturers

PAUL M. AMOS, B.A.(Sir G. Wms.), B.Sc.(McG.), LL.L.(Laval)

PIERRE BOUDREAULT, B.A.(Brébeuf), LL.L.(Montr.)

ROBERT COUZIN, B.A., M.A.(Chic.), B.C.L.(McG.)

GORDON ECHENBERG, B.A., B.C.L.(McG.)

MORRIS J. FISH, B.A., B.C.L.(McG.)

WILLIAM FRAIBERG, B.A., B.C.L.(McG.)

PAUL V. GADBAN, B.A.(Oxon.)

ANDRE GAUTHIER, B.Sc.Soc.(Ec.), LL.L.(Ott.)

JULIUS GREY, B.A., B.C.L., M.A.(McG.), B.C.L.(Oxon.)

STANLEY HARTT, B.A., M.A., B.C.L.(McG.)

ROY HEENAN, B.A., B.C.L.(McG.)

STANLEY HITZIG, B.Com., L.I.A., C.A.(McG.)

RICHARD B. HOLDEN, Q.C., B.A., B.C.L.(McG.)

DONALD J. JOHNSTON, B.A., B.C.L.(McG.)

JOEL L. KING, B.Sc., B.C.L., LL.B.(McG.)

BLAKE KNOX, B.A.(Bishop's), B.C.L.(McG.)

ALEX S. KONIGSBERG, B.A.(Sir G. Wms.), B.Com., B.C.L.(McG.)

ROBERT KOURI, B.A.(Bishop's), LL.L.(Sherbr.), M.C.L.(McG.)

MALCOLM McLEOD, B.A., B.C.L.(McG.)

MAXWELL MENDELSOHN, B.A.(McG.), LL.L.(Montr.)

DANIEL N. METTARLIN, B.A., B.C.L.(McG.)

DAVID O'BRIEN, B.A.(Loyola), B.C.L.(McG.)

DOUGLAS PASCAL, B.A., B.C.L.(McG.)

MICHEL PROULX, B.A., LL.L.(Laval)

BERNARD REIS, B.A.(McG.), LL.L., Diplôme d'études supérieures en droit public(Montr.)

RICHARD SHADLEY, B.A., B.C.L.(McG.)

PIERRETTE SINCLAIR, B.A., LL.L.(Montr.)

JEROME C. SMYTH, B.A.(Western Ont.), B.C.L.(McG.)

ALAN M. STEIN, B.A. B.C.L.(McG.)

BRUCE VERCHERE, LL.B.(U.B.C.)

MARYLA WATERS, LL.B.(Lond.), J.D.(Chic.)

HARVEY W. YAROSKY, B.A., B.C.L. Ph.D.(McG.)

Honorary Lecturer

CHRISTOPHER GREEN, B.A., M.A.(Conn.), Ph.D.(Wis.) *Legal Problems in Government Control of Business*

INSTITUTE OF AIR AND SPACE LAW

NICOLAS M. MATTE, Q.C., LL.M., LL.D.(Bucharest), D.C.L.(Paris) **Director**

IVAN A. VLASIC, B.C.L.(Zag.), LL.M.(McG.), LL.M., J.S.D.(Yale) **Professor**

MARTIN BRADLEY, LL.B.(Mel.), LL.M.(McG.)
Associate Professor

Part-Time Lecturers

GERALD F. FITZGERALD, M.A., B.C.L. (U.N.B.), Ph.D.(Ott.)

JULIAN G. GAZDIK, Q.C., B.C.L., Dr. Pol.Sc., D.C.L.(Pecs.), M.C.L.(McG.)

DAVID I. JOHNSTON, B.A.(McG.), B.Sc.(Sir G. Wms.), B.C.L., LL.M.(McG.)

MICHEL POURCELET, Docteur en droit(Paris), LL.M.(McG.)

JAMES J. SMITH, B.Com.(Edin.), B.Com.(U.B.C.)

INSTITUTE OF COMPARATIVE LAW

PAUL-A. CRÉPEAU, Q.C., B.A. L.Ph.(Ott.), LL.L.(Montr.), B.C.L.(Oxon.), Docteur de l'Univ. de Paris(Droit), LL.D.(Ott.) **Director**

Teaching Staff

HERMAN ROBERT HAHLO, Dr.Jur.(Halle), LL.B., LL.D. (Hon.) (Witwatersrand)

H. PATRICK GLENN, B.A.(U.B.C.), LL.B. (Queen's), LL.M.(Harv.), Docteur en droit (Strasbourg)

ETHEL GROFFIER ATALA, Docteur de l'Université Libre de Brux., D.C.L.(McG.)
Assistant to the Director

2 GENERAL INFORMATION

2.1 THE FACULTY OF LAW

The Faculty of Law of McGill University is Canada's oldest Law Faculty, and the only English-speaking law faculty in Canada teaching the civil law system. Until 1968, the Faculty's undergraduate program consisted of a three-year program of studies leading to the degree of Bachelor of Civil Law. This degree, while providing a liberal education in legal principles and theory, prepared candidates for admission to only the Quebec legal professions, as advocate or notary.

In 1968, the Faculty inaugurated the National Program. This Program is an integrated program of studies in Canadian Law in which students pursuing either a civil law or common law degree share a wide range of "Canadian" law courses in areas such as constitutional law, public international law, administrative law, commercial law, criminal law, and labour law. All civil law students take at least one basic common law course, such as contracts, torts or property; all common law students take a number of basic civil law courses. Thus each student receives a basic training in the legal system in which he is earning his degree together with a serious introduction to the other. Thus a student may still obtain only a B.C.L. degree; alternatively, he may study for only the LL.B. (common law) degree. This latter program prepares candidates for the Bars of the Common Law Provinces, nearly all of which recognize the McGill LL.B. degree. But a further year of study after the obtaining of either degree leads to the granting of the second degree (B.C.L. & LL.B., LL.B. & B.C.L.). More and more students are now taking advantage of the opportunity to obtain this basic training in both systems.

It is to be noted that the LL.B. degree is conceived essentially as part of a four year National Program leading to the granting of both LL.B. (common law) and B.C.L. (civil law) degrees. While an LL.B. student may receive his LL.B. degree after three years of study, the Faculty expects that generally LL.B. students will proceed to the National Program. The requirements for the LL.B. degree, with their substantial civil law component and the reduced opportunities for undertaking elective courses during the first three years of study, have been structured so as to reflect this aim.

Common law students are required to take as part of their LL.B. degree Obligations I, Civil Property I and II, and choose a further six credits from Civil Law Evidence and Procedure I, Successions, Special Contracts I and II, and a Comparative Law course.

The introduction of the National Program at McGill was made possible by reason of our unique position as Canada's only English-speaking civil law school, and the fact that so much of the subject matter in a common law or civil law curriculum is common to both systems. The Faculty believes that its National Program creates an important link between Quebec and the rest of Canada. We are now training truly "national" lawyers, for which there is a a real need in this country. Our double-degree graduates are experiencing the value of their dual training and the greater role they feel enabled to play as Quebecers and Canadians. These graduates are finding their way into federal government jobs in Ottawa; and, in both Quebec and Ontario practice, they are called upon to relate the law and practices of the two provinces.

For those intending to practice only in Quebec, the National Program is of no less value. Few Quebec practitioners deal only with the private law of Quebec; much law in this province is common to all provinces, and even Quebec private law is touched at many points, especially in commercial practice, by common law doctrines. Moreover, many clients have interests that transcend this Province. Consequently, an understanding of the common law is an asset to the Quebec practitioner.

2.2 DEGREES

B.C.L. and LL.B.

The degrees granted in the Faculty are those of Bachelor of Civil Law (B.C.L.) and Bachelor of Laws(LL.B.).

HIGHER DEGREES

The higher degrees in law are the M.C.L. (Master of Civil Law), the LL.M. (Master of Laws), and the D.C.L. (Doctor of Civil Law). Information concerning these degrees and the Graduate programs relating to them is summarized under the heading "General Regulations Concerning Higher Degrees in Law," (section 6.1.)

2.3 ADMISSION

GENERAL REGULATIONS

Application forms, which can be obtained by writing to the Faculty, must be completed and submitted by February 1st, and be accompanied by an application fee of $15 by certified cheque or money order made payable to McGill University. Although the deadline is February 1st, the faculty may consider applications received as late as March 1st, although preference will be given to those meeting the deadline. Applications for admission should be sent to the Admissions Officer, Faculty of Law, McGill University, 3644 Peel Street, Montreal H3A 1W9. Students already registered at McGill University at the time of application for admission to the Faculty of Law will not be charged the $15 application fee. Late applications will only be considered under exceptional circumstances. Applicants should forward their transcripts, including those for their final year, as soon as possible. Candidates for admission may be required to be interviewed by the Chairman of the Admissions Committee or another member of the Faculty. In all cases admission is at the discretion of the Faculty.

The courses given in every case anticipate at least two hours of directed study for every hour of lecture. In addition, each candidate is obliged to write the essays, to attend the seminars, to participate in the Moot Court and Group Tutorial programs, and to fulfil whatever other requirements may be set by the Faculty. Candidates are expected to devote their whole time to their legal studies and are prohibited from taking other academic studies during the academic session without prior approval of the Dean.

No student is allowed to be enrolled concurrently in the Law School program and a professional training program of any Bar, which program consists of a course of lectures and/or period of articling. Where a student is found to be in breach of this rule, the Dean may require him to withdraw from the School.

Students entering the Law Faculty are expected to have a basic knowledge of Canadian Government as preparation for the study of public law. Those who have not taken a basic course on Canadian Government are strongly advised to read R. MacGregor Dawson, *The Government of Canada*, and James S.R. Mallory, *The Structure of Canadian Government*.

LANGUAGE REQUIREMENTS

Every candidate, whether a candidate for the degree of Bachelor of Civil Law (B.C.L.) or for the degree of Bachelor of Laws (LL.B.) is expected to have substantial fluency in both the French and English languages.

Candidates will be required to read in both languages and examinations may contain extracts in either French or English. One or more French language optional civil law courses are generally offered by the Faculty.

Examinations, term papers and essays may be written either in English or French. Participation in moot courts may also be in either language. Examination questions are set in the language in which a course is given.

One or more basic courses in the civil law in other than the first year program may be given in the French language only.

The attention of candidates intending to proceed to the Bar of Quebec or the Chamber of Notaries is drawn especially to Section 5.1, page 36 of this Faculty of Law Announcement.

2.4 ADMISSION STANDARDS

B.C.L. and LL.B. DEGREES

One of the primary qualifications for admission to either the B.C.L. or the LL.B. program is the attainment with a second class standing of a B.A. or an equivalent degree from a university or college which is recognized by McGill University. Candidates holding a diploma of collegial studies with a high standing from a Quebec General and Vocational College (CEGEP) are also eligible for admission; however, candidates holding only a CEGEP Diploma cannot be admitted directly into the Common Law (LL.B.) program but must commence by taking the Civil Law (B.C.L.) program. In exceptional cases, candidates with lesser academic qualifications may be admitted to the Faculty if they are qualified to pursue with advantage the study of law.

Please refer to section 5 for admission to the legal profession. The attention of candidates holding CEGEP diplomas is drawn to the fact that admission to the Bars of the other Provinces may require additional years of pre-law university education. In particular, the Law Society of Upper Canada requires an additional pre-law university year for those holding CEGEP diplomas.

The Faculty may admit a limited number of suitable persons, no matter what their academic qualifications, to attend selected courses of lectures. Such permission will only be granted to applicants who satisfy the Faculty of their capacity to undertake with advantage the study of law. They will not be allowed to proceed to a degree, but will be entitled to receive a certificate specifying the course or courses which they have successfully pursued and the grade which they have obtained.

NATIONAL PROGRAM

Admission into this program is set forth under the heading "Regulations for the National Program," Section 3.3

2.5 REGISTRATION AND COMMENCEMENT OF CLASSES

Registration in all years of Law is on September 2, 1975. **All students must register in person.**

First year will commence on September 2, other students will start on September 3.

Students registering late will be required to pay a Late Registration Fee and should read carefully the regulation concerning late registration in Section 2.7, paragraph 3.

DEPOSIT

A student whose application for admission has been approved must send a deposit of $100.00 by certified cheque or money order made payable to McGill University within ten days of receiving notification of his acceptance. A student who does not wish to register, will be refunded his deposit if the Admissions Office of the Faculty has received notification of his intention not later than the date specified in the letter of acceptance.

2.6 FEES

Tuition fees are charged at the rate of $19.00 per credit. Student Services and Students' Societies fees will be separately assessed in a manner appropriate to those two functions and must be paid at the same time as the tuition fees. The maximum fee payable by a full-time student is $88. which includes $6 for the McGill Law Journal.

Each student will receive free of charge brief outlines of courses where such are available. Students will be charged $12 for course materials issued by the professor (apart from casebooks, statutes, etc. which will be sold through the McGill Bookstore). $6. will be charged at the September registration and the remaining $6. at the second term registration.

The attention of students is drawn to the fact that they will require books and casebooks for their courses which may cost them $350.00 per year.

Further information concerning admission, entrance requirements, faculties and degrees, fees and residential facilities, is published in the General Announcement, which may be obtained from the Registrar's Office, F. Cyril James Administration Building, P.O. Box 6070, Station A, Montreal H3C 3G1.

COMPULSORY HEALTH INSURANCE FOR NON-CANADIAN STUDENTS

All full-time foreign students (including landed immigrants during their first year at McGill) must take out a Health Insurance policy, which is available on a group basis at the cost of $85.00 per student per year. In general, the policy provides for payment towards hospital, surgical, medical, diagnostic and other medical expenses.

This Faculty Announcement and the Regulations contained herein govern students registered in the Faculty of Law during the 1975-76 academic year. Prospective students are warned that they will be subject to changes made therein before the time of their fall registration. The attention of all students prospective or otherwise is drawn to Regulation 57.

GENERAL REGULATIONS

1. Students entering the University *for the first time* are required to pay their fees either by mail or in person at the Accounting Office.

The first instalment is due within 10 days after registration, the second instalment before January 15, 1976.

2. Students *who have completed one or more years* and intend to register in the succeeding year must pay one half of the total sessional fee by mail or in person to the Accounting Office before August 23, 1975, otherwise they will not be permitted to register. Instructions for paying fees in advance will be mailed to non-first year students. Students who have been notified by the University of the award of a scholarship, bursary or student loan, and who require this for payment of the first instalment of fees, must obtain from the Student Aid Officer, McGill University, a Permit to Delay Payment of Fees.

3. Students registering late must pay their fees at the time of registration, failing which they become subject to the late payment fee and the provisions of the following paragraph:

As soon as possible after the prescribed dates for the payment of fees the Chief Accountant will send to the Registrar's Office a list of the registered students who have not paid their fees. Reports of Standing, transcripts of records and diplomas will be withheld until such time as the fees are paid or a satisfactory arrangement is made with the Chief Accountant.

Late registration	$25.00
Late payment fee (after specified date):	
1st 30 days	$10.00
After 30 days	$25.00

3 CURRICULUM

The Faculty of Law operates under a credit system as follows:

3.1 ACADEMIC CREDIT TRANSFER AGREEMENT

Students wishing to take courses for credit towards their McGill degree at any university in the province of Quebec should refer to Regulation 10 and the section entitled "Academic Credit Transfer Agreement" in the *General Announcement* for details.

3.2 REGULATIONS FOR THE B.C.L. AND LL.B. DEGREES

1. The Faculty grants a Bachelor of Civil Law (B.C.L.) degree or a Bachelor of Laws (LL.B.) degree to candidates who have successfully completed ninety-five credits in accordance with the following regulations.

2. A candidate registered for the degree of B.C.L. or LL.B. is required to take the courses prescribed in each year of the degree program for which he is registered (as hereinafter set forth in Appendix III). In obtaining the number of credits required for his degree, a candidate must take all the courses indicated as obligatory for the obtaining of his degree and he shall not be permitted to register for a course unless he has obtained the credits allotted to courses that are indicated as prerequisites.

The attention of candidates proceeding to the Quebec legal profession is drawn to Appendix II and to the regulations of the Bar and of the Board of Notaries of the Province of Quebec.

The attention of candidates proceeding to the legal profession in Ontario is drawn to Appendix II and to the regulations of the Law Society of Upper Canada (Ontario). Candidates proceeding to the legal profession in other Provinces are referred to the regulations applying in those Provinces.

3. The remaining required credits are obtained by completing whatever other options the candidate selects to the extent permitted according to Appendix III.

3.3 REGULATIONS FOR THE NATIONAL PROGRAM

4. The Faculty grants the B.C.L. degree to candidates holding an LL.B. degree, and the LL.B. degree to candidates holding a B.C.L. degree, who have successfully completed an additional thirty credits in accordance with the present regulations. In order to be eligible to proceed to the LL.B. degree, the holder of a B.C.L. degree must have taken, and passed, during the B.C.L. program, Property IA & IIA and either Contracts I or Torts I. Likewise, the holder of an LL.B. degree desiring to proceed to the B.C.L., must have taken, and passed, during the LL.B. program, Obligations I and Property I & II. (It is to be noted that candidates entering the first year of the LL.B. program in 1972-73 or subsequent years are obliged to take in their LL.B. program a larger number of basic civil law courses whether or not they intend to proceed subsequently to the B.C.L. degree.) (See Appendix I Part II.)

5. A candidate who has successfully completed the first year of either the B.C.L. or LL.B. program may opt on registering for his second year to enter immediately the National Program, and on obtaining one hundred and twenty-five credits in accordance with the following regulations, shall be granted both the said degrees jointly.

Should the candidate wish to terminate his studies after having completed ninety-five credits only, he may be granted, at the discretion of the Faculty, either the B.C.L. or the LL.B. degree, according to the courses in which he has obtained credits, provided that he has then obtained credits for all the courses listed in Appendix I. A candidate who elects to enter the National Program on successfully completing his first year should seek the advice of the Associate Dean as to his academic program.

6. In obtaining the number of credits required for his degree or degrees under the National Program, a candidate must take and pass all the courses listed in Appendices I and IV.

7. The remaining required credits are obtained by completing whatever other options the candidate selects, subject always to the requirement that he has obtained the credits allotted to courses that are indicated as prerequisites; this latter rule also applies to obligatory courses.

3.4 GENERAL REGULATIONS

8. The word *course* as used in this calendar shall include, *inter alia,* tutorials, moots, essays, seminars and any other work for which credit is given, unless the context otherwise indicates.

9. The number of credits allotted each course equals the number of class hours per week except where otherwise indicated. The number of credits allotted to tutorials and moots is set forth in the Appendices.

10. A limited number of the credits required for either law degree or for the joint degrees under the National Program may be obtained in appropriate courses given by other faculties of McGill University or other universities, as arranged from time to time, provided the approval of the Dean or the Associate Dean for Student Affairs has been granted *prior* to registration for any courses giving rise to such credits. The total number of non-law credits that may be allowed under this Regulation

shall not exceed six.

11. Candidates shall make their course selections for the entire academic year on or before June 30, on the forms supplied by the Faculty for this purpose. Once the delays for course selections have expired, no changes are permitted unless such become necessary as a consequence of factors such as the results of supplemental examinations and re-reads (which may render a candidate ineligible for a course), course cancellations, the addition of new courses, or time-table conflicts. A candidate may, however, drop one of the courses which he has selected, and/or select another course, provided that he does so within the first week of each term. The selection of courses and any course changes must be approved by the Dean or the Associate Dean for Student Affairs.

Admission to some courses may be limited owing to heavy demand and the resources available, or because of particular teaching methods in certain fields.

Candidates are reminded that they retain the ultimate responsibility for their selection of courses, and therefore must bear in mind possible consequences of their choice with respect to professional qualifications (see Admission to the Legal Profession, section 5).

12. The Faculty shall prescribe the program of candidates who do not make their course selections within the specified delays.

13. Candidates will not be allowed to alter or cancel their course registration otherwise than as prescribed above.

14. Each candidate, in his third and subsequent terms, must register for not less than twelve credits in each term (with the exception of his final term should a lesser number of credits be required for the obtaining of his degree); nevertheless, the Dean or the Associate Dean for Student Affairs may under extenuating circumstances permit a candidate not in first year to register for a lesser number of credits. A candidate may register for a maximum of 18 credits in any term (including lst year), but in special circumstances the Dean or the Associate Dean for Student Affairs may permit a candidate to register for more than the prescribed maximum credits. *The attention of candidates is drawn to regulations 16 and 17.*

15. A candidate who has not succeeded in obtaining a minimum of three-quarters (rounded down to the nearest whole number) of the total credits for which he registered in any academic year will not be permitted to continue his studies in the Faculty of Law, except as hereinafter provided. A candidate who fails only one course which exceeds one quarter of the total credits for which he is registered shall not be required to withdraw from the Faculty by reason of the foregoing rule. A candidate who has not passed three-quarters of the total credits for which he is registered may be authorized to continue his studies if exceptional reasons for so doing exist.

16. No candidate will be granted a B.C.L. or an LL.B. degree unless he has been in full-time attendance at the Faculty for a period of at least three academic years following his first registration in First year.

No candidate will be granted both the B.C.L. and LL.B. degrees unless he has been in full-time attendance at the Faculty for a period of at least four academic years following his first registration in First year.

17. No candidate shall be eligible for any degree or degrees granted by the Faculty unless he completes the required number of credits for the same within five years of his first registration in First year.

Under special circumstances, a candidate who has interrupted his studies after having completed at least thirty credits arising out of courses given in this Faculty may be permitted by the Dean or the Associate Dean for Student Affairs, upon recommendation of the Admissions Committee, to continue his studies. In such event, the period of interruption shall not be included in the calculation of the five year period.

Candidates proposing to apply for transfer from other law faculties are required to remain in residence for a minimum of two years at the University for the obtaining of a B.C.L. or LL.B. degree.

18. In his first year in the Faculty, a candidate shall register for all the courses listed in Appendix III (Part I, or Part II) designated as 1st year courses, depending on the program into which he has been accepted. In order to obtain credits for such courses, a candidate must obtain a passing grade.

If the candidate obtains the grade of F in any of the First year courses, subject to Regulation 41, he shall (i) be obliged to re-register for and pass such courses, and (ii) not be allowed to register for any course for which any such First year course is a prerequisite.

19. In his subsequent terms, a candidate must register for and pass all courses indicated as obligatory in Appendix I, depending on the program which he is following. Candidates proceeding to either of the legal professions of the Province of Quebec must register for all courses indicated in Appendix II. These courses must be taken in the order indicated in Appendix III. Candidates are referred to their local legal profession regulations.

A candidate must obtain a passing grade in order to obtain credit in any course.

20. In no case shall a candidate who has obtained the grade of F in a course be allowed to proceed to courses for which such course is a prerequisite. Candidates who fail to obtain credit for a course which they are required to complete successfully and who do not write or who fail the supplemental examination must re-register for that course in the next term in which it is offered.

Candidates who for medical reasons do not write the supplemental examinations shall write those examinations at the next regular examination session in which examinations in those courses are offered. Such candidates are not required to re-register for these courses but must obtain permission from the Associate Dean for Student Affairs.

21. All grades obtained by a candidate shall be

included in his transcript, including both grades in the course where a regular supplementary examination is written.

22. There is no limit as to the number of times that a candidate may re-register for a course, subject to regulation 17.

Except as provided for in regulations 18 and 19, a candidate is not under the obligation to re-register for a course in which he has not obtained a passing grade.

23. A candidate who registers for a course a second time, or who re-takes a course in accordance with Regulation 20, must comply with all assignments.

24. It is not permissible for an essay or other paper to be submitted twice.

25. No thesis, essay, or paper, is, in the absence of the express permission of the Faculty, received by the Faculty otherwise than on the basis that, save as indicated thereon or therein, the candidate submitting it is its sole author, and that it has not been and is not concurrently being submitted to any other Faculty or University for any degree, diploma, or certificate, or for credit towards the same, or to this Faculty for any other course.

Every degree, diploma, or certificate, and every credit towards them, is given in reliance on the truth of each of those representations.

A breach of this regulation in relation to any assignment shall result in an F grade for that assignment and, in case of grave breaches, may also result in an F grade for the course in which the assignment was submitted.

25a. The following are the University Examination Regulations. Their breach, or the breach of any other rule, regulation or condition relating to examinations, whether established by or under the authority of the University, the Faculty, the Dean, or the Examiner, as the case may be, constitutes, according to circumstances, a breach of University discipline, and may be dealt with as such under the rules in force from time to time concerning University discipline.

i No candidate for examination may bring into the examination room any books, notes, or other material containing information pertaining to the examination unless such material is allowed by the examiner.

ii If books, notes, etc., cannot be left outside the examination room they must be put in a place designated by the Invigilator before the candidate goes to his seat. When needed, mathematical tables, etc., will be supplied in the examination room.

iii Talk or communication between candidates is forbidden.

iv Candidates must not use or attempt to use any improper source of information.

v Students writing examinations are responsible for arriving at the right time and place. The plea of inadvertence or forgetfulness cannot be accepted.

vi The doors of the examination room will be opened at the hour set for the start of the examination.*

vii Candidates are not permitted to leave the examination room until one half hour after the examination has begun, and in no case before the attendance has been taken. A candidate who leaves before the examination is over must hand in an answer book. Candidates will not be permitted to enter the examination room more than one half hour after the beginning of the examination, except by special permission of the Dean or his representative.

viii Candidates must remain in their seats. If they wish to speak to the Invigilator (e.g. to ask for additional supplies) they should raise their hand.

ix Questions concerning possible errors, ambiguities, or omissions in the examination paper must be directed to the Invigilator, who will investigate them through the proper channels. The invigilator is not permitted to answer questions other than those concerning the paper.

x No information of any kind that might be of assistance to another candidate is to be written on the question paper. All work must be done in the answer book provided and all books must be handed in. The books must not be torn or mutilated in any way.

xi At the close of the examination candidates must stop writing and hand in their books at once.

ANY BREACH OF THESE REGULATIONS WILL BE REPORTED TO THE CHIEF INVIGILATOR. IF THE OFFENCE IS SERIOUS IT WILL BE REPORTED TO THE SENATE BY THE DEAN OF THE FACULTY. A STUDENT FOUND GUILTY OF CHEATING OR ATTEMPTING TO CHEAT IS LIABLE TO EXPULSION FROM THE UNIVERSITY.

25b. In addition, and without prejudice to the application of disciplinary sanctions, if any, compliance with all such rules, regulations and conditions is a condition of obtaining credit for courses.

Failure to comply shall, according to the Dean's judgment as to the seriousness of the circumstances, result in an F grade for the particular examination or for the course as a whole, or a reduced grade in the one or the other.

25c. No candidate who fails a course as a result of the application of regulations 25 or 25b shall be entitled to take a supplemental examination in that course. Nevertheless, when in his discretion the Dean considers it just in the circumstances, he may permit a candidate to do so, provided the candidate is qualified in other respects to take that supplemental examination.

25d. The application of Regulations 25, 25b and 25c shall rest with the Dean or his delegate (not being the instructor for the course) who shall require the persons involved to appear before him so that he may dispose of the matter.

When it appears to an examiner, invigilator, or other person in authority that a breach of Regulation 25 or 25a has taken place, he shall note the alleged offence, and, where possible, the time thereof, on the paper, and report the matter promptly to the Dean.

25e. Regulations 25a to 25d shall be posted in a prominent place in the Faculty.

*No. 6 represents a variation from the Universi-

ty examination rules as authorized by the Senate of the University on April 30th, 1974.

3.5 EVALUATION OF STUDIES

26. Examinations, term papers and essays may be written in either English or French. Participation in Moot Courts may also be in either language. Examination questions are set in the language in which a course is given.

27. In order to obtain credits for his courses, a candidate must obtain a passing grade.

Grading will be as follows:
Pass
A (A+: see note)
B (B +: see note)
C
P: equivalence (see reg. 48);
Supp: passed after supplemental examination
Fail
F
F. supp: Fail after supplemental examination

NOTE: The grades of A+ and B+ are awarded to indicate superior performance in the A and B groups.

28. The work done by a candidate in any given course may be assessed on the basis of examinations, papers, essays or class, group, or tutorial participation, or other academic activity. However, all candidates in a course shall be subjected to at least one common type of assessment. Joint work by two or more students for credit is not permitted without the special leave of the instructor.

29. Essays and papers are due on the last day of the term in which they are being written unless otherwise indicated. Where any required paper or essay is not submitted on its due date, in the absence of a medical certificate or analogous circumstances, a reduction of one level of grading shall be made for each day (excluding Saturdays, Sundays and legal holidays) that the submission is late. Thus, for example, a paper that would have been graded A+ if it had been submitted on time, would be graded A if submitted one day late, B+ if two days late, B if three days late, and so on in accordance with the scale in regulation 27.

30. The assessment in First year courses (as enumerated in Appendix III) shall include a final written examination to which shall be allocated at least sixty per cent of the weight of grading allotted to each such course. Mooting and tutorials are not subject to the present regulation.

31. The following courses are to be treated for evaluation purposes as full-year courses: Obligations I, Contracts I, Torts I, Property IA, Trusts & Gifts I, Constitutional Law Taxation I, Evidence IA, Legal Problems in the Government Control of Business.

32. Any oral examination shall be jointly conducted by the examiner and the co-examiner and the grade shall be given by the examiner in consultation with the co-examiner.

33. No candidate may take an examination or otherwise obtain credits for a course unless he has registered for the same and has completed the requirements save in the case anticipated in Regulation 18.

34. All grades are posted in a prominent place in Chancellor Day Hall after each examination session. Such posting shall constitute adequate communication of results for all purposes and candidates shall be deemed to have notice of their grades as of the date of posting.

35. There are three general examination sessions in the academic year: one regular session at the end of each term and one supplementary session to be held preceding the start of the fall term. Dates for the supplementary session shall be posted with the grades after the winter term.

36. Essays and other papers are written under the name of each candidate. Written examinations are anonymous, according to the procedure established by Faculty.

37. Written examinations shall have a maximum duration of three and one half hours inclusive of reading time.

38. When a candidate has not passed a course he has the right to a re-read of all written assignments in that course provided that:

(i) in the case of examinations written at the end of the fall term he applies within seven days of the communication of the result; and

(ii) in the case of examinations written at the end of the winter term he applies before June 10 and pays the prescribed fee (ten dollars for each paper with a maximum charge of fifty dollars) to McGill University. The fee shall be reimbursed should a passing grade be obtained after the re-read.

39. Written assignments which have been reread receive the grade which is given by the co-examiner in consultation with the examiner. Other assignments, if any, in the course, keep their grades unchanged. The grade assigned to the course as a whole is then recalculated, giving to the grade on each assignment its appropriate weight. Subject to the following rules, the course grade so recalculated is final.

40. Supplemental examinations are allowed subject to the present regulations. Candidates shall be admitted to (i) *regular* supplemental examinations where having obtained the grade of F in a course, they satisfy the conditions below, or (ii) *special* supplemental examinations in cases where they have been excused from earlier assessments or regular examination sessions by reason of illness or analogous causes. Supplementals in mooting consist of the writing of new factums and the presentation of fresh oral arguments. When a candidate fails an essay that he has elected to write as a course, or fails a course as a result of failing a paper constituting part of the weight of grading in a course, he may apply to be authorized to write a supplemental to the Dean or the Associate Dean for Student Affairs who shall make a decision in the light of the circumstances after consultation with the professor involved as to whether permission should be

granted. If a supplemental is allowed it shall consist of the writing of a new essay or paper on the same or a different topic, or a rewriting of the failed essay or paper, or the writing of a regular supplemental examination, as indicated in the decision. Supplementary papers or essays shall be handed in, in the case of a fall-term failure, by the last day of lectures in the winter term or by the first day of the August examination session, at the option of the student, and in the case of a winter-term failure, by the said date in August.

41. No candidate shall be admitted to regular supplemental examinations if, under Regulation 15, he must withdraw from the Faculty, nor may any candidate write more than the following number of regular supplemental examinations:

(i) one supplemental examination in a course worth more than seven credits; or

(ii) two supplemental examinations in a course or courses worth altogether seven or fewer credits.

42. By commencing to write any examination, a candidate waives the right to plead any causes which would entitle him to a *special* supplemental, unless these causes occur in the course of the examination.

43. Application for *regular* supplemental examinations must be made by June 30 or the first business day thereafter, and must be accompanied by the prescribed fee (ten dollars for each paper with a maximum of twenty dollars) to McGill University.

Application for *special* supplemental examinations by candidates who were excused by reason of illness or analogous causes must be made to the Dean or the Associate Dean for Student Affairs within one month of the end of the relevant examination session (or as soon as the illness has terminated). The application must be in writing and be accompanied by the prescribed fee. ($10. per paper with a maximum of $50.) Any student wishing a medical exemption from an examination must apply for such an exemption to the Student Affairs Office as soon as he is able to do so, giving the office the name of the physician consulted. The Associate Dean will then send the student's physician the Faculty's official Medical Certificate, which requires the physician to certify that, in the physician's opinion, the student was not fit to write the examination in question. No other medical certificate will be accepted for the purposes of granting a medical exemption. This requirement for medical certificates applies to all examinations, including mid-term examinations in one-semester courses. The Dean or his delegate may, at his discretion, exempt a student from writing an examination on compassionate grounds.

44. Supplemental examinations are written at the Faculty in the month of August. The grade obtained in supplemental examinations is the grade of the course as a whole, and is final and not subject to appeal. The grade first obtained in the course shall be included in the transcript in all cases, followed by the grade obtained as a result of a supplemental examination.

When a candidate has not passed a special supplemental examination he has the right to a re-read of all written assignments in that course provided that he applies within seven days of the communication of the result and pays the prescribed fee ($10 per paper with a maximum of $50) to McGill University. The fee shall be reimbursed should a passing grade be obtained after the re-read.

45. Grades obtained by candidates as a result of supplemental examinations shall appear as follows on their transcripts:

i) where the supplemental examination was taken after the grade of F was obtained in a course, a passing grade shall be indicated as "C Supp." (passed after supplemental examination), and a failing grade shall be indicated as F Supp. (failed after supplemental examination);

ii) where a student has failed a regular examination or supplemental examination and re-registers for a course, the highest he can obtain in that course is the grade of "c";

iii) where the supplemental examination was taken as a result of illness or analogous causes, the regular grades, as set out in regulation 27, shall apply.

46. Honours points are awarded as follows:

Grade in Course	Honours Points
A+	4 honours points (per credit)
A	3 honours points (per credit)
B+	2 honours points (per credit)
B	1 honours point (per credit)
F, F. Supp.	Minus 1 honours point (per credit)

No honours points are awarded for grades of C,P,Supp. However, negative honours points shall be calculated in the candidate's average where the grade of F or F. Supp. is obtained.

Final honours are awarded on the basis of the honours points average.

The honours points average is calculated by multiplying the number of honours points obtained in each course by the number of credits allotted to that course (including the double set of minus honours points where regular supplemental examinations are written and failed), adding all the products so obtained, and dividing that total by the sum of the credits of all the courses for which the candidate registered, including double sets of credits where regular supplemental examinations are written and including generally all courses in which he obtained C, Supp., F or F Supp. but excluding all courses where the candidate obtained P.

47. Degrees in the Faculty are granted as follows:

- First class honours: honours points average of 2.5 and over.
- Upper Second class honours: honours points average of 1.5 and over.
- Lower Second class honours: honours points average of 0.8 and over.
- Pass.

48. Credits are given as follows as equivalences (regulation 27):

	Credits	
	1st tm	*2nd tm*
a) Legal Clinic (where this has been elected, and upon the recommendation of the Attorney-Director of the Clinic)	2	2
b) McGill Law Journal (upon the recommendation of the Faculty adviser)		
i) Editor in Chief (496-041D)		6
ii) Executive Editor (496-042D)		4
iii) Managing Editor (496-042D)		4
iv) Other members of Senior Board (496-043D)		2
c) Moot Court Board (upon the recommendation of the Faculty adviser)		
i) Chairman (496-044D)		4
ii) Vice Chairman (496-045D)		3
iii) Four members of the Senior Board (each) (496-046D)		2
d) Courses completed and passed outside this Faculty (regulation 10)		
e) Group Assistants (see regulation 56)	2	2

49. (1) Final Transcripts of candidates who have successfully obtained a B.C.L. or LL.B. degree shall include the following:

a) the grade obtained in each course;
b) the credit weight of each course;
c) the classification of the degree determined in accordance with regulation 47;
d) a list of prizes granted.

(2) Interim transcripts shall include:

a) the grade obtained in each course;
b) the credit weight of each course;
c) a list of prizes granted.

3.6 TUTORIALS AND MOOTING

50. Each candidate shall in the winter term of his First year participate in the Faculty's Moot Court and Group Tutorial programs. Each candidate shall, in the fall term of second year, participate in the post-First year Mooting Program to the extent of at least one round.

3.7 GROUP ASSISTANTS

51. Group assistants are students who assist in the teaching of certain courses. They must have successfully completed at least two terms in the Faculty.

52. Those courses in which there will be openings for Group Assistantships will be announced. Candidates desiring to act as Group Assistants in one of those courses will so indicate in their course registration sheets. The Associate Dean for Student Affairs, together with the professors in charge of the courses involved, will select the Group Assistants from amongst those who have indicated their desire to serve.

53. In making the selection of candidates, the Associate Dean for Student Affairs and the professors involved shall rely, *inter alia,* on the overall academic performance of each candidate.

54. A candidate may not hold more than one Group Assistantship per term.

55. Group Assistantships carry a weight of two credits per term. A Group Assistant meets with the professor in charge of the course and with the First year group as specified by the professor. At the end of the course, the Group Assistant files a report containing an assessment of the work done, of the methods used and of his own performance.

56. The authorization of equivalence (see regulations 48 and 27) shall be given by the professor in charge of the course and shall be based on the candidate's performance and on his final report.

3.8 CHANGES IN REGULATIONS

57. These Regulations and the other provisions contained in this Announcement are subject to change at any time.

3.9 APPENDIX I

OBLIGATORY COURSES FOR B.C.L. AND LL.B. CANDIDATES

Part I: B.C.L. DEGREE

		Credits *1st tm*	*2nd tm*
1. Civil Law courses			
472-140D	Obligations I	4	4
473-144A	Property I	3	
473-145B	Property II		3
472-119B	Civil Procedure and Evidence I		3
473-253A	Special Contracts I	3

3.10 APPENDIX II

OBLIGATORY COURSES FOR CANDIDATES PROCEEDING TO THE LEGAL PROFESSIONS

PART I: BAR OF QUEBEC

1. Quebec Law

		1st tm	*2nd tm*
472-416A	Civil Procedure II	2	5

2. National Law

494-366A	Business Associations I	2	
494-367B	Business Associations II		3
491-313D	Taxation I	2	2
494-465A	Banking & Negotiable Instruments	2	
493-453B	Bankruptcy		2
495-369A	Labour Law I	2	
491-422B	Criminal Law II		3
491-401A	Administrative Law I OR	3	
491-403A	Municipal Law OR	2	
483-145A	Land Use planning OR	2	
491-409A	Civil Liberties	2	

PART II: NOTARIAL PROFESSION – QUEBEC

Candidates are referred to the regulations of the Board of Notaries.

PART III: ONTARIO

Extract from the Regulations of the Law Society of Upper Canada: "3. *Curriculum*

(a) An approved law school shall offer instruction regularly in the following subject areas:

Agency
Banking and Bills of Exchange
Civil Procedure
Company Law
Conflict of Laws
Constitutional Law
Contracts
Criminal Law and Procedure
Equity
Evidence
Family Law
Jurisprudence or one subject of a jurisprudential nature
Labour Law
Legal History
Legislation and Administrative Law
Municipal Law
Partnership
Personal Property
Real Estate Transactions
Real Property
Sale of Goods
Taxation
Torts
Trusts
Wills and Administration of Estates

(b) It is understood that the different subject areas may be variously combined or subdivided at the different law schools, hence the above list should be regarded as indicating areas of the law in which instruction will be regularly offered. The list should not be regarded as necessarily establishing courses that must be taught separately or in combination under these specific labels. For example, 'Legislation' and 'Administrative Law' might be two separate courses under those names, whereas 'Personal Property' and 'Real Property' might be combined into a single course entitled 'Property'. Or, under a heading like 'Remedies', substantial parts of 'Civil Procedure', 'Contracts' and 'Property' might be combined. The same sort of thing could be done under the heading 'Commercial Law'.

(c) Every student shall be required to take the major basic course offered in each of the following subject areas:

Civil Procedure
Constitutional Law of Canada
Contracts
Criminal Law and Procedure
Personal Property
Real Property
Torts

(d) It is understood that subject to subparagraph 3 (c), the academic planning authority of each approved Law School may provide any or all courses to its students on a required or an optional basis, may require students to elect between alternative courses or groups of courses to attain either diversification or specialization to an extent deemed desirable and may add courses to its curriculum on a required or an optional basis or an optional basis in subject areas other than those listed in sub-section 3 (a)."

PART IV: NEWFOUNDLAND

Applicants for admission to the Law Society of Newfoundland who graduated in 1974, or thereafter, *must include* in their program of studies major courses in the following areas:

Canadian Constitutional Law
Civil Procedure
Contracts
Criminal Law and Procedure
Personal Property
Real Property
Torts

and, in addition, *should include* two major basic courses in the following subject areas:

Commercial Law
Corporation Law
Evidence
Family Law
Wills and Trusts
Shipping.

Applicants whose academic qualifications do not include the recommended subject areas may be ineligible for admission to the Law Society of Newfoundland without further exams in subject areas not included in their academic programs.

PART V: OTHER PROVINCES

Subjects considered as of prime importance for the practice of the law in the Common Law Provinces: As noted above, the Law Society of Upper Canada in 1969 reduced the number of subject areas in which instruction was to be mandatory from 23 to 7, namely Civil Procedure, Constitutional Law, Contracts, Criminal Law and Procedure, Personal Property, Real Property and Torts. This reduction was a cause of concern to the Bars of certain other provinces, the opinion being held by some being that unless certain other courses were also taken, candidates would not be adequately prepared for the practice. Rather than reducing the portability of LL.B. degrees from one province to another by the stipulation of additional compulsory courses, it was decided that the attention of candidates should be drawn to certain additional subjects that are considered to be of prime importance for the practice of law. These are Family Law, Evidence, Wills and Trusts and Commercial and Corporation Law. Candidates are accordingly advised to take these additional courses. Those who do not take them will not be refused admission to the Bar, but the Bars in question will review the regulations as to subjects required to be taken after experience has been gained as to whether the candidates who present themselves have taken a sufficiently broad range of subjects.

NOTE: The subjects listed as being required or desirable for Bar purposes are in some instances taught by the Faculty under different course names.

The Law Society of Alberta requirements concerning training in legal accounting: Text of resolution passed by the Benchers of the Law Society of Alberta in May 1973: "That the Benchers authorize the Education Committee to communicate with all law schools to the following effect:—

"That all Law Schools be advised that there will be in Alberta, as of the 1975 Bar Admission Course and subsequent years, a two-hour examination in Legal Accounting and the Society's Rules with respect to accounting and trust accounts, but those persons who in their law course have passed a course in Legal Accounting will be exempt from this part of the Bar Admission examination"."

APPENDIX III: DEGREE PROGRAMS

PART I: B.C.L. DEGREE

		Credits 1st tm	2nd tm
1) First Year			
a) Civil Law courses			
472-140D	Obligations I	4	4
473-144A	Property I	3	
473-145B	Property II		3
472-119B	Civil Procedure and Evidence I		3
b) National courses			
492-116A	Foundations of Canadian Law	3	
491-101D	Constitutional Law I	3	3
491-111B	Criminal Law I		3
476-187D	Tutorials I	2	
476-185D	Mooting I		1
2) Second Year			
a) Civil Law courses			
473-253A	Special Contracts I	3	
475-273A	Family Law I	3	
473-255B	Successions		3
b) National Courses			
494-366A	Business Associations I	2	
494-367B	Business Associations II		3
491-313D	Taxation I	2	2
495-369A	Labour Law I	2	
491-422B	Criminal Law II		3
476-186D	Mooting II		1
c) Electives			
	Maximum of twelve (12) credits over both terms.		

NOTE: Students intending to take the National Program (the LL.B. IV year) are advised to take either Property IA and Property IIA, Contracts I, or Torts I as one of their electives.

		1st tm	2nd tm
3) Third Year			
a) Civil Law courses			
472-416A	Civil Procedure II	2	
b) National Courses			
494-465A	Banking and Negotiable Instruments	2	
493-435B	Bankruptcy		2
and one of the following:			
491-401A	Administrative Law OR	3	
491-403A	Municipal Law OR	2	
483-145A	Land Use Planning OR	2	
491-409A	Civil Liberties	2	

c) Common Law courses

		Credits 1st tm	2nd tm
One of the following:			
483-146D	Property IA	2	2
483-149B	Property IIA		2
482-142D	Contracts I	3	3
485-179D	Torts I	3	2

d) Electives

Maximum of twenty-one (21) credits over both terms.

PART II: LL.B. DEGREE

1) First Year

a) Common Law courses

483-146D	Property IA	2	2
483-149B	Property IIA		2
482-142D	Contracts I	3	3
485-179D	Torts I	3	2

b) National courses

492-116A	Foundations of Canadian Law	3	
491-101D	Constitutional Law I	3	3
491-111B	Criminal Law I		3
476-187D	Tutorials I	2	
476-186D	Mooting II		1

2) Second Year

a) Common Law Courses

482-236A	Civil Procedure IIA	3

b) National courses

476-186D	Mooting II	1

c) Civil Law Courses *

472-140D	Obligations I	4		4
473-144A	Property I	3		
473-145B	Property II			3
together with at least six (6) additional credits obtained from amongst the following:				
472-119B	Civil Procedure & Evidence I			3
	A Comparative Law course	2	OR	2

NOTE: In their second year common law students are advised to register for a number of the civil law credits required for the obtaining of the LL.B. degree from the courses listed above.

d) Electives

A maximum of thirty-two (32) credits over both terms.

3) Third Year

a) Civil Law courses *

472-140D	Obligations I	4	4
473-144A	Property I	3	
473-145B	Property II		3

together with at least six (6) additional credits obtained from amongst the following:		Credits *1st tm*		*2nd tm*
472-119B	Civil Procedure & Evidence I			3
473-255B	Successions			3
473-253A	Special Contracts I	3		
473-254B	Special Contracts II			3
	A Comparative Law Course	2	OR	2

* **NOTE:** In their third year common law students must complete the civil law credits required for the obtaining of the LL.B. degree from amongst those listed above.

b) Electives

A maximum of thirty-six (36) credits over both terms.

3.12 APPENDIX IV

OBLIGATORY COURSES FOR THE NATIONAL PROGRAM (DOUBLE DEGREE)

PART 1: LL.B. DEGREE (AFTER B.C.L.)

In order to gain admission, the holder of a B.C.L. degree must have taken and passed, during the B.C.L. program, Property IA & IIA, and either Contracts I, or Torts I.

NOTE: Because of the heavy contract law content of a number of the obligatory courses in the LL.B. IV, it is recommended that the students who intend to proceed to LL.B. IV, or who wish to keep that option open, take Contracts I rather than Torts I.

Property IA	2	2
Property IIA		2
Contracts I	3	3
Torts I	3	2
Trusts & Gifts I	3	2
Real Estate Transactions	3	
Evidence IA	2	2
Family Law IA		3
Commercial Transactions	4	
Civil Procedure IIA	3	

PART 2: B.C.L. DEGREE (AFTER LL.B.)

In order to gain admission, the holder of an LL.B. degree must have taken, and passed, during his LL.B. program, Obligations I and Property I & II. (It is to be noted that candidates entering the first year of the LL.B. program in 1972-73 or subsequent years are obliged to take in their LL.B. program a larger number of basic civil law courses whether or not they intend to proceed subsequently to the B.C.L. degree.)

Obligations I	4	4
Property I	3	
Property II		3
Family Law I	3	
Successions		3
Civil Procedure & Evidence I		3
Special Contracts I	3	
Civil Procedure II	2	
Business Associations I and II	2	3
Private International Law		3

NOTE: The attention of candidates intending to proceed to the Bar of Quebec is drawn to the fact that they must have taken and passed the courses listed in Appendix III, Part I.

4 COURSES OF INSTRUCTION

493-436A. ACCOUNTING. (2 hours, first term). General principles of accounting of interest to members of the legal profession. A student who has taken a university or CEGEP level or an equivalent level accounting course is excluded from this Faculty's accounting course.
Mr. Hitzig

483-452B. ADMINISTRATION OF DECEASED' ESTATES. (LL.B.) (2 hours, second term). Wills: the requirements for a valid testamentary instrument, revocation, republication, incorporation by reference, and construction. Intestate succession; mode of descent. Appointment, powers and duties of personal representatives; collection and realisation of assets, payment of debts; distribution of assets, including problems of lapse and class gifts, legacies, including abatement and ademption. Overall the course will concentrate on problematic areas of the law rather than attempt a comprehensive survey of the law of wills, intestacy and administration. *Prerequisite:* Trusts and Gifts I, first term.
Professor Waters

491-401A. ADMINISTRATIVE LAW I. (3 hours, first term). The relationship between law and the administrative process; problems of delegation; procedures and powers of administrative tribunals; judicial and legislative control of administrative action.
Professor Jones (Section 01)
Mr. Grey (Section 02)

494-460B. ADMIRALTY. (2 hours, second term). Admiralty courts and jurisdiction, liens, carriage of goods by sea, salvage, collisions, and limitations of liability.
Mr. Knox

494-464A. ADVANCED CORPORATION LAW. (3 hours, first term). Seminar on various corporate problems; aspects of study include corporate management and responsibility, shareholders' rights and securities regulation. *Prerequisites:* Business Associations I & II.
Professor Caron

491-407A. AIR AND SPACE LAW. (2 hours, first term). The legal regime of air space and outer space, review of the more important activities in these environments, including international flights, and their legal regulations. Administrative and private air law in Canada.
Professor Bradley

494-465A. BANKING AND NEGOTIABLE INSTRUMENTS. (2 hours, first term). Canadian law of negotiable instruments, with particular emphasis on the Bills of Exchange Act. The concept and attributes of negotiability. Bills of exchange, cheques, and promissory notes. Aspects of the law of moveable property; nature of ownership; the owner's remedies; their application to negotiable instruments; money as property and rights of recovery and tracing; assignment of debts, documents of title. Banker and customer; banker's security; letters of credit; credit cards and other recent developments. The relationship of federal and provincial laws.
Professor Scott (Section 01)
Mr. O'Brien (Section 02)

493-435B. BANKRUPTCY AND INSOLVENCY. (2 hours, second term). Bankruptcy and insolvency in Canadian law. Scope, operation, and content of the relevant federal and provincial laws, with particular emphasis on the Bankruptcy Act, Winding-up Acts, related statutes, and the general provincial law. Creditors' rights.
Professor Scott (Section 01)
Mr. Mendelsohn (Section 02)

494-366A & 367B. BUSINESS ASSOCIATIONS I & II. (2 hours, 1st term; 3 hours, 2nd term). The different forms of business associations; partnerships, the nature of corporate personality; the two systems of incorporation; constitutional aspects; the raising and maintenance of a company's capital; the organs of the company, investors' protection; protection of minority shareholders, reconstruction and amalgamation of companies. Common Law students are advised to take Professor Foster's section.
BUSINESS ASSOCIATIONS I:
Professor Foster (Section 01)
Professor Durnford (Section 02)
Mr. Smyth (Section 03)
BUSINESS ASSOCIATIONS II:
Professor Durnford (Section 01)
Mr. Konigsberg (Section 02)
Mr. Pascal (Section 03)

494-475B. BUSINESS PLANNING. (2 hours, second term). This seminar will deal with problems in the corporate law field. The treatment will include taxation and general civil and commercial law aspects. *Prerequisites:* Business Associations I & II and Taxation I.
Mr. Gordon Echenberg

472-459B. CIVIL EVIDENCE II. (B.C.L.) (2 hours, second term). Principles of Law of Evidence with emphasis on substantive rules in civil law.
Professor Meyer

491-409A. CIVIL LIBERTIES IN CANADA. (2 hours, first term). The course will be organized around the following themes: first, the "condition" of civil liberties in Canada, with particular reference to the historical development and status of civil liberties in Canadian constitutional law; second, the pervasive question of language and educational rights; third, the "frontiers" of civil liberties

with particular reference to the claims for protected value processes and incipient rights; and fourth, a "civil liberties workshop", involving a clinical adaptation of student paper presentations to the simulated forum of a Parliamentary Committee of Inquiry.
Professor Cotler,
assisted by Professor F.R. Scott

472-119B. CIVIL PROCEDURE AND EVIDENCE I. (3 hours, second term). A general introduction to the Canadian judicial system, civil procedure in Quebec (up to but excluding trial) and evidence.
Professor H. Patrick Glenn (Section 01)
Professor Meyer (Section 02)
Mr. Stein (Section 03)

472-416A. CIVIL PROCEDURE II. (2 hours, first term). Trial, including examinations on discovery, in the Superior Court; provisional remedies, including injunctions; remedies against judgments (revocation and appeal). *Prerequisites:* Civil Procedure and Evidence.
Mr. Holden (Section 01)
Mr. Boudreault (Section 02)

482-236B. CIVIL PROCEDURE IIA. (LL.B.) (3 hours, second term). Common law historical development of the rules of procedure and forms of action; traditional common law remedies; pleadings, motions and discovery; forms of trial and methods of proof; rules and organization of the courts; jurisdiction and judgments. Emphasis on Ontario Judicature Act and Rules of Practice.
Mr. King

472-419B. CIVIL PROCEDURE III . (2 hours, second term). Selected topics in Civil Procedure, including trial by jury, execution, prerogative writs, Proceedings related to marriage, proceedings concerning immoveables.
Mr. Holden (Section 01)
Mr. Boudreault (Section 02)

494-462A. COMMERCIAL TRANSACTIONS. (LL.B.) (4 hours, first term). Sale of goods and secured transactions.
Professor Field

389-610A COMPARATIVE CIVIL LIABILITY (2 hours, first term). A comparative study of selected contemporary problems is the field of civil responsibility. Areas of concern include: economic loss, privacy, mental suffering, prenatal injury, and the role of strict liability. This is a graduate course open to undergraduate students.
Professor H. Patrick Glenn

492-437A. COMPARATIVE COMPANY LAW AND THE MULTINATIONAL COMPANY: LAW AND PRACTICE. (2 hours, first term). A comparative evaluation of Anglo-American and Continental company law systems — the harmonization of company laws within the European Common Market, and the 'European Company' — international and multinational companies — structure and management of the multinational company — government control of the multinational company — international controls and the multinational company — anti-monopoly legislation and the multinational company — the Canadian experience.
Professor Hahlo

491-101D. CONSTITUTIONAL LAW I. (3 hours, throughout the year) A comprehensive treatment of the theory, law and practice of the constitution, including legislative, executive and judicial institutions in Canada. The rule of law in executive government and in the lawmaking process. Parliamentary sovereignty, constitutional amendment, and the federal system. A problem approach, with opportunity to draft bills and legal proceedings, will be attempted, in order to develop skills useful in the practice of law.

It will be assumed that students have a basic acquaintance with Canadian governmental institutions, either through a course on Canadian government, or through the reading of one or more basic texts. Students are referred in this connection to the current edition of R. MacGregor Dawson, *The Government of Canada,* and to James R. Mallory, *The Structure of Canadian Government.*
Professor Cotler (Section 01)
Professor Scott (Section 02)

485-483A. CONSUMER PROTECTION. (2 hours, first term). A seminar requiring active student participation dealing with a number of selected topics (advertising, product safety, control of interest rates, etc.) primarily of concern to the individual in his capacity as a consumer. The perspective will be essentially economic and substantial attention will be paid to the evaluation of specific rules within the topic areas concentrated upon in terms of the costs, and the distribution of the costs, which these rules impose upon society at large. *Prerequisites:* Special Contracts I or Commercial Transactions or permission.
Professor Cayne

482-142D. CONTRACTS I. (LL.B.) (3 hours, throughout the year). A study of the general theory and basic principles of the common law of contract in Canada — offer and acceptance, consideration, intent to create legal relations, privity and terms; standard form contracts, mistake, misrepresentation and discharge.
Professor Field (Section 01)
Professor Slayton (Section 02)

491-111B. CRIMINAL LAW I. (3 hours, second term). The exploration of major problems in criminal law and its administration; emphasis on basic concepts which govern the implementation of the Criminal Code in Canada.
Professor Sklar (Section 01)
Mr. Yarosky (Section 02)
Professor Cayne (Section 03)

491-422B. CRIMINAL LAW II. (3 hours, second term). Principles of the law of criminal evidence and procedure. *Prerequisite:* Criminal Law I.
Mr. Fish (Section 01)
Mr. Proulx (French Section 02)
Mr. Shadley (Section 03)

491-421A. CRIMINAL LAW IV (CRIMINAL LAW AND SOCIETY). (2 hours, first term). This seminar will focus upon selected areas of human belief and behaviour (such as corporate crime, faith-healing, child abuse, and killings committed under circumstances of extreme provocation) which the law-maker has traditionally sought to control through the use, among other instrumentalities, of the criminal law. The seminar will critically examine, in the context of such areas, the effectiveness of the criminal law in controlling human conduct. The materials will be interdisciplinary in character. It will be open to a limited number of students from Law, the behavioural sciences, Political Science and Religious Studies. *Prerequisite:* Criminal Law I or the approval of the instructor.
Professor Sklar

491-418A. CRIMINOLOGY I. (2 hours, first term). A study of the aims of the penal system with particular reference to defining limits of the scope of criminal behaviour and the purposes of punishment. *Prerequisite:* Criminal Law and Procedure I.
Professor Jacobson

491-419B. CRIMINOLOGY II. (The Processing of the Offender: Legal, Psychiatric and Social Work Prospectives) (2 hours, second term). An examination of the role of the lawyer, psychiatrist and social worker in the processing and treatment of offenders. Problems characteristic of practice in each of these professions will be studied as they interact in the criminal process. The seminar will be conducted jointly by faculty members drawn from Law, Psychiatry and Social Work. It will be open to a limited number of students in Law, Medicine and Social Work who have a particular interest in the field of criminology. *Prerequisites:* a previous course in criminal law, criminology or corrections or the approval of the instructors.
Professor Jacobson with
Dr. C. Angliker of the Forensic Psychiatry Clinic, and Dr. P. Deehy of the School of Social Work

482-418D. EVIDENCE IA. (LL.B.) (2 hours, throughout the year). The development of Common Law principles of civil and criminal evidence and relevant policy considerations. Stress will be placed on such areas as relevancy and admissibility; hearsay rule; advocacy and trial tactics; function of judge and jury; relationship of rules of evidence to problems of deception, perception and memory; credibility.
Professor Sklar

495-471B. ENVIRONMENT AND THE LAW. (2 hours, second term). The basic objective of the seminar is to examine the actual and potential role of law in protecting the integrity of the human environment from threats posed by scientific and technological advances, rapid industrialization and population growth. Emphasis will be placed on the following subjects: air, water and sea pollution; hazards caused by the uses of nuclear energy; weather modification. If time permits, the inquiry will extend to other environmental hazards.
Professor Vlasic

475-273A. FAMILY LAW I. (B.C.L.) (3 hours, first term). The existence and attributes of physical persons, their capacity and incapacity by reason of age, relationship and mental facilities; the family; husband and wife; the law of marriage; its formation and its effects, especially with respect to the rights and duties of the consorts and their property; separation, the annulment of marriage and divorce.
Professor Meyer (English Section 01)
Professor Groffier Atala (French Section 02)

485-472B. FAMILY LAW IA. (LL.B.) (3 hours, second term), Marriage and divorce; the matrimonial property regime of the common law provinces; parent and child; guardian and ward; interstate succession and dependents' relief.
Professor Jacobson

473-456A. FAMILY LAW II. (MATRIMONIAL PROPERTY LAW), (B.C.L.) (2 hours, first term). The effect of marriage on the property rights of married persons, and their relations with third persons; the matrimonial regimes of the Quebec Civil Code. *Prerequisites:* Family Law I and Property I.
Professor Groffier Atala

483-453B. FINANCING REAL ESTATE TRANSACTIONS. (B.C.L.) (2 hours, second term). Particular emphasis will be placed on the protection to be given the hypothecary creditor, the methods of financing land acquisition and development; the special problems related to the financing of construction projects; the development of the emphyteutic lease and the net lease as a form of finance, the role of the lawyer in giving economic advice to his clients. *Prerequisites:* Property I & II.
Mr. Mettarlin

492-116A. FOUNDATIONS OF CANADIAN LAW. (3 hours, first term). An introduction to the institutional and philosophical foundations of Canada's two legal systems, with emphasis on some basic principles of Canadian public law.
Professor H. Patrick Glenn (Section 01)
Professor Slayton (Section 02)

125-401A,B. * FRENCH LEGAL TERMINOLOGY/FRANCAIS JURIDIQUE. (2 hours, either term). Ce cours a pour but d'amener les étudiants, future légistes, au point où ils pourront exercer leur profession, en français, dans la Province. Ce n'est pas un cours de français général ni un cours de révision; c'est un cours avancé et spécialisé, qui

suppose au départ une bonne connaissance du français usuel, parlé et écrit. Les travaux pratiques se feront sous forme de débats, de rapports oraux et écrits, etc.

Le cours est réservé en principe aux étudiants de dernière année. D'autres étudiants seraient admissibles dans les limites de la disponibilité des places. Les effectifs sont limités.

Un examen de classement, obligatoire, aura lieu au moment des inscriptions. Pour plus de précisions, consulter les affiches au Département de français ou à la Faculté de droit.

Mr. Reed

494-461B. INSURANCE. (2 hours, second term). This course deals with the general principles of insurance law, with emphasis placed on the contract of insurance. *Prerequisite:* Obligations I.

Mme. Sinclair

494-463A. INTELLECTUAL AND INDUSTRIAL PROPERTY. (2 hours, first term). Patents, trademarks, copyrights.

Mr. McLeod: Patents
Mr. Gadban: Trademarks
Mr. Amos: Copyrights

389-611B INTERNATIONAL COMMERCIAL ARBITRATION. (2 hours, second term). A seminar dealing with the comparative evaluation of this particular alternative to litigation between parties to international contracts in Canada, the United States and the Common Market, with particular reference to international conventions and other instruments in this field. This is a graduate course open to undergraduate students.

Professor Groffier Atala

492-436A. INTRODUCTION TO COMPARATIVE LAW. (2 hours, first term). Introduction to the comparative method; differences and similarities between the world's legal systems; a detailed study of selected topics. This course is open to undergraduate as well as graduate students.

Professor Hahlo

492-419B. JURIMETRICS. (2 hours, second term; not given 1975-76). An examination of the use of quantitative methods and symbolic logic in legal analysis, and of the use of computers by lawyers. The emphasis of the seminar will be jurisprudential; what do these new methods of legal analysis tell us about the nature of law?

492-420A. JURISPRUDENCE II. (2 hours, first term; not given 1975-76). The seminar will be devoted to an intensive study of John Rawls' *A Theory of Justice.* It is hoped that close study of this important book will illuminate many of the general problems of legal philosophy.

492-421B. JURISPRUDENCE I. (3 hours, second term). This course will introduce the main schools of jursiprudence and will attempt to acquaint the student with some of the most significant writings, particularly contemporary writings, in legal philosophy. Special attention will be paid to the way in which legal philosophy and the analytic tools it employs can increase understanding of such contemporary issues as civil disobedience and the relationship between law and morality.

Professor Slayton

495-369A. LABOUR LAW I. (2 hours, first term). An introduction to Canadian labour law including collective bargaining, arbitration and industrial relations generally. Emphasis on the Canada Labour Code the Quebec Labour Code and related statutes.

Professor Meyer (Section 01)
Mr. Heenan (Section 02)

495-470B. LABOUR LAW II. (2 hours, second term). Special problems in the development of labour law in Quebec and Canada. *Prerequisite:* Labour Law I.

Mr. Hartt

483-145A. LAND USE PLANNING. (B.C.L. or LL.B.) (2 hours, first term). A comparative study of private and public control of land use and development, involving: Master plans, zoning by-laws, subdivision control, urban re-development, expropriation, and regional planning. *Prerequisite:* Property IA or Property I and II.

Professor Jane Glenn

495-482B. LAW AND POVERTY. (3 hours, second term; not given 1975-76). The course will be organized around the following four themes: First, the nature, extent and meaning of poverty in Canada and the implications for anti-poverty planning and poverty law; second, the differential character of the law concerning rich and poor as reflected in case studies in criminal law, consumer law, housing law, welfare law; third, the perceptions of poverty and the poor by law and lawyers, and the perceptions of law and lawyers by the poor; and fourth, the "delivery systems" available for legal services to the poor among topics to be considered here are alternative organizational models for legal services; the role of the law schools both ideologically in terms of curriculum and operationally in terms of legal services for the poor; the roles for government and the professional bar; and the alternative action-oriented strategies for law reform.

Professor Cotler

491-411D. LEGAL PROBLEMS IN GOVERNMENT CONTROL OF BUSINESS. (2 hours, throughout the year). Legal aspects of competition, with particular reference to restrictive trade practices and the present (and proposed) anti-combines legislation in Canada and elsewhere, with some reference to economic theories about competition. Foreign investment Review Act and other types of direct governmental intervention in the economy — for example, price and resource controls, regulation of marketing, utilities, transporta-

tion and communication, consumer protection against unfair practices, hazards to health and safety and misleading advertising, Crown corporations, etc. *Prerequisites:* Business Associations I and II.
Professor Jones and invited guests.
(Professors Cohen and Green on leave)

491-403A. MUNICIPAL LAW. (2 hours, first term). Municipal institutions in the Province of Quebec and their constitution and powers. Judicial review of the acts of municipal authorities and officers, in the general context of administrative law. Juridical nullity and other problems. Municipal taxation. Civil responsibility.
Professor Scott

472-140D. OBLIGATIONS I. (B.C.L.) (4 hours, throughout the year). The function of the law of obligations, the concept of obligations, the sources of obligations (the general theory of contractual and legal obligation); the performance of obligations; the general theory of civil responsibility (contractual and extra-contractual); the extinction of obligations.
Professor Crépeau (Section 01)
(Section 02 – to be announced)

475-477B. OBLIGATIONS II. (2 hours, second term). Problèmes de droit médical et hospitalier; greffes, consentement, legs et donations d'organes, régimes de responsibilité civile; contrat médical et hospitalier; évolution récente de la jurisprudence. *Prerequisite:* Obligations I or Torts I.
Professor Crépeau

475-479B. OBLIGATIONS IV. (MODALITIES AND CAUSES OF EXTINCTION OF OBLIGATIONS) (2 hours, second term.) Modalities; joint and several, conditional and alternative obligations and obligations with a term or penal clause. Extinction: payment, release, confusion, novation (and delegation of payment), compensation, frustration, etc. *Prerequisite:* Obligations I
Professor Vallée-Ouellet

483-454B. OWNERSHIP AND POSSESSION IN ROMAN LAW. (2 hours; not given 1975-76). A study of the concepts of Ownership and Possession in Roman Law and a comparative examination of these topics against the background of civil and common law. After an initial study of the Roman Law, students will submit papers for class discussion. There will be no final examination but both the papers and individual participation in the classes will be assessed for the purposes of grading.

471-316B. PRIVATE INTERNATIONAL LAW. (CONFLICT OF LAWS) (3 hours, second term). The function, nature and sources of Private International Law. Conflicts of laws; formulation and development of conflict rules; interpretation of conflict rules (characterization, incidental questions, renvoi, conflits mobiles); operation of conflict rules (application of foreign law, substitution of the laws of the forum). Conflicts of jurisdiction and recognition of foreign judgments.
Professor H. Patrick Glenn

473-144A. PROPERTY I. (B.C.L.) (3 hours, first term). The concepts of property, ownership and possession, and rights in property; the land titles registration system.
Professor Brierley (Section 01)
Professor Kouri (Section 02)

483-146D. PROPERTY IA. (LL.B.) (2 hours, throughout the year). Ownership and the doctrine of estates; including interests of husband and wife, uses and the Statute of Uses with an outline of trusts and settlements, concurrent ownership, future interests, and perpetuities, adverse possessions. Commercial land law; easements and profits, restrictive covenants, licences, mortgages, landlord and tenant, fixtures.
Professor Waters (Section 01)
Professor Jane Glenn (Section 02)

473-145B. PROPERTY II. (B.C.L.) (3 hours, second term; Required Materials for Professor Caron's section – Recueil de documents et arrêts sur les sûretés réelles – Civil Law Property II). The concepts of patrimony and security on property, moveable and immoveable; elements of the land titles registration system; hypothecs, privileges, pledge, with some consideration given to statutory securities on property.
Professor Caron (Section 01)
Mr. Reis (Section 02)

483-149B. PROPERTY IIA. (LL.B.) (2 hours, second term). The basic principles of moveable property; ownership and possession; the acquisition and termination of ownership; gifts, bailments, sale of goods, security devices and non-consensual liens.
Professor Field (Section 01)
Professor Sklar (Section 02)

472-418B. PROPERTY III. (2 hours, second term). A study of the nature and effects of extinctive and positive prescription; the concepts of renunciation, suspension and interruption; review of various extinctive prescription periods under the Civil Code and under certain other Quebec statutes.
Professor Vallée-Ouellet

483-148A. PROPERTY IIIA. (LANDLORD AND TENANT) (LL.B.) (2 hours, first term). An examination of the relationship of landlord and tenant and of current problems affecting residential tenancies. *Prerequisite:* Property IA.
Professor Bradley

491-105A. PUBLIC INTERNATIONAL LAW I. (3 hours, first term). The traditional fields of International Law including nature and sources; recognition, territory and acquisition of territory; jurisdiction on the high seas; nationality; diplomatic and consular privileges and immunities; responsibility of states; interpretation of treaties; legal control of

force and aspects of the U.N. Charter, special Canadian problems of International Law.
Professor Vlasic

491-406A. PUBLIC INT' ...ATIONAL LAW II (PROBLEMS OF INTERNATIONAL LAW AND ORGANIZATION). (2 hours, first term). An analytical examination of the Charter of the United Nations and a study of the development of International law and organization by and through the various organs of the United Nations and of the specialized agencies. *Prerequisite:* Public International Law I'
Professor Humphrey

492-438B. PUBLIC INTERNATIONAL LAW III (LAW OF THE SEA). (2 hours, second term; not given 1975-76). This course will deal with the main rules governing the regime of the high seas; nationality of ships; territorial waters; fishing control zones; pollution control zones; the exploitation of the continental shelf and the ocean seabed; special legal problems of jurisdiction in the Arctic; the Geneva Conventions of 1958 and developments since that date dealing with all phases of high seas and coastal waters questions; new threats to the oceanic environment and the legal and administrative consequences; the role of the United Nations and other agencies; special bilateral relations between Canada and the United States Canada and France; special Canadian fisheries control experience; the emergence of a new law of the sea; international and inter-oceanic canals and seaways with particular reference to the St. Lawrence Seaway. *Prerequisite:* Public International Law I.

491-404A. PUBLIC INTERNATIONAL LAW IV. (INTERNATIONAL LAW OF HUMAN RIGHTS) (2 hours, first term). The International protection of human rights, particularly by the United Nations its Specialized Agenices and the Council of Europe. Topics covered will include the Charter of the United Nations, the Universal Declaration of Human Rights, the two covenants and other human rights treaties, humanitarian intervention, diplomatic protection of foreigners, the prevention of discrimination and the protection of minorities, freedom of information, the status of women, self-determination, implementation, etc. There will be a written examination.
Professor Humphrey

491-405B. PUBLIC INTERNATIONAL LAW V. (INTERNATIONAL LAW OF HUMAN RIGHTS) (2 hours, second term). A seminar covering approximately the same subject matter as Public International Law IV. Students will be expected to lead a discussion in class and to write a term paper on some aspect of human rights. Subjects will be assigned after discussion at the beginning of the course. There are no prerequisites, but students are advised to take the course in the same subject in the first term.
Professor Humphrey

491-408B. PUBLIC INTERNATIONAL LAW VI. (FOREIGN POLICY AND THE INTERNATIONAL LEGAL PROCESS: THE MIDDLE EAST AS A CASE STUDY) (2 hours, second term). The purpose of the course is to inquire into major problem areas in International Law; to explore the role of International Law and International Organizations in conflict resolution; to analyse the anatomy of Canadian foreign policy decision making; to train students in lawyering skills and techniques of conflict resolution. The Middle East will be used as a case study in this course.
Professor Cotler

483-451A. REAL ESTATE TRANSACTIONS. (LL.B.) (3 hours, first term). Problems arising out of the vendor and purchaser relationship. The contract of sale in its drafting, interpretation and enforcement; fixtures, recording and land titles systems; mortgages. Particular emphasis will be placed upon the law of Ontario. *Prerequisite:* Property IA.
Professor Foster

482-434B. REMEDIES. (3 hours, second term; not given in 1975-76). A study of the various common law remedies available at law and equity – remoteness, measure and mitigation of damages in tort and contract; liquidated, punitive and nominal damages; the incidence of taxation; declaratory judgments, specific performance, and injunction; actions for money had and received, quantum meruit, tracing and following. *Prerequisites:* Torts I, Contracts I or Property IA. (Those electing this course are recommended to have taken all three of these subjects.)

483-455B. ROMAN LAW – SALE. (2 hours, second term). The origins and development of the contract of sale will be studied in detail using original source material. The subject will be considered against the background of changing Roman Society and within the framework of the growth of the law of contracts. There will be no final examination but students will submit term papers, which, together with individual participation in the classes, will be assessed for the purposes of grading.
Mrs. Maryla Waters

473-253A. SPECIAL CONTRACTS I. (B.C.L.) (3 hours, first term). The contract of sale and the distinction between civil and commercial matters. *Prerequisite:* Obligations I.
Prof. Cayne (Section 01)
Mr. Fraiberg (Section 02)

473-254B. SPECIAL CONTRACTS II. (B.C.L.) (3 hours, second term). The contracts of lease, employment, construction, deposit, suretyship, loan and transaction, and the basic principles of insurance. *Prerequisites:* Obligations I.
Prof. Cayne (Section 01)
Mr. Fraiberg (Section 02)

491-402B. STATUTE LAW. (2 hours, second term). This course will include study of the

legislative process, the statute as a legal instrument, its various classifications, purposes and forms, styles of legislative drafting, codification, delegation of legislative power and subordinate legislation, the process of interpretation, interpretation statutes and rules of construction. The course will include exercises in drafting and annotation.
Mr. Grey

473-255B. SUCCESSIONS. (B.C.L.) (3 hours, second term). The gratuitous transmission of property by reason of gift, will or legal succession. *Prerequisites:* Obligations I or Property I & II.
Professor Brierley (English Section 01)
Professor Groffier Atala (French Section 02)

491-313D. TAXATION I. (2 hours, throughout the year). The general principles of Canadian Income Tax Law. The emphasis is on Federal, Personal and Corporation Tax with some reference to Quebec Income tax rules.
Professor Caron (French Section 01)
Professor Durnford (English Section 02)
Professor Jones (English Section 03)
Mr. Gauthier (English Section 04)

491-413B. TAXATION II. (2 hours, second term). The importance of tax considerations in common commercial transactions, both domestic and international. *Prerequisites:* Taxation I, Special Contracts I and II.
Mr. Donald J. Johnston

493-414B. TAXATION III. (ESTATE PLANNING) (2 hours, second term). The course deals with provincial succession duties and gift tax as well as the income tax consequences of death. A critical view is taken of current estate planning techniques such as estate freezes. Particular emphasis will be placed upon those aspects of personal and corporate income tax which are relevant in designing and implementing estate plans. *Prerequisites:* Successions or Trusts and Gifts, and Taxation I.
Mr. Couzin

491-415A. TAXATION IV. (TAX POLICY) (2 hours, first term; not given 1975-76). Public aspects of tax legislation; constitutional problems; federal-provincial agreements; tax sharing and equalization; municipal aspects. Social problems in policy; wealth tax; negative tax and re-distribution of resources. *Prerequisite:* Taxation I.

491-417A. TAXATION V. (CORPORATE TAXATION). (2 hours, first term; not given 1975-76). The course considers, in depth, problems unique to corporations and their shareholders including the small business deduction and refundable taxes; distributions to shareholders; corporate reorganizations and liquidations; and the capital gain and "roll-over" implications. *Prerequisites:* Taxation I and Business Associations.

491-416B. TAXATION VI. (INTERNATIONAL TAXATION) (2 hours, second term). The course covers the taxation of non-residents with income from employment, business or property in Canada; the taxation of Canadian residents with income from employment, business or property outside Canada; foreign tax credits; and the application and importance of tax treaties. *Prerequisite:* Taxation I.
Mr. Verchere

485-179D. TORTS I. (LL.B.) (3 hours, first term; 2 hours, second term). Basic principles of intentional torts, negligence and liability without fault.
Professor Jacobson (Section 01)
Professor Margalioth (Section 02)

483-449D. TRUSTS AND GIFTS I. (LL.B.) (3 hours, first term; 2 hours, second term). The nature of the trust in common law and civil law theory and practice; the various types of trust; the creation, operation, and winding up of trusts; including trustees' duties and powers, and the variation of trusts; breach of trust and the doctrine of tracing. Modern uses of the trust, including income tax, succession duty and estate tax considerations, pension funds, and charitable trusts. Gifts other than by way of trust; including *inter vivos* gifts and donations *mortis causa;* essentials of validity. *Prerequisites:* Property IA & II A.
Professor Waters

496-491A. (THIRD TERM ESSAY)

496-492B. (FOURTH TERM ESSAY)

496-496D. (SECOND YEAR ESSAY)

496-493A. (FIFTH TERM ESSAY)

496-494B. (SIXTH TERM ESSAY)

496-498D. (THIRD YEAR ESSAY)

496-495A. (SEVENTH TERM ESSAY)

496-496B. (EIGHTH TERM ESSAY)

496-499D. (FOURTH YEAR ESSAY)

Students electing an essay must exercise great care in selecting the appropriate course number. The appropriate number will depend upon the term or year in which the essay is being written.

Each term a post-first-year candidate may write a substantial essay on a subject, or a number of shorter articles or notes on one or more subjects meeting the approval of the Dean or of the Associate Dean for Student Affairs, and of the member or members of Faculty to be responsible for supervision and grading. It is a condition of the elective that approval be obtained not later than the end of the first week of term (Regulation 11). In exceptional cases, where the subject-matter calls for a really substantial essay, special permission

may be granted by the Dean, or the Associate Dean for Student Affairs, to spread the writing of an essay over two terms in one academic year; in such event it shall be deemed to constitute two electives and shall carry the weight of grading as such, and no other essays may be elected by such candidates that year. A one term elective is worth two credits; a two term elective four credits.

496-046A, 047B LEGAL CLINIC Candidates may elect, with the permission of the Dean or the Associate Dean for Student Affairs, to work for credit in a legal aid clinic provided that such clinic has received the approval of the Dean. Candidates accepted for work in a legal aid clinic by the Attorney Director thereof may be granted the equivalence of two credits per term upon his recommendation. (See Regulations 27 and 48).

496-048A, 049B. GROUP ASSISTANTS. See regulations 51 and following.

McGILL LAW JOURNAL

496-001D Editor in Chief	**6 credits**
496-002D Executive Editor	**4 credits**
496-003D Managing Editor	**4 credits**
496-004D Other members of Senior Board	**2 credits**

MOOT COURT BOARD

495-005D Chairman	**4 credits**
496-006D Vice-Chairman	**3 credits**
496-007D Four members of Senior Board (each)	**2 credits**

476-185D. MOOTING I

476-186D. MOOTING II. The Faculty's Moot Court Program is organized by the student-run Moot Court Board. In first year each moot is judged by a member of the Board and a member of the Bar. In the second year compulsory round, the moots are each judged by a member of the Board, a member of the Bar and a professor. These are followed by voluntary elimination and final rounds. Inter-Faculty moots are also arranged by the Board with other Law Faculties.

476-187D. TUTORIALS I. This program involves the division of the First year class into small groups for carrying out written and oral assignments under the guidance of members of the professorial staff, together with instruction on Legal Bibliography under the guidance of the Law Librarian.

5 ADMISSION TO THE LEGAL PROFESSION

5.1 QUEBEC

The attention of candidates for the Bar of Quebec and for the Quebec notarial profession is drawn to the special legislation and regulations governing those professional bodies.

Information regarding admission to the Bar may be obtained by applying to the Bar of Quebec, 84 Notre-Dame Street West, Montreal H2Y 1S9. Information regarding admission to the Notarial profession may be obtained by applying to Me Bernard Coupal, 630 Dorchester Boulevard West, Montreal H3B 1S6.

The attention of candidates is drawn to the Statutes of Quebec, 1974, Chapter 2, sections 21-23:

21. No professional corporation shall issue a permit to a person who does not have a working-knowledge of the French language determined in accordance with the standards established for that purpose by regulation of the Lieutenant-Governor in Council.

Nulle corporation professionelle ne peut délivrer un permis à une personne qui n'a pas une connaissance d'usage de la langue française déterminée suivant les normes établies à cette fin par règlement du lieutenant-gouverneur en conseil.

22. A professional corporation may however issue a temporary permit valid for one year to a person who does not have the working-knowledge of the French language required in accordance with section 21. It shall not renew such a permit except with the authorization of the Lieutenant-Governor in Council, when the public interest requires it.

Une corporation professionnelle peut toutefois délivrer un permis temporaire valable pour une période d'un an à une personne qui n'a pas la connaissance d'usage de la langue française requise suivant l'article 21. Elle ne peut renouveler un tel permis qu'avec l'autorisation du lieutenant-gouverneur en conseil, lorsque l'intérêt public le requiert.

23. A professional corporation may issue, to a Canadian citizen who is a member of a similar corporation of another province and who does not have the working-knowledge of the French language required in accordance with section 21, a restrictive permit which authorizes its holder to practise his profession for the exclusive account of one employer in a function which does not lead him to deal directly with the public.

Une corporation professionnelle peut délivrer à un citoyen canadien, qui est membre d'une semblable corporation d'une autre province et qui n'a pas la connaissance d'usage de la langue française requise suivant l'article 21 un permis restrictif, qui autorise son dètenteur à exercer sa profession exclusivement pour le compte d'un seul employeur dans une fonction ne l'amenant pas à traiter directement avec le public.

Section 21 applies to the issue of a permit to a Canadian Citizen from 1 July 1976 (Section 119 of the above-mentioned legislation).

5.2 ONTARIO

Admission to the Bar in Ontario is under the control of the Law Society of Upper Canada. That Society requires that the applicant for admission be a graduate from an approved law school. The Law Faculty of McGill has been approved by the Society. Graduates with the degree of Bachelor of Laws (LL.B.) are eligible to enter the Bar Admission Course conducted by the Law Society of Upper Canada and to become student members of the Society.

The Bar Admission Course consists of a period of twelve months service under Articles of Clerkship with a member of the practising profession in Ontario followed by a further period of six months of full-time attendance at lectures in Osgoode Hall. Upon successful completion of these courses the candidate may be called to the Bar provided he meets the other requirements of the Ontario Bar. The foregoing requirements are at present under review.

Candidates intending to seek admission to the Faculty should first seek detailed information on the above from the Law Society of Upper Canada, Kenneth Jarvis, Q.C., Secretary, Osgoode Hall, Toronto M5H 2N6, Ontario.

In general it is expected that the governing bodies of the legal professions in most of the common law provinces will treat the LL.B. degree of McGill University in the same way as they treat an LL.B. degree from any of the Ontario common law schools. Students who have specific inquiries about any particular province should address them to the governing body of the profession in the province concerned.

Candidates for the Bachelor of Laws Degree (LL.B.) and seeking entrance to the Bar Admission program of any of the Common Law provinces must satisfy the regulations of the particular Common Law province to the Bar admission course or program to which entrance is sought. The attention of candidates is drawn to the pre-law requirements of the Bars of the various provinces. In particular, the Law Society of Upper Canada requires an additional pre-law university year for those holding CEGEP diplomas. Moreover, all such regulations are subject to amendment.

6 GRADUATE STUDIES IN LAW

6.1 REGULATIONS

DEGREES

The higher degrees in Law are the M.C.L. (Master of Civil Law), the LL.M. (Master of Laws) and the D.C.L. (Doctor of Civil Law), as offered by the Institute of Air and Space Law and the Institute of Comparative Law and are granted by the Faculty of Graduate Studies and Research.

All graduate students in Law except those registered in the Institute of Air and Space Law, come under the direction of the Institute of Comparative Law.

GENERAL REQUIREMENTS FOR THE M.C.L. or LL.M. DEGREE

Candidates for admission to M.C.L. or LL.M. programs must hold the degree of B.C.L., with at least second class honours, from McGill University, or its equivalent, and satisfy the linguistic and other requirements of the Institute of his study. A candidate must complete the courses prescribed by the Institute, including cognate courses in other departments of study, submit an acceptable thesis and, if required by the Institute, undergo an oral examination designed to test the general knowledge of the field of the research studies.

The requirements for the degree may be completed, by well-qualified and capable students, within one calendar year, but if all the degree requirements have not been completed within this time an additional full academic session in residence is necessary.

In certain cases a transfer of candidacy from the M.C.L. or the LL.M. to candidacy for the D.C.L. may be permitted at the end of the year in residence. Such transfer is open only to a student who shows considerable promise and upon the recommendation of the Institute. A student so transferred will not be required to prepare a master's thesis but must spend at least one further year in residence at McGill.

See the general regulations of the Faculty of Graduate Studies and Research on requirements for Master's degree.

N.B.

In exceptional circumstances the Executive Committee of the Faculty of Graduate Studies and Research may grant an exemption from the requirement of a second residential year at McGill to a candidate who has failed to complete all the requirements for the master's degree within one year.

GENERAL REQUIREMENTS FOR THE D.C.L. DEGREE

The program of each department of study consists of a minimum of three years' work from the first registration of the candidate of which at least two years must be spent in full-time resident study at McGill. Only an applicant of proven legal scholarship of high merit will be admitted to candidacy for this degree and normally a candidate should be the holder of both a general degree and a law degree. In suitable cases the holder of the M.C.L. or LL.M. degree of McGill (or its equivalent) may be considered as having satisfied the first year of the Institute's doctoral program. An applicant must satisfy the linguistic and other requirements of the Institute of his study and, as a rule, the Institute will not permit a candidate who is not the holder of an appropriate master's degree, or its equivalent, to register directly for the D.C.L. but require him to register for the M.C.L. or LL.M. A candidate for the M.C.L. or LL.M. degree of McGill, who, upon the completion of his first year of resident study, shows considerable promise may, upon the recommendation of the Institute of his study, be permitted to proceed to the second year of the D.C.L. program without being required to submit a master's thesis.

At a stage in the program of his studies as determined by the Institute in which he is registered, a candidate may be required to pass an oral examination, the purpose of which is to test his general knowledge of the field of his research studies. Every candidate will be required to defend his thesis before a jury appointed by the Faculty of Graduate Studies and Research and consisting of no fewer than five adjudicators, including at least two who are not members of the Faculty of Law. To qualify for the degree the thesis submitted must be in a form suitable for publication and constitute a significant contribution to legal knowledge, evidencing in concept and execution the original work of the candidate.

Insofar as not varied by the above, the rules and regulations of the Faculty of Graduate Studies and Research apply in all matters pertaining to candidature for a degree.

6.2 INSTITUTE OF AIR AND SPACE LAW

Director — D. Nicolas M. Matte, Q.C.
Teaching Staff — See Section 1.3.

PURPOSE OF THE INSTITUTE

The Institute of Air and Space Law operates within the Faculty of Law. It provides facilities for advanced study and research in Air and Space Law and related problems of International Law for highly qualified law graduates and others with appropriate qualifications.

DIPLOMAS AND DEGREES

The Institute of Air and Space Law offers a Diploma in Air and Space Law, and the degrees of Master of Laws (LL.M.) and Doctor of Civil Law (D.C.L.)

REQUIREMENTS FOR THE DIPLOMA IN AIR AND SPACE LAW

Applicants for admission must hold a law degree of high standing from an approved law school in any part of the world, or must have an equivalent professional standing. Working competence in the English language is required but examinations and other written work may be presented in English or French. All candidates must provide evidence of the subjects covered in their prior law studies and of their scholastic or professional standing, together with two references.

A candidate who satisfies the residence requirements of one academic session and who passes the prescribed examinations with an overall average grade of at least 65% will be awarded the Diploma in Air and Space Law.

COURSES AND REGISTRATION

The prescribed courses are:

387-611D	PUBLIC INTERNATIONAL AIR LAW
387-612D	PRIVATE INTERNATIONAL AIR LAW
387-613D	GOVERNMENT REGULATION OF AIR TRANSPORT
387-614D	SPACE LAW
387-615D	ECONOMICS OF AIR TRANSPORT
387-616D	INTRODUCTION TO CIVIL AND COMMON LAW
387-617D	TERM PAPER

The Director may require additional courses of particular candidates.

REQUIREMENTS FOR THE DEGREE OF MASTER OF LAWS

A working competence in the English language is required but examinations and written work including theses may be presented in either French or English. All candidates must provide evidence of the subjects covered in their prior law studies and of their scholastic or professional standing, together with two references.

The prescribed courses are as those set out as

required for the Diploma, but in addition the candidate must present an acceptable thesis on a subject approved by the Director. In order to be allowed to submit a thesis, a candidate must have obtained a mark of at least 65% in each of the courses or seminars for which he is registered. No candidate may receive the Diploma and the Master's degree for the same course of studies. A candidate who has already received the Diploma in Air and Space Law may be accepted as a candidate for the Master's degree, but he will be required to register for one additional academic session, and he may also be required to undertake additional course work beyond the course work already performed for the Diploma. For the General Requirements, see Section 6.1, third paragraph.

REQUIREMENTS FOR THE DEGREE OF DOCTOR OF CIVIL LAW

Candidates for the degree of Doctor of Civil Law must hold the degree of B.C.L. or LL.B. from McGill University or its equivalent from another university. As a rule a candidate who does not already hold a master's degree will be required to complete the master's degree before being accepted for the doctoral program. A candidate who has obtained the master's degree or its equivalent from another university will, as a rule, be required to complete the courses prescribed for the first year of the master's degree. If his performance is not of sufficiently high standard to justify admission to the doctoral program, he will not be permitted to proceed any further, but may be permitted to submit a master's thesis to qualify for the master's degree. If his performance is of sufficiently high standard, he may be permitted to proceed to the second year of the doctoral program without being required to submit a master's thesis.

The degree of Doctor of Civil Law is predominantly a research degree, and will be awarded on the basis of a thesis that represents an original contribution to the development of legal science. The thesis may be presented in English or French. All prospective candidates must provide evidence of the subjects covered in their prior law studies and of their scholastic and professional standing, together with two suitable references. The degree will be awarded, at the earliest, after the completion of three years from the first postgraduate registration of the candidate at McGill University. In the case of a candidate who holds the M.C.L. or LL.M. degree of McGill or its equivalent from another university, two years of resident study beyond the master's degree are required but may be reduced to one year with the approval of the Executive Committee of the Faculty of Graduate Studies and Research on the recommendation of the Graduate Studies Committee of the Faculty of Law. In general, this non-resident year should be spent at another university or similar institution.

6.3 INSTITUTE OF COMPARATIVE LAW

Director
— Professor Paul-A. Crépeau, Q.C.
Assistant to the Director
— Professor Ethel Groffier Atala
Teaching Staff
— See Section 1.3

PURPOSES OF THE INSTITUTE

The institute of Comparative Law operates within the Faculty of Law. As a centre of comparative legal studies, the Institute provides facilities for graduate work, advanced studies and research for highly qualified law graduates in the areas of comparative Public and Private Law.

DEGREES

The Institute of Comparative Law offers the degrees of Master of Civil Law (M.C.L.), of Master of Laws (LL.M.), and of Doctor of Civil Law (D.C.L.).

REQUIREMENTS FOR THE DEGREES OF MASTER OF CIVIL LAW AND MASTER OF LAWS

An adequate working knowledge of the English and French languages is required from all applicants. Applicants who wish to pursue studies which in the opinion of the Director require knowledge of a language other than English or French must possess adequate working knowledge of that language.

All applicants must provide evidence of the subjects covered in their prior law studies, of their scholastic or professional standing, and of their linguistic proficiency in English and French, together with not less than two references. For the General Requirements, Section 6.1, third paragraph.

COURSES AND REGISTRATION

389-610A COMPARATIVE CIVIL LIABILITY (2 hours, first term). A comparative study of selected contemporary problems in the field of civil responsibility. Areas of concern include: economic loss privacy, mental suffering, prenatal injury, and the role of strict liability.
Professor H. Patrick Glenn

492-437A. COMPARATIVE COMPANY LAW AND THE MULTINATIONAL COMPANY: LAW AND PRACTICE. (2 hours, first term). A comparative evaluation of Anglo-American and Continental company law systems — the harmonization of company laws within the European Common Market and the "European Company" — international and multinational companies — structure and management of the multinational company — government

control of the multinational company — international controls and the multinational company — anti-monopoly legislation and the multinational company — the Canadian experience. This is an undergraduate comparative law course offered in the Faculty.
Professor Hahlo

389-611B INTERNATIONAL COMMERCIAL **ARBITRATION.** (2 hours, second term). A seminar dealing with the comparative evaluation of this particular alternative to litigation between parties to international contracts in Canada, the United States and the Common Market, with particular reference to international conventions and other instruments in this field.
Professor Groffier Atala

492-436A. INTRODUCTION TO COMPARATIVE LAW. (2 hours, first term). Introduction to the comparative method; differences and similarities between the world's legal systems; a detailed study of selected topics. This is an undergraduate comparative law course offered in the Faculty.
Professor Hahlo

There is no uniform program of studies. Each candidate follows a program of studies, determined by the Director, which in as far as possible is fashioned to meet his particular needs as indicated by his prior legal experience and aspirations.

As a rule a candidate must take in each of the two terms of the academic year a minimum of three courses which must include whatever courses in Comparative law or International law the Institute may prescribe. A candidate with a civil law background will normally be required to select at least one undergraduate course from the common law program, while a candidate with a common law background will normally be required to select at least one undergraduate course from the civil law program. The remaining courses may be selected, subject to the Director's approval, from the seminars provided by the Institute and any of the courses forming part of the curriculum for the B.C.L. or LL.B.

To complete the requirements for the Master's Degree, a candidate will be required to submit a thesis on a subject approved by the Director. A candidate who has failed to complete his prescribed coursework will not be permitted to proceed to the submission of a thesis.

Examinations, term papers and theses may be written either in English or French.

Note: In accordance with the requirement of the Graduate Faculty a pass standard of 65% must be obtained in each course.

REQUIREMENTS FOR THE DEGREE OF DOCTOR OF CIVIL LAW

Candidates for the degree of Doctor of Civil Law must hold the degree of B.C.L. or LL.B. from McGill University or its equivalent from another university. As a rule a candidate who does not already hold a master's degree will be required to complete the master's degree before being accepted for the doctoral program. A candidate who has obtained the master's degree from another university will, as a rule, be required to complete the courses prescribed for the first year of the master's degree. If his performance is not of sufficiently high standard to justify admission to the doctoral program, he will not be permitted to proceed any further, but may be permitted to submit a master's thesis to qualify for the master's degree. If his performance is of sufficiently high standard, he may be permitted to proceed to the second year of the doctoral program without being required to submit a master's thesis.

The degree of Doctor of Civil Law is predominantly a research degree, and will be awarded on the basis of a thesis that represents an original contribution to the development of legal science. The thesis may be presented in English or French. All prospective candidates must provide evidence of the subjects covered in their prior law studies and of their scholastic and professional standing, together with two references. The degree will be awarded, at the earliest, after the completion of three years from the first postgraduate registration of the candidate at McGill University. In the case of a candidate who holds the M.C.L. or LL.M. degree of McGill or its equivalent from another university, two years of resident study beyond the master's degree are required but may be reduced to one year with the approval of the Executive Committee of the Faculty of Graduate Studies and Research on the recommendation of the Graduate Studies Committee of the Faculty of Law. In general, this non-resident year should be spent at another university or similar institution.

7 LIBRARY

The Law Library of the University, located in new Chancellor Day Hall, contains at present a valuable collection of over 95,000 volumes. It includes virtually all Canadian works, and the principal law reports of the United Kingdom and France, as well as a selection of reports from the United States, Commonwealth countries such as Australia and New Zealand and Civil Law jurisdictions such as Belgium and Germany.

The Wainwright Collection, comprising the personal library of the French legal historian Olivier Martin, is a particularly fine collection of early editions relating to French Law.

The Law Library is intended primarily for the use of professors of this Faculty and students registered for courses given in it or in the Institute of Air and Space Law or in the Institute of Compara-

tive Law. Permission for use by other persons desiring to avail themselves of this Library's facilities will depend on the space available and the demands being placed on the Library's resources at the time. Attention is drawn to the necessity for persons not registered at McGill University to register and pay a fee to the University where extensive use of the Library is authorized.

The great value of the Law Library to students and to the profession is self-evident. For these reasons the Faculty expects the full cooperation of all in maintaining the integrity of the Library and in preventing damage to books or their unlawful removal.

Law students also have access to all other collections within the University Library system, in particular the McLennan Library, which has the main Social Sciences and Humanities collection.

8 McGILL LAW JOURNAL

The McGill Law Journal is a professional journal published by students of the Faculty of Law of McGill University. Its purpose is to promote the study of the law in Canada and to help in the understanding of the Civil Law and Common Law systems which exist side by side in this country.

9 MOOT COURT BOARD

The Moot Court Board is composed of post First year students of the Faculty of Law and supervises the Faculty's moot court program. Ability and capacity determine the selection of members.

10 SCHOLARSHIPS, PRIZES AND LOAN FUNDS

10.1 SCHOLARSHIPS AND BURSARIES

EDWIN BOTSFORD BUSTEED SCHOLARSHIP. — Founded by the will of the late Mrs. Busteed in memory of her husband, Edwin Botsford Busteed, K.C., B.A., B.C.L., this Scholarship will be awarded to an applicant, chosen by the Faculty, who desires to carry out graduate research on some subject connected with the law of Quebec and approved by the Faculty. The value of the scholarship is approximately $1200 and can be used to supplement funds for graduate studies already received from other sources. Candidates shall make application for this Scholarship to the Associate Dean for Student Affairs.

HAROLD G. FOX EDUCATION FUND BURSARIES — Value approximately $250. Established by donations from the Harold G. Fox Education Fund. To be awarded to needy law students in good standing. Application should be made to the Student Aid Office.

MAURICE GOLDENBERG MEMORIAL SCHOLARSHIP. — Value $225, in Government, Constitutional Law, or Public Administration, established by Sen. H. Carl Goldenberg, Q.C., in memory of his father, the late Maurice Goldenberg. Awarded by the University Scholarships Committee to the best candidate amongst those nominated by the Faculties of Arts and Law.

CHIEF JUSTICE R.A.E. GREENSHIELDS MEMORIAL SCHOLARSHIPS. — Three scholarships covering tuition fees bequeathed by the late Mrs. R.A.E. Greenshields in memory of her husband, the late Chief Justice Greenshields, D.C.L., LL.D., for many years professor of Criminal Law and Dean of the Faculty of Law. Awarded to students entering the Faculty of Law and renewable in each of the two upper years leading to the Bachelor of Civil Law degree, if satisfactory conduct, and at least a high Second Class standing are maintained, or for other reasons at the discretion of the Faculty. Candidates must satisfy the regular requirements for admission to the Faculty, must have a standing of at least high Second Class, and preferably First Class at the University or Institution which they previously attended, and must furnish evidence of the need for financial assistance to enable them to study law. Fluency in both English and French is not essential, but preference is normally given to applicants with a good working knowledge of both languages. Apply to the Faculty Admissions Office.

H.E. HERSCHORN FUND. — The Student Aid Office may award a bursary from the interest of this fund to a deserving student in the third or any subsequent year of his or her program leading to the B.Sc., B.A., M.D., C.M., B.C.L., or LL.B. degree.

EUGENE LAFLEUR SCHOLARSHIP. — This scholarship in the amount of $1,000, presented by the law firm of Messrs. Laing, Weldon, Courtois, Clarkson, Parsons, Gonthier & Tétrault in memory of its founder, will be awarded annually to a student entering the year in which he expects to obtain his B.C.L. degree (whether the student is

pursuing a purely B.C.L. program or is taking the National Program). Selection will be made by the Faculty on the principal ground of academic excellence.

MACDONALD TRAVELLING SCHOLARSHIP. – Founded by the will of the late Sir William Macdonald "for the purpose of enabling English-speaking Law students to take a course of studies in France," the testator "deeming it of great importance that the English-speaking members of the legal profession should be proficient in the French language." The value of the scholarship is approximately $4,000. The scholar selected is required to pursue a year's study in the Law Faculty of a French University approved, in each case, by the Faculty. The award is made at the discretion of the Faculty to a student of the graduating class proceeding to the Bar, who has obtained first or high second class honours in the final examination, and who would be unable without such financial help to spend a year in France. The Faculty interprets the will of the late Sir William MacDonald as intending that the Scholarship be awarded only to students preparing for the legal profession in the Province of Quebec. Under the present regulations the Scholarship must be used in the year in which it is awarded. Candidates should make application for this Scholarship to the Associate Dean for Student Affairs.

McGILL LAW GRADUATES ASSOCIATION SCHOLARSHIPS. – The McGill Law Graduates Association offers two scholarships, one covering tuition fees for a student entering Second year and the other for a student entering Third year. Selection is made by the Faculty of Law in conjunction with a representative of the McGill Law Graduates Association, with broad discretion on the basis of need as well as academic and other merit. Apply to the Faculty Admissions Office.

CHARLES ALBERT NUTTING BURSARY. – Value $250, resulting from a donation made in 1930 by Miss Adelaide Nutting, M.A., R.N., in memory of her brother, Charles Albert Nutting, K.C., B.C.L. 1872. Awarded by the Student Aid Office to needy law students in good standing.

THOMAS ALEXANDER ROWAT SCHOLARSHIP. – Value $250, founded by Mr. Donald McKenzie Rowat, N.P., in memory of his brother, Lieutenant Thomas Alexander Rowat, B.C.L., who was killed in action at Lens, France, on June 28, 1917. Awarded for proficiency in French and in the old French law, on conditions set by the Faculty.

THOMAS SHEARER STEWART TRAVELLING FELLOWSHIP – Established in 1967 by the family of the late Thomas Shearer Stewart, Q.C., a graduate of the Faculty of Law class of 1908. The Fellowship, valued at not less than $2,700*, is to be awarded annually or as often as the University considers advisable, to a recent graduate of the Faculty of Law designated by the Dean of the Faculty, preference being given to a graduate who is a Canadian Citizen intending to reside in Canada upon completion of his studies. The Fellowship is to be used for a graduate to follow a program of studies in Law at a University approved by the Dean of the Faculty, other than at a University in Quebec. Candidates shall make application for this Fellowship to the Associate Dean for Student Affairs.

MR. & MRS. SAUL TARNOFSKY AWARD. – $100. donated by Mr. & Mrs. Saul Tarnofsky, and awarded by the Faculty to a first-year student in financial need. Apply to the Faculty Admissions Office.

WAINWRIGHT SCHOLARSHIPS – Established by a bequest from the estate of the late Arnold Wainwright, Q.C., for many years a lecturer in the Faculty of Law and a distinguished lawyer of the Montreal Bar. Two entrance scholarships of $1,500 each for 3 years and $2,000 each for the fourth year. Awarded to undergraduates of promise having distinguished scholastic records registered for the B.C.L. or LL.B. degree and proceeding to the National Program. Tenable for four years is candidates maintain distinguished academic standing. In addition, two scholarships of $2,000 each are available for students who have obtained their first law degree and are entering the last year of the National Program. Wainwright Scholars who show no financial need will be awarded the nominal sum of $200, the balance of monies to be allocated as Wainwright Bursaries to meritorious students with need. Apply to the Faculty Admissions Office.

It is the policy of the Trustees of the Wainwright Fund to entertain applications for supplements to the Thomas Shearer Stewart Travelling Fellowship from candidates showing an interest in the possibility of a career in law teaching.

10.2 BURSARIES, PRIZES AND LOAN FUNDS IN ALL FACULTIES

A complete list of scholarships and bursaries in the University generally and the regulations governing the various loan funds are given in the Scholarships Section of the *General Announcement,* which may be obtained at the Registrar's Office.

10.3 PRIZES

ALEXANDER SCHOLARSHIP. – $100, bequeathed in 1950 by the late Maurice Alexander, C.M.G., K.C., of London, England, as a token of esteem for the late Sir Charles Peers Davidson, former Professor of Criminal Law at McGill. Awarded by the Faculty.

HYMAN BAKER, Q.C. PRIZE. – $100 established by the family of Hyman Baker, Q.C. to com-

memorate his seventieth birthday. Awarded to the student obtaining the highest standing in Bankruptcy Law.

I. BALLON MEMORIAL MEDAL. — Established in 1955 by Mrs. I. Ballon in memory of her husband, the late Isidore Ballon, B.A. 1907, B.C.L. 1908, and awarded to the most outstanding student on the Board of Editors of the *McGill Law Journal*.

CANADA PERMANENT PRIZE. — An annual prize valued at $100, established in 1966 by Canada Permanent, awarded to the student who receives the highest standing in the group of courses comprising Wills, Successions, Marriage Covenants and Gifts.

CARSWELL PRIZES. — A book prize of $100 established in 1948 by Carswell Company Limited awarded to a student in the graduating class. There are two further book prizes of $50 each established in 1973 by the Company awarded to a lower year student. These prizes are awarded at the discretion of the Faculty.

PRIX SOUVENIR GEORGE S. CHALLIES — GEORGE S. CHALLIES MEMORIAL AWARD — Extract from address given by the Hon. Chief Justice Jules Deschênes of the Superior Court to the McGill Law Graduates Association on December 13th, 1973:

Mr. Justice Challies left us prematurely earlier this year and the judges of the Superior Court of the Province of Quebec have thought that they should erect a monument, however small, to his memory. Where then better than at his Alma Mater?

We have, therefore, raised among ourselves the sum of $1,900 which it is our pleasure to donate to McGill University, for the money to be held in trust and the return to be given yearly to a deserving student in the judgment of the Faculty of Law, under the name of "Prix Souvenir George S. Challies — George S. Challies Memorial Award".

JOSEPH COHEN, Q.C. AWARD. — This award of $315 is made to a deserving student selected by the Faculty.

JOHN W. COOK, K.C. PRIZE. — $575 awarded annually to an outstanding member of the graduating class in Law as determined by the Dean and Faculty on the basis of high academic standing throughout the course, participation in Faculty activities and possible postgraduate intentions.

JOHN E. CRANKSHAW PRIZE. — Established by friends of the late John E. Crankshaw, Q.C., formerly lecturer in Criminal Law at McGill, the prize consists of $300 to be applied to Bar fees, advocate's gown and any other needs. Awarded to the student who has the highest standing in Criminal Law subjects at McGill and has passed his final examination for admission to the Bar of the Province of Quebec.

MAX CRESTOHL PRIZE. — $65, established in 1959 under the Will of the late Max Nathan Zion Crestohl, Q.C. Awarded to the student who, in the opinion of the Faculty, has submitted the best written contribution to the *McGill Law Journal*.

JOSEPH DAINOW PRIZE. — $100, established by Professor Dainow, for writing in the area of Civil Law.

HAROLD G. FOX EDUCATION FUND PRIZE. — $100, offered each year commencing 1970-71 for a period of five years, awarded to the student who obtains the highest standing in the course on Intellectual Property.

CHIEF JUSTICE GREENSHIELDS PRIZE IN CRIMINAL LAW. — Value $95, endowed by the late Mrs. Greenshields in 1943 in memory of her husband, the late Chief Justice Robert Alfred Ernest Greenshields, D.C.L., LL.D., for many years professor of Criminal Law and Dean of the Faculty of Law, and awarded to the member of the graduating class in Law having the highest standing in Criminal Law throughout the law program.

H.E. HERSCHORN PRIZE. — $150, established by the late Mr. H.E. Herschorn, N.P., B.A. 1911, B.C.L. 1914, to the highest ranking graduating student who intends to enter the Notarial profession.

"I.M.E." PRIZE IN COMMERCIAL LAW. — $200, to enable a student to purchase law books, established by Mr. George S. McFadden, Q.C., awarded to the member of the graduating class having the highest standing in Commercial Law throughout the program.

LYON WILLIAM JACOBS, Q.C., AWARD. — Value $100. Originally established in 1957 by donations totalling $500, and increased in 1962 to $2,000 by Mr. and Mrs. Alvin B. Jacobs, Mrs. Sybil Jacobs Phillips, Dr. and Mrs. Morris Lieff, and Mr. and Mrs. Newman Biller, in honour of the late Mr. Lyon W. Jacobs, Q.C. Awarded to a Second or Third year Law student who, in the opinion of the Faculty, shows the most progress in his studies and is also in financial need.

JUNIOR BAR ASSOCIATION PRIZE. — A prize of $50 for the student who obtains the highest standing in Civil Procedure in the First year.

DEAN IRA A. MacKAY PRIZE. — $100, established by Mr. R. deWolfe MacKay, Q.C., in memory of his father, formerly Dean of the Faculty of Arts and Science of McGill University, and awarded at the discretion of the Faculty to the student obtaining the highest standing in the field of Torts throughout the program.

CHESTER MACNAGHTEN PRIZES. See Section 7.3.1 of the *General Announcement*.

ADOLPHE MAILHIOT MEMORIAL PRIZE. – A prize of $25 established by Mr. and Mrs. J.N. Mailhiot, of Victoriaville, P.Q., in 1927, to be used for the purchase of law books.

THE PHILIP MEYEROVITCH, Q.C. PRIZE. – $100, established in 1972 by his wife and children, to commemorate his fifty years of practice before the Bar of the Province of Quebec. Awarded to the graduating student obtaining the highest standing in Evidence.

MONTREAL BAR ASSOCIATION PRIZES. – A prize of $200 for the student who obtains the highest standing in Civil Law throughout the law program and $200 for the student who obtains the highest standing in Civil Procedure throughout the law program.

ALEXANDER MORRIS EXHIBITION. – Value $120, founded in memory of the late Hon. Alexander Morris, M.A., D.C.L., of Toronto, and awarded to the student who obtains the highest standing in the Second year.

LAZARUS PHILLIPS PRIZE. – $200, established by the wife and family of Sen. Lazarus Phillips to commemorate his seventieth birthday. Awarded to the student obtaining the highest standing in the combined examinations in Company Law and Taxation.

QUEBEC BAR PRIZE. – $100, awarded to the winning team in this Faculty's Moot Court competition.

THE LORD READING SOCIETY OF MONTREAL PRIZE. $150, established in 1952, awarded to the student who obtains the highest standing in the First year.

BENJAMIN ROBINSON MEMORIAL PRIZE. – A prize of $150 established by relatives and friends of the late Honourable Mr. Justice Benjamin Robinson in his memory, to be awarded to the student who obtains the highest standing in the final year of the National Program leading to the degree of Bachelor of Laws (LL.B.).

LOUIS H. ROHRLICK MEMORIAL PRIZE. – A prize of $100 established by associates of the late Louis H. Rohrlick, Q.C., in his memory, to be awarded to the member of the graduating class having the highest standing in Public International law throughout the program.

ELIZABETH TORRANCE GOLD MEDAL. – Founded in 1864 by John Torrance, Esq., prominent Montreal merchant, in memory of his wife. Their son, Frederick William Torrance, of the Bar of the Province, was for many years professor of Roman Law in this Faculty and a judge of the Superior Court. The Medal was first awarded in 1865 to Norman William Trenholme, who became, successively, a professor and then Dean of this Faculty, a judge of the Superior Court and then of the Queen's Bench, and ultimately acting Chief Justice of the Province. The Medal shares the lustre of the achievements of many other graduates distinguished at the Bar and on the Bench, amongst them the Right Honourable Charles J. Doherty, Hon. M. Justice Pierre-Basile Mignault, Aimé Geoffrion, K.C., and Arnold Wainwright, K.C.

It is awarded to the student who obtains, with the highest standing throughout the B.C.L. Program, his B.C.L. Degree as his first law degree at a spring convocation.

GERALD S. TRITT, Q.C. PRIZE. – $100, established in 1961 by the family and friends of Mr. and Mrs. Tritt and awarded to the student with the highest standing in the Special Contracts course.

WAINWRIGHT ESSAY PRIZE. – A prize of $500 will be awarded for the best written contribution by an undergraduate law student, whether the contribution be an essay or other paper and whether written as an elective or as part of a course requirement, or voluntarily. It will only be awarded if a high standard is achieved.

WILSON AND LAFLEUR (LIMITEE) AWARD. – This award of $100 is made every alternate year to a deserving First year student selected by the Faculty.

No scholarships or prizes will be awarded if, in the opinion of the Faculty, there is no candidate of sufficient merit.

10.4 LOAN FUNDS

The *A. Fleming Loan Fund* was established in 1954 by Mr. A. Fleming to aid students in the Faculty of Law. Application should be made to the Student Aid Office.

The *Louis De Zwirek, Q.C. Loan Fund* was established in 1969 by his widow in honour of her late husband from the Estate to aid students in the Faculty of Law. Application should be made to the Student Aid Office.

H. THOMSON, B.A., M.A., Ph.D(Case Western Reserve)

2 THE UNIVERSITY — GENERAL INFORMATION

The University's Royal Charter was granted by King William IV in 1821. Today, more than 16,000 students from around the world study for their degrees on the Mo .treal campus (which now covers an area of almost seventy acres) and at Macdonald College at the west end of the island. Macdonald College was established in 1907 for studies in agriculture, teaching training, and household science. The Centre for Continuing Education at the College and at McGill provides between 13,000 and 14,000 Montrealers with the opportunity to continue their education at night. Countless other Montrealers participate in the many conferences, lectures, musical and dramatic productions, film showings, etc., which take place on the two campuses.

THE FACULTY OF MANAGEMENT

In establishing the Faculty of Management in 1968 McGill recognized the academic importance of the inter-disciplinary studies that had, up to that time, been carried on in two of its schools — the old School of Commerce located in the Faculty of Arts, and the newer Graduate School of Business located in the Faculty of Graduate Studies and Research.

Since then both the graduate and undergraduate programs have been completely revised, to the enrichment of both.

A sum from one of McGill's major campaigns in 1956 had been set aside and ear-marked for a Management Building, but it was not sufficient to enable construction to proceed. To the great good fortune of the University, the late Samuel Bronf-

man, while a Governor of the University, made the key donation which enabled McGill to plan and build the Samuel Bronfman Building. It is located next to the Redpath and McLennan Libraries, on the border of the Campus and fully accessible to the community we serve.

AIMS OF THE PROGRAM

Management means getting things accomplished as effectively as possible. The ideal manager is a well-rounded man, with strong character, good judgment, breadth of vision and thorough competence in the management skills – behavioural and quantitive – which are being developed in this age of rapid technological change.

When everything is changing at such a fantastic pace, it is no longer possible to train good managers by simply passing on to them wisdom developed in a past age. Experience can still be a great teacher, but only if intelligently interpreted and applied. Our concepts must not be static, we must develop managers who can meet new challenges as they arise.

The different qualities required in a competent manager are teachable in varying degrees. Our aim is to give students an opportunity to master new management techniques, we believe there are certain management skills which constitute "core" subjects which every manager should have – but beyond these, we encourage students to follow lines of interest through which they will emerge broadly educated. A good manager must be able to understand and to work with both the generalists and specialists that are required in our complex society.

MANAGEMENT LIBRARY

The Management Library, occupying the complete second floor of the Bronfman Building, consists of over 35,000 books and periodicals and 13,000 pamphlets in the fields of economics, business, industrial relations, and management. These materials are readily available on the shelves and in files in the library reading room. The facilities of the McLennan Library, and the many other University Libraries are also available to students.

MANAGEMENT UNDERGRADUATE SOCIETY

The M.U.S. (Management Undergraduate Society) represents all undergraduate students in the Faculty of Management, and is charged with representing the students' views both inside and outside the Faculty. The M.U.S. is one of the most active student societies on campus and is responsible for many activities ranging from Management Week to social events within the Faculty.

GENERAL INFORMATION FOR NON–CANADIAN STUDENTS

A pamphlet describing immigration regulations in detail and containing notes and guidance to students from other countries is available from Canadian immigration officers, Canadian Embassies and British Consular offices, or from the Immigration Branch, Department of Citizenship and Immigration, Ottawa, Canada. Local immigration officers will be ready to give advice and help.

A useful handbook entitled *University Study in Canada* can be obtained from Canadian Embassies, Consulates, and the office of the High Commissioners and Trade Commissioners. A leaflet entitled *Notes for Foreign Students Who Wish to Attend a Canadian University* may be obtained from The Association of Universities and Colleges of Canada, 151 Slater St., Ottawa, Ontario K1P 5N1.

Further information may also be found in the McGill University *General Announcement,* available at the Registrar's Office.

3 FEES

The University reserves the right to make changes without notice in the published scale of fees.

Fees are refundable under special conditions described in the *General Announcement.*

The tuition fees for the Bachelor of Commerce program are $19.00 per credit plus $60.00 Student Services fees and $33.00 Students' Societies fees.

The schedule of fees for Part-time, Special and Visiting students is given in the *General Announcement.*

REGULATIONS FOR PAYMENT OF FEES

1. Students entering the University for the first time are required to pay the first instalment of their fees either by mail or in person at the Accounting Office within 10 days after registration, the second instalment before January 15, 1976.

2. Students who have completed one or more years and intend to register in the succeeding year must pay one half of the total sessional fee by mail or in person to the Accounting Office before August 23, 1975, otherwise they will not be permitted to register. Instructions for paying fees in advance will be mailed to all returning students, either with their Sessional Reports of Standing or a short time later. Students who have been notified by the University of the award of a scholarship, bursary or student loan, and who require this award for payment of the first instalment of fees, must obtain from the Student Aid Office, McGill University, a *Permit to Delay Payment of Fees.*

The second instalment is due by January 15, 1976. A late payment fee is charged for payment after the specified dates.

3. Students registering late must pay their fees at the time of registration, failing which they become

subject to the late payment fee and the provisions of the following paragraph:

As soon as possible after the prescribed dates for the payment of fees the Chief Accountant will send to the Registrar's Office a list of the registered students who have not paid their fees. Reports of standing, transcripts of record and diplomas will be withheld until such time as the fees are paid or a satisfactory arrangement is made with the Chief Accountant.

SPECIAL FEES AND PENALTIES

Application for Admission (for new students only)	$ 15.00
Late registration	25.00
Late payment (after specified date)	
First 30 days	10.00
After 30 days	25.00
Graduation fee	10.00
Duplicate diploma	10.00
Certified transcript of students' record:	
First 2 copies each	1.00
Additional copies, up to 10 copies made at same time, each	0.25
Re-reading examination paper	10.00
Supplemental examinations, each paper	10.00
Changes in course, each change after specified change of course period	5.00

4 SCHOLARSHIPS, PRIZES, MEDALS AND FINANCIAL AID

Full information is given in Seciton 7 of the *General Announcement,* which may be obtained from the Registrar's Office.

ACADEMIC COUNSELLING

All undergraduate students are required to meet with a Faculty Adviser prior to registration to complete a Study Plan Form. Students entering the Faculty for the first time are required to make an appointment with a Faculty Adviser to be held during the two week period prior to registration, and should call 392-5854 after receiving their letter of admission to the Faculty to arrange their appointment.

Other students will meet with their Faculty Adviser at the end of the winter term (April-May). NO STUDENT WILL BE PERMITTED TO REGISTER WITHOUT HAVING COMPLETED A STUDY PLAN FORM.

Students wishing general information about the program, or encountering difficulties (academic or personal) during the session, should contact Ms. Jean Deppisch at 392-5854.

5 STUDENT SERVICES AND RESIDENTIAL FACILITIES

Full information concerning Student Services and Residential Facilities is given in the *General Announcement* available from the Registrar's Office.

6 ADMISSION

a) The student will be admitted to the program upon satisfactorily completing the CEGEP or College Equivalent program (for Quebec students) or their equivalent (for non-Quebec students). To provide the entering student with as great a degree of flexibility in his pre-university program as possible, the specific course requirements for entry to the Faculty have been kept to two one-term courses in differential and integral calculus, in addition to the English and French courses required in every CEGEP program. Students who select accounting as their Management Elective group (see page 16) *and* who intend to qualify as C.A.'s after graduating, are urged in addition to include two one-term courses in micro and macro economics in their CEGEP program.

b) If a student feels that he merits admission with advanced standing on the basis of his academic background, he may apply for such advanced standing in his initial application for admission to the Faculty.

c) Students from outside the Province of Quebec, (for example students from the U.S.) who have not quite completed the equivalent of CEGEP graduation may under certain circumstances be admitted to the program; they will be required to take correspondingly more credits for their degree than those students admitted under the conditions of a) above.

d) Students wishing to enter the Bachelor of Commerce program in September must apply in writing, before March 1, to:

Admissions Office
F. Cyril James Building
McGill University
P.O. Box 6070, Station A
Montreal H3C 3G1

Students presently enrolled in another Faculty of this University wishing to transfer to the Bachelor of Commerce program in September must apply in writing not later than July 1, 1975 to:

Associate Dean of Admissions
Bachelor of Commerce Program
Faculty of Management
McGill University
P.O. Box 6070, Station A
Montreal H3C 3G1

e) The usual time for beginning the Bachelor of Commerce program is in September; nevertheless it is possible for a student to commence his program in either January or at the mid-May Summer Session. Further details about non-September admissions, course sequences, etc., can be obtained from the Undergraduate Program Adviser.

f) Each accepted candidate will receive an acceptance form which must be presented at Registration. The Faculty is not bound to accept all

candidates who have satisfied minimum admission requirements.

g) The Faculty endeavours to enable a wide range of students, from many different countries, to enrol in the Bachelor of Commerce program: nevertheless, a reasonably high competence in reading English and in writing either English or French is expected from all students. Although lectures, texts, and reference material will, in general, be in English, students whose native tongue is French will be permitted to write their examinations and term papers in that language.

READMISSION

A student wishing to return to the Faculty after an absence of a portion of an academic year or more must apply in writing to the Associate Dean.

ACADEMIC REQUIREMENTS FOR GRADUATION

a) A student is graduated upon satisfactory completion of 90 credits, subject to the curriculum requirements.

b) All students are expected to conform to the curriculum set out below. A student wishing to depart from that program must obtain written permission from the Dean.

c) Students in a Major or General program who graduate with a CGPA of 3.5 or better will be awarded their degrees with "Great Distinction"; those with a CGPA between 3.3 and 3.49 will receive their degrees with "Distinction".

RESIDENCE REQUIREMENTS AND STATUTE OF LIMITATIONS

a) A student who has transferred with advanced standing to the Faculty of Management from another college or university, or from another Faculty within this University, is required to complete a minimum of 60 credits while registered in the Bachelor of Commerce program, including such required courses as are deemed necessary, to become eligible for the degree of Bachelor of Commerce.

b) Completion of the degree requirements normally will require three years of study. A maximum of four years is permitted, however, for completion of the requirements for the degree. In exceptional circumstances, this maximum requirement may be extended by the Dean.

7 REGULATIONS

REGISTRATION

a) All students must register during the normal registration period as indicated in the Calendar of Dates of the University.

b) Students who fail to register during the normal registration period may do so later on the date designated by the University for late registration upon payment of a late registration fee.

c) Students who wish to change the courses for which they are registered within the change of course period must apply to the Associate Dean. Permission may be granted provided that such changes do not involve conflicts in timetable nor destroy the required sequence of courses. Course cards must be obtained from the Office of the Associate Dean.

d) Students wishing to withdraw from a course after the change of course deadline must obtain permission of the Associate Dean. A 'W' will be indicated on the transcript, but will not be counted in the GPA if withdrawal takes place before October 17, 1975 for A courses and February 20, 1976 for B courses.

e) Students who obtain approval from the Associate Dean to withdraw after this period will have a WF (withdrew failing) indicated on their transcript. Approval will be granted only in exceptional circumstances. The GPA will not include the W or the WF.

f) Each student is responsible for the completion of all courses for which he has registered. A student wishing to drop a course must do so in writing during the Change of Course period. Failure to complete course requirements will automatically result in a grade of F on the student's permanent record.

CREDITS

a) In general, a course lasting one term (13 weeks) with three hours of lectures per week (and laboratory periods and conferences, where appropriate) will carry a weight of three credits. Similarly, a three-hours-a-week course lasting the full academic year will carry a weight of six credits. Most of the courses in the program are three-credit courses.

b) Students wishing to make up deficiencies in their background, or to accelerate their progress to the degree, may apply to the Associate Dean to take summer courses, either at this University or at some other institution. Credit will be granted for such work only if the course(s) intelligently fits into the student's overall program, and if privilege of doing such work for credit has previously been approved in writing by the Associate Dean. Only grades considered the equivalent of C or better will be accepted in work done at another institution.

CLASSIFICATION OF STUDENTS

a) Students who have completed a College Equivalent or CEGEP program in the Province of Quebec will take a total of 90 credits in the university program.

b) Students from outside the Province of Quebec who have not completed the equivalent of CEGEP graduation may be admitted to the program, but will require more than 90 credits for their degree.

c) Sophomores are students who have accumulated less than 30 credits.

d) Juniors are students who have accumulated 30 credits or more but less than 60.

e) Seniors are students who have completed 60 credits or more.

COURSE LOADS

a) A full-time student in satisfactory standing will normally have a course load of 13 to 17 credits per term.

b) Sophomore students may be authorized by the Dean to take up to 18 credits per term if their record upon entering the program warrants it.

c) Full-time students whose grade point average the preceding year was 3.0 or better may take 18 credits per term.

d) Full-time students on progationary standing will have a course load of 12 credits per term, and may add to this a repeated course in which a grade of D or F was obtained at the first attempt.

e) Only full-time students in satisfactory standing will be eligible to register for Honours programs, or to compete for prizes, scholarships, or bursaries.

EXAMINATIONS

a) Students may write examinations in English or French.

b) Final examinations in all courses are held during an examination period immediately following the end of lectures. In some courses, there is no final examination; standing in these courses is determined by the instructor on the basis of term work or class tests.

c) No student will be permitted to write an examination in any course unless he has fulfilled the requirements of the course to the satisfaction of the instructor.

d) A student who has not received a satisfactory grade in a course may apply to write a supplemental examination in that course. If permission is granted, he must write this supplemental examination in the August immediately following. Written application to write a supplemental examination must be received by the Associate Dean's Office before July 15. A fee of ten dollars ($10.00) for each supplemental paper is payable to McGill University.

e) A student who, because of illness or other reasons verified and accepted by the Dean's Office, has been unable to write one or more sessional examinations, may write deferred examinations in their stead for full credit. The usual $10.00 fee for sitting a supplemental examination will be waived in this case. The Dean's Office must be informed within one week of the examination of the reasons for the absence.

f) Instructors are not permitted to grant any special treatment, regarding examinations, to any student. If a student wishes to contest his final grade in any course, he should apply in writing to the Associate Dean.

LETTER GRADES AND THE GRADE POINT AVERAGE (GPA)

a) The following letter grade and rating will be used in assessing course results:

A	(80% – 100%)	4	Satisfactory
B	(65% – 79%)	3	
C	(55% – 64%)	2	
D	(45% – 54%)	1	Conditional Pass
F	(less than 45%)	0	Failure

b) A grade of C or better is required for all courses which are prerequisite to further courses in the student's program. In addition, *students will be required to obtain a satisfactory grade (C or better) in all core courses.* The only exception will be that one D in each academic year will be tolerated in the student's core program, provided that course is not a pre-requisite to further courses in his program. If two or more D's are obtained in core courses, the excess over the single allowable D must be improved.

c) A failure carries no credit towards the degree;

d) A grade of D is considered a pass only when it is in a terminal course;

e) A grade point average (a weighted average of the ratings obtained in all courses taken during the preceding twelve months, with the number of credits per course serving as the weight for the course) will be computed in May of each year. For example, a student who achieves a B in a 6 credit summer course the preceding summer, and obtains an A, B, B, D, D, F in 6, 3, 6, 6, 3, 6 credit courses respectively (provided the D's are in terminal elective courses) will have earned only 30 credits, and will have a grade point average of 2.2.

f) The student's standing will be determined on the basis of his annual grade point average as follows:

Satisfactory standing – GPA of 2.0 or better

Probationary standing – GPA of 1.2 to 1.99 in Sophomore year – GPA of 1.5 to 1.99 in subsequent years

Unsatisfactory standing – GPA less than 1.2 in Sophomore year – GPA less than 1.5 in subsequent years.

g) The cumulative grade point average (CGPA) will include all courses taken by the student from the beginning of his Sophomore year.

h) A student on probationary standing registers for a maximum of 12 credits (see Section entitled Course Loads) per semester and must achieve by the end of that year either a CGPA of 2.0 or better, otherwise, the student's standing becomes unsatisfactory. A student on probation is not permitted to hold any executive position in campus organizations, nor engage in intercollegiate sports.

i) A student whose standing is unsatisfactory will be required to withdraw from the Faculty unless there are extenuating circumstances, in which case he may appeal to the Associate Dean for permission to continue.

j) A student is required to have a CGPA of 2.0 or better upon graduation.

ACADEMIC RECORD

a) The student's transcript will include a listing of the courses taken and the letter grades obtained.

b) If a letter grade of D or F is subsequently improved upon, both the initial and final grade will appear on the transcript.

SUMMER SESSION

Each summer, from mid-May to mid-July, most of the core courses are offered by the Faculty of Management for full credit. They are available to Management students, and to students from other faculties and universities with the necessary course prerequisites. In addition, the University offers a number of courses in various disciplines at different levels during the summer. Information on summer courses is available from the Office of the Associate Dean.

8 CURRICULA AND PROGRAMS

CURRICULUM FOR THE B. COM. — GENERAL PROGRAM

The student who satisfies the minimum admission requirements, will be required to earn 90 further course credits, conforming to the curriculum set out below. A student wishing to depart from this program must obtain written permission from the Associate Dean.

The FOUR components of the program are:

CORE

A total of 42 credits taken in common by all students in the program. This involves 33 credits offered by the Faculty, and 9 credits offered by other Departments. Courses normally taken in the U1 year are Accounting I, Social Psychology, Organizational Behaviour, Principles of Economics (Economics Department), Statistics I and II, Applied Matrix Algebra (Mathematics Department). Courses normally taken in the U2 year are — Organizational Theory, Managerial Economics, Finance I, Marketing I, Management Information Systems I, Operations Research I.

A student who successfully completes core course material before entering the three-year program will, if the courses are judged by the Faculty to be the equivalent of core courses, be granted exemption from the corresponding core course. A student may replace the exempted course with any elective or higher level course offered in the Faculty for which he has the necessary prerequisites. It must be emphasized, however, that while the exemption absolves the student from the need to repeat the course material, he must still complete a total of 90 credits in his three year university program.

MANAGEMENT ELECTIVE GROUP

Each student will elect a total of 18 credits chosen from one of the ten Management Elective Groups listed below. The elective courses from the Group, together with the breadth provided by the Core listed above, should enable the student to develop some depth in one particular area in Management.

Accounting
Computers and Systems
Finance
Industrial Relations
International Business
Marketing
Organizational Behaviour and Personnel Policy, Small Business and Entrepreneurship
Quantitative Methods

NON-MANAGEMENT ELECTIVES

The student in the general program will choose at least eighteen credits outside the Faculty of Management. The only restriction is that at least twelve of these credits must be beyond the introductory level. The subject areas usually chosen by management students include Economics, French, History, Geography, Mathematics, Political Science, Psychology, and Sociology. Indeed, subject to the above restriction, the student may register for any courses given by the Faculties of Arts, Science, and Law, for which he has the necessary prerequisites, in order to satisfy his non-Management elective requirements. The attention of the student is drawn to a group of inter-disciplinary courses that examine selected aspects of the inter-relationship of man and his environment under the Environmental Studies Program, as well as the Food Services Option which requires taking 30 credits at Macdonald College in the U2 year. The student should consult the calendars of the appropriate Faculties for details of the courses offered.

UNRESTRICTED ELECTIVES

A student will choose a total of 12 credits in his U2 and U3 years without restriction.

Depending on the extent of his interests, the student may wish to choose courses in Management which complement his Management Elective Group. In this manner a student may achieve both depth and breadth in the chosen Group. On the other hand, the student may take further non-Management courses in order to gain a relatively liberal education.

In summary:

Core in Faculty of Management	33
Core taken outside the Faculty	9
Management Elective Group	18
Non-Management Electives	18
Unrestricted Electives	12
Total Credits Required	90

FACULTY OF MANAGEMENT – B. COM.

Core			*Management Elective Group*	*Non-Management Electives*	*Unrestricted Electives*
U1					
Accounting*	A,B.	(3)			
Social Psychology	A.	(3)			
Organizational Behaviour	B.	(3)			
Applied Matrix Algebra	A,B.	(3)		(6)	
Principles of Economics	D.	(6)		(6)	
Statistics I	A.	(3)			
Statistics II	B.	(3)			
U2					
Organizational Theory	A,B.	(3)			
Finance I	A,B.	(3)			
Managerial Economics	A,B.	(3)	(3)	(6)	(3)
Marketing I	A,B.	(3)			
Management Information Systems I	A,B.	(3)			
Operation Research I	A,B.	(3)			
U3			(15)	(6)	(9)

*Separate courses for accounting non-specialists (280-211) and specialists (280-212).

A. Indicates course offered in first term.
B. indicates course offered in second term.
A,B. indicates course offered in both terms.
D. indicates course extends over both terms.

The particular course sequence will be determined with an assigned Faculty member during the pre-registration period. See ACADEMIC COUNSELLING above.

The structure of the Undergraduate Program is in the process of being reviewed. This will result in minor changes being made from time to time. The structure outlined describes the program as it is presently constituted.

MAJOR AND HONOURS PROGRAMS

A student preferring a more intensive background in one subject area may elect a Major or an Honours program in that subject. Major programs are at present available in Economics, Economics and Political Science, Industrial Relations, Mathematics, and Psychology. A Major program exempts the student from the requirement of taking a Management Elective Group; he must complete all of the core courses, with the exception that he must substitute for certain core courses their equivalent in other department – Mathematical Statistics (Mathematics Department) for Statistics I and II; Honours Economics students only may substitute Economic Statistics (Economics Department). Although the requirements for a Major vary from one discipline to another, they basically require a student to take 54 credits in that subject, 36 of which must be in courses actually given by the relevant department in the Faculties of Arts and Science; the remaining 18 credits are chosen in related areas through consultation with the Department concerned. The degree of "Bachelor of Commerce", Major in " " is then awarded upon recommendation of the Department concerned.

Because of the heavier demands of Majors or Honours programs, a student desiring to pursue a program of this type must declare his intention by the beginning of the U2 year. The student is then assigned to an adviser from the appropriate department and a suitable program is worked out, incorporating this Faculty's core requirements and the requirements of the Major or Honours Department. The courses in the Major subject must be approved each year by the Majors adviser in the department concerned. Students wishing to take a Major program in a subject not listed above should consult the Associate Dean to determine whether such a program is possible.

Majors in Economics will be permitted by the Economics Department to count Statistics I and II as 6 of the required 36 credits in Economics, leaving 30 additional credits to be taken in Economics. All Major and Honours students in Econo-

mics will be exempted from the core course Managerial Economics.

The Major in Industrial Relations allows the student to study the main economic and social forces which affect the employer-employee relationships in a theoretical and practical setting. The student can choose from a wide range of courses in deciding how he or she will constitute the program, being able to concentrate to an extent in the areas of Industrial Relations which interests him or her. Students will be required to complete the core program in addition to courses 279–293, 394, 491, 492 and 278-688, and will choose 12 credits from: 154–306, 426, 166–260, 313, 420.

In subjects where the extent of overlap between the 36 credits of the Major subject and the Management core is not great it will be necessary for the student to enter the Major program at the beginning of his U1 year. This would be the case, for example, for a Major in Mathematics, since Mathematical Statistics would have to be substituted for Statistics I and II in the Sophomore year.

An Honours program is available in Economics, as well as a Joint Honours program in Economics and Accounting. The difference between the Honours and Major programs in Economics is not one of quantity but rather of quality, the Honours program involving study in greater depth.

Students who register with the Economics Department for their Honours program at the beginning of their U1 year will take the introductory Honours course, Introduction to Economic Theory, in place of Principles of Economics. However, a student who decides at the beginning of his U2 year that he wishes to follow the Honours program may be permitted to do so by the Economics Department if he has achieved sufficiently high standing in the general course, Principles of Economics. In his U2 year, the Honours Economics student will take three Honours courses: History of Economic Thought, Macroeconomics, Economic Statistics. In his Final year, he will choose three Honours Economics courses.

The Joint Honours program in Economics and Accounting will involve all the requirements of the Honours in Economics, with only two Honours Economics courses chosen in the Final year. In addition, the student will complete 18 credits in Accounting, courses 1, 2 and 7 and any other three courses in the Accounting Group.

Students wishing to pursue a Major or Honours program, or desiring further information about such a program, should consult the Associate Dean.

The requirements for satisfactory standing apply to students in a Major program as well as to students in the general program. Students in an Honours program will be required to maintain a 3.0 average in their Honours courses.

OPTION IN FOOD ADMINISTRATION

This program has been designed to provide the specialized knowledge needed for a satisfying career in the Hospitality Industry. There is a body of administrative and operational management concepts and principles that is common to the function of management in any industry. The challenge of a specialized program is to develop in the student the perspective, flexibility and creativity that will enable him or her to meet the vocational aspects of the specialization as well as providing the knowledge and ability to function in the constantly changing environment of management problems and decisions inherent in a complex multi-segmented growing industry. The program has been designed to intergrate the general managerial principles and concepts and the specific hospitality applications of these principles and concepts into a core of knowledge that will permit the graduate to be creatively employed with the greatest possible advantage to himself, to the community in which he lives, and the industry in which he works. The student follows the program as set out below:

CORE

as in present B. Com. program
done in U1 and U3 at McGill
(total 42 credits)

MANAGEMENT ELECTIVE GROUP

complete requirements of any of the 9 Groups
done in U1 and U3 at McGill
(total 18 credits)

NON-MANAGEMENT & UNRESTRICTED ELECTIVES

complete 8 required & 2 elective 3 credit courses below
done in U2 at Macdonald College

REQUIRED

Food Service Production
Food Facility Layout, Planning & Engineering
Basic Nutrition
Food Service Industry Administration
Food Standards 1
Food Standards 2
Food Microbiology and Sanitation
Food Administration Project

ELECTIVES (choose 2)

Instructional Communications 1
Food Products Development
Economics of Agriculture
Farm Production Economics
Renewable Resources Survey
Rural Sociology
Communication Extension Methods
Recreation Resource Management

DIPLOMAS OF THE ORDER OF CHARTERED ACCOUNTANTS OF QUEBEC, THE CORPORATION OF INDUSTRIAL ACCOUNTANTS OF QUEBEC AND THE CERTIFIED GENERAL ACCOUNTANTS CORPORATION OF THE PROVINCE OF QUEBEC

McGill Commerce graduates who wish to qualify for membership in any of the above professional accountancy associations are required to register with the respective association, to follow a program of studies through the McGill Centre for Continuing Education and to write a final professional examination. Related work experience under the control of the association is also required.

For further information, students should consult the Associate Director, Management, Centre for Continuing Education, Strathcona Hall, 772 Sherbrooke Street West, and the association of their choice. Their offices are located as follows:

The Order of Chartered Accountants of Quebec
630 Lagauchetiere Street West
Montreal H3B 2M7
Telephone: 861-1891

The Corporation of Industrial Accountants of Quebec
1509 Sherbrooke Street West
Suite 15
Montreal H3G 1L7
Telephone: 931-2509

The Corporation of Certified General Accountants of Quebec
5165 Queen Mary Road
Suite 512
Montreal H3W 1X9
Telephone: 487-3544

SUMMARY OF PROGRAMS OFFERED THROUGH THE FACULTY OF MANAGEMENT

Bachelor of Commerce Degree – A three-year program of full-time study (which can also be pursued on a part-time evening basis) designed to prepare the student for the B.Com. degree.

Evening Certificate and Diploma Courses – Courses offered jointly by the Faculty and the Centre for Continuing Education in accounting, business and management, and related subjects to enable qualified evening students to earn the certificate and/or diploma awarded by the Centre. Courses to assist evening students to meet the requirements of certain professional societies. (See *Calendar of the Centre for Continuing Education).*

The Financial Research Institute – McGill students have access through the Financial Research Institute to one of the largest financial and economic data banks in the world. The Institute itself is a non-profit corporation which is jointly owned and operated by Canadian Companies and Universities. The purpose of the Institute is to foster knowledge and understanding of all quantitive aspects of financial and economic analysis.

McGill Management Institute – The Institute offers a series of courses, seminars, and other training activities for business executives.

Master of Business Administration Degree – A two-year program of full or part-time study leading to the Master in Business Administration degree, for qualified students holding an undergraduate degree. Students with a Bachelor of Commerce degree, may, after completion of four or five selected courses, apply to enter the second year of the MBA program. Details are available from Ms. Brenda Martin at 392-5938

UNDERGRADUATE COURSES OF INSTRUCTION

SPECIAL NOTE

Course numbers involve a seven place designation (see illustration below).

280 – 3 2 3 B

Field 1 – Involves a three-digit number designating the department or group within the University offering the course. In the Faculty of Management the following association of numbers and subject areas will be used.

271	Accounting
272	Behavioural Science
273	Computers and Systems
274	Finance
275	Marketing
276	Policy
277	Quantitative Methods
278	General
279	Economics and Industrial Relations
280	Core

Field 2 – is a number which designates the level at which the course is usually taken.

Number	Year usually taken in
2	U1
3	U2
4	U3

Field 3 –designates the subject area, being the third digit of Field 1 for elective courses.

Field 4 –designates the sequential number of the course in that subject.

Field 5 – is a letter designating the time of year the course is given.

A: duration first term only
B: duration second term only
D: duration through first and second terms

When no term is designated the course is in some years offered in first term and in others in second, an up-to-date schedule should be consulted.

The number of credits that a course carries is not indicated in the course number; in the following course descriptions the course credits are indicated separately.

Example: The course number 280-323B denotes a course offered by the Faculty of Management, part of the core, usually taken in the U2 year, in Behavioural Science, the third course in that subject, given in the second term. This corresponds to Organizational Theory.

CORE COURSE DESCRIPTIONS

280-211A,B. ACCOUNTING I. (3 credits). For students not intending to specialize in the subject. An introduction to business accounting, considered as an information system serving the decision needs of investors and lenders (financial reporting), and as an aid to management in the planning and control of operators (Management accounting).
Staff

280-212B. ACCOUNTING FOR SPECIALISTS. (3 Credits). For students intending to specialize in the subject. An introduction to the elements of financial accounting and accounting theory.

280-221A. SOCIAL PSYCHOLOGY. (3 credits). Method and theories of analysing individual and small group behaviour. Topics include person perception, social motivation, attitudes, conformity, group structure, group dynamics and leadership phenomena. Experimental approach to social behaviour is emphasized.

280-222B. INTRODUCTION TO ORGANIZATIONAL BEHAVIOUR. (3 Credits). The social psychology of organizations, the relationship of man to the organization in which he works, his motivation, attitudes and involvement in his work. Theories of perception, motivation and leadership as they relate to organizational problems.

280-323A,B. ORGANIZATIONAL THEORY. (3 Credits). The organization as a unit of analysis. Analysis of organizations as distinctive collectivities through an understanding of theories and problems of organization. Contributions of psychology, sociology and economics towards solving organizational problems of adaptation authority and power, conflict resolution, etc.

154-200D. ECONOMIC ANALYSIS AND APPLICATIONS. (6 Credits). An introduction to the study of economics, including price theory, national income determination, money and banking, international economic relations, and economic policy.
Offered by the Economics Department

280-341A,B. FINANCE I (3 credits) (Prerequisites: Accounting 280-211 or 212, Economics 154-200D). An introduction to financial management and the role of finance, both within the firm and the economy as a whole. The institutional framework of the firm is discussed, including legal forms, taxes, financing instruments and the capital markets. An introduction to the analytics of finance is presented including the pricing of financial instruments, simple models of capital market equilibrium, the financial structure of the firm, cost of capital, dividend policy, investment criteria for new capital spending proposals, and working capital management.

189-224A,B. APPLIED MATRIX ALGEBRA (3 credits) Matrix addition and multiplication. Partitioning into blocks. Trace and determinant. Simultaneous linear equations. Rank and inverse. Symmetric matrices, and their eigenvalues and eigenvectors; reduction to diagonal form. Positive definite and semi-definite matrices; quadratic forms. Applications to and examples in operations research, linear programming and statistics, with use of the computer. *Intended for students interested in applications of matrix algebra to Management, Social Science, and similar fields.*

280-331 A,B. MANAGEMENT INFORMATION SYSTEMS I. (3 credits). This course provides an introduction to computer systems and program flowcharting. Specific emphasis is placed on developing the ability to program (in Fortran) and utilise the resources available on the McGill timesharing system. Problems of implementing computer systems in the organization are discussed.
Professor Howson

280-393A,B. MANAGERIAL ECONOMICS. (3 credits). The course focuses on the application of economic theory to management problems and the economic foundations of marketing, finance, and production. Attention is given to the following topics: price and cost analysis, demand and supply analysis.

280-352A,B MARKETING MANAGEMENT. (3 credits) An introduction to marketing management, focusing on the problems of the marketing manager in the measurement of market opportunities and the allocation of the marketing effort. Emphasis is on decision-making in a marketing context. Topics covered include: the marketing concept; marketing strategies; marketing research; buyer behaviour; product and price policies; advertising, distribution and sales force decision. The course relies on lectures, text material and case studies.

280-373A,B. OPERATIONS RESEARCH I. 3 credits; *Prerequisite: Applied Matrix Algebra or*

Linear Algebra). The object of the course is to introduce the student to applications of mathematical model building and analysis in managerial decision-making. The student is introduced to some of the following topics: mathematical programming including linear programming and network analysis; simple stochastic processess including waiting lines and inventory systems; simulation. Students intending to pursue Quantitative Methods should take the course in the fall term, as should students with a strong quantitative background. All others should take the course in the second term.
Professor Sandiford

280-271A. STATISTICS I. (3 Credits; *Prerequisite: 6 credits in calculus).* The course introduces the student to statistical concepts and methodology, demonstrates their application to management problems, and constitutes a foundation for further study in the subject. Topics include: descriptive statistics and statistical inference; probability theory, random processes, some important discrete and continuous probability distributions, sampling distributions, introduction to decision theory, index numbers.
Professor Teitlebaum

280-272B. STATISTICS II. (3 credits; *Prerequisite: 6 credits in Calculus, Statistics I or equivalent).* Decision theory, hypothesis testing and estimation, goodness-of-fit tests, analysis of variance, sample surveys and experimental design, simple and multiple regression and correlation analysis, time series.
Professor Teitlebaum

MANAGEMENT ELECTIVE GROUPS

ACCOUNTING
COMPUTERS AND SYSTEMS
FINANCE
INDUSTRIAL RELATIONS
INTERNATIONAL BUSINESS
MARKETING
ORGANIZATIONAL BEHAVIOUR AND PERSONNEL
POLICY, SMALL BUSINESS AND ENTREPRENEURSHIP
QUANTITATIVE METHODS

Each of the Management Elective Groups offered has a minimum of 18 credits to be taken from the Group. The student will note that a considerable degree of choice is present within each Group.

In general, the student will begin taking courses from his Group in the second semester of his U2 year; however, a student entering his U1 year with some exemptions from the Core program may so arrange his program to be able to begin his Group in his U1 year.

An adviser is appointed each year for each Management Elective Group to assist students in the general problems of choosing a Group, and to provide students with additional information for intelligent course selection. See ACADEMIC COUNSELLING above.

MANAGEMENT ELECTIVE GROUPS

An adviser is appointed each year for each Management Elective Group to assist students in the general problems of choosing a Group, and to provide students with additional information, for intelligent course selection. See ACADEMIC COUNSELLING above.

ACCOUNTING GROUP

Adviser: Professor Gordon

1. FINANCIAL ACCOUNTING I (3 credits)
2. FINANCIAL ACCOUNTING II (3 credits)
3. FINANCIAL ACCOUNTING III (3 credits)
4. ACCOUNTING THEORY (3 credits)
5. BUSINESS TAXATION (3 credits)
6. SYSTEMS AND AUDITING (3 credits)
7. MANAGEMENT ACCOUNTING (3 credits)
8. MANAGEMENT ACCOUNTING II (3 credits)
9. MANAGEMENT ACCOUNTING III (3 credits)
10. COMPUTER–BASED INFORMATION SYSTEMS (3 credits)
11. SYSTEMS ANALYSIS (3 credits)
12. MANAGEMENT INFORMATION SYSTEMS (3 credits)
13. BUSINESS LAW (6 credits)

Unlike other elective groups, the accounting program has been designed on the understanding that students wishing to follow this specialization will be able to decide accordingly immediately on entry, instead of at the beginning of their U2 year. For those exceptions (with grade C or better in course 280–211) who decide on accounting specialization *during* the U1 year, special arrangements will be made to convert. This will involve additional work without supervision during the summer vacation. Any such students should consult the Faculty Adviser for Accounting as early as possible.

The Accounting Group is made up of nine courses in Accounting (1–9 above) and four courses in related subjects (10–13 above). It is designed primarily to provide a reasonably analytical introduction to accounting and cognate subjects for students seeking careers in industry, government service or the accountancy profession.

Students who intend to enter the accountancy profession as chartered accountants must take courses 1 to 7 above.

Students who intend to enter the Accountancy profession or who are preparing for careers in industry or government service must take courses 1, 2 and 7 and any other three courses in the above list.

Intending C.A. students will be permitted to substitute a course in Business Policy for the non-Management elective in their Final year.

Intending C.A. students may gain exemption from all but five of the qualifying courses for the C.A. examinations if they so desire. The program for such a student, entering the B.Com. program with no exemptions, would be as follows:

Year Courses

CORE

U1 Accounting 280-212B;
Principles of Economics,
Social Psychology,
Introduction to Organizational Behaviour,
Statistics I and II, Applied Matrix Algebra

U2 Finance I, Managerial Economics,
Management Information Systems I,
Operations Research,

U3 Marketing I, Organizational Theory

MANAGEMENT ELECTIVE GROUP

U2 Financial Accounting I and II,
Management Accounting I and II

U3 Financial Accounting III
Systems & Auditing, Business
Taxation, Accounting Theory

NON-MANAGEMENT ELECTIVE GROUP

U1 6 credits
U2 6 credits
U3 6 credits of Business Law* (outside the Faculty)
U3 Entrepreneurship and Corporate Policy*
or Seminar in Organizational Strategy

* courses may alternatively be taken during the summer, outside of the degree program, or at the Centre for Continuing Education.

It should also be noted that students are advised to take Accounting Theory in the *U2* year as their unrestricted elective.

Although 280-212 is the normal course taken by students continuing in Accounting, students who take 280-211 can contact the Accounting adviser's office to determine what additional private summer study should be followed to be permitted to continue with the full *U2* accounting program.

COMPUTER AND SYSTEMS GROUP

Adviser: Professor Howson

1. COMPUTER-BASED INFORMATION SYSTEMS (3 credits)
2. SYSTEMS ANALYSIS (3 credits)
3. COBOL, FILES (308-230) (3 credits)
4. INFORMATION SYSTEMS DESIGN (3 credits)
5. MANAGEMENT INFORMATION SYSTEMS II (3 credits)
6. ASSEMBLER LANGUAGE (308-210), OR (3 credits)
7. DATA BASES (308-320B) (3 credits)

Item 6 or 7 may be replaced by one of:

8. Three credits chosen from the ACCOUNTING GROUP
9. Three credits chosen from the FINANCE GROUP.
10. Three credits from the QUANTITATIVE METHODS GROUP.

The object of the group is to provide the student with an opportunity to study the management use of computers and corcepts analysis in some depth. The student is required to take all courses 1—5. Students with strong interest in the technological aspects of computers are advised to take courses 6 and 7 in addition. Students who are primarily interested in the application of computers to management systems may substitute three credits as indicated above. It is recommended that students wishing to enter this group endeavour to take the core course Management Information Systems I in the first year of their program.

FINANCE CONCENTRATION REQUIREMENTS

Category A:
Finance I 280-341 (3 credits)
Finance II 274-342 (3 credits)

Category B:
Applied Corporate Finance 274-443 (3 credits)
International Financial Management 278-482 (3 credits)
Investments and Portfolio Management 274-441 (3 credits)
Capital Markets and Institutions 274-442 (3 credits)

Category C:
Management Accounting III 271-416 (3 credits)
International Business 278-382 (3 credits)
Business Taxation 271-412 (3 credits)
Business Law 278-384 (6 credits)
Statistics III 277-372 (3 credits)
Operations Research II 277-374 (3 credits)
Simulation 277-678 (3 credits)
Financial Accounting I 271-311 (3 credits)
* Public Finance 154-408D (6 credits)
* Money and Banking 154-302D (6 credits)
* International Trade and Finance 154-423D (6 credits)
Applied Corporate Finance 274-443 (3 credits)
International Financial Management 278-482 (3 credits)
Investments and Portfolio Management 274-441 (3 credits)

Capital Markets and Institutions 274-442 (3 credits)
Others (With Approval) (3 credits)

For the B. Com. concentration in Finance, the student must take both courses in Category A (note that Finance I is the core finance course required of all B. Com. students), 6 credits in Category B, and 9 credits in Category C. Courses flagged by an asterisk are offered by the Department of Economics. The student is cautioned to observe prerequisite requirements for the courses he selects. Students entering U3 in the 1975-76 academic year will be governed by concentration regulations in Finance previously in effect.

INDUSTRIAL AND LABOUR RELATIONS GROUP

Advisor: Professor Goldenberg

1. INTRODUCTION TO INDUSTRIAL RELATIONS (3 credits)
2. SEMINAR IN INDUSTRIAL RELATIONS (6 credits)
3. LABOUR ECONOMICS AND INSTITUTIONS (6 credits)
4. PUBLIC POLICY IN INDUSTRIAL RELATIONS (6 credits)
5. COLLECTIVE BARGAINING (3 credits)
6. GROUP DYNAMICS AND INTERPERSONAL RELATIONS (3 credits)
7. STRATEGIES OF MANAGEMENT & ORGANIZATIONAL DEVELOPMENT (3 credits)
8. CREATIVITY, INNOVATION & MANAGEMENT (3 credits)
9. SEMINAR IN ORGANIZATIONAL STRATEGY (3 credits)
10. TECHNIQUES OF SOCIAL RESEARCH (3 credits)
11. INDUSTRIAL SOCIOLOGY (3 credits)
12. LABOUR RELATIONS IN THE PUBLIC SECTOR (3 credits)
13. INDUSTRIAL RELATIONS IN QUEBEC (3 credits)

All students in this group are required to take Item 1 in their sophomore or junior year. Item 2 can be taken only in the final year.

INTERNATIONAL BUSINESS GROUP

Adviser: Professor Wright

The objective of the group is to help the student develop conceptual and analytical skills necessary to formulate feasible and effective management policies in multinational environments.

The student will take a minimum of 18 credits according to the following program requirements:

1. INTERNATIONAL BUSINESS ENVIRONMENT (3 credits)
2. INTERNATIONAL BUSINESS POLICY (3 credits)
3. INTERNATIONAL FINANCIAL MANAGEMENT (3 credits)
4. INTERNATIONAL MARKETING MANAGEMENT (3 credits)
5. At least three credits from among the following courses offered by the Economics Department:
   THE MODERN ECONOMIC HISTORY OF A SPECIFIC AREA (3 credits)
   INTERNATIONAL TRADE & FINANCE (6 credits)
   ECONOMIC DEVELOPMENT (3 credits)
   AFRICAN ECONOMIC DEVELOPMENT (3 credits)
   THE MODERN ECONOMIC HISTORY OF SOUTHEAST ASIA (3 credits)
   THE MODERN ECONOMIC HISTORY AND DEVELOPMENT OF LATIN AMERICA (6 credits)
   COMPARATIVE ECONOMIC SYSTEMS (6 credits)
6. At least three credits from among the following courses offered by the Political Science Department:
   POLITICS IN LATIN AMERICA (6 credits)
   POLITICS & GOVERNMENT IN SOUTH ASIA (3 credits)
   POLITICS & GOVERNMENT IN EAST ASIA (3 credits)
   POLITICS & GOVERNMENT IN AFRICA (6 credits)

Courses 1 and 2 will normally be taken in the U2 year. Courses 3 and 4 will be taken in the final year. The course selections under items 5 and 6 may be taken at any time; it is recommended, however, that they be taken as early in the student's program as possible.

The student should note that the Political Science prerequisite, Introduction to Comparative Government (6 Credits), will be taken in addition to the 18 credits required for this Group.

It is recommended that, where possible, the student try to take an economics course and a political science course both of which focus on the same geographic region, thus acquiring an interdisciplinary familiarity with a given area. With the permission of the adviser, a suitable upper-level course of foreign or international content from another field such as history, sociology, or law may be substituted for the Political Science option.

MARKETING GROUP

Adviser: Professor Cooper

The student is required to take the following course:

1. MARKETING RESEARCH (3 credits)

A minimum of 15 credits must be selected from among the following courses:

2. ADVERTISING MANAGEMENT (3 credits)
3. CONSUMER BEHAVIOUR (3 credits)
4. INDUSTRIAL MARKETING (3 credits)
5. INTERNATIONAL MARKETING MANAGEMENT (3 credits)
6. MARKETING PLANNING I (3 credits)
7. MARKETING PLANNING II (3 credits)
8. QUANTITATIVE ANALYSIS FOR MARKETING DECISIONS (3 credits)
9. RETAIL MANAGEMENT (3 credits)
10. SALES MANAGEMENT (3 credits)
11. PHYSICAL DISTRIBUTION (3 credits)

The following courses are recommended as electives:

166-217A MASS COMMUNICATION (3 credits)
166-218B SOCIAL ASPECTS OF MASS COMMUNICATION (3 credits)
204-307D PSYCHOLOGICAL ASPECTS OF DECISION MAKING (3 credits)

ORGANIZATIONAL BEHAVIOUR AND PERSONNEL GROUP

Adviser: Professor Khandwalla

1. GROUP DYNAMICS AND INTERPERSONAL RELATIONS (3 credits)
2. STRATEGIES OF ORGANIZATIONAL DEVELOPMENT (3 credits)
3. CREATIVITY, INNOVATIONS, AND MANAGEMENT (3 credits)
4. SEMINAR IN ORGANIZATIONAL STRATEGY (3 credits)
5. CONSUMER BEHAVIOUR (3 credits)
6. MARKETING RESEARCH (3 credits)
7. NATURE AND MEASUREMENT OF HUMAN ABILITIES (6 credits)
8. Psychological TESTS AND MEASUREMENT* (3 credits)
9. INDUSTRIAL SOCIOLOGY** (3 credits)
10. ADVANCED INDUSTRIAL SOCIOLOGY** (3 credits)
11. LEADERSHIP STYLE, STRESS AND STRATEGY (3 credits)

***Offered by the Psychology Department**
****Offered by the Sociology Department**

Students in this Group choosing Psychological Tests and Measurement and/or Nature and Measurement of Human Abilities will not be required to take Introductory Psychology, but should notify the course instructors that Introductory Psychology has not, in fact, been taken.

POLICY, SMALL BUSINESS & ENTREPRENEURSHIP GROUP

Adviser: Professor Pugsley

The student takes the following three courses:

1. MANAGEMENT ACCOUNTING (3 credits)
2. CORPORATE FINANCE (3 credits)
3. SMALL BUSINESS POLICY (3 credits)

In addition, a total of nine credits is chosen from among the following:

5. ENTREPRENEURSHIP AND CORPORATE POLICY (3 credits)
6. BUSINESS TAXATION (3 credits)
7. SEMINAR IN ORGANIZATIONAL STRATEGY (3 credits)
8. CREATIVITY, INNOVATION AND MANAGEMENT (3 credits)
9. BUSINESS LAW (6 credits)
10 SALES MANAGEMENT (3 credits)
11. INTERNATIONAL MARKETING MANAGEMENT (3 credits)
12. LEADERSHIP STYLE, STRESS AND STRATEGY (3 credits)

The student is recommended to consider one or two approved economics courses among his electives.

Unlike the other groups which, by their names, suggest a relationship with particular professions or departments of sizeable corporations, this group is intended for the student who is inclined toward small business and the objective of hopefully coming to own such a business, with the rewards and hazards this usually involves. Because the group spans several areas rather than concentrating and examining in depth as the other group selections do, some measure of coordination is necessary. The student in this group therefore, may, depending on the other courses he has chosen, be required to do a project study in his final year on some particular small or medium-sized company or industry that consists mostly of small business units, and this project report will be supervised by the group adviser.

MANAGEMENT SCIENCE GROUP (QUANTITATIVE METHODS)

Adviser: Professor Loulou

1. OPERATIONS RESEARCH II (277-374) (3 credits)
2. DETERMINISTIC DECISION MODELS (277-679A)
3. SEQUENTIAL DECISION MAKING (277-680A)
4. SIMULATION OF MANAGEME NT SYSTEMS (277-678A)(3 credits)
5. SAMPLE SURVEY METHODS AND ANALYSIS
6. APPLIED MULTIVARIATE DATA ANALYSIS (277-676A)
7. APPLIED TIME SERIES ANALYSIS FOR MANAGERIAL FORECASTING (277-675B)

8. APPLICATIONS OF ECONOMETRIC METHODS TO MANAGEMENT PROBLEMS (277-681B)
9. TOPICS IN QUANTITATIVE ANALYSIS (277-471)(3 credits)
10. COURSES IN OTHER DEPARTMENTS (up to 6 credits)

The student must choose a total of 18 credits from the above list. Courses 1 and 3 are **required** for all students in this group. Students who want to acquire a better theoretical foundation in Quantitative Methods are urged to take courses in the Mathematics Department and the School of Computer Science. Students who want to follow a program of more applied studies are urged to consider courses 3–10 Courses 3–9 are currently offered jointly with MBA students in the Faculty. Students having an interest in applications of Quantitative Methods in fields allied with Management are encouraged to consider quantitative course selections in other Faculties such as Economics, Engineering, etc.

All courses selected from outside the Faculty should be chosen in consultation with the Group Advisor and with his formal approval. Students are encouraged to select courses for their non-Management electives which contribute to Quantitative Methods. For instance, a Major program in Mathematics may be developed by students having an interest in a better preparation in Mathematics. Details of the Major requirements can be obtained from the Group Advisor.

ELECTIVE COURSES IN THE FACULTY OF MANAGEMENT

271-213. ACCOUNTING II. (3 credits; prerequisite 280-211 or 280-212) This course is intended for those who do not intend to become accounting specialists, but desire some further knowledge of the subject. The course will provide further topics and greater depth in the areas of both financial and managerial accounting.

271-311. FINANCIAL ACCOUNTING I. (3 credits; *Prerequisite: 280–212 or permission of instructor).* A detailed examination of the problems of measurement, recording and reporting of assets and related revenues and expenses.
Professor Marshall

271-312. FINANCIAL ACCOUNTING II. (3 credits; *Prerequisite: Financial Accounting I).* A continuation of Financial Accounting I, examining problems of liabilities and owner's equity.
Professor Marshall

271-313. MANAGMENT ACCOUNTING I. (3 credits; *Prerequisite: 280-211 or 280-212).* Cost accounting, budgeting and budgetary control, standard costing, breakeven analysis, variable costing, costs for decision-making.
Professor Laybourn

271-411. ACCOUNTING THEORY. 3 credits; *Prerequisite: 280-211 or 280-212).* The course will focus on developing a cohesive body of postulates which describe the discipline of accounting. A normative model (as opposed to positive) will provide the foundation for this endeavor.

271-412. BUSINESS TAXATION (3 credits; *Prerequisite: Financial Accounting II).* An examination of federal income tax and its impact on business operations. The material will cover the tax treatment of individuals, partnerships and corporations, and consideration will also be given to international aspects. Proposals for tax changes since the Carter Commission Report will be reviewed and emphasis will be placed on concepts underlying the most recent legislation.
Professor Laybourn

271-413. SYSTEMS AND AUDITING (3 credits; *Prerequsite: Financial Accounting II).* The principles of accounting systems design and auditing.
Professor Marshall

271-414. FINANCIAL ACCOUNTING III. (3 credits; *Prerequisite: Financial Accounting II).* Advanced topics in financial accounting.

271-415. MANAGEMENT ACCOUNTING II. (3 Credits; *Prerequisite: Management Accounting I).* A critical evaluation of accounting control systems and some related quantitative business controls. Conceptual and measurement problems in evaluating performance, including problems of decentralization. Control of the data-information flow.
Professor Amey

271-416. MANAGEMENT ACCOUNTING III. (3 credits; *Prerequisite: Operations Research I*) A survey of planning and decision concepts and models with a view to specifying the relevant data or information for planning and a number of common classes of business decisions.
Professor Amey

272-324B. COMMUNICATIONS. (3 credits). This course will be both theoretical and practical. The theory will relate to how people deal with other people in organizations involving encoding, transmission, receiving and decoding of messages. It will examine the knowledge, skills, attitudes and habits that are used in reading, writing, speaking and listening as we'l as nonverbal communications. It will analyse how to think clearly, and the theory of General Semantics. Students will study leadership skills in chairing a meeting. It will examine writing skills in detail.
Professor Robertson

272-420. GROUP DYNAMICS AND INTERPERSONAL RELATIONS. (3 credits). Students will

explore theory, research, and applications relating to group dynamics in task-oriented groups. Students will increase their level of awareness of group dynamics and their skills at functioning in work groups. Teaching/learning methods will include lecture and discussion, learning cells, skill development exercises (role plays, video-tape analysis) and training laboratories (task group development and interpersonal sensitivity).
Professor Burnett

NOTE: *Elective courses in a particular area always have as prerequisite that area's core courses; students not in the Faculty of Management may ask permission of the instructor if they wish to have the prerequisite waived. Whenever other prerequisites exist they are listed.*

272-421. STRATEGIES OF ORGANIZATIONAL DEVELOPMENT (3 Credits). Organizational Development is a process of planned change in an organization's culture (i.e. the learned and shared assumptions about the norms that regulate member behaviour); a long-range effort to improve the organizations problem solving and renewal processes — utilizing the applied behavioural sciences and experience based learning. Students will examine theory, strategies, and techniques of organizational diagnosis and intervention — and will interact with consultants from various Montreal and Canadian organizations as they present case-studies of their on-going O.D. projects
Professor Hendrix

272-422 CREATIVITY, INNOVATION, AND MANAGEMENT (3 Credits). The course will deal with what we know about creativity, the process of innovation, the management of creativity, and the implications of innovation for modern management. The accent will be on studies of actual innovations, of creative individuals and organizations, interviews with creative managers, case studies and field studies.
Professor Khandwalla

272-423. PERSONNEL ADMINISTRATION. (3 credits). This course is designed to introduce students to the various issues involved in personnel administration. The concepts and methods used by the staff personnel unit in building and maintaining an effective work force in an industrial organization will be discussed. Topics include the development of the ability to design the personnel subsystem within the firm and the problems encountered in such areas as recruitment, selection, motivation, communication and management training. Both a theoretical and case approach will be used.
Professor Gorn

272-425. SALARY ADMINISTRATION (3 credits). This course is designed to expose the students to total compensation systems in business and service organizations. The emphasis is on understanding the various compensation theories and their relation to compensation policies within organizations. Behavioural effects of different types of compensation plans and how to make compensation plans more effective with the use of behavioural science knowledge will be discussed. Some of the topics that are covered in the course are: nature of financial motivation, compensation theories, job design and job analysis, compensation practices, designing a compensation package, pay and organizational effectiveness.
Professor Kanungo

273-332. COMPUTER BASED INFORMATION SYSTEMS (3 Credits). Methodology, techniques and components of systems design and programming, with emphasis on management information systems.
Mr. Bates

273-333. SYSTEMS ANALYSIS. (3 credits). Theoretical approaches to systems analysis are investigated. Analytical, algorithmic and heuristic optimization methods are considered from the viewpoint of management decision-making. Emphasis is placed on developing programs to solve related problems.
Professor Howson

273-431. INFORMATION SYSTEMS DESIGN (3 credits; *Prerequisite: 273-332 and 273-333).* Methods and procedures of designing business information systems are discussed. A comprehensive case study extending throughout the term emphasizes the application of the methodology.
Professor Howson

273-432. MANAGEMENT INFORMATION SYSTEMS II. (3 credits). This course is concerned with the management of the design and implementation of information systems. Systems to service functional requirements of the organization, concepts of total information systems will be considered. The case study method will be used. No prerequisites but enrolment restricted to maintain 1:1 ratio of students specializing in computer systems with non-specialists.
Professor Howson

274-342. FINANCE II. (3 credits)(Prerequisite: Finance I 280-341). A presentation of the modern theory of Finance. A foundation is established here from which students may pursue further specialization or from which specialists in other areas may appreciate their interaction with the Finance function. The theory covers three interrelated finance functions: capital budgeting, corporate finance (including cost of capital, capital structure, and dividend policy), and portfolio theory. An analytic approach is taken where objectives are specified, constraints recognised and the resource allocation of capital on both personal and corporate levels investigated.

274-441. INVESTMENTS AND PORTFOLIO MANAGEMENT. (3 credits)(Prerequisites: Finance

I 280-341 and Finance II 274-442 except for students entering U3 in the 1975-76 academic year.) The course examines the application of investment principles and security analysis to the selection and comparison of equity and fixed income securities in the current economic and financial environment. Also covered are: determinants of stock prices, growth models and portfolio diversification.
Mr. Ogilvie

274-442. CAPITAL MARKETS AND INSTITUTIONS (3 Credits). This course studies the functions of the capital markets through flow of funds analysis and an examination of portfolio activities of financial intermediaries. Also covered are: Securities regulations and ethical considerations, the term structure of interest rates and risk and rates of return in debt and equity markets.
Mr. Ogilvie

NOTE: *Elective courses in a particular area always have as prerequisite that area's core courses (Core Course Descriptions section); students not in the Faculty of Management may ask permission of the instructor if they wish to have the prerequisite waived. Whenever other prerequisites exist they are listed.*

274-443. APPLIED CORPORATE FINANCE. (3 credits)(Prerequisites: Finance I 280-341 and Finance II 274-442 except for students entering U3 in the 1975-76 academic year. Conceptual models and quantitative techniques studied in earlier courses are extended and/or applied to decision problems faced by managers in the Corporate Finance ares. Such problems include the management of working capital, capital budgeting, capital rationing, capital structure, dividend policy, the cost of capital, mergers and acquisitions, leasing, option valuation, and insurance. The course is intended to enhance the ability of students to consider Corporate Finance problems in terms of conceptual models and applicable quantitative techniques.

275-351. MARKETING AND SOCIETY. This course stresses the meaningful differences between marketing as a business function and marketing as the social exchange process of a developed economy. The traditional decisions in the marketing area are examined but primarily in terms of the social issues and the social concerns associated with such decisions. Particular attention is paid to consumerism, government regulation of both pricing and advertising and the marketing functions in the non-profit organization.
Professor Shapiro

275-353. PHYSICAL DISTRIBUTION (3 Credits). Systems approach to physical distribution; traffic management; plant and warehouse location; inventory control; information flows and order processing; supply scheduling; total cost planning; organizational patterns.

275-357A. MARKETING PLANNING I. (3 credits.) Marketing planning is viewed as a continuous process involving (1) setting company marketing goals, (2) assessing market opportunities, (3) developing a market strategy, (4) developing a set of integrated action programs, (5) monitoring the implementation of programs and adjusting the marketing plan. Emphasis is placed on steps 4 and 5, especially with regard to new product programs. Attention is given to the development of marketing planning systems - organization and procedure - to make marketing planning a formal, coordinated, continuous process. Problems of implementation of new plans and systems in an ongoing organization are established.

275-358B. MARKETING PLANNING II. (3 credits.) Marketing Planning II is the second part of the Marketing Planning sequence in which the class is conducted as a seminar, with groups working on different "live" marketing problems faced by local and national businesses. The groups progress from an initial briefing stage with their clients, to the definition and analysis of "the problem", and finally to the set of recommendations, which they present as a group to the class, professor and client. The objective is to simulate a real life business situation, and to provide experience in the formulation and presentation of marketing plans. Marketing Planning I is a prerequisite for this course.

275-451. MARKETING RESEARCH. (3 credits). Training in the design, execution and interpretation of survey and experimental methods in marketing. Emphasis is placed upon sample design, data collection and data processing; evaluation of alternative, experimental designs, execution of problems and interpretation of data. A review of illustrative research studies is made; an actual study is designed and data are collected and interpreted.

275-452. CONSUMER BEHAVIOUR. (3 credits). A study of basic factors influencing consumer behaviour. Attention is focused on psychological, sociological and economic variables including motivation, learning, attitude, personality, small groups, social class, demographic factors and culture, to analyze their effects on purchasing behaviour.
Professor Goldberg

275-453. ADVERTISING MANAGEMENT. (3 Credits). Surveys the field of advertising in its social and management contexts. Examines organization as it relates to the advertisers, the agency and media. Develops the creative approach, strategy and tactics as related to the total marketing management.
Staff

275-454. INTERNATIONAL MARKETING MANAGEMENT. (3 credits). This course examines the opportunities and problems that confront a firm that wishes to extend beyond the confines of its domestic environment and to penetrate foreign markets. Product, pricing, channel and communications policies are reviewed and modified to strike

the appropriate balance between adapting completely to each foreign market, on the one hand, and profiting from an integrated approach on the other. The latter part of the course concentrates on international trade questions and the fundamentals of export marketing in the Canadian context.
Professor Patton.

275-455. SALES MANAGEMENT. (3 credits). An analytical study of the techniques and policies employed in the operation of a sales organization. The approach is from the viewpoint of the sales manager. Recruiting, training, controlling and managing the sales force, sales appeals, quotas and sales analysis and forecasting will be discussed.

275-456. INDUSTRIAL MARKETING. (3 credits). This course focuses on decision-making and management of the marketing effort in an industrial product context. The student gains an understanding of the industrial marketing environment and of the problems faced by the industrial marketing manager. Topics covered include: the industrial marketing system; industrial purchasing; researching the industrial market; product, price distribution, selling and advertising decisions; strategies for industrial markets. A combination of lecture and case discussions are used.
Professor Cooper

275-458. QUANTITATIVE ANALYSIS FOR MARKETING DECISIONS (3 Credits). The development of analytic quantitative models of various aspects of the firm's marketing environment and of models of marketing decision problems. The use of such models as a basis for marketing decisions. Topics include: market measurement, estimation of various kinds of market data, identification of the relationships between marketing variables and forecasting.

275-459. RETAIL MANAGEMENT (3 Credits). Principles and methods of management as applied to retailing, including location, organization, personnel, buying, inventory control, selling and advertising, services, expenses and profits.

276-463. ENTREPRENEURSHIP AND CORPORATE POLICY. (3 credits). Selected business case problems embracing the top management viewpoint in medium-sized to larger-sized companies; sizing up situationa; formulating policies and planning programs of action; organizing administrative personnel and putting plans into action; control, day-to-day administrative problems, follow-up and re-appraisal. Emphasis is on basic objectives, and how each department can contribute most efficiently to the overall aims of the firm.
Professor Pugsley

276-464. SMALL BUSINESS. (3 credits). Much the same kind of coverage as in Corporate Policy, but concerned specifically with Small Business, which has different problems — identification of initial opportunity, finance to get started, early survival, etc. — from the corporations in later stages of development considered in Corporate Policy.
Professor Pugsley

276-465. SEMINAR IN ORGANIZATIONAL STRATEGY (3 Credits). This course takes a careful look at the concept of strategy and how organizations go about making strategy. The course will run in seminar form and will revolve around a set of readings and a field project. Groups will study local organizations and write papers on their strategy — past, present and future.
Professor Balke

276-466. LEADERSHIP STYLE, STRESS AND STRATEGY. This course tries to provide an analytic model of action in which the relationship will be emphasized (at a manifest and latent level) between an individual's leadership style, symptom formation and decision making processes in organizations. For that reason such themes will be emphasized as conceptual frameworks of human development, the relationship between psychopathology and leadership, and the nature of power, authority and motivation. Material will be mainly case studies, literature and historical studies of political and business leaders.
Professor Kets de Vries.

277-372. STATISTICS III. (3 credits). Managerial Decision-Making; stochastic process; Bayesian inference; decision theory; analysis of variance and experimental design; time series and forecasting; sample survey methods; quality control; nonparametric methods. The use of the computer as an aid in statistical analysis is stressed throughout the course.

277-374. OPERATIONS RESEARCH II. (3 credits). Several topics introduced in Operations Research I will be pursued in greater depth. Applications of these and other topics to managerial problems.
Professor Sandiford

277-471. SELECTED TOPICS IN QUANTITATIVE ANALYSIS (3 Credits). *Open to final year students with a strong background in quantitative methods. Subject for 1975-76: Decision Analysis.* The topical coverage of the course includes the classical decision model and classical decision criteria, utility theory and preference analysis, use of information in decision-making (classical and Bayesian decision analysis, decision trees, probability assessment), group decision making including selected topics in game theory, case applications of decision analysis to various areas of management.

278-381A. MANAGEMENT IN THE PUBLIC SECTOR I. Management in the Public Sector is a course on decision making in the public sector. It stresses the analysis of the executive decision making structure of the government and the processes for policy development and decision making.

It also stresses the interface between the public sector and the private sector.

278-382. INTERNATIONAL BUSINESS ENVIRONMENT (3 Credits; *Prerequisite: None*). An introduction to cultural, economic and political aspects of domestic, international and foreign environments and their effects on the international operations of business firms. The course seeks to familiarize the management student with the expanded world of the international economic theory; (2) developing a framework for examining country environmental constraints (educational, sociological, economic, political-legal) and relating them to the operations of multi-national enterprise; (3) studying the relationship between the international firm and the nation state, with particular reference to Canadian foreign ownership policies; (4) examining the international payments system and balance of payments concepts; and (5) discussing selected topics such as the role of multinational enterprise in economic development and planned economies.
Professor Wright

278-383. INTERNATIONAL BUSINESS POLICY (3 Credits; *Prerequisite: International Business Environment*). This course develops and applies conceptual approaches to general management policy and strategy formulation in multinational enterprises. Attention is focused first on the strategic planning process. Alternative forms of overseas involvement such as full direct investment, equity joint ventures, and contractual arrangements (licenses, management contracts, turnkey projects) are examined in detail through major case studies. Other selected aspects of management policy studied include logistics planning, location strategy, technology transfer, labour policy, and planning for international divestment. Emphasis is placed also on developing the students practical skill in negotiating international business matters through a major negotiating simulation exercise.
Professor Patton.

278-384D. BUSINESS LAW. (6 credits). Topics cover the meaning, classification and sources of law. Civil Law versus Common Law, other systems, Procedural Law, Contracts, protection of creditors, Breach of Contract, Special Contracts, Leases, Mandates, Loans Guarantees, Pledges, Proprietorship, Partnerships, Corporations, Government Regulation of Business, Labour Management Relations, Insurance and Bankruptcy, Patents, Negotiable Instruments, Property and Taxation.
Mr. Audet

278-385B. MANAGEMENT IN THE PUBLIC SECTOR II. (3 credits). This course will stress decision-making in the public sector. In particular, it will look at the structures of decision making in the government at the Cabinet, Departmental and Regulatory Agency levels. Particular stress will be placed upon a simulation project based around a current problem.

278-482. INTERNATIONAL FINANCIAL MANAGEMENT. (3 credits)(Prerequisites: Finance I 280-341). This course examines operational problems of financial management in the multinational enterprise: forecasting adversities in the international financial environment; managing foreign exchange risk; transfer pricing and profit remittance policies; multinational capital budgeting; use of Eurodollars and overseas sources of capital; consolidation of financial statements; and other related topics.
Professor Wright

279-294. INTRODUCTION TO INDUSTRIAL RELATIONS (3 Credits). An introduction to the problems of labour-management relations, the structure, function and government of labour unions, labour legislation, the collective bargaining process, and the public interest in industrial relations.
Professor Bairstow

279-393. LABOUR RELATIONS IN QUEBEC. (3 credits). Students in this course will study the evolution of industrial relations policy and practice in Quebec against the background of the rather unique socio-cultural, economic and political climate that has characterized this province at various stages of its industrial development. In addition to providing a historical perspective, the course will emphasize contemporary events and problems. The latter will form the primary subject matter of student research projects.
Professor Goldenberg.

279-394. COLLECTIVE BARGAINING. (3 credits). This course is designed for those students who wish to study principles in collective bargaining in Canada and abroad. It deals with the structure of the bargaining parties and the structure of bargaining itself. It is problem-oriented and relies on empirical data and case problems.
Professor Woods

279-491. INDUSTRIAL RELATIONS IN PRACTICE. (6 Credits). The object of this course is to give the students an opportunity to apply the knowledge that they have gained in their Industrial Relations Program. Students will be encouraged to come to grips with a wide range of problems in industrial relations theory, policy and practice. This is achieved by means of guided reading and small discussion groups, mock collective bargaining sessions, contact with practitioners in the field and problem-oriented research assignments. (Compulsory for Final Year Industrial Relations Majors. Others by permission of the instructor.)
Professor Goldenberg

279-492. PUBLIC POLICY IN INDUSTRIAL RELATIONS. (6 credits). Collective bargaining and public policy towards industrial relations. Empha-

sis is placed on recent public investigations into labour relations in the federal and provincial jurisdictions; international comparisons are included.
Professor Woods.

279-493B. LABOUR AND INDUSTRIAL RELATIONS THEORY. (3 credits). The objective of this course is to provide students with background understanding of modern industrial relations systems and perspective with regard to the nature of the labour movement. The course will be concerned with the history of thought regarding the labour movement during the last two centuries. Changes in economic and social institutions will be examined as part of the evolving context within which the labour movement has developed. Central to the course will be the conflicting theories which have emerged to explain the development of labour's economic and political institutions.
Professor Woods.

CALENDAR FOR SESSION 1975-1976

	1975
September 4, Thursday	Registration period for 1st year students
September 5, Friday	Registration period for 2nd year students
September 8, Monday	Classes begin for 1st and 2nd year students
September 30, Tuesday	Late registration
October 13, Monday	Thanksgiving Day - lectures cancelled
November 5, Wednesday	Fall Convocation
December 5, Friday	Classes end for 1st and 2nd year students
December 8, Monday to December 19, Friday	Examination period for 1st and 2nd year students
December 25, Thursday	Christmas Day. Administrative offices closed from 5:00 p.m. Wednesday, December 24 to 9:00 a.m. Friday, January 2, 1976
	1976
January 12, Monday	Lectures resume for 1st and 2nd year students
January 15, Thursday	Last day for change of status
February 2, Monday	Deadline for applying for graduate fellowships available through the Faculty of Graduate Studies and Research
April 9, Friday	Lectures end for 1st and 2nd year students
April 12, Monday to April 27, Tuesday	Final examination period for 1st and 2nd year students
April 16, Friday to April 19, Monday	Easter. Administrative offices closed from 5:00 p.m. Thursday, April 15 until 9:00 a.m. Tuesday, April 20.
May 24, Monday	Victoria Day. Administrative offices closed
June 8, Tuesday and June 9, Wednesday	Convocations

1 STAFF

1.1 ADMINISTRATIVE OFFICERS

ROBERT E. BELL, C.C., B.A., M.A.(U.B.C.), Ph.D.(McG.), D.Sc.(U.N.B., Laval), LL.D.(Tor.), F.R.S., F.R.S.C.
Principal and Vice-Chancellor

EIGIL PEDERSEN, B.A.(Sir G. Wms.), M.A.(McG.), D.Ed.(Harv.)
Vice-Principal (Academic)

LEO YAFFE, B.Sc., M.Sc.(Man.), Ph.D.(McG.), F.C.I.C., F.A.P.S., F.R.S.C.
Vice-Principal (Administration)

ALLAN McCOLL, D.F.C., B.Com.(McG.), C.A.
Vice-Principal (Finance)

DALE THOMSON, B.A.(Alta.), D.U.(Paris)
Vice-Principal (Planning)

WALTER F. HITSCHFELD, B.A.Sc.(Tor.), Ph.D.(McG.), F.R.Met.S.
Vice-Principal (Research)

COLIN McDOUGALL, D.S.O., B.A.(McG.)
Secretary General

JEAN-PAUL SCHULLER, B.A.(Ott.) **Registrar**

STANLEY J. SHAPIRO, A.B.(Harv.), M.B.A., Ph.D.(Wharton)
Dean of the Faculty of Management

ALBERT D. TEITLEBAUM, B.Sc., M.Sc., Ph.D.(McG.)
Associate Dean of the Faculty of Management

ALBERT F. BANVILLE,
Administrative Assistant to the Dean

SANDRA GUADAGNINO, **Admissions Officer**

DIANNE YAXLEY, **Administrative Secretary**

1.2 MEMBERS OF FACULTY

L.R. AMEY. B.Ec.(Adelaide), B.A., Ph.D.(Nott.)

D.E. ARMSTRONG, B.A., B.Com.(Alta.), Ph.D.(McG.)

F. BAIRSTOW, B.S.(Wis.), Fulbright Scholar in Ind. Rel.(Oxon.)

W.M. BALKE, B.Sc.(Alta.), M.Com.(Tor.), D.B.A.(Colorado)

P.C. BRIANT, B.Com., M.B.A.(McG.), Ph.D.(Mich.), C.A.

E. BURNETT, Dip.Ed.(Aber.), B.A.(Sir G. Wms.), M.Sc.(McG.)

K.F. BYRD, B.A., M.A., B.Sc.(Lond.), LL.D.(Mt. All.), Emeritus Professor (McG.), C.A.(Wales)

G.S. CAVADIAS, B.Sc.(Athens), M.Sc.(McG.)

P. CHANT, B.A.(Mich.), Ph.D.(Northwestern)

J.P. CHATEAU, B.Ec.(Liege), M.Ec.(Grenoble), D.U.(Paris)

R.G. COOPER, B.Eng., M.Eng.(McG.), M.B.A., Ph.D.(W. Ont.)

S. DOBROVOLSKY, M.A., Ph.D.(Col.)

J.A. DUFF, B.A., M.A.(Camb.), C.A.

W.H. ELLIS, B.A., (Qu.), M.B.A.(W. Ont.)

D. FEWINGS, B.Sc.(Man.), M.B.A.(Tor.)

P. FRIESEN, B.A., M.A.(Sask.), Ph.D.(Stan.)

M.E. GOLDBERG, B.A.(McG.), M.A.(Col.), Ph.D.(Ill.)

S. GOLDENBERG, B.A., M.A.(McG.)

L.A. GORDON, B.Sc., M.B.A.(N.Y. State), Ph.D.(Rensselaer)

G.J. GORN, B.A.(Sir G. Wms.), M.Sc.(L.S.E.), Ph.D.(Penn. State)

G.E. HENDRIX, B.A.(St. Mary's), M.A.(Manhattan), Ph.D.(Case Western Reserve)

H.R. HOWSON, B.Com.(Tor.), M.Com.(McG.), C.A.

R.N. KANUNGO, B.A., M.A.(Patna), Ph.D.(McG.)

M. KETS DE VRIES, M.B.A., Ph.D.(Harv.), Dr. Econ.(Amsterdam)

P. KHANDWALLA, B.Com.(Bombay), M.B.A.(Wharton), Ph.D.(Carnegie-Mellon), C.A.(India), M.S.I.A.

R.G. LAYBOURN, M.A.(Edin.), C.A.

R.J. LOULOU, M.Sc., Ph.D.(Calif.)

A.R. MARSHALL, B.Com.(Dal.), M.A.(McG.), M.B.A.(Wis.), C.A.

H. MINTZBERG, B.Eng.(McG.), B.A., S.M., Ph.D.(M.I.T.)

R.N. MORRISON, B.Eng.(McG.), M.A.(Oxon.)

D. PATTON, B.A.(U.N.B.), M.A.(Tor.), D.B.A.(Indiana)

W.H. PUGSLEY, B.Com., Ph.D.(McG.), M.B.A.(Harv.)

G. RATZER, B.Sc.(Glas.), M.Sc.(McG.)

H. RORKE, B.Com.(Qu.), M.B.A.(Calif.), M.S.(Roch.)

P.J. SANDIFORD, B.A., M.B.A., Ph.D.(Tor.)

J.G. SMITH, B.A.(Nott.), M.A., Ph.D.(Ohio)

A.D. TEITLEBAUM, B.Sc., M.Sc., Ph.D.(McG.)

G.A. WHITMORE, B.Sc.(Man.), M.Sc., Ph.D.(Minn.)

H.D. WOODS, B.A.(U.N.B.), M.A.(McG.), LL.D.(U.N.B.), F.R.S.C.

R.W. WRIGHT, A.B., M.B.A.(Dart.), D.B.A.(Indiana)

M. YALOVSKY, B.Sc., M.Sc.(McG.)

2 M.B.A. PROGRAM — GENERAL INFORMATION

2.1 HISTORY

In 1962, after several years of design and preparation, McGill's Faculty of Graduate Studies and Research established the Graduate School of Business. During the year following, new faculty members were hired and considerable time was devoted to the final formulation of a new M.B.A. curriculum. The first class was admitted and teaching began in Duggan House in September 1963.

Next door, in Purvis Hall, the (undergraduate) School of Commerce, part of the Faculty of Arts and Science, continued to function as a separate entity.

An ever-increasing demand for expansion, requiring a controlled and coherent policy which would relate both graduate and undergraduate programs, resulted in the merger of both schools as the Faculty of Management less than five years later, on June 1, 1968.

The new faculty, the most recently formed of McGill's twelve faculties, embraces all management and business education at the University. In 1972 the faculty moved to the modern facilities of the new Samuel Bronfman Building, in close proximity to the business and commercial heart of downtown Montreal.

Located at the heart of the island metropolis of Montreal, McGill University's community weaves in many of its activities with those of the multicultural city around it. This interaction adds an extra dimension to the teaching and research of McGill's Faculties of Agriculture, Arts, Science, Dentistry, Education, Engineering, Graduate Studies and Research, Law, Medicine, Music and Religious Studies and their many schools, institutes, departments, centres, and research units.

Despite this activity, to the eye the McGill campus retains a restful beauty. An avenue, lined with elms planted by former Principal Sir William Dawson, leads from the main entrance gates on Sherbrooke Street through the green lower campus to the Quebec gray stone of the Arts Building. Seen from a city skyscraper, the campus on the lower slopes of Mount Royal, together with the grounds of the Royal Victoria Hospital (one of the University's main teaching hospitals) and the city reservoir, seems to merge in with the mountain-top park.

When bequeathing his 46-acre property and £10,000 for a college, James McGill little realized that Montreal would one day surround his estate and the mountain as well. At his death in 1813, Montreal was only a small town on the bank of the river several miles below his property. An emigrant from Scotland, fur trader, Montreal businessman, civic and political leader and military man, he would have been amazed at the growth of Montreal and the size and complexity of the University he founded.

The University's Royal Charter was granted by King George IV in 1821. Today, more than 17,000 students from around the world study for their degrees on the Montreal campus (which now covers an area of almost seventy acres) and at Macdonald College at the west end of the island. Macdonald College was established in 1907 for studies in agriculture, teacher training, and household science. It has since widened its facilities at the College, and the Centre for Continuing Education at McGill provides between 13,000 and 14,000 Montrealers with the opportunity to continue their education at night. Countless other Montrealers participate in the many conferences, lectures, musical and dramatic productions, film showings, etc., which take place on the two campuses.

2.2 MANAGEMENT LIBRARY

The Faculty's Library is conveniently located on the second floor of the new Bronfman Building. The collection covers business and management, finance, accounting, marketing, industrial relations, industrial psychology, computer programming, statistics, taxation and economics. There are over 35,000 volumes of books, pamphlets, corporation and other reports and monographs, together with a good collection of government documents. In addition, more than 600 periodicals are currently received.

The library serves a wide community. Most business concerns in the Montreal area, as well as students and staff from the other McGill faculties, use its resources.

Students of the Faculty of Management are equally privileged in having full access to most of the 2,000,000 publications provided by the University Library System, many of these located in McGill's specialized collections. The Redpath and the McLennan Libraries house an extensive general collection of approximately 900,000 volumes.

2.3 AIMS AND APPROACH OF THE M.B.A. PROGRAM

Our primary objective is to help the student acquire the necessary knowledge and skills to analyze and solve complex organizational problems including problems of change in business, government and other institutions.

This primary objective reduces to the following explicit sub-objectives:

1. The student will acquire a knowledge of the fundamental concepts and theories necessary for effective management. The first year of the program is devoted to basic theories and concepts in both the underlying disciplines and the functional areas of management.

2. The student will develop skills in identifying, defining, analyzing and solving complex problems.

3. The student will become more effective in dealing with people. The program will both present the relevant concepts and train the student in interpersonal areas such as group problem-solving, consultation and leadership.

4. The student will become more self-aware, responsible and self-reliant. Various phases of the program are intended to enhance these traits for example, activities to increase the student's awareness of his personal values, beliefs and goals; ambiguous problem-solving tasks; greater responsibility for his own learning goals.

Most management education programs place their emphasis on the acquisition of knowledge and analytical techniques. Few programs use the knowledge and techniques to develop the problem-solving skills of the learner. Even less do programs encourage the self-development and autonomy of the learner. McGill's M.B.A. program does not undervalue the worth of knowledge and analytical techniques. In fact, the major portion of the first year of the program is devoted to basic concepts and theories and to mastering analytical techniques. However, the program is also deliberately designed to enhance such managerial skills as problem-solving, decision-making, researching, communicating, consulting and interpersonal skills. The design of the second year of the program permits the student to clarify his own learning goals and to select learning experiences (research paper, electives, projects) that contribute to the achievement of his objectives.

2.4 REQUIREMENTS FULL-TIME PROGRAM

Basic requirements for admission include:

a) an undergraduate degree from an accredited college or university (in any faculty) with a Grade Point Average of at least 3.0 out of a possible 4.0, or at least a B average.

b) The Admission Test for Graduate Study in Business and the Test of English as a Foreign Language. The latter is required of students whose mother tongue is not English.

The program commences in September of each year and applications must be received by May 15. (Early applicants will be given preference.) Applicants are advised of the admissions decisions as soon as all supporting documents and test score(s) are received. An official score report on the ATGSB, taken within the past 5 years, with a minimum score of 500, is preferred. However, the undergraduate record, ATGSB score, TOEFL (where applicable), work experience and letters of recommendation are the criteria used in making selections. A personal interview is not mandatory although candidates may be requested by the Admissions Officer to appear for such an interview.

Students who wish to work upon completion of their undergraduate degree may apply to our program and have their acceptance honored any time in the next three years.

2.5 APPLICATION PROCEDURE FOR ADMISSION

a) Complete the application form and Personal Academic Background Sheet. Return the first 3 copies of the application form along with the Personal Academic Background Sheet and the $15 fee to the address below:

Admissions Officer, M.B.A. Program,
Faculty of Management,
McGill University,
1001 Sherbrooke St. West,
Montreal, Quebec, Canada H3C 1G5.
(514)392-4336

Please note that a file will not be opened until an official application *with the $15 fee* is received. Please make sure you have indicated whether you are applying for the first or second year of the M.B.A. program. (McGill graduates are exempt from paying the application fee.)

b) Arrange to have duplicate copies of complete transcripts of your undergraduate marks (and graduate, if any) forwarded to us by your university.

c) Arrange to have two letters of reference forwarded to us by current, or former, university teachers. (Those more than 3 years out of university may ask employers to provide references.)

d) Arrange to have the Admission Test for Graduate Study in Business score and the Test of English as a Foreign Language score (where applicable) forwarded to us.

e) Only if space allows will applications received after May 15 be considered.

2.6 ADMISSION TEST FOR GRADUATE STUDY IN BUSINESS

The Admission Test for Graduate Study in Business (ATGSB) is administered by the Educational Testing Service. It is usually held on a Saturday in the months of January, March, July and November, at the locations and times shown in the Bulletin of Information for Candidates. It is recommended that applicants write the test in November and, in any event, no later than March. (It usually takes three weeks to one month for the test scores to be forwarded to us.)

For a copy of the Bulletin and registration forms, write to the Educational Testing Service, Box 966, Princeton, N.J. 08540, U.S.A. Applications must be received by the Educational Testing Service at least three (3) weeks prior to the test date. The arrangements for taking the test, including payment of a $12 fee, are made directly with the Educational Testing Service.

2.7 TEST OF ENGLISH AS A FOREIGN LANGUAGE

The main purpose of this test is to determine the English proficiency of individuals whose native language is not English. The test is held on Saturdays in the months of January, March, June and October. Applications must be received by the Educational Testing Service at least five (5) weeks prior to the test date. The fee for this test is also $12. For a copy of the Bulletin of Information, write directly to the Test of English as a Foreign Language, Box 899, Princeton, N.J. 08540, U.S.A. (It takes approximately one month for us to receive these scores.)

2.8 TRANSCRIPTS

Applicants must arrange to have two official transcripts of marks from all universities attended forwarded to the Admissions Officer directly from the universities. Copies of transcripts received from the applicants will not be accepted.

2.8.1 McGILL GRADUATES

It is the responsibility of each applicant to request official transcripts from the Registrar's Office even if they are former McGill graduates. Students who have followed courses through the Centre for Continuing Education must also request two official transcripts to be forwarded to the Admissions Officer by the Centre for Continuing Education.

Transcripts are confidential and neither the Registrar's Office nor the Centre for Continuing Education will issue transcripts unless they have first received a request from the applicant concerned.

2.9 LETTERS OF RECOMMENDATION

Applicants must arrange to have two referees send us letters of recommendations. Normally letters from former professors are required. However, applicants more than three years from graduation may substitute referees qualified to judge their capabilities. In either event, the letters of reference must deal with the applicant's suitability to undertake graduate studies in business. (Please note that there are no special forms provided for this purpose.)

2.10 FOREIGN APPLICANTS

1. We are unable to waive or defer either the application fee or tuition fee requirement for foreign students. Applications received without the $15 application fee will not be processed.

2. If an applicant has been selected to receive one of our awards, the financial aid is awarded only after registration in September. Therefore, foreign applicants must rely on their own resources to get into Canada.

3. Foreign students should contact the nearest Canadian Embassy or Consulate regarding student visas and immigration to Canada. Procurement may take up to three months. The Immigration Department by authority of the Canadian Government does not allow foreign students into Canada without proof of financial support for the duration of their stay in the country. Therefore, each applicant must supply us with a bank reference proving he is financially able to support himself for his two years of study at McGill. This should be forwarded to the Admissions Officer at the time of application.

4. We cannot assist in finding employment for foreign students. The regulations governing foreign students working in Canada should be checked with the nearest Canadian Embassy or Consulate (visas must be checked too.)

5. Foreign students wishing to work in Canada before applying to McGill, in order to finance their studies, must obtain landed immigrant status. Apply to the Canadian High Commission for landed immigrant status.

2.11 PROCEDURE FOR ACCEPTING OFFER OF ADMISSION

A registration deposit of $50 will be required from those admitted into the M.B.A. program. Cheques or money orders for $50 should be made payable to McGill University: (1) the $50 fee is payable immediately upon receipt of our letter of acceptance and reserves a place for you; (2) if the $50 fee is not paid within 30 days of your acceptance, we will assume that you are no longer interested in the program and no reservation will be made for you; (3) the fee is applied to tuition fees for those who inform us by May 15 that they will be joining our program and who, in fact, register by the given date of registration; (4) the fee is forfeited if accepted candidates do not inform us by May 15 that they do not intend joining our program for the forthcoming academic year; (5) the fee is refundable if accepted candidates inform us by May 15 that they will not be joining our program for the forthcoming academic year.

2.12 PHOTOGRAPHS

Students accepted into our program must submit three passport-size photographs for inclusion in our student record booklets within 30 days of their acceptance. All photographs must be in our possession by the end of July at the very latest.

2.13 REGISTRATION

a) All students must register during the normal

registration period as indicated in the Calendar of Dates, until the degree is awarded, either by paying the appropriate tuition fee or by paying the non-resident fee of $40.

b) Students who fail to register during the normal registration period may do so later on the date designated by the University for late registration, upon payment of a late registration fee.

2.14 FEES

All students are required to pay **at least half** of the total sessional fee 10 days after they register.

RESIDENCE. Students entering residence are required to pay **at least half** of the residence fee 10 days after they register.

LATE PAYMENT FEE. If payment is received after the time allowed, the following penalties will be assessed: $10 if payment is received within 30 days of the established due date, $25 if payment is received after 30 days of the established due date.

SECOND INSTALMENT. The second instalment of fees will be payable during the first week of January. The exact date will be announced at registration. Students whose tuition fees will be paid by a scholarship, fellowship, or by some outside agency must make note of this fact on their registration forms in the space provided for this purpose.

2.14.1 LATE REGISTRATION FEES

A $10 late fee will be charged for students registering after the normal registration period up until the time set aside for late registration.

2.15 IDENTITY CARDS

Students are advised both prior to, and at the time of, registration of the dates on which pictures will be taken for I.D. cards. Pictures are usually taken at David Thomson House, 3650 McTavish Street, at the beginning of October.

2.16 CLASSIFICATION OF STUDENTS

a) Full-time students are those taking all or almost all of the courses required in that academic year.

b) Half-time students are those taking approximately half the number of courses required for the degree in that academic year.

c) Part-time students are those in the M.B.A. I M.B.A. II evening program.

d) Diploma students are those who are following the equivalent M.B.A. I courses in the evening with the Center for Continuing Education.

e) Special students are those who are not working towards the degree. They may take no more than two full courses.

f) Visiting students are those from another university taking an elective in our Faculty.

g) Non-resident students are those not utilizing university facilities (e.g. library, thesis supervisor) but who are intending to complete their degrees and who are paying $40 to maintain registration.

2.17 ELECTIVES OFFERED IN OTHER DEPARTMENTS IN McGILL

Students who wish to take an elective offered in another department in McGill must first obtain approval from the M.B.A. Program Co-ordinator. Once approval is obtained, the student must obtain permission from the department offering the course before registering for the course.

2.18 CROSS-REGISTRATION

All Quebec universities have agreed to permit transfer of academic credit and course fees between themselves up to a maximum of two full (two-term) courses in any one year. The agreement is intended to include only those courses not offered at the home university and which fit into the student's program requirements. Authorization for a graduate student to cross-register must be obtained from the Program Co-ordinator. Once approval has been obtained, the student must complete a Visiting Students' form, obtainable from the Faculty of Graduate Studies and Research.

2.19 WITHDRAWALS

Students wishing to withdraw from the program must complete a Program Transfer form available from the Admissions Officer or Graduate Program Office. Students will not be considered as officially withdrawn until this form is completed. Students who drop out but who do not complete this form will be billed for the full tuition.

2.20 CHANGE OF ADDRESS

Students who change address during the year must complete a Change of Address form. These are available from the Admissions Officer. It is very important that students inform us immediately of any change of address.

We would also appreciate being kept informed of address changes after graduation.

2.21 VERIFICATION FORMS

A verification form, which provides an unofficial copy of the student's record to date, will be mailed out by the Faculty of Graduate Studies and

Research during the year. It is extremely important that the student check it carefully and inform the Faculty of Graduate Studies and Research of any changes so that the student's record will be correct at all times.

2.22 SPECIAL POINTS REGARDING THE M.B.A. PROGRAM

a) The M.B.A. program is a two-year program. It cannot be taken in one year.

b) There are two semesters. The academic year begins in September and ends May 1. (Please note there is no January session.)

c) It is up to the applicant to supply all the documents required. You must also have your ATGSB and TOEFL scores sent to us.

d) Applicants must make their own arrangements for accommodation. (Refer to Facilities section of Announcement.)

e) GRADING: The pass mark for each course is 65%. Any student failing two courses in one term or three courses in two terms can expect to be asked to withdraw from the program. Students in first year will be permitted to take two supplemental examinations which are normally held in July.

f) CREDITS, EXEMPTIONS: Advanced standing is granted for graduate work in business and related areas completed after earning a bachelor's degree, provided the course taken is deemed to be equivalent to one offered in the M.B.A. program. No more than 30 credits may be granted for graduate work done elsewhere.

Students who have completed undergraduate courses equivalent to required courses may receive exemptions from required courses by completing a special form for this purpose after registration. Exemption permits the substitution of an elective for the required course, but does not reduce the degree requirement. (In certain instances, credit (maximum of two) may be granted provided the student has been granted exemption and provided he has obtained an A from his university in the undergraduate course.)

3 CURRICULA AND PROGRAMS

3.1 ENTRY TO SECOND YEAR OF PROGRAM

Each year qualified students are admitted directly into the second year of the M.B.A. program, on either a full-time or part-time basis.

Candidates may qualify for admission into the M.B.A. II program as follows:

1) Upon successful completion of the first year full-time program.

2) Upon successful completion of the Diploma in Management program.

For more information on the part-time program contact:

Miss Brenda E. Martin,
Supervisor, Part-Time Programs,
Faculty of Management,
McGill University,
1001 Sherbrooke St. West,
Montreal, Quebec.
H3A 1G5
(514)392-5938

3.1.1 TRANSFERS FROM OTHER M.B.A. PROGRAMS

Students who have completed the first year of the M.B.A. program at another university and who wish to transfer into the second year of the program at McGill must state their reasons for the transfer and forward detailed course descriptions, two official transcripts of their undergraduate and graduate marks to date and a copy of their Admission Tests for Graduate Study in Business score before a decision can be made as to their acceptability.

Students who have completed the majority of work towards the M.B.A. degree at another university and who wish to transfer into our program to complete two or three electives will be accepted provided the home university is willing to grant them their degree. In such cases, a McGill M.B.A. would not be conferred.

Those interested in applying for entry into the second year of the full-time program should apply to:

Admissions Officer, M.B.A. Program,
Faculty of Management,
McGill University,
1001 Sherbrooke St. West,
Montreal, Quebec.
H3A 1G5
(514)392-4336

3.2 DIPLOMA PROGRAM

Prerequisites:

Business Statistics	(3 credits)
Survey of Basic Mathematics	(3 credits)

1. Statistics for Business Decisions (3 credits)
2. Managerial Finance (3 credits)
3. Economic Analysis of Business (3 credits)
4. The Economic Environment of the Firm (3 credits)
5. Behavioural Science (3 credits)
6. Data Processing and Computers (3 credits)
7. Introduction to Marketing Management (3 credits)
8. Accounting – A Management Approach (3 credits)
9. Organizational Theory and Design (3 credits)
10. Introduction to Operations Research (3 credits)

(30 credits)

The above ten (10) half-courses, offered by the Centre for Continuing Education in the evening, are equivalent to those offered in the first year of our full-time program. Upon successful completion of these courses, a student may apply for direct-entry into the second year of our program on either a full-time or a part-time (evening) basis. Applicants for direct-entry must obtain an average in excess of 70% on the above courses and must arrange to have two official transcripts of their Diploma marks forwarded to the Admissions Officer by the Centre for Continuing Education.

Please note that if a student must take a prerequisite course, he may apply for entry into the second year upon completion of 30 credits and will be permitted to substitute the missing required course for a half-course elective.

An announcement containing more information about the courses in the above program may be obtained from:

Centre for Continuing Education,
McGill University,
Strathcona Hall,
772 Sherbrooke St. West,
Montreal, Quebec.
H3A 1G5
Telephone: (514) 392-5244

3.3 M.B.A. II PART-TIME EVENING PROGRAM

The second year of the M.B.A. program may also be completed on a part-time basis over a three-year period. For further information on this program, write directly to:

Miss Brenda E. Martin, Supervisor
Part-Time Programs,
Faculty of Management,
McGill University,
1001 Sherbrooke St. West,
Montreal, Quebec.
H3A 1G5
(514) 392-5938

3.4 M.B.A. PROGRAM: GENERAL OUTLINE

McGill's Management Program, covering two academic years, leads to the degree of Master of Business Administration. The diagrams below provide an overview of the program and brief descriptions of the various stages follow.

3.4.1 FIRST YEAR

1st Term (Sept. – Dec.)

Basic Management Statistics
Accounting – A Managenemt Approach
Economic Analysis of Business
Data Processing and Computers
Behavioural Science

2nd Term (Jan. – April)

Introduction to Modelling Methods in Management
Finance I
Economic Environment of the Firm
Marketing Management
Organizational Theory and Design

SECOND YEAR

Required Courses

1st Term (Sept. – Dec.)

Skill Development
Management Policy

2nd Term (Jan – April)

Skill Development
Management Policy

Electives

A student may choose either (a) six electives and a Research Paper or eight electives.

Concentrations

The electives open to a student will depend on his area of concentration. The concentrations available are:

Accounting & Finance, Behavioural Science and Personnel, Finance, Industrial Relations, International Business, Management Information Systems, Management Science, Marketing, Policy and General Management.

Notes:

1. Details of the sequence of courses required in each concentration are shown on pages 13-15.
2. Course descriptions for electives are shown on pages 15-19.

4 COURSES OF INSTRUCTION

4.1 M.B.A. I PROGRAM

First year students are required to take the following courses:

277-673 BASIC MANAGEMENT STATISTICS. (Prerequisite: College entrance mathematics). Topics covered include: descriptive statistical analysis, common probability distributions (binomial, Poisson, normal), sampling procedures, sampling distributions, estimation, hypothesis testing, distribution-free procedures (tests of goodness of fit and

independence), simple and multiple regression, correlation, one-way analysis of variance, classical time series analysis, Bayesian probability analysis. The course stresses the use of computer programs as an aid in statistical analysis.

271-611 ACCOUNTING; A MANAGEMENT APPROACH. This course examines the role of accounting both as an external and an internal information system. However, the stress is primarily on the internal use of accounting data by management for planning and control purposes. The basic concepts of financial accounting are examined and topics covered include the measurement of income, statement analysis, price level changes and aspects of business combinations. In the planning and control area, topics covered include cost and control concepts, costing systems, budgeting, differential cost analysis and the measurement of performance.

279-692 ECONOMIC ANALYSIS OF BUSINESS. This course is primarily devoted to demonstrating the applications of economic theory and methodology in solving business problems. The following topics are discussed in some detail: demand, production, cost analysis, pricing, growth, concentration, profitability, and resource allocation of the firm. Marketing and sales forecasting techniques are also introduced briefly, and attention is given to opportunities for the application of incremental analysis.

273-631 DATA PROCESSING AND COMPUTERS. This course is an introduction to the applications of electronic computers in business and in industry. It covers the following topics: concepts of the logica organization of computers; characteristics of procedure-oriented languages and of executive systems; current trends in computer systems (time-sharing and multiprogramming); and current computer applications and future potentialities, with emphasis on business data processing. The computer course is designed as a service course to the core units. Students will be assigned projects by instructors of core units which will require the use of computers to solve. In the time the students allot to computers they will receive instruction and engage in computer skill development exercises as well as receive guidance by a computer expert on their core unit projects. The design of this course encourages the student to use the computer in the solution of management problems rather than to view computer programming as one more subject to master on the way to obtaining a degree.

272-621 BEHAVIOURAL SCIENCE. The course is designed to develop an understanding of the processes that underlie various behavioural phenomena. It is believed that many managerial decisions depend upon a sound knowledge of the dynamics of human behaviour. The course analyzes some of the basic concepts in the area of social psychology and discusses the implication of these concepts for the management. Stressing the development of an awareness of the methodological problems in behavioural research, the course introduces the student to some of the cognitive and dynamic processes within the individual. The processes contribute to the individual's interaction with other individuals within groups and organizations.

277-672 INTRODUCTION TO MODELLING METHODS IN MANAGEMENT. (Prerequisite: College entrance mathematics). Topics covered include: Introduction to Decision Analysis and Risk Attitudes, Inventory Control, Elementary Queueing Models, Simulation, Linear Programming Models and Extensions. The course stresses the formulation of problems and their solution by standard methods of computer packages.

274-641 FINANCE I. (Prerequisite: Accounting – 277-611 and Economic Analysis of Business – 279-692). An introduction to financial management and the role of finance, both within the firm and the economy as a whole. The institutional framework of the firm is discussed, including legal forms, taxes, financing instruments and the capital markets. An introduction to the analytics of finance is presented including the pricing of financial instruments, simple models of capital market equilibrium, the financial structure of the firm, cost of capital, dividend policy, investment criteria for new capital spending proposals, and working capital management.

279-691 THE ECONOMIC ENVIRONMENT OF THE FIRM. This course examines the main macroeconomic mechanisms, i.e. income determination and the multiplier theory as well as fiscal policy; the level of investment, the demand for money and the rate of interest as well as the Canadian banking system and deposit creation; the general equilibrium of product and money markets, and monetary and fiscal policies; the dynamics of investment, the employment sector, and the price level and inflation; the balance of payments and international trade as well as methods of dealing with balance-of-payments disequilibria.

275-651 MARKETING MANAGEMENT. This course is designed to familiarize students with the problems of a corporate marketing executive. Although some attention is paid to the social, marketing and economic development and corporate marketing systems, the emphasis is on the tasks, the outlines and the responsibilities of marketing management. The corporate marketing executive is presented as one required to make appropriate advertising, sales management, pricing and product management decisions within a shifting environment which includes competition, government, technology, the structure of demand and the distributive network. The first part of the course is devoted to measuring marketing opportunities and to determining customer desires. Specific problems in product development, pricing, advertising, sales management and physical distribution are then discussed. The marketing mix, the problems of effective marketing planning and the use of appropriate control measures are also emphasized.

272-623 ORGANIZATIONAL THEORY AND DESIGN. The course is aimed at studying how organizations are designed. The focus is on the relationship between the nature of the external environment of the organization, the technology it uses, and the management style, the goals, the organizational structure, the behaviour of individuals and groups in the organization, and its performance. A systems view is adopted. Implications for effective design of organizations are drawn.

4.2 M.B.A. II PROGRAM

Required Courses: All second year students are required to take the following courses:

280-602D SKILL DEVELOPMENT. During the course of the M.B.A. program the student gets the opportunity to practice significant managerial skills — problem formulation and analysis, decision-making, research skills, oral and written communication, planning and interpersonal skills. Such activities as simulation and role playing exercises, questionnaires and video-tape feedback are used to enhance students' managerial skills. Skill development is expected to involve about 50 hours of student time and will occur at various points in the program where it is appropriate.

276-661 MANAGEMENT POLICY. The aim of this course is to provide the student with a thorough knowledge of the managerial policy-making process. This is approached in a theoretical way by delving deeply into descriptive theory on topics such as goal systems, organizational structure, managerial work, unprogrammed decision-making, and strategy-making, and by assessing the relevance of the management science techniques at the policy level. This course contains three essential elements — readings of the theory, field studies, and seminars. In essence, the theory of the literature is applied in the field studies and the results are discussed in the seminars. In the field studies, students work in groups of five and analyze various policy aspects of one organization (of their own choosing) throughout the year. This course and other project-type units in the second year provide a workshop in which students can study and improve their skills in field research, problem formulation and solution and group decision-making.

Electives

Students may choose either (a) eight electives or (b) six electives and a Research Paper. The electives open to a student will depend on his area of concentration.

Concentrations

Upon entering second year, a student must select an area of concentration. The concentrations available and their requirements are:

ACCOUNTING AND FINANCE

Required:

271-616 Analysis for Decision
or
271-618 Topics in Financial Accounting I
274-650 Finance II
271-617 Analysis for Control
or
Topics in Financial Accounting II*

Other electives to be approved by area coordinator.

BEHAVIOURAL SCIENCE AND PERSONNEL

Option I; **Organizational Behaviour**

Required:

272-625 Strategies and Organizational Development
272-627 Salary Administration
272-626 Experimental Techniques in Marketing and Management
272-628 Creativity and Adaptive Organizations
276-668 Consulting Seminar

Other Electives to be approved by area coordinator.

Option II: **Organizational Behaviour and Policy Concentration**

Required:

272-628 Creativity and Adaptive Organization
276-668 Consulting Seminar

Optional:

272-625 Strategies and Organizational Development
272-627 Salary administration

Other electives to be approved by area coordinator.

*Introduction of course subject to approval from the Faculty of Graduate Studies and Research. Course descriptions not available at this time.

FINANCE

Required:

274-641 Finance I (taken during the first year of the M.B.A. program)
274-650 Finance II

Category A:

274-645 Financial Intermediation: Theory and Analysis
274-648 Applied Corporate Finance
Advanced Seminar in Finance*
274-649 International Financial Management
274-646 Investments and Portfolio Management
Canadian Financial Institutions*

Category B:

271-616 Analysis for Decision
271-617 Analysis for Control
277-679 Deterministic Decision Models
277-680 Sequential Decision Making
277-678 Simulation of Management Systems
271-618 Topics in Financial Accounting I
278-686 Introduction to International Business
Applications of Econometrics to Management Problems* (or equivalent)
273-636 Management Information Systems
279-697 Topics in Managerial Economics
278-691 Business Law I

Courses in Category A not selected under that requirement.
Others (with approval of area coordinator)

For the M.B.A. concentration in Finance, the student must take both required courses, Finance I and Finance II, three courses in Category A and one course in Category B for a total of six courses. The student is cautioned to observe prerequisite requirements for the courses he selects.

*Introduction of course subject to approval from the Faculty of Graduate Studies and Research. Course descriptions not available at this time.

INDUSTRIAL RELATIONS

Required:

278-687 Industrial Relations
278-688 Labour Relations in the Public Sector
Labour and Industrial Relations Theory*

Optional:

272-625 Strategies and Organizational Development
272-628 Creativity and Adaptive Organizations

Other electives to be approved by area coordinator.

INTERNATIONAL BUSINESS

Required:

Any four of the following:

278-686 Introduction to International Business
278-683 International Business Policy
274-649 International Financial Management
275-660 International Marketing Management
492-437 Comparative Company Law and the Multinational Company: Law and Practice (given by the Law Faculty)

Others (to be approved by area coordinator)

MANAGEMENT INFORMATION SYSTEMS

Required:

273-637 Information Systems Design
273-636 Management Information Systems
271-616 Analysis for Decision

Any two of the following:

271-617 Analysis for Control
277-679 Deterministic Decision Models
277-680 Sequential Decision Making
405-633 Information Retrieval (given by the Graduate School of Library Science)
308-614 Systems Analysis I (given by the School of Computer Science)
308-615 Systems Analysis II (given by the School of Computer Science)

Others (to be approved by area coordinator)

*Introduction of course subject to approval from the Faculty of Graduate Studies and Research. Course descriptions not available at this time.

MANAGEMENT SCIENCE

Required

A student may concentrate his second-year M.B.A. studies in Management Sciences by selecting at least four of the following elective courses:

277-675 Applied Time Series Analysis for Managerial Forecasting
277-676 Applied Multivariate Data Analysis
277-678 Simulation of Management Systems
277-679 Deterministic Decision Models
277-680 Sequential Decision Making
Sample Survey Methods and Analysis*
Applied Decision Analysis*
Applications of Econometric Methods to Management Problems*

MARKETING

Required:

Each student selecting the Marketing Concentration is required to take the four basic or core courses in Marketing:

275-657 Buyer Behaviour
275-658 Marketing Research
275-656 Management Science in Marketing
275-655 Marketing Planning

In addition the student is required to take a *minimum* of two courses from the following list of electives:

271-617 Analysis for Control
274-650 Finance II
276-664 Managing the Small Business
278-687 Industrial Relations
277-676 Applied Multivariate Data Analysis
278-686 Introduction to International Business
276-666 Corporate Planning
485-483 Consumer Protection (given by the Law Faculty)
275-659 Industrial Marketing
275-660 International Marketing Management
275-654 Marketing Communications
275-662 Experimental Techniques in Marketing and Management

(exceptions with permission from area coordinator only)

The two remaining courses are free electives of the student's choice, and could also be selected from the above list.

*Introduction of courses subject to approval from the Faculty of Graduate Studies and Research. Course descriptions not available at this time.

POLICY

Option I: **Management Policy**

Required:

276-666 Corporate Planning
276-668 Consulting Seminar
272-628 Creativity and Adaptive Organizations
276-665 Business and Government

Other electives to be approved by area coordinator.

Option II: **Small Business Concentration**

Required:

276-664 Managing the Small Business
278-691 Business Law I
275-655 Marketing Planning
272-628 Creativity and Adaptive Organizations
276-668 Consulting Seminar

General Management

This stream is available to students who wish to cover a broader range in the second year of their program. They may choose their eight electives (six if they do a Research Paper) without following a specified sequence although they must ensure that they have the necessary prerequisite course(s) where these apply.

Course descriptions for second year electives are given below and where there is a prerequisite, this is indicated.

N.B. Some elective courses may be cancelled due to insufficient enrolment.

4.3 COURSE DESCRIPTIONS

271-616 ANALYSIS FOR DECISION. Concerned with the provision of data/information to management for planning and decision purposes. The emphasis is on correctly specifying this data/information, and as a result the course is at a fairly conceptual level. A range of production and investment decisions will be examined, and familiarity with calculus and linear programming will be assumed. It is desirable, but not essential, that the student should already have taken Introduction to Modelling Methods in Management. In terms of subject categories, the course is a blend of economics, accounting, finance and quantitative methods. (It is really the first half of a full course on Analysis for Decision and Control, the second half of which is offered in the second semester. Either course may be taken on its own, however.)

271-617 ANALYSIS FOR CONTROL. Concerned with problems of control in large business organizations, approached at a fairly conceptual level. "Control" is interpreted broadly, to encompass external and internal control, and within the latter financial control, control of time-cost-resources, control of data/information flows. Other topics covered include problems of centralization vs. decentralization (including the transfer price problem), the measurement of performance, and a thorough critique of accounting controls such as budgetary control and standard costing. The course includes inputs from accounting, economics, organization theory and general control theory.

271-618 TOPICS IN FINANCIAL ACCOUNTING I. This course will be an in-depth analysis of corporate financial reporting principles and practices, with an emphasis on developing the abilities of the student to discriminate between the form and substance of corporate financial reports. Particular attention will be paid to those areas which have caused concern in professional accounting and financial analysts circles. Topics covered will include: theoretically optimal properties of financial reports; conventional financial statement preparation; problems of income recognition; extraordinary events; earnings per share analysis; tax liability analysis; asset valuation and depreciation analysis: intangible assets, inventories, mergers and acquisition analysis, lease accounting; pensions and long-term liabilities and foreign exchange transactions. Course materials will include material from accounting principles, hypothetical case analysis, and the analysis of actual financial reports of Canadian and American corporations.

271-618 TOPICS IN FINANCIAL ACCOUNTING I. sm,This course will be an in-depth analysis of corporate financial reporting principles and practices, with an emphasis on developing the abilities of the student to discriminate between the form and substance of corporate financial reports. Particular attention will be paid to those areas which have caused concern in professional accounting and financial analysts circles. Topics covered will include: theoretically optimal properties of financial reports; conventional financial statement preparation; problems of income recognition; extraordinary events; earnings per share analysis; tax liability analysis; asset valuation and depreciation analysis; intangible assets, inventories, mergers and acquisition analysis, lease accounting; pensions and long-term liabilities and foreign exchange transactions. Course materials will include material from accounting principles, hypothetical case analysis, and the analysis of actual financial reports of Canadian and American corporations.

272-625. STRATEGIES AND ORGANIZATIONAL DEVELOPMENT. Organizational Development is a process of planned change in an organization's culture (i.e. the learned and shared assumptions about the norms that regulate member behaviour); a long-range effort to improve the organizations problem solving and renewal processes, utilizing the applied behavioural sciences and experience based learning. Students will examine theory, stra-

tegies, and techniques of organizational diagnosis and intervention – and will interact with consultants from various Montreal and Canadian organizations as they present case-studies of their ongoing O.D. projects.

272-627 SALARY ADMINISTRATION. This course is designed to expose the students to total compensation systems in business and service organizations. The emphasis is on understanding the various compensation theories and their relation to compensation policies within organizations. Behavioural effects of different types of compensation plans and how to make compensation plans more effective with the use of behavioural science knowledge will be discussed. Some of the topics that are covered in the course are: nature of financial motivation compensation theories, job design and job analysis, compensation practices, designing a compensation package, pay and organizational effectiveness.

272-628 CREATIVITY AND ADAPTIVE ORGANIZATIONS. The course will deal with what we know about creativity, the process of innovation, the management of creativity, and the implications of innovation for modern management. The accent will be on studies of actual innovations, of creative individuals and organizations, interviews with creative managers, case studies and field studies.

273-636 MANAGEMENT INFORMATION SYSTEMS. This course is concerned with the justification, selection, design and implementation of computer-based business information systems. Systems to service functional requirements of the organization, concepts of total information systems will be considered. The case study method will be used.

273-637 INFORMATION SYSTEMS DESIGN. The objective of the course is to introduce basic data and information concepts and their practical application in the development of information systems in the organization. Supplementary readings evaluate the evolution of structural systems analysis techniques. Specific topics include: the systems approach and systems analysis; information from data economics of information, and methods of information systems development; data base, data structure, association and manipulation of data; systems development methodology (evaluation, justification design and implementation).

274-645 FINANCIAL INTERMEDIATION: THEORY AND ANALYSIS. (Prerequisite: Finance I - 274-641). This course examines the demand for and supply of funds for the financial intermediaries, mainly banks and near banks. To this end, simple econometric formulations and models are reviewed and students are familiarized with the institutional aspects of "Canadiana". The role of the banking sector in the money creation process is stressed as well as international aspects of monetary policy.

274-646 INVESTMENTS AND PORTFOLIO MANAGEMENT. (Prerequisite: Finance II - 274-650). The prime objective of the course will be to provide the student with a rational framework for investment, be it personal or professional. To this end the portfolio and capital market theory of Finance II is extended and the empirical evidence supporting these and competing hypotheses is investigated for both individual securities and portfolios.

274-648 APPLIED CORPORATE FINANCE. (Prerequisite: Finance II - 274-650). Conceptual models and techniques studied in earlier courses are extended and/or applied to decision problems faced by managers in the Corporate Finance area. Such problems include the management of working capital, capital budgeting, capital rationing, capital structure, dividend policy, the cost of capital, mergers and acquisitions, leasing, option valuation, and insurance. The course is intended to enhance the ability of students to consider Corporate Finance proglems in terms of applicable theory and techniques.

274-649 INTERNATIONAL FINANCIAL MANAGEMENT. (Prerequisite: Finance I - 274-641). This course examines operational problems of financial management in the multinational enterprise: forecasting adversities in the international financial environment; managing foreign exchange rise; transfer pricing and profit remittance policies; multinational capital budgeting; use of Eurodollars and overseas sources of capital; consolidation of financial statements; and other related topics.

274-650 FINANCE II. (Prerequisite: Finance I – 274-641). A presentation of the modern theory of finance. A foundation is established here from which students may pursue further specialization or from which specialists in other areas may appreciate their interaction with the Finance function. The theory covers three interrelated finance functions; : capital budgeting, corporate finance (including cost of capital, capital structure, and dividend policy), and portfolio theory. An analytic approach is taken where objectives are specified, constraints recognised and the resource allocation of capital on both personal and corporate levels investigated. The course is a prerequisite for Applied Corporate Finance, Investments and Portfolio Management, and Management of Financial Institutions.

275-654 MARKETING COMMUNICATIONS. This course provides a sound base for understanding and planning effective communications between suppliers and buyers (consumers). This course covers all important aspects of marketing communications - communication theory and concepts, message content and form, media research and analysis, communication segmentation, advertising response

measurement, communication planning and strategies.

275-655 MARKETING PLANNING. (Prerequisite: Marketing Management - 275-651). Marketing Planning focusses on the design and implementation of marketing plans. The emphasis is on management decision-making; the student will learn approaches and techniques for formulating marketing objectives, identifying alternate strategies, preparing the marketing plan, and implementing and controlling the plan. These techniques and approaches will be applied in the solution of marketing management cases throughout the course. A field project, involving the formulation of a marketing plan, provides a student with first-hand experience in the planning process.

275-656 MANAGEMENT SCIENCE IN MARKETING. (Prerequisite: Marketing Management - 275-651). Study the nature of market response by presenting models of market response and evaluate them in the context of understanding, describing and exploring marketing problems. Explore the particular marketing problem areas of advertising, pricing, personal selling and product planning. Relevant problems will be structured, analyzed and studied from a management science point of view. The interaction between each marketing variable will be considered. The problems of implementation of the management science approach in the real world of marketing organizations will be discussed.

275-657 BUYER BEHAVIOUR. This course is intended to acquaint students with a variety of research approaches focusing upon the behaviour of the consumer in the market place. It is intended to sensitize the student to human behaviour in general so that he/she may carry this understanding of basic processes over to the more specific arena of the consumer.

275-658 MARKETING RESEARCH. (Prerequisite: Marketing Management - 275-651 or permission of instructor). Training in the design, execution and interpretation of survey and experimental methods in marketing. Emphasis is placed upon sample design, data collection and data processing; evaluation of alternative, experimental designs, execution of problems and interpretation of data. A review of illustrative research studies is made; an actual study is designed and data are collected and interpreted.

275-659 INDUSTRIAL MARKETING. The course focuses on formulating policy and implementing decisions for marketing to industry. The concepts of Product Life Cycle, Industrial Buyer Behaviour, New Product Planning, Product-Market Portfolios, etc., will be studied via assigned readings. Class work will be devoted to applying these concepts to on-going operational problems. The course divides approximately: one-third assigned readings; one-third written case work; and one-third lecture discussions.

275-660 INTERNATIONAL MARKETING MANAGEMENT. An examination of the opportunities and constraints that confront the marketing manager of a firm seeking to extend its activities across national boundaries and into foreign markets. The world market environment is viewed as one composed of diverse and complex elements linked by unifying trends that reward an integrated international marketing approach. Considered in turn are the modifications in product, pricing, channel and communications policies that must be made when a firm enters foreign markets either through exporting, licensing, or manufacturing abroad. Particular attention is paid to the strategic and tactical aspects of international trade and export marketing in the Canadian context.

275-662 EXPERIMENTAL TECHNIQUES IN MARKETING AND MANAGEMENT. This course will focus on the various methodological approaches to market research and organizational behaviour. Survey and experimental methodologies will be compared. The importance of comprehending and analyzing research will be emphasized. The use of research in solving management problems will be discussed. One of the areas to be studied will be television advertising.

276-664 MANAGING THE SMALL BUSINESS. This course will focus on the strategies and operating problems of small business enterprises. It is designed for individuals who are considering entrepreneurial careers in the environment of a smaller company. The characteristics and urgencies of problems that small companies are likely to encounter at different stages in their evolving life-cycle will be explored.

276-666 CORPORATE PLANNING. Lectures on the nature and features of corporate planning systems. Emphasis will be placed on explaining the different modes of planning (normative, strategic, and tactical), project planning as the most fundamental level of corporate planning, and priority setting by higher levels of management. The cybernetics of an on-going dynamic planning process will also be explained. The development of a plan for planning for organizations embarking on developing a planning system or switching existing formal planning systems to a more comprehensive planning system will be demonstrated. Presentations will be required by students on the results of research work. This teaching method gives the opportunity to the students to re-think and absorb fully the subject materials and to deal with issues which they feel are pertinent for their own knowledge advancement. Special topics requested by the students will also be discussed.

276-668 CONSULTING SEMINAR. This seminar is open to those full-time MBA II students who have successfully completed the fall semester of the daytime Management Policy course (276-661). It is anticipated that a large corporation will offer a wide choice of consulting topics; and executives

will work with students, simulating a consulting relationship. Problems will tend to be those with no "right answers" but with broad implications to the corporation. Students will be expected to spend three hours per week, mainly at company headquarters, with regular written and oral reports to professors and executives. Professionalism will be stressed as part of this effort toward student-executive-faculty cooperation.

277-675 APPLIED TIME SERIES ANALYSIS FOR MANAGERIAL FORECASTING. (Prerequisite: Basic Management Statistics - 277-673 or equivalent). This course is devoted to applications of time series analysis to business problems. Starting with the elementary ratio-to-moving average methods, the course deals successively with the Census 2 method, with the methodology introduced recently by Box and Jenkins, with spectral analysis and with time-series regression techniques. Computational aspects and management applications of the methodology are emphasized. The students are expected to participate by preparing and presenting case studies.

277-676 APPLIED MULTIVARIATE DATA ANALYSIS. (Prerequisite: Basic Management Statistics - 277-673 or equivalent). This course is devoted to the application of multivariate analysis to problems in Behavioural Science, Marketing, Economics and Finance. Computational aspects of the methodology are emphasized and the students will be expected to prepare and present actual cases. The following topics will be discussed: multiple regression and analysis of variance, factor analysis, discriminant analysis, classification procedures, multidimensional scaling, cluster analysis.

277-678 SIMULATION OF MANAGEMENT SYSTEMS. This course is devoted to the methods and skills of building simulation models for Management Systems. It stresses the construction of useful models, the design of simulation experiments and the analysis of the results for making decisions. The students are expected to design a complete simulation of a real problem using a standard simulation language.

277-679 DETERMINISTIC DECISION MODELS. Topics include: Linear Programming and extensions to more general decision problems such as Quadratic and non-linear models, network analysis, and models of discrete decision making. The course stresses the solution of complex management problems using efficient optimization tools of Operations Research. The students will work on real management projects to apply the techniques acquired.

277-680 SEQUENTIAL DECISION MAKING. (Prerequisite: Deterministic Decision Models - 277-679 or equivalent). This course is devoted to the application of dynamic programming to a variety of decision-making contexts, both in deterministic and probabilistic environments. Topics include dynamic inventory scheduling with uncertain demand, unbounded horizon problems, problems in replacement and maintenance, etc. . .

278-681 MANAGEMENT IN THE PUBLIC SECTOR I. Examination of leading issues in the management of governmental operations with some comparative analysis of other fields of administration. Specific emphasis will be placed on a comparative study of the meaning and measurement of efficiency and effectiveness in government and private enterprise.

278-682 MANAGEMENT IN THE PUBLIC SECTOR II. This course will stress decision-making in the public sector. In particular, it will look at the structures of decision-making in the government at the cabinet, departmental and regulatory agency levels. Particular stress will be placed upon a simulation project based around a current problem.

278-683 INTERNATIONAL BUSINESS POLICY. (Prerequisite: Introduction to International Business - 278-686 or permission of instructor). This course develops and applies conceptual approaches to general management policy and strategy formulation in multinational enterprises. Attention is focused first on the strategic planning process. Alternative forms of overseas involvement such as full direct investment, equity joint ventures, and contractual arrangements (licenses, management contracts, turnkey projects) are examined in detail through major case studies. Other selected aspects of management policy studied include logistics planning, location strategy, technology transfer, labour policy, and planning for international diversement. Emphasis is placed also on developing the students practical skill in negotiating simulation exercise.

278-686 INTRODUCTION TO INTERNATIONAL BUSINESS. An introduction to cultural, economic and political aspects of domestic, international and foreign environments and their effects on the international operations of business firms. The course seeks to familiarize the management student with the expanded world of the international businessman by examining the underlying concepts of international economic theory; developing a framework for examining country, environmental constraints, sociological, educational, economic, political-legal) and relating them to the operations of multinational enterprise; studying the relationship between the international firm and the nation state, with particular reference to Canadian foreign ownership policies; examining the international payments system and balance of payments concepts; and discussing selected topics such as the role of multinational enterprise in economic development and planned economies.

278-687 INDUSTRIAL RELATIONS. Unions, management and the public interest; a course designed to acquaint the student with the problems of industrial relations in different employment

situations; the impact of unions on employees and on management; managerial attitudes toward unions and collective bargaining in a mixed enterprise society; and evolving public policy with regard to labour relations in both the public and private sectors. A few lectures, group projects and seminar papers are used.

278-688 LABOUR RELATIONS IN THE PUBLIC SECTOR. (Prerequisite: Industrial Relations - 278-687 or by permission of instructor). This course covers labour relations in a broad area of public services, federal, provincial and municipal, as well as in the so-called quasi-public services such as hospitals, schools and government agencies and boards. Students will be encouraged to come to grips with some of the more contentious current issues in public service labour relations and to compare and analyse the alternative methods that have so far been evolved to deal with them. This course is open to M.B.A. II students who have completed Professor Woods' course in Industrial Relations and to final year undergraduate students majoring in Industrial Relations. Others only by permission of the instructor.

278-691 BUSINESS LAW I. This course concerns itself with an introduction to law with special emphasis on how it affects the businessman. Some topics to be covered include the court systems and their organization; the practical aspects of procedural law; the general nature of contracts and delicts; legal requisites for the validity of contracts; special contracts - sale; lease and hire; agency; bailment; loans; other special contracts.

278-692 BUSINESS LAW II. (Prerequisite: Business Law I - 278-691). This course concerns itself with the more specific legal aspects of law as they relate to the businessman. Some topics to be covered include: the various labour laws and Workmen's Compensation; Government regulation of business, Anti-Combines, Consumers' Protection Act, etc.; the various aspects of corporate financing business organizations including sole proprietorship, partnership and company law; insurance and bankruptcy; patents and trademarks; commercial papers; tax laws such as sales and use taxes, excise taxes and some aspects of income tax.

279-697 TOPICS IN MANAGERIAL ECONOMICS. The objectives of this course are: (1) to examine and develop applications of managerial economics in the analysis of business problems, and (2) to provide experience in evaluating business opportunities. Most class sessions will be seminars, in which participants will present a paper or report, and then lead group discussion on the chosen topic. In addition, there may be some lectures and sessions devoted to planning and conducting business studies, and to investigation and discussion with visitors from industry. Seminar topics may be selected from the following list: Market and Sales Forecasting, Production Planning and Scheduling, Business Planning, Control, New Project Evaluation, New Product Development and Appraisal, Price Discrimination, Plant Location, Regulation of Public Utilities, Industry Studies (selected by participants).

279-698 ECONOMIC SEMINAR. Topics for investigation will be: Firms with many products - implications for decision of fixed costs, marginal costs, interdependency of demand, opportunities for price discrimination; Forward Commodity Markets - implication for agents with long and with short positions in commodities, structural determinants of demand, analysis of price behaviour; Cost Benefit Analysis in Public Administration and Regulated Industries - foundational assumptions on preferences and incomplete market structures, interpretation as a compensation principle, limitations and range of validity of a compensation principle.

280-610 INDEPENDENT RESEARCH PROJECT. This project is designed to familiarize students with the process and the problems of independent research. The student is given considerable freedom in choosing research topics. The study may be a normative one or a descriptive one. It may be based on primary data or on secondary data. In this project students get the opportunity to work on a one-to-one basis with a faculty member for the entire academic year. Members of the Montreal business community act as resource consultants when this appears desirable.

5 FEES AND EXPENSES

5.1 FEES

The University reserves the right to make changes without notice in the published scale of fees.

The tuition fees for the first year of the program are $570 plus $89.50 for student services and Students' Societies fees (this covers charges for the health service, athletic facilities and membership in the Postgraduate Students' Society). The tuition fees for the second year are $285. plus $59.50 for student services and Students' Societies fees. Tuition fees may be paid in two instalments.

Please note that students having completed courses through the Centre for Continuing Education and who are registering directly into the second year must have paid the equivalent of the first year tuition to the Centre for Continuing Education, otherwise they will be required to pay $570. plus $87.50 for student services and Students' Societies fees.

Students transfering from another university into the second year program at McGill must also

pay the first year tuition fees of $570.00 plus $89.50 for student services and Students' Societies fees.

Details of special fees including the graduation fee of $10.00 are given in the *General Announcement* which may be obtained from the Registrar's Office, F. Cyril James Building.

5.2 STUDENT EXPENSES

Single Student in University Residence Minimum Estimate for 1st Year Students

Tuition	$ 570.00
Student Services	60.00
Students' Societies	29.50
Housing and Food – 9 months	1205.00
Books and Supplies	320.00
Other Expenses (Average)	700.00
	$2884.50

Married Student with Wife Working, No Children – Minimum Estimate for 1st Year Students

Tuition	$ 570.00
Student Services	d60.00
Students' Societies	29.50
Unfurnished McGill Apartment	
Food - 9 months (for 2 people)	1200.00
Books and Supplies	320.00
Other Expenses	800.00
	$1419.50

Miscellaneous Expenses

Personal expenses vary greatly with individual requirements, and clothing, laundry, transportation, entertainment and other expenses should be very carefully estimated.

6 SCHOLARSHIPS AND FINANCIAL AID

Most of the scholarships and fellowships available through the Faculty of Management are awarded automatically on the basis of academic excellence. However, financial aid forms are completed by all applicants after their acceptance into our program, regardless of whether the financial aid is to be awarded on a merit or a need basis. Please note that students must make separate applications for awards available through the other sources as indicated in the following descriptions.

Qualified students with limited financial resources should not be deterred from applying for admittance to the M.B.A. program. Information on financial aid offered by sources outside the Faculty of Management is listed herein in the expectation that applicants will seek such aid in all cases for which they are eligible.

Foreign Students

The Faculty is normally unable to offer any financial assistance to foreign students. We regret, therefore, that we must have a written guarantee in the form of a bank letter that the student has the necessary funds to complete his studies. Scholarships/fellowships are occasionally awarded to foreign students with exceptional academic ability, but the amount of the financial aid does not cover all the expenses for two years of study. Funds are available, however, through the Canada Council and the Commonwealth and Colombo Scholarship Plans as described under "International and Private Awards" herein, and should be applied for through your own government.

Financial Assistance Obtained Through the Faculty of Management

Applicants are considered automatically for the following awards. Scholarship winners will be informed prior to registration.

McGILL ASSOCIATES GRADUATE FELLOWSHIPS IN MANAGEMENT. – These fellowships were established by the McGill Associates, a group of Montreal business and professional men interested in the University, to ensure that the graduate program of the Faculty of Management continues to attract students of a high academic and professional calibre. A number of fellowships are available, each with an annual value of up to $3,600, for students at the Master's level. This amount may be increased in the case of students proceeding to a doctoral degree.

H.E. HERSCHORN GRADUATE SCHOLARSHIP. – Established in 1965, covering the amount of the current tuition fees and tenable by a student entering either the first or the second year of the M.B.A. program.

SEAGRAM BUSINESS FELLOWSHIPS OF THE SAMUEL BRONFMAN FOUNDATION *(Type B Awards).* – Four type B fellowships of $1,600 are given annually by this foundation to students in

their final year of a Master's program or in any year of a Doctoral program. Eligibility is limited to Canadian citizens. Applications are submitted on behalf of candidates by the Dean of the Faculty of Management by April 12.

Applications must be made as indicated for the following awards:

FACULTY OF MANAGEMENT ASSISTANTSHIPS. — Assistantships up to a maximum of $600 are offered to a limited number of students. Student assistants are expected to carry out specific tasks during the year. (Most of these assistantships are awarded to second year students.)

FACULTY OF MANAGEMENT STUDENT LOAN FUND. — A student loan fund has been established and is administered by the Student Aid Office. For further information, apply to the Student Aid Office, McGill University, 3465 Peel Street, Montreal, Quebec.

RODGIE McLAGAN FELLOWSHIPS IN MANAGEMENT. — Two fellowships of $1,500 each have been established by Canada Steamship Lines for graduate study in management. Financial aid forms must be completed and returned to the Admissions Officer by August 1st.

SEYMOUR SCHULICH FELLOWSHIP. One fellowship of $2,000 has been established by Mr. Seymour Schulich to be awarded annually to an M.B.A. student (usually in the second year of the program). It will be awarded by the Faculty of Management on the basis of general scholastic ability, the Finance grades, entrepreneurship potential and financial need. Students wishing to apply for this award should submit a short statement to the Admissions Officer providing evidence of entrepreneuership potential along with a completed financial aid form by August 1st.

University Scholarships and Fellowships

a) The following is a list of awards available through McGill which have been awarded to some of our students in the past.

CENTRAL MORTGAGE AND HOUSING CORPORATION GRADUATE FELLOWSHIPS (CMHC). — Fellowship stipends are $3,000 plus tuition fees for students proceeding to a master's degree and $4,000 plus tuition fees for post-master's candidates proceeding to a doctoral degree. (Tenable in a broad range of fields involved in understanding and dealing with urban regional environment.) Candidates must be recommended by the University and must be Canadian citizens or landed immigrants in Canada. Application forms and information are available from: Administrator, Advisory Group, Central Mortgage and Housing Corporation, Ottawa, Ontario. Completed application forms must be received by Central Mortgage and Housing Corporation no later than March 1.

GOVERNMENT OF QUEBEC GRADUATE SCHOLARSHIPS. Competitions are open to Canadian citizens residing in Quebec for at least one year and to landed immigrants with 18 months' residence in Quebec at the time of their application for a grant.

Type B1 - Graduate Scholarships. Valued up to $4,000 for married students and up to $3,000 for single students. Open to all fields of study but applicants must hold a Bachelor's degree or first university degree. Apply to the Fellowships Office, Faculty of Graduate Studies and Research, McGill University, P.O. Box 6070, Montreal, Quebec H3C 3G1. Completed application forms must be received by the Fellowships Office by January 17th at the latest.

Type A3 - M.B.A. Scholarships (Jeunes Administrateurs). -- 75 scholarships available, valued at up to $6,000 for single students and up to $8,000 for married students, tenable for a period of 12 months. Applicants must hold a first university degree with two years of full-time experience in Quebec in some executive capacity in a small or medium-sized business. Apply to the Fellowship Office, Faculty of Graduate Studies and Research, Dawson Hall, McGill University, P.O. Box 6070, Montreal, Quebec H3C 3G1, Completed application forms must be returned to the Fellowships Office by January 17th at the latest.

N.B. Students unable to comply with the above deadline may submit the completed application directly to the Quebec Government by January 31st at the very latest.

McCONNELL MEMORIAL FELLOWSHIPS. These fellowships were established by the J. W. McConnell Foundation to support postgraduate studies and research at McGill University, and so to strengthen, in quality and numbers, the academic staffs of Canadian universities and schools. These fellowships may be held by students registering in any postgraduate research program at McGill, but only those whose homes are in Canada, or who intend to make their homes in Canada, are eligible to apply. The fellowships are intended to cover full fees, living expenses, the cost of books and such travelling as a Fellow's studies may require. The normal value of a first-year award is $3,500 per annum. The initial award is normally for a period of two years, but the fellowships are intended to carry a student through to a doctoral degree, and may be held for a total of five years. Fellows will be expected to spend the full calendar year (with the exception of a month's summer holiday) on their studies, and may not accept any remunerative appointment during the tenure of the fellowship without permission. Application forms may be ob-

tained from the office of the Dean of the Faculty of Graduate Studies and Research and completed forms must be returned to that office before February 1.

MAX BINZ BURSARIES FOR FOREIGN STUDENTS. – Established by the estate of the late Max Binz. These Bursaries are valued at $1,000 per annum and are renewable, but are not tenable concurrently with a major scholarship or fellowship and are for summer research only. The Binz Bursaries are intended to help defray the expenses of graduate students coming to McGill from overseas countries (including South and Central America and Mexico). Foreign nationals who are Canadian landed immigrants (and therefore eligible for several categories of Canadian financial assistance) are not eligible for the Bursaries. Apply to Graduate Faculty Fellowships Office, Dawson Hall, McGill University, P.O. Box 6070, Montreal, Quebec, Canada H3C 3G1.Completed applications must be received by the Faculty Office no later than April 1.

SEAGRAM BUSINESS FELLOWSHIPS OF THE SAMUEL BRONFMAN FOUNDATION. (Type A awards). – Eight Type A awards of $1,000 are given annually by this foundation to first or qualifying year students enrolled in a Master's degree program. Eligibility is limited to Canadian citizens. Applicants for first year fellowships may apply directly to: Professor J. P. Sallenave, Awards Chairman, Canadian Association of Administrative Sciences, Faculty of Administration, Sherbrooke University, Sherbrooke, Quebec. Completed application must be received before May 18.

TRANSPORTATION DEVELOPMENT AGENCY FELLOWSHIPS. -- Fellowships for the 1975-76 academic year are offered by the Transportation Development Agency for full-time graduate study in any discipline related to transportation, and leading to an advanced degree for which there is a thesis requirement.

Eligibility: Canadian citizens or landed immigrants in Canada. *Value:* $4,650 for a twelve month period. In addition, the Fellow's tuition fees are paid to the University. *Tenure:* Awards are tenable at any Canadian university; but, in special circumstances, may be approved for tenure outside Canada. *Applications:* Forms may be obtained from the Faculty of Graduate Studies of individual universities or directly from the Transportation Development Agency, 2085 Union Ave., Montreal, Quebec, H3A 2C3 *Deadlines:* Completed applications must be transmitted to TDA through the university and postmarked before midnight January 25th. Announcement of the awards will be made late in March.

b) The following awards are also available through McGill but are so competitive that they have not been awarded to our students in several years.

BELL CANADA CENTENNIAL FELLOWSHIPS. – Up to a total of eight graduate fellowships in the amount of $3,500 to Fellow and $1,500 to University (Fellow's tuition fees will be paid out of the $1,500) will be given annually; four of which will be new awards. Candidates must be Canadian citizens or must have held landed immigrant status for one year prior to submitting an application. Applicants must be graduates of a university or college with standards accepted by the Association of Universities and Colleges of Canada. The field of study is unrestricted, but preference will be given to subject areas relevant to the scientific, political, social or economic needs of Canada. On completion of the fellowship, three copies of a thesis or reasonably detailed account of the work done, should be sent to the Director of Awards, A.U.C.C., who in turn will forward two copies to Bell Canada. Apply before March 1 to Director of Awards, A.U.C.C., 151 Slater Street, Ottawa, Ontario K1P 5N1.

GULF OIL CANADA LTD. GRADUATE FELLOWSHIPS. – Nine fellowships of $3,500 each, plus $1,000 for research expenses, open to residents of Canada who are graduates of institutions which are members of the Association of Universities and Colleges of Canada, and are tenable at any such university. Candidates must be Canadian citizens or must have held landed immigrant status for one year prior to submitting application. Unrestricted as to field of study. Apply to the Director of Awards, Association of Universities and Colleges of Canada, 151 Slater Street, Ottawa, Ontario K1P 5N1. Completed applications must reach the Director before March 1.

HENNESSY FELLOWSHIP. – A fellowship of $3,000 to be awarded annually for a period of five years for first-year graduate study in any field of any university. This award is tenable for one year and is available to graduates of McGill University only. Applicants should apply by letter to the Dean of the Faculty of Graduate Studies and Research before February 15, giving a curriculum vitae, the names of three referees and details of the proposed studies. The first award was made to a student of the 1969-70 graduating class.

ISABELLA C. McLENNAN FELLOWSHIP. – $750. Awarded by the Graduate Faculty Scholarships Committee to a woman student in the Faculty of Graduate Studies and Research on the basis of academic merit and financial need. Apply to the Fellowships Office of the Graduate Faculty, Dawson Hall, before February 1.

SOCIETY OF INDUSTRIAL ACCOUNTANTS OF CANADA BUSINESS FELLOWSHIPS. – Five fellowships of $1,200 each are available annually to students enrolled in a graduate business program at Canadian universities. Awards are to be granted to students whose program indicates an interest in

Management Accounting and Accounting Research. Apply before April 1 to: Administrative Secretary, Fellowships Selection Committee, Society of Industrial Accountants of Canada, P.O. Box 176, 154 Main St. East, Hamilton, Ontario.

SOLVAY FELLOWSHIP. — Value $3,500 plus tuition fees, offered for the first year of study in the Faculty of Graduate Studies and Research. Tenable in any Department of the Faculty, and open to men and women equally. The holder must have graduated in any undergraduate Faculty of McGill in the session prior to that for which the award is given, and must obtain permission to proceed to graduate study. No teaching duties are required of the holder, who may not hold any other fellowship or bursary, nor receive a salary for teaching or other duties, during his tenure. Apply to the Fellowships Office of the Graduate Faculty before February 1.

Note: For further information contact the Fellowship Office at McGill University, 3rd floor, Dawson Hall, McGill University, Montreal, Quebec, for the booklet entitled *Postgraduate Awards, Fellowships and Bursaries.*

Provincial Bursaries and Loans

In all cases, a basic qualification is that the applicant must be a Canadian citizen or a landed immigrant with one year's residence and domicile in the province to which he applies.

In all provinces, except Quebec and Ontario, the provincial authority listed below administers the Canada Student Loan Plan (Federal) as well as their own programs. The addresses are as follows:

Quebec: Apply for a Quebec registration card, after June 1, at the Student Aid Office, 3465 Peel St., McGill University, Montreal, Quebec, H3A 1W7.

New Brunswick: Deputy Minister, Department of Youth and Welfare, Fredericton, New Brunswick.

Northwest Territories: c/o Education Division, Department of Northern Affairs and Resources, 150 Kent St., Ottawa, Ontario.

Ontario: Department of Colleges and Universities, Parliament Buildings, Queen's Park, Toronto, Ontario H3A 1W7.

Yukon Territory: The Students Financial Assistance Awards Committee, c/o Superintendent of Schools, Box 2703, Whitehorse, Yukon Territory.

For all other provinces write to the provincial Department of Education.

International and Private Awards

CANADA COUNCIL — The Canada Council offers fellowships and grants in the social sciences and humanities at the master's and doctoral level. These categories extend to undertakings of an interdisciplinary nature, but not to those closely identified with the physical and biological sciences, or with professional training.

Informative leaflets and application forms are obtainable from departmental offices in the social sciences, humanities and related disciplines, from the Fellowships Office of the Graduate Faculty, or from: The Canada Council, P.O. Box 1047, Ottawa, Ontario. K1P 5V8.

COMMONWEALTH SCHOLARSHIP AND FELLOWSHIP PLAN. — Provides opportunities for Commonwealth students to pursue advanced courses in other Commonwealth countries. Candidates must have graduated from a recognized university or hold equivalent qualifications; age limit normally 35. Successful candidates must plan to return to their own country upon completion of the study for which the award was intended. Graduate awards are usually made for two academic years and the intervening summer. They include tuition, travel expenses, maintenance allowance and a grant for incidental expenses. Closing date for receipt of completed applications varies with country of tenure, but normally October 31 (approximately 1 year prior to date of tenure) for Northern Hemisphere countries; for Southern Hemisphere countries, December 31 (approximately 1 1/2 years prior to date of tenure). Full information and application forms may be obtained from the Association of Universities and Colleges of Canada, 151 Slater St., Ottawa, Ontario. K1P 5N1.

CONSOLIDATED BATHURST LTD. GRADUATE FELLOWSHIP. — One postgraduate fellowship of $3,500 per year available to students working towards a post-graduate degree in a university recognized by the Association of Universities and Colleges of Canada and who have been recommended by the faculty of their choice. Though preference will be given to candidates registered in a doctoral program, candidates working towards a Master's degree will be considered. Open to any permanent employee in Canada, being for this purpose an employee with two or more years of service. Open also to any son, daughter or legal ward of a permanent, pensioned or deceased employee in Canada. Candidates must have completed undergraduate studies in a university or college whose curriculum is recognized by the Association of Universities and Colleges of Canada and must have obtained satisfactory results during their undergraduate studies. The decision of the committee will be based upon the student's academic transcripts, a confidential report from the university, reference

letters and results of any achievement or aptitude tests taken. A fellowship holder may not hold concurrently other fellowships or awards totalling in excess of $1,500. Apply to: Director of Awards, Association of Universities and Colleges of Canada, 151 Slater Street, Ottawa, Ontario. K1P 5N1. Completed applications must be submitted in quadruplicate no later than May 1.

DEVELOPING COUNTRIES' PROGRAMS. – Students from developing areas should apply to their own Departments of Education to see whether their governments will recommend them for Colombo Plan Scholarships, Special Commonwealth Africa Aid Programs, etc.

FRANCE QUEBEC SCHOLARSHIPS. – Information and application forms may be obtained from the Fellowships Office, Faculty of Graduate Studies and Research.

INSTITUTE OF MANAGEMENT CONSULTANTS OF QUEBEC THESIS AWARD. – A research paper prize, offered by the Institute of Management Consultants of Quebec, in the amount of $500 will be awarded to the student whose paper best meets the following criteria: i) it must deal with a management theme; ii) be written in English or in French, with no limitations as to length; iii) contribute to the advancement of the art and science of management and iv) be available for publication by the IMCQ in any professional trade magazine.
Each university is to forward its most promising papers. The winner will be announced in June.

LEVER BROTHERS LTD. BILINGUAL EXCHANGE FELLOWSHIP IN BUSINESS ADMINISTRATION. – Up to two fellowships of $7,000 plus summer employment will be awarded annually: one to a French-language candidate who will attend an English-language institution and one to an English-language candidate who will attend a French-language institution. Candidates must be Canadian citizens, under 30 years of age, who have clearly demonstrated a proficiency in the language of the institution they wish to attend. Summer employment for scholarship winners is guaranteed by Lever Bros. Ltd., and will be of a nature that will prove interesting and challenging. Apply to: Director of Awards, Association of Universities and Colleges of Canada, 151 Slater Street, Ottawa, Ontario. K1P 5N1. Completed applications in quadruplicate must be received no later than March 1.

UNITED STATES AWARDS, LOANS AND GRANTS. – For information on the above, contact your local bank branch.

ASSOCIATION OF UNIVERSITIES AND COLLEGES OF CANADA. – The Awards Service of the Association of Universities and Colleges of Canada does not itself offer any awards but it does administer several national and international programs on behalf of Canadian and foreign donors, both private and governmental. Inquiries from students regarding financial aid can be addressed directly to the Association at 151 Slater Street, Ottawa, Ontario. K1P 5N1

There are several other programs which enable foreign students to come to Canada to study, sponsored by the Canadian International Development Agency, under the Department of External Affairs. These include the Colombo Plan, Economic Assistance to French-speaking West Africa, Special Commonwealth Africa Assistance, Caribbean Assistance Program. Interested students can apply through the Ministry of Education or through the appropriate government department in their own country.

FOUNDATIONS AND PRIVATE AGENCIES. Thousands of professional associations, foundations and companies offer financial support for the graduate student. Details about these can be found in the following publications which are available in large public libraries, university reference libraries and consulate or embassy offices.

AWARDS FOR GRADUATE STUDY AND RESEARCH: Perhaps the most useful to Canadian students, this publication lists several thousand awards available to Canadians and to those studying in Canada. Prepared by the Bureau of Statistics, it is available from Information Canada (Catalog no. 81-541).

STUDY ABROAD: This UNESCO publication lists awards tenable in Canada, as well as in other countries.

FELLOWSHIPS AND SCHOLARSHIPS OFFERED BY PRIVATE DONORS AND FOREIGN GOVERNMENTS FOR CANADIAN STUDENTS: This publication is available from the Association of the Universities and Colleges of Canada, 151 Slater Street, Ottawa, Ontario, K1P 5N1.

ANNUAL REGISTER OF GRANT SUPPORT: List of major awards distributed by American agencies.

GRANTS REGISTER: List of postgraduate awards in the English-speaking world.

Note: Further information on awards through governmental sources is listed in "Awards for Graduate Study and Research". (Catalogue no. 81-541) This book is published by Statistics Canada, and is available from Information Canada.

7 RESEARCH

The vitality of a university faculty is reflected in the quality and quantity of its research — the pursuit of new and relevant forms of knowledge. In the McGill Faculty of Management, research serves an important function in the activity of both faculty and students. Research adds to our knowledge of management, and it instills in the student the desire and ability to learn systematically about the managerial environment in which he will spend his working life.

Management research is challenging and stimulating. It tends to be interdisciplinary, providing an opportunity for people with different backgrounds to work together; it embraces underlying disciplines such as psychology, mathematics, and economics; and as in all of the social sciences, it involves complex problems of conceptualization and measurement.

The following are examples of on-going research projects at the McGill Faculty of Management.

Typical Faculty Projects

1. The problems of financial reporting
2. Length-of-stay distributions of hospitalized psychiatric patients
3. The effects of automation on employment
4. The use of computer terminals in management education
5. Analysis of the strategy-making process in organizations
6. The study of optimal organizational designs

Typical M.B.A. Research Papers

1. Capital budgeting and corporate planning
2. A university administrator's financial decision game
3. Foreign investment in Quebec
4. Simulation of a supermarket
5. A programmed view of managerial work
6. Legal aspects of marketing in Canada

8 AFFILIATED OPERATIONS

8.1 THE MANAGEMENT INSTITUTE

The Management Institute, an ancillary operation of the Faculty of Management, implements the Faculty's policies regarding continuing education for business. Courses or seminars offered by the Institute range from three days to two weeks in length and cover a wide number of functional areas. They are specifically designed to help middle and senior management people keep abreast of current developments in analytical and decision-making techniques, and to provide executives with a better appreciation of the integrative problems of general management.

Lecturers and seminar leaders, recognized authorities in their fields, are drawn from the Faculty of Management at McGill and from other universities in North America. All courses or seminars are held on university premises. They are restricted as to the number of participants in order to ensure full discussion and individual attention.

The Institute is under the directorship of Professor R.N. Morrison.

8.2 THE FINANCIAL RESEARCH INSTITUTE

McGill's graduate students have access through the Financial Research Institute to one of the largest financial, price and economics data banks in the world. The Institute began as a joint university-business community organization and was established through the initiative of the then Graduate School of Business at McGill.

The purpose of the Institute is to foster knowledge and understanding of all quantitive aspects of financial and economic analysis related to the selection of securities and the management of financial portfolios. The Institute now serves members or clients in Winnipeg, Toronto, Ottawa, Montreal and other cities.

Because of the continued close ties maintained between the Institute and the Faculty, staff and students are able to use these resources for research in economics and finance free of charge.

9 STUDENTS' ACTIVITIES AND STUDENT SERVICES

9.1 STUDENTS' ACTIVITIES

The many student-run clubs, groups, societies, and other activities at McGill run the gamut from conferences on provincial and international affairs, to sky-diving, chess competitions, films and theatre, debates, and a winter carnival. The Student Handbook, issued by the Students' Society, contains details of these activities as well as other useful facts and figures.

All students registered in the University are members of the Students' Society. Headquarters are in the University Centre, a modern four-storey building, with cafeterias, a ballroom, meeting rooms and offices, lounges, and an experimental theatre.

The Post-graduate Students' Society operates semi-autonomously within the Students' Society. The P.G.S.S. has its own centre, Thomson House, with offices and meeting rooms, and, for relaxation an eating area and a bar, as well as other rooms for reading, games, music, recreation and dancing. During the academic year, the Society publishes the McGill Martlet, a tabloid newspaper, and arranges a number of cultural, recreational, political, and educational events. Its intramural athletic program operates throughout the academic year and the summer session. It issues a handbook at registration containing information designed to solve many of your potential problems before they occur. Copies can be had in advance by writing to the P.G.S.S. at Thomson House, 3650 McTavish Street, Montreal, Quebec H2C 3G1.

The McGill Dames Society is a social outlet for wives of graduate students. It has accumulated some very useful information of help to newcomers in finding accommodation and employment.

9.2 STUDENT SERVICES

9.2.1 ATHLETIC FACILITIES

The university offers many facilities for athletic participation and instruction to provide you with the opportunity to balance the rigorous study programs you will be undertaking.

The Sir Arthur Currie Memorial Gymnasium has basketball and squash courts, swimming pool, badminton courts, volleyball courts, and facilities for floor hockey, gymnastics, wrestling, fencing, weight-training, track and judo. The McGill Winter Stadium's artificial ice rink is in demand for hockey games, and competitive as well as recreational skating. In Macdonald Park on the side of Mount Royal, the Percival Molson Stadium with a full-sized football field encircled by a 440-yard cinder track, seats 20,000 people. Beside it, also in the Park, are another full-sized football field, a multi-purpose recreational area, and four hard-surface tennis courts.

The University fields teams in a number of intercollegiate sports.

Your Student Identity Card entitles you to use all facilities and admits you to most home competitions free of charge.

9.2.2 UNIVERSITY BOOKSTORE

The University has its own bookstore on the main floor of the Samuel Bronfman Building. It carries a complete stock of textbooks for all courses, and other materials and supplies. Individual items not ordinarily carried can be specially ordered at your request. The bookstore is open until 8 p.m. Monday to Thursday during registration time and from 9 a.m. until 4 p.m. Monday through Friday during the academic year.

9.2.3 HEALTH SERVICE

A compulsory medical examination and X-ray are standard for all new McGill students.

The Student Health Service provides these and, in addition, is available day and night to provide treatment for any minor illnesses, accidents, and emergencies, and professional help for those in emotional or psychological difficulties. If you become seriously ill, the Health Service will refer you to the public service of one of Montreal's excellent hospitals or you may go to a doctor of your choice.

(Note to non-Canadian students: The Province of Quebec does not provide insurance for medical purposes to immigrant students and the University has instituted for your protection a compulsory health insurance plan at a cost to you of $65.00 per year, payable at registration.)

9.2.4 HOUSING AND FOOD

McGill is in the heart of the city of Montreal and there are a variety of private rooming houses and apartment buildings which you may wish to consider on arrival. However, if you are interested in University accommodation, the following information may help you to decide.

McGill has four co-educational residences in Macdonald Park on the side of Mount Royal overlooking the city. They are named Douglas, Gardner, Molson and McConnell Halls, after University benefactors. Accommodation in the Douglas Hall is for 134 students, taking the form of self-contained suites of three study-bedrooms and one shared sitting room. Douglas Hall has its own dining room, library common room, and recreation rooms. McConnell, Molson, and Gardner Halls together house 645 students in single rooms. Each Hall has its own common room, library, and recreation room. The three buildings surround a central catering and dining facility, Bishop Mountain Hall. If you wish to live in residence, apply to the Secretary, Co-educational Residences, 3935 University Street, when you make your application for admittance.

If you are married, you may request accommodation in one of the apartment buildings, especially acquired by the University for married students. The Real Estate Manager, P.O. Box 6070, Montreal Que., H3C 3G1, arranges these tenancies.

9.2.5 PLACEMENT

The Canada Manpower Centre has one of its offices on the McGill campus and assists the student in seeking permanent employment upon graduation and thereafter throughout his career. The Centre is in contact with organizations from all over Canada and the United States and arranges scheduled interviews with interested companies on

campus as well as on company premises. Its activities result in a continuing flow of excellent job opportunities being brought to your attention.

As an additional service, it will help you in finding summer employment or part-time work during the session.

Demonstrators — M.N. ABOU–MADI, M. CHENG, G.W. COMBS, P. EZPELETA, A.S. GIRGIS, R.S. HANNALLAH, I. KHAN, A.N. MUNGALL, S.H. RAFLA

Biochemistry

Professors — A.F. GRAHAM *(Chairman)*, M.J. FRASER, D. RUBINSTEIN, S. SOLOMON, T.L. SOURKES, J.H. SPENCER, L.S. WOLFE

Associate Professors — R. BLOSTEIN, P.E. BRAUN, D.T. DENHARDT, E.A. HOSEIN, R.M. JOHNSTONE, A.R. WASSERMAN

Assistant Professors — E. HARPUR, R.E. MacKENSIE, E. MEIGHEN, S. MILLWARD, W. MUSHYNSKI

Lecturer — M.R. REESAL

Associated Members — M.K. BIRMINGHAM *(Psychiatry)*, J. DUPRE *(Exp. Medicine)*, D. EDWARD *(Exp. Surgery)*, W.C. GALLEY *(Chemistry)*, L. GOODFRIEND *(Exp. Medicine)*, M. JERRY *(Exp. Medicine)*, H. PAPPIUS *(Exp. Neurochemistry)*, C. SCRIBER *(Pediatrics)*, J. SHUSTER *(Exp. Medicine)*

Epidemiology & Health

Professors – R.O. OSEASOHN, *(Chairman),* M.R. BECKLAKE, S.S. LEE, F.D.K. LIDDELL, A.D. McDONALD, J.C. McDONALD

Associate Professors – D.G. BATES, D.D. DAUPHINEE, L. DAVIGNON, P.V. PELNAR

Assistant Professors – S. DUCIC, G. EYSSEN, F.R. FENTON, R. FLETCHER, S. FLETCHER, G.W. GIBBS, J. HOEY, J.W. LELLA, J.G. LOHRENZ, J.-C. MARTIN, S.H. SHAPIRO, J.W. STAMM, N. STEINMETZ

Lecturers – D.C. BEWS, H. GHEZZO, I. HOROWITZ, A.K. PATERSON, B. POLLACK, R. WEST, F.M. WHITE

Family Medicine

Chairman (To be appointed)

Professor –L. McCALLUM

Associate Professor –W. PALMER

Assistant Professors –C. LAPOINTE, N. STEINMENTZ, I. TANNEBAUM

History of Medicine

Associate Professor – D.G. BATES *(Chairman)*

Assistant Professor – J.W. LELLA

Lecturer – E.H. BENSLEY

Experimental Medicine

Professors –D.G. CAMERON *(Chairman),* N.R. ANTHONISEN, J.C. BECK, M.R. BECKLAKE, E.H. BENSLEY, B.A. COOPER, J.H. DIRKS, C.J.P. GIROUD, H.L. GOLDSMITH, R.D. GUTTMAN, W.H.P. HILL, J. KESSLER, G.A. KLASSEN, P.T. MACKLEM, J.M. McKENZIE, C.K. OSTERLAND, B. ROSE

Associate Professors – R. BOLSTEIN, J.C. CRAWHALL, W.D. DAUPHINEE, K.G. DAWSON, J. DUPRE, E.L. FALLEN, L. GOODFRIEND, J. HOGG, N. KALANT, M. LEVY, M.J. MILLER, B.E.P. MURPHY, W.H. PALMER, H.G. ROBSON, D. RUBINSTEIN, J.F. SEELY, J. SHUSTER, D. STUBINGTON, R.D. WILKINSON

Assistant Professors – B. BAIN, C.H. BASTOMSKY, B. BHAVNANI, T.M.S. CHANG, C. COLE, L.F. CONGOTE, L.A. ENGEL, S. FLETCHER, G. GIANNOPOULOS, N.J. GILMORE, E. GORDON, H. GUYDA, R. HAND, J.R. HOEY, K. ITIABA, L.M. JERRY, A. KAHLENBERG, I. KASAKURA, M. KATZ, J. KLASSEN, J. KRUPEY, O.A. MAMER, R. MARTIN, S. MISHKIN, P.V.N. MURTHY, B. POSNER, A. ROTENBERG, A. SNIDERMAN, R.A.L. SUTTON, A.TENENHOUSE, G. TOLIS, A. ZIDULKA

Lecturers – M.G. COSIO, T. HUBSCHER, S. MULAY, G.P. McNEILL, T.J. O'CALLAGHAN, P. SCHNEIDER

Medicine and Clinical Medicine

Professors – D.G. CAMERON *(Chairman),* D.W. BAXTER, R.F.P. CRONIN, S.O. FREEDMAN, P. GOLD, C.A. GORESKY, M. HOFFMAN, M. KAYE, J.L. McCALLUM, E.E. McGARRY, M. McGREGOR, J.F. MEAKINS, J. MILIC-EMILI, R. OSEASOHN, J.A.P. PARE, J.R. RUEDY, S. SOLOMON

Associate Professors – A.J. AGUAYO, M. ARONOVITCH, C.M. BALLEM, F.M. BOURNE, J.L. BRANDT, G.M. BRAY, J.H. BURGESS, J.H. DARRAGH, N.K.M. deLEEUW, F. DIRKS, R.R. FORSEY, R.J. GARDINER, A. GOLD, A. GONDA, G.W. HALPENNY, D.G. HAWKINS, J.L. HUTCHINSON, L.G. JOHNSON, G.E. JORON, A.G. KENDALL, D.G. KINNEAR, T.D. KINSELLA, L. KOVACS, D.G.M. LAWRENCE, B.A. LEVITAN, D.J. MacINTOSH, P. MANZELL, J.B. MARTIN, H.F. MIZGALA, L.A. MOROZ, R.I. OGILVIE, C.J. PATTEE, E.A.S. REID, H.M. SCOTT, J.A. SHANKS, L. SHAPIRO, C.H. STACEY, P.B. STEWART, D.B. TONKS, A. VOST, V.M. WHITEHEAD, N.B. WHITTEMORE, C. WILLIS

Assistant Professors – E. ARENDT-RACINE, A. ARONOFF, J.T. ARSENAULT, H. BARKUN, P.E. BARRE, R.G. BAXTER, D. BERCOVITCH, R.H. BOURNE, N.F. BOYD, D.H. BRUCE, G.S.D. CANTILE, A. COOPERBURG, S. CRUESS, P. DESPAS, R. DOLLFUSS, L.R. DUFRESNE, M.H. FINLAYSON, R. FLETCHER, P.A. FLINT, G. FRASER, W. GERSTEIN, W. GREGORY, A. GUTKOWSKI, P. HACKER, T.R. HALE, J.G. HELLSTROM, H. HO PING KONG, A.B. HOOD, M. JABBARI, A.W. KAPIN, L. KNIGHT, C.F. KUDO, J. LEMIRE, J. MacAULAY, A.D. MacDONALD, J.I. MacDOUGALL, J.P. MacLEOD, R. MANGEL, D.M. MARCUS, D.G.F. MARPOLE, D. McGOLDRICK, J. MENDELSON, E.N. MERCER, A. MILLER, I.G. MILNE, M.J. MIOT, R. MITCHELL, P. MLYNARYK, M. MORISETTE, B. MOROZ, A.F. NANCEKIVELL, J.H. OH, W.R. PATERAS, R.L. PATTEN, J.S. POLSON, S. PRESANT, R.E. RANGNO, M. RASMINSKY, L.P. RENAUD, S.K.K. SEAH, E.A. SHAFFER, E. SKAMENE, M. SMITH, S. SOLOMON, J. SOLYMAR, D. STILLWELL, P. SZEGO, H. TANNENBAUM, P. TANSER, W.F.T. TATLOW, A. TENPAS, D.M.P. THOMSON, R.W. WADDELL, H.A. WARNER, W. WARNICA, J. WENER, M.K. YOUNES, M. ZAKARIJA, D. ZBOROWSKA-SLUIS

Lecturers – J.R. ALBERT, F. ANDERMANN, F.Y. AOKI, M.A. BOCTOR, R. BRODRICK, K.Z. CANTOR, L.E. CASSIDY, M.S. COHEN, W. COHEN, S.R. COOPER, F.A. D'ABADIE, D.S. DALY, J.T. DANCY, H. DAOUD, W.D. DORIAN, D.E. DOUGLAS, S.L. EIDINGER, J.D. ELIE, K.H. ESSIG, R. EVANSON, H. FRANK, D.C. FRASER, P. GEGGIE, M. GODIN, N.J. GOLDBERG, P.H. GRUNER, R.G.M. HARBERT, A. HICKEY, H. HOLLINGER, I. HUTCHINSON, A. KAHN, M. KAPUSTA, R.J. KENNEDY, M. KOVALIK, M. KUNSTLER, I. LAPIN, W. LEITH, I. LUHOVY, C.C. MacDONALD, N.

MacINTOSH, B.R. MacKENZIE, R.J. MACKLER, F. MAGILL, E. MARCOTTE, J.W. McMARTIN, D.A.N. MELDRUM, J.A. PHILLS, C. PICK, R.E.G. PLACE, B. POLLACK, J.T. RATNER, A.A. RAYES, D. REILLY, J.R. RISHIKOFF, G. ROBERGE, S. RONA, H.E. ROSS-MIDGLEY, J.S. ROSTANT, M. ROZENFELD, O.L.A. SCHLAPPNER, H. SHISTER, R. SHULMAN, A.H. TINMOUTH, M. VAS, J.C. VERA, I. WINKLER G.H. WORSLEY, J. ZARINEZUK, J. ZIDULKA

Demonstrators – L.W. BIRMINGHAM, P. CHESNEY, J.P. COUTURE, H.Z. HOLLINGER, G.A. HUTCHINSON, J. IRWIN, W.A.R. LAING, J.F. MacDONALD, D.G. MacKAY, T. MONKS

Associated Members -

Professors: A. BARBEAU, R. BOUCHER, J. GENEST, O. KUCHEL, A. LANTHIER, W.J. NOWACZYNSKI

Associate Professors: T. SANDOR, A. VIALLET

Assistant Professors: P. BRAZEAU, M. CHRETIEN, J. DAVIGNON, D.E. DOUGLAS, A.G. FAZEKAS, P. KOCH, J.M. ROJO–ORTEGA, M. SOMMA, D. TRACHEWSKY, O.H. WILSON

Lecturers: J.R. DUCHARME, C. DUFAULT, G. LEMIEUX, C.L. MORIN, S.V. PANDE

Microbiology and Immunology

Professors – S.I. VAS *(Chairman)*, B.H. MATHESON, J.W. STEVENSON, W. YAPHE

Associate Professors – Z. ALI-KHAN, C.A. BUTAS, E.C.S. CHAN, P.M. COOKE, J. deVRIES, P. GILL, L. KAPICA, G.K. RICHARDS, H.G. ROBSON, R. SIBOO

Assistant Professors – A.F. DOSS, J. GORDON, V. GROH, R. HAND, E. MANKIEWICZ, L. MARTINEZ, J.L. MEAKINS, J. MENDELSON

Lecturer – S. NOMMIK

Demonstrator – C. SHAW

Neurology and Neurosurgery

Professors – W. FEINDEL *(Chairman)*, D.W. BAXTER, G. BERTRAND, R.G.B. GILBERT, P. GLOOR, F. McNAUGHTON, B. MILNER, T. RASMUSSEN, P. ROBB, J.G. STRATFORD, L. WOLFE

Associate Professors – A. AGUAYO, F. ANDERMANN, J. BLUNDELL, S. CARPENTER, J.B.R. COSGROVE, R. ETHIER, I. HELLER, G. KARPATI, D. LAWRENCE, J.B. MARTIN, G. MATHIESON, H. PAPPIUS, A. SHERWIN, D. TROP, G. WATTERS

Assistant Professors – G. BRAY, R. CATCHLOVE, C.J. DILA, A. EISEN, M. FINLAYSON, R. FORD, B. GRAHAM, R. HANSEBOUT, I. LIBMAN, D. MELANCON, K. METRAKOS, A. MORTON, A. OLIVIER, S. PRELEVIC, M. RASHMINSKY, L. RENAUD, W.F.T. TATLOW, E. WILKINSON, J. WOODS, Y.L. YAMAMOTO

Lecturers – E. ANDERMAN, G. BELANGER, L. CUADRADO, R. HOLLENBERG, P. HUMPHREYS, J.R. IVES, W. OLANOW, S.J. ROTHMAN, W. SHEREMATA, C. STRAUSS, L. TAYLOR, C. THOMPSON, B. YOUNGE

Obstetrics & Gynecology

Professors – G.B. MAUGHAN *(Chairman)*, R.A.H. KINCH, J.P.A. LATOUR, F.J. TWEEDIE

Associate Professors – G.H. ARRONET, H.B. BOURNE, P.D. DESJARDINS, J.R. DODDS, M.HENDELMAN, J.L. MACARTHUR, T. PRIMROSE, R.J. SEYMOUR, R.H. USHER, M.H.V. YOUNG

Assistant Professors – P.R. BLAHEY, T.B. CATTERILL, J.E. COFFEY, W.D. FRASER, M.M. GELFAND, P.G. GILLETT, S. GOLD, C.C. LINDSAY, E.A. MacCALLUM, C. NUCCI, R.M. PARSONS, R.M.H. POWER, JR., L.D. RHEA, T.N. ROMAN, M. SABIN

Lecturers – R.H. AIKMAN, A.F. ASSWAD, N.J. BUKA, E.B. DeKOOS, A. deLEON-LAURENZA, P. DORR, G. HABER, D.R. POPKIN, L.P. SMITH, J. STOCKER, G. TOLIS, A. TOTH, E.C. TUCKER

Demonstrators – N.J. BAKAR, O. BALABANIAN, S. BODNAR, M.E. BOYD, N.L. CASSAR, N.H. CHAPMAN, W.A.R. COOKE, I.B. GLICKMAN, M.S. GURALNICK, R. KAPUSTA, G. MALLOUH, J.G. MULCAIR, A.A. NEUMAN, R.N. SHATZ, G. SIGMAN, L. VENECEK

Ophthalmology

Professors – S.T. ADAMS *(Chairman)*, J.C. LOCKE

Associate Professors – T.H. KIRKHAM, S.B. MURPHY, W. TURNBULL

Assistant Professors – S. BROWNSTEIN, P.L. DAVIS, L.S.S. KIRSCHBERG, R.P. LeBLANC, A.B. LEITH, J.M. LITTLE, D.W.C. LORENZETTI, R.B. RAMSEY, P. ROSENBAUM, N.E. SAHEB, H.L. TANENBAUM

Lecturers – D. ANDERSON, F. BUFFAM, P.A. CAPOMBASSIS, P. DAWSON, H.A.G. DUNCAN, J.A. FOREMAN, E. GORDON, W.B. JACKSON, A.H. KATZ, M. KHALIL, R.W. PEARMAN, R.C. POLOMENO, K.E. SCHIRMER, D. SVARC, B.R. YOUNGE

Otolaryngology

Professors – J.D. BAXTER *(Chairman)*, D.G. DOEHRING, D. LING

Associate Professors – K.K. CHARAN, R.H. McCOY, J.S. OUTERBRIDGE, E.J. SMITH

Assistant Professors – E. ATTIA, B. BARTHOLOMEUS, A. GROSSMAN, A. LING, M. MENDELSOHN, D. MOSCOVITCH, W.H. NOVICK, M.R. SEITZ, R.S. SHAPIRO, G. SHIMO

Lecturers – H. CAPLAN, A. COHEN, A. KATSARKAS, R. LAFLEUR, M.N. LEVITT, R.M. McMILLAN

Pathology

Professors — R. H. MORE *(Chairman)*, R. BOLANDE, W.P. DUGUID, S.N. HUANG, D.S. KAHN, J.P.A. LATOUR, M. LEWIS, G. RONA, H. SHELDON, G. TREMBLAY, F.W. WIGLESWORTH

Associate Professors — S. CARPENTER, M.H. FINLAYSON, J. HOGG, E. HOSEIN, J. KNAACK, K.G. MARSHALL, G. MATHIESON, D. MURRAY, M. REESAL, N.S. WANG, B.I. WEIGENSBERG

Assistant Professors — M.N. AHMED, G.R. BERRY, S. BROWNSTEIN, M.L. deCHAMPLAIN, A. FERENCZY, R.D.C. FORBES, W. HAUSER, I. HUTTNER, S. INOUE, M.E. KIRK, J.R.C. LACHANCE, J.O. LOUGH, M. MANDAVIA, MOINUDDIN, D.R. MURPHY, J.B. RICHARDSON, A. RONA, G. ROWDEN, P. SCHOPFLOCHER, T.A. SEEMAYER, J.L. WEBB

Lecturers — B. ARTINIAN, J. BELAND, D. BISHOP, P. BOLDUC, J.P. deCHADAREVIAN, J. EMOND, D. KALOUSEK, Y. ROBITAILLE, H. SROLOVITZ, J. VILORIA, B.M. WOLANSKYJ

Demonstrators — L. DESORMEAU, B. MANASC P. PATEL, R. ROSE

Pediatrics

Professors — K. DRUMMOND, *(Chairman)*, R.L. DENTON, C.R. SCRIVER

Associate Professors — P. BEAUDRY, M. BELMONTE, D. CLOGG, E. COLLE, G. COLLINS, N.R. EADE, A.H. EISEN, F.C. FRASER, J. GIBBONS, C. GIROULD, D.A. HILLMAN, E. HILLMAN, A. NEIMS, S. PEDVIS, R. USHER, G. WATTERS, E.M. WORDEN

Assistant Professors — F. ANDERMAN, J. ARRANDA, P. BENJAMIN, H. BRICKMAN, H. BRODIE, S. BUCKLEY, J. CHARTERS, M. COREY, A. COWAN, R. DeBELLE, J. FONG, P. FORBES, F. GLORIEUX, H. GOLDMAN, H. GUYDA, E. HARPUR, B. KAPLAN, G. KARPATI, M. MARKS, K. METRAKOS, B. MOROZ, J. NEAL, J.H. NICKERSON, J.H. O'NEILL, E. OUTERBRIDGE, L. PINSKY, R. SHAPERA, A. STACHEWITSCH, N. STEINMETZ, H. STRAWCZYNSKI, H. SURCHIN, R. WILLIAMS, M. WISE

Lecturers — W.J. ALEXANDER, J. AYOUB, A. CHAN YIP, M. CHERNIAK, J. CHESNEY, R. CHESNEY, L. CHEVALIER, J. CHIU, T. CLARK, D. COULTER, B. COSTOM, E. DELVIN, C. DUPONT, J.H. ELDER, A. FELDMAN, B. FLETCHER, Z.R. FOX, R. GOLD, V. GOLDBLOOM, C. GRANDBOIS, J. GULYAS, P. HECHTMAN, T. HUBSCHER, P. HUMPHREYS, M. HUNTER, P. JUNGER, H. KAHNE, J.L. LEBLANC, F. LEHMANN, C. LEJTENJI, SOOK LEE, F. MOHYUDDIN, M. NETCHER, B. NOGRADY, A. PAPAGEORGIOU, P. PENCHARZ, R. PINCOTT, S. ROTHMAN, T. ROUSSEAU, W.W. TIDMARSH, W. WOELBER, I. WRIGHT, A. ZELIGER

Demonstrators — J. BELLEY, A.C. BERNARD-BONNIN, U. CALLEGARINI, J. DEMERS, F. DOUYON, A. GORDON, C. GRADINGER, H. GRADINGER, S. GUTTMAN, G. HEWITSON, M. KAZEMI, W. KENT, S. KHAKEE, V. KHEDIGUIAN, J. KITEALA, A. KOVACS-BIMBI, D. LORENZ, K. LUBKIEWICZ, G.H. LUPU, B. MANDEL, A.J. MARKUS, R. MARTIN, D. McCRIMMON, P. NEUMANN, M. PAMUKOFF, J.P. POIRIER, B. QUESNEL, D. RABIN, E. RABINOVITCH, M. ROCHETTE, S. ROCHMAN, R. ROSENFELD, M. ROZENFELD, A. St.DENIS, P. SENECAL, J. SHARP, C. SYNNOTT, C. WANG, N. WASSEF, F. WIENER, F. WISEMAN, H.O. YOUNG

Pharmacology and Therapeutics

Professors — M. NICKERSON *(Chairman)*, J. LOWENTHAL, J.R. RUEDY

Associate Professors — B.G. BENFEY, B. COLLIER, N.R. EADE, L.E. FRANCIS, A.H. NEIMS, R.I. OGILVIE, A.M. TENENHOUSE, J.M. TRIFARO

Assistant Professors — R. CAPEK, L.W.K. CHUNG, B. ESPLIN, E. KOVACS, G. KUNOS, P.G. McLEOD, R.E. RANGNO, J.B. RICHARDSON, B.I. SASYNIUK, M.S. YONG

Lecturers — R.O. DAVIES, F. HERR, W. LASKEY, G. OSHIRO, D.S. SITAR, J. WEYMAN

Physiology

Professors — J. MILIC-EMILI *(Chairman), R.I. BIRKS, T.M.S. CHANG, J.H. DIRKS, P. GOLD, F.C. MacINTOSH, G. MELVILL JONES, K. KRNJEVIC*

Associate Professors — M.W. COHEN, D.R. FIRTH, W.S. LAPP, M. LEVY, G. MANDL, C. POLOSA, P. SEKELJ

Assistant Professors — M.M. FROJMOVIC, V. KLISSOURAS, P.A.L. KONG SHAUN, M.C. MACKEY, P. NOBLE, J. OUTERBRIDGE, A. WECHSLER, P. WELDON, R.L. WILLIAMS

Lecturer — M. HAZUCHA

Associated Members — N.R. ANTHONISEN *(Medicine)*, B.A. COOPER *(Medicine), R.F.P. CRONIN (Medicine)*, B. DUBROVSKY *(Psychiatry)*, E. FALLEN *(Medicine)*, H.L. GOLDSMITH *(Medicine)*, C.A. GOREESKY *(Medicine)*, P.T. MACKLEM *(Medicine)*, M. McKENZIE *(Medicine)*, M.M. MORRIS *(Anesthesia)*, D.H. MOSCOVITCH *(Otolaryngology)*, T. NUBSCHER *(Pediatrics)*, J.F. SEELY *(Medicine)*

Psychiatry

Professors M. DONGIER *(Chairman)*, M.K. BIRMINGHAM, H. CAPLAN, H. KRAVITZ, H.E. LEHMANN, A.W. MacLEOD, R.B. MALMO, A.M. MANN, H.B.M. MURPHY, T.L. SOURKES

Associate Professors — F. AZIMA, T.A. BAN, B.M. CORMIER, I.S. DISHER, P.G. EDGELL, W.D. ENGELS, F. ENGELSMANN, R.B. FELDMAN, B.A. GIBBARD, B. GRAD, L. GRATTON, L.G. HISEY, E.P. LESTER, J.G. LOHRENZ, F.W. LUNDELL, D.J. McCLURE, H.F. MULLER, J. NAIMAN, R. PITTENGER,

E.G. POSER, R.H. PRINCE, J.J. SIGAL, L. SOLYOM, J.R. UNWIN, H. WARNES, G. WEISS

Assistant Professors — N.R. ALDOUS, M.M. AMIN, J.V.V. ANANTHARAMAIAH, C.C.J. ANGLIKER, S. BARZA, J. BEAUBIEN, P.R. BECK, C. BOS, C. CAHILL, C.H. CAHN, J. CUMBERLAND, H. DAVANLOO, E.G. DEBBANE, S. DONGIER-MONTAGNAC, B. DUBROVSKY, S.Z. DUDEK, F. FENTON, H. GRAUER, H.A. GUTTMAN, G.P. HARNOIS, B.R. HUNT, S. LAL, A.P.N. LEE, J.W. LELLA, D.C. LEVIN, E.D. LEVINSON, G.J. MAGUIRE, G.F. MORGENSTERN, J.C. NEGRETTE, G. PETERFY, D. PIVNICKI, M.S. RABINOVITCH, R.A. RAMSAY, C.C. SMITH, S. STEIN, G.C. TAYLOR, G. TURCOT, L. VACAFLOR, S. WILNER, N. WISEBORD, C. YUNG

Lecturers — E.H. ACHONG, R. ARBITMAN, K. ARVANITAKIS, H. AST, A. BARTOVA, P.S. BELLIVEAU, C. BENIERAKIS, S. BIKADOROFF, L. BUFFET, S. CAMPBELL, A.J. CARRE, G. CHOUINARD, J.D. CUTHILL, H.A. EVANS, P. GREGOIRE, L. GUERETT, L. HECHTMANN, L. HUAPAYA, R. KACHANOFF, R.A. KELLER, T. KOLIVAKIS, I. KRAULIS, F.E. KRISTOF, C. LAROCHE, G. LAROCHELLE, F. LEAL, J. LEVY, G. LOW, H.P. MALMO, A.F. MESZAROS, R.C. MONKS, A.K. MULLER, N.P. NAIR, E. NALTCHAYAN, C. NOVELLA, J.M. PAIEMENT, I. REBNER, M. ROMER, P.D.L. ROPER, J.F. RUIZ-NAVARRO, P.D. SCULLY, R. SHEPHERD, S.P. SIMONS, R.M. SMITH, A.A. SURKIS, D. TSANG, D.J. WOOD, N.S. YOUNG

Demonstrators — C. BARRIGA, S. BAYRAKAL, S. BENAROYA, E.J. BRAHM, P.B. CAMPBELL, J. CANFIELD, M. CERROLAZA, H. CVEJIC, L. DEMERS-DESROSIERS, H. FREEDMAN, P. GAGNON, S.C. GAITE, J.P. GAMACHE, J. GARANT, K. GEAGEA, C. GOLDEN, G. GREGORIOU, A. HAUSFATHER, R.W. IRVING, K. JIMENEZ, R. JORDAN, R. KIRIAKOS, D. KUSSIN, M.R. MacFARLANE, G.W. MacLEAN, S.A. MARTIN, K. MISSALA, R. OLIVEROS, J. PARIS, J.C. PECKNOLD, R.M. RICHARD-JODOIN, B.M. ROBERTSON, G.M. ROSENBERG, M. SALIB, C. TAHTA, C. VILLENEUVE, G. ZIMMERMAN, P. ZUARDI

Associated Members —J.A. CORSON, V.A. KRAL, L.J. POIRIER

Diagnostic Radiology

Professor — R.G. FRASER *(Chairman)*, J. Fabrikant

Associate Professors — W.J. ALEXANDER, W.P. BUTT, R. ETHIER, P.A. FARRER, B.D. FLETCHER, R.O. HILL, M.B. NOGRADY, M.J. PALAYEW, L. ROSENTHALL, I. SEDLEZKY, G.B. SKINNER, F. WINSBERG

Assistant Professors — F.M. BOSTON, C.M. COLEBEUGLET, P.J. FITZGERALD, J.H. GAGNON, F.A. GRAINGER, B.B. HALE, M.J. HERBA, N.A. KHAN, D. MELANCON, A.D. ROTENBERG, S. SAHA, V. SAYEGH, R.E. WILSON

Lecturers — V. ADRENYI, A. ARZOUMANIAN, G. BELANGER, J.D. CHAN, M. DESAULNIERS, J.-M. DUMAS, A.D. FRENCH, A. GLAY, M. GOLDENBERG, R.E. HANSON, R.S. HIDVEGI, B.B. HYAMS, D.A. KILLAM, R. KIMOFF, P. LANDER, R. LESPERANCE, W. LIGHT, A. LISBONA, J. LUSSIER-LAZAROFF, A. NAIMARK, M.S. NATHENS, M. O'DONOVAN, A.M. O'GORMAN, M.F. PINSKY, H. REMY, M. ROSENBLOOM, D.N. SHUSTER, R.L. SLATKOFF, J.W. SPRAGGE, L.A. STEIN, J. TOTH, M. USHER, R.L. WEE, G. WHITEMAN

Demonstrator — S. JEZUIER

Instructors — G.L. TITTE, G.A. WILKINSON, P. WILSON

Associated Member — J.C. HOGG

Therapeutic Radiology

Professors — J.H. WEBSTER *(Chairman)*

Associate Professors — P.A. FARRER, J.J. HAZEL

Assistant Professors — P. DEL VECCHIO, J.F. GUERRA, T.H. KIM, S.M. LEHNERT, T.N. ROMAN

Lecturers — G. DOYLE, C. GRAVELINE

Demonstrator — F. BEHMANN

Surgery

Professors — A.G. THOMPSON *(Chairman)*, L.G. HAMPSON, L.D. MacLEAN, D.R. MURPHY, F.M. WOOLHOUSE

Associate Professors — H.E. BEARDMORE, A.C. DERBY, M.A. ENTIN, R.L. ESTRADA, R.D. GUTTMAN, E.J. HINCHEY, G.M. KARN, R.C. LONG, P. MANZELL, A.P.H. McLEAN, E.D. MONAGHAN, P.H. NILOFF, W.L. OGILVY, H.F. OWEN, J.D. PALMER, H.R. SHIBATA, I. SHRAGOVITCH, E.J. TABAH, H.B. WILLIAMS

Assistant Professors — J.G. BEAUDOIN, N.S. BELLIVEAU, H.C. BROWN, R.A. BROWN, A.M. CLOUTIER, J.C. DICKISON, F. GUTTMAN, H. HIMAL, A. HRENO, R.N. LAWSON, G.W. LEHMAN, R.T. LEWIS, D.T.W. LIN, W.C. LLOYD-SMITH, J.K. MacFARLANE, G.G. MACKIE, R.G. MARGOLESE, B. MARIEN, K.G. McCULLOCH, J.L. MEAKINS, R. MIDGLEY, J.R. MOORE, D.W. RUDDICK, I. SHANFIELD, N.M. SHEINER, H. SHIZGAL, H.H. SIGMAN, B.L. THOMPSON

Lecturers — C.M. ALLAN, M.S. CHUGHTAI, P. COHEN, G.A. DANIEL, A.N. FREEDMAN, L.G. GENENDER, R.G.W. GOODALL, A.E.N. GRACE, E. JOMM, P. MADORE, H.W. MERRICK, R.V. MORALEJO, D.F. PAPICH, G.J. PEARL, A.S. POPIERAITIS, G. SCHWARZ, H.D. STEVENS, M. WEXLER, F.M. WIEGAND, S.A. YOUSSEF

Associated Members — F.N. GURD, H.R. ROBERTSON

DIVISION OF CARDIOVASCULAR AND THORACIC SURGERY

Professors — A.R.C. DOBELL ,H.J. SCOTT
Associate Professor — D.D. MUNRO
Assistant Professors — P.E. BLUNDELL, C.J. CHIU, J. MORIN, D.S. MULDER, J.A.S. WILSON
Lecturer — N. POIRIER

DIVISION OF SURGICAL RESEARCH

Professors — L.D. MacLEAN, D.R. MURPHY, A.G. THOMPSON
Associate Professors — D.M. EDWARD, J. GORDON, E.J. HINCHEY, S.C. SKORYNA
Assistant Professors — E. DELVIN, A.G. FAZEKAS, F. GLORIEUX, H. HIMAL, C.A. LAURIN, A.H. McARDLE, W.M. MERSEREAU, Y. TANAKA
Lecturers — A.M. DANIEL, L. GREENBERG, C. PIERCE

DIVISION OF ORTHOPEDIC SURGERY

Professor — R.L. CRUESS
Associate Professors — J.M. McINTYRE, J.E. MILLER, N. MITCHELL, E.C. PERCY, J.G. PETRIE
Assistant Professors — C.E. BROOKS, D.L. BURKE, L.B. CONOCHIE, D.S. DRUMMOND, R.B. GLEDHILL, F.A.H. GREENWOOD, D.A. MacKENZIE, G.R. MURPHY, E. ROGALA, M.A. ROSMAN, J.L. SHUGAR, J. TEMPLETON, R.G. TOWNSEND, C.L. WILSON, W.E. WILSON
Lecturers — A.A. BUTLER, B.J. COSTELLO, D.R. FORBES, L. HELLER, T.S. MEARS, J.D. SULLIVAN
Demonstrators — H.I. DUBOW, P. DUBRAVCIK, L. GREEN, H.F. HELMY, G. SELIGMAN, T.N. SILLER

DIVISION OF UROLOGY

Professor — K.J. MacKINNON
Associate Professors — B.M.M. MOUNT, E.C. REID
Assistant Professors — C.F.D. ACKMAN, J.W. FOOTE, M. LAPLANTE, D.D. MOREHOUSE, J. OH, J.A. OLIVER, Y. TAGUCHI
Lecturers — I.J. de DOMINICO, S.A. JACOBSON, W.F. LINGARD, S.G. MacISAAC, T. NEARING, H.H. RABINOVITCH, H.A. ROTTENBERG
Demonstrator — N. HALPERN

2 GENERAL INFORMATION

The one hundred and forty-third session of the Faculty will open on September 4, 1975 for students of the first three years.
Separate Announcements are available for the School of Physical and Occupational Therapy, and the School of Nursing.

2.1 BUILDINGS

McIntyre Medical Sciences Building

This building contains the administrative offices of the Faculty of Medicine, the Medical Library, the Osler Library of the History of Medicine, the Departments of Biochemistry, History of Medicine, Pharmacology and Therapeutics and Physiology, the McIntyre Animal Center and a number of special research units (e.g., Anesthesia Research, Aviation Medical Research, Biomedical Engineering, and the Cancer Research Unit).

Strathcona Anatomy and Dentistry Building

This building houses the Department of Anatomy, the Faculty of Dentistry and the Protein and Polypeptide Laboratory of the Department of Experimental Medicine.

Pathology Institute

Opened for use in October 1924, the Institute is situated on the north-east corner of University Street and Pine Avenue, adjacent to the Montreal Neurological Hospital and the Royal Victoria Hospital. It is occupied by the Departments of Microbiology and Immunology, Epidemiology and Health, and Pathology. The building has extensive facilities for teaching, research and diagnosis, including the interdisciplinary Meakins-Christie Laboratories which was opened in August 1972.

The Montreal Neurological Hospital and the Montreal Neurological Institute

The Hospital and Institute are housed in an eight-storey building, situated on University property adjacent to the Pathology Institute and the Royal Victoria Hospital. The Institute was opened on September 27, 1934 and as the cornerstone states is "Dedicated to the relief of sickness and pain and to the study of Neurology". The McConnell Wing was opened in 1953, doubling both the clinical and laboratory space. Twenty years ago the Institute assumed the responsibility for the undergraduate and graduate teaching of neurology, neurosurgery and the neuro-sciences in the Faculty of Medicine at McGill. In 1963 the Montreal Neurological Hospital was incorporated as a separate institution. The Hospital and Institute therefore have three areas of responsibility: clinical, research and teaching. In addition to wards, operating rooms and laboratories for treatment and study of diseases of

the nervous system, the building provides facilities for graduate study and research in related basic science fields.

Allan Memorial Institute

In 1943 a large building and site were donated as a basis for the development of an institute of psychiatry. The building was reconstructed to permit the establishment of a fifty-bed unit, together with extensive research laboratories, and was officially opened on July 12, 1944.

In 1946 the first day-hospital in the world was opened at the Institute and in 1953 a fifty-bed wing was added.

A research and training building was added by McGill University in 1963, providing one of the most extensive and modern research areas.

Both undergraduate and postgraduate teaching are carried on at the Institute.

Donner Building

The Donner Building for Medical Research, adjacent to the Strathcona Anatomy and Dentistry Building, was completed in September 1948. Through the generosity of William D. Donner of Philadelphia, the late founder of the International Cancer Research Foundation, the necessary funds were provided for the construction of a building entirely devoted to medical research.

The building houses the Maxwell Lauterman Laboratories for Surgical Research, and also provides facilities for many other types of medical and surgical investigation.

2.2 HOSPITALS

McGill University Teaching Hospitals

There are four McGill University Teaching Hospitals. By agreement and tradition the administration, medical staff and scientific personnel of these institutions are closely integrated with McGill University and form the basis for the clinical departments of the Faculty of Medicine. They are the following:

Royal Victoria Hospital
The Montreal General Hospital
The Montreal Children's Hospital
Montreal Neurological Hospital and Institute

The Royal Victoria Hospital comprises the following units under one administration:

1. Main Pavilion
2. Medical Pavilion
3. Surgical Pavilion
4. Ross Memorial Pavilion, private patients
5. Women's Pavilion, Obstetrics & Gynecology
6. Allan Memorial Institute – Psychiatric Pavilion

The total bed complement is 977. Admissions total about 20,000 a year and there are more than 200,000 visits annually to the Outpatient Department. The resident and intern staff numbers 323.

The Royal Victoria Hospital was granted its Charter in 1887. The Pathological Institute and the Women's Pavilion of the Royal Victoria Hospital were opened in 1926 and the Allan Memorial Institute (Psychiatric Pavilion) became part of the hospital complex in the 1940's.

The Montreal General Hospital has a bed complement of 900 for the treatment of acute diseases. In a typical year, there are approximately 20,000 admissions and 200,000 consultations in the Emergency and Outpatient Departments. The Resident and Intern staff numbers 275. "The Montreal General" was founded in 1821 and its record in clinical teaching is one of the longest in North America. Students were first received in 1823, in what was the first medical school in Canada. This school agreed to form the Faculty of Medicine in 1829.

The present Hospital was opened in 1955. In addition, a five-storey Research Building was opened on Hospital grounds in late 1973.

The Montreal Children's Hospital located on Tupper Street near the Atwater Metro Station, has 300 beds and, in a typical year, admits 12,000 patients. The Ambulatory Services have approximately 200,000 visits, 60,000 in Emergency and 140,000 in the clinics. The hospital admits newborn infants, children and adolescents with all kinds of medical and surgical problems.

The Alexandra Pavilion (formerly the Alexandra Hospital) is now part of The Montreal Children's Hospital and will be a centre for diagnostic assessment and treatment programs for retarded children and other programs in developmental medicine.

An active teaching program is maintained for the medical students and for the 125 interns and residents. There are also teaching programs for nursing students and other health professionals. The McGill University-Montreal Children's Hospital *Research Institute* is located in the hospital, and sponsors research and postgraduate education in disciplines related to problems of childhood.

The Montreal Neurological Hospital at 3801 University Street, provides neurological and neurosurgical services for the Royal Victoria Hospital. It is, however, a completely independent hospital with its own corporation and Board of Directors. There are 135 beds, including a pediatric unit, providing for the care and investigation of patients with organic diseases of the nervous system. In 1973, 698 operations were performed, including

251 craniotomies and 179 major laminectomies. *The Montreal Neurological Institute* houses the Department of Neurology and Neurosurgery for McGill University and is responsible for undergraduate and graduate teaching. Research is carried out with superb equipment and highly qualified staff.

Specialty Teaching Hospitals

The following hospitals are affiliated with the McGill University Faculty of Medicine. All the departments and services of these hospitals participate in teaching and research in a single specialty:

Douglas Hospital
The Montreal Chest Hospital Centre

Douglas Hospital was opened in 1890; it is a hospital centre for the specialized care of mental illness of short and long term duration. There are facilities for children, adolescents, adults and elderly patients. Services are offered as part of an integrated network of psychiatric services, in cooperation with various departments of psychiatry of general hospitals; futhermore, there is a comprehensive community psychiatric program offered to residents of Area A (Ville Emard, Ville LaSalle, Verdun, Pointe St-Charles). There are approximately 1,130 admissions per year and 18,200 visits at the out-patient clinics per year.

The hospital provides clinical instruction and training for residents in psychiatry and in pediatrics, as well as for medical students and students of various paramedical disciplines. Experience can also be obtained in research through the activities of the Research Department of the hospital.

The Montreal Chest Hospital Centre is a McGill teaching, training and research specialty hospital, for all diseases of the chest, excluding the heart and great vessels. It operates on an out-patient and in-patient basis including a large general chest and tuberculosis clinic. The hospital contains 124 beds and its facilities include operating rooms, general, special and research laboratories, fully equipped pulmonary function laboratories, physiotherapy, and all para-medical allied services.

The hospital provides some specialized programs and services which include a home care program, adult cystic fibrosis clinic, anti-smoking program, out-patient rehabilitation program for respiratory insufficiency, Center for PHAGE typing and identification of atypical mycobacteria for the Province of Quebec, Revised Comprehensive Tuberculosis Program and special emphasis on the present challenge of lung cancer. It maintains an active research program and is fully approved by the Royal College of Physicians and Surgeons of Canada for residency training programs in both medicine and surgery. Residency rotating appointments number approximately 30 annually.

Hospitals Partially Affiliated with McGill Univeristy

The following hospitals have been approved and have contracted with McGill University for participation in teaching and research in one or more departments and services:

Jewish General Hospital
The Lakeshore General Hospital
Queen Elizabeth Hospital of Montreal
Queen Mary Veterans' Hospital
Reddy Memorial Hospital
St. Mary's Hospital
Shriners' Hospital for Crippled Children

2.3 LIBRARIES

Medical Library

Life Sciences Area Librarian – FRANCES K. GROEN
Assistant Area Librarian – DAVID S. CRAWFORD

The Medical Library is located on the second, third and fourth floors of the McIntyre Medical Sciences Building; the entrance is on the third floor.

The Library is open from mid-September to mid-June from 8:30 a.m. to midnight Monday to Friday, from 8:30 to 5:00 p.m. on Saturday and 1:00 p.m. to 5:00 p.m. on Sunday. During the summer months and at Christmas, the hours are restricted but notification of these changes is posted well in advance.

The Library is open to all who need to use its collections. Borrowing privileges are given to McGill faculty, staff and graduate students, all students in the Faculties of Medicine and Dentistry and to undergraduates whose course-work requires its use. Borrowing privileges are also extended to members of the health professions in the community.

Reference librarians are available to answer reference questions, to help with the use of the card catalogue, reference books and indexes and to assist in the compilation of bibliographies. On-line bibliographic searches of the MEDLINE data base are available in the Reference Department and the staff can obtain access to the off-line data bases of the National Science and National Libraries. An audio-visual guide to the Library and audio-tapes on the use of specific abstracting and indexing tools are available in the Reference Department.

One of the strengths of the Library is its journal collection. Of the more than 143,000 items held, over 95,000 are bound journal volumes, and over 2100 titles are currently received. The book collection is particularly outstanding in the area of

ophthalmology, due in large measure, to gifts from the late Dr. Casey A. Wood. There are also collections of books and journals in many departments of the Faculty most of which are duplicates of material in the Medical Library.

Osler Library of the History of Medicine

The two-storey wing extending out from the third and fourth floors of the McIntyre Medical Sciences Building is the Osler Library, entirely devoted to the medical-historical collection. Besides library offices and stack space, the Library consists of two reading rooms, the Wellcome Camera, accessible through the main Reading area of the Medical Library on the third floor, and the Osler Room beyond the Camera.

The collection, consisting of about 25,000 volumes in the history of medicine and its sciences, has, as a nucleus, the 8,000 volumes bequeathed to McGill by one of its most famous pupils and teachers, Sir William Osler. It is especially this portion which is rich in 15th, 16th, 17th, and 18th century medical books. In addition, all books printed before 1850 have been transferred from the Medical Library to this collection. The rest of the collection has been purchased by the Osler Library itself, especially since 1957, when a generous grant from the Wellcome Trust made active growth of the Library possible. The Library is constantly adding to the collection, especially current work in the history of medicine.

All books in the collection are available for use within the Library and the vast majority of them are available on loan. Undergraduates and all interested persons may use the Library except as restricted by the attending Library staff. For the holdings of the Library, users are urged to consult the card catalogue, and the book catalogue entitled *Bibliotheca Osleriana;* both are in the Wellcome Camera. At present, the collection is not completely catalogued anywhere else in the University.

2.4 MEDICAL SOCIETIES

McGill Medical Students' Society

The Society is an association of all registered medical students. Acting through its elected council and various Faculty committees, the Society performs a number of functions:

1) To represent medical students' ideas, concerns, and problems to the Faculty of Medicine, the government, and the public at large.

2) To promote interaction among the medical students of the province through the newly formed Féderation des Associations des Etudiants (es) en Médecine du Québec.

3) To attempt to advance new forms of learning to meet with the desires of the students.
4) To collaborate with the Students' Societies of Nursing and Physical & Occupational Therapy in running the "Annex", our new social centre.
5) To regulate all student sporting and social events within the Faculty.
6) To generally attempt to provide the resources and personnel to meet student needs and wishes as they arise.

Of the many things presently occurring under the auspices of the M.S.S., some of the more interesting are the McGill Medical Journal, the new Women in Medicine Group, and a new French course for students in second year. The M.S.S. has members on many faculty committees, including the Curriculum Committee. Details of all our activities are easily available from the M.S.S. Office and it is hoped that all students will participate in the Society's activities.

La SOCIETE est une association de tous les étudiants inscrits en médecine. Représentée par son conseil élu et par les divers comités de la faculté, la SOCIETE accomplit les fonctions suivantes:

1) représente les idées des étudiants, leurs soucis et leurs problèmes à la faculté de médecine, au gouvernement et au public en général,
2) facilite la communication des étudiants en médecine de la province par le moyen de la Fédération des Associations des étudiants (es) en médecine du Québec qui a été nouvellement formée.
3) elle essaye de développer des nouveaux cours qui rencontreront les désirs des étudiants,
4) de collaborer avec les étudiants (es) de la Société des infirmières ainsi qu'avec la société de Médecine Physique et de réhabilitation dans la direction de "l'Annexe", notre nouveau centre social.
5) de voir à ce que la faculté de médecine s'occupe de régler toutes les réunions sportives ou sociales des étudiants.
6) de façon générale, essayer de fournir toutes les ressources et le personnel possibles afin de rencontrer les besoins et les désirs des étudiants au moment approprié.

De toutes les choses qui se produisent sous les auspices de la Société des étudiants en médecine, celles qui sont les plus intéressantes sont: le journal médical de McGill, la création d'un nouveau groupe "Les Femmes en Médecine" et un nouveau cours de français pour les étudiants en deuxième année de médecine. La Société des étudiants en médecine compte des membres sur plusieurs comités de la faculté y compris le "Curriculum Committee". Les détails de toutes nos activités peuvent facilement être obtenus du bureau de la Société et nous souhaitons ardemment que tous les étudiants participent à nos activités.

Osler Society

The Osler Society was founded in the Spring of 1921 by a number of undergraduates in Medicine,

its object being to perpetuate the memory and teachings of Sir William Osler by the reading of papers and discussion of topics reflecting his ideals of a liberal medical education. Those interested may supplement their clinical and scientific knowledge by the consideration of those topics of medicine which are of historical and literary significance.

The membership includes students from each class in the Faculty. Several professors have shown an active interest in the Society and have actively participated. Each year an Honorary President has been elected from this older group.

3 SCHOLARSHIPS, BURSARIES, PRIZES, MEDALS AND LOAN FUNDS

For details of scholarships, bursaries, and loan funds open to students in all Faculties, see the *General Announcement.*

Within the Faculty of Medicine, students who demonstrate outstanding performance are recognized through the awarding of prizes and medals. Any prizes and medals awarded to a student are noted on his transcript and become a permanent part of his record, as are University Scholarships which are also awarded for outstanding scholastic achievement.

In view of the high level of academic performance already demonstrated and achieved by students entering the Faculty of Medicine, all other awards available in the Faculty at the undergraduate level are generally awarded by the Faculty on the basis of academic standing and financial need. Students requiring financial aid should obtain information and complete the financial aid forms available from the Student Aid Office, 3465 Peel Street, Montreal, P.Q.

3.1 SCHOLARSHIPS

DR. MAUDE E. SEYMOUR ABBOT SCHOLARSHIPS. — A fund of $10,000, established in 1938 by an anonymous donation, in honour of the late Maude E. Seymour Abbott, B.A., M.D., F.R.C.P.(C), LL.D.(McGill), to commemorate her distinguished work in connection with the history of Canadian medicine, the Sir William Osler Pathological Collection, and her outstanding research in congenital cardiac disease.

The revenue of this fund provides scholarships awarded by the University to undergraduates of either sex in the Faculty of Medicine, but women are given the preference. Awards vary according to the needs of the winners. Further information may be obtained from the Dean's Office, Faculty of Medicine.

J.H.B. ALLAN SCHOLARSHIP. — Available to undergraduate students in any year.

SIR EDWARD W. BEATTY MEMORIAL SCHOLARSHIPS FOR MEDICAL STUDENTS. — A fund of $100,000 was bequeathed by the late Dr. Henry Albert Beatty, the income from which provides two scholarships, not necessarily of equal value, awarded annually to students of either sex and of any nationality. Open to (i) students registered in the McGill Faculty of Medicine as candidates for the M.D., C.M. degree, (ii) graduates of an accredited Faculty of Medicine registered for postgraduate degrees, (iii) graduates of an accredited Faculty of Medicine registered for a postgraduate diploma in a clinical specialty, (iv) graduates of an accredited Faculty of Medicine who are employed in a year of research as part of their residency training program. For students who hold or are working towards the McGill M.D., C.M. the award may be held at any approved institution in Canada or abroad. For other qualified students the award must be held at McGill. The holder is expected to devote his year of tenure either to research or to some form of special training excluding the normal training towards the M.D., C.M. and excluding any of the years of residency training required in the Diploma courses. Awarded by the Faculty of Medicine but not unless suitable candidates present themselves. Apply to the Dean's Office on the forms provided for this purpose on or before February 1 of the year in which the scholarship is to commence.

MAX BINZ SCHOLARSHIP. — From the bequest of the late Max Binz, $1,000 is set aside annually for scholarships in the Faculty of Medicine.

JAMES H. CUMMINGS SCHOLARSHIPS. — Two or more entrance scholarships in the Faculty of Medicine bequeathed by the late James H. Cummings. Awarded at the discretion of the Faculty of Medicine.

DR. E.M. FISHER MEMORIAL SCHOLARSHIP. — Available to undergraduate students in any year.

WALTER J. HOARE MEMORIAL SCHOLARSHIP. — Endowed by the late Dr. Charles W. Hoare, a graduate of McGill University, in memory of his son, Walter J. Hoare, who was killed in World War I. Open to pupils of the Collegiate Institutes of the counties of Essex, Kent and Lambton entering the Faculty of Medicine. If there are no qualified candidates in this preferred class, the

scholarship may be awarded to a nominee of the Faculty of Medicine.

KEITH HUTCHISON MEMORIAL SCHOLARSHIPS. — Two or more scholarships, in memory of the late Dr. Keith Hutchison, established in the Faculty of Medicine. Tenable in any year of the course and awarded on the basis of distinguished academic standing and financial need. The holder in any one session may re-apply for the following year.

IVES SCHOLARSHIP, — Established in 1967 by a bequest of the late David Fraser Murray, M.D., C.M., 1924. Awarded on the basis of financial need with preference given to students from Nova Scotia, New Brunswick or Prince Edward Island.

CAMPBELL KEENAN MEMORIAL SCHOLARSHIP. — Established by Miss Charlotte Mildred Hagar in memory of the late Dr. Campbell B. Keenan. Tenable in the second, third, or fourth year of the course in Medicine and awarded on the basis of distinguished academic standing and financial need to an applicant who intends eventually to enter surgical practice. The holder in any one session may re-apply for a subsequent session.

JAMES GRAHAME KER AND FREDERICK K. PETRIE MEMORIAL SCHOLARSHIP. — Awarded to the student from Eastern Ontario (Counties of Dundas, Stormont, Glengarry, Grenville, Carleton, Russell, and Prescott) or from Montreal, who in the examinations of the first year of the medical course secures the highest academic standing. The Faculty of Medicine may, however, award this scholarship to the same student during the third and fourth years.

JAMES O. MEADOWS AND MARIA MEADOWS AWARDS. — A bequest of $200,000 from the late Dame Maria Cowan Meadows to establish awards for undergraduates or graduates in the Faculty of Medicine for the purpose of supporting research. Preference will be given to candidates working in the field of Cancer Research, but worthy candidates working in other areas of medical or surgical research will also be considered. Apply to the Dean of the Faculty of Medicine.

ROBERT SHARWOOD MEMORIAL SCHOLARSHIP. — Tenable in any year of the undergraduate course in Medicine and awarded on the basis of distinguished academic standing and financial need. The holder in any one session may re-apply for the following year.

FREDERICK SMITH MEMORIAL SCHOLARSHIP. — This name is given to one University Scholarship tenable only in the Faculty of Medicine.

UNIVERSITY SCHOLARSHIPS. — See the *General Announcement.*

3.2 BURSARIES

BELLAM MEMORIAL BURSARIES. — A bequest of $20,000 from the estate of the late C.F. Bellam. Awarded on the basis of financial need. Candidates must be from Stanstead County of Quebec.

DR. BEN BENJAMIN MEMORIAL BURSARY. — Established by his sisters in memory of the late Ben Benjamin, B.A., M.D., C.M., lecturer in the Department of Pediatrics. Awarded on high academic standing and financial need.

JOSEPH ISRAEL BENNETT BURSARY. — A bequest by the late Joseph Israel Bennett, the interest on which is to provide a bursary to be awarded annually to a deserving student.

ELFRIC DREW BROWN BURSARY. — Established in 1973 by a bequest from the late Elfric D. Brown, M.D., C.M. The annual income is to provide bursaries to help deserving students in the Faculty of Medicine.

BEVERLY COONER BURSARY. — Established by the family and friends of the late Beverly Cooner to assist a deserving student. Awarded with the approval of the National Council of Jewish Women on the basis of financial need and academic standing.

CO–OPERATIVE MEDICAL SERVICES FEDERATION OF ONTARIO BURSARY. — To be awarded on the basis of academic standing and financial need, to a student who has completed the pre-medical years and is entering the first medical year in university, and who has been a member or whose parents have been members of a medical co-operative for at least two years. In the event no first year student qualifies, a second, third, or fourth year student may be chosen.

ANNIE DIAMOND BURSARIES. — Established in 1969 for medical students with financial need. The awards will vary according to the needs of the recipients.

SAMUEL EIDLOW MEMORIAL BURSARY FUND. — Established for worthy medical undergraduate students with financial need.

CHANCELLOR FERRIER MEMORIAL BURSARY. — Established by Mrs. Herbert V. Lacey in memory of her great-grandfather, Senator James Ferrier, Chancellor of McGill from 1884 to 1889. Awarded on the basis of academic standing and financial need, with preference to students from the state of Wyoming.

KINCH MEMORIAL BURSARY. — Established by Miss Dia Joyce in memory of Mr. and Mrs. C.H. Kinch to assist medical undergraduate students.

ROCHE BURSARY. — A bursary donated annually by Hoffman-La Roche Limited. Awarded to a

student (or students) in the undergraduate medical course who require financial assistance to complete their education.

SAMUEL ROSENFELD BURSARY. – Established by Mrs. Ida Rosenfeld Letovsky in memory of her late husband, Mr. Samuel Rosenfeld, for worthy medical undergraduate students with financial need.

REUBEN ROSS AWARD. – A bequest from the late Reuben Ross, the annual income to provide an annual award available to students in the Faculty of Medicine on the basis of financial need.

SOLOMON DAVID SACKS BURSARY. – Established in 1973 by Mr. & Mrs. Issie Sacks in memory of their son, to assist a deserving medical student. Awarded on the basis of financial need.

ROSE SCHWARZ – HELEN MARCUS BURSARY. – Established by the family and friends of the late Rose Schwarz and the late Helen Marcus to assist a needy and deserving student who intends to devote summer employment to Cancer Research. Awarded with the approval of the National Council of Jewish Women.

BRUCE SMITH BURSARY FUND. – A bequest by the late Dr. Bruce Stewart Smith "to assist poor but worthy medical students to complete medical training at McGill University."

DR. MILTON C. AND NINA E. WILSON AWARD. – Established in 1970 by a bequest from the late Dr. Milton C. Wilson, the annual income to be available for the support of undergraduate or postgraduate students in the Faculty of Medicine who are in need of financial assistance.

3.3 PRIZES

MR. and MRS. J.A. BESNER PRIZE. – Approximately $250, awarded to the student obtaining the highest aggregate standing in Phase II of the medical undergraduate course.

H.S. BIRKETT MEMORIAL PRIZE IN OTOLARYNGOLOGY. – $100. established by Miss Winifred Birkett in memory of her father, the late Dr. H.S. Birkett, former Professor of Otolaryngology, for a student who has shown outstanding performance in Otolaryngology. In addition, a specially bound volume containing an address by Dr. Birkett on the history of medicine in the Province of Quebec and a photograph and brief biographical sketch of Dr. Birkett will be presented to the winner.

BRISTOL LABORATORIES OF CANADA PRIZE. – An annual prize of $125, awarded to a student in Phase II.

JOSEPH MORLEY DRAKE PRIZE. – (Founded by the late Joseph Morley Drake, M.D.). – A prize of $125, awarded to the student considered to be the most outstanding in Pathology.

ROBERT FORSYTH PRIZE. – $75, bequeathed by the late Miss Jeanie Forsyth, awarded each year to a student who, upon graduation, has shown particular ability in all branches of Surgery.

CHARLES E. FROST MEDICAL PRIZE AND BRONZE MEDAL. – An annual prize valued at $500 to be awarded to a medical student who has shown the most promise in the field of Pharmacology. A bronze medal will also be presented to the winner.

HARRY S. GROSS MEMORIAL PRIZE. – $60, bequeathed by the late Mrs. Esther B. Gross in memory of her late husband, Harry S. Gross, D.D.S. 1913, M.D., C.M. 1921. Awarded to the student with the highest standing in Surgery in Phase II of the medical course.

JOSEPH HILS PRIZE. – (Founded by the late Dr. Joseph Hils, of Woonsocket, R.I.). A prize of $75, awarded to the student who obtains the highest standing in Pharmacology.

CAMPBELL HOWARD PRIZE IN CLINICAL MEDICINE. – $50, founded by Mrs. Campbell Howard, in memory of the late Dr. Campbell P. Howard, Professor of Medicine at McGill. Awarded to the student who has shown the most consistent excellence in his written case reports in Phase II Clinical Medicine.

F. SLATER JACKSON PRIZE. – Value $75, founded by Mr. and Mrs. H.F. Jackson in memory of their son, the late F. Slater Jackson, M.D. Awarded to the student with the highest standing in Histology.

CAMPBELL KEENAN MEMORIAL PRIZE IN CLINICAL SURGERY. – $50, established by Miss Charlotte Mildred Hagar in memory of the late Dr. Campbell B. Keenan. Awarded to the student in the graduating class who has shown the highest proficiency in Clinical Surgery. The winner of the Robert Forsyth Prize in Surgery is ineligible.

DR. W.B. LEWIS PRIZE. – An essay prize open to students in all faculties. For further information contact the Scholarships Office in the Registrar's Office.

CHESTER MACNAGHTEN PRIZES. – An essay prize open to students in all faculties. For further information contact the Scholarships Office in the Registrar's Office.

MONTREAL CHILDREN'S HOSPITAL CUSHING MEMORIAL PRIZE. – $100, awarded to the student with the highest standing in Pediatrics.

PRIMARY PRIZE. – A prize of $100 for the best aggregrate standing in the subjects of Phase I.

PSYCHIATRY PRIZE. – Value $100, awarded to the medical student who, in the opinion of the Department of Psychiatry, shows the greatest promise in Psychiatry.

SAMUEL ROSENFELD PRIZE. $50, awarded to the student with the highest standing in Medical Microbiology of the medical course.

MONA BRONFMAN SHECKMAN PRIZE. – $125, awarded for the highest academic standing in Psychiatry.

ALEXANDER D. STEWART PRIZE. – $150, founded by the late W. Grant Stewart (Arts 1885, Med. 1888) in memory of his brother, the late Alexander D. Stewart (Med. 1888), to be awarded to the member of the graduating class who, in the opinion of the Faculty, presents in every respect the highest qualifications to practise his profession.

J. FRANCIS WILLIAMS PRIZE IN MEDICINE AND CLINICAL MEDICINE. – $500, founded by the late J. Francis Williams, M.D., awarded to the student obtaining the highest standing in Medicine in Phase III of the medical curriculum.

WOMEN'S PAVILION PRIZE. – $50, awarded to the student whose performance in Obstetrics and Gynecology throughout the medical curriculum is considered to be outstanding. The winner of the Chipman Medal is not eligible for this prize.

3.4 MEDALS

WALTER CHIPMAN GOLD MEDAL. – Founded by the late Max Strean in honour of Dr. W.W. Chipman. Awarded to the student whose performance in Obstetrics and Gynecology throughout the medical curriculum is considered to be outstanding.

HOLMES GOLD MEDAL. – Founded by the Medical Faculty in 1865, in memory of the late Andrew Holmes, M.D., LL.D., sometime Dean of the Faculty. Awarded to the student graduating with the highest aggregate standing in the entire medical curriculum.

SUTHERLAND GOLD MEDAL. – Founded in 1878 by the late Mrs. Sutherland in memory of her husband, William Sutherland, M.D., formerly Professor of Chemistry in this Faculty. Awarded to a student with a good overall standing in Phase I, and whose performance in biochemistry is considered to be outstanding.

WOOD GOLD MEDAL. – Founded by Casey A. Wood, M.D., LL.D. Awarded to a student for the most outstanding clinical performance in Phase III. The winner of the Holmes Medal is not eligible.

3.5 LOAN FUNDS

MAUDE ABBOTT MEMORIAL LOAN FUND. – Established by the Federation of Medical Women of Canada and available to any woman medical student, first year intern or graduate student. Apply to the Secretariat, Federation of Medical Women of Canada, Box 8244, Ottawa, Ontario K1G 3H7.

BORIGHT LOAN FUND. – Established in 1963 by a bequest from the late George H. Boright for loans to deserving medical students.*

BOSWELL JAMES LOAN FUND. – Established in 1943 by Dr. A. Boswell James and available to undergraduates and graduates.*

DAVID M. CALDWELL STUDENT LOAN FUND. – Established in 1973 by a bequest from the late David M. Caldwell, M.D.'19, to assist students in the Faculty of Medicine, with preference given to American students.*

ALEC AND SYLVIA DOLLIN LOAN FUND. – Established in 1965 by Mr. Alec Dollin for loans for medical students.*

KELLOGG LOAN FUND. – Given by the Kellogg Foundation to provide loans up to a maximum of tuition fees in any year to students in good standing who require such assistance. The regulations and application forms are the same as for other loan funds controlled by the University.*

LACEY LOAN FUND. – Established in 1962 by a donation from Mrs. Herbert Van Devanter Lacey, Cheyenne, Wyoming, primarily for aid to medical students from the state of Wyoming but may be extended to others in accordance with the following priorities: Medical students from the state of Wyoming; Dental students from the state of Wyoming; Medical students from other states of the U.S.A.; Medical students from other countries. Loans not to exceed $700 each per year.*

GERTRUDE MUDGE MEMORIAL STUDENT AID FUND. – Established in 1958 by donations from students, graduates, and staff in memory of the late Gertrude Mudge, for many years Assistant Secretary of the Faculty of Medicine. Loans shall not exceed the tuition fees for the year.*

WESTON FAY VOLBERG JR. MEMORIAL LOAN FUND. – Established in 1956 by classmates of the late Weston Fay Volberg, Jr., M.D., C.M. 1953, and available to medical students.*

*Apply to Student Aid Office.

4 CURRICULA, COURSES OF STUDY AND PROGRAMS

4.1 PROGRAMS IN MEDICINE

Application for Admission

Application for admission to the Faculty of Medicine must be made on the special application forms available only from the office of the Associate Dean (Admissions), Faculty of Medicine, Room 609, McIntyre Medical Sciences Building. Applications for the first-year class of September 1976 will be available after September 1, 1975.
well as advanced standing) will be asked to complete a Stage I application which is reviewed by members of the Admissions Committee. Selected applicants will be invited to complete a Stage II application. There is no fee for the Stage I application. *In order to speed up our responses to your Stage I application, we enclose self-adhesive address labels. Please print your name and address on them and return them to us with your Stage I application.* The Stage II application must be accompanied by a non-returnable fee of fifteen dollars ($15.00 in Canadian funds) in the form of a cheque or money order payable to McGill University. APPLICANTS **CURRENTLY** REGISTERED AT McGILL UNIVERSITY ARE NOT REQUIRED TO PAY THE $15.00 FEE. The deadline for the Stage I application is January 15, 1976 and for the Stage II application, March 1, 1976.

Although the great majority of the entering class is below the age of 27, older applicants will be considered.

During the past few years, the Admissions Committee has selected an increasing number of Quebec students. About 15% of the entering class are accepted from applicants outside the Province of Quebec. There is a total of 160 students in the first-year class.

In general, a B plus average or a grade point average of 3.5 or better (on a 4-point scale) as well as Medical College Admission test scores in the 75th percentile range are necessary for final consideration. If you consider that your academic achievement justifies your being considered in this group, complete a Stage I application and it will be reviewed by the Admissions Committee.

Requirements for Entrance

Four-Year Program in Medicine

Applicants must be proceeding toward the satisfactory completion of a course of study leading to the Bachelor degree at a recognized college or university. All successful condidates must be in receipt of the Bachelor degree prior to registration in first year of the medical curriculum.

Scientific Requirements:

Chemistry (general), one full course with laboratory work
Chemistry (organic), one full course with laboratory work
Physics, one full course with laboratory work
Biology, one full course including studies of biology at cell and molecular level
In addition, Physiology (human and/or mammalian), one full course with laboratory work is recommended.

Cultural Requirements: In addition to the scientific requirements, applicants are encouraged to have an adequate preparation in English literature and composition, mathematics, and working knowledge of the French language.

Medical College Admission Tests: All applicants are required to take the Medical College Admission Test, conducted by the American College Testing Program (P.O. Box 414, Iowa City, Iowa 52240) at various centres in May and October of each year. The Medical College Admission Test must be taken prior to the close of Stage I applications on January 15, 1976. It is realized that English is not the first language of many applicants to this Faculty and this fact will be taken into account in assessing the results of this test. Applicants must write to the American College Testing Program at least one month prior to the test date to request permission to take the Medical College Admission Test. Registration packets may be obtained from this Faculty.

In selecting courses, in addition to the specific requirements listed above, an intending medical student should plan his premedical program as a whole, and in accordance with a definite educational objective. Emphasis should be placed on the broad educational value and the intellectual training afforded, rather than on the factual content of such premedical curricula. The student is therefore advised to select a major field which appeals to him; this major field may be selected from the natural or social sciences, or the humanities. Certain subjects, though not essential, have been found valuable in medical study and may be included as electives if the curriculum in the major field permits; psychology, sociology, genetics, anthropology, mathematics, languages.

Students are reminded that although the majority of applicants have completed their premedical studies in the Faculty of Science, successful applicants have been chosen from other faculties (Arts, Nursing, Physical and Occupational Therapy, Dentistry, Law, Management, Education, and Engineering) providing they have met the entrance requirements.

Five-Year Program in Medicine

Canadian citizens and landed immigrants resident in the Province of Quebec, completing the two-year program in Quebec Colleges of General and Professional Education (CEGEP), are eligible to apply for the five-year program providing they have taken the following science courses: one full year course in General Chemistry with laboratory work, one half year course in Organic Chemistry with laboratory work and one full year course in Physics with laboratory work. We also recommend a full year course in Mathematics although this is not a requirement. Persons having attended other technical schools or university programs before attending CEGEP are not eligible to apply for the five-year program, nor are persons attending any collegial or premedical program that is not a Quebec CEGEP. Students in the five-year program will be registered in the Faculty of Science for the first year (Med-P Year). Providing that a satisfactory academic standing has been maintained, the student proceeds into the four-year medical curriculum. Such applicants may complete the scientific entrance requirements for the four-year program during the Med-P year. Applicants for the five-year program are required to take the Medical College Admission Test in May of their second collegial year. It is realized that English is not the first language of many applicants to this Faculty and this fact will be taken into account in assessing the results of this test.

EQUIVALENT (ADVANCED) STANDING

Students are admitted only to the first and second years of this Faculty. A student of another medical school who wishes to apply for admission to the second year (advanced or equivalent standing) is required to submit an official statement of his preliminary education, the medical program he has followed, and the standing he has obtained. This should be accompanied by a calendar of the medical school in which he has studied, giving a full statement of the course of study, and a Dean's letter of recommendation.

The equivalent courses of study in schools recognized by this University shall be determined from time to time. Acceptance of a course of study as equivalent may not include the examination in that subject held by the recognized school and the student may be required to pass such examinations, individual or comprehensive, as may be required by this Faculty.

APPLICANT REVIEW AND NOTIFICATION PROCEDURE

After a review of the submitted application material, the Admissions Committee decides which applicants will be invited to come to the Faculty of Medicine Offices for interviews with Committee members. The Admissions Committee judges applicants on the basis of academic achievement (entire academic record and MCAT) as well as personal qualities and attitudes.

All applicants will be notified by letter of the decision of the Admissions Committee. All offers of admission are conditional upon final review of the results of any studies in progress. Successful applicants are given two weeks in which to reply to the letter and to state whether the offer of a place in the class will be accepted. No deposit fee is required.

4.2 REGISTRATION

Students in the Faculty of Medicine will register on Tuesday, September 2, 1975. There will be a late registration fee of $25.00 for those who register after this date. The fee will not be refunded except by authorization of the Faculty. No student will be admitted after the fifteenth day of the session except by special permission of the Faculty.

4.3 FEES

The University reserves the right to make changes without notice in its published scale of fees if, in the opinion of the Board of Governors, circumstances so require. Fees are refundable under the conditions described in the *General Announcement.*

University Fees

1. Four-year program in Medicine (all years): $719.00 plus Student Services fee of $60.00 and Students' Societies fees of $25.00.
2. Repeating Students
   Students repeating a year pay full fees.
3. *Ad eundem* Fee
   Students entering any year above the first pay a special *ad eundem* fee of $10.00
   Graduation Fee – $10.00.

General Regulations

1. Students entering the University for the first time are required to pay their fees either by mail or in person at the Accounting Department.

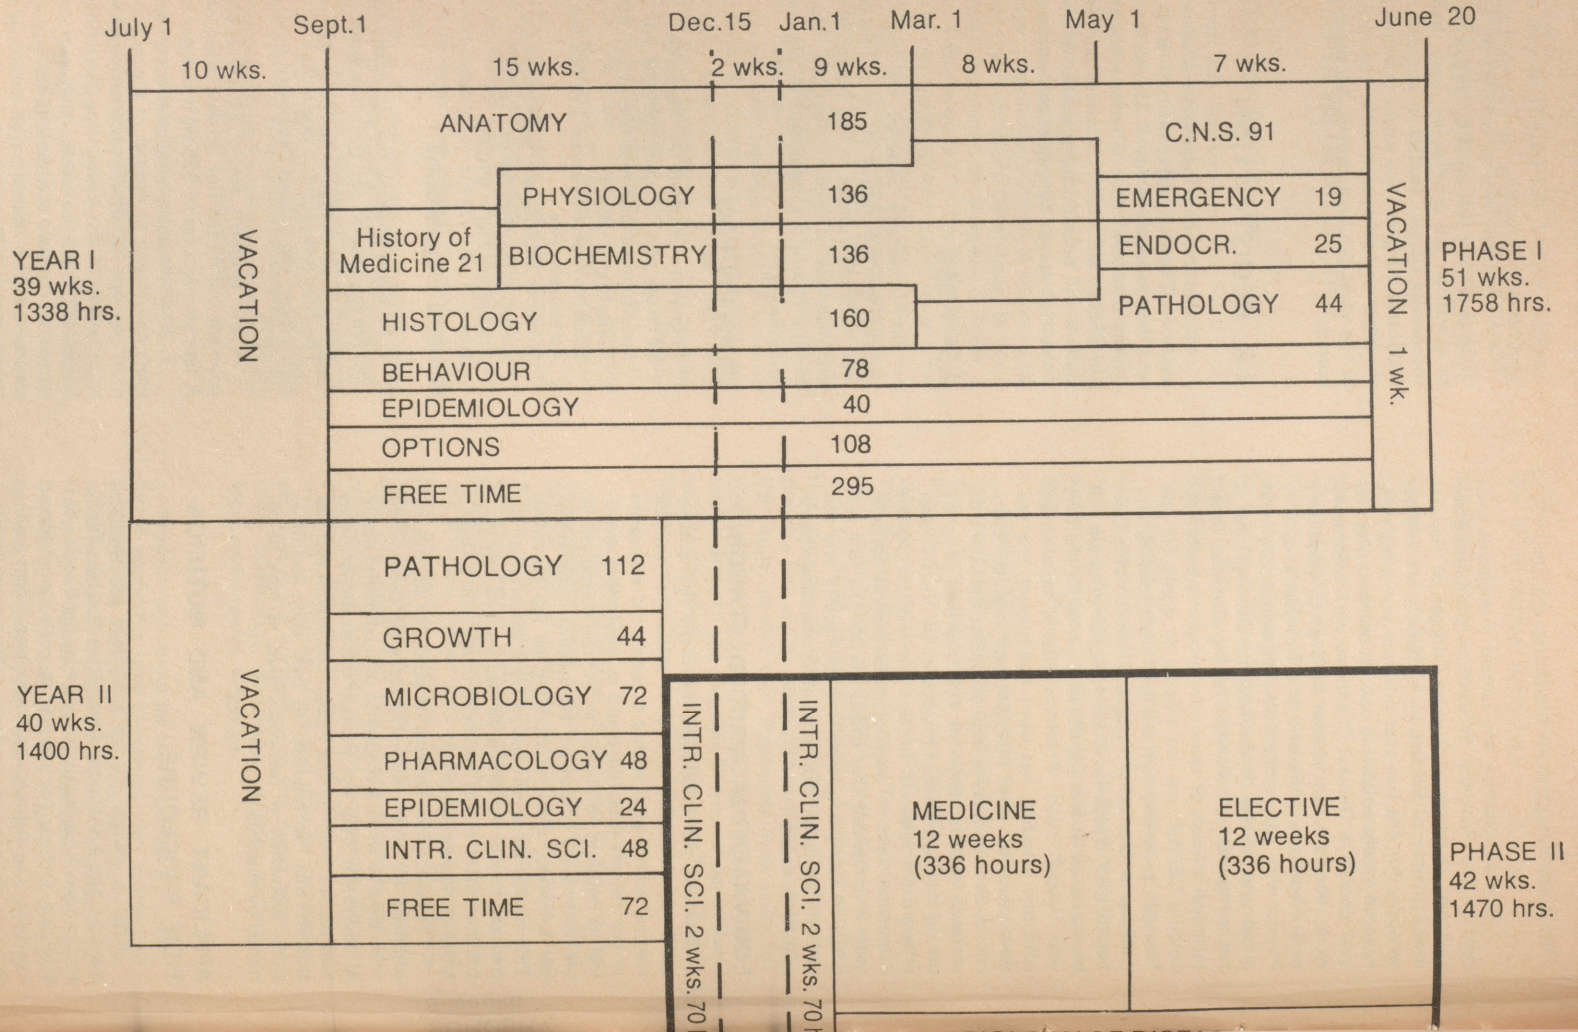
The first instalment is due within 10 days after registration; the second instalment before January 15, 1975.

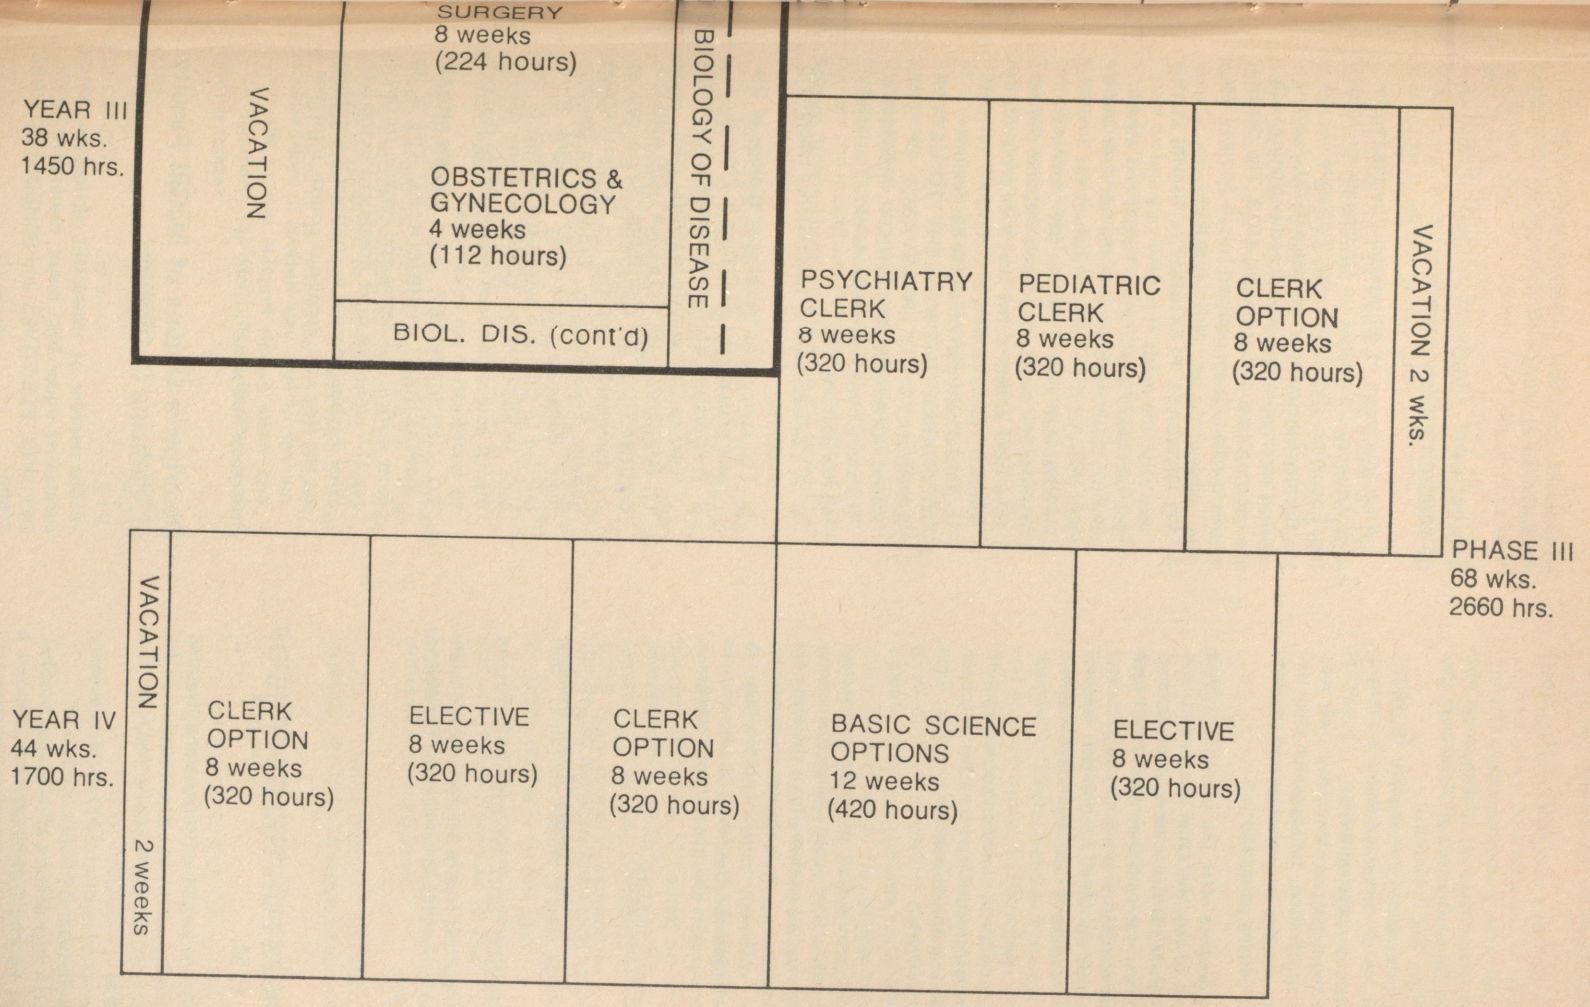
A late payment fee of $10.00 is charged for payment during the first 30 days after registration. A late payment fee of $25.00 is charged thereafter.

2. Students who have completed one or more years and intend to register in the succeeding year must pay one half of the total sessional fee by mail or in person to the Accounting Department before August 23, 1975, otherwise they will not be permitted to register. Instructions for paying fees in advance will be mailed to all returning students, either with their Reports of Sessional Standing or a

McGILL FACULTY OF MEDICINE CURRICULUM

(numbers represent time in hours)





(revised Aug. 1, 1974)

hours calculated on basis of
35 hours/week in PHASES I & II
and in Basic Science options of Phase III
& 40 hours/week in PHASE III clerkships & electives

hours and weeks do not
include vacations & holidays

TOTAL
161 weeks.
5888 hrs.

short time later. Students who have been notified by the University of the award of a scholarship, bursary or student loan, and who require this for payment of the first instalment of fees, must obtain a *Permit to Delay Payment of Fees* from the Student Aid Office, McGill University.

The second instalment is due January 15, 1976. A late payment fee as mentioned above is charged for payment after the specified dates.

3. Students registering late must pay their fees at the time of registration, failing which they become subject to the late payment fee and the provisions of the following paragraph:

As soon as possible after the prescribed dates for the payment of fees the Chief Accountant will send to the Registrar's Office a list of the registered students who have not paid their fees. Until such time as the fees are paid or a satsisfactory arrangement is made with the Chief Accountant, Reports of Standing, transcripts of record and diplomas will be withheld.

All fees are payable in Canadian currency.

For further information and for a list of special fees see the *General Announcement.*

Microscopes

The Faculty provides all students in first and second year with a first quality binocular microscope. In this way, all students have the same experience in microscopy as it applies to histology, microbiology, pathology and microhistology. A small fee is charged for the rental of microscopes to cover general repairs and maintenance costs.

Board and Residence

For details of board and residence and an estimate of expenses, see the *General Announcement.*

Health Service and Student Services

For details of the Health Service, medical examinations, and other student services see the *General Announcement.*

4.4 COURSES FOR THE DEGREE OF M.D., C.M.

The minimum period of professional training required by the University as a qualification for the independent practice of Medicine shall be five years, including:

a) four years of medical study in the University leading to the degree of M.D., C.M.; and

one year of internship in an approved hospital.

While the Faculty's administration exercises a general supervision of arrangements for internship applications, the Faculty of Medicine assumes no responsibility to provide an internship for any student.

Educational Goals of McGill Faculty of Medicine Curriculum

After four years of deliberations by the Permanent Advisory Committee on Undergraduate Medical Education (PACUME) and, subsequently, by the Faculty Curriculum Committee (F.C.C.), a new medical curriculum was introduced beginning with the entering class of September, 1973. The details of this curriculum are outlined below. Some of the major goals of the new curriculum are:

1. **TO INCREASE FLEXIBILITY.** Student interests vary, the needs of society vary and no man can be master of all fields. To this end, streaming has been introduced in the last year and a half (PHASE III) of the curriculum, the amount of scheduled Free Time has been increased in the first and second years and Optional courses have been added to the first year program. In addition, Elective programs continue to make up a significant portion of the curriculum.
2. **TO ENABLE THE STUDENT TO BETTER APPRECIATE THE RELEVANCE OF THE BASIC SCIENCES TO CLINICAL MEDICINE.** The three curricular revisions aimed at achieving this goal are:
   a) A 12-week block of basic science teaching in Phase III.
   b) The concurrent teaching of Biology of Disease with clinical disciplines in Phase II.
   c) Presentation of the Introduction to Clinical Sciences Course early in second year.
3. **TO IMPROVE THE INTEGRATION AND CO-ORDINATION OF COURSES.** Seven courses are completely integrated — Central Nervous System, Endocrinology, Growth and Development, Behaviour, Emergency Medicine, Introduction to Clinical Sciences and Biology of Disease. In addition, the timing of many departmental courses has been re-arranged so that better coordination can be achieved.
4. **TO "HUMANIZE" AN "OVER-PROFESSIONALIZED" CURRICULUM.** This is the most difficult to define and resolve; curricular revision alone has strict limitations in this area. What has been done is to continue the emphasis on the first year Behaviour course, introduce a number of first year options in social sciences and make Family Practice one of the major streams in Phase III.

Descriptive Outline of McGill Faculty of Medicine Curriculum

The content of the McGill curriculum may be considered under four major headings — CORE, OPTIONS, ELECTIVES and SCHEDULED FREE TIME.

CORE is that portion of the curriculum compulsory for all students. Core *alone* is quite inadequate to prepare a student for medical practice, and it must be supplemented by options and electives. Core includes basic biological sciences, behavioural and social sciences and clinical disciplines. It is taught in all four years of the curriculum.

OPTIONS may be thought of as a defined list of courses, determined by Faculty, from which students must select a specified number according to the rules and regulations of Faculty. Options differ from electives in several respects, the two major differences being that options are courses specifically proposed and offered through Faculty for specific educational purposes and the number of options offered is limited.

At McGill there are two types of options. Those offered in first year are unrelated to the multiple stream or track options of Phase III and might therefore be labelled as "undifferentiated options". The optional courses offered in the clerkship period are tied to the multiple streams or tracks. Four major clincial stream options and two "branches" of these major streams are offered in Phase III: Internal Medicine — General Stream or Pediatric Branch; Surgery — General Stream or Obstetrical-Gynecological Branch; Psychiatry; and Family Medicine. There are 24 weeks of clinical stream options and in addition there are 12 weeks of Basic Science Stream Options (offered in the second half of fourth year).

ELECTIVES differ from options in the following ways: The students, not the Faculty, are primarily responsible for selecting the courses; the choice of electives is very large and may be taken in non-university settings. Indeed the only major restriction is that the elective must be in some way related to medicine. Electives are seen as an opportunity for a student to either pursue his major interest in depth, or for a student to taste a variety of experiences which might help him decide on his ultimate career. Electives may be taken at McGill during Phases II and III.

SCHEDULED FREE TIME is synonymous with "Faculty scheduled student learning time." It is a vital part of the timetable as "learning time" is an essential complement to "teaching time". There is relatively little scheduled free time at McGill; most of it is formed in the first year and a half (Phase I).

In summary, the McGill curriculum is broken down as follows:

CORE	86 weeks	53.4%
OPTIONS	39 weeks	24.3%
ELECTIVES	26 weeks	16.1%
SCHEDULED FREE TIME	10 weeks	6.2%
TOTAL	161 weeks	100.0%

PHASES

The implementation of this Core-Options-Electives curriculum is done by dividing the four academic years into three phases as follows:

PHASE I	Beginning of Year I to end of November of Year II (51 weeks)
PHASE II	Beginning of December of Year II to end of December of Year III (42 weeks)
PHASE III	Beginning of January of Year III to end of May of Year IV (68 weeks)

PHASE I

This phase, comprising all of first year and the first 12 weeks of second year is devoted largely to instruction in the Basic Biological Sciences. Normal Biology is the main theme of the first year (Anatomy and Embryology, Histology, Physiology, Biochemistry, Central Nervous System, Endocrinology and an introduction to Pathology) while Abnormal Biology is introduced in the first 12 weeks of second year (Pathology, Microbiology and Pharmacology). A course in Growth and Development is also given during this period. Behavioural science and Epidemiology are the core non-biological sciences given in this phase. In addition short courses in Emergency Medicine and the History of Medicine are offered in first year. The introduction to clinical sciences begins in September of second year with about one half-day per week during the first 12 weeks of the year.

As indicated in the timetable, first year students are required to take 108 hours of optional courses. A variety of courses are offered and, in general, each is 30-35 hours in length. A few courses are 70-75 or even 90-100 hours in length. Each 30-35 hour course is assigned two credits, each 70-75 hour course four credits and each 90-105 hour course six credits. Every student must take six option credits in his first year.

The optional courses in first year are variable and will change from year to year. Two main categories of courses are given; those offered by the Faculty of Medicine and those offered by the Faculties of Arts and Science.

The following first year optional courses were offered in the 1974-75 academic session:

1. COURSES OFFERED BY THE FACULTY OF MEDICINE

FUNDAMENTALS OF HUMAN NUTRITION
INTRODUCTION TO BIOMEDICAL ENGINEERING
BIOMEDICAL ENGINEERING METHODS AND APPLICATION TO MEDICINE
RADIOLOGY
INTRODUCTION TO ORGAN PHYSIOLOGY
ALCOHOLISM AND DRUG ABUSE
DEATH AND DYING
EMERGENCY CARE

HUMAN SEXUALITY
PHYSIOLOGY SHORT OPTIONS – (e.g., Neurophysiology of Special Senses; Cardiovascular, Respiratory, Renal, Gastro-intestinal, Molecular and Muscle Physiology; Hematology; Immunology; Endocrinology; Artificial Organs)

II. COURSES OFFERED BY OTHER FACULTIES

GENETICS OF MAN
FRENCH AS A SECOND LANGUAGE
CRIMINOLOGY
THE INTELLECTUAL AND SOCIAL BACKGROUND TO MODERN MEDICINE
MEDICINE AND SOCIETY
HEALTH ECONOMICS

PHASE II

This phase is taken up with three main areas:

1. The bulk of the Introduction to Clinical Sciences Course.
2. The pre-clerkship clinical rotations in Medicine (12 weeks), Surgery (8 weeks), Obstetrics and Gynecology (4 weeks).
3. The Biology of Disease Course which is predominantly a course in Pathophysiology given concurrently (two half days per week) with the clinical rotations.

In addition, Phase II contains a 12-week elective block.

PHASE III

Phase III which begins in January of third year and includes all of fourth year is predominantly the clerkship phase. The 68 weeks of this phase are divided as follows:

Clerkship	40 weeks
Electives	16 weeks
Basic Science Stream Options	12 weeks

Streaming begins in Phase III and at this time four major streams or tracks are being planned as outlined above under options. It should be noted that the 12-week Basic Science Block in this Phase is part of the Optional portion of the curriculum and that the Basic Science courses offered will be specific for each stream. On the other hand the 16 weeks reserved for the Pediatric and Psychiatry clerkships in this phase are compulsory for all students and constitute part of Core.

It should be noted that the purpose of streaming during the clerkship period is not to introduce early specialization. Rather, it is geared to offering the student a well planned program centered around an area of special interest which may or may not be his eventual career choice. The clinical content of each of the streams is considered to be broad enough to prepare the student for any internship or residency program.

The philosophy underlying the clinical clerkship is that on each clinical service, the clinical clerk will occupy a well defined position as a regular member of a clinical teaching unit, with increased responsibility for patient care. The clerkship is designed to permit the student to consolidate the clinical skills he has acquired in Phases I and II and to begin to acquire "professional maturity".

The clinical clerkship is structured to satisfy the demands of most licensing bodies. Consequently, students may in most instances, enter directly into straight internships as the first phase of their specialty training.

Each clinical clerk will receive a stipend of $188 per month from the Provincial Government, and is entitled to four weeks vacation which must be taken at the time allocated in the timetable.

4.5 CURRICULUM REVIEW

The Faculty realizes that there is a need for constant review of the medical curriculum necessitated by:

a) Current rapid advances in scientific knowledge.
b) Probable changes in the role of the medical school in relation to the community with concomitant changes in the delivery of health care.
c) Continued application of principles developed in the field of general educational science to medical education.

Therefore a permanent student-faculty curriculum committee operates within the Faculty of Medicine. This Committee is charged with the task of studying the necessity for further curriculum revision, and planning the implementation of any modifications thought desirable.

4.6 EVALUATION SYSTEM

The courses taken within the Faculty of Medicine are divided into two groups, namely major courses and minor courses. Student evaluation, either by examination and/or by other means (term papers, tutorial assessments of performance in small groups or on clinical services, etc.) is the general rule for all courses whether major or minor.

Major courses are: Anatomy (Embryology), Histology, Physiology, Biochemistry, Central Nervous System, Pathology, Medical Microbiology, Pharmacology, Epidemiology, Biology of Disease, Phase II Medicine, Phase II Surgery, Phase II Obstetrics and Gynecology, Phase III Psychiatry, Phase III Pediatrics, all Phase III clerk option rotations, and fourth year basic science options.

Minor courses are: History of Medicine, Emergency Medicine, Endocrinology, Growth and Development, Introduction to Clinical Sciences, First Year Options, and all electives.

It should be noted that for the purposes of evaluation the six required first year option credits are combined (by averaging grades or weighing individual assessments) to represent one final composite grade.

A student who receives a failing evaluation in any major subject will be required, before he is eligible for a supplemental (or remedial) evaluation, to present a certificate to the Dean's Office from the Departmental Chairman or Course Director concerned, that the student has taken sufficient extra tuition as would indicate that he has reviewed the subject and is a suitable candidate for the supplemental (or remedial) evaluation.

There is a strict difference between the importance of a major and a minor course. If a student fails in the supplemental (or remedial) evaluation of a major course, there are definite restrictions as shown below, but if he fails in the supplemental (or remedial) evaluation of a minor course, he is permitted to carry conditions as shown below.

For the purposes of evaluation the four-year curriculum is broken down into the following sessions, the end of each representing the time at which regular Promotions Committee meetings will be held to determine whether or not a student may proceed to the next session.

Evaluation Session I
The beginning of Year I until the end of Year I

Evaluation Session II
The beginning of Year II until the end of Phase I

Evaluation Session III
The beginning of Phase II until the end of Phase II

Evaluation Session IV
The beginning of Phase III until the end of Phase III

Except under unusual circumstances, a student is not allowed supplemental (or remedial) evaluations in three or more major courses in any one evaluation session. He will be required to repeat his session or retire as decided by the Promotions Committee, from whose decision there shall be no appeal.

Except under unusual circumstances, a student is not allowed supplemental (or remedial) evaluations in two major and one minor course in any one evaluation session. He will be required to repeat his session or retire as decided by the Promotions Committee, but he may appear before the Promotions Committee to plead his case if it is decided he should retire.

Unless the Promotions Committee finds special mitigating circumstances, a failure in the supplemental (or remedial) evaluation of a major course will require the student to repeat the Evaluation Session, and no student may repeat such an Evaluation Session more than once. Any student who fails in the supplemental (or remedial) evaluation of two major courses in any one Evaluation Session shall be required to retire without the privilege of further supplemental (or remedial) evaluations unless the Promotions Committee finds special mitigating circumstances.

Except under unusual circumstances, a student who fails in the supplemental (or remedial) evaluations of three or more minor courses in any one Evaluation Session, must repeat that Evaluation Session or may be asked to retire, as may be decided by the Promotions Committee, but he may appear before the Promotions Committee to plead his case if it is decided that he should retire.

A student who fails in the supplemental (or remedial) evaluation of not more than two minor courses in one Evaluation Session, may proceed with other subjects in the subsequent Evaluation Session, carrying such subjects as conditions. However, he may not be evaluated in any subsequent major course until the conditions have been removed, nor may he carry more than two conditions at any time. Should a student fail to remove his conditions prior to the time for evaluation in a subsequent major course, he will be required to revert to the previous Evaluation Session unless the Promotions Committee finds special mitigating circumstances.

Except under unusual circumstances, a student in Phase III may take a supplemental (or remedial) evaluation in one clinical subject only, but must present a certificate from the Departmental Chairman or his delegate that he has taken extra tuition in this subject in one of the teaching hospitals and/or affiliated teaching hospitals of the McGill Faculty of Medicine. If he should fail in this supplemental (or remedial) evaluation (and provided he has passed the basic science option evaluation), he must repeat the major clinical courses offered in Phase III (Pediatrics, Psychiatry and three Clerk Option rotations) and successfully pass the evaluations for each of them.

Except under unusual circumstances, a student in Phase III who fails in the supplemental (or remedial) evaluations of the basic science options, will be required to repeat the three clerk options, the basic science options, and one elective course of Phase III, and successfully pass the evaluation for each of them.

Except under unusual circumstances, a student in Phase III who fails in the supplemental (or remedial) evaluations of two major courses must repeat the entire Phase or retire, as decided by the Promotions Committee from whose decision there shall be no appeal.

A student will not be allowed to repeat an Evaluation Session more than once, nor may he repeat a subsequent Evaluation Session if such repetition would seem indicated because of failure in evaluations, except on special recommendation of the Promotions Committee, acting upon the motion of the representatives on the committee of the Course Director or Department concerned.

There shall be Promotions Committees for each Evaluation Session, consisting of the Dean or his delegate, the Associate Dean of Medical Education,

the Associate Dean of Admissions, the Chairman of the Electives Program, and the representatives appointed by the Dean of all major and minor courses given during the session. Each committee will pass on all cases of students who fail to satisfy course requirements in the respective session.

No evaluation, examination mark, etc. shall be considered final until passed by the Promotions Committee.

The Faculty reserves the right to require the withdrawal of any student at any time if, in the opinion of his instructors, he is incompetent. There can be no appeal from this decision.

The above description of the Faculty of Medicine Evaluation System applies to students involved in the new curriculum. The rules and regulations governing students enrolled in the old curriculum are those published in the 1973-74 Faculty of Medicine Calendar.

Because the Evaluation System has a significant influence on the whole of the educational process, it is under constant review by the Faculty Evaluation Committee. Any of the rules and regulations published here or in previous calendars must not be considered inviolate; the Faculty reserves the right to change any of these rules and regulations at any time although in general such changes as are made will not come into effect in the middle of a session.

Grading

The Faculty employs a modification of the pass-fail system. This means that no marks or grades are released to any agency, institution, or individual outside McGill University. The one exception to this rule is the case of students applying for transfer to another medical school. In this instance grades, but not class standing, will be forwarded to the medical school Admissions Office if the applicant requests that this be done. All departments bear responsibility for evaluation of the students' performance and submit all final evaluations to the appropriate Promotions Committee of Faculty. Following approval by the Promotions Committee, the evaluation data are recorded in the Dean's Office and form part of the student's permanent academic file.

4.7 REQUIREMENTS FOR THE DEGREE OF M.D.,C.M.

1) Every candidate for the degree of Doctor of Medicine and Master of Surgery in this University must be at least twenty years of age and of good moral character.

2) He must have fulfilled all the requirements for entrance to the Faculty of Medicine and have attended courses of instruction for four full sessions of not less than nine months each in this University or in some other university, college or school of Medicine, approved by this University.

3) No one is permitted to become a candidate for the degree who has not attended at least two full sessions at this University.

4) Every candidate for the degree must have passed all the required evaluation in the subjects comprising the Medical course.

Intern Matching Services

A matching service is a clearinghouse designed to help final year medical students obtain the internships of their choice and to help hospitals and internship program directors obtain the students of their choice. It provides an orderly method for students to decide where to intern and for hospitals to decide which applicants they wish to enroll. For both students and program directors, it removes the factors that generate unfair pressures and premature decisions.

The matching service acts as the student's agent on the instructions embodied in the student's confidential list of all the internships for which he or she has applied, ranked in order of preference. Similarly, the matching service acts as the hospital's agent on the instructions embodied in its confidential list of all the students who have applied, ranked in order of the hospital's preference.

In the past few years final year students at McGill have participated in three different matching services. The Quebec Intern Matching Service sponsored by the Quebec Professional Corporation of Physicians matches applicants from Quebec universities seeking mixed or rotating internship in Quebec hospitals. The Canadian Intern Matching Service matches Canadian applicants for straight, mixed or rotating internships in over 120 training programs across Canada. The National Intern Matching Service matches all applicants to American internship programs.

A full explanation of these medical matching services is provided to third-year medical students in June.

4.8 REQUIREMENTS FOR LICENSE

Candidates accepted for admission are reminded that it is their personal responsibility to ensure that they fulfill all the licencing requirements of the country in which they intend to practise medicine. A university degree does not confer the right to practise. In each province of Canada, in each one of the United States and in all other countries the authority to licence is vested in a licencing body which has its own special laws and requirements. In many cases a special standard of general education is insisted upon before *beginning* the study of medicine. One of the requirements in several provinces is that the entrance qualifications of the student must be registered with the provincial licencing body for five years before a licence to practise can be obtained.

Candidates accepted for admission should therefore communicate as soon as possible with the licencing body of the country in which they intend to practise and obtain from that licencing body the necessary instructions.

Non-Canadian candidates wishing to practise medicine in the Province of Quebec must have a working knowledge of French before they will be granted a permanent licence.

Full information as to the requirements for registration in the various provinces may be obtained from the Registrars of the Provincial Medical Boards as follows:

ALBERTA — Dr. R. Woolstencroft, 9901-108th St., Edmonton, Alta. T5K 1G9.
BRITISH COLUMBIA — Dr. W.G. McClure, 1807 West 10th Ave., Vancouver 9, B.C.
MANITOBA — Dr. J.B. Morison, 371 Broadway Ave., Winnipeg, Man. R3C 0T9.
NEW BRUNSWICK — Dr. Stephen D. Clark, P.O. Box 2313, Postal Station "C", Crown Street, Saint John, N.B.
NEWFOUNDLAND — Dr. G.M. Brownrigg, 47 Queens Rd., St. John's, Newfoundland.
NOVA SCOTIA — Dr. M.R. Macdonald, Sir Charles Tupper Medical Building, 15th Floor, University Ave., Halifax, N.S.
ONTARIO — Dr. J.C.C. Dawson, 64 Prince Arthur Ave., Toronto, Ont. M5R 1B4
PRINCE EDWARD ISLAND — Dr. S. MacDonald, 206 Spring Park Rd., Charlottetown, P.E.I.
QUEBEC — Dr. A. Roy, 1440 Ste. Catherine St. West, Montreal, P.Q. H3G 1R8.
SASKATCHEWAN — Dr. H.D. Dalgleish, 211-4th Ave. S., Saskatoon, Sask.

Medical Council of Canada

In order to take the examination of the Medical Council of Canada, a candidate must present a certificate from the Registrar of a Provincial Medical Board to the effect that he holds qualifications accepted and approved of by the Medical Board of that province.

Full information may be obtained by writing to the Registrar, Box 8234, 1867 Alta Vista Drive, Ottawa, Ontario, K1G 3H7.

4.9 GRADUATE PROGRAMS LEADING TO DIPLOMAS IN THE CLINICAL DEPARTMENTS OF THE FACULTY OF MEDICINE

The Faculty of Medicine in conjunction with the basic science departments and the affiliated teaching hospitals offers a wide variety of programs leading to degrees of M.Sc. and Ph.D. or to McGill Certificate of Intern and Resident Training. Details of the graduate programs available are included in the McGill Calendar of Intern and Resident Training Programs and in the Calendar of Graduate Studies in Medical and Allied Sciences.

Initial inquiries should be addressed to the Associate Dean (Postgraduate Medical Education) of the Faculty of Medicine.

Inquiries about the individual diploma programs should be addressed to the Chairman of the department concerned.

4.10 GRADUATE STUDIES AND RESEARCH IN THE MEDICAL SCIENCES

Facilities for graduate work in the basic medical sciences and in the clinical sciences are offered by many of the Departments of the Faculty of Medicine.

Research in relation to clinical disciplines is carried out in the research laboratories at the Montreal Children's Hospital, the Montreal General Hospital, the Royal Victoria Hospital and the Montreal Neurological Institute, as well as the laboratories of the Queen Mary Veterans' Hospital, L'Institut de Recherche Clinique, and the Lady Davis Institute of the Jewish General Hospital. Graduate work in the clinical sciences is supervised by those members of the Departments of Medicine, Surgery and Pediatrics who are responsible for the direction of research programs; and for administrative purposes graduate work in these areas is grouped under the Department of Experimental Medicine, and the Division of Experimental Surgery, which is a branch of the Department of Surgery.

Inquiries concerning research training in the medical sciences should be directed to the chairman of the department in which the candidate wishes to receive his or her graduate education. Alternatively, letters may be addressed to:

Associate Dean for Graduate
Studies and Research
The Faculty of Medicine
McGill University
3655 Drummond St.
Montreal, Quebec H3G 1Y6.

5 COURSES OF INSTRUCTION

5.1 ANATOMY

Required Courses

PHASE I

HUMAN ANATOMY 504-121M. The structure of the human body is studied by means of dissection, pre-dissected specimens, lectures, tutorials and

audio-visual presentations (closed circuit TV, films, and film loops). The course includes developmental, surface and radiological anatomy and an introduction to clinical anatomy. (Course coordinator: Dr. D.G. Osmond)

Texts: J.T. Aitken *et al. A Manual of Human Anatomy,* 2nd ed. (Livingstone, 1964); J.C.B. Grant, *An Atlas of Anatomy,* 6th ed. (Williams and Wilkins, 1972); and one of the following: E. Gardner, D.J. Gray and R. O'Rahilly, *Anatomy,* 3rd ed. (W.B. Saunders, 1969); W.H. Hollinshead, *Textbook of Anatomy,* 2nd ed. (Hoeber, 1967); R.S. Snell, *Clinical Anatomy for Medical Students,* 1st ed. (Little, Brown & Co., 1973); R.T. Woodburne, *Essentials of Human Anatomy,* 4th ed. (Oxford University Press, 1969).

EMBRYOLOGY 504-131M. This course of human developmental anatomy is integrated with the course in Human Anatomy.

Texts: J. Langman, *Medical Embryology,* 2nd ed. (Williams and Wilkins, 1969); K. Moore, *The Developing Human,* 1st ed. (Saunders, 1973).

HISTOLOGY 504-121M. The study of the cytology and structure of tissues and organs. (Course Coordinator: Dr. Y. Clermont)
Texts: A.W. Ham, *Histology,* 7th ed. (Lippincott, 1974); W. Bloom and D.W. Fawcett, *A Textbook of Histology,* 9th ed. (Saunders, 1968); E.J. Reith and M.H. Ross, *Atlas of Descriptive Histology,* 2nd ed. (Harper Row, 1970).

CENTRAL NERVOUS SYSTEMS 524-121M. The Department of Neurology and Neurosurgery is a major contributor to this Interdisciplinary Course. See Section 5.21.

Electives

Major electives are offered during Phases II and III. Details of this program are published in a separate *Elective Catalogue.* Details are published in the "Calendar of Elective Programs" and further information can be obtained in the General Office from the Director of the Program.

Postgraduate and Continuing Education

APPLIED ANATOMY 504-511M. Designed for medical postgraduates and demonstrators in Anatomy.

For other graduate courses, see the *Announcement of the Faculty of Graduate Studies and Research.*

5.2 ANESTHESIA

Anesthesia is based on the Basic Sciences which are principally acquired during Phase I of the Medicine curriculum. During this phase lecture demonstrations are conducted in resuscitative techniques by Anesthetists as part of the Emergency Medicine course.

In Phases II and III during surgical rotations a series of lecture demonstrations in anesthesia related topics are given and the opportunity afforded to spend two weeks with an anesthetist in the operating room for practical experience.

Electives

Major electives are offered during Phase II and III. Details are published in the "Calendar of Elective Programs" and further information can be obtained in the General Office from the Director of the Program.

5.3 BIOCHEMISTRY

Required Courses

PHASE I

Biochemistry 507-121M. Lectures and clinical demonstrations are given, covering basic biochemistry with special relationship to disease processes. (Course coordinator: Prof. Peter Braun)

ENDOCRINOLOGY 524-141M

GROWTH AND DEVELOPMENT 524-131M
The Department of Biochemistry is a contributor to these Interdisciplinary Courses. See Section 5.21.

Electives

A limited number of students in Phases II and III may spend their elective periods in the Department. Students will be assigned original research projects under the direction of a member of its staff. They will also take part in all Departmental and group seminars and audit graduate courses. Students who plan to spend all elective periods on one project will be particularly welcome and may hope to complete a useful piece of research. Details are published in the "Calendar of Elective Programs" and further information can be obtained in the General Office from the Director of the Program.

Other Courses

For students who are interested in additional studies in Biochemistry, current undergraduate and graduate courses in the Department are recommended. (See the *Announcements of the Faculty of Science* and *the Faculty Faculty of Graduate Studies and Research.)*

5.4 EPIDEMIOLOGY AND HEALTH

Required Courses

PHASE I

EPIDEMIOLOGY 513-121M. A series of exercises and discussions on the *Social Aspects of Medicine* dealing with the doctor's responsibility to the community (in contrast to an individual patient). Problems of health and illness, the nature of the medical task, and directions for medicine and society will be considered. Topics include, for example, changing patterns of health and the present system of medical care in Quebec.

EPIDEMIOLOGY 513-221M. Presentation of principles of epidemiology and statistics and application to problems of health and illness such as evaluation of health services, natural history of disease, and etiology.

PHASE II

BIOLOGY OF DISEASE 524-221M. The Department of Epidemiology and Health is a contributor to this Interdisciplinary Course. See Section 5.21.

Electives

The Department offers two types of elective. *Research electives* are open to students in Phases II and III, and may be linked with a summer research project. These electives may take one of two forms: a) students having a special interest in a field of work within the province of the Department's activities are welcome to pursue it on a tutorial basis with a member of the staff; and b) students may collaborate in research projects which are in progress. *Course electives* are available to students who wish to participate in graduate courses and projects; they may in this way obtain credit towards an M.Sc. degree. For a listing of these courses see the *Announcement of the Faculty of Graduate Studies and Research.*

Details are published in the "Calendar of Elective Programs" and further information can be obtained in the General Office from the Director of the Program.

5.5 FAMILY MEDICINE

PHASE III

The Family Medicine stream will provide students with a planned clinical experience with patients of all ages in both institutional and community settings. Of particular interest to most students will be the opportunity to work closely with one or more family practitioners in their daily busy round of activities in their usual practice settings.

5.6 HISTORY OF MEDICINE

Required Course

PHASE I

HISTORY OF MEDICINE 522-121M. A series of 14 one-and-a-half hour lectures provide a survey of the natural, social and intellectual background to modern medicine.

From time to time, and at the request of other departments, single lectures are given on the history of special subjects within courses being taught by those departments.

Electives

Opportunity is offered for a limited number of students to pursue advanced work on research in the history and philosophy of medicine, its sciences, and public health. Details are published in the "Calendar of Elective Programs" and further information can be obtained in the General Office from the Director of the Program.

5.7 MEDICINE

Required Courses

PHASES I and II

BEHAVIOURAL SCIENCES 524-161M.
EMERGENCY 524-151M.
ENDOCRINOLOGY 524-141M.
BIOLOGY OF DISEASE 524-221M.
INTRODUCTION TO CLINICAL SCIENCES 524-231M.

The Department of Medicine is a contributor to these Interdisciplinary Courses. See Section 5.21.

PHASE II

BLOCK TEACHING IN MEDICINE 526-321M. Each student spends time on the wards of one of the teaching hospitals. He studies individual cases, writes case reports, presents cases at the bedside, does routine laboratory tests on them, and perfects the skills. His work is closely supervised by Teaching Fellows, and bedside clinics are conducted at least twice a week by his Attending Staff instructor. Further assistance in understanding the meaning of the clinical expression of the diseases he encounters is provided for by intensive reading. There are regular instructional periods in Ophthalmology, Dermatology, Radiology, and Electrocardiography. Physician-in-Chief rounds are held weekly.

PHASE III

The Department of Medicine will be responsible for a variety of offerings in PHASE III of the medical curriculum. Most of the students from all four

streams will rotate through general medicine and in addition, students in the medicine stream will be offered rotations in related medical specialties.

Electives

Major electives are offered during Phases II and III. Details are published in the "Calendar of Elective Programs" and further information can be obtained in the General Office from the Director of the Program.

Experimental Medicine

See *Announcement of the Faculty of Graduate Studies and Research.*

5.8 MICROBIOLOGY AND IMMUNOLOGY

Required Courses

PHASE I

MICROBIOLOGY AND IMMUNOLOGY 528-221M. A general introduction to Microbiology and Immunology is offered in the second year of Phase I in preparation for the infectious disease portion of the BIOLOGY OF DISEASE course. Lectures and demonstrations deal with the general nature of the various groups of microorganisms, i.e., the bacteria, fungi, viruses, protozoan parasites and helminths of medical importance and the methods by which they are studied particularly for diagnostic purposes. Sterilization, disinfection and chemo-therapeutic agents are covered. Basic immunology is dealt with as are host-parasite interrelationships. The course is concluded by a systematic survey of the major groups of pathogenic microorganisms.

PHASE II

BIOLOGY OF DISEASE 524-221M. The Department of Microbiology and Immunology is a major contributor to this Interdisciplinary Course. See Section 5.21.

Electives

Major electives are offered during Phases II and III. Details are published in the "Calendar of Elective Programs" and further information can be obtained in the General Office from the Director of the Program.

Other Courses

The Department offers a range of courses leading to the Honours B.Sc. in Microbiology and is well-equipped for graduate research leading to the M.Sc. and Ph.D. degrees. Training in clinical microbiology is available in the service laboratories of the Royal Victoria Hospital and the Montreal Neurological Institute located in the Department. See the *Announcements of the Faculty of Science* and *the Faculty of Graduate Studies and Research.*

5.9 NEUROLOGY AND NEUROSURGERY

Required Courses

PHASES I AND II

CENTRAL NERVOUS SYSTEMS 524-121M. The Department of Neurology and Neurosurgery is a major contributor to this Interdisciplinary Course. See Section 5.21.

NEUROPATHOLOGY. Given in conjunction with the courses in Pathology and Biology of Disease.

INSTRUCTION IN CLINICAL EXAMINATION OF THE NERVOUS SYSTEM 531-221M. Given in conjunction with the Introduction to Clinical Sciences course. See Interdisciplinary Courses, Section 5.21.

PHASE II

CLINICS AND CONFERENCES 531-321M. In conjunction with the Departments of Medicine and Surgery.

PHASE III – STREAM OPTIONS

Some of the students in the Medicine stream and all of the students in the Psychiatry stream will receive rotations in clinical Neurology.

Electives

Major electives are offered during Phases II and III. Details are published in the "Calendar of Elective Programs" and further information can be obtained in the General Office from the Director of the Program.

Graduate Courses

DIPLOMA IN NEUROLOGY
DIPLOMA IN NEUROSURGERY

M.Sc. or Ph.D. programs. See *Announcement of the Faculty of Graduate Studies and Research.*

5.10 OBSTETRICS AND GYNECOLOGY

Required Courses

PHASE I

BEHAVIOURAL SCIENCES 524-161M.
EMERGENCY 524-151M.
GROWTH AND DEVELOPMENT 524-131M.

The Department of Obstetrics and Gynecology contributes to these Interdisciplinary Courses. See Section 5.21.

PHASE II

BIOLOGY OF DISEASE 524-221M. The pathophysiology of pregnancy is taught in a segment of this integrated course.

INTRODUCTION TO CLINICAL SCIENCES 524-231M. The Department of Obstetrics and Gynecology contributes to this Interdisciplinary Course. See Section 5.21.

OBSTETRICS AND GYNECOLOGY 534-321. A four-week period is allocated to Obstetrics and Gynecology during Phase II. The course consists of lecture-demonstration series and antenatal obstetrics. Out-patient Department exposure to office Gynecology covering common Gynecologic disorders and antenatal care with some exposure to teaching on the wards and in the operating room. The full facilities of the Royal Victoria Montreal Maternity Hospital, Montreal General Hospital and the Jewish General Hospital Outpatient Departments, Wards and Operating Rooms will be used for as wide an exposure as possible to clinical patient material. All of these hospitals are well supplied with audio-visual teaching aids, available to the student on request.

PHASE III

OBSTETRICS AND GYNECOLOGY STREAM OPTIONS. Phase III students in the Obstetrics and Gynecological branch of the Surgery stream will have an 8 week clerkship rotation in Obstetrics and Gynecology. In addition, an Option Course in Obstetrics-Neonatology is being developed as part of the Pediatric Branch of the Medicine Stream with the emphasis on clinical Obstetrics in the wards and case rooms of the Royal Victoria Montreal Maternity Hospital, Montreal General Hospital and Jewish General Hospital. This optional course of four weeks duration, which will be given conjointly with the Department of Pediatrics will allow the student exposure to antenatal care including the high-risk pregnancy, intrapartum care including the high-risk pregnancy in the perinatal unit, postpartum care, and neonatal care of the normal and high-risk infant. Each student will be assigned a tutor who will ascertain that exposure to a wide range of clinical material is available. The clinical clerk will live in the hospital as a member of the clinical care team. A lecture-demonstration course will supplement the students clinical experience. Finally, students in the Family Practice Stream will receive a 4 week rotation in office Obstetrics and Gynecology.

Electives

A number of electives in Obstetrics and Gynecology is offered. Details of this program are published in a separate *Elective Catalogue* and further information can be obtained from the Chairman of the Electives Program. The following are particularly aimed at those students with an irterest in Obstetrics and Gynecology and Family Practice as career choices.

1. Clinical Obstetrics and Gynecology
2. Infertility and Gynecological Endocrinology
3. Gynecological Pathology and Oncology
4. Family Planning
5. Tocology and Prenatal Medicine
6. Neonatology
7. Placental Function Studies
8. Obstetrical and Gynecological Social Service and Family Welfare.

Textbooks:

Hellman, L.M. and Pritchard, J., *Williams Obstetrics,* 14th ed. (Appleton, N.Y. 1971)

Jeffcoate, T.N.A., *Principles of Gynaecology,* 3rd ed. (Butterworth, London, 1967).

Ancillary Reading:

Oxorn, H., & Foote, W.R., *Human Labor and Birth,* 2nd ed. (New York, Appleton, 1968).

Danforth, D.N., *Textbook of Obstetrics & Gynecology,* 2nd ed. (New York, Harper & Row, 1971).

5.11 OPHTHALMOLOGY

Required Courses

PHASE II

INTRODUCTION TO CLINICAL SCIENCES 524-231M. As part of Introduction to Clinical Sciences, the various tests used in routine examination of the eye are demonstrated. Instruction in the use of ophthalmoscope is emphasized. See Interdisciplinary Courses, Section 5.21.

PRACTICAL CLINICAL OPHTHALMOLOGY 537-321M. Practical Clinical Ophthalmology including OPHTHALMOSCOPY is taught at the Montreal General and Royal Victoria hospitals in conjunction with the Medicine rotation.

PHASE III

Plans are being evolved to offer Ophthalmology as part of the Medicine Stream Option program in Phase III.

Electives

Major electives are offered during Phases II and III. Details are published in the "Calendar of Elective Programs" and further information can be obtained in the General Office from the Director of the Program.

Texts: Scheie & Albert, *Adler's Textbook of Ophthalmology,* 8th ed. (Saunders, 1969); Vaughan, Asbury, Cook, *General Ophthalmology,* 6th ed. (Lange, 1971); Frank W. Newell, *Ophthalmology,* 2nd ed. (Mosby, 1969).

References: W.S. Duke-Elder, *System of Ophthalmology,* 12 vols. (Kimpton, 1958-72); Hogan & Zimmerman, *Ophthalmic Pathology,* 2nd ed. (Saunders, 1962); W.S. Duke-Elder, *Parson's Diseases of the Eye,* 15th ed. (Longman, 1970).

Postgraduate Program

See *Announcement of the Faculty of Graduate Studies and Research.*

5.12 OTOLARYNGOLOGY

Required Courses

PHASE I

OTOLARYNGOLOGY 540-121M. An introductory course in clinical anatomy pertaining to the ear, nose and throat is presented during Phase I in cooperation with the Department of Anatomy.

PHASE II

INTRODUCTION TO CLINICAL SCIENCES 524-231M. The Department of Otolaryngology is a contributor to this course, providing instruction in otolaryngological history taking and methods of physical examination.

OTOLARYNGOLOGY 540-321M. "Block Time" clinical instruction is given to small groups of students as part of the Phase II Surgery rotation. In these sessions didactic lectures are given relating to ear, nose and throat disorders and the students are given the opportunity to examine hospital patients if the group size permits.

Electives

The Department of Otolaryngology offers elective opportunities in both research and clinical studies. Details are published in the "Calendar of Elective Programs" and further information can be obtained in the General Office from the Director of the Program.

Graduate Program

See *Announcement of the Faculty of Graduate Studies and Research.*

5.13 PATHOLOGY

Required Courses

PHASE I

GENERAL PATHOLOGY 546-121M. This course is largely a self-preparation program taught in seminars. It covers the principles of general pathology and their relationship to commonly encountered diseases. (Course Coordinator: Dr. D. Kahn)

PHASE II

BIOLOGY OF DISEASE 524-221M. The Department of Pathology is a contributor to this Interdisciplinary Course. See Section 5.21.

COURSE IN APPLIED PATHOLOGY 546-221M. Weekly clinico-pathological conferences are offered in conjunction with the Medicine rotation. (Course Administrator: Dr. J. Knaack.)

PHASE III

SURGICAL PATHOLOGY STREAM OPTION. Students in the surgical stream will spend 4 weeks participating in the daily activities of an active surgical pathology laboratory. Students in the Obstetrics and Gynecology branch of the Surgical Stream will have a week rotation in gynecological pathology and diagnostic cytology.

Electives

Major electives are offered during Phases II and III. Details are published in the "Calendar of Elective Programs" and further information can be obtained in the General Office from the Director of the Program.

Postgraduate Courses

See the *Announcement of the Faculty of Graduate Studies and Research.*

5.14 PEDIATRICS

Required Courses

PHASE III

PEDIATRICS 543-421M. Clerkship in pediatrics as a member of a clinical service, provides the opportunity for experience in the management of pediatric problems under supervision. The clerkship includes ward and ambulatory rotations at the Montreal Children's Hospital; and newborn experience at either the Jewish General Hospital or the Royal Victoria Hospital. The clerks participate in a series of core-material conferences in addition to the regularly scheduled educational program of the hospitals. (Coordinator: Dr. Allen H. Neims)

PEDIATRIC STREAM OPTIONS. The Department of Pediatrics participates in three of the four streams in Phase III. A portion of the students from the Medicine and Psychiatry streams will have an 8 week rotation in General Pediatrics while all of the students in the Family Practice stream will have a 4-week program in Ambulatory Pediatrics. In addition, students in the Pediatric branch of the

Medicine stream will be offered a 4-week rotation in Obstetrics and Neonatology. This last rotation is offered conjointly with the Department of Obstetrics and Gynecology.

Electives

Twenty major elective opportunities available in Phase II and III including Clinical and Ambulatory Pediatrics, pediatric sub-specialties and pediatric research, including Biochemical Genetics, Endocrinology, Neonatology, Nephrology and Cardiorespiratory investigation. Details are published in the "Calendar of Elective Programs" and further information can be obtained in the General Office from the Director of the Program.

5.15 PHARMACOLOGY AND THERAPEUTICS

The program of instruction in Pharmacology and Therapeutics is designed to provide a systematic coverage of the pharmacodynamics of the more important groups of drugs, the factors that control and modify their effects, and the basis for selection and use of drugs in the treatment of disease.

Required Courses

PHASE I

PHARMACOLOGY AND THERAPEUTICS 549-221M. An introductory course concerned primarily with the pharmacodynamics of those drugs most frequently encountered in clinical practice.

PHASE II

PHARMACOLOGY AND THERAPEUTICS 549-321M. In the new curriculum this material will be given as part of the Biology of Disease course and will concern itself primarily with the pharmacological basis for the selection of drugs and the use of these drugs in the treatment of disease.

PHARMACOLOGY AND THERAPEUTICS 549-421. A series of sessions appropriate to each of the clinical streams will be offered as part of the basic science option program of the new curriculum.

Electives

Facilities are available for a limited number of students to undertake research in pharmacology in any year of their medical course or during the summer. Work in clinical pharmacology can also be arranged for students in Phases II and III. Details are published in the "Calendar of Elective Programs" and further information can be obtained in the General Office from the Director of the Program.

5.16 PHYSIOLOGY

Required Courses

PHASE I

MEDICAL/PHYSIOLOGY 552-121M Lectures, Laboratories and seminars. An advanced course in physiology of systems with emphasis on the physiological background of clinical function testing.

CENTRAL NERVOUS SYSTEM 524-121M.
ENDOCRINOLOGY 524-141M.

The Department of Physiology contributes to these Interdisciplinary Courses. See Section 5.21

Electives

Details are published in the "Calendar of Elective Programs" and further information can be obtained in the General Office from the Director of the Program.

OTHER COURSES

For other undergraduate and graduate courses see the *Announcement of the Faculties of Arts and Science* and *Graduate Studies and Research.*

5.17 PSYCHIATRY

Required Courses

PHASE I

BEHAVIOURAL SCIENCE 524-161M. The Department of Psychiatry is a major contributor to this Interdisciplinary Course. See Section 5.21

PHASE III

PSYCHIATRY 555-321M. Block teaching to acquaint all students (core program) with the examination of patients and understanding of some of the major factors involved in abnormal behaviour. Diagnostic procedures, psycho-therapeutic and physical methods of treatment will be among the aspects covered. Students will be provided with tutors on a group basis and will also have an opportunity to become conversant with certain more specialized areas of the field of psychiatry. An attempt will be made to provide a comprehensive experience of the total field of psychiatry, and to provide a patient-oriented, responsibility-centered experience of acute and chronic emotional disorders, including the fields of Child Psychiatry, Psychogeriatrics, and Community Psychiatry. (Course Coordinator: Dr. R.A. Ramsay)

PSYCHIATRY STREAM OPTIONS. Students in the Psychiatry stream will receive an 8-week rotation in Consultation Psychiatry and Emergency

Room Psychiatry. In addition, an attempt is being made to integrate psychiatric teaching into the Family Medicine, Medicine and Surgical streams.

Electives

Details are published in the "Calendar of Elective Programs" and further information can be obtained in the General Office from the Director of the Program.

Graduate Courses

Diploma in Psychiatry See the *Announcement of the Faculty of Graduate Studies and Research.*

Courses for the Degree of Master of Science in Psychiatry. See the *Announcement of the Faculty of Graduate Studies and Research.*

5.18 DIAGNOSTIC RADIOLOGY

Required Coureses

PHASE I

NORMAL ROENTGEN ANATOMY 558-121M. In co-operation with the Department of Anatomy. (Professor Nogrady)

ROENTGEN DEMONSTRATIONS OF PHYSIOLOGY 558-131M. In co-operation with the Department of Physiology. (Professor Fraser and Staff)

PHASE II

BIOLOGY OF DISEASE 524-221M. The Department of Diagnostic Radiology is a contributor to this Interdisciplinary Course. See Section 5.21.

SEMINARS IN DIAGNOSTIC RADIOLOGY 558-321M. These are held weekly for students during their "block time" in Medicine and Surgery.

PHASE III

DIAGNOSTIC RADIOLOGY STREAM OPTIONS. During Phase III the students in the Medicine stream will receive a 4-week rotation in a combined Diagnostic Radiology — Ophthalmology program while students in the Surgery stream will receive a 4-week rotation in Diagnostic Radiology emphasizing diseases of surgical import. In addition, students from all streams during their "clinical clerkship" attend regular conferences with the Department of Diagnostic Radiology and the Clinical Departments of the teaching hospitals of McGill.

Electives

Major electives are offered during Phases II and III. Details are published in the "Calendar of Elective Programs" and further information can be obtained in the General Office from the Director of the Program.

5.19 THERAPEUTIC RADIOLOGY

Required Courses

PHASES I AND II

INTRODUCTION TO THERAPEUTIC RADIOLOGY. 561-221M. Includes the basic principles and applications of Radiation Physics, Radiobiology, and Radiopathology of conditions treated by means of ionizing radiation. Given in conjunction with Pathology and Biology of Diseases courses.

PHASE II

CLINICAL THERAPEUTIC RADIOLOGY 561-321M. Teaching is integrated with the clinical rotations.

PHASE III

CLINICAL THERAPEUTIC RADIOLOGY 561-421M. Continuation of the clinical program initiated in Phase II.

Electives

Major electives are offered during Phases II and III. Details are published in the "Calendar of Elective Programs" and further information can be obtained in the General Office from the Director of the Program.

Graduate Courses

Diploma in Therapeutic Radiology. See *Announcement of the Faculty of Graduate Studies and Research.*

5.20 SURGERY

Required Courses

PHASE I

BEHAVIOURAL SCIENCE 524-161M.
EMERGENCY 524-151M.

The Department of Surgery is a contributor to these Interdisciplinary Courses. See Section 5.21.

PHASE II

BIOLOGY OF DISEASE 524-221M.
INTRODUCTION TO CLINICAL SCIENCES 524-231M.

The Department of Surgery is a contributor to these Interdisciplinary Courses. See Section 5.21.

SURGERY 564-321M. During the surgical rotation, the student is provided with a variety of learning experiences, so that he may learn the principles of surgery. Much of the teaching is didactic either in The Montreal Hospital or The Royal Victoria Hospital. The student is also assigned to a surgical service where he may write case reports, act as a dresser and assist at operations. The learning experiences include lectures, case presentations, seminars, tutorial sessions, special core curriculum conferences, bedside teaching, participation in regular service and ward rounds, visits to the Emergency Department, and clinical pathological conferences.

PHASE III

In Phase III of the new curriculum, students on a surgical stream will spend eight weeks as a clinical clerk in General Surgery and four weeks in Orthopedics/Trauma Service. Students on a Medical Stream will spend four weeks as a clinical clerk on either General Surgery or a Surgical Specialty.

Surgical Diseases of Children

Instruction in the surgical diseases of children is given during the Pediatrics rotation.

Orthopedic Surgery

Principles of physical diagnosis of the musculoskeletal system are taught during the course on Introduction to Clinical Sciences in Phases I and II.

The principles of Orthopedic Surgery are covered during the course on Surgery in Phase II. An attempt is made to outline broadly the content of adult Orthopedics, children's Orthopedics and fractures.

Phase III clinical clerk in the surgery stream will generally spend four weeks in Orthopedic Surgery.

Urology

Lectures are given in Phase II during the surgery rotation. Subject coverage includes symptoms and signs of significance, congenital anomalies, obstructive uropathy, calculous disease, genito-urinary infections, abnormalities of the external genitalia, patho-physiology of mucturition and neoplastic disease of the genito-urinary tract.

Electives

Major electives are offered in Surgery, Orthopedic Surgery and Urology during Phases II and III. Details are published in the "Calendar of Elective Programs" and further information can be obtained in the General Office from the Director of the Program.

5.21 INTERDISCIPLINARY COURSES

Required Courses

PHASE I

BEHAVIOURAL SCIENCES 524-161M. This course aims at facilitating medical students' familiarity with the impact of disease on a patient's style of living, his socio-economic security and his family. It covers the tasks in life as well as various styles in living from infancy to old age. Seminars are grouped along various themes and are developed around selected case material, films, and audio-visual aids. The subject matter is opened up directly by patients and developed by faculty. The student body is divided into groups to provide an opportunity to meet and discuss informally related issues with senior resident staff and members of faculty. Lectures and demonstrations — 79 hours (Course Coordinator: Dr. H. Caplan).

CENTRAL NERVOUS SYSTEM 524-121M. This course consists of an integrated series of lectures, laboratory classes and clinical demonstrations having to do with anatomical, physiological, biochemical and behavioural aspects of the nervous system organization which have particular importance in neurological medicine, thereby preparing the student for the clinical neurology teaching that will be given in the later phases of the medical curriculum. (Course Coordinator: Dr. Donald Lawrence)

EMERGENCY MEDICINE 524-151M. This course consists of a series of twenty sessions given in the first year providing an introduction to the principles of first aid and emergency medicine. The required text is *Emergency Care* by Grant and Murray. (Course Coordinator: Dr. A. Hreno)

ENDOCRINOLOGY 524-141M. This course is conducted in a series of fifty-minute lectures and is organ-oriented. Sequentially, the adrenal cortex, the thyroid, the parathyroid, the anterior pituitary, and male and female gonads are covered. Each organ is viewed from the point of view of physiology, biochemistry, anatomy and clinical physiopathology. In the final hours, the human menstrual cycle and the physiology, anatomy and clinical testing of the neuroendocrine system are covered. (Course Coordinator: Dr. J.M. McKenzie)

GROWTH & DEVELOPMENT 524-131M. This course is designed to follow the major basic science course material and to illustrate how the stage of growth and development modifies the physiologic and pathologic responses of the organism. It looks at the role genetics, environmental, nutritional and hormonal factors play during the four main periods of growth — early development and major organo-

genesis, late fetal life, post-natal life to puberty, and puberty. A chairman for each of these sections is responsible for providing continuity for each unit as well as avoiding repetition by participating faculties. There is heavy emphasis on clinical correlation. (Course Coordinator: Dr. Eleanor Colle)

PHASE I and II

INTRODUCTION TO CLINICAL SCIENCES 524-231M. The objective of this course is to provide students with instruction and experience in the development of their clinical skills — history-taking, physical examination, problem formation and diagnosis. The course begins in September of Year II, and is completed by mid-January of that year.

Responsibility for the course has been accepted by the Department of Medicine. In addition to the teaching and supervision provided by the other major Departments of Surgery and Pediatrics, there is participation by the specialty areas of Obstetrics and Gynecology, Dermatology, Ophthalmology, Otolaryngology, Neurology, Anesthesia, Orthopedics, Urology, Plastic Surgery and Clinical Chemistry. (Course Coordinator: Dr. J.L. McCallum)

PHASE II

BIOLOGY OF DISEASE 524-221M. An integrated course taught under the auspices of Epidemiology and Health, Microbiology and Immunology, Pathology, and Pharmacology, utilizing teachers from the entire medical faculty as required. The emphasis of the course will be on the pathophysiology of common disease states, and an attempt will be made to present a balanced approach to major diseases stressing factors that will influence prevention, control and treatment. It will be held primarily at the McIntyre Medical Sciences Building but small group sessions will be held at the Royal Victoria Hospital and the Montreal General Hospital where they will be integrated with students' medical and surgical rotations. (Course Coordinators: Drs. James C. Hogg and John Richardson)

Jan. 12, Mon.	Second term begins in Music.
Jan. 12, Mon. to Jan. 30, Fri.	Second term course change period in Music. Deadline for withdrawing (W) from 'D' courses in Faculty of Music.
Feb. 16, Mon. to Feb. 20, Fri.	Practical examinations in Music.
Feb. 27, Fri.	Deadline for withdrawing (W) from 'B' courses in Faculty of Music.
Mar. 8, Mon. to Mar. 12, Fri.	Entrance auditions for Music applicants.
Apr. 14, Wed.	Last day of instruction in Music.
Apr. 20, Tues. to Apr. 23, Fri.	Examinations in lecture courses in Music. Entrance auditions for Music applicants.
Apr. 26, Mon. to May 7, Fri.	Practical examinations in Music.
May 13-14, Thurs.-Fri., and May 18-21, Tues.-Fri.	Entrance auditions for Music applicants.

PREFACE

The University's Report of 1971 to the Conseil des universités stated that "during the past ten years Music had the biggest growth rate of any McGill Faculty". This growth is reflected in the current student enrolment figure of approximately five hundred at Undergraduate and Graduate levels, with over forty full-time and forty to fifty part-time academic staff.

The Faculty's large Strathcona Music Building houses a substantial library containing over twenty thousand monograph-volumes, bound journals and scores, as well as seven thousand recordings; an Electronic Music studio consisting of three individual studios equipped with synthesizers, generators, filters, mixers and multitrack tape recorder; ample classroom, studio, and practice space, student-lounge and cafeteria; and the recently completed Pollack Concert Hall (capacity: six hundred) with its large stage (including an orchestra pit), a recording studio, projection room, and spacious back-stage facilities (dressing rooms, a large rehearsal room and storage space).

Our students and staff generate a lively performance activity: over two hundred concerts and other public events during the 1974-1975 session alone, including presentations by our Symphony Orchestra, the Faculty Choirs, Bands, Chamber Ensembles, Jazz Bands, the Opera Studio, and recitals by staff and student soloists.

The Strathcona Music Building is part of the McGill Campus centrally located on Montreal's main artery, Sherbrooke Street, and within easy walking distance of the city's famous Place des Arts complex, the French-English theatre district, large department stores and a station of the city subway system conveniently named "McGill".

1 STAFF

1.1 ADMINISTRATIVE OFFICERS

ROBERT E. BELL, C.C., B.A., M.A. (U.B.C.), Ph.D. (McG.), D.Sc. (U.N.B., Laval), LL.D. (Tor.), F.R.S., F.R.S.C. **Principal and Vice-Chancellor**
EIGIL PEDERSEN, B.A. (Sir G. Wms.), M.A., (McG.), Ed.D. (Harv.) **Vice-Principal (Academic)**
LEO YAFFE, B.Sc., M.Sc. (Man.), Ph.D. (McG.), F.C.I.C., F.A.P.S., F.R.S.C. **Vice-Principal (Administration)**
ALLAN C. McCOLL, D.F.C., B.Com. (McG.), C.A. **Vice-Principal (Finance)**
DALE C. THOMSON, D.F.C., B.A. (Alta.), D.U. (Paris) **Vice-Principal (Planning)**

JEAN PIERRE PINSON
WINSTON PURDY, B.Mus. (McG.) *(Leave of absence 1975-76)*
JAMES RANTI, B.Mus. (Manhattan School of Music)
CINDY SHUTER, B.Mus. (Tor.)
DOROTHY SLAPCOFF, B.Sc. (Music) (N.Y.U.)
KARL STEINER, Graduate, State Academy, Vienna
MICHAEL STRUTT
ELLIS WEAN, Montreal Symphony
BARRY WIESENFELD, L.Mus. (McG.)
LJERKA WOLLMARKER, Graduate, Music Academy, Zagreb
KENNETH WOODMAN, B.Mus. (McG.)

Visiting Staff—

MARIO BERTONCINI, Dipl., Conservatorio Santa Cecilia, Rome
MIKLOS TAKACS, Bacc. en Musique, Franz Liszt Academy, Budapest
EDGAR VALCARCEL, Lima, Peru (Under the auspices of the Cultural Exchange Program of the Federal Government of Canada)

1.8 DEPARTMENTAL CHAIRMEN, ASSISTANTS AND CO-ORDINATORS

DEPARTMENT OF PERFORMANCE
Chairman — PROF. RICHARD LAWTON
Co-ordinators —
Brass: T.B.A.
Keyboard: T.B.A.
Percussion: PROF. PIERRE BELUSE
Strings: T.B.A.
Voice: T.B.A.
Woodwinds: PROF. GERALD DANOVITCH
Choral Ensembles: PROF. WAYNE RIDDELL
Instrumental Ensembles:
PROF. EUGENE PLAWUTSKY

DEPARTMENT OF SCHOOL MUSIC
Chairman — PROF. DONALD MACKEY
Co-ordinators —
Keyboard/Choral: PROF. WAYNE RIDDELL
Orchestral: PROF. DONALD HUGHES

DEPARTMENT OF THEORY
Chairman — PROF. BRUCE MINORGAN
Graduate Committee Chairman: —
PROF. BENGT HAMBRAEUS
Co-ordinators —
Composition: PROF. BRIAN CHERNEY
Ear Training: PROF. LUBA ZUK
History: PROF. BRUCE MINORGAN
Theory: PROF. JOHN REA

ELECTRONIC MUSIC STUDIO
Director — PROF. ALCIDES LANZA
Visiting Professor — PROF. ISTVAN ANHALT, Head, Music Department, Queen's University
Technician: MR. ERIC JOHNSTONE

2 FACULTY EVENTS: FALL 1974

The following list represents a selection from the 87 concerts, recitals, and other events presented by the Faculty of Music during the fall term of the academic year 1974-75.

Aug. 18-31
McGill Music Camp
Band camp (woodwinds, brass, percussion) for high school students from Montreal and Ottawa areas. Donald Hughes, director; sponsored by the Department of School Music
CAMMAC, Lake MacDonald

FACULTY OF MUSIC

Aug. 26/27/28
Student Saxophone Quartet
Peter Freeman, Sandy Gruman, Pam Homzy, Nancy Wright
for McGill Student Orientation
(Terrace concerts)

Sept. 3/4
Student Ensemble
Christine Ertell, flute; Mario Giroux, guitar
for McGill Student Orientation

Sept. 13
Student Brass Quartet
Brian McCurdy, Sandy McCurdy, Bill Waid, Ian Cochrane
for McGill Student Orientation
(Terrace concerts)

Sept. 20
"Farouk University Band"
in parade for *Crippled Children Campaign*
Place Ville Marie

Oct. 6
Student Wind Quintet
Carolyn Christie, Margaret Morse, Carol Ashford, Sandy MacDonald, Eve Bentham
for McGill Open House/Entre Nous

Oct. 9
Maestro Carlo Maestrini, Florence
Opera Seminar

Oct. 21
Mauricio Kagel, Cologne
Graduate Seminar
in collaboration with the Goethe Institute Montreal

Oct. 24
Student Wind Quintet
Carolyn Christie, Margaret Morse, Carol Ashford, Sandy MacDonald, Eve Bentham.
Concert and commentary at
Martinvale Elementary School, Laval

Oct. 24
Student String Quartet
Guy Traficante, Claudia Martin, John Moffat, Colin Ryan
at opening of Alternatives House

Oct. 25
Evening of Baroque Music
Jeanne Baxtresser, flute; John Grew, harpsichord.
(Couperin — de Chambonnieres — d'Anglebert — Telemann — Bach)
Faculty Friday

Oct. 28/30
Jazz Improvisation Class of Armas Maiste

Oct. 30
Faculty Wind Ensemble
directed by Prof. Donald Hughes; also: Brass Choir, cond. by Dr. R. Gibson; Percussion Ensemble, cond. by Pierre Béluse; Woodwind Choir, cond. by Peter Freeman
(Buxtehude — Schein — Haydn — Debussy Leonard — Heisinger — Milhaud — Mozart)

Nov. 1
McGill Symphony Orchestra
directed by Prof. Eugene Plawutsky;
McGill Wind Ensemble
directed by Prof. Donald Hughes.
(Gould — Hindemith — Brahms)
Rosemere High School

Nov. 5
Student Soloists
Robert Bardston, cello; Zabel Manukyan, piano; for Women's Art Society
Cheney Hall

Nov. 10
Student Soloists
Robert Bardston, cello; Zabel Manukyan, piano; concert of the Winners of the Concours de Musique de Québec
Place des Arts

Nov. 12
McGill Opera Studio
directed by Professors Edith & Luciano Della Pergola. Concert of operatic excerpts for Shaare Zion Sisterhood

Nov. 14
McGill Symphony Orchestra
directed by Prof. Eugene Plawutsky
(Mussorgsky: Pictures at an Exhibition)
at Martinvale Elementary School, Laval

Nov. 15
McGill Symphony Orchestra
directed by Prof. Eugene Plawutsky
(Mussorgsky: Pictures at an Exhibition)

Nov. 15
String Trio
Mauricio Fuks, violin; Uri Mayer, viola; Edward Culbreath, cello
(Schubert — Riley — Beethoven)
Faculty Friday
In Collaboration with the CBC

Nov. 20/21
Metamusic, the live electronic music improvisation ensemble

Nov. 20
Prof. Peter Roggenkamp, Hamburg
Seminar on contemporary piano music and techniques
in collaboration with the Goethe Institute Montreal

Nov. 21
Student String Quartet
Guy Traficante, Claudia Martin, violins; John Moffatt, viola; Colin Ryan, cello. Concert and commentary at
Vanier CEGEP, Snowdon Campus

Nov. 22
Michael Strutt, guitar and lute
(Dowland — Britten — Barrios — Ponce — Orbon — Rodrigo)
Faculty Friday

Nov. 22
Prof. Siegfried Palm, Cologne
Seminar on the contemporary cello
in collaboration with the Goethe Institut Montreal

Nov. 25
Prof. Werner Jacob, organist at St. Sebaldus Church, Nuremberg, Germany
Seminar on contemporary organ music and techniques

Nov. 26
Prof. Werner Jacob
(Pachelbel — Bach — Reger — Ligeti — Hambraeus — Jacob)
at Oratoire St. Joseph

Nov. 28
McGill Jazz Workshop
Senior Jazz Band, dir. Prof. Gerald Danovitch

Nov. 29
Don Smithers, trumpet, and Christopher Jackson, harpsichord:
Seminar on the contemporary and Baroque trumpet

Nov. 29
Student Composers' Concert
works by Pierre Dostie, Andrew McClure, Paul Steffler, Dace Stauvers, John Burke; performed by Elise Bédard, Madeleine Osborn, mezzo-sopranos; Jaime MacMillan, Peter Bosani, Luc Boivin, Aldo Mazza, Donna Fried, Raymond Desrosiers, percussion; Claudia Martin, Guy Traficante, violins; Terry Gooden, cello; Margaret Morse, oboe; Carol Ashford, Nancy Wright, clarinets; Christine Ertell, Robert O'Callaghan, Jonathan Bayley, flutes; Dace Stauvers, Simon Levine, pianists.

Nov. 29
"Jazz 1940-1975" — The Armas Maiste Jazz Trio
Armas Maiste, keyboard; Pierre Béluse, percussion; Bill Hanigsberg, double-bass
Faculty Friday

Dec. 5
McGill Wind Ensemble
featuring the Woodwind and Brass Choirs, direction: Prof. Donald Hughes, Dr. Robert Gibson.
(Krenek — Debussy — Vaughan Williams — Copland — Lebow — Nelhybel — Hindemith — Bacharach — Wiggins)

Dec. 6
Student String Quartet
Guy Traficante, Claudia Martin, violins; John Moffatt, viola; Colin Ryan, cello. Concert and commentary at
Pensionnat Val Marie, Cap-de-la-Madeleine, Québec

Dec. 6
Concert Choir, dir. Prof. Wayne Riddell
(Willan — Somers — Britten — Paynter — Pergolesi — Maw, as well as Christmas Carols)
at the Church of St. Andrew and St. Paul

Dec. 7
McGill Opera Studio
dir. Professors Luciano and Edith Della Pergola; (Excerpts from Verdi's "La Forza del Destino")

Dec. 10
Rahul Mahadeo, sitar
Lecture-demonstration

Dec. 10
Kathleen Anderson, soprano, accompanied by Deborah Kraus, piano;
Zabel Manukyan, pianist;
(Fauré — Beckwith — Bartók — Dvorák — Schumann)
joint recital for
McGill Women Associates

Dec. 11
Faculty Choirs
directed by Betty Doroschuk, assisted by Tom Plaunt; piano accompaniment: Michael McMahon; organ accompaniment and solo: David MacDonald; (Morley — di Lasso — des Prés — Bach — Vaughan Williams — Shaw — Bissell — Ridout)

Dec. 12
Faculty Wind Ensemble
dir. Prof. Donald Hughes;
Junior Jazz Band
dir. Prof. Gerald Danovitch;
(Tchaikovsky — Gould — Berlioz)

Dec. 13
McGill Symphony Orchestra
Eugene Plawutsky, conductor; soloist: Colin Ryan, cello; members of the McGill Concert Choir
(Bach — Haydn — Debussy)

Dec. 16
Contemporary Music Ensemble
Elise Bédard, soprano; Jaime MacMillan, percussion; Richard Lloyd, Simon Levine, pianists; John Poniatowski, trombone.
(student composers: Andrew McClure, Richard Lloyd — and works by Berio and Crumb)

Dec. 17
Student Ensemble
Stella Amar, oboe; Joelle Amar, bassoon; Holly Walters, viola; concert and commentary *at Peace Centennial School*

Dec. 22
Student Ensemble
accompanying the choir of St. Matthias Church in a Christmas performance of the "Messiah" *at St. Matthias Church, Westmount*

3 GENERAL INFORMATION

3.1 GRADUATES

FALL CONVOCATION, 1974

Licentiate of Music Diploma

DUCHARME, Hélène, Bacc. en Musique (Vincent d'Indy). East Meadow, N.Y.
(Violin)

Concert Diploma

CASH, Ellen, L.Mus., B.Mus. (Flute) Montreal

Bachelor of Music Degree

BATT, Robert Gordon St. John's, Nfld.
Honours in Composition; Distinction; University Scholar

CRAGO, Bartholomew East Greenbush, N.Y.
Major in Performance (Guitar)

DOWSE, Cynthia Mary Worcester, England
Major in Piano Accompaniment

FREEMAN, Peter George, L.Mus. Pointe Claire
Major in School Music; University Scholar

LESSOIL, Marcelle Montreal
Major in School Music

McCULLOUGH, Elizabeth Walker
Major in School Music Town of Mount Royal

ROTHFARB, Peter East Meadow, N.Y.
Major in Performance (Guitar); University Scholar

TATRANSKY, Victor Montreal
Major in School Music

YOUNG, James Bradford Atlanta, Ga.
Major in Music History

Master of Musical Arts Degree

BENTLEY, Jo-Anne Cheryl, B.Mus., U.B.C.
(Musicology) Vancouver, B.C.
Poetry into song: A comparative study of selected 19th century Lieder settings of three Goethe poems: "Wanderers Nachtlied", "Heiss mich nicht reden", and "Ganymed"

SPRING CONVOCATION, 1975

Bachelor of Music Degree

ALBERT, Carol Ann Montreal
Honours in Music Theory; Distinction; University Scholar

ASSELIN, Pierre-Yves Montreal
Major in Performance; High Distinction in Organ

BELISLE, Chantal Montreal
Major in School Music

BENDER, Karen Toronto, Ont.
Major in Performance (Voice)

BONIN-BOUCHARD, Laure Montreal
Major in Music History

CHENE, Arlette Montreal
Major in Performance; Distinction in Orchestral Conducting; University Scholar

CHOPP, Susan Barbara Dorval
Major in School Music; Distinction; University Scholar

CHRISTIE, Carolyn Ruth Montreal
Major in Performance; High Distinction in Flute

COBHAM, Victor Eric, B.Sc.
St. Michael, Barbados, W.I.
Major in Performance (Piano)

CORBER, Steven, L.Mus. Montreal
Major in Performance (Piano)

DOEHRING, Carrie Elizabeth Montreal
Major in School Music; High Distinction; University Scholar

EVANS, David John Beloeil, Que.
Honours in Music Theory; University Scholar

FAUST, Mari-Ellen Montreal
Major in School Music

FERGUS, Reginald Montreal
Major in Performance (Voice)

FORAND, Jacques Montreal
Major in School Music

FOX, Deborah Toronto, Ont.
Major in Performance (Piano)

JONES, Pamela Montreal
Major in Performance (Piano)

LEONARD, Ann Coulombe Montreal
Major in Music History

LEVINE, Bella — Montreal
Major in School Music; Distinction; University Scholar

MAIZE, Donna — St. Lambert, Que.
Major in Performance (Piano)

MALYSHKO, Olga — Montreal
Honours in Music History; Distinction

McCURDY, Brian — Abercorn, Que.
Major in Performance; Distinction in Trombone

McGRAW, Julia Lynn — Westmount
Major in School Music

MURRAY, Lenna Elizabeth — Montreal
Major in School Music

NESS, Christopher Merrill — Howick, Que.
Major in School Music

NOREAU, Alain — Cap Rouge, Que.
Major in Composition

OSLER, Mary Graham — Arlington, Va.
Major in School Music

PASQUINI, John — Montreal
Major in Composition; Distinction

RAUDSEPP, Karl Johannes — Montreal
Honours in Music Theory

SEGALL, Jack, L.Mus. — Chomedey
Major in Performance; Distinction in Violin

SMITH, Arthur Hamilton — Burnaby, B.C.
Major in Performance; Distinction in Trombone

STEWART, H. Alan — Charlottetown, P.E.I.
Major in Performance; Distinction in Organ

STRAUTINS, Rita — Montreal
Major in Music History

TEIXEIRA, Gail Elizabeth — Medfield, Mass.
Major in Performance (Viola)

THIRLWALL, David Edmond — Baie d'Urfé, Que.
Major in Performance; Distinction in Orchestral Conducting

YEATES, Frances Arlene — Montreal
Major in School Music

ZUSKIN, Joseph, L.Mus. — Montreal
Major in Performance; Distinction in Trombone

Licentiate of Music Diploma

DAVIS, David Homer, B.A.; (Organ) — Dartmouth, N.S.

ETIENNE, Margaret Rose — Pétion-Ville, Haiti
Distinction in Piano

KARA, Michael — New York, N.Y.
High Distinction in Viola

KELLY, Nancy, B.A.; (Piano) — Shawinigan, Que.

LALONDE, Liliane M., B.Mus. — Chute-à-Blondeau, Que.
Distinction in Piano

LI, Andrew — Montreal
Distinction in Piano

Concert Diploma

TUCKER, Kathleen, B.Mus., L.Mus. — London, Ont.
Distinction in Piano

Master of Musical Arts Degree

BENTLEY, Jo-Anne Cheryl — Vancouver, B.C.
(Performance — Voice)

WONG-TSO, Ellen — Vancouver, B.C.
(Performance — Piano)

TEDMAN, Keith — Montreal
(Composition) *Analysis 'Proteus'*

3.2 SCHOLARSHIPS AND BURSARIES

NOTE: Details of University scholarships, bursaries and loans open to undergraduates in all Faculties will be found in Section 7 of the *General Announcement* issued by the University and obtainable at the Registrar's office.

Application for all Music Scholarships, bursaries, prizes, and/or loans must be made to the Dean of the Faculty. Details are listed in the *General Announcement.*

A limited number of entrance awards, reserved for Canadian students and covering part of the first-year tuition fee, are awarded on the basis of musical talent as demonstrated at competitive auditions in October, or, in the case of Composition majors, by original compositions submitted. Awards to students in the upper years are determined by their achievements during the preceding academic year.

3.3 FINANCIAL AID

Information on Government Bursaries and Loans as well as on University financial assistance is available at the McGill Student Aid Office, 3465 Peel Street.

3.4 DEGREES AND DIPLOMAS OFFERED

DEGREE OF BACHELOR OF MUSIC (B.Mus.)

The degree of Bachelor of Music can be obtained in any one of five major fields:

Composition (Major and Honours) The curriculum in Composition is designed for those students whose interest and talent lie in the field of creative music.

History (Major and Honours) The curriculum in History is intended for those interested in the scholarly disciplines of music and as a preparation for subsequent concentration in musicology.

School Music (Major) This program covers the area of music in the schools and provides the practical and theoretical training required by those who are planning a career as music teachers.

Performance (Major and Honours) The degree program in Performance is available to those wish-

ing to specialize in a practical major (all instruments, Voice, or Conducting) and to combine these studies with a substantial program of theoretical and academic subjects.

Theory (Honours only) This program is designed for those who wish to specialize in some area of music theory. Interdisciplinary studies relating music with other arts and the sciences are available.

Programs normally require three years of study following the Quebec Diploma of Collegial Studies or four years of study following secondary school elsewhere.

DEGREE OF MASTER OF MUSICAL ARTS (M.M.A.)

The degree of Master of Musical Arts, which the Faculty of Music offers in conjunction with the Faculty of Graduate Studies and Research, can be obtained in one of four fields:

Composition This program is designed for those planning on a career as professional composers and/or teachers of composition and allied subjects. It also prepares the student for doctoral studies in this field.

Musicology This program provides training in the techniques of musicological research and prepares the student for doctoral studies in musicology.

Theory This program is designed for those who wish to do research in some specialized area of music theory. Interdisciplinary studies relating music with other arts and the sciences are encouraged. The program also prepares the student for doctoral studies in these areas.

Performance This program has been offered, on an *ad hoc* basis only, for a few years. Its aim is to develop the candidate's ability as a performer to a high professional level in conjunction with advanced theoretical and historical studies relating to performance.

For details of these graduate programs, please consult the syllabus of the Faculty of Graduate Studies and Research.

DEGREE OF DOCTOR OF MUSIC (Mus.D.)

The degree of Doctor of Music is available in Composition. Persons interested should contact the Chairman of the Department of Theory.

DIPLOMA OF LICENTIATE OF MUSIC (L.Mus.)

The diploma of Licentiate of Music can be obtained through a three-year program specially designed for advanced instrumentalists and singers who wish to concentrate on the practical subject of their choice while limiting their theoretical studies to basic areas in History, Theory and Ear Training. This program is open only to those students whose proficiency in their practical subject is at least at the level of CEGEP* graduation. A CEGEP diploma, however, is not required.

*CEGEP = **C**ollège d'**E**nseignement **G**énéral **E**t **P**rofessionnel, the Quebec equivalent of a Junior College.

THE CONCERT DIPLOMA

This is a post-Licentiate diploma designed as a two-year course and available only to specially gifted instrumentalists and singers who have the proven talent and capacity for a professional career as performers. The Concert Diploma is offered in Piano, Organ, Harpsichord, Violin, Viola, Cello, Flute, Clarinet, Saxophone and Voice.

3.5 MUSIC CREDIT OPTIONS IN OTHER FACULTIES

The Faculty of Music offers three groups of courses that may be taken for credit by students in other faculties.

One group includes courses that deal with music theory and the history of music and are part of the music undergraduate curriculum (Theory, History Survey and Music History electives). These courses may be taken only by those who have offered Music as a Matriculation subject or have the theoretical equivalent.

The second group of courses represents Ensemble classes open to those students who are advanced players of orchestral instruments or singers: Chamber Music, Wind Ensemble, Concert Choir, Opera Studio, Symphony Orchestra. Admission is by audition only.

Music credit options (non-professional) especially designed for students in other faculties are listed in the current calendar of the Faculty of Arts.

3.6 OPTIONS FOR "SPECIAL" STUDENTS

Individuals wishing to take one or more courses without registering in a McGill degree or diploma program may be admitted as Special students if they possess the necessary requirements for admission to the course(s) concerned.

Persons who are advanced instrumentalists (strings, winds, harp, percussion) or experienced singers may at no cost become regular members of the Faculty Orchestra, Choir, or Band, to the extent that space is available. Consult the Chairman of the Department of Performance.

3.7 McGILL PREPARATORY SCHOOL OF MUSIC

For information on function, policy, courses, examination requirements for Grade Certificates, admission, fees, Local Centres, etc., please consult the Announcement of the McGill Preparatory School of Music, obtainable at the Faculty Office, 555 Sherbrooke Street West, Montreal, Que H3A 1E3.

3.8 ADMISSION TO THE FACULTY OF MUSIC

APPLICATION PROCEDURE

All inquiries regarding admission to either the degree or diploma programs should be directed to the Admissions Office, Faculty of Music, McGill University, 555 Sherbrooke Street West, Montreal, Que. H3A 1E3.

In order to ensure early consideration, applications should be made by March 1. Applications received after this date will be considered if places are still available.

Applications should be accompanied by the non-refundable application fee of $15, an official transcript of the applicant's academic record up to the December preceding his September entry, and a detailed description of the applicant's musical background and training including photostats of diplomas, certificates, and/or transcripts.

ADMISSION REQUIREMENTS (DEGREE PROGRAMS)

The normal admission requirement to the B.Mus. degree programs is the Quebec Diploma of Collegial Studies (Music Concentration) with a Practical Level equivalent to McGill Preparatory Collegial I and Theory/Ear Training Collegial I. Graduates of secondary schools outside of Quebec will also be considered. See below under NON-QUEBEC APPLICANTS (DEGREE PROGRAMS).

All applicants must perform an audition in their main practical subject of approximately 15 minutes' duration, either live or on tape. The student should choose material that will represent different musical styles, and that will reveal his musicianship and technical proficiency to best advantage.
For dates of entrance auditions, please refer to frontispiece.

Applicants seeking exemption from program requirements on the basis of advanced music studies or work done at other universities should list such studies in detail and have an official transcript of their record submitted to the Dean. Transfer students will be required to sit placement examinations in Ear Training, History, and Theory, in May or early September to determine their course levels.

For C.E.E.B. tests please turn to page 15

APPROXIMATE EQUIVALENTS TO McGILL PREPARATORY GRADES

	Practical Grade			*Theory Grade*	*Ear Training Grade*
McGill University	Collegial Equivalent II	Collegial Equivalent I	Secondary Complete	Secondary Complete	Secondary Complete

Laval	Bacc. I (CEGEP II)	(CEGEP I)	Lauréat	Lauréat	Lauréat
Vincent d'Indy U. of Sherbrooke	Lauréat II (CEGEP II)	Lauréat I (CEGEP I)	Supérieur	Supérieur	Supérieur
Ecole Normale de Musique, U. of Quebec	Lauréat II (CEGEP II)	Lauréat I (CEGEP I)	Supérieur	Supérieur	Supérieur
Dawson	CEGEP II	CEGEP I			
Marianopolis	CEGEP II	CEGEP I			
St. Laurent	CEGEP II	CEGEP I			
Vanier	CEGEP II	CEGEP I			
Toronto Conservatory	10	9	8	II	Included in practical examination
Western Board	10	9	8	5	
Mount Allison	10	9	8	5	
Associated Board of the Royal Schools of Music	8	7	6	6	

N.B. High school students who wish to take music as a high school leaving subject, please note that completion of McGill Preparatory Secondary Level in a practical subject and Theory and Ear Training is recognized as a matriculation credit by the Quebec Department of Education.

PIANO PROFICIENCY TEST (For Students of Orchestral Instruments or Voice)

Students of Orchestral Instruments or Voice should be prepared to demonstrate piano proficiency equivalent to that of *McGill Secondary Level III* when they register for their first term. Those who are unable to do so will be registered with Probationary status, and they may enrol for piano instruction at a separate fee, through the Preparatory School or with a private teacher. At the end of one year they must pass the *Piano Proficiency Test* before being allowed to continue in their respective degree programs. The requirements are as follows:

I *All major and minor scales* (through two octaves, hands together, beginning from the lowest note) and *arpeggios* (tonic triads in all major and minor keys in root position only, hands together through two octaves).

Recommended scales book: "Scales and Chords", edited by Ernest A. Dicks (Frederick Harris). Available at International Music Store and Archambault. ($0.90)

II *Pieces* ONE from list A and ONE from list B of: MUSIC FOR MILLIONS, Vol. 27 "Classics to Moderns" (Consolidated Music Publishers). Available at International Music Store and Archambault. ($4.50)

LIST A

Page

18 Gavotte & Variations — Pachelbel.
20 Larghetto — Scarlatti.
26 La Bourbonnaise — Couperin.
42 Bourée — Telemann.
49 Burlesca — W. F. Bach.
50 Lento Affettuoso — C. P. E. Bach.
52 La Confession — Corrette.
71 Andantino — Mozart.
80 Rustic Dance — Hook.
84 Theme and Three Variations — Mozart.

LIST B

Page

104 Sonatina (complete) — Beethoven.
109 Two Ecossaises — Schubert.
126 Mazurka — Tchaikovsky.
128 In Church — Tchaikovsky.
129 Christmas Carol for Anjou — Franck.
132 Lullaby — Wolf.
144 Chanson — Rhené-Baton.
146 Five Finger Toccata — Stravinsky.
156 Three Hungarian Folk Songs — Bartók.
159 Two Pieces — Villa-Lobos.

III *Sight Reading* Three diversified tests will be given. They will be of the degree of difficulty of Book VI of "Practical Sight Reading Exercises For Piano Students" by Boris Berlin & Claude Champagne (Gordon V. Thompson).

The candidate is recommended to start with Book II in this series of sight reading books, and to work through Books II, III, IV, V, VI, VII, VIII, IX, in sequence, so that he is adequately prepared.

EXAMINATION DATES

The Piano Proficiency Test may be taken during the Music Enrolment Period in September or during the regular practical examination periods in November, February, and May (see Section 3.14).

ADMISSION REQUIREMENTS (DIPLOMA PROGRAMS)

Licentiate of Music

In order to qualify for admission to the Licentiate program of the Faculty of Music, the candidate must have completed secondary school (eight academic subjects). The Quebec Diploma of Collegial Studies is not a requirement. His music qualifications must be McGill Preparatory Collegial Equivalent Level II (Instrument or Voice) and McGill Theory and Ear Training Secondary Level complete, or equivalent. An entrance audition is also required.

The C.E.E.B. tests are not required for admission to the Licentiate diploma program.

Concert Diploma

In order to qualify for admission to the Concert Diploma program, the candidate must have the Licentiate diploma of the McGill Faculty of Music or its equivalent and must pass an audition in his chosen subject to satisfy the panel that he has the talent for a professional career as a concert performer.

NON-QUEBEC APPLICANTS (DEGREE PROGRAMS)

High School graduates (minimum scholarity: 12 years) from other provinces and from abroad may apply for admission to any of the honours or major programs described in Section 4, leading to the Bachelor of Music degree, and may be admitted to a program of qualifying studies in the subjects listed below:

Title	*Course No.*	*Weight*
Melody and Counterpoint	211-110A	3 cr.
Elementary Harmony	211-111B	3 cr.
Ear Training (Moveable doh)	212-130D	
or Ear Training (Fixed doh)	or-131D	4 cr.
History Survey (Mediaeval, Renaissance, Baroque)	214-184A	3 cr.
History Survey (Classical, Romantic, 20th Century)	214-185B	3 cr.
Practical Study		4-8 cr.
Ensemble		2 cr.
Arts/Science elective		6 cr.
		Total: 28-32 cr.

Applicants who can demonstrate through auditions and placement tests (administered in May and September) that they have mastered the material in any of the above subjects will be given exemption from them and may proceed to more advanced courses (see Section 4).

NON-QUEBEC APPLICANTS (DIPLOMA PROGRAMS)

For admission to the Licentiate and Concert Diploma program, please see above under ADMISSION REQUIREMENTS (DIPLOMA PROGRAMS).

Application procedures for all programs of study are described at the beginning of Section 3.8.

SACU and/or C.E.E.B. TESTS

Canadian applicants are no longer required to write the tests of the Service for Admission to College and University (SACU).

Students from the United States must write the following College Entrance Examination Board tests: the two scholastic aptitude tests, the English composition test and any two other achievement tests. Students may obtain information about the tests, testing centres, etc., by writing to: The College Entrance Examination Board, Box 592, Princeton, New Jersey 08540, or: The College Entrance Examination Board, Box 1025, Berkeley, California 94701.

Students from overseas are not required to write the C.E.E.B. tests, and their applications are judged on their records in the national examinations of the country in which they have studied.

3.9 ACADEMIC CREDIT TRANSFER AGREEMENT

Students wishing to take courses for credit towards their McGill degree at any university in the province of Quebec should refer to the section entitled "Academic Credit Transfer Agreement" in the *General Announcement* for details.

3.10 CATEGORIES OF STUDENTS

Students are registered as:

a) **Full-Time:** those enrolled in a degree program and taking 24 or more credits each year or 12 or more credits per term, or in a diploma program and taking 18 or more credits each year or 9 or more credits per term. To be considered for a University Scholarship, a student must have carried a minimum load of 27 credits.

b) **Part-Time:** those enrolled in a degree or diploma program, but who, because of special circumstances, are unable to take a full-time load as defined above.

c) **Special:** those who are not registered as proceeding towards a degree or diploma, but are permitted to take one or more courses. Special students in practical subjects may not register for less than one term (14 weeks) and must notify the Secretary of the Department of Performance at least two weeks before the end of the term if they wish to continue lessons for another term.

d) **Visiting:** those proceeding towards a degree at another university, but who are taking one course or more at McGill for credit towards their home university's program.

Students enrolled in degree and diploma programs are classified as follows:

B.Mus. degree—

U1 Those who are registered for their first year of the Bachelor of Music degree at the University level (post-CEGEP).

U2 All students who are beyond the U1 level, but are not yet in their final year.

U3 Students registered for a selection of courses, which, if successfully completed, will fulfil the requirements of their program.

L.Mus. or Concert Diploma—

D1 Those who are registered for their first year of diploma study at the University level.

D2 See "U2" above.

D3 See "U3" above.

3.11 LENGTH OF SESSION

The session extends from September to April, made up of two terms, the Fall Term and the Winter Term. Certain regular courses are offered during the Summer Session. Please consult the *Summer Session Announcement,* available in March.

3.12 FEES

The University reserves the right to make changes without notice in the published scale of fees.

Fees are refundable, under special conditions described in Section 4.3 of the *General Announcement* which may be obtained from the Registrar's Office.

Tuition fee assessment is based on a per credit charge where applicable. The basic charge for tuition fees is $19.00 per credit and this fee includes all the regular charges of the University for registration, tuition, laboratories and libraries. Student Services fees and Students' Societies fees are separately assessed in a manner appropriate to those two functions and must be paid at the same time as the tuition fees.

UNIVERSITY LEVEL STUDENTS
(Degree and Diploma Candidates)

Courses	*Fee per Credit*
Individual practical instruction	$28.50*
Ensembles	no fee**
Other courses	19.00
Student Services fee (all full-time students)	60.00
Students' Society fee	27.00

*Students electing further courses in individual practical instruction above the requirements of the program will be charged an additional $380 per year or $190 per term; this also being the fee applied to those students taking a second major, in Performance (*e.g.* L.Mus. as a second program).

Students in other faculties taking individual practical instruction from the Music faculty will pay the fee of $380 (or $190 per term) instead of the per-credit fee for such instruction.

**Students in other faculties taking ensemble courses for credit will pay the regular per-credit fee as established by their faculty. Special students in the Opera Studio will be charged $85 plus $15 administration fee each term.

The application of the above rate of $28.50/credit for individual practical instruction is limited as follows:

I B.Mus. in School Music, History, Composition, Theory:
Practical Concentration
Maximum 2 years, 1 hour per week for 28 weeks

II B.Mus. in Performance:
Practical Major
Maximum 3 years, 1 hour per week for 28 weeks

III L.Mus. in Performance:
Practical Major
Maximum 3 years, 1 hour per week for 28 weeks

IV Concert Diploma:
Practical Major
Maximum 2 years, 1 1/2 hours per week for 28 weeks

N.B. A full-time student (other than a Performance Major) wishing to take individual instruction in any practical subject with teachers other than those available to him in the Faculty may do so, at his own expense. A practical examination fee of $50 will be payable at the time of application for an examination. Students majoring in Performance are required to study under teachers on the staff of the Faculty of Music.

PART-TIME, SPECIAL, AND VISITING STUDENTS

In addition to the per-credit tuition fees as listed above, the following fees will be assessed per term

a) If taking between 9 and 11 credits per term:	
Student Services	$30.00
Students' Societies	$13.50
b) If taking more than 4 but less than 9 credits per term:	
Student Services	$15.00*
Students' Societies	$ 5.00
c) If taking 4 credits or less per term:	
Student Services	$ 7.50*
Students' Societies	$ 5.00

SPECIAL FEES AND PENALTIES

Application for Admission	$15.00**
Late registration	25.00
Late payment fee (after specified date):	
1st 30 days	10.00
After 30 days	25.00
Graduation fee	10.00***
Duplicate Student Identity Card	5.00
Duplicate diploma	10.00
Certified transcript of student's record:	
First two copies each	1.00
Additional copies made at the same time, each	.25
Re-reading examination paper	10.00
Supplemental examinations, each written paper	10.00
Supplemental examinations, each practical	50.00
Changes in course after specified change of course period	5.00

*Excludes Athletics: At the discretion of the Director of Athletics, a student may participate in the Athletics program upon payment of an additional $30.00.

**Students already at McGill who are making application to a professional faculty or to the Faculty of Graduate Studies and Research are not required to pay this fee.

***Graduation Fee: Applications by students who expect to graduate at the Spring Convocation must be filed by March 1st of each year and by those who expect to graduate at the Fall Convocation by August 1st of each year. An application form will be mailed to each eligible student and must be returned to the Registrar's Office together with the graduation fee of $10.00 by the appropriate date listed above. This fee will cover all expenses in connection with graduation including academic dress. It is the student's responsibility to ensure that his or her name is included in the graduation list.

Students registering only for ensemble credits (no tuition fees) will be assessed a $15 registration fee. Those registering for practical credits to be obtained through examination only, will pay an examination fee of $50 made up of $25 for the examination plus $25 in lieu of the regular per-credit fee.

Students who apply for practical examinations after the deadline (see 5.9 under Applications for Examinations) normally will not be permitted to sit an examination until the next regular period. In exceptional circumstances, permission may be given by the Chairman of the Department of Performance, but a fee of $15 will be charged to the student.

REGULATIONS FOR PAYMENT OF FEES

1. Students entering the University for the first time and those returning in Graduate Studies are required to pay their fees either by mail or in person at the Accounting Office within 10 days after registration. For students registering in September the second instalment is due before January 15, 1976.
2. Returning students from the previous year (except in Graduate Studies) must pay one half of the total required fee by mail or in person to the Accounting Office before August 23, 1975, otherwise they will not be permitted to register. Instructions for paying fees in advance will be mailed to all returning students, either with their Sessional Reports of Standing or a short time later. Students who have been notified by the University of the award of a scholarship, bursary or student loan, and who require this award for payment of the first instalment of fees, must obtain permission to delay payment of fees from the Student Aid Office.

   The second instalment is due January 15, 1976. A late payment fee as stated above is charged for payment after the specified dates.
3. Students registering late must pay their fees at the time of registration, failing which they become subject to the late payment fee and the provisions of the following paragraph:

As soon as possible after the prescribed dates for the payment of fees the Chief Accountant will send to the Dean and the Registrar a list of the registered students who have not paid their fees. Dean Reports of Standing, transcripts of records and diplomas will be withheld until such time as the fees are paid or a satisfactory arrangement is made with the Chief Accountant.

REGULATIONS CONCERNING WITHDRAWAL

A student who wishes to withdraw from the University or from certain courses, *whether or not he wishes to apply for remission of fees,* must secure the permission of the Chairman of his Department. The Student Records Office will supply the necessary form which must be completed and submitted. Students withdrawing from all their courses must attach their Student Identity Card to the withdrawal form. A student considering withdrawal is strongly advised to consult the Dean or Associate Dean before making a final decision. Fees for the term in which the student withdraws are refundable under special conditions described in Section 4.3 of the *General Announcement* which may be obtained from the Registrar's Office.

3.13 REGULATIONS

1. All students are required to be punctual at all classes and lessons.

2. Sessional results in theoretical subjects are calculated on the basis of both classwork and examinations. Students are warned that by missing the classwork they risk a sessional failure in the subject concerned.

3. A student may, with the permission of the instructor concerned, audit a class in which he has a personal interest. However, it should be noted that auditors are not registered for such courses, that the instructor is not expected to correct any assignments or papers done by an auditor, and that an auditor may neither write an examination in that subject nor receive any credit for such course.

4. The Faculty of Music utilizes a 4-point Course Credit System (A: 80-100% = 4; B: 65-79% = 3; C: 55-64% = 2; D: 45-54% = 1; F: 0-44% = 0) which operates as in the table below:

Course & Number		*Course Credit Weight*	*Mark Received*	*Grade Points*
Theory & Analysis	211-224D	6	B(3)	18
Ear Training	212-131D	4	C(2)	8
Piano	250-230B	2	A(4)	8
	250-230B	2	A(4)	8
English	120-E10D	6	B(3)	18
French	126-110D	6	C(2)	12
Choir	243-993A	1	C(2)	2
	243-993B	1	C(2)	2
Total Credits		28	*Total Grade Pts.*	76

Grade Point Average: 76 ÷ 28 = 2.71

5. CONDITIONAL ADMISSIONS: Conditional Admission to a course may be granted only if the mark in the prerequisite course is "D" or "K" (Incomplete). Conditional Admissions will be reviewed by November 15. Students in their final year may be conditionally admitted to a course required for their degree.

6. COURSE CHANGES: Students are permitted to change courses and/or sections of a course during the first three-week period of classes in each term. Forms for this purpose are available at the Reception Desk of the Strathcona Music Building, 555 Sherbrooke Street West. (This time is referred to as the official Course Change Period.)

Late course change requests (other than changes imposed by the Faculty) will be accepted only with a late fee of $5. If a student's registration must be corrected after the Course Change Period to bring his record into conformity with the courses he is actually taking, he will be charged the $5 fee.

7. CONFIRMATION OF PROGRAM: Each student is responsible for his registration in the proper courses and programs. A Verification of Registration Form is sent to every student soon after the Course Change Period each term, and it is the student's responsibility to check it for errors, bringing any such, in writing, to the attention of the Student Records Officer. Students who expect to graduate at the end of the academic year are responsible to ensure that they are registered in all courses required for graduation, and should indicate their intention to graduate on their Verification Form.

8. WITHDRAWALS: Withdrawal from any course after the end of the Course Change Period requires the special approval of the Department Chairman concerned and the Dean. In such cases the student's mark in the course will be "W". Withdrawal forms must be obtained from the Reception Desk at the Strathcona Music Building.

The final deadlines for withdrawing from courses are:

For a half course: The end of the seventh week of classes.

For a full-course: The end of the third week of classes in the Second Term.

N.B. A student who does not complete a course for which he is registered will receive a grade of "F".

9. INCOMPLETES: At the discretion of the instructor a mark of "K" (Incomplete) may be given to a student who, due to extenuating circumstances, has not finished the course work on time. The deadline for completion and submission of the required work shall be set by the instructor but may not be later than the end of the next Course Change Period. If the "Incomplete" is not removed by this time, the mark will be changed to "KF" (Incomplete Failed).

A student who, in exceptional cases only, is given permission by his Department Chairman or the Student Progress Committee to leave a course indefinitely incomplete (without penalty) will receive the symbol "KK"; in which case, the student's Grade Point Average will be calculated without including this course.

10. ABSENT: The symbol "J" (Absent — 0 grade points) will be entered on the transcript of those students who were absent from the final examination or a major part of the course without previous authorization.

11. DEFERRALS: Deferred examinations are permitted in case of illness or other exceptional circumstances. A written request for the deferment of an examination must be submitted to the Department Chairman. On the student's transcript a deferred examination will be entered as "L".

12. SUPPLEMENTALS: Supplemental Examinations may be given at the discretion of the instructor. A student who receives a mark below 30% in a course is not permitted to take a supplemental examination but must repeat the course.

13. PROBATIONARY STANDING: A student whose GPA drops to between 1.5 and 1.99 is placed in probationary standing. A Performance Major who does not attain a B standing in his/her major field is placed in probationary standing. Such students may not register for more than 15 credits per term. A student in probationary standing must return to satisfactory standing within one year by obtaihing a GPA of 2.5 or a CGPA of 2.0, otherwise he will be placed in unsatisfactory standing.

14. UNSATISFACTORY STANDING: A GPA of less than 1.5 places a student in unsatisfactory standing. Students in unsatisfactory standing must withdraw. They may be readmitted to probationary standing upon appeal to the faculty. Students in unsatisfactory standing for a second time will be required to withdraw permanently.

15. SATISFACTORY STANDING: Students in satisfactory standing may not register for more than 18 credits per term except by permission from their departmental chairman.

16. RE-READING OF EXAMINATIONS: A student wishing to have an examination paper re-read should apply in writing to the Office of the Dean or Associate Dean. There is a fee of ten dollars which will be refunded if an error is found in the student's favour. If the re-reading of the examination results in the same or a lower mark there will be no refund. The mark given in the re-reading, whether higher or lower, will replace the mark originally given. Any request to have a term paper reassessed must be made directly to the professor concerned.

ENSEMBLE REGULATIONS

All students who enrol for practical instruction in the Faculty of Music are required to participate concurrently in at least one ensemble course. Those registered specifically in degree or diploma programs, whether as full-time or part-time students, and enrolled for practical instruction must fulfil the minimum sessional ensemble requirement specified in their program.

Assignments to Faculty Ensembles (Orchestra, Bands, Choirs, Chamber Music, Opera Studio, Jazz Ensemble, etc.) are made at the time of enrolment and posted on the Department of Performance notice board. Reassignments may be made from time to time during the session and will be similarly posted. Students are responsible for informing themselves of these assignments and reassignments.

Students who have been assigned to these ensembles are reminded that regular attendance is mandatory. Membership in any non-Faculty ensemble (professional, student, amateur) is considered an extra-curricular activity which can be permitted only on the understanding that curricular assignments (rehearsals, concerts) take precedence at all times.

Students who fail to adhere to this rule will lose the required ensemble credit. In the case of repeated absenteeism, a student will be asked to withdraw from the Faculty. (Written notice will be sent by the Ensemble Co-ordinator to those students whose attendance record is likely to result in either of the above consequences.)

3.14 EXAMINATION DATES 1975-76

Final sessional examinations in theoretical subjects are held in December (for first term courses), and in late April for all others.

Practical examinations will be held on the following dates:

September 8-12 (for students graduating in the fall of 1975)
November 17-21
February 16-20
April 26-May 7

3.15 GENERAL REQUIREMENTS FOR UNDERGRADUATE DEGREES AND DIPLOMAS

1. Completion of all courses and all proficiency requirements specified in the candidate's curriculum.
2. Minimum cumulative grade point average of 2.0.
3. Completion of a minimum of credits in residence at McGill University: (B.Mus.: 48 cr., L.Mus.: 36 cr., Concert Dip.: 26 cr.)

Graduation With Distinction: Any student completing the requirements for an undergraduate degree in the Faculty of Music with a cumulative grade point average of 3.6 will be graduated with *Distinction;* with a cumulative grade point average of 3.8, with *High Distinction.*

For additional information on courses and examinations please consult the Departmental Handbooks.

4 PROGRAMS OF STUDY

4.1 DEPARTMENT OF THEORY: Composition; History; Theory

B.Mus. WITH A MAJOR IN COMPOSITION

For prerequisite requirements for this program, see Section 3.8. (Non-Quebec Applicants)

Course Title	*Course No.*	*Course Credits*	*Total*

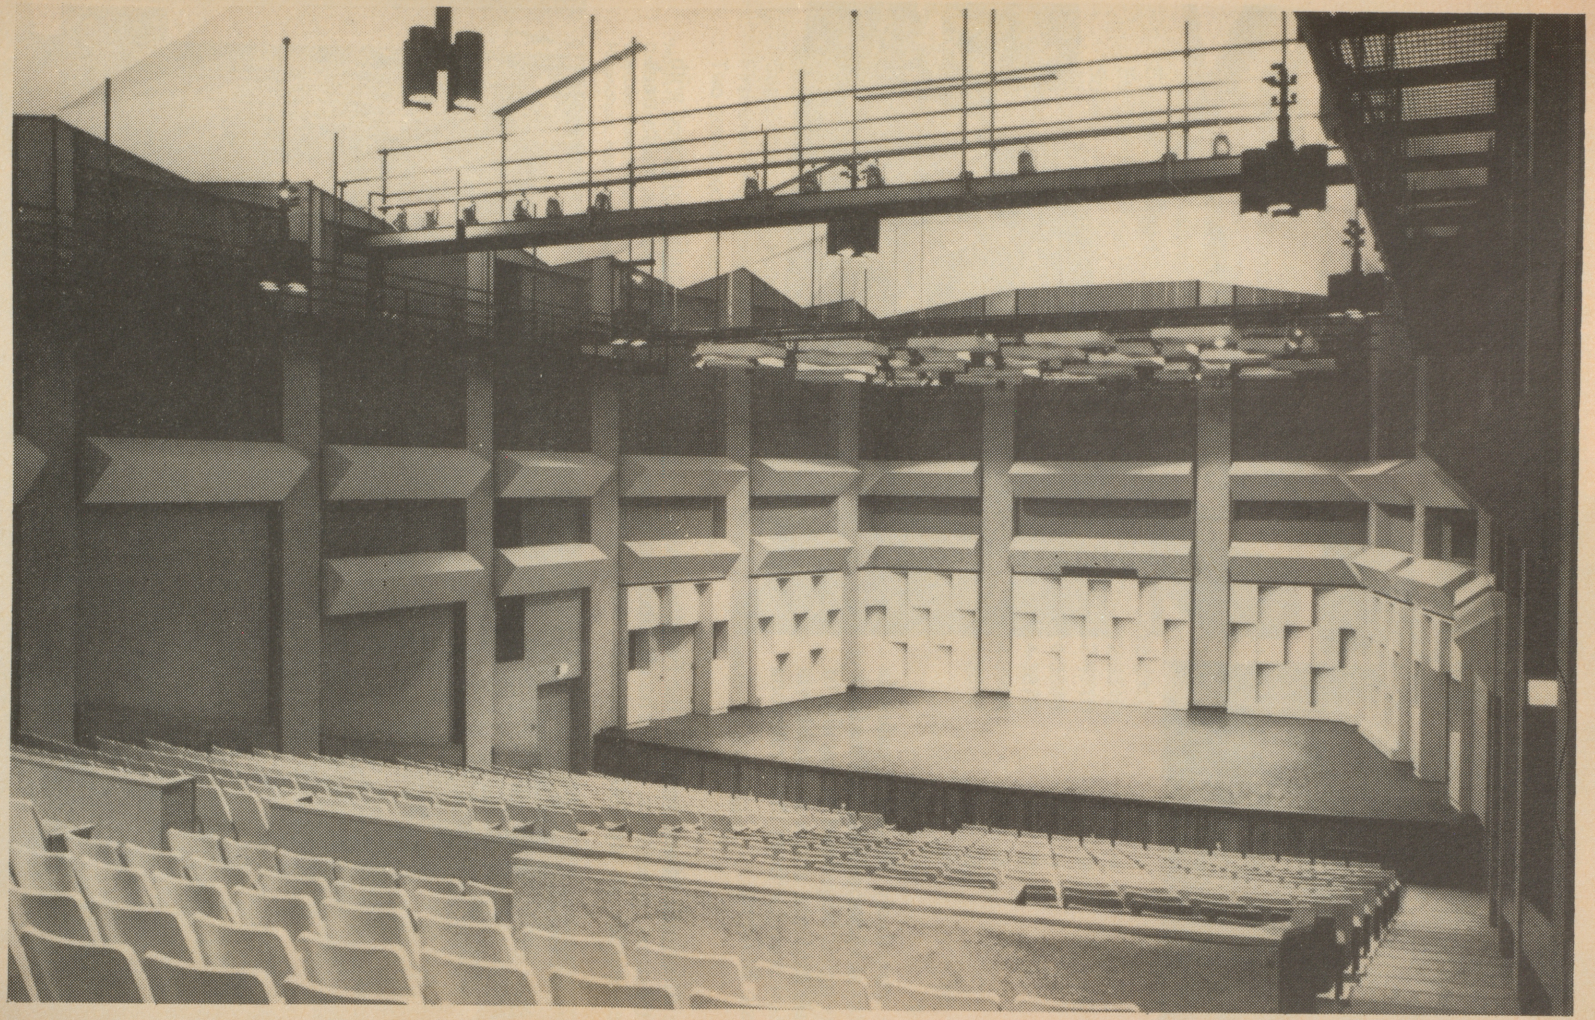
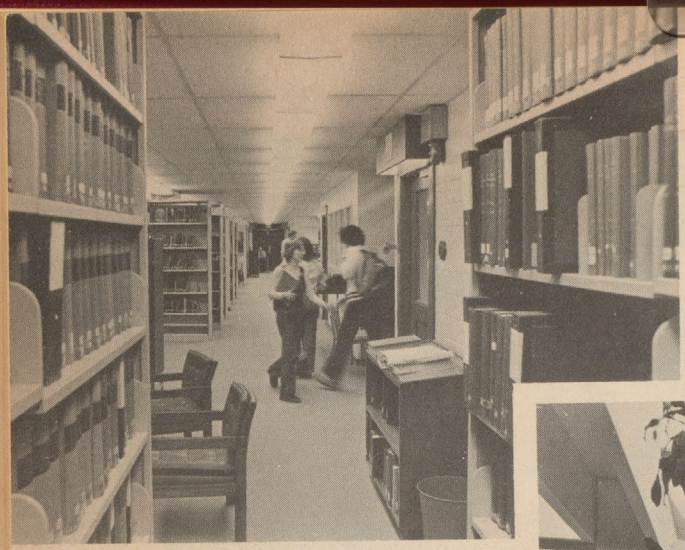
The four weeks from April 10th to May 8th were devoted to a special project, McGILL MUSIC MONTH, presented in order to celebrate the opening of the new Maurice Pollack Concert Hall, and at the same time to observe the 70th anniversary of music at McGill. During these four weeks, 33 concerts were given by student soloists and ensembles, staff, and grad-



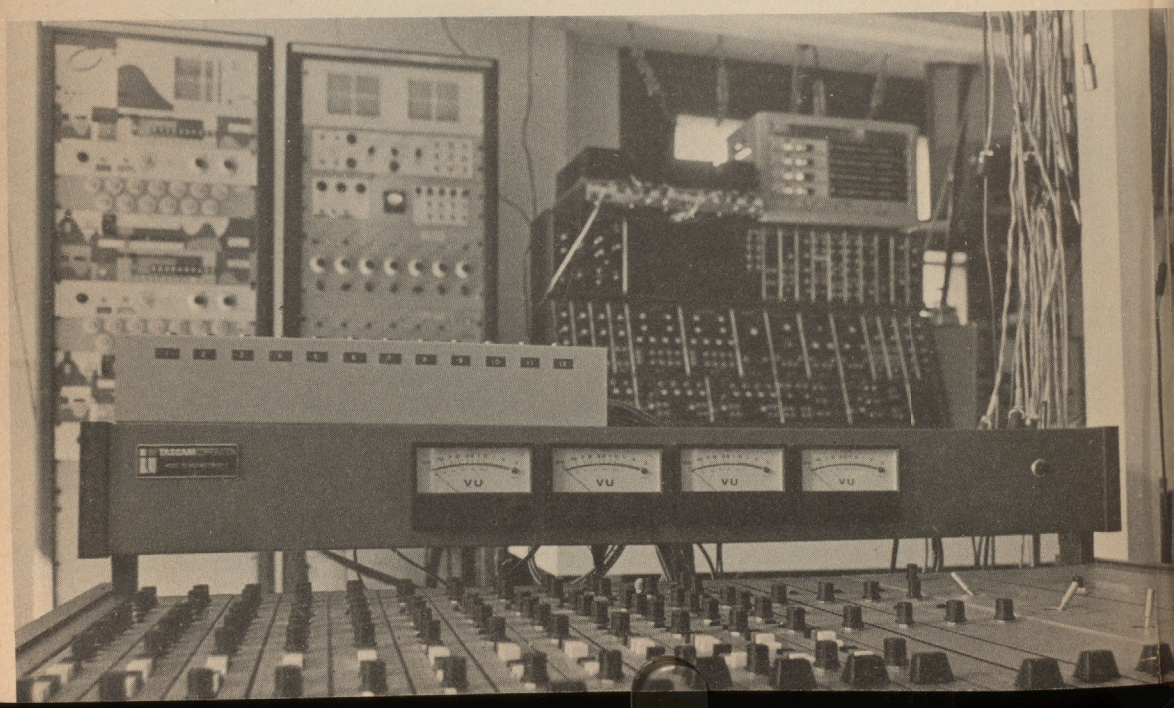
View of the 600-seat Maurice Pollack Concert Hall, inaugurated on April 10, 1975. Construction of the hall was made possible through the generosity of the Maurice Pollack Foundation. It was designed to provide a contemporary concert facility for the Faculty of Music, to be used primarily for teaching, recording and presentation of public concerts. In the words of Dean Helmut Blume, "The Maurice Pollack Concert Hall will become an artistic focus not only of McGill but of the Quebec community as a whole."



The Music Library boasts a collection of 7,500 monograph-volumes, 2,000 bound journals, 11,500 scores and 7,000 recordings.

The attractively decorated cafeteria of Royal Victoria College. This facility is much frequented by Faculty of Music students, and is accessible via a short corridor from the Strathcona Music Building.

The Electronic Music Studio of the Faculty consists of three individual studios equipped with synthesizers, generators, emt echo chamber, envelope generator, filters, mixers, multi-track tape recorder, an arp 2600 synthesizer, and a polyphonic synthesizer.



B.Mus. WITH HONOURS IN PERFORMANCE*

For prerequisite requirements for this program, see Section 3.8. (Non-Quebec Applicants)

5 COURSES AND PREREQUISITES

5.1 Theory, Counterpoint, Harmony and Analysis
5.2 Orchestration and Arranging
5.3 Ear Training
5.4 Composition
5.5 History and Literature
5.6 School Music
5.7 Jazz Studies, Conducting, and Diction
5.8 Ensembles
5.9 Practical Subjects

5.1 THEORY, COUNTERPOINT, HARMONY AND ANALYSIS (211-)

211-110A. MELODY AND COUNTERPOINT. (3 Credits; *Prerequisite:* McGill Preparatory Theory Secondary II [Grade 9] OR its equivalent; 4 hours). PROFESSOR DONALD PATRIQUIN (COORDINATOR) AND STAFF

211-111B. ELEMENTARY HARMONY. (3 Credits; *Prerequisite or corequisite:* 211-110A; 4 hours). PROFESSOR DONALD PATRIQUIN (COORDINATOR) AND STAFF

211-224D. TONAL THEORY AND ANALYSIS. (6 Credits; *Prerequisite:* 211-110A & -111B [211-223D]; 3 hours). MR. ROBERT JONES (COORDINATOR) AND STAFF

211-321D. LATE 19TH & 20TH CENTURY THEORY AND ANALYSIS. (6 Credits: *Prerequisite:* 211-224D; 3 hours). **N.B.** Successful completion of 211-321D does not exempt a student from 211-224D. PROFESSOR JOHN REA (COORDINATOR) AND STAFF

211-322D. TONAL COUNTERPOINT. (6 Credits; Prerequisite: 211-224D or 211-222D or 213-240D; 2 hours). PROFESSORS KELSEY JONES AND JANET SCHMALFELDT

211-323D. MODAL COUNTERPOINT. (6 Credits; *Prerequisite:* 211-224D or 211-222D or 213-240D; 2 hours). PROFESSOR KELSEY JONES

211-327D. 19TH CENTURY ANALYSIS. (4 Credits; *Prerequisite:* 211-224D [211-221D] or 211-222D or 213-240D; 2 hours). PROFESSORS BRIAN CHERNEY AND MARVIN DUCHOW

211-422D. FUGUE. (6 Credits; *Prerequisite:* 211-322D; 3 hours). PROFESSOR KELSEY JONES

211-423D. ADVANCED HARMONY. (6 Credits; *Prerequisites:* 211-322D and 211-327D, or 213-240D; 3 hours). PROFESSOR JOHN REA

211-427D. 20TH CENTURY ANALYSIS. (4 Credits; *Prerequisite:* 211-327D or 213-240D; 2 hours). PROFESSORS BRIAN CHERNEY AND JANET SCHMALFELDT

211-429D. PROSEMINAR IN MUSIC THEORY. (6 Credits; *Prerequisite:* 211-327D; *Corequisite:* 211-427D; limited to Honours Theory students; 3 hours.) PROFESSOR PAUL PEDERSEN (CO-ORDINATOR) AND STAFF

211-473A. SPECIAL STUDIES IN 20TH CENTURY THEORY & COMPOSITION. Musical Design. (3 Credits; *Prerequisite:* Permission of the instructor; limited enrolment.) PROFESSOR MARIO BERTONCINI

211-474B. SPECIAL STUDIES IN 20TH CENTURY THEORY & COMPOSITION. Musical Design. (3 Credits; *Prerequisite:* Permission of the instructor; limited enrolment.) PROFESSOR MARIO BERTONCINI

198-224B. PHYSICS OF MUSIC (Faculty of Science). (3 Credits; *Prerequisite:* none; 3 hours). PROFESSOR MANUEL LANGLEBEN

5.2 ORCHESTRATION AND ARRANGING (211-)

211-260D. INTRODUCTORY ORCHESTRATION. (4 Credits; No prerequisite; 2 hours lecture, 1 hour demonstration). PROFESSOR EUGENE PLAWUTSKY

211-360D. ORCHESTRATION. (4 Credits; *Prerequisites:* 211-260D and 211-224D; 2 hours). PROFESSOR ALEXANDER BROTT

211-361D. COMMERCIAL ARRANGING. (4 Credits; *Prerequisite:* 213-240D and permission of the instructor; 2 hours). MR. NEIL CHOTEM

211-460D. ORCHESTRATION. (4 Credits; *Prerequisites:* 211-260D and 213-240D; 2 hours). PROFESSOR BENGT HAMBRAEUS

211-461D. CHORAL AND INSTRUMENTAL ARRANGING. (4 Credits; *Prerequisites:* 211-321D and 223-204, -261, -262, -263; 2 hours). PROFESSOR DONALD PATRIQUIN AND MR. ROBERT JONES

5.3 EAR TRAINING (212-)

212-130D. EAR TRAINING (Movable Doh). (4 Credits; *Prerequisite:* 212-030D or McGill Preparatory Ear Training Secondary II (Grade 9) OR permission of the instructor; *Pre- or corequisites:* 211-110A and 211-111B; 2 hours). MR. PIERRE PERRON

212-131D. EAR TRAINING (Fixed Doh). (4 Credits; *Prerequisite:* 212-030D or McGill Preparatory Ear Training Secondary II (Grade 9) OR permission of the instructor; *Pre- or corequisites:* 211-110A and 211-111B; 2 hours).
PROFESSOR DONALD PATRIQUIN (COORDINATOR) AND STAFF

211-230D. EAR TRAINING (Movable Doh). (4 Credits; *Prerequisite:* 212-130D; *Pre- or corequisite:* 211-224D or 213-240D; 2 hours).
MR. PIERRE PERRON

212-231D. EAR TRAINING (Fixed Doh). (4 Credits; *Prerequisite:* 212-131D; *Pre- or corequisite:* 211-224D or 213-240D; 2 hours).
PROFESSOR WAYNE RIDDELL (COORDINATOR) AND STAFF

212-330D. EAR TRAINING (Movable Doh). (4 Credits; *Prerequisite:* 212-230D; 2 hours).
MR. MIKLOS TAKACS

212-331D. EAR TRAINING (Fixed Doh). (4 Credits; *Prerequisite:* 212-231D; 2 hours).
PROFESSOR LUBA ZUK (COORDINATOR) AND STAFF

212-431A. SOLFEGE (Fixed Doh). (2 Credits; *Prerequisite:* 212-331D; 2 hours).
PROFESSOR WAYNE RIDDELL

212-432B. DICTATION. (2 Credits; *Prerequisite:* 212-331D; 2 hours).
PROFESSOR LUBA ZUK

5.4 COMPOSITION (213-)

213-240D. TONAL COMPOSITION. (6 Credits; *Prerequisites:* 211-110A and 111B or their equivalent; 3 hours).
PROFESSORS BRIAN CHERNEY, JOHN REA AND DONALD STEVEN

213-241A. ELECTRONIC MUSIC. (3 Credits; No prerequisites; limited enrolment; not open to major and honours students in composition; 3 hours lecture plus 3 hours group studio time).
PROFESSOR PAUL PEDERSEN

Students in other faculties may enrol for this course with the permission of the instructor.

213-242B. ELECTRONIC MUSIC. (3 Credits; *Prerequisite:* 213-241A; limited enrolment; 3 hours lecture plus 6 hours group studio time).
PROFESSOR PAUL PEDERSEN

Note: Students who have successfully completed 213-242B and wish to continue their studies in electronic music may register for 213-341A and 213-342B with the permission of the instructor.

213-340D. COMPOSITION. (6 Credits: *Prerequisite:* 213-240D; 2 hours).
PROFESSORS BRIAN CHERNEY, BENGT HAMBRAEUS, ROBERT JONES, ALCIDES LANZA, PAUL PEDERSEN, JOHN REA AND DONALD STEVEN

213-341A. ELECTRONIC MUSIC. (3 Credits; *Prerequisite:* 213-240D OR permission of the instructor; limited enrolment; restricted to major and honours students in composition; 1 hour lecture, 1 hour demonstration, 3 hours group studio time).
PROFESSOR ALCIDES LANZA

213-342B. ELECTRONIC MUSIC. (3 Credits; *Prerequisite:* 213-341A; limited enrolment; 3-hour seminar and 3 hours studio time).
PROFESSOR EDGAR VALCARCEL

213-440D. COMPOSITION. (6 Credits; *Prerequisite:* 213-340D; 2 hours).
PROFESSORS BRIAN CHERNEY, BENGT HAMBRAEUS, ALCIDES LANZA AND PAUL PEDERSEN

213-441D. SPECIAL PROJECTS IN COMPOSITION. (6 Credits; *Prerequisite:* 213-440D; 2 hours).
STAFF

5.5 HISTORY AND LITERATURE (214-, 215-)

214-184A. HISTORY SURVEY (MEDIAEVAL, RENAISSANCE, AND BAROQUE). (3 Credits; *Prerequisite or corequisite:* 211-110A and 211-111B OR permission of the instructor; 3 hours).
PROFESSOR PAUL HELMER

214-185B. HISTORY SURVEY (CLASSICAL, ROMANTIC, AND 20TH CENTURY). (3 Credits; *Prerequisite or corequisite:* 214-184A [214-180D] OR permission of the instructor; 3 hours).
PROFESSOR BRUCE MINORGAN

214-184A & -185B or their equivalents are prerequisites to all 300- and 400- level history courses.

214-328D. MUSIC CULTURES OF THE WORLD. (Not given 1975-76). (6 Credits; 4 hours).

214-380B. MEDIAEVAL MUSIC. (Not given 1975-76). (3 Credits; 3 hours).

214-381A. RENAISSANCE MUSIC. (3 Credits; 3 hours). PROFESSOR MARVIN DUCHOW

214-382A. BAROQUE MUSIC. (Not given 1975-76). (3 Credits; *Additional Pre- or corequisite:* 211-224D or 213-240D; 3 hours).

214-383A. CLASSICAL MUSIC. (3 Credits; *Additional Pre- or corequisite:* 211-224D or 213-240D; 3 hours). PROFESSOR PAUL MARKS

214-384B. ROMANTIC MUSIC. (Not given 1975-76). (3 Credits; *Additional Pre- or corequisite:* 211-321D or 213-340D; 3 hours).

214-385B. TWENTIETH CENTURY MUSIC. (3 Credits; *Additional Pre- or corequisite:* 211-321D or 213-340D; 3 hours).
PROFESSOR BRIAN CHERNEY

214-386A. CHAMBER MUSIC LITERATURE. (Not given 1975-76). (3 Credits; 3 hours).

214-387A. OPERA LITERATURE. (Not given 1975-76). (3 Credits; 3 hours).

214-388B. KEYBOARD LITERATURE. (3 Credits; 3 hours). PROFESSOR PAUL HELMER

214-389B. ORCHESTRAL LITERATURE. (Not given 1975-76). (3 Credits; 3 hours).

214-390B. VOCAL LITERATURE. (3 Credits; 3 hours). PROFESSOR PAUL MARKS

214-391A. CANADIAN MUSIC. (3 Credits; 3 hours). PROFESSOR BRUCE MINORGAN

214-392A. BRASS LITERATURE. (3 Credits; 3 hours). PROFESSOR ROBERT GIBSON

214-394A. SPECIAL TOPIC SEMINAR. (3 Credits; 3 hours). A seminar on a selected topic for second year (U2) students in the major and honours programs in history. The topic will vary from year to year and will be given at the discretion of an individual professor in consultation with the Department of Theory.
PROFESSOR PAUL MARKS

214-475D, 214-476D. SPECIAL PROJECT. (3, 6 Credits). May be taken to replace one elective. Details will be found in the *Department of Theory Handbook.*

214-489B. HISTORY OF MUSIC THEORY. (Not given 1975-76). (3 Credits; *Prerequisite:* 211-224D or 213-240D; 3 hours).

214-496B. HONOURS TUTORIAL. (3 Credits). Regular individual and/or group sessions for third year (U3) honours students in history under the guidance of a faculty advisor. Independent study and musicological research problems will be stressed. STAFF

214-498D. BIBLIOGRAPHY AND METHODOLOGY IN ETHNOMUSICOLOGY. (Not given 1975-76.) (6 Credits: *Prerequisites:* 214-328D, 211-321D, and 212-331D OR permission of the instructor; 4 hours).

214-499D. PROSEMINAR IN MUSICOLOGY. (6 Credits; open only to students in the Honours in Music History program; 3 hours).
PROFESSORS MARVIN DUCHOW AND PAUL HELMER

215-428A. TWENTIETH CENTURY PERFORMANCE PRACTICE. (3 Credits; *Pre- or corequisite:* 211-321D AND Honours standing in Performance; 3 hours).
PROFESSOR BENGT HAMBRAEUS

5.6 SCHOOL MUSIC (221-, 222-, 223-)

Keyboard/Choral Division (221-, 222-)

221-350D. CHOIR TRAINING SKILLS. (4 Credits; *Prerequisites:* 211-224D and 212-130D or -131D; 2 hours).
PROFESSOR WAYNE RIDDELL

221-450D. CHOIR TRAINING SKILLS. (6 Credits; *Prerequisite:* 221-350D; 2 hours).
PROFESSOR WAYNE RIDDELL

221-351D. KODALY METHOD AND WORKSHOP. (2 Credits; *Prerequisites:* 212-230D or -231D and 221-350D; 1 hour).
MR. PIERRE PERRON

221-353D. ORFF METHOD AND WORKSHOP. (Not given 1975-76). (2 Credits; *Prerequisites:* 212-230D or -231D and 211-224D or permission of instructors; 1 hour).

222-354D. KEYBOARD SKILLS. (2 Credits; *Prerequisites:* Piano Proficiency Test [at least McGill Secondary I (Grade 7) Piano or equivalent] and Theory 211-321D or permission of the instructor; 1 hour). PROFESSOR DONALD MACKEY

222-454D. KEYBOARD SKILLS. (2 Credits; *Prerequisite:* 222-354D; 1 hour).
PROFESSOR DONALD MACKEY

221-235D. VOCAL TECHNIQUES. (2 Credits; *Prerequisite:* none, 1 hour).
MRS. BETTY DOROSCHUK

221-335D. VOCAL TECHNIQUES. (2 Credits; *Prerequisite:* 221-235D; 1 hour).
MRS. BETTY DOROSCHUK

Instrumental Division (223-)

223-201A & 223-201B. STRING TECHNIQUES (Violin-Viola.) (2 Credits; *Prerequisite:* none — Open only to students majoring in School Music: Instrumental; 2 hours).
PROFESSOR STEPHEN KONDAKS

223-211A & 223-211B. STRING TECHNIQUES (Cello-Bass.) (2 Credits; *Prerequisite:* none — Open only to students majoring in School Music; Instrumental; 2 hours).
PROFESSOR STEPHEN KONDAKS

223-202A. WOODWIND TECHNIQUES. (4 Credits; *Prerequisite:* none — Open only to students majoring in School Music: Instrumental; 4 hours).
PROFESSOR DONALD HUGHES

223-203B. BRASS TECHNIQUES. (4 Credits; *Prerequisite:* none — Open only to students majoring in School Music: Instrumental; 4 hours). TBA

223-204D. PERCUSSION TECHNIQUES. (2 Credits; *Prerequisite:* none — Open only to students majoring in School Music; 1 hour).
MR. LANNY LEVINE

223-250D. GUITAR TECHNIQUES. (2 Credits; *Prerequisite:* none; 1 hour).
MR. ED RUSNAC

223-251D. RECORDER TECHNIQUES. (2 Credits; *Prerequisite:* none; 1 hour).
MR. JEAN-PIERRE PINSON

223-261A & 223-261B. INSTRUMENTAL SURVEY (Strings.) (2 Credits; *Prerequisite;* none; 2 hours).
PROFESSOR STEPHEN KONDAKS

223-262A & 223-262B. INSTRUMENTAL SURVEY (Woodwinds.) (2 Credits; *Prerequisite:* none; 2 hours).
PROFESSOR DONALD HUGHES

223-263A & 223-263B. INSTRUMENTAL SURVEY (Brass.) (2 Credits; *Prerequisite:* None; 2 hours). TBA

223-305D. ORCHESTRA & BAND TECHNIQUES. (4 Credits; *Corequisite:* ONE of 223-201A or B, 223-202B, 223-203A; 2 hours).
PROFESSORS DONALD HUGUES AND STEPHEN KONDAKS

223-355D. SUZUKI METHOD AND WORKSHOP. (2 Credits; *Prerequisites:* 212-230D or -231D and 211-224D or permission of instructor; 1 hour). DR. ALFRED GARSON

223-405D. ORCHESTRA & BAND TECHNIQUES. (6 Credits; *Prerequisite:* 223-305D; 4 hours). PROFESSORS DONALD HUGUES AND STEPHEN KONDAKS

5.7 JAZZ STUDIES, CONDUCTING AND DICTION (240-, 241-, 242-)

240-213A. JAZZ IMPROVISATION I. (2 Credits; *Prerequisite:* Permission of the instructor; 2 hours.) MR. ARMAS MAISTE

240-214B. JAZZ IMPROVISATION II. (2 Credits; *Prerequisite:* 240-213A; 2 hours.)
MR. ARMAS MAISTE

240-313A. JAZZ IMPROVISATION III. (3 Credits; *Prerequisite:* 240-214B and permission of the instructor; 3 hours.) MR. ARMAS MAISTE

240-314B. JAZZ IMPROVISATION IV. (3 Credits; *Prerequisite:* 240-313A; 3 hours.)
MR. ARMAS MAISTE

240-413A. JAZZ IMPROVISATION V. (4 Credits; *Prerequisite:* 240-314B and permission of the instructor; 4 hours.) MR. ARMAS MAISTE

240-414B. JAZZ IMPROVISATION VI. (4 Credits; *Prerequisite:* 240-413A; 4 hours.)
MR. ARMAS MAISTE

241-136D. CONDUCTING. (2 Credits; 1 hour).
PROFESSOR ALEXANDER BROTT

241-236D. CONDUCTING. (4 Credits; *Prerequisite:* 241-136 with a grade of "A"; 1 hour).
PROFESSOR ALEXANDER BROTT

241-336D. CONDUCTING. (6 Credits; *Prerequisites:* 223-204; 223-261; 223-262; 223-263; 211-222; 241-236 with a grade of "A"; 1 hour).
PROFESSOR ALEXANDER BROTT

241-436D. CONDUCTING. (8 Credits; *Prerequisites:* 221-250; 211-321; 211-327; 241-336 with a grade of "A". 1 hour).
PROFESSOR ALEXANDER BROTT

242-111D. ITALIAN DICTION. (2 Credits; 1 hour).
PROFESSOR LUCIANO DELLA PERGOLA

242-112D. GERMAN DICTION. (2 Credits; 1 hour). PROFESSOR HELMUT BLUME

5.8 ENSEMBLES

243-981A & 981B. PIANO ENSEMBLE. (1 - 1 Credit; *Prerequisite:* Concentration Piano Intermediate Examination or equivalent; 1 hour).
PROFESSORS DOROTHY MORTON, CHARLES REINER AND LUBA ZUK AND MISS ELIZABETH DAWSON

243-982A & 982B. ACCOMPANYING CLASS I. (1 - 1 Credit; *Prerequisite:* Concentration Piano Final Examination or equivalent; 1 hour).
PROFESSOR CHARLES REINER

243-983A & 983B. ACCOMPANYING CLASS II. (1 - 1 Credit; *Prerequisite:* 243-982A & B;
PROFESSOR CHARLES REINER

243-984A & 984B. STUDIO ACCOMPANYING. 1 - 1 Credit; *Prerequisite:* Permission of instructor). Qualified students may be assigned to studio accompanying for four hours a week in lieu of participation in Choir. Their work will be appraised and marked by the studio teacher.
PROFESSOR ROSE GOLDBLATT AND STAFF

243-985A & 985B. MIXED ENSEMBLES. (1 - 1 Credit; *Prerequisite:* Audition; 1-2 hours.)
PROFESSOR LUBA ZUK AND STAFF

243-986A & 986B. OPERA COACHING. (0 Credits; *Prerequisite:* Piano Audition; 3 hours).
MR. ANTONIO NARDUCCI

243-987A & 987B. CONTEMPORARY CHAMBER MUSIC CHOIR. (Not given 1975-76). (1 - 1 Credit; *Prerequisite:* Audition; 2-3 hours).

243-989A & 989B. WOODWIND ENSEMBLES. (1 - 1 Credit; 2-3 hours).
PROFESSORS DONALD HUGUES, GERALD DANOVITCH AND STAFF

243-990A & 990B. BAND. 1 - 1 Credit; *Prerequisite:* Audition; 4 hours). TBA

243-991A & 991B. BRASS ENSEMBLES. (1 - 1 Credit; 2-3 hours).
PROFESSOR RICHARD LAWTON AND STAFF

243-992A & 992B. CONCERT CHOIR. (1 - 1 Credit; *Prerequisite:* Audition; 2-4 hours).
PROFESSOR WAYNE RIDDELL

243-993A & 993B. FACULTY CHOIR. (1 - 1 Credit; 2-4 hours). PROFESSOR WAYNE RIDDELL, MRS. BETTY DOROSCHUK

243-994A & 994B. CONTEMPORARY MUSIC ENSEMBLE. (1 - 1 Credit; *Prerequisite:* Audition; 2-4 hours).
PROFESSORS EDWARD CULBREATH AND EUGENE PLAWUTSKY

243-995A & 995B. JAZZ ENSEMBLE. (1 - 1 Credit; *Prerequisite:* Audition; 3 hours).
PROFESSOR GERALD DANOVITCH

243-996A & 996B. OPERA STUDIO. (2 - 2 Credits; *Prerequisite:* Audition; 3-6 hours).
PROFESSORS L. DELLA PERGOLA, EDITH DELLA PERGOLA AND STAFF

243-997A & 997B. ORCHESTRA. (1 - 1 Credit; *Prerequisite:* Audition; 6 hours).
PROFESSOR EUGENE PLAWUTSKY, *Conductor*

243-998A & 998B. PERCUSSION ENSEMBLES. (1 - 1 Credit; 2-3 hours).
PROFESSOR PIERRE BELUSE

243-999A & 999B. STRING ENSEMBLES. (1 - 1 Credit; 2-3 hours).
PROFESSORS STEPHEN KONDAKS, EDWARD CULBREATH AND MAURICIO FUKS

5.9 PRACTICAL SUBJECTS

PRACTICAL ASSIGNMENTS AND LESSONS

The assignment of students to teachers for private lessons is the responsibility of the Chairman of the Department of Performance and is made on the basis of student request and actual registration. It is understood that returning students will study with the same teacher unless prior arrangements have been made with the Chairman of the Department in consultation with the teachers concerned. Teacher assignments will be made soon after the period of enrolment and posted on the notice boards during the first week of classes. Following this assignment, it is the responsibility of the student to contact his teacher and arrange lesson times.

Individual lessons missed as a consequence of the instructor's absence will be made up at the mutual convenience of the instructor and student. Lessons missed as the result of the student's absence will be made up only if notice of cancellation has been given 48 hours in advance, or if a doctor's certificate is produced and prior notice is given of the cancellation.

CREDIT WEIGHTS FOR PRACTICAL STUDY

Elective, Concentration	2 credits each term
Major (B.Mus.)	4 credits each term
Major (L.Mus.); Graduate Major	5 credits each term

ASSIGNMENT OF PRACTICE ROOMS

Practice hours will be assigned on a weekly basis at the beginning of each term. Students are expected to practise a minimum of 4 hours a week for each credit of practical work undertaken in a term, and will be assigned this amount of time in Faculty of Music practice rooms. Students wishing to be assigned such practice time must complete a PRACTICE ROOM SCHEDULE REQUEST form available at the Department of Performance Office (E202). Practice time is assigned on an hourly basis, and the room is reserved until 10 minutes past the hour. If at that time the student assigned to the room is not present, the room is available to anyone.

EXAMINATIONS AND GOALS IN PRACTICAL SUBJECTS

Levels of Achievement

The content of the practical levels outlined in this syllabus is for the guidance of the student and is a flexible rather than rigid description of the requirement.

Each student taking practical instruction is expected to complete one level each year until he has passed the requirement within his field.

Elective Study: Work for students electing a practical subject beyond or in addition to their curricular requirements will be planned by the instructor in consultation with the student to satisfy the student's individual needs and aims; thus the student is not expected to follow a specific program, and does not normally sit an examination.

Concentration Study: A student majoring in Composition, History, School Music, or Theory will follow the Concentration program in his practical subject up to the achievement level of Concentration III. (See Practical course descriptions.)

Major Study: A student majoring in Performance must show talent for this field before being admitted to the curriculum, and must achieve second class standing (B) in his major subject on the Intermediate Examination and in each subsequent term.

Post-Graduate Study: For students continuing major study on the graduate level. Concert Diploma Candidates must present three recitals as recommended by the faculty members concerned and must maintain first class standing in the major subject.

Intermediate Examination

The purpose of this examination is to assess the student's progress in the practical area, and, in the case of a Performance Major, to determine whether or not he may continue in the program. A committee composed of the Dean, or his delegate, the student's teacher, and at least two other members of the area concerned administers the examination and makes recommendations for the student's upper years of

For the Concentration Intermediate Examination, the jury will consist of the student's teacher, the Area Chairman, and one other member of the Area teaching staff. The results are considered by the department in which he is enrolled, in order to assess his potential in his chosen field of study.

The student will be expected to perform works recommended by his teacher and will be graded on his performance at this examination. The student's teacher gives two marks, one for the term's work and one for the performance at the examination; every other member of the committee gives one mark for the examination. The student's final mark is the average of all these.

Other Examinations in Practical Studies

It is the prerogative of the teacher to ask for a committee examination of any student. The teacher's grade on the term's work is prepared in advance and will be counted as one half of the final mark.

Additional examinations in practical study are held as follows:

Students Majoring in Performance:

Semifinal Examination: normally taken during the student's penultimate year of study, must demonstrate ability at the level of Major IV. The panel consists of the Area Chairman, or his delegate, plus at least 2 other representatives of the area concerned.

Final Examination: must be taken at least eight months after the Semifinal Examination and demonstrate ability at the level of Major V. *Students are required to present a final recital as recommended by the examining panel after consultation with the student's teacher.* The panel consists of the Dean or his delegate, the Area Chairman, plus 2 other representatives of the area concerned.

Students Majoring in School Music, Composition, History and Theory:

Final Examination: Normally taken after two years of university-level study. The student must demonstrate ability at the Concentration III level. The Area Chairman, or his delegate, plus one other representative of the area constitute the examining panel.

Mandatory Annual Examinations

Regular students, other than Performance Majors, who study with teachers not affiliated with the Faculty of Music, but who wish such study to be accredited to their curriculum requirements, must perform an examination in this practical area at least once in every academic year. Such an examination would require payment of the $50.00 examination fee.

Applications for Examinations

Application for these examinations must be made with the approval of the teacher on the appropriate form available in the Performance Departmental Office, and submitted according to the following schedule:

Examination Period	*Application Deadline*
September 8 - 12, 1975 (grads only)	August 8
November 17 - 21, 1975	October 17
February 16 - 20, 1976	January 16
April 26 - May 7, 1976	March 19
September 6 - 10, 1976 (grads only)	August 6

APPLICATIONS RECEIVED AFTER THESE DEADLINES WILL BE AUTOMATICALLY DEFERRED TO THE NEXT EXAMINATION PERIOD.

The student is responsible for applying and must submit with the application three typewritten copies of his examination program, signed by his teacher, for the approval of the Area Committee. Permission to withdraw from a practical examination already scheduled will normally be granted only in the case of illness. A medical certificate must be submitted to the Departmental Secretary within seven days after the withdrawal request has been received. Withdrawal from a scheduled practical examination on other than medical grounds must be authorized by the Department Chairman.

COURSE NUMBERING (PRACTICAL SUBJECTS)

A six-digit course number is used to define the area and function of individual practical instruction offered by the Faculty of Music. The first three digits indicate the instrument, *i.e.:*

220: Harp
224: Violin
225: Viola
226: Cello
227: Bass
228: Guitar
229: Percussion
230: Flute
231: Oboe
232: Clarinet
233: Saxophone
234: Bassoon
235: French Horn
236: Trumpet
237: Trombone
238: Baritone
239: Tuba
250: Piano
251: Organ
252: Harpsichord
253: Voice

The fourth digit indicates the level of study:

Practical Major	Practical Concentration
1: I & II (Qualifying)	I & II (Qualifying & Intermediate)
2: III (Intermediate)	III (Final)
3: IV (Semifinal)	
4: V (Final)	
6: (Postgraduate study)	

The fifth digit indicates the function of the particular subject in the student's curriculum, i.e.:

1: Elective
3: Concentration
4: Major (Degree)
5: Major (Diploma)
6: Honours (Degree)

The final digit indicates examinations and/or recitals, i.e.:

0: No examination
2: Intermediate examination
3: Final examination (Concentration)
4: Semifinal examination (Major)
5: Final examination (Major)
6: Postgraduate examination
7: Postgraduate recital
8: Elective examination

The letter suffix to each course number indicates the term and duration of instruction (A-first term; B-second term; C-summer session; D-first and second terms.)

Thus, the number 225-130A would provide the following information about the instrument, level, function, and examination level of a student's practical study:

225- : viola
225-1 : intermediate
225-13 : concentration
225-130 : no examination
225-130A : first-term instruction

The number 250-354B would provide the following information:

250- : piano
250-3 : semifinal
250-35 : major (diploma)
250-354 : semifinal examination
250-354B : second-term study (and examination)

Grade levels in practical subjects are defined as follows:

PERFORMANCE MAJORS:

Major I and II — Qualifying
Major III — Intermediate
Major IV — Semifinal
Major V — Final

NON-PERFORMANCE MAJORS:

Concentration I — Qualifying
Concentration II — Intermediate
Concentration III — Final

KEYBOARD

Piano:

MR. NORAIR ARTINIAN
MISS ELIZABETH DAWSON
PROF. ROSE GOLDBLATT
MRS. MARY KIRBY
PROF. PAUL LOYONNET
MRS. ESTHER MASTER
PROF. KENNETH MEEK
PROF. DOROTHY MORTON
MISS PENELOPE PETERS
MR. TOM PLAUNT
PROF. CHARLES REINER
MR. KARL STEINER

MR. KENNETH WOODMAN
PROF. LUBA ZUK

Organ:

MR. JOHN GREW
PROF. DONALD MACKEY
PROF. KENNETH MEEK

Harpsichord:

MR. JOHN GREW

Piano

N.B. Proposed programs for examinations must be submitted to the Piano Committee for approval before the time of application. Three copies, with timings, should be given to the Secretary of the Department of Performance. A list of repertoire explored by the student during previous terms should be brought to the examiners, not to be performed, but to be considered in the final estimate of the student's rating.

CONCENTRATION I: Emphasis on sight reading. Preparation of Quick Studies, to be learnt within a given short period of time. Pieces at the level of Preparatory School Collegial I, exploring a broad spectrum of piano literature.

CONCENTRATION II: Sight reading and Quick Studies of greater difficulty. Substantial list of pieces at the level of Preparatory School Collegial II. Intermediate examination will consist of two contrasted pieces from different periods; a Quick Study, to be given by the teacher one week prior to the examination date, at the standard of Concentration I; sight reading, previously chosen by the examiners, of a suitable level.

A Scales Test (pass/fail) will be undertaken before the Intermediate Examination, as for the Preparatory School Secondary III Scales and arpeggios.

CONCENTRATION III: More difficult sight reading. Quick Studies at the level of Concentration II. Pieces chosen in accordance with the progressive requirements of the course. Final examination will consist of three contrasted pieces from different periods; a Quick Study, given by the teacher one week prior to the examination date; sight reading, previously chosen by the examiners, of a suitable level.

MAJOR I: Repertoire at the level of Concentration II.

MAJOR II: Repertoire at the level of Concentration III.

MAJOR III: Work on expansion of repertoire in accordance with the progressive requirements of the courses. At this stage the Intermediate Examination is required. This will consist of a program of four contrasted works from different periods; duration, 30 to 45 minutes. Sight reading previously prepared by the jury panel of a suitable standard.

A separate scales test (pass/fail) must be undertaken before the Intermediate Examination as for the Preparatory School Collegial II Scales and Arpeggios.

MAJOR IV: At this level, the Semifinal Examination is required. This will consist of a program of four contrasted pieces of different periods, of a suitable degree of advancement. Duration: 45 to 60 minutes. Sight reading, previously prepared by the jury, will be at the required standard for this level.

MAJOR V: The Final Examination, required at this level, will consist of a balanced program of several contrasting works. Duration: 60 minutes. A concerto will also be presented at this session. Public recital by request of the jury.

POST-GRADUATE (Concert Diploma): Further intensive study of the literature. Ability to perform three approved recital programs and four concerti from various periods, including one 20th Century concerto. Presentation to the examining panel of a comprehensive list of repertoire studied to indicate mastery of the important works of the general repertoire as well as thorough acquaintance with the chamber music literature involving piano. The list should be verified in advance by the teacher. Professional concert maturity.

Organ

CONCENTRATION I: (Successful piano study at the level of McGill Preparatory Grade Secondary III is a prerequisite). Studies from Phillips, *Articulation in Organ Playing;* Videro, *Organ School.* Pieces such as: Buxtehude, *Chaconne in E minor;* Bach, *Orgelbüchlein* (choice of 2 or 3 chorale preludes). Hindemith, *Sonata No. 2,* 2nd movement.

CONCENTRATION II: Studies from the above publications. Couperin, *Offertoire* from *Messe pour les paroisses;* Bach, *Concerto No. 4, IN C;* Saint-Saëns, *Prelude in B.* Questions will be asked concerning articulation, registration and tonal structure of the organ. Intermediate examination.

CONCENTRATION III: Final examination requiring a program of two major works from each of the following categories: Pre-Bach; Bach; 19th and 20th centuries, plus one complete Trio Sonata of Bach. Questions will be asked concerning registration and the tonal structure of the organ. Final examination.

MAJOR I: Studies and pieces at the level of Concentration II. Questions will be asked concerning problems of articulation, registration and tonal structure of the organ.

MAJOR II, III, IV, V: At each of these levels, the candidate will be required to play one of the Trio Sonatas by Bach (all three movements), and two major works from each of the following categories:

Pre-Bach
Bach
19th-20th Centuries

(Six works in all, plus the Trio Sonata)

The pieces chosen for each year should be determined by the student in consultation with the teacher, and in accordance with the progressive requirements of the course. At least ONE piece should be played from memory.

POST-GRADUATE: Intensive study of the literature: Ability to perform three approved recital programs and four concerti from different periods, including one 20th century concerto. Presentation to the examining panel of a comprehensive list of repertoire studied to indicate mastery of the important works of the general repertoire as well as thorough acquaintance with the chamber music literature involving organ. The list should be verified in advance by the teacher. Preparation of an unfamiliar work within one week before the final examination. Professional concert maturity.

Harpsichord

CONCENTRATION I: (Successful piano study at the level of McGill Preparatory Grade Secondary III is a prerequisite.) Bach, *Two-Part Inventions;* works from collections such as: Ferguson, *Style and Interpretation;* an Anthology of Keyboard Music. Problems of harpsichord touch, phrasing, articulation, ornamentation and registration.

CONCENTRATION II: Bach, *Three-Part Inventions;* Scarlatti, *Sonata in D minor;* Purcell, *Prelude in G minor* from *Suite No. 2;* Rameau, *La Triomphante;* Bach, *Prelude* from *English Suite No. 2;* etc. Intermediate examination.

CONCENTRATION III: Bach, *Well-Tempered Clavier;* works of the English Virginalists, French Clavecinistes, etc. Selected pieces by Scarlatti, Froberger, Kuhnan, Soler, etc. Sight reading and knowledge of technique and style. Final examination.

MAJOR I: Level similar to Concentration II.

MAJOR II: Similar to Concentration III.

MAJOR III, IV, V: At each of these levels (Intermediate, Semi-final, and Final examinations),

the candidates will be required to play two of the Preludes and Fugues from the *Well-Tempered Clavier* by Bach, and a major work from each of the following categories:

English Virginalists
Italian School (Frescobaldi, Merulo, Rossi, etc.)
Bach
French Clavecinistes
Iberian School (Scarlatti, Soler, etc.)

(Six works in all, plus the two Preludes and Fugues) The pieces chosen for each year should be determined by the student in consultation with the teacher, and in accordance with the progressive requirements of the course. Questions will be asked in all but the final examination on various aspects of harpsichord technique, literature, and style. At least ONE piece should be played from memory.

POST-GRADUATE: Further intensive study of the literature. Ability to perform three approved recital programs and four concerti from various periods, including one 20th century concerto. Presentation to the examining panel of a comprehensive list of repertoire studied to indicate mastery of the important works of the general repertoire as well as thorough acquaintance with the Chamber Music literature involving the candidate's instrument. The list should be verified in advance by the teacher. Preparation of an unfamiliar work within one week before the final examination. Professional concert maturity.

VOICE

MISS KATHLEEN ANDERSON
PROF. EDITH DELLA PERGOLA
PROF. LUCIANO DELLA PERGOLA
MRS. BETTY DOROSCHUK
MRS. CARMEN MEHTA
MME DINA MARIA NARICI
MR. WINSTON PURDY *(Leave of absence 1975-76)*
MR. JAN SIMONS

CONCENTRATION I: Studies by Concone, Nos. 1-25. Appropriately graded songs from works by: Dowland, Purcell, Handel, Fleming, Mozart, Schubert, or the Italian School. Folk songs. Sight reading.

CONCENTRATION II: Panofka, *Studies.* Songs from: Early Italian School, Dowland, Purcell, Handel, Haydn, Mozart, Schubert, Fauré, Ravel, Hahn, etc. Sight reading. Intermediate Examination.

CONCENTRATION III: Final examination consists of six works, representative of the following schools:

Early Italian (1)*
German: Mozart, Haydn, Schubert, etc. (2)*
French: Ravel, Fauré, Hahn (1)
English: Handel, Purcell, Dowland, Warlock, Bridge, Britten (1)
One recitative and aria from an oratorio or cantata.

*Operatic arias may be substituted in the same language.

MAJOR I: Studies and pieces of a difficulty similar to that of Concentration II.

MAJOR II: Similar to Concentration III.

MAJOR III: Pieces and studies chosen in consultation with the teacher and in accordance with the progressive nature of the course. Works by: Schubert, Mozart, Schumann, Brahms, Fauré, Poulenc, Ravel, Debussy, Britten, etc. Recitative and Aria from Oratorio, Cantata and Opera. Intermediate examination.

MAJOR IV: Semifinal examination of approximately 45 minutes duration. Eight works representative of the following:

German School: Strauss, Wolf, Mahler, etc. (2)
French School: Fauré, Ravel, Debussy, Duparc, Poulenc (2)
20th Century: Two songs in a language other than German or French (at least one must be in English)
Either: One complete oratorio part or one complete solo cantata, plus one operatic aria; *OR* one leading operatic role or two minor roles, plus one oratorio aria.

MAJOR V: Final examination: A representative recital consisting of a well-balanced program of:

a) A German song cycle
b) Three French songs
c) Three 20th century songs (including at least one in English)
d) *Either:* A complete oratorio role and a complete solo cantata *or* A leading operatic role and two minor operatic parts.

POST-GRADUATE: Intensive study of the literature. Public recitals and other performances as determined in consultation with the Chairman of the Department and the Voice Committee. Professional concert maturity.

ORCHESTRAL INSTRUMENTS

Strings

PROF. OTTO ARMIN, *violin (Leave of absence, 1975-76)*
PROF. MAURICIO FUKS, *violin*
MRS. MILDRED GOODMAN, *violin*
MRS. SONJA JELINKOVA, *violin*
PROF. STEPHEN KONDAKS, *violin and viola*
PROF. EDWARD CULBREATH, *cello*
MR. THOMAS LEDERER, *bass*

VIOLIN

CONCENTRATION I: Thorough study of technique involving left hand position and bow arm; scales and arpeggios through three octaves; etudes such as Fiorillo, Dont, op. 37; and Kayser; prepared

pieces such as Corelli, *La Folia;* Rode, *Concerto in A minor;* Bach, *Concerto in E major;* and Kreutzer, *Concerto No. 19.*

CONCENTRATION II: Continued study of left hand and bow arm technique. Scales and arpeggios through three octaves; etudes such as Fiorillo, Gaviniès, Kreutzer; prepared pieces by composers such as Handel, Corelli, Tartin and others. Intermediate examination at this level.

CONCENTRATION III: Continuation of above material with the addition of scales in thirds and chromatic; etudes such as Dont, op. 35; Rode; Rovelli and Kreutzer; prepared pieces in the styles represented by Viotti, Haydn, Vivaldi, Bach, and Mozart. Final examination required.

MAJOR I: Material at a level similar to Concentration II.

MAJOR II: Similar to Concentration III.

MAJOR III: Continued emphasis on material above leading to studies of Campagnoli, Paganini and Wieniawski, *L'Ecole Moderne, Op. 10, No. 1;* prepared pieces such as Mendelssohn, *Concerto;* Bruch, *Concerto;* Mozart and Beethoven Sonatas. Intermediate examination.

MAJOR IV: Studies by Campagnoli, *Divertissement No. 6;* Paganini, *Caprice Op. 1, No. 24;* Wieniawsky, *L'Ecole Moderne, Op. 10, No. 3.* Prepared pieces such as Sonatas — any one of the unaccompanied Partitas or Sonatas by J. S. Bach; Concertos: Saint-Saëns, *Concerto in B Minor;* Lalo, *Symphonie Espagnole.* Semifinal examination.

MAJOR V: The performance from memory of a representative recital program to be chosen in consultation with the Instructor and the Department Chairman. Final examination.

POST-GRADUATE: Intensive study of the literature. Ability to perform two approved recital programs and two concerti from different periods, including one 20th-century concerto. Demonstration of knowledge and mastery of the general repertoire. Thorough acquaintance with the chamber-music literature involving the candidate's instrument. Preparation of an unfamiliar large-scale work within one week before the final examination. Professional concert maturity.

VIOLA

CONCENTRATION I: Thorough study of technique involving left hand position and bow arm. Scales and arpeggios; etudes such as Kreutzer and Fiorillo; prepared pieces of the styles represented by Ariosti and Handel.

CONCENTRATION II: Continued study of left hand and bow arm technique, scales and arpeggios; prepared pieces such as Handel, *Sonata in C major* and Vivaldi, *Sonata in G minor.* Intermediate examination at this level.

CONCENTRATION III: Continuation of above material. Prepared pieces recommended by teacher. Final examination required.

MAJOR I: Material at level similar to Concentration II.

MAJOR II: Similar to Concentration III.

MAJOR III: Scales and arpeggios through two octaves; studies from the books of Campagnoli, Kreutzer and Gaviniès. Prepared pieces recommended by teacher. Intermediate examination.

MAJOR IV: The performance from memory of a previously approved sonata recital program of approximately one hour duration, consisting of classical, romantic and contemporary works. Suggested works: Bach, *Gamba Sonatas;* Brahms, *Sonata in E flat;* Brahms, *Sonata in F minor;* Honegger, *Sonata;* Marcello, *Sonata in F;* Milhaud, *Sonata No. 1;* Vitali, *Chaconne.* Semifinal examination.

MAJOR V: The performance from memory of a previously approved recital program lasting one hour. The order of the program should be as follows:

1. Unaccompanied Suite — e.g. any one of the sonatas of Bach or Hindemith.
2. Concerto — e.g. any one of the concertos by Bartók, Serly, or Tansman.
3. Group of pieces — e.g. Beethoven, *Variations Op. 66;* Bloch, *Suite;* Schumann, *Maerchenbilder;* Stravinsky, *Elegy;* Weber, *Andante e Rondo Ongarese.* Final examination.

POST-GRADUATE: Intensive study of the literature. Ability to perform two approved recital programs and two concerti from different periods, including one 20th-century concerto. Demonstration of knowledge and mastery of the general repertoire. Thorough acquaintance with the chamber-music literature involving the candidate's instrument. Preparation of an unfamiliar large-scale work within one week before the final examination. Professional concert maturity.

CELLO

CONCENTRATION I: Positioning, fundamental bowing and fingering exercises; scales and arpeggios through two octaves; studies developing lower range of cello; prepared pieces in the styles represented by Corelli, Marcello and Breval.

CONCENTRATION II: Scales and arpeggios through three octaves; double stops through two octaves; studies from Dotzauer, Duport, Matz, Franchomme; prepared pieces to be recommended by teacher. Intermediate examination.

CONCENTRATION III: Scales, etc.; prepared pieces to be recommended by teacher. Final examination.

MAJOR I: Material at a level similar to Concentration II.

MAJOR II: Similar to Concentration III.

MAJOR III: Scales and arpeggios through four octaves; studies by Popper, Diath, Matz; early Beethoven Sonatas, Bach, *Gamba Sonatas;* Saint-Saëns, *Concerto.* Intermediate Examination.

MAJOR IV: The performance of a previously approved sonata recital program of approximately one hour duration consisting of classical, romantic, and contemporary works. Suggested works: Bach, any of the accompanied Gamba Sonatas; Beethoven, any of the sonatas or variations; Brahms, either of the two sonatas: a sonata by Kodály, Prokofieff, Shostakovitch (accompanied). Semifinal examination.

MAJOR V: Three studies from each of the following: Hugo Becker, Popper. In addition, the candidate will have to perform a previously approved recital program of approximately one hour duration. Suggested works: any of the unaccompanied Bach suites; any of the following concertos; Boccherini, Dvorák, Haydn, Lalo, Saint-Saëns, Schumann, Block, *Pieces from Jewish Life;* Cassado, *Suite;* Nin, *Suite;* Popper: selected group of pieces. Final examination.

POST-GRADUATE: Intensive study of the literature. Ability to perform two approved recital programs and two concerti from different periods, including one 20th-century concerto. Demonstration of knowledge and mastery of the general repertoire. Thorough acquaintance with the chamber-music literature involving the candidate's instrument. Preparation of an unfamiliar large-scale work within one week before the final examination. Professional concert maturity.

BASS

CONCENTRATION I: Scales and arpeggios through two octaves studies by Nanny, Simandl.

CONCENTRATION II: Same as above with the addition of studies by Storch-Hrabe and orchestral passages. Intermediate examination.

CONCENTRATION III: Scales and arpeggios through three octaves. Progressive bow- and finger-technique exercises. Bach, *Arioso;* Eccles, *Sonata;* Fauré, *Après un rêve;* Schubert, *Octet and "Trout" Quintet.* Final examination.

MAJOR I: Material at level similar to Concentration II.

MAJOR II: Similar to Concentration III.

MAJOR III: Dragonetti, *Concerto.* The study of orchestral parts from: Mozart, *Magic Flute* and *Marriage of Figaro;* Mozart, *Symphony No. 39;* Weber, Overtures to *Euryanthe* and *Oberon;* R. Strauss, *Till Eulenspiegel.* Intermediate examination.

MAJOR IV: Koussevitzky, *Concerto;* Nanny, Caprice No. 1; Prokofieff, *Quintet;* R. Strauss, *Death and Transfiguration.* Semifinal examination.

MAJOR V: Simandi, *Gradus ad Parnassum* (Twenty-Four Studies); Mozart, *Per questa bella mano-obbligato* FOR Double Bass and Voice; R. Strauss, *Don Juan;* Stravinsky, *Pulcinella.* Orchestral excerpts: Bach, *Suite in B minor,* Bruckner, *Symphonies;* Wagner, excerpts. Final examination.

GUITAR

MR. ANTHONY BARTOS
MR. STEPHEN FENTOK
MR. MICHAEL STRUTT

CONCENTRATION I: All major and minor scales in two octaves, as well as chord progressions. Chromatic in three octaves. Barred chords and left-hand playing of arpeggios. Studies by: Carcassi, Sor. Works by Bach, Weiss, Gauthier, Reussner, de Visée. Modern Spanish School.

CONCENTRATION II: All major and minor scales in two octaves as well as chord progressions. E-F-F sharp-G major and minor in three octaves. Studies for the left hand, *barré* and *arpeggios.* Pieces such as de Visée, *Suite in D Minor:* Tarrega, *Prelude;* Ponce, *Prelude.* Suitable works by Bach and from the 20th century. Intermediate examination.

CONCENTRATION III: Works by: Milan, Mudarra, de Narvaez, le Roy, Valderrabano, Besard, Dowland, Frescobaldi, Weiss, Rameau, Bach, Scarlatti, Sor, Turina, De Falla, etc. Final examination.

MAJOR I: Material at the level of Concentration II.

MAJOR II through V: Major works by the following composers: Milan, Mudarra, De Narvaez, Valderrabano, Le Roy, De Visée, Roncalli, Frescobaldi, J. Dowland, R. Dowland, Besar, Chilesotti, Waissel, Weiss, Gauthier, Bach, Reussner, Rameau, Scarlatti, Sor, Coste, Aguado, De Falla, Giuliani, Tarrega, Turina, Albeniz, Torroba, Pedrell, Tedesco, Tansman, Villa-Lobos, Ponce, Apostel, Martin, Krenek, Henze, Milhaud, Auric, Guarneri, Surinach, Poulenc, Rodrigo, Malipiero, Britten, Uhl, Burkhart, Apivor, Jolivet, Kovats, Stadimair, Baur. Final examination includes a concerto or important chamber work.

Woodwinds

MISS JEANNE BAXTRESSER, *flute (Leave of absence 1975-76)*
MR. MARIO DUSCHENES, *flute*
MS. CINDY SHUTER, *flute*
MR. DONALD HYDER, *oboe*
MR. EMILIO IACURTO, *clarinet*
PROFESSOR GERALD DANOVITCH, *saxophone, clarinet, flute*
PROFESSOR DONALD HUGHES, *saxophone*
MR. ABE KESTENBERG, *saxophone, clarinet*
MR. SIDNEY ROSENBERG, *bassoon*

FLUTE

CONCENTRATION I: Scales and arpeggios in all major and minor keys; Altès, *Flute Method,* Vol. II; Taffanel-Gaubert, *17 Daily Exercises;* Moyse, *Gammes et Arpèges;* Anderson, *18 Studies, Op. 41;* Berbiguier, *18 Etudes;* Sonatas by Handel and Telemann.

CONCENTRATION II: Moyse, *Gammes et Arpèges;* Anderson, *24 Studies, Op. 21;* Koehler, *12 Studies, Op. 33, Book II;* 17th and 18th century concerti. Intermediate examination at this level.

CONCENTRATION III: Andersen, *Etudes, Op. 15* and *33;* Barrere, *The Flutist's Formulae;* Boehm, *24 Caprices, Op. 26;* Moyse, *Scales and Arpeggios.* Chamber music of the 17th and 18th centuries; sonatas by Bach; concerti by Gluck, Grétry and Haydn. Easier contemporary pieces. Sight reading of appropriately graded orchestral excerpts. Final examination.

MAJOR I: Same as Concentration II.

MAJOR II: Same as Concentration III.

MAJOR III: Andersen, *Etudes, Op. 30* and *63;* Hughes, *24 Studies;* Moyse, *Technical Studies and Exercises;* Bach, *Suite in B minor* and *Brandenburg Concerto No. 5;* concertos by Mozart; quartets and trios by Mozart and Beethoven; Debussy, *Syrinx;* Fauré, *Fantasia;* Ibert, *Piece for Solo Flutes;* and similar pieces. Sight reading of appropriately graded orchestral excerpts. Intermediate examination.

MAJOR IV: Andersen, *Virtuoso Studies Op. 60,* Kohler, *8 Exercises, Op. 33,* Book III; Moyse, *Daily Exercises;* Taffanel-Gaubert, *Grandes Etudes de Virtuosité.* Paris Conservatory Pieces. Schubert, *Variations.* Study of orchestral solo passages. Sight reading of appropriately graded orchestral excerpts. Semifinal examination.

MAJOR V: Andersen, *Virtuoso Studies Op. 60;* Moyse, *48 Studies of Virtuosity;* Ibert, *Concerto.* Modern flute solos. Study of orchestral solo passages. Presentation of a previously approved representative recital program. Sight reading of appropriately graded orchestral excerpts. Final examination.

POST-GRADUATE: Intensive study of the literature. Ability to perform two approved recital programs and two concerti from different periods, including one 20th century concerto. Demonstration of knowledge and mastery of the general repertoire. Thorough acquaintance with the chamber music literature involving the flute. Preparation of an unfamiliar large-scale work within one week before the final examination. Professional concert maturity.

OBOE

CONCENTRATION I: Scales. F. Gillet, *Intervals and Staccato;* Sellner, *Exercises in Articulation;* Sellner, *Six First Duos for Two Oboes* (Sonata form).

CONCENTRATION II: Brod, *Twenty Studies;* Sellner, *Six Last Duos for Two Oboes;* Handel, *Sonata in C minor.* Intermediate examination.

CONCENTRATION III: Brod, *Six Advanced Sonatas;* Ferling, *Forty-Eight Studies;* Handel, *Sonata in G minor.* Sight reading of appropriately graded orchestral excerpts. Final examination.

MAJOR I: Same as Concentration II.

MAJOR II: Same as Concentration III.

MAJOR III: Andraud, *Vade-Mecum,* and other studies; Handel, *Concerto in G minor;* Telemann, *Sonata in A minor.* Orchestral repertoire. Sight reading of appropriately graded orchestral excerpts. Intermediate examination.

MAJOR IV: G. Gillete, *Advanced Studies;* Mozart, *Concerto in C major,* and *Quartet for Oboe and Strings.* Orchestral repertoire continued. Sight reading of appropriately graded orchestral excerpts. Semifinal examination.

MAJOR V: Eugene Bozza, *Studies;* Hugo-Bruyany, *Studies;* R. Lamorlette, *Twelve Studies;* Beethoven, *Quintet;* Gordon Jacob, *Concerto;* Mozart, *Quintet;* Vaughan Williams, *Concerto.* Orchestral repertoire continued. Sight reading of appropriately graded excerpts. Final examination.

CLARINET

CONCENTRATION I: Scales and arpeggios in B major and C sharp minor through two and a half octaves; in fourths in F major and A minor. Whole-tone scales to be played legato and staccato throughout clarinet range. Labanchi, *Method;* Mozart, Slow movement from *Concerto in A major, K. 622;* Weber, Slow movement from *Concertos No. 1* or *2;* Weber, Slow movement from *Duo Concertante, Op. 48.*

CONCENTRATION II: Scales and arpeggios in F sharp major and D sharp minor, in fifths in A major and G minor; in thirds or whole-tone scales through two octaves. A. Perrier, *Etudes de Genre*

et d'interprétation; Labanchi, *Studies;* Weber, *Concertino;* Dunhill, *Phantasy.* Intermediate examination.

CONCENTRATION III: All major, minor (melodic and harmonic) and chromatic scales and all arpeggios (common chords, dominant and diminished seventh chords) to be played tongued or slurred and phrased (grouped). Transposition of a given passage one tone up, and a half tone down. V. Blancou, *40 Etudes;* A. Perrier, *Recueil de sonates pour l'étude du style classique* (Books I, II, III). Messager, *Solo de Concours;* H. Rabaud, *Solo de Concours;* Weber, *Concertos 1 and 2;* McGinnis, *Orchestral Excerpts,* Volumes I and II. Sight reading of appropriately graded orchestral excerpts. Final examination.

MAJOR I: Same as Concentration II.

MAJOR II: Same as Concentration III.

MAJOR III: Scales and arpeggios as in Major II. Transposition of a given passage one tone up or down. Carl Baermann, *Method,* Books 3, 4 and 5; P. Mimart, *Studies for Clarinet;* Paul Jeanjean, *16 Etudes;* A. Perrier, *20 Studies of Virtuosity;* Beethoven, *Trio for Clarinet, Cello and Piano;* Brahms, *Sonatas I and II;* P. Gaubert, *Fantaisie pour clarinette et piano;* Mozart, *Trio for Clarinet, Viola and Piano;* McGinnis, *Orchestral Excerpts,* Volumes I and II. Sight reading of appropriately graded orchestral excerpts. Intermediate examination.

MAJOR IV: E. Bozza, *14 Etudes de mécanisme;* A. D. Elia, *12 Studies;* A. Perrier, *22 Etudes modernes;* Brahms, *Trio for Clarinet;* Debussy, *Rapsodie pour clarinette et orchestre;* Louis Spohr, *Concertos;* Robert Stark, *Concertos;* C. M. Widor, *Introduction and Rondo.* Orchestral repertoire. Semifinal examination.

MAJOR V: Transposition of a given passage a minor third up or down. Improvisation of a cadenza. N. Delecluse, *Studies on Orchestral Passages;* Paul Jeanjean, *18 Etudes;* Mozart, *Quintet for Clarinet and Strings;* also quintets of Arthur Bliss, Brahms, Gordon Jacob. Clarinet concertos by Mozart, Busoni, C. Nielsen, Darius Milhaud, Aaron Copland, Nichola Brezovsky. Presentation of a previously approved representative recital program. Sight reading of appropriately graded orchestral excerpts. Final examination.

POST-GRADUATE: Intensive study of the literature. Ability to perform one approved recital program and two concerti from different periods, including one 20th century concerto. Demonstration of knowledge and mastery of the general repertoire. Thorough acquaintance with the chamber music literature involving the clarinet. Preparation of an unfamiliar large-scale work within one week before the final examination. Professional concert maturity.

SAXOPHONE

CONCENTRATION I: Major and minor scales and arpeggios. Chromatic scales. Klose, *Etudes;* Ben Verecken, *Studies,* Book I; Labanchi-Iasilli, Book I.

CONCENTRATION II: Labanchi-Iasilli, Books I and II; Mule-Soussman, Volume I. Advanced studies in chromatics. Transposition. Solos of intermediate difficulty. Intermediate examination.

CONCENTRATION III: Labanchi-Iasilli, Book II and III; Terschak, *Daily Exercises.* Compulsory solo; Tcherepnine, *Sonatine-Sportive.* Transpositions. Advanced solos. Sight reading of appropriately graded orchestral excerpts. Final examination.

MAJOR I: Same as Concentration II.

MAJOR II: Same as Concentration III.

MAJOR III: Ferling, *60 Etudes;* Soussman, *Etudes* (Vol. II); Bozza, *Concertino, Suite* (Scaramouche, Aria, Pulcinella). Compulsory solo: Dautramaille, *Tango and Tarantelle.* One choice solo. Preliminary exercises for top notes. Sight reading of appropriately graded orchestral excerpts. Intermediate examination.

MAJOR IV: Boehm-Terschak, *53 Etudes;* P. M. Dubois, *Concertstueck;* Glazounov, *Concerto.* Compulsory solo, H. Tomasi, *Ballade.* Semifinal examination.

MAJOR V: Advanced scales and exercises for top notes. E. Bozza, *12 Caprices;* Ibert, *Concertino da camera;* Glazounov, *Concerto.* Final examination and recital.

POST-GRADUATE: J. Ibert, *Concerto;* Bonneau, *Caprice en Forme de Valse;* Bozza, *Etudes.* Demonstration of knowledge and mastery of the saxophone's general repertoire and chamber music literature. Preparation of an unfamiliar large-scale work within one week before the final examination. Professional concert maturity.

BASSOON

CONCENTRATION I: Tenor clefs. Major and minor scales. Weissenborn, Book I and II. Milde, Scale studies.

CONCENTRATION II: Legato and staccato. Eugène Jancourt, *Grande Etude pour Basson, Op. 55;* L. Milde, *Twenty-Four Studies in All Keys, Op. 24.* Intermediate examination.

CONCENTRATION III: Review of previous grades. E. Jancourt, *26 Melodic Studies;* Hindemith, *Sonata;* Milde, *Concert-Studies.* Orchestral studies. Sight reading of appropriately graded orchestral excerpts. Final examination.

MAJOR I: Same as Concentration II.

MAJOR II: Same as Concentration III.

MAJOR III: Gambaro, *18 Studies;* Gampieri, *16 Daily Studies;* Milde, *Concert-Studies* (Book I). Concerti by Vivaldi and Mozart, Bach cello suites. Orchestral studies. Sight reading of appropriately graded orchestral excerpts. Intermediate examination.

MAJOR IV: Dherin-Pierné, *New Technique of the Bassoon;* Milde, *Concert-Studies* (Book II); A. Orefici, *Bravura Studies;* L. Grondahl, *Concerto;* Weber, *Concerto.* Orchestral excerpts. Sight reading of appropriately graded orchestral excerpts. Semifinal examination.

MAJOR V: Bertoni, *12 Modern Studies;* Marcel Bitsch, *Twenty Studies;* Bozza, *15 Daily Studies;* Piard, *16 Characteristic Studies;* Bozza, *Fantasie.* Orchestral repertoire. Sight reading of appropriately graded orchestral excerpts. Final examination.

Brass

MR. WILLIAM KARSTENS, *french horn*
MR. THOMAS KENNY, *french horn*
PROF. ROBERT GIBSON, *trumpet*
MR. JAMES RANTI, *trumpet*
MR. TED GRIFFITH, *trombone*
PROF. RICHARD LAWTON, *trombone*
MR. ELLIS WEAN, *tuba*

FRENCH HORN

CONCENTRATION I: Development of basic embouchure; emphasis on tone production, sustained tones, staccato and legato. Major and relative minor scales and tonic triads in three sharps and flats through one and one-half octaves. Rhythmic studies. Solo material with piano as selected by the instructor.

CONCENTRATION II: Major and relative minor scales and tonic triads in five sharps and flats through one and one-half octaves; chromatic scales through two octaves. Schantl, *Studies;* Pares, *Scale Studies;* Alphonse, *Book I;* Horner, *Primary Studies;* Endresen, *Supplementary Studies;* Mozart, *Concert Rondo;* or equivalent. Intermediate examination.

CONCENTRATION III: All major and minor scales; tonic triads; dominant 7th chords through two octaves. Emphasis on tone production, breath support, embouchure development, technique and articulation. Franz, *Grand Method;* Horner, *Primary Studies;* Alfonse, *Book II;* Pieces from Kaufman, *Twelve Solos* or equivalent. Final examination.

MAJOR I: Material at the level of Concentration II.

MAJOR II: Material at the level of Concentration III.

MAJOR III: Extension of range and technique. Tonal focus and dynamic contrast. Elementary use of the right hand. Scales and arpeggios through two and one-half octaves; transposition to E flat. Kopprasch, *Book I;* Alphonse, *Book III;* Pottag, *Book II,* or equivalent. One or two selections from: Kaufman, *Twelve Solos;* L. Mozart, *Concerto;* Saint-Saëns, *Romance;* or equivalent. Appropriate orchestral excerpts. Intermediate examination.

MAJOR IV: Extension of range and dynamics, flexibility, endurance, and breadth of tone. Use of right hand, intonation, style and phrasing. All scales, intervals, and arpeggios through three octaves. Transposition to B flat, C, D, and E. Two contrasting studies from Kopprasch, *Book II;* Alphonse, *Book IV;* Pottag, *Book III;* or equivalent. Two selections from Mozart, *Concerto;* Corelli, *Sonata;* or equivalent. Appropriate orchestral excerpts. Semifinal examination.

MAJOR V: Daily routine. Advanced techniques. All transpositions. Alfonse, *Books V-VII;* Kling, *Etudes;* Gugel, *Studies;* or equivalent. Mozart *Concertos;* Beethoven, *Sonata;* Strauss, *Concerto, Op. 8,* or equivalent. Appropriate orchestral excerpts. Final examination.

TRUMPET

CONCENTRATION I: Development of basic embouchure, emphasis on tone production, sustained tones, staccato and legato. Major and relative minor scales and tonic triads in three sharps and flats through one and one-half octaves. Rhythmic studies. Other material chosen by instructor.

CONCENTRATION II: Major and relative minor scales and tonic triads in five sharps and flats through one and one-half octaves; chromatic scales through two octaves. Arban, *Méthode;* Hering, *40 Progressive Studies;* Endresen, *Supplementary Studies.* Balay, *Pièce Concertante* or equivalent. Intermediate examination at this level.

CONCENTRATION III: Final examination. All major and minor scales; tonic triads; dominant 7th chords through two octaves. Transposition to C. Schlossberg, *Daily Drills;* Concone, *50 Lessons;* Clarke, *Technical Studies;* Williams, *Method;* Godicke, *Concert Etude;* Balay, *Prélude et Ballade.* Orchestral excerpts. Final examination.

MAJOR I: Material at the level of Concentration II.

MAJOR II: Similar to Concentration III.

MAJOR III: Extension of range, technique, tonal focus, and dynamic control. Development of legato, registration, double-tonguing and use of first and third valve slides. All scales, arpeggios and 7th chords through two and one-half octaves. Transposition to A, D, and E flat. Saint Jacombe,

Méthode; Sachse, *100 Etudes;* Bordogni, *24 Vocalises;* Kopprasch, *Book II;* Caffarelli, *100 Melodic Studies;* Chaplavsky, *Valse Caprice;* Torelli, *Concerto;* Enesco, *Legende.* Orchestral excerpts. Intermediate examination.

MAJOR IV: Extension of range and dynamics, flexibility, endurance, and breadth of tone. Style, phrasing and intonation. All scales, intervals, and arpeggios. Transposition to A flat, B, E and F. Bousquet, *36 Celebrated Studies;* Brandt, *Book I;* Petit, *15 Etudes;* Glanz, *Book I;* Tomasi, *6 Etudes;* Kopprasch, *Book II;* or equivalent. Haydn, *Concerto;* Hummel, *Concerto;* Wal-Berg, *Concerto;* Mozart, *Concerto;* or equivalent. Appropriate orchestral excerpts. Semifinal examination.

MAJOR V: Daily routine. Advanced techniques: drills, double- and triple-tonguing. All transpositions. Charlier, *36 Etudes Transcendantes;* Brandt, *Book II;* Bitsch, *20 Etudes;* Glantz, *Book II;* Broiles, *Studies and Duets;* or equivalent. Godicke, *Concerto;* Hindemith, *Sonata;* Giannini, *Concerto;* Bohrnstedt, *Concerto;* Saint-Saëns, *Concerto in E flat;* or equivalent. Appropriate orchestral excerpts. Final examination.

TROMBONE

CONCENTRATION I: Development of basic embouchure, emphasis on tone production, sustained tones, staccato and legato. Major and relative minor scales and tonic triads in three sharps and flats through one and one-half octaves. Rhythmic studies. Arban, *Method;* Rochut, *Book I.*

CONCENTRATION II: Major and relative minor scales and tonic triads in five sharps and flats through one and one-half octaves; chromatic scales through two octaves. Arban, *Method;* Blume, *Studies, Book I;* Rochut, *Book I;* Schantl, *Studies.* Pieces such as Barat, *Andante* and *Allegro;* Croce-Spinelli, *Solo de Concours.* Intermediate examination at this level.

CONCENTRATION III: All major, minor and chromatic scales and arpeggios through two octaves. Tenor clef. Blume, *Book I;* Concone, *Selected Studies;* Blazevitch, *Legato Studies;* Rochut, *Book I;* Guilmont, *Morceau Symphonique;* Blazevitch, *Concert Piece No. 5.* Final examination.

MAJOR I: Material at the level of Concentration II.

MAJOR II: Material at the level of Concentration III.

MAJOR III: Extension of range, technique, tonal focus and dynamic contrast. Scales and arpeggios through two and one-half octaves. Kopprasch, *Book I;* Blazevitch, *Clef Studies;* Rochut, *Book II;* Blume, *Book II;* Nahlfeld, *Concertstück;* Desportes, *Fantasie in B flat.* Orchestral excerpts. Intermediate examination.

MAJOR IV: Extension of range, flexibility, endurance and breadth of tone. Use of Alto and Tenor Clefs. Blazevitch, *26 Sequences;* Blume, *Book III;* Rochut, *Book III;* Sanders, *Sonata in E flat;* Glaubert, *Morceau Symphonique;* Rimsky-Korsakov, *Concerto.* Orchestral excerpts. Semifinal examination.

MAJOR V: Lafosse, *Method;* Ostander, *F-Attachment;* Rochut, *Book III;* Hindemith, *Sonata;* McKay, *Sonata;* Hartley, *Sonata Concertante.* Orchestral excerpts. Final examination.

TUBA

CONCENTRATION I: Development of basic embouchure, emphasis on tone production, sustained tones, staccato and legato. Major and relative minor scales and tonic triads in three sharps and flats through one and one-half octaves. Rhythmic studies. Schanti, *Studies;* Eby, *Book I.*

CONCENTRATION II: Major and relative minor scales and tonic triads in five sharps and flats through one and one-half octaves; chromatic scales through two octaves. Pares, *Scale Studies;* Eby, *Book I;* Arban, *Method;* Endressen, *Supplementary Studies.* Pieces such as: Cohen, *Romance and Scherzo.* Intermediate examination at this level.

CONCENTRATION III: All major and minor scales, tonic triads, dominant 7th chords through two octaves. Transposition down one octave. Schlossberg, *Daily Drills;* Bell, *Book I; Studies.* Solos such as Tcherepnin, *Andante;* Walters, *Tarantelle.* Final examination.

MAJOR I: Material at the level of Concentration II.

MAJOR II: Material at the level of Concentration III.

MAJOR III: Extension of range, technique, tonal focus and dynamic control; broken arpeggios, development of legato style, double-tonguing and use of fourth valve. All scales and chords through two and one-half octaves. Treble clef study. Kopprasch, *Book I;* Lachmon, *26 Etudes;* Bach, *Air and Bourrée;* Troje-Miller, *Sonatina Classica;* Sowerby, *Chaconne.* Orchestral excerpts. Intermediate examination.

MAJOR IV: Extension of range, flexibility, endurance and breadth of tone. Scales in thirds, development of melodic style, phrasing, intonation, triple-tonguing and use of alternate fingerings. Tenor clef. Kopprasch, *Book II;* Blazevitch, *Book I;* Rochut, *Book II;* Blume, *Book III;* Dubensky, *Fantasy;* Bozza, *Allegro et finale;* Mozart, *Concerto, K. 447.* Orchestral excerpts. Semifinal examination.

MAJOR V: Advanced techniques, development of solo style, jazz idioms; use of F and C tubas. Transposition. Muller, *Technical Studies;* Blazevitch, *Book II;* Rochut, *Book III;* Belgiudice, *12 Etudes;* Bernard, *40 Etudes;* Bach, *Studies for Unac-*

companied Cello; Hindemith, *Sonata;* Vaughan Williams, *Concerto;* Beversdorf, *Sonata;* Strauss, *Concerto, Op. 11.* Orchestral excerpts. Final examination.

Percussion

PROF. PIERRE BELUSE

CONCENTRATION I: Elementary snare drum exercises; major and minor scales on keyboard percussion instruments.

CONCENTRATION II: Snare drum studies from V. Delécluse, *Méthode de Caisse-Claire;* studies for keyboard percussion instruments from V. Delécluse, *Méthode de Vibraphone;* Béluse, *Basic Tympani Technique.* Intermediate examination.

CONCENTRATION III: Advanced snare drum studies from V. Delécluse, *Méthode de Caisse-Claire;* snare drum solos from Wilcoxson's *Swing Solos;* advanced studies for keyboard percussion instruments; Delécluse, *Trente Etudes pour Timbales.* Selected repertoire. Final examination.

MAJOR I: Material at the level of Concentration II.

MAJOR II: Material at the level of Concentration III.

MAJOR III: Delécluse, *Méthode de caisse-claire; Vingt études* (d'après Kreutzer); *Méthode de vibraphone; Vingt études pour timbales;* Wilcoxson, *Swing Solos.* Selected repertoire. Intermediate examination.

MAJOR IV: Delécluse, *Douze études pour caisse-claire, Nos. 1-6; Vingt études* (d'après Kreutzer); *Méthode de vibraphone; Vingt études pour timbales,* Nos. 10-14. Selected repertoire. Semifinal examination.

MAJOR V: Delécluse, *Douze études pour caisse-claire,* Nos. 7-12; *Vingt études pour timbales,* Nos. 15-20; selected excerpts from the orchestral and contemporary repertoire. Final examination and recital.

CALENDAR FOR SESSION 1975-1976

1975

August 12, Tuesday to August 22, Friday	Supplemental examinations
September 9, Tuesday to September 12, Friday	Registration: M.A. and Ph.D. candidates — Islamics Institute
September 11, Thursday	Registration: B.Th. all years (9 a.m. to 5 p.m., Currie Gymnasium)
September 11, Thursday	Registration: S.T.M. and M.A. candidates (9 a.m. to 2 p.m. W. and H. Birks Building)
September 12, Friday	Registration: Doctoral candidates (9 a.m. to 2 p.m., W. and H. Birks Building)
September 16, Tuesday	ALL CLASSES BEGIN
September 18, Thursday	Assembly At Noon
September 29, Monday to October 3, Friday	Last day for changes in Fall term and sessional courses
September 30, Tuesday and October 1, Wednesday	Alumni Reunion and the Birks Lectures: Dr. Gregory Baum
October 13, Monday	Thanksgiving Holiday
November 5, Wednesday	Fall Convocation
December 15, Monday	Last day of classes
December 16, Tuesday to December 19, Friday	Study Period or Class Tests

1976

January 5, Monday to January 14, Wednesday	Examinations in Fall term courses (if required)
January 15, Thursday	Winter Term begins
February 2, Monday	Last day for applying for Graduate Fellowships
February 13, Friday and February 14, Saturday	Mid-Term holiday
April 16, Friday to April 19, Monday	Easter
April 14, Wednesday	Last day of classes
April 20, Tuesday to May 7, Wednesday	Examinations in Winter term courses (if required)
June 8, Tuesday to June 9, Wednesday	Convocations

Specialist Librarian

2 GENERAL INFORMATION

The Faculty of Religious Studies is located in the handsome building (erected in 1930) known as the William and Henry Birks Building, formerly Divinity Hall, at 3520 University Street, Montreal, Que. H3A 2A7 (Telephone 514—392—4828). Besides the usual classrooms, offices, and common rooms,this building contains a lovely Chapel in the Collegiate style and a library, with a pleasant reading room and access to the stacks for all authorized readers.

The Institute of Islamic Studies was founded in 1952. It is presently located in the Leacock Building (8th and 9th floors).

The Faculty was known as the Faculty of Divinity until 1970. It has an interesting history that goes back to the pioneering ecumenical days of 1912 when four Theological Colleges in Montreal, the Congregational, Montreal Diocesan Theological College, Wesleyan Methodist, and Presbyterian, formed a Joint Board for academic study, leaving each denominational College to provide its own professional training for various types of Christian ministry. All these Colleges had become affiliated with McGill in the nineteenth century and it was natural that negotiations should lead to the creation in 1948 of a Faculty of Divinity that assumed the academic functions of the Joint Board.

Soon after its founding, the Faculty of Divinity was allowed to introduce programs leading to the S.T.M. degree and to the Ph.D. This graduate work has grown enormously since 1964. At the same time an increasing number of students took courses in Religion offered by the Divinity teaching staff to those enrolled for degrees in other Faculties and Schools. Changes in the educational policy of the Provincial Government added to the pressures for change.

Consequently, the name of the Faculty was changed in order to reflect its total offerings and orientation; a major program in the B.A. degree course was introduced to be a basis for graduate work; and new regulations were approved for B.Th., M.A. and Ph.D. degrees. Revised regulations for the S.T.M. degree were approved in 1973.

The B.Th. is a first professional degree, but it does not in itself qualify the recipient for employment in religious institutions. It is expected that the three associated Theological Colleges — Montreal Diocesan Theological College of the Anglican Church of Canada, the Presbyterian College, Montreal, the United Theological College of The United Church of Canada, all located in close proximity to the University campus — will continue to direct their ordination candidates and other students to proceed by way of an accredited B.A. (or the equivalent) either to the B.Th. or the S.T.M. Because of the financial support given by the Colleges to the University Faculty, tuition fees are remitted to those who are duly registered in a Theological College as candidates for the Christian

ministry. (Students should consult the College Principals for further information about Church requirements and the common year of professional training and supervised field education which is provided in the Montreal Institute for Ministry for those who have graduated with the B.Th. or the S.T.M.)

The Faculty as well as the Colleges strongly urge prospective students to complete a B.A. with honours or a major in religious studies (i.e. over 50% of the course work), with a view to entering the S.T.M. program if possible. (See Sec. HONOURS AND MAJOR PROGRAMS IN RELIGIOUS STUDIES below).

It should be noted that one biblical language, usually Greek, is required by some of the Churches. Ministerial students are encouraged to qualify in Greek *before* entering this Faculty; but arrangements will be made to assist those who have been unable to do so. Specific information about degree programs in the Institute of Islamic Studies will be found on page 19, and in the *Announcement of the Faculty of Graduate Studies and Research.*

Advanced Standing

Entrants who have a B.A. or equivalent degree may be admitted to B.Th 2.

Applicants who have an accredited B.D. or M.Div. with good second class standing, in addition to a recognized B.A., may complete the S.T.M. in one year or may enter the M.A. program.

Application and Registration

a) Intending candidates for the B.Th. should submit to the Dean an application with supporting documents as early as possible and not later than August 1, 1975. Supporting documents are: official transcripts of previous academic work, and two letters of reference.

b) Registration for the B.Th. will take place on September 11, 1975. Those who register later will be required to pay a special fee unless exempted by the Registrar.

c) For the S.T.M., M.A. and Ph.D. degrees applications must be made with the necessary transcripts and letters of reference to the *Dean of Religious Studies* in order that appropriate recommendations may be made to the Faculty of Graduate Studies and Research which ultimately controls all advanced degree programs. Applications for the M.A. and Ph.D. programs in Islamic Studies should be sent to the Director of the Institute.

d) The sessional *inscription* of returning graduate students and new admissions to graduate study is conducted by mail. Forms and fee sheets are sent out in May and June each year and these should be returned to the Dean of Religious Studies by the date indicated.

Candidates for Master's degrees must register on September 11 and Ph.D. candidates similarly on September 12. Candidates who have received permission to be non-resident may attend in person to pay the fee or may send it by mail.

Classes of Students

FULL-TIME

Students who are admitted to the B.Th. program and who are taking not less than 12 credits per term.

PART-TIME

Students in a degree program who are not full-time, i.e. students taking fewer than 12 credits per term if in satisfactory standing, or fewer than 10 credits if in probationary standing.

VISITING

A visiting student is one who is taking courses at McGill for credit at another university.

SPECIAL

Students not registered as proceeding to a degree but who receive the permission of the Dean and Faculty to undertake certain regular credit courses.

GRADUATE

Students of this Faculty who are enrolled in the Faculty of Graduate Studies and Research as candidates for the degrees of S.T.M., M.A. and Ph.D.

Academic Credit Transfer Agreement

See *General Announcement.*

Fees

(1) **In the B.Th. Program** tuition fees are $19.00 per credit (hence $570.00 for the normal full load of 30 credits per session).
There is also a fee of $60.00 for Student Services and $25.00 for the Students' Society. Ministerial candidates, however, do not pay tuition fees.

(2) **Part-time, Special** and **Visiting** students pay $19.00 per credit tuition; and in addition

(a)	If taking between 18 and 23 credits:	
	Student Services	- $60.00
	Students' Societies	- $25.00
(b)	If taking more than 9 but less than 18 credits:	
	Student Services	- $30.00*
	Students' Societies	- $10.00
(c)	If taking 9 credits or less:	
	Student Services	- $15.00
	Students' Societies	- $10.00
(d)	Visiting students taking a full time load (24 or more credits) will pay:	
	Student Services	- $60.00
	Students' Societies	- $25.00

(3) **Graduate Studies**

1st Year Master's - Tuition $570.00; Student Services $60.00; Students' Society $29.50.
2nd Year Master's - Tuition $285.00; Student Services $30.00; Students' Society $29.50.
Beyond 2nd Year Master's - Tuition $40.00; Student Services $30.00; Students' Society $29.50.
1st to 3rd Year Doctorate - Tuition $570.00; Student Services $60.00; Students' Society $29.50.
Beyond 3rd Year Doctorate - Tuition $40.00; Student Services $30.00; Students' Society $29.50.

(4) **Special Fees**

Application for Admission	$15.00
Late Registration	$25.00
Late Payment fee (after specified date)	
1st 30 days	$10.00
After 30 days	$25.00
Graduation Fee	$10.00
Duplicate Student I.D. card	$ 5.00
Re-reading examination paper	$10.00
Supplementals (each paper)	$10.00
Certified Transcripts	
First 2 copies, each	$ 1.00
Additional copies (at same time)	$ 0.25
Duplicate Diploma	$10.00

*Excludes Athletics. At the discretion of the Director of Athletics, a student may participate in the Athletics program upon payment of an additional $30.00.

**Students already at McGill who are making application to a professional faculty or to the Faculty of Graduate Studies and Research (with the exception of the M.B.A. program) are not required to pay this fee.

***Graduation Fee: Applications by students who expect to graduate at the Spring Convocation must be filed by March 1st of each year and by those who expect to graduate at the Fall Convocation by August 1st of each year. An application form will be mailed to each eligible student and must be returned to the Registrar's Office together with the graduation fee of $10.00 by the appropriate date listed above. This fee will cover all expenses in connection with graduation including academic dress. It is the student's responsibility to ensure that his or her name is included in the graduation list.

Regulations For Payment Of Fees

1. Students entering the University for the first time and those returning in Graduate Studies are required to pay their fees either by mail or in person at the Accounting Office within 10 days of registration. For students registering in September the second instalment is due before January 15, 1976.

2. Returning students (except those in Graduate Studies) must pay one half of the total required fee by mail or in person to the Accounting Office before August 23, 1975, otherwise they will not be permitted to register. Instructions for paying fees in advance will be mailed to all returning students, either with their Sessional Reports of Standing or a short time later. Students who have been notified by the University of the award of a scholarship, bursary or student loan, and who require this award for

payment of the first instalment of fees, must obtain permission to delay payment of fees from the Student Aid Office.
The second instalment is due by January 15, 1976. A late payment fee as stated above is charged for payment after the specified dates.

3. Students registering late must pay their fees at the time of registration, failing which they become subject to the late payment fee and the provisions of the following paragraph:

> As soon as possible after the prescribed dates for the payment of fees the Chief Accountant will send to the Registrar's Office a list of the registered students who have not paid their fees. Reports of standing, transcripts of record and diplomas will be withheld until such time as the fees are paid or a satisfactory arrangement is made with the Chief Accountant.

Regulations Concerning Withdrawal

A student who wishes to withdraw from the University or from certain courses (whether or not he wishes to apply for remission of fees) must secure the permission of the Dean or Associate Dean of his Faculty. The Office of the Associate Dean will supply the necessary form which must be completed and submitted. Students withdrawing from all their courses must attach their Student Identity Card to the withdrawal form. A student considering withdrawal is strongly advised to consult his Dean or Associate Dean before making a final decision.

Fees for the term in which the student withdraws are refundable as follows and apply to *course* withdrawal as well as to *complete* withdrawal from the University:

Fall Term

Up to October 17	100% – $50
October 18 - 31	50%
November 1 - 21	25%
After November 21	No refund

Winter Term

Up to February 20	100% – $50
February 21 - 29	50%
March 1 - 19	25%
After March 19	No refund

A student wishing to apply for a refund of fees must consult with the Registrar's Office.

Examinations

The pass mark in B.Th. courses is 55% for "satisfactory" standing (see page 11 "Regulations for the B.Th. degree"); S.T.M. and M.A. courses 65% and in Ph.D. courses 70%.

First class standing in the doctoral program, the S.T.M. and the M.A. is 80% and over; in the B.Th. standing is expressed by a Grade Points Average (see GRADING).

3 FELLOWSHIPS, SCHOLARSHIPS AND AWARDS

See *General Announcement for Undergraduate Awards and the Postgraduate Awards. Fellowships and Bursaries for awards open to graduate students.*

THE CREDIT SYSTEM

CREDIT REQUIREMENTS

a) All full courses in Religious Studies have a value of 6 credits.

b) A total of 90 credits must be accumulated in order to qualify for the B.Th. degree. The normal course load in any academic session is five full courses – 30 credits.

c) Not more than 30 credits may be allowed for courses taken before coming to McGill, or in study undertaken or subjects passed in an unorthodox but approved manner.

Grading

a) Competence in a course may be determined by examinations and/or essays, or by other means chosen by the instructor and approved by the Dean.

b) The following grades are used:

A – 80%	– 100%	= 4 points
B – 65%	– 79%	= 3 points
C – 55%	– 64%	= 2 points
D – 45%	– 54%	= 1 point
F – 0%	– 44%	= 0 points

c) Grades A, B and C are satisfactory passes. D is a conditional pass; F is a failure.

d) A Grade Point Average (GPA) is obtained by multiplying the grade points by the credit weight and dividing the total of these products by the total credits attempted.

A Cumulative Grade Point Average (CGPA) is compiled, using all the student's B.Th. work to date.

Standing

a) There are three categories of standing:

Satisfactory:	a GPA of 2.0 or better.
Probationary:	a GPA between 1.5 and 1.9.
Unsatisfactory:	a GPA below 1.5.

b) A student with a *high* GPA (at least 3.2) may take more than the normal five full courses and is encouraged to do so.

c) A student with *probationary* standing will be allowed to take no more than four full courses and must raise his average to satisfactory standing within one year.

d) A student with *unsatisfactory* standing will have to withdraw, or seek readmission as a probationary student with special permission from the B.Th. Committee and the Dean.

e) The overall record (CGPA) must be *satisfactory* before a student can be recommended for the degree.

f) Normally a student must accumulate the required 90 credits within a period of *five years* from the date of entrance into the B.Th. program.

g) Qualification for the *award* of the degree shall include satisfactory standing in all required courses, and the accumulation of sufficient acceptable credits through optional courses to make a total of 90 credits.

h) The B.Th. degree may be awarded *With Honours* if a student has accumulated 96 credits (i.e. one additional full course with a grade of B or better) and if his CGPA is 3.2 or better.

NOTE: It is understood that students from the associated Theological Colleges have to fulfil certain Church requirements. Their choice of electives is to be made in consultation with the Principal of their College. But the University expects such students to give full time study to their academic courses for the B.Th. Professional and vocational courses (e.g. leading to ordination) are expected to follow the completion of the B.Th. degree.

4 COURSES OF INSTRUCTION

The Honours and Major Programs In Religious Studies

(available as part of the McGill B.A. Curriculum)

For general information on courses and Honours and Major programs, consult the Adviser, Professor Boorman, Room 207, phone 392-4834. For specific course information consult the instructor.

Honours and Major students must consult the Adviser prior to registration each year.

HONOURS AND RELIGIOUS STUDIES

The Honours program in Religious Studies offers a degree of analysis and concentration beyond that of the Major program, through course work, intensive research and discussion with peer groups.

There are no prerequisites for entry to the program which will normally be at the beginning of the first year. Students must maintain a GPA of 2.8; or 3.5 for First Class Honours. The program consists of a minimum of 66 credits chosen as follows:

1) At least 48 credits from the Religious Studies courses described below. (Honours students may also choose from the B.Th. program in this calendar, and certain courses in the Jewish Studies Program, after consultation with the Adviser. In special cases, permission may be given for admission to graduate seminars in the Faculty of Religious Studies.) Among these the following are required: 201A and 202B, 252A and 253B in U1; the Honours Colloquium (3 credits) in U2 and U3; one course (6 credits) in a religious tradition other than the student's own in U2 or U3.

2) Up to 18 credits from approved Related Courses (see below).

JOINT HONOURS IN RELIGIOUS STUDIES

Please consult the Adviser for latest information.

MAJOR IN RELIGIOUS STUDIES

A Major in Religious Studies consists of 54 credits as follows:

1) At least 36 credits are to be chosen from the Religious Studies courses described below. (Major Students may choose their courses from the list below; but also from the B.Th. program in this calendar, and certain courses in the Jewish Studies Program, after consultation with the Adviser.) Students must choose at least one full course (6 credits) in a tradition other than their own.

2) Up to 18 credits to be chosen from approved Related Courses (see below).

INTERDISCIPLINARY MAJOR programs may be arranged in consultation with the Adviser. Joint programs are in operation between Religious Studies and Classics, Philosophy and Art History.

Course Descriptions

260-201A RELIGIOUS TRADITIONS OF THE ANCIENT NEAR EAST. The religions of ancient Egypt and Mesopotamia; a brief consideration of religion in general, its origin, nature and study; a consideration of the geographical, historical and cultural conditions which influenced religious expression.
D. R. Runnalls

260-202B. RELIGIOUS TRADITIONS OF THE ANCIENT NEAR EAST. The religion of ancient Israel in the setting of the Ancient Near East; from

Abraham to Ezra, continuity and discontinuity with Egypt and Mesopotamia.
D. R. Runnalls

260-252A. HISTORY OF RELIGIONS. An introduction to the subject, a consideration of primitive religions, a survey of the main elements of Hindu and Buddhist thought, belief and practice.
R.W. Stevenson

260-253B. An introductory survey of the main elements of Jewish, Christian and Muslim thought, belief and practice.
R.W. Stevenson

260-280D. NEW TESTAMENT GREEK. (6 credits) An introduction to the language.
J.C. Kirby and Staff

260-300A. POST-BIBLICAL JEWISH TRADITION. (3 credits) The origins of Rabbinic Judaism: a survey of Jewish history and thought from Ezra to the Tannaim; oral tradition; Torah interpretation in the Mishnah and Midrashim.
D.R. Runnalls

260-301B. POST-BIBLICAL JEWISH TRADITION. (3 credits; prerequisite; 260-300A or the consent of the lecturer.) The religion and literature of sectarian groupings: apocalyptic thought; wisdom; Dead Sea Scrolls; Josephus.
D.R. Runnalls

260-310D. THE NEW TESTAMENT — ITS MAKING AND MEANING. (6 credits) The beginnings of the Christian Movement: the mission and achievement of Jesus. Early Christian Missions and the growth of institutions. 260-201A and 260-202B are desirable but not mandatory previous courses.
J.C. Kirby

260-320D. A HISTORY OF CHRISTIAN THOUGHT. (6 credits) A survey of the development of Christian thought from the post-apostolic period to the present day, in relation to the concurrent cultural and philosophical movements. The work of prominent Christian thinkers, ancient, medieval and modern, will receive special attention.
D.J. Hall

260-322A. THE ANCIENT CATHOLIC CHURCH (TO A.D.325). (3 credits) This course covers the growth of the Christian tradition in the period from the reign of Nero to the Council of Nicaea A.D.325. Special attention is paid to the setting within Roman Imperial History. Lectures are given on the outstanding teachers of the Christian faith.
E.G. Jay

260-323B. THE ANCIENT CATHOLIC CHURCH (A.D.325-604). (3 credits) This course is a continuation of 322A and covers the period from A.D.325 to 604. Special attention is paid to the development of Christian theology, the Eastern Byzantine Church and the significance of the Papacy.
E.G. Jay

260-341A. INTRODUCTION TO PHILOSOPHY OF RELIGION. See B.Th. program.
J. C. McLelland

***260-361A. RELIGIOUS BEHAVIOUR:** A study of some significant aspects of religious life (e.g. worship, mysticism, prayer) and some contemporary religious phenomena (e.g. glossolalia, chemical esstasy). Religious growth and the religious personality are also considered.
M. Peaston

260-371B. THE HUMAN CONDITION. (3 credits) A critical examination of representative theories about man, his situation and his values in the light of traditional interpretations of Christian anthropology and ethics, together with an attempt to formulate some contemporary clues in response to man's search for meaning. No prerequisites; but Biology 177-013A and 014B — "Collaborative Studies in Science and Human Affairs" — would be an excellent preparatory course.
J.A. Boorman

260-375A. RELIGIOUS MAN. From within a Christian perspective, this course will study contemporary cultural and institutional shifts away from the classical perspective on man and the impact of such shifts on the process of man's becoming religious. Some of the political, environmental and theological options will be considered briefly.
E.K. Malloy

260-380D. ADVANCED NEW TESTAMENT GREEK. (6 credits) Advanced course in the language with reading of selected biblical texts.
J.C. Kirby

260-390D. HEBREW LANGUAGE. (6 credits) Introduction to the language.
D.R. Runnalls

260-450D. THE ISLAMIC TRADITION. (6 credits) The Islamic Community and the elements of its tradition — scripture, prophet, doctrine, practices, institutions — considered historically and in terms of religious meaning.
C.J. Adams

260-451D. THE HINDU TRADITION. (6 credits) An introduction to the Hindu religious tradition, its history, faith and practice.
Staff

260-490D. ADVANCED BIBLICAL HEBREW. (6 credits) Advanced course in the language.
R.C. Culley

260-496A. SPECIAL STUDIES. (3 credits) Topics to be arranged
Staff

260-497B. READING AND RESEARCH FOR MAJOR STUDENTS. (3 credits)
Staff

260-498B. RESEARCH SEMINAR. (3 credits)
Staff

260-499A. TOPICS TO BE ARRANGED FOR MAJOR STUDENTS. (3 credits)
Staff

397-110D. ELEMENTARY ARABIC (6 credits)
Staff

397-220D. INTERMEDIATE ARABIC (6 credits)
Staff

397-300D. ADVANCED ARABIC (6 credits)
Staff
** Not given in 1975-76*

Languages

Arabic is taught by the staff of the Institute of Islamic Studies and students taking it must fulfil the requirements of the Institute.

Students taking other introductory language courses in Religious Studies programs are strongly advised to take the advanced course also.

Instruction in the languages of some other religious traditions (such as Ancient Egyptian and Sanskrit) may be available in any given year. Ask the Adviser for further information.

Related Courses

Students taking these courses must fulfil any requirements (permission from the Dean, prerequisites, grades, etc.) laid down by the faculty or department concerned.

This list of courses is not complete since courses and course numbers may change from year to year. Other courses may be considered appropriate by the Adviser, depending upon their content, and the student's interests and qualifications.

ANTHROPOLOGY 151-203A, 209B, 210B, 215B, 313B, 327B, 331B, 440B.

ART HISTORY, 123-211A, 212B, 222D, 223A, 224B, 312A, 313B, 315B, 343B, 344B, 414D.

CLASSICS, 114-200A, 201D, 202B, 203A,B, 302B, 308B, 310B, 471D, 472D, 473A.

SOCIOLOGY, 166-315A, 405B

Interdisciplinary Major

Programs may be arranged in consultation with the Adviser. Joint programs are in operation between Religious Studies and Art History, Classics and Philosophy.

Regulations For The B.Th. Degree

ADMISSION

Admission to the B.Th. is granted to any qualified person, whatever his religious affiliation, who wishes to pursue studies in religion and theology at first degree level. In the Province of Quebec the B.Th. fulfils the requirements for a "first professional degree".

Candidates shall normally be required to give satisfactory evidence of one of the following before their enrolment for this degree:

a) The Diploma of Collegial Studies (D.C.S.) of a Quebec CEGEP. This should normally include a course of Introduction to World Religions, and may also include other courses in the study of religion;

b) Equivalent standing to CEGEP from another Canadian province or from a country with a different system of post-secondary education. This may include at least one successful year of study in a recognized University or College (e.g. first year Arts in a four year pass Arts degree); in some cases additional credits in Arts may be required from students not educated in Quebec;

c) A bachelor's degree in Arts or Science or Engineering or Commerce or Education or Music or the like, whether it contains courses in religion or theology, or not. Those who hold such a degree will in most cases be admitted directly to B.Th.2.

d) The *minimum* requirement for admission to B.Th.2 is one full year of post-CEGEP studies in Arts, but acceptance of applicants with these minimal qualifications is at the discretion of the Faculty.

THE PROGRAM

The course extends over three academic sessions for those admitted under (a) and (b) above, and two academic sessions for those admitted under (c).

The normal load consists of five half courses (15 credits) each term. Some courses are "required", others are "elective". Students who have already done equivalent work, or who are not ordination candidates, may be permitted to take electives in either this or some other Faculty in lieu of "required" courses.

Course selections should be discussed with the Chairman of the B.Th. Committee prior to registration.

B.Th. Courses 1975 — 76

B.Th.1

Candidates who are not concentrating on Christian Theology will arrange to take five courses in consultation with the Chairman of the B.Th. Committee. These may be chiefly in the Faculty of Arts and in the Religious Studies programs (see above).

Ministerial students and others majoring in the Christian tradition should take 252A and 253B History of Religion; and electives chosen with the approval of College Principals and the B.Th. committee.

260-252A. HISTORY OF RELIGIONS. An introduction to the subject, a consideration of primitive religions, a survey of the main elements of Hindu and Buddhist thought, belief and practice.
Staff

260-253B. HISTORY OF RELIGIONS. An introductory survey of the main elements of Jewish, Christian and Muslim thought, belief and practice.
Staff

B.Th.2

The following courses are required of ministerial ordination candidates:

260-303D. OLD TESTAMENT STUDIES, (6 credits) Reading and interpreting representative selections from the Old Testament in English translation, with some attention to approaches developed by historical-critical scholarship and to background information such as history, geography, and archaeology.
R.C. Culley

260-310D. THE NEW TESTAMENT: ITS MAKING AND MEANING. (6 credits) The beginnings of the Christian Movement: the mission and achievement of Jesus. Early Christian Missions and the growth of institutions. Religion 260-201A and 260-202B are desirable but not mandatory previous courses.
J.C. Kirby

260-324D. THE CHURCH IN HISTORY. A survey of the main developments in the history of Christianity from the end of the apostolic age to the present. Use will be made of selected readings from primary and secondary sources.
H.K. Markell

260-333B. PRINCIPLES OF CHRISTIAN THEOLOGY I. (3 credits) An introduction to the central categories of Christian theology. The course will include discussion of the nature of theology, and of all the primary areas of doctrine (Theology, Christology, Pneumatology, Anthropology, Ecclesiology, Eschatology). Throughout, a conscious attempt will be made to reflect on the Christian faith in the light of the contemporary apologetic situation.
D.J. Hall

260-341A INTRODUCTION TO PHILOSOPHY OF RELIGION. (3 credits) For those lacking a comparable undergraduate course. Surveys the basic themes of the subject, including theistic arguments, values and destiny, the problem of evil, religious language.
J.C. McLelland

Other candidates will arrange their course load in consultation with the Chairman of the B.Th. Committee.

B.Th.3

Ordination candidates take the following required courses:

260-453B. INTRODUCTION TO WORLD RELIGIONS. (3 credits) A study of elements of the major religious traditions and a consideration of some problems of the Christian approach to other traditions.
Staff

260-434A. PRINCIPLES OF CHRISTIAN THEOLOGY II. (3 credits) This course is a continuation of 260-333B.
D.J. Hall

260-471A. THEOLOGICAL ETHICS. (3 credits) A study of the biblical and theological foundations of Christian ethics, and the nature, application and relevance of the Christian norm.
J.A. Boorman

The remaining seven half courses are electives. Candidates not majoring in Christian theology will plan to take courses in consultation with the Chairman of the B.Th. Committee.

ELECTIVE COURSES FOR B.Th.2 AND B.Th.3

260-280D. ELEMENTARY NEW TESTAMENT GREEK. An introduction to the grammar and syntax of New Testament Greek.
J.C. Kirby and Staff

260-321D. HISTORY OF CHRISTIAN LITURGY. A survey of the history of Christian Worship, with special reference to the Classical, Reformation, and Modern Periods.
J.C. Kirby

260-330A. REFORMED THEOLOGY. A study of Luther, Zwingli, Bucer, Calvin and other Reformed theologians, with particular reference to the historical development of their teaching.
D.N. MacMillan

***260-331A. CONTEMPORARY CATHOLIC THEOLOGY.** An introduction to contemporary Christian thought from within a Catholic perspective. This study will include an examination of recent reinterpretations of the traditional understanding of God and man in relation to the world of today.
E.K. Malloy

260-361A. RELIGIOUS BEHAVIOUR: AN INTRODUCTORY STUDY. This course studies some significant aspects of religious life and some contemporary religious phenomena. It also directs attention to religious growth, the religious personality, and the psychological attack on religion. Its main aim is to establish criteria for distinguishing between good religion and bad, and thus to estimate the meanings and function of religion in personal life.
M. Peaston

260-380D. ADVANCED NEW TESTAMENT GREEK. Advanced course in the language, with reading of selected biblical texts.
J.C. Kirby

260-390D. ELEMENTARY BIBLICAL HEBREW. An introduction to the grammar and syntax of biblical Hebrew. Emphasis is placed on both the oral and the written language.
D.R. Runnalls

***260-405A. THE THEOLOGY OF THE OLD TESTAMENT.** A study of Old Testament theology based on selected writings.
R.C. Culley

260-407A. THE WRITINGS. A study of a major book from the Writings of the Old Testament such as Psalms, Job, or Proverbs in English translation.
R.C. Culley

***260-408B. THE PROPHETS.** A Study of a major prophet in the context of the prophetic tradition in the Old Testament.
R.C. Culley

***260-410A. MAJOR MOTIFS IN NEW TESTAMENT THEOLOGY.** Attention is focused on Jesus' theology (e.g. in his parables), on Paul and John and the author of Hebrews. Unity and diversity of New Testament teaching, the images used, and other special topics are also discussed (in seminars).
G. Johnston

260-420B. CANADIAN CHURCH HISTORY. A survey of the major Christian traditions in Canada from the settlement of New France to the present. Lectures and seminars with use, where possible, of primary source materials.
H.K. Markell

260-431B. CHURCH, MINISTRY and SACRAMENTS. A study of what Christians have believed, do believe and, by implication, ought to believe, concerning these fundamental themes of the Christian faith.
D.N. MacMillan

260-441B. TWENTIETH CENTURY PHILOSOPHY OF RELIGION. An advanced course illustrating "philosophical options and theological choices" — positivism, existentialism, empirical and process thinking, history and hope.
J.C. McLelland

260-461B. HUMAN DEVELOPMENT AND GENDER IDENTITY. An outline of personality development and functioning from birth onwards. While the major stages of the life cycle are its main concern, human sexuality and the learning of sex roles are also considered.
M. Peaston

260-470B. CHRISTIAN SOCIAL ETHICS. This course examines the basis of Christian social responsibility, traditional patterns of association between Church and State, and forms of Christian involvement in political and social action. Attention is focused on possible strategies for dealing with selected contemporary social issues.
J.A. Boorman

260-490D. ADVANCED BIBLICAL HEBREW. Rapid reading of prose selections. Class hours devoted to discussion of grammar based on readings from biblical Hebrew.
R.C. Culley

260-491A. HEBREW TEXTS. Translation and exegesis of selected texts.
R.C. Culley

260-492B. HEBREW TEXTS. Translation and exegesis of selected texts.
R.C. Culley

OTHER RELATED COURSES

By permission of the Faculty and the instructors concerned, students may substitute other courses for any of those required if they have already taken these or similar courses for credit.

Electives may also be chosen from the Arts curriculum or other departments of the university (see "Related Courses page 11").

By permission of the Dean, students may also enrol for elective courses in other Montreal universities (but not more than twelve credits per session may be taken outside McGill).

** Not given in 1975-76.*

5 GRADUATE STUDIES

Program Information

The Faculty of Graduate Studies and Research, located in Dawson Hall, directs and controls all programs leading to higher degrees and recommends candidates to the Senate for these degrees. As a Department within it, the Faculty of Religious Studies offers courses leading to the degrees of Master of Sacred Theology (S.T.M.), Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.).

Faculty Regulations

NOTE: It is important that intending students should consult the annual *Announcement of the Faculty of Graduate Studies and Research* for information about the various programs available and about the general regulations that apply to all Departments within the Faculty, including the various deadlines indicated in the *Calendar of Dates* for 1975-76.

Advanced Degree Requirements

Candidates for advanced degrees should note that they are expected to give full time if possible to their research and courses (unless specially exempted or granted non-resident status).

Language Examinations are usually offered each year early in October and in mid-April. Candidates should advise the Dean's office well in advance of their intention to write.

Theses. The regulations concerning format, dates of submission, and other technical matters may be consulted in the office of the Dean of Religious Studies or in the office of Mrs. F. Mitchell, Graduate Studies, Dawson Hall.

Regulations For The M.A. [Religious Studies]

PURPOSE

The purpose of this degree is to encourage advanced study and research in religion and theology, especially for those who wish to become scholars or teachers and those who are already engaged in some field of religious service.

ADMISSION

Candidates must possess a B.A. or equivalent degree (e.g. B.Th., M.Div.), with at least good second class standing in a major or honours program in religious studies or theology from a University or College that is accredited in North America.

In certain cases candidates may be advised to take a Qualifying Year before entering the M.A. program.

RESIDENCE

The basic residence requirement is two years, but the degree may, by permission, be taken on a part-time basis.

THE PROGRAM

Candidates are required to complete satisfactorily six half-courses and write a thesis embodying the results of their research. A reading knowledge of French or another modern language is also required.

AREAS OF STUDY

Research may be undertaken in the following areas:

(1) *Comparative Study* (including Hinduism, Islam, and Judaism as well as Christianity)
(2) *Religion and Culture* (including Religion and the Arts, Theological Ethics, and Philosophy of Religion)
(3) *Biblical* (including Old Testament and New Testament)

(4) *Christian Theology* (including Church History, Christian Theology, Pastoral Psychology and Theological Ethics)

Candidates who have studied only one major religious tradition before entering the M.A. program must take at least two half-courses in Comparative Study or in the study of a second major faith. Related courses in other McGill departments are also available, e.g. in Anthropology, Art History, East Asian Studies, Islamic Studies, Music and Sociology. Other resources exist in the several universities of Montreal.

LANGUAGE EXAMINATIONS

The modern language examination is to be taken at the end of the first term by those admitted in September, and at the end of the second term by those admitted in January. Exemption from this requirement is granted to those who have a degree pass in the language.

THESIS SUBMISSION

The dissertation may be submitted at the end of the second term of residence, or within four years after all residence requirements have been met.

NOTE: A thesis in Old Testament requires competence in Hebrew; similarly, one in New Testament requires competence in Greek.

Regulations For The S.T.M.

PURPOSE

The S.T.M. is meant primarily for those who intend to enter the ministry of the Christian Church or another religious institution, or proceed to teaching in schools or to some form of social work.

NOTE: Professional training is available to S.T.M. graduates in the three affiliated Theological Colleges (Anglican, Presbyterian, and United). McGill also has a Faculty of Education and a School of Social Work.

ADMISSION

Candidates must possess a B.A. with at least second class standing in a major or honours program in religious studies or theology from an accredited university or college. Those who have a McGill B.Th. or an equivalent degree, with good second class standing, may be admitted to the second year of the S.T.M. program.

RESIDENCE

The normal requirement is *two years* (of two terms each) of full-time study, but the degree may, by permission, be taken on a part-time basis.

THE PROGRAM

Candidates are expected to be enrolled for full-time study and are required to complete satisfactorily sixteen half-courses within two years, eight in each academic year. They may, by permission, take summer session courses for credit, or take additional courses if their academic standing warrants it. A reading knowledge of French or German, or another modern language, is also required.

AREAS OF STUDY

Courses are offered by the department in the four areas listed in the M.A. regulations.

(1) *Biblical* (including Old Testament; New Testament)
(2) *Historical* (including Church History; Christian Theology)
(3) *Religion and Culture* (including Theological Ethics; Philosophy of Religion; Pastoral Psychology)
(4) *Comparative Study.*

Related courses are also available in other departments.

SPECIAL REQUIREMENTS

Ministerial candidates are to choose their courses in consultation with the Principal of the Theological College to which they belong.

During the *first session* two half-courses are to be selected by all candidates from *three* of the areas listed in "Areas of Study".

In the *second session,* two half-courses are to be taken in the *remaining area* listed. The other four half-courses are elective, and in some cases candidates may take all of them in one of the four areas. Thus a limited amount of specialization is possible.

Those who are admitted into S.T.M.2 shall elect courses in consultation with the Dean and the secretary of the Graduate Committee of the department. They too may be permitted to specialize in one area.

The Graduate Committee on Religious Studies is presently considering ways to improve the S.T.M. program, e.g. by a project or comprehensive examination, or by special interdisciplinary seminars as part of the required courses.

LANGUAGE EXAMINATION

Entrants to S.T.M.1 are expected to pass the

modern language requirements by the end of their *second* term; but those who are admitted into S.T.M.2 must do so by the end of their *first* term. Exemption is granted to those who have a degree pass, or the equivalent, in the language.

NOTE: To specialize in Old Testament a candidate may be required to show competence in Hebrew; similarly, in New Testament he may require competence in Greek.

Regulations For The Ph.D. In Religious Studies

PURPOSE

The purpose of the Ph.D. program is to engage the student in academic studies at the highest level and to enable him if he so wishes to prepare himself for an academic career. It normally requires three years of research beyond the bachelor's degree, and two beyond the master's.

ADMISSION

Candidates shall normally possess an accredited M.A. in Religion or Theology, or the S.T.M., with at least *high second class standing* and recommendation for doctoral study; or the B.D. (M.Div.) with *first class* standing and a similar recommendation, from a recognized Canadian, American, British or other university, or from an accredited theological college or seminary; or such other degree as the Faculty may accept as equivalent to the McGill M.A. or S.T.M.

RESEARCH AREAS

The Faculty is prepared to guide students in thesis research in each of the following subjects: Old Testament, New Testament, Church History, Christian Theology, Theological Ethics, Philosophy of Religion, and Comparative Study.

RESIDENCE

A Ph.D. candidate must reside normally for *two consecutive sessions* of full-time study and research. Part-time study may be permitted in some cases. One session, but in no case the last required session, may be spent at another institution with the approval of the Dean and the Faculty of Graduate Studies and Research.

Candidates admitted to Ph.D.1 shall take six half-courses; those admitted to Ph.D.2, on the basis of a master's degree and adequate preparation, shall usually take four half-courses.

SUPERVISION

The Graduate Committee shall appoint for every candidate who is admitted to Ph.D.1 an adviser, and for every candidate admitted to Ph.D.2 a supervising committee of three members, the chairman of which shall be the director of his research and thesis. It shall be the duty of the adviser or the director to meet with the candidate as soon as possible after his first registration to discuss his program with him and advise him concerning the requirements he is obliged to meet (e.g. courses, modern languages, ancient languages, field and general examinations). The director shall be responsible for arranging meetings of the supervising committee with the candidate as required. A thesis project must be approved by the Graduate Committee of the Faculty not later than December 1 of the Ph.D.2 year.

LANGUAGE REQUIREMENTS

French and German are normally required of all candidates, and formal admission into the work of Ph.D.2 will not be granted until at least one of these languages has been passed (or exemption granted). Similarly, formal admission into Ph.D.3 requires a pass in the second modern language. (It is strongly recommended that one or both of these languages be included in the bachelor's or master's work preceding doctoral study.)

If necessary, candidates may also have to pass examinations in Hebrew, Greek, Sanskrit and other ancient tongues, and consequently a *qualifying year may be advised.*

COMPREHENSIVE EXAMINATIONS

A candidate who wishes to undertake research in one of the subjects listed in "Research Areas" must pass a FIELD examination in it before entrance into the second year of residence.

In addition, before admission to Ph.D.2 or at the beginning of this year for those exempted from Ph.D.1, candidates must show general competence in *three subjects cognate to his own field.* (Competence here means at the level of second class standing in the McGill M.A.)

The manner in which this requirement is to be met shall be determined by the candidate's adviser or supervising committee. If the candidate's previous record warrants it, the waiving of this requirement shall be recommended by his supervising committee to the Graduate Committee of the Faculty.

DOCTORAL COLLOQUIUM

As one of their requirements all Ph.D.1 and Ph.D.2 students shall attend the graduate colloquium, where they can share ideas and criticisms with one another and their professors.

THESIS SUBMISSION

The thesis may be submitted at the end of the second term of the second session of residence by candidates admitted with a master's degree. It must be submitted within five years after all residence requirements have been completed, unless special permission has been granted for an extension. A thesis which has been judged unsatisfactory by one of the examiners is normally not acceptable and precludes an oral defence. But any thesis judged to be unsatisfactory may be re-submitted once, one year after first submission, if this is approved by the Executive Committee of the Faculty of Graduate Studies and Research.

The thesis is examined by External and Internal Examiners. If their reports warrant it, the candidate shall conduct an oral defence of his thesis before a committee of six appointed by the Dean of Graduate Studies on the recommendation of the department. Its chairman is the Dean or his Pro-Dean, and one member must represent a department of the University other than Religious Studies.

The final grade awarded to a successful Ph.D. candidate depends not only on the quality of the dissertation but on course work, examinations, research and teaching ability, and also the oral defence.

GRADUATE COURSES

Those marked * will **not** be offered in 1975-76. All are half courses unless otherwise noted: *A* denotes Fall term, *B* Winter term, *C* a Summer Session course, *D* a full course given in two terms. A course may not be offered if fewer than six students enrol.

AREA A (BIBLICAL)

260-602A. JEREMIAH TO MALACHI: THE DECLINE OF PROPHECY.
S.B. Frost

260-605B. INTERPRETERS OF THE RELIGION AND FAITH OF ANCIENT ISRAEL. The Book of Psalms (based on the English text).
R.C. Culley

*260-606A. FORESHADOWINGS OF THE EUCHARIST IN THE OLD TESTAMENT.
W. Lawlor

*260-607A. STUDIES IN THE BIBLICAL NARRATIVE TRADITIONS.
R.C. Culley

260-610A. RECENT INTERPRETATIONS OF MARK. An examination of the content and structure of the Gospel of Mark as seen by some of his recent interpreters.
J.C. Kirby

260-612A. THE PASSION NARRATIVE IN THE FOUR GOSPELS. A comparative study of the crucifixion narratives in the four canonical gospels, together with a consideration of the theology that underlies each of them.
J.C. Kirby

*260-613B. NEW TESTAMENT ETHICS. A study, mainly exegetical, of passages in the New Testament that illuminate the moral teaching of Jesus, St. Paul, and the later Apostolic Church.
G. Johnston

*260-614B. THE GOSPEL OF JOHN.
G. Johnston

*260-615B. THE HOLY SPIRIT IN THE NEW TESTAMENT.
G. Johnston

*260-616A. LES PARABOLES DE JESUS.
J.C. Kirby

*260-617C. THE EPISTLE TO THE EPHESIANS.
J.C. Kirby

*260-618B. THE CHURCH IN THE NEW TESTAMENT.
G. Johnston

260-619B. THE RESSURECTION IN THE NEW TESTAMENT. Exegesis of the relevant passages, and discussion of modern theories and doctrines concerning Resurrection. If there is a sufficient number of bilingual students, this seminar will be held in French.
J.C. Kirby

AREA B (HISTORICAL)

*260-620B. WORSHIP IN THE NEW TESTAMENT.
J.C. Kirby

260-621A ROMAN CATHOLICISM FROM 1870 TO THE PRESENT. A study of major developments within the Roman Catholic Church since Vatican Council I. Extensive use will be made of primary source materials.
H.K. Markell

*260-622B THE MODERN LITURGICAL MOVEMENT.
J.C. Kirby

260-623A THE ECUMENICAL MOVEMENT. A study of the modern approaches to Christian Reunion and Unity, world councils, and the outstanding leaders. The significance of Ecumenism in the history of the Church in modern times will be considered.
H.K. Markell

*260-624A. THE CHURCH AND THE CITY IN THE ANGLO-AMERICAN WORLD SINCE 1850.
H.K. Markell

260-625B. CANADIAN CHURCH HISTORY. Major movements and influences in the history of the Christian Church in Canada.
H.K. Markell

260-628B. ANGLICANS AND NONCONFORMISTS IN NINETEENTH CENTURY ENGLAND. A study of English society in the 19th century in terms of the shifting relationships between the Church of England and the Nonconformist bodies, Protestant and Roman Catholic.
H.K. Markell

*260-630B. PHILOSOPHY AND THEOLOGY.
J.C. McLelland

260-631A. THE THEOLOGY OF THE CROSS. The intention of this study is to reflect on the tradition Luther called *theologia crucis* as an appropriate contemporary theological response to the experience of the dominant culture of this continent. The course will function as a research seminar, with some lectures, student papers, and individual research.
D.J. Hall

*260-637B. THE THEOLOGY OF KARL BARTH.
J.C. McLelland

260-638A. THE THEOLOGY OF D.M. BAILLIE. A study in depth of a theologian whose keen insight, constructive presentation and sound judgment entitle him to a place among the significant thinkers of our time.
D.N. MacMillan

260-639B. CONTEMPORARY CATHOLIC THEOLOGY. An examination of some theological implications of four movements in Catholic Theology emerging from the French, Dutch, North American and Third World Theologians. These considerations will suggest areas in need of Christian theological reinterpretation.
E.K. Malloy

AREA C (PHILOSOPHY)

*260-641A RELIGION AND THE ARTS. The arts of man provide material for theological reflection on his nature and destiny.
J.C. McLelland

260-642B PHILOSOPHY OF RELIGION IN THE TWENTIETH CENTURY. A comparison of major types of philosophy of religion on the modern scene. Introductory lectures followed by student research on selected topics.
J.C. McLelland

*260-643A PROBLEMS IN PHILOSOPHY OF RELIGION. The roots and significance of modern atheism. Studies in significant figures (e.g. Marx, Nietzsche) and recurrent themes (e.g. the Prometheus Myth).
J.C. McLelland

*260-644A. THE MEANING AND BASIS OF RELIGIOUS BELIEF.
J.C. McLelland and A. McKinnon

*260-645B. MEANING AND INTERPRETATION.
R.C. Culley and J.C. Kirby

*260-660A. DIMENSIONS OF THE PERSON: Studies in Erikson, Fromm, Horney and Jung.
M. Peaston

260-661A. HUMAN NATURE IN THEOLOGICAL AND PSYCHOLOGICAL PERSPECTIVE. Theology (Niebuhr, Outler, Tournier) and psychotherapy (Freud, Sullivan, Maslow) are studied as interpreters of man, his freedom, conflicts and renewal.
M. Peaston

260-662B RELIGION AND PERSONALITY: THE FORMS OF LOVING. A study of the spirit and forms of loving and of their expression and growth in the man-woman relationship and in society.
M. Peaston

*260-663A. BEHAVIOUR CHANGE AND PERSONAL GROWTH.
M. Peaston

*260-664B. ANXIETY AND FAITH. An examination of some existentialist, psychiatric and religious approaches to the study of man.
M. Peaston

260-670A. REPRESENTATIVE SOCIAL THOUGHT IN THE TWENTIETH CENTURY. Representative social thought in the twentieth century. An examination and evaluation of the dominant forms of social thought in the twentieth century. Representatives of both religious and secular ethics will be studied.
J.A. Boorman

260-671B. CHRISTIAN SOCIAL RESPONSIBILITY: SOME MAJOR ISSUES Major, social and ethical problems of today will be identified and analysed. Each student will devote his particular attention to one such issue presenting to the seminar his research dealing with the causes and nature of the problem the kinds of solution being sought and their moral justification.
J.A. Boorman

AREA D (COMPARATIVE STUDY)

*260-650D. RELIGIONSWISSENSCHAFT: THE HISTORY OF THE DISCIPLINE.
C.J. Adams

*260-656B. STUDIES IN THE BHAGAVADGITA.
R.W. Stevenson

397-604D. THE ISLAMIC TRADITION.
C.J. Adams

397-652D. URDU (advanced).
C.R. Adams

397-703D. ISLAMIC THEOLOGY.
I. Izutsu

** Not offered in 1975–1976.*

SPECIAL STUDIES

260-680A/680B/690 D.
OLD TESTAMENT

260-681A/681B/691D.
NEW TESTAMENT

260-682A/682B/692D.
HISTORY OF CHRISTIANITY

260-683A/683B/693D.
CHRISTIAN THEOLOGY

260-684A/684B/694D.
PHILOSOPHY OF RELIGION

260-685A/685B/695D.
ETHICAL PROBLEMS

260-686A/686B/696D.
RELIGIOUS PSYCHOLOGY

260-687A/687B/697D.
COMPARATIVE RELIGION

These are tutorial courses designed to meet the research needs of individual students at Master's or Doctor's level in the various disciplines.

ELECTIVE COURSES IN OTHER DEPARTMENTS

With the consent of the Dean of Religious Studies and the instructor concerned, graduate students may choose one or more of the following related courses provided they are being offered:

123-612B. Medieval Art and Archeology
123-622A. The Art of Byzantium
114-653D and 753D.Classics-Non-Literary subjects
120-610A. English -Devotional Literature
101-607D. History-Religious and Ideological Movements in the United Kingdom and Western Europe 1815-1914.
101-616D. Philosophy of History
107-401D. History of Ethics
107-431A/432B. Philosophy of Religion

6 THE INSTITUTE OF ISLAMIC STUDIES

The Institute offers courses and undertakes to direct research in preparation for the M.A. and Ph.D. degrees in Islamic Studies. Two years of resident study are normally required for the M.A. degree, five for the Ph.D. degree.

The Institute is concerned with the faith of Muslims, and with the Islamic tradition involving a society and a civilization to which in the past it has given rise and to which in the present it is related. The Institute's special emphasis is on the faith as a contemporary and living force; and on the major change through which the civilization and society are currently going. It would seek such understanding as will enable outsiders to observe those changes intelligently, Muslims to participate in them intelligently, and both to communicate.

Candidates for degrees in Islamic Studies may, with the consent of those departments, be permitted or required to take relevant courses offered by the Departments of History, Economics and Political Science, Philosophy, Religion and Theology, etc. In special cases these departments also recognize participation in relevant courses offered by the Institute as contributing to their own advanced degrees. Such participation by students from other departments is welcomed by the Institute.

The Institute stresses competence in language. At the master's level, one Islamic language is required, normally Arabic. For doctorate work, all students, Muslim and Western, must have a reading knowledge of *either* French or German, preferably both (for access to Western scholarship on Islam) *and* two Islamic languages, of which one will normally be Arabic.

From September, 1975, a co-operative program will become effective between the Duncan Black Macdonald Center for the Study of Islam and Christian-Muslim Relations of the Hartford Seminary Foundation and the Institute of Islamic Studies. The program will be conducted on the McGill campus.

Courses For Higher Degrees

397-602D. SURVEY OF ISLAMIC PHILOSOPHY. (3 hours.) A history of the attempts of Muslim thinkers to adapt Greek philosophy to Islamic revelation; study of the Translation Movement, and Mu'tazila, and the rise of Kalam; readings in al-Kindi, al-Farabi, Ibn Sina, Ibn Rushd, Al-Razi, and other important Muslim philosophers.
Professor Izutsu

397-603B. INTRODUCTION TO RESEARCH MATERIALS FOR ISLAMIC STUDIES. (1 hour.) A practical introduction to the materials academically available for these studies. Some preliminary discussion of research methods, of the preparation of reports and essays; documentation; transliteration. Particular attention is given to the special reference books and serials used in the field.
Mr. Ali

397-604D. INTRODUCTION TO THE ISLAMIC TRADITION. (3 hours.) A course to introduce the uninitiated student to major aspects of the Islamic tradition; Jahiliyah times, the Prophet, Qur'an, Hadith, Kalam, Shari'ah, Falsafah, Tasawwuf, Shi'ah and the sects, institutions, and modern developments. Emphasis is given to the principal Islamic and Western sources in each of these areas.
Professor Adams

397-610D. HISTORY OF ISLAMIC CIVILIZATION: THE CLASSICAL PERIOD. (3 hours.) The origins of the early Islamic state in Arabia and the Umawl Caliphate. The growth of Islamic civilization, and the 'Abbasi Empire until the Seljuk period. The rise of the Fatimis. The Caliphate of Cordoba.
Professors Little and Verdery

397-611D. HISTORY OF ISLAMIC CIVILIZATION: THE MEDIAEVAL PERIOD. (3 hours.) The Seljuks, and the mediaeval synthesis. The Moors in Spain and North Africa. The Crusades. The Mongols and the destruction of the Baghdad Caliphate. The Mamluk, Persian, Turkish and Indian Empires until 1700.
Professor Little

297-614D. THE HISTORY OF ISLAMIC INDIA. The Arabs in India; the establishment of the Delhi Sultanate; the interaction of Islam and Hinduism. The Mughals: political history; social, intellectual, and religious trends. The fall of the Mughals and the end of Muslim rule in India.
Professor S. Alvi

397-621D. INTRODUCTORY ARABIC.

397-622D. LOWER INTERMEDIATE ARABIC.

397-623D. HIGHER INTERMEDIATE ARABIC.

397-625D. ADVANCED ARABIC. (3 hours.) Critical reading of texts in a particular field; for example, readings in the historians, with Professor Little; or in the theologians, in connection with Islamics 702 below, or the legists, in connection with Islamics 706. As the content may vary, this course may be repeated for credit.

397-631D. INTRODUCTORY TURKISH.

397-632D. LOWER INTERMEDIATE TURKISH.

397-633D. HIGHER INTERMEDIATE TURKISH.

397-634D. ADVANCED TURKISH. (This course will normally be related to Islamics 722 below; Prerequisite: Islamics 397-622D or 397-641D.)

397-641D. INTRODUCTORY PERSIAN.

397-642D. LOWER INTERMEDIATE PERSIAN.

397-643D. HIGHER INTERMEDIATE PERSIAN.

397-644D. ADVANCED PERSIAN. (Prerequisite: Islamics 622.)

397-651D. INTRODUCTORY URDU.

397-652D. LOWER INTERMEDIATE URDU.

397-653D. HIGHER INTERMEDIATE URDU.

397-654D. ADVANCED URDU. (Prerequisite: Islamics 622 or 641.)

397-670D. ISLAMIC ART AND ARCHITECTURE. Study of the development of Islamic art and architecture as related to the principles of Islam as a religion and regional traditions.

397-700D. Ph.D. PRELIMINARY EXAMINATION IN ISLAMICS. RESEARCH SEMINAR. For all students writing theses and all others engaged in research. (Seminar, 2 hours.)
Professor Adams and Staff

Several of the following seminars will be given each year.

397-702D. ISLAMIC THEOLOGY: SEMINAR ON SPECIAL QUESTION. (2 hours.) The problem considered will vary from year to year. The course may, therefore, be repeated for credit.
Professor Izutsu

397-703D. READINGS IN CLASSICAL ARABIC PHILOSOPHERS. (Seminar, 2 hours.) Consideration of the development of philosophic thought among the Muslims, and its relation to the late Greek background; with special reference to Ibn Sina (Avicenna). Some of his writings, especially the *Kitab al-Najat,* or al-Ghazzali's *Tahafut,* will be read in Arabic. The prose of Falsafah in classical Islamic culture and thought.
Professor Izutsu

397-704D. ISLAMIC THEOLOGY. (Seminar, 2 hours.) A study of significant aspects of the Muslims' attempt to give intellectual expression to their faith in different periods in the past.
Professor Izutsu

397-705D. THE SOCIAL INSTITUTIONS OF ISLAM I. Government and State. (Seminar, 2

hours.) A survey of the evolution of the various patterns and concrete manifestations of Muslim political theory and practice through the classical and mediaeval periods of Islamic history. The rise of modern states and political problems in various Muslim countries.
Professor Berkes

397-706D. THE SOCIAL INSTITUTIONS OF ISLAM II. Law. (Seminar, 2 hours.) The role of law in Islamic thought and society, considered historically in terms of its theological, political, and sociological aspects. The impact of modern legal systems and ideas, contemporary movements of codification, and the problems of legislation.
Professor Berkes

397-707D. SEMANTICS OF THE QUR'AN. (Seminar, 2 hours; half course.) An analytical study of Qur'an vocabulary. By applying the methods of analysis that are being developed in structural and field semantics to the verses of the Qur'an, the aim is to isolate the general conceptual scheme that underlies the Weltanschauung of the sacred book of Islam.
Professor Izutsu

397-710D. SHI'AH THOUGHT. (Seminar, 2 hours.) A history of thought among the Shi'ah with consideration of important thinkers, movements and books.

397-721D. ISLAMIC DEVELOPMENTS IN THE MODERN ARAB WORLD. (Seminar, 2 hours.) Internal reform movements and responses to external pressure, 1800 to the present.
Professor Verdery

397-722D. THE DEVELOPMENT OF SECULARISM IN MODERN TURKEY. (Seminar, 2 hours.) An analysis of the transition from Ottoman institutions and ideas to those of contemporary Turkey. After considering the 18th century attempts at reform, attention is given to the changes during the *Tanzimat,* "Young Turk", and Republican periods, as a preparation for an understanding of contemporary problems raised by secularization.
Professor Berkes

397-723D. ISLAMIC DEVELOPMENTS IN MODERN INDIA AND PAKISTAN. (Seminar, 2 hours.) Significant movements in Islamic thought and political action, since the Mughul downfall. The influence of Sirhindi; Waliyullah and his school; the Mujahidin; 1857 De'oband; Aligarh; Azad and Muslim participation in Indian nationalism Iqbal; Pakistan. The Munir Report; Pakistan constitutional and ideological issues; Muslims in India since partition.
Professor Adams

397-724D. DEVELOPMENT OF THE ISLAMIC TRADITION IN INDONESIA. (2 hours.) Pre-Islamic background. The arrival of the Islamic tradition; Javanese elements in its development, and Hukum Adat. Muslim states versus the Dutch company; the Padri war. Islamic policy of the Dutch. Recent Islamic movements and political parties (Sarekat Islam, Muhammadijah, Masjumi, Nahdatul Ulama, Persatuan Islam, M.I.A.I., etc.). Nationalism.

397-725D. THE ISLAMIC HISTORY OF WEST AFRICA. (2 hours.) A study of an Islamic role in the development of institutions and ideas in the western and central Sudan, from the 11th century to the present day. With special reference to (i) relations with the wider Muslim World, (ii) sources, literary and archaeological, for a study of this area.

397-726D. ISLAMIC DEVELOPMENTS IN MODERN IRAN. (2 hours.)

397-727D. MODERN HISTORY OF THE ARABIAN GULF STATES. The history of the Arabian Peninsula in modern times with special emphasis on the Gulf States. Concentration will be on Saudi Arabia, Kuwait, Bahrain, Qatar, the Union of the Arab Amirates, and 'Uman from the 18th century to the present.
Professor A. Abu-Hakimah

397-728D. ISLAMIC DEVELOPMENTS IN MODERN NORTH AFRICA. The relationship of the Maghrib to the Muslim East and Europe in mediaeval and modern times. Religious developments in North Africa before and after European conquest. The growth of nationalism in Libya, Tunisia, Algeria and Morocco. The interaction of Arab and French culture and its effect on Islam.

397-731D. ISLAM IN THE MODERN WORLD. (Seminar, 2 hours.) A conspectus of the Islamic world's response to the internal decline in the eighteenth century and external encroachment in the nineteenth. A comparative study of constitutional developments, religious reform movements, nationalism, etc.
Professor Berkes

397-740D. THE MYSTICAL TRADITION OF ISLAM (SUFISM). (Seminar, 2 hours.) A historical and analytical study of great Sufis, their writings and their central problems. Emphasis will be laid upon reading Sufi texts in Arabic and Persian. As the content of the course will vary, this course may be repeated for credit.
Professor Landolt

397-750D. SOCIAL AND ECONOMIC DEVELOPMENT IN MUSLIM COUNTRIES. (Seminar, 2 hours.) A study of development problems in the light of a historical survey of various reform policies in different countries; contemporary ideas of, and policy towards, development as shown in economic, technical, political and educational measures; with emphasis on the relevance of Islamic values to development problems.
Professor Berkes

397-760D. MUSLIM HISTORIOGRAPHY. (Seminar, 2 hours.) Readings in historical writings and consideration of the critical problems arising from the use of such materials.
Professor Little

397-761D. IRAN FROM THE MONGOLS TO THE SAFAVIDS. (Seminar, 2 hours.) Historical developments in Iran, Iraq and Anatolia after 1258. The Ilkhanids and post-Mongol successor "states". The Turkman dynasties: Qara-Goyunlu. Shi'ism, Sufism, and the rise of the Safavids in 1500.

L'Ecole Française d'Eté de l'Université McGill est un établissement d'enseignement supérieur qui propose des cours de Langue, de Littérature et de Civilisation au niveau sous-gradué et au niveau de la Maîtrise et du Doctorat, menant en particulier à une Maîtrise pluridisciplinaire en français en plusieurs sessions d'été. Un des traits les plus originaux des programmes de l'Ecole est l'ampleur qui y est donnée aux cours dits de Civilisation : histoire, histoire de l'art, géographie économique, politique, économie, sociologie, psychologie, psychanalyse, etc.

L'Ecole Française d'Eté offre aussi à ses étudiants et à ses professeurs un programme exceptionnellement important d'activités sociales et culturelles très diverses. Organisées l'après-midi et le soir tout au long de la session, ces activités complètent les cours académiques et constituent une partie essentielle de l'enseignement. Certaines d'entre elles sont ouvertes à un public extérieur à l'Ecole et font de celle-ci un Centre Culturel actif et vivant qui joue un rôle appréciable dans la vie culturelle montréalaise durant l'été.

L'Ecole Française d'Eté est aussi un institut universitaire de la francophonie, très largement ouvert sur le monde actuel, et dont la vocation internationale s'affirme tant dans le choix de ses professeurs que dans la composition de ses programmes où figurent les littératures et les civilisations de l'ensemble du monde francophone. L'origine très diverse de ses étudiants et de son corps professoral fait d'autre part de l'Ecole un lieu assez exceptionnel de rencontre et de confrontation entre les quatre cultures qui y sont principalement représentées : québécoise francophone, canadienne anglaise, américaine et française.

L'Ecole Française d'Eté ne veut pas être un établissement réservé aux seuls universitaires. Elle est — et souhaite être de plus en plus — un centre socio-culturel de contacts et d'échanges où les représentants de « l'entreprise » — commerciale, industrielle, financière — côtoient les fonctionnaires, les membres des professions libérales, les artistes aussi bien que les hommes politiques, les leaders syndicaux, les pédagogues et les universitaires eux-mêmes, étudiants et professeurs.

L'Ecole Française d'Eté veut enfin être une Université expérimentale et une Université critique où, au sein d'une vie communautaire, sont menées chaque été des expériences pédagogiques de pointe dans un climat non directif de liberté et de confiance adultes, où les étudiants participent authentiquement à toutes les décisions intéressant l'Ecole et l'organisation de leurs études, où la qualité des relations humaines revêt une extrême importance et où beaucoup, tout en poursuivant des études de français, ont trouvé, trouvent et trouveront une occasion privilégiée de prise de conscience et d'épanouissement personnel et collectif.

Plutôt la tête bien faite que bien pleine.

PROFESSEURS

WILLY DEMOUCELLE, Diplômé d'École Normale ; Diplômé de l'Institut Supérieur de Pédagogie (Belgique) ; M.A. (McGill). Professeur et Responsable des activités culturelles à la C.E.C.M. (École Polyvalente Pierre-Dupuy, Montréal). Animateur de théâtre.

MAURICE DESCOTES, B.-ès-L., L.-ès-L., M.-ès-L., D.E.S. (Lyon) ; Agrégé de l'Université de France (Lettres) ; Docteur-ès-Lettres (Doctorat d'État). Professeur titulaire de Littérature française moderne et contemporaine à l'Université de Pau. Conseiller Culturel près l'Ambassade de France en Allemagne Fédérale.

MME CATHERINE DOL, B.-ès-Sc., L.-ès-L., D.E.S. (Nice) ; Agrégée de l'Université de France (Histoire et Géographie). Professeur d'Histoire et de Géographie au Lycée Cézanne (Aix-en-Provence).

JEAN DOMERC, B.-ès-L., L.-ès-L., M.-ès-L., D.E.S. (Alger) ; Agrégé de l'Université de France (Grammaire) ; Docteur en Linguistique (Paris). Professeur de Linguistique à l'Université de Lille.

MAURICE FAUQUET, B.-ès-L., L.-ès-L., M.-ès-L., D.E.S. (Paris) ; Agrégé de l'Université de France (Philosophie) ; Ancien Élève de l'École Normale Supérieure (St-Cloud) ; Docteur en Sciences de l'Éducation (Paris). Responsable du Service de Recherche du Centre Audio-Visuel de l'École Normale Supérieure de St-Cloud.

BENOÎT LACROIX, O.P. ; L. Th. ; Docteur-ès-Sciences Médiévales (Toronto). Professeur titulaire à l'Institut d'Études Médiévales de l'Université de Montréal. Directeur du Centre d'Étude des Religions Populaires. Maître de Conférences à l'Université de Caen.

GILLES LEFEBVRE, B.A., M.A., Ph.D. (Montréal) ; D.E.S. (Paris). Professeur Agrégé de Linguistique à l'Université de Montréal. Chargé de cours à l'Université d'Ottawa.

JEAN-CLAUDE LEMYZE, B.-ès-L. (Paris), L.-ès-L., M.A. Linguistique (Montréal). Assistant Professor, Université McGill, Directeur des Laboratoires de Langue de l'Université.

JEAN LERÈDE, B.-ès-Sc., B.-ès-L., L.-ès-L., M.-ès-L., L. en Droit et Sciences Économiques, M. en Droit et Sciences Économiques (Paris) ; Diplômé de l'Institut d'Histoire de l'Art et d'Archéologie (Paris) ; Diplômé de l'École Libre des Sciences Politiques (Paris) ; Conférencier des Monuments Historiques. *Directeur de l'École*

NATHAN MÉNARD, B.A., L.-ès-L., M.A. (Montréal) ; Diplômé de l'École Normale Supérieure de l'Université de Montréal ; Docteur en Linguistique (Strasbourg). Professeur de Linguistique à l'Université de Montréal.

RAPHAËL MOLHO, B.-ès-L., L.-ès-L., M.-ès-L., D.E.S. (Paris) ; Agrégé de l'Université de France (Lettres) ; Docteur-ès-Lettres (Doctorat d'État). Professeur titulaire de Littérature française moderne et contemporaine et Directeur de l'Institut de Français de l'Université de Paris (Nanterre).

MME DOMINIQUE NICHET-BAUX, B.-ès-L., L.-ès-L., M.-ès-L. (Paris) ; Agrégée de l'Université de France (Lettres classiques). Ancienne Élève de l'École Normale Supérieure (Sèvres). Professeur de Lettres au Lycée Fustel de Coulanges (Massy).

LAURENT SANTERRE, B.A., L.-ès-L. (Université Laval) ; Docteur-ès-Lettres (Doctorat d'État). Professeur Agrégé de Linguistique à l'Université de Montréal.

PROGRAMME DES COURS DE 1975 (1)

DIVISION B (2)

(niveau sous-gradué avancé)

Cette Division est réservée aux *étudiants anglophones,* ou, de façon plus générale, aux étudiants non francophones. Un certain nombre d'étudiants de la Division B sont eux-mêmes professeurs, principalement au Canada et aux Etats-Unis où ils enseignent le français durant l'année aux niveaux élémentaire, secondaire ou collégial. La Division B compte également parmi ses étudiants des représentants de l'entreprise privée, des fonctionnaires, des diplomates, des avocats, des médecins, des infirmières, des architectes, des ingénieurs, des chercheurs scientifiques ou de futurs membres de ces diverses professions.

Sont admis dans cette Division les étudiants ayant déjà une *assez bonne connaissance du français* parlé et écrit *et* les étudiants spécialisés en français (« major » ou « honours »). Nombre d'admission *limité.* Pour les conditions d'admission, voir p. 51.

Dans le programme de la Division B, **l'accent est mis sur la pratique quotidienne et intensive de la langue parlée.** Les nombreuses activités culturelles et sociales de l'après-midi et du soir complètent très efficacement les cours eux-mêmes. L'enseignement de la langue et le contact avec la culture sont intégrés à la vie quotidienne avec le souci de donner en même temps à chacun l'occasion d'un libre épanouissement personnel, source de motivations durables. L'Ecole attache une très grande importance à la qualité des relations interpersonnelles ; elle y voit un élément essentiel à tout enseignement et à l'expérience de travail et de vie en commun qu'elle propose à ses participants.

L'usage exclusif du français est de rigueur en toutes circonstances. Dans le cadre de la *vie communautaire* que mènent à l'Ecole étudiants et professeurs, les activités culturelles et sociales assurent une *immersion totale,* aussi bien linguistique que culturelle, qui permet aux étudiants de *vivre réellement en français* durant les six semaines de la session d'été. Etudiants et professeurs logent dans les mêmes résidences universitaires et prennent leurs repas ensemble. Il convient de tenir le plus grand compte de cet *enseignement invisible* que constitue la vie quotidienne à l'Ecole(3), si l'on veut évaluer le travail réellement fourni par les étudiants au cours de la session. La présence au sein de l'Ecole d'un nombre important d'étudiants francophones des Divisions C et D (gradués) contribue à renforcer encore l'immersion totale.

Les étudiants suivent normalement *quatre cours.* Les étudiants qui le désirent peuvent suivre *un ou deux cours supplémentaires*(4).

(1) Chaque cours comporte **trois heures par semaine** (sauf indication contraire dans la description du cours). Les cours doubles (en Division D) comportent en principe six heures par semaine (ils peuvent ne comporter que trois heures par semaine lorsque l'importance des lectures et du travail à faire avant la session le justifie).

La plupart des cours ont lieu **le matin** (voir Emploi du temps, p. 58). Certains cours ont cependant lieu l'après-midi.

Les étudiants de l'Ecole peuvent suivre en **auditeurs** tous les cours qu'ils désirent dans n'importe quelle Division, sous réserve d'avoir consulté le professeur intéressé et obtenu son accord.

Il n'y a **pas de cours le samedi,** généralement consacré à des activités culturelles et sociales ou à des excursions dans la région de Montréal ou de Québec.

L'Ecole se réserve le droit d'annuler tout cours dont le nombre d'étudiants serait insuffisant.

(2) **Section Ba : cours accéléré de français parlé pour débutants.** Nombre d'admissions **très limité.** Voir p. 17.

(3) **Pour les étudiants de la Division B, la résidence à l'Ecole est obligatoire :** elle l'est aussi pour les étudiants des Divisions C et D n'habitant pas Montréal ou les environs. **La résidence est facultative** pour les étudiants de la section Ba et des Divisions C et D **habitant Montréal ou les environs.**

(4) Les étudiants qui le désirent peuvent suivre moins de quatre cours ou en suivre certains en qualité d'auditeurs en Division B ou en Division D.

PROGRAMME DES COURS, DIVISION B

398-411c. ou 398-411-412c. Le français tel qu'on le parle (cours simple ou double)

Le succès rencontré par ce cours l'été dernier nous a incités à lui donner plus d'importance et à en faire un *cours de base* qu'il est vivement conseillé aux étudiants de suivre.

Cours d'*immersion totale,* linguistique et culturelle, qui consistera à suivre au cours de la session d'été, *vingt-cinq* activités socio-culturelles (cours 411) ou *cinquante* activités si est choisie la formule du cours double (cours 411-412) (soit une moyenne de quatre ou de huit activités par semaine).

Ces activités socio-culturelles sont de deux sortes :

1. *activités organisées* par l'Ecole Française d'Eté l'après-midi ou le soir au nombre d'une centaine environ au cours de la session et choisies librement (sous les réserves indiquées plus loin) par les étudiants dans les *Programmes spéciaux* (voir ci-après, p. 12 et suivantes). Les étudiants devront faire figurer dans leur liste de vingt-cinq (ou cinquante) activités *un minimum de quinze activités organisées* (*trente* pour le cours double) ; quatre au moins de ces activités (six pour le cours double) devront être choisies dans le Programme *Découverte de Montréal et du milieu socio-culturel québécois* (choix libre parmi les activités proposées dans ce Programme). Chaque activité dure en moyenne de une heure et demie à deux heures.

2. *activités libres* choisies individuellement *en dehors* des activités organisées par l'Ecole (exemples : visite de certains pavillons à l'exposition « Terre des hommes », danses folkloriques à la place Ville-Marie, pièces de théâtre ou films en ville, manifestations sportives, une soirée dans une boîte à chansons, rencontres avec certains milieux québécois, etc). Les étudiants sont libres de choisir ces activités comme ils l'entendent, sous réserve qu'ils les fassent approuver préalablement par le responsable du cours. Ces activités libres ont pour but d'inciter les étudiants, au fur et à mesure que se déroule la session, à découvrir toujours davantage *par eux-mêmes* les divers aspects de la vie québécoise.

Les étudiants pourront faire figurer dans leur liste de vingt-cinq (ou cinquante) activités *un maximum de dix activités libres* (ou *vingt* pour le cours double). L'intérêt socio-culturel présenté par ces activités libres et l'originalité de leur choix entreront en ligne de compte dans la notation finale du cours. Il est précisé que si le choix d'au moins *trois activités libres* est souhaitable, ce choix n'est pas obligatoire ; les étudiants peuvent, s'ils le préfèrent, faire figurer sur leur liste d'activités uniquement des activités organisées par l'Ecole.

Dans le cadre des *activités organisées,* les étudiants qui le désireront, pourront choisir d'assurer en partie le service de *La Guinguette,* café de plein air de l'Ecole Française d'Eté ouvert chaque soir de 7h.30 à minuit, où professeurs et étudiants se retrouvent dans une ambiance agréable et propice aux échanges et où seront en particulier enseignées de façon informelle des expressions de la *langue populaire ou argotique québécoise et française.* L'expérience des étés précédents nous a montré que le service à *La Guinguette* constitue pour les étudiants qui l'assurent une excellente *école pratique de langue* qui, les plaçant dans une situation concrète et vivante au sein d'une activité sociale de groupe, leur permet de se familiariser rapidement et sans peine avec « le français tel qu'on le parle » au Québec et en France. Les étudiants pourront faire figurer le service à *La Guinguette* pour un maximum de six activités.

Tout au long de la session, les étudiants devront tenir un *journal de bord* individuel où figurera la liste des activités choisies par eux, classées en activités organisées, activités du Programme « Découverte de Montréal » et (éventuellement) activités libres, avec indication des dates de ces activités. *Huit* des activités choisies (*seize* pour le cours double) devront faire l'objet d'un *rapport écrit* de deux à trois pages dactylographiées à double interligne (ou l'équivalent manuscrit) ; la moitié des activités libres devront faire l'objet de rapports qui compteront dans le total des huit (ou seize) rapports exigés. Les rapports figureront dans le journal de bord, qui sera remis par chaque étudiant au responsable du cours dans la dernière semaine de la session. Toutes les activités qui n'auront pas fait l'objet d'un rapport devront être complétées en principe par quelques lignes de réflexions ou d'observations personnelles dans le journal de bord. Le cours comportera également un *examen oral* en fin de session.

Toutes autres précisions utiles pour ce cours seront données aux étudiants au début de la session.

Ce cours peut compter pour un (ou deux) cours de Langue ou de Civilisation.

Directeur du cours : Jean Lerède

398-413c. Cours intensif de vocabulaire systématique et expressions usuelles

Cours quotidien de perfectionnement dans la pratique de la langue parlée (cinq heures par semaine).

Séances de conversation par classes de *huit étudiants* environ. Chaque séance se termine par un commentaire des principales difficultés grammaticales et lexicologiques rencontrées au cours de la conversation. *Tests de contrôle hebdomadaires.*

Manuel : J. C. Lemyze, *Par exemple* (Livre II et Dialogues II) (Centre Educatif et Culturel, Montréal).

Directeur du cours : Jean-Claude Lemyze

398-414c. Cours intensif de phonétique

Cours quotidien (cinq heures par semaine).

Exposé du système phonologique, des sons et des habitudes articulatoires du français en fonction des difficultés de prononciation que rencontrent les non francophones. Les étudiants seront assistés de nombreux instructeurs qui travailleront *individuellement* avec eux sous la direction du professeur. En outre, le laboratoire de langue sera à la disposition des étudiants du lundi au vendredi de 9h à 17h.

Manuel : J. C. Lemyze, *A l'écoute du français* (en vente au Secrétariat de l'Ecole).

Directeur du cours : Jean-Claude Lemyze

398-415c. Grammaire pratique et rédaction

Ce cours s'adresse à des étudiants qui ont encore besoin de consolider leurs connaissances grammaticales.

Exercices pratiques de construction de phrases qui porteront sur des textes tirés pour la plupart d'articles de journaux. L'orthographe sera contrôlée à l'occasion des exercices de rédaction.

Manuel : H. Bonnard, *Grammaire française des lycées et des collèges* (S.U.D.E.L.).

Jean Domerc

398-416c. Grammaire pratique avancée et stylistique

Ce cours s'adresse à des étudiants qui ont besoin de parfaire des connaissances grammaticales déjà solides et d'enrichir leurs moyens d'expression.

Le cours comportera deux aspects : la grammaire et la stylistique.

La grammaire sera étudiée de façon pratique et vivante par des exercices de rédaction individuelle ou collective.

La stylistique étudiera les moyens d'expression et leurs nuances à l'aide d'exercices.

Manuel : C. Bally, *Traité de stylistique française* (tomes I et II) (Klincksieck).

Jean Domerc

398-417c. Explication de textes québécois

A partir d'un choix de textes de différents genres (roman, poésie, théâtre, conte, chanson) empruntés à divers auteurs, réponse possible à une interrogation quotidienne : *qu'est-ce qu'un Québécois ?*

Les étudiants se procureront les textes photocopiés nécessaires au Secrétariat de l'Ecole au début de la session.

Ouvrages de référence[1] *:* A Viatte, *Histoire littéraire de l'Amérique française* (Presses Universitaires de Laval, P.U.F., 1954) ; *Histoire de la littérature française du Québec* (Ed. P. de Grandpré, Beauchemin, Montréal, 1969, t. III et IV).

Benoît Lacroix

398-418c. Explication de textes français

Ce cours aura pour dessein d'initier les étudiants aux méthodes françaises d'explication de textes. Il aura aussi pour souci de parcourir, au moyen de textes allant du 16ème siècle à nos jours, les principales époques de la littérature française.

Des textes ronéotypés seront distribués aux étudiants au début de la session.

Raphaël Molho

398-419c. Aspects actuels de la vie québécoise

A partir d'un choix d'activités culturelles et sportives de Montréal durant la période d'été, découverte d'une société multiforme en quête d'unité.

Ce cours s'adresse à des étudiants ayant déjà une *bonne connaissance du français parlé* (test sélectif oral au début de la session).

Le cours est limité à une douzaine d'étudiants environ.

Benoît Lacroix

398-420c. Aspects actuels de la vie française

Le cours sera fondé sur l'étude de documents apportés de France : interviews, débats enregistrés, chansons, montages audiovisuels, films, etc.

Le travail demandé sera principalement oral : chaque étudiants choisira un document qu'il présentera, et il animera, en collaboration avec le professeur, le débat qui suivra (un petit dossier sera fourni pour aider à la préparation du débat).

(1) **Ouvrages de référence** — Il s'agit d'ouvrages dont la consultation peut être utile aux étudiants, mais dont l'acquisition n'est aucunement nécessaire.

Ce cours s'adresse à des étudiants ayant déjà une *bonne connaissance du français parlé* (test sélectif oral au début de la session).

Le cours est limité à une vingtaine d'étudiants environ. Priorité d'admission sera donnée aux étudiants qui auront pris contact par écrit avec le professeur avant la session pour lui signaler leur intention de suivre le cours (adresser la lettre au Secrétariat de l'Ecole qui transmettra).

Catherine Dol

398-421c. Les arts du spectacle au service de la connaissance de la langue française : théâtre et diction

L'expérience des années passées nous a prouvé que la pratique des arts du spectacle est un des moyens les plus rapides et les plus efficaces offerts aux étudiants pour perfectionner leur français oral et pour acquérir aisance, naturel, et même élégance, dans l'usage pratique et vivant de la langue.

Le cours exigera au total de huit à dix heures de travail hebdomadaire en moyenne, réparties en séances d'après-midi ou du soir dont l'horaire sera fixé de façon très souple au début de la session en accord avec le responsable du cours, de façon à éviter d'entrer en conflit d'horaire avec d'autres activités.

Travail individuel ou de groupe, sous la direction du responsable du cours, assisté de nombreux instructeurs.

Le cours sera divisé en *trois ateliers* de travail :

1 — *Dramatisation de la fable, du conte et du poème* (La Fontaine, Daudet, Flaubert, Nerval, Vian, Poètes québécois, etc). Exercices de diction sur des textes simples, individuellement ou en groupes. Des textes ronéotypés seront remis aux étudiants.

2 — Participation au *Théâtre de marionnettes :* fabrication de poupées, élaboration de scénarios, techniques spécifiques, animation et jeu dramatique, présentation de spectacles.

3 — *Théâtre français et québécois :* mime, expression corporelle, communication non verbale, improvisation, extraits de pièces ; représentation d'œuvres intégrales parmi lesquelles Molière, *Le médecin volant, La Jalousie du Barbouillé ;* F. Loranger, *Encore cinq minutes ;* etc.

Les étudiants devront passer au cours de la session par chacun des trois ateliers. Ils auront l'occasion d'y travailler avec de jeunes Québécois appartenant au groupe de théâtre de l'école secondaire montréalaise *Polyvalente Pierre-Dupuy* avec qui ils monteront en commun certains spectacles.

Si d'autres pièces de théâtre (ou certains poèmes ou textes en prose) retiennent l'attention des étudiants, il sera possible de les intégrer dans le travail en atelier ou dans le programme des soirées poétiques ou théâtrales présentées au public de l'Ecole.

Le cours est limité à une vingtaine d'étudiants environ. Les étudiants ne seront admis qu'après un *entretien* avec le responsable du cours au début de la session. Le niveau de connaissance de la langue parlée n'entrera aucunement en ligne de compte pour l'admission, le cours étant ouvert à tous en principe. Le cours ne comportera pas de travaux écrits.

Ce cours peut compter au choix pour un cours de Langue ou de Littérature.

Willy Demoucelle

1. Programme spécial [1] : Découverte de Montréal et du milieu socio-culturel québécois

Le programme vise, par des *rencontres* avec des personnalités politiques, syndicales ou artistiques, avec des groupes de citoyens et avec des représentants d'organismes gouvernementaux, à faire connaître les réalités sociales, culturelles et politiques de Montréal et du Québec.

Le programme comporte également des *visites* de Montréal : un lieu historique : le Vieux-Montréal ; galeries d'art ; musées ; etc.

Les activités ont lieu l'après-midi ou le soir ; d'une durée approximative de deux heures, elles réunissent de 15 à 30 étudiants selon le type d'activités. Les deux responsables de ce programme agissent comme animateurs et font le lien entre les étudiants et les personnalités rencontrées.

Ce programme s'adresse :

1. obligatoirement aux étudiants du cours 411 (ou 411-412) *Le français tel qu'on le parle* qui devront suivre quatre ou six activités selon qu'ils choisissent le cours simple ou le cours double.

2. à tous les étudiants et professeurs de l'Ecole dans la mesure des places disponibles.

N.B. Le présent programme sera complété par des visites de Montréal de caractère plus touristique dirigées par des moniteurs de l'Ecole.

2. Programme spécial [2] : Excursions dans la province de Québec

Ce programme complète très utilement le précédent. Il comporte : 1/ une excursion à la plage d'Oka et une excursion (d'une journée et demie) à Québec, avec la participation d'animateurs québécois. 2/ des excursions libres, dans l'esprit du cours 411 (voir plus haut), qui pourront être décidées à l'initiative des étudiants et avec l'assistance des responsables de l'Ecole.

3. Programme spécial : Rencontre de la jeunesse québécoise

La participation régulière et très active d'un groupe important d'élèves de l'école secondaire montréalaise *Polyvalente Pierre-Dupuy* aux activités socio-culturelles de l'Ecole Française d'Eté donnera aux étudiants de cette dernière l'occasion de rencontrer de jeunes Québécois et de travailler avec eux tout au long de la session.

D'autres occasions de rencontre avec de jeunes Québécois seront offertes aux étudiants de l'Ecole, en particulier dans le cadre de fins de semaine inter-jeunes qui seront probablement [3] organisées pour les étudiants par « Perspective-jeunesse » dans des fermes de la région de Montréal, des Laurentides ou des Cantons de l'Est.

---

(1) Les programmes spéciaux font partie des activités socio-culturelles organisées par l'Ecole Française d'Eté l'après-midi ou le soir, en dehors des heures de cours.

(2) Ce programme spécial, comme tous ceux qui suivent, est ouvert à tous les étudiants et professeurs de l'Ecole.

(3) Au moment où ce programme est imprimé, l'Ecole n'est pas en mesure de prendre d'engagement formel à ce sujet.

4. Programme spécial : Découverte de l'Acadie

Peuplée dès 1604 et alors partie orientale du Canada français, l'Acadie (aujourd'hui partagée entre la Nouvelle-Ecosse et le Nouveau-Brunswick) compte une population francophone à près de 40%, fière de sa langue et de ses traditions maintenues à travers les vicissitudes de l'histoire.

Le programme comportera entre autres une initiation au folklore traditionnel acadien (danses et chants) et la représentation de deux pièces (acadiennes) d'A. Maillet, *La Sagouine* et *Gapi et Sullivan*.

5. Programme spécial : Festival du cinéma québécois

Reflet d'une société en pleine mutation, le jeune cinéma québécois témoigne d'un dynamisme et d'une originalité qui lui ont assuré ces dernières années une place de choix dans le cinéma international.

Une sélection de films récents, de haute qualité, de long et de court métrage, sera présentée tout au long de la session dans le cadre des activités organisées par l'Ecole Française d'Eté.

6. Programme spécial : Festival du cinéma français

Une sélection de films de long et de court métrage, choisis parmi les œuvres les plus significatives et les plus remarquables du 7ème art en France, sera présentée tout au long de la session dans le cadre des activités culturelles organisées par l'Ecole Française d'Eté. Des films d'art complèteront ce Festival.

7. Programme spécial : Ciné-club franco-québécois

Analyse et discussion de chacun des films projetés dans le cadre des deux Festivals précédents. Des personnalités du cinéma québécois participeront éventuellement aux débats.

8. Programme spécial : Théâtre franco-québécois

Des spectacles de théâtre québécois et français seront présentés dans le courant de la session avec le concours du groupe théâtral de l'école secondaire montréalaise *Polyvalente Pierre-Dupuy*.

Les étudiants responsables de la mise en scène et les comédiens seront à la disposition des étudiants et des professeurs de l'Ecole pour répondre, durant les répétitions qui auront lieu à Douglas Hall, aux questions qui pourront leur être posées sur les activités théâtrales dans une école secondaire québécoise et sur les problèmes d'ordre artistique, technique et pédagogique qu'y soulève la réalisation de spectacles de ce genre.

9. Programme spécial : Théâtre de marionnettes

Spectacles de marionnettes dans le cadre de soirées données à l'Ecole Française d'Eté. Seront présentés entre autres *Le Petit Prince*, de Saint-Exupéry, et *Pierre et le Loup*, de Ramuz, musique de Prokofiev.

10. Programme spécial : Soirées poétiques québécoises, antillaises, africaines et françaises

La poésie du monde de la francophonie, illustrée par les thèmes de la liberté, la femme, la ville, la condition humaine, etc.

11. Programme spécial : Poésie et ballet

Par les étudiants de l'école secondaire montréalaise *Polyvalente Pierre-Dupuy*, un spectacle sur *la naissance de l'homme*.

12. Programme spécial : Panorama de la chanson québécoise et française d'aujourd'hui

Avec le concours de jeunes interprètes québécois, découverte des *grands* de la chanson québécoise et française actuelle : Pauline Julien, Louise Forestier, Ginette Reno, Emmanuelle, Gilles Vigneault, Robert Charlebois, Jean-Pierre Ferland, Claude Léveillé, Mireille Mathieu, Pascale Audrey, Nana Mouskouri, Joe Dassin, etc.

13. Programme spécial : Découverte de la jeune peinture québécoise

Expositions de jeunes peintres québécois dans la chaude atmosphère de la Grande Salle de l'Ecole Française d'Eté.

14. Programme spécial : Initiation aux danses folkloriques québécoises

Chaque semaine étudiants (et professeurs) pourront s'initier aux danses traditionnelles du Québec : gigues, danses carrées, paul-jones, rills, rigodons, « et swinge-la-bacaisse-dans-l'fond-d'la-boîte-à-bois ».

15. Programme spécial : Provinces de France

A la découverte de la France, à travers la diversité de ses provinces dont chacune a su préserver sa personnalité, façonnée par l'histoire.

Le programme comportera des projections de films, des présentations de documents photographiques, sonores et iconographiques, des séances de dégustations commentées de vins, fromages et autres spécialités de quelques provinces françaises, etc. L'Ecole présentera en outre une mini-exposition historique et artistique consacrée au vin et à son rôle dans la vie et l'économie françaises.

16. Programme spécial : Semaine de la Bourgogne

Complétant le Programme précédent, une des semaines de la session d'été sera plus particulièrement consacrée, dans le cadre des activités culturelles organisées par l'Ecole, à la découverte d'une des provinces françaises les plus attachantes par son histoire, son art, son folklore, ses ressources naturelles et humaines, ses activités multiples . . . et ses vins prestigieux !

17. Programme spécial : Café littéraire

Guitares, poésie, tournois et échanges littéraires à *La Guinguette*, café de plein air de l'Ecole Française d'Eté.

18. Programme spécial : Chantons ensemble

Un voyage à travers la chanson québécoise et la chanson française d'hier et d'aujourd'hui. Apprenons à chanter en français . . .

Deux fois par semaine un troubadour animera un groupe à *La Guinguette*, café de plein air de l'Ecole Française d'Eté. Les étudiants trouveront les paroles des chansons qu'ils apprendront dans un « Cahier de chants » qu'ils pourront se procurer au Secrétariat de l'Ecole Française d'Eté.

L'attention des étudiants futurs professeurs ou déjà professeurs de français est attirée sur le grand intérêt pédagogique que peut présenter ce Programme pour leur enseignement.

19. Programme spécial : Concours de reportage photographique

Un concours de photographie, doté de plusieurs prix et jugé à la fin de la session, sur les deux thèmes suivants : 1/ découverte de Montréal et des Québécois 2/ la vie quotidienne à l'Ecole Française d'Eté. Le règlement du concours sera communiqué aux étudiants au début de la session.

20. Programme spécial : Pratique des arts plastiques

Ce programme est destiné à inciter les étudiants à la créativité artistique par l'éveil ou le développement de leurs dons personnels. Le programme est consacré au dessin et à la peinture ; il est ouvert aussi bien aux débutants qu'à ceux qui ont déjà pratiqué ces arts.

Les séances ont lieu tous les dimanches de la session, de 2h. à 5h. Une redevance de $15 sera demandée aux participants à qui tout le matériel nécessaire sera fourni, à l'exception des couleurs à l'huile.

21. Programme spécial : Discothèque du vendredi

Tous les vendredis soirs à l'Ecole, danse ininterrompue, éclairages, animateurs, de 10h. du soir à 2h. du matin.

22. Programme spécial : Introduction à la méditation transcendentale et à la science de l'intelligence créatrice

« Tous les problèmes de la vie ont à leur origine la faiblesse de l'individu. Quand une personne n'est pas pleinement développée, son esprit est faible, son action est faible, son épanouissement est faible ; c'est alors que les problèmes surgissent. La Méditation Transcendentale, en permettant de contacter la source de toute force, de toute énergie et de toute intelligence, élimine du même coup la base de tous les problèmes. » (Maharishi Mahesh Yogi).

Actuellement enseignées comme cours crédités dans plus de quarante Universités d'Amérique du Nord, la méditation transcendentale et son corollaire, la science de l'intelligence créatrice, ouvrent la voie à des conceptions entièrement nouvelles dans le domaine de l'éducation : l'établissement de la base de toute connaissance dans la conscience de l'étudiant et la possibilité d'examiner les changements physiologiques individuels en tant que mesures de l'établissement de la connaissance. Les expériences poursuivies dans ce sens depuis plusieurs années dans les Instituts de Recherche de Stanford et d'Harvard, et également à McGill, ont déjà permis des découvertes très significatives, publiées dans les grandes revues scientifiques nord-américaines.

Etudiants et professeurs de l'Ecole Française d'Eté pourront s'initier à la méditation transcendentale à l'Ecole même, sous la conduite d'instructeurs francophones qualifiés et aux conditions habituelles de l'Association Internationale de Méditation Transcendentale. Des aperçus seront donnés sur les cours avancés de la science de l'intelligence créatrice et sur l'enseignement diffusé par les Universités spécialisées récemment créées ou en voie de création aux Etats-Unis et au Canada.

23. Programme spécial : Vers une nouvelle approche des problèmes de la santé et de la maladie ?

Faut-il remettre en question certaines des bases, essentiellement symptomatiques, de la médecine occidentale actuelle au profit d'une vue unitaire des problèmes de santé, fondée sur le rôle capital de l'énergie nerveuse et de ses modes d'entretien, de restauration et d'accroissement ? Une ou deux conférences d'information, suivies de *débats contradictoires,* donneront un aperçu sur les expériences poursuivies dans cette voie, en particulier par l'école hygiéniste aux Etats-Unis et dans divers pays d'Europe et sur les perspectives que peuvent ouvrir des recherches plus récentes. On évoquera aussi pour les discuter les vues exposées dans son dernier ouvrage par Ivan Illich sur « la médicalisation de la santé » et sur « la médecine qui rend malade plus qu'elle ne guérit ». Une place sera faite également dans les exposés et dans les débats aux techniques du jeûne et à la question de l'intérêt que peut présenter le jeûne aux points de vue somatique, psychologique et extrasensoriel, ainsi que dans la thérapie de très nombreuses maladies, comme le cancer ou les maladies mentales ; on donnera un aperçu des expériences poursuivies à ce propos dans divers pays, en particulier aux Etats-Unis, en France et en U.R.S.S.
Présentateur : Jean Lerède.

24. Programme spécial : Vers la deuxième révolution sexuelle ?

Une ou deux conférences, suivies de *débats contradictoires,* sur les perspectives que peut ouvrir à la sexualité la modification évolutive de la conscience. Cette modification peut-elle susciter une nouvelle physiologie et de nouveaux comportements sexuels ? Peut-on entrevoir une solution naturelle au problème de la régulation des naissances sans recours aux procédés anti-conceptionnels ? La sexualité peut-elle elle-même devenir un facteur d'évolution de la conscience ?
Présentateur : Jean Lerède.

25. Programme spécial : Qu'est-ce que la suggestologie ?

Deux ou trois conférences d'information, suivies de *débats contradictoires,* sur la suggestologie et sur les expériences en cours au Canada, aux Etats-Unis et dans divers pays d'Europe.

L'Ecole Française d'Eté espère la participation à ces conférences-débats du Dr G. Lozanov, Directeur de l'Institut de Suggestologie de Sofia, invité officiellement à séjourner à l'Ecole.
Présentateur : Jean Lerède.

26. Programme spécial : L'Aide-Mémoire

Chaque matin avant les cours et durant toute la session un bulletin socio-culturel d'information et de liaison, *L'Aide-Mémoire,* est publié et diffusé par les soins de l'Ecole Française d'Eté à tous les étudiants et professeurs de l'Ecole.

Toutes précisions utiles seront données au début de la session sur les conditions dans lesquelles les étudiants qui le désirent pourront apporter leur concours à la rédaction et à la préparation matérielle de *l'Aide-Mémoire*, dont c'est le cinquième été d'existence et qui tient à présent une place importante dans la vie communautaire de l'Ecole.

27. Programme spécial : Les lundis de l'Ecole Française d'Eté

Tous les lundis soirs, réceptions informelles où les résidents de l'Ecole — étudiants et professeurs — accueillent les non-résidents et leurs familles dans une atmosphère d'amitié qui permet aux uns et aux autres de se mieux connaître, pour le plus grand profit du travail poursuivi en commun durant la session d'été.

Les lundis de l'Ecole Française d'Eté sont une des manifestations socio-culturelles de l'Ecole qui connaissent le plus grand succès depuis déjà plusieurs étés et auxquelles étudiants et professeurs sont le plus attachés.

PROGRAMME DE LA SECTION Ba

398-409c et (éventuellement) **410c. Cours accéléré de français parlé (Accelerated learning of spoken French)**

Daily and intensive practice of spoken French by means of dialogues based on concrete and everyday situations with individual and collective exercises allowing students to improvise freely.

This course intended for *beginning students having no previous knowledge of French*, is based on the work of Dr. G. Lozanov, Director of the Research Institute of Suggestology in Sofia, Bulgaria, and on the experiences of accelerated learning of living languages according to the Lozanov method as carried out since 1973 by the General Direction of the Staff Development Branch of the Canadian Government Public Service in Ottawa.

The objective of this course is to bring the participants to a level equal or superior to that of *Voix et Images de France I* or *Dialogues Canada I*, and to enable the students to speak French with some degree of fluency by the end of this six week course.

The teaching consists of a *three-hour daily course* during five weeks (except Saturdays and Sundays) in groups composed of a *maximum of 12 students*. A sixth week will be devoted to various exercises during which the students' acquired knowledge will be put into practice.

Optional intensive activities in the afternoon and evening, designed to progressively create *total immersion* in French, both socially and culturally as well as linguistically, will be offered.

The course (398-409c) carries *eight undergraduate credits* for those students who will attend the morning sessions ; *two more credits* will be alloted for attendance to the optional activities. (398-410c = 2 credits).

Full-time residence at the school is not compulsory for residents of the Montreal region.

Texts will be available at the Office of the French Summer School at the beginning of the session.

Directors of the course : Jean-Claude Lemyze
Jean Lerède

DIVISION C

(niveau gradué)

La Division C est réservée aux étudiants habilités à s'inscrire à des cours gradués en français, mais ne poursuivant pas de Maîtrise à l'Université McGill. **Les cours suivis à l'Ecole Française d'Eté en Division C sont transférables en crédits pour le Bac.Spéc., le M.A. et le Ph.D. dans toutes les Universités canadiennes et américaines.**

La plupart des étudiants de la Division C sont professeurs (francophones ou anglophones), principalement au Canada et aux Etats-Unis où ils enseignent le français (langue première ou langue seconde) durant l'année aux niveaux élémentaire, secondaire, collégial ou universitaire. La Division C compte également parmi ses étudiants des représentants de l'entreprise privée, des fonctionnaires, des diplomates, des avocats, des médecins, des infirmières, des architectes, des ingénieurs, des chercheurs scientifiques ou de futurs membres de ces diverses professions.

Le programme des cours de la Division C est le même que celui des cours de la Division D.

Le choix des cours est libre. Les étudiants suivent normalement *quatre cours.* (Ils peuvent en suivre moins ou en suivre certains en qualité d'auditeurs libres, ou suivre certains cours en Division B).

Les étudiants qui le désirent peuvent s'inscrire à *un ou deux cours supplémentaires ;* en aucun cas, ils ne peuvent s'inscrire à plus de six cours.

En règle générale, il est déconseillé aux étudiants de suivre plus de deux cours de Littérature par été.

Sur la *vie communautaire* à l'Ecole et *l'immersion totale,* linguistique et culturelle, voir p. 7, préambule au Programme des cours de la Division B.

N.B. : Un étudiant demandant son admission en Division C, mais qui envisagerait peut-être de s'engager par la suite dans des études en vue de la Maîtrise à l'Ecole Française d'Eté (et qui répondrait aux critères d'admission exigés pour l'inscription en Maîtrise), aura intérêt à s'inscrire de préférence en Session Préliminaire de la Division D, ce qui lui permettra d'être crédité des cours suivis, s'il décidait de poursuivre des études en vue du M.A. à la session d'été suivante.

PROGRAMME DE PERFECTIONNEMENT POUR L'ENSEIGNEMENT DU FRANÇAIS LANGUE PREMIÈRE ou LANGUE SECONDE DANS LES ÉCOLES SECONDAIRES

L'Ecole Française d'Eté propose chaque été des cours de Langue, de Littérature et de Civilisation (voir p. 20 et suivantes), ainsi que des activités socio-culturelles, qui constituent, pour les enseignants du français langue première ou langue seconde ou pour ceux qui, déjà enseignants, se destinent à ce genre d'enseignement, un *Programme de perfectionnement de haute qualité pour l'enseignement* du français dans les écoles secondaires *et pour l'animation culturelle* dans ces établissements. Ces cours ne sont pas sanctionnés par un Certificat pour les étudiants inscrits en Division C, mais ils sont reconnus et validés par le Ministère de l'Education du Québec sur la base d'une année de scolarité à temps plein pour douze cours suivis et réussis. Les étudiants-enseignants peuvent dans certaines conditions bénéficier de bourses offertes par les services du Ministère de l'Education (se renseigner auprès de ces services). Les cours suivis peuvent servir de cours d'appoint pour la préparation de Certificats spécialisés déjà existants.

DIVISION D

M.A. (1)

Cette Division est réservée aux étudiants préparant le M.A. en français de l'Université McGill à l'Ecole Française d'Eté. Les étudiants préparant le M. Ed. (Teaching French as a Second Language) de l'Université McGill sont admis à suivre certains cours (Section De) (2). La quasi-totalité des étudiants de la Division D sont professeurs (francophones ou anglophones), principalement au Canada et aux Etats-Unis où ils enseignent durant l'année le français (langue première ou langue seconde) aux niveaux élémentaire, secondaire, collégial ou universitaire.

La Maîtrise en français est de plus en plus généralement exigée pour enseigner le français, non seulement au niveau collégial, mais aussi au niveau secondaire.

La Maîtrise en français à l'Ecole Française d'Eté est une *Maîtrise pluridisciplinaire* qui comporte des cours de Langue, de Littérature et de Civilisation. Pluridisciplinaire, la Maîtrise de l'Ecole Française d'Eté l'est aussi en raison de la *vocation internationale de l'Ecole* que reflète le choix de ses professeurs et le programme de ses cours où tendent à être représentées dans la mesure du possible les littératures et les civilisations de l'ensemble du monde francophone. Pluridisciplinaire, la Maîtrise de l'Ecole Française d'Eté l'est enfin par l'*importance du programme socio-culturel* qui la complète et qui doit être considéré comme faisant partie intégrante de l'enseignement.

Les étudiants de la Division D étant appelés à suivre les cours de l'Ecole pendant plusieurs sessions d'été consécutives, le programme des cours est un *programme quinquennal,* conçu de façon à embrasser en *plusieurs* sessions un ensemble de connaissances très large en Langue et en Littérature aussi bien qu'en Civilisation(3). Un domaine, un siècle, un genre ou un auteur qui ne seraient pas abordés à une session d'été, ou qui le seraient peu, le seront vraisemblablement à la session suivante ou à l'une des sessions ultérieures.

---

(1) Voir p. 43 et suivantes, « Réglementation du M.A. » et « Scolarité du M.A. ».

(2) Voir p. 54, « Master in Education ».

(3) Quelques exemples de cours de Civilisation donnés lors des dernières sessions à l'Ecole Française d'Eté : La France au 19e siècle ; Le troisième Empire colonial français (1871-1962) ; Les transformations économiques de la France depuis 1945 **(Antoine Bonifacio)** ; La Commune de Paris de 1871 **(Michel Winock)** ; Problèmes du développement culturel dans les sociétés industrielles avancées (cycle de conférences) **(Lucien Goldmann)** ; Etude comparée des partis politiques au Québec, en France, en Angleterre et en U.R.S.S. **(Jean Meynaud)** ; Problèmes du Québec contemporain **(Marcel Rioux)** ; Histoire contemporaine du Québec **(Gérard Bergeron)** ; Langue et culture au Québec **(Jean-Claude Corbeil)** ; La musique contemporaine au Québec, en France et dans le monde **(Serge Garant)** ; La peinture québécoise **(Henri Barras)** ; Peinture et littérature (cycle de conférences) **(René Huyghe)** ; Architecture, urbanisme et mouvement général des idées en France de 1800 à 1914 ; La révolution cubiste et l'artiste dans la cité ; Etude comparée des tendances actuelles de l'art en France, aux Etats-Unis, en U.R.S.S. et au Québec **(Michel Ragon)** ; Cybernétique et prospective (cycle de conférences) **(Nicolas Schöffer)** ; Problèmes de développement en Afrique francophone **(René Dumont)** ; Problèmes religieux de la France contemporaine ; Religion et psychanalyse **(abbé Marc Oraison)** ; Sémiologie et psychanalyse **(Georges Mounin)** ; Classes et luttes de classes sous la Révolution française **(Michel Vovelle)** ; Esthétique contemporaine ; Christianisme et socialisme **(Roger Garaudy)** ; etc.

TOUS LES ÉTUDIANTS SUIVANT DES COURS EN DIVISION D DOIVENT OBLIGATOIREMENT AVOIR LU AVANT LA SESSION D'ÉTÉ ET BIEN CONNAÎTRE TOUS LES « TEXTES » (AINSI QUE LES « LECTURES OBLIGATOIRES ») INDIQUÉS À LA FIN DU SOMMAIRE DE LA PLUPART DES COURS [1].

En règle générale, il n'est pas conseillé de suivre plus de deux cours de Littérature par été.

Le travail exigé comporte dans la plupart des cours *un travail écrit de quinze à vingt pages* dactylographiées à double interligne (ou l'équivalent manuscrit).

Là où il est exigé tel qu'il vient d'être défini, le travail écrit tient lieu d'examen final.

Il est vivement conseillé aux étudiants, lorsqu'ils font leur choix de cours, avant la session d'été, de prévoir un (ou des) cours de remplacement au cas où, en raison des exigences d'admission dans certains cours, ils n'y seraient pas acceptés, ou au cas où ils changeraient de cours dans les premiers jours de la session.

COURS DE LANGUE

398-643c. Cours intensif de vocabulaire systématique et expressions usuelles

Réservé aux étudiants non francophones de la Division C.

Cours quotidien de perfectionnement dans la pratique de la langue parlée (cinq heures par semaine).

Séances de conversation par classes de *huit étudiants* environ. Chaque séance se termine par un commentaire des principales difficultés grammaticales et lexicologiques rencontrées au cours de la conversation. *Tests de contrôle hebdomadaires.*

Manuel : J. C. Lemyze, *Par exemple* (Livre II et Dialogues II) (Centre Educatif et Culturel, Montréal).

Directeur du cours : Jean-Claude Lemyze

398-644c. Cours intensif de phonétique

Réservé aux étudiants non francophones.

Cours quotidien (cinq heures par semaine).

Exposé du système phonologique, des sons et des habitudes articulatoires du français en fonction des difficultés de prononciation que rencontrent les non francophones. Les étudiants seront assistés de nombreux instructeurs qui travailleront *individuellement* avec eux sous la direction du professeur. En outre, le laboratoire de langues sera à la disposition des étudiants du lundi au vendredi de 9h à 17h.

Les étudiants peuvent suivre ce cours durant deux sessions d'été, consécutives ou non.

Manuel : J. C. Lemyze, *A l'écoute du français* (en vente au Secrétariat de l'Ecole).

Directeur du cours : Jean-Claude Lemyze

---

(1) **Bibliographies sélectives** — Sous ce titre figurent des ouvrages soigneusement sélectionnés par les professeurs chargés de certains cours, mais dont la lecture n'est aucunement indispensable à la préparation des étudiants ; cette liste a pour seul objet d'orienter ces derniers dans le choix d'éventuelles lectures complémentaires en vue de recherches personnelles avant, pendant ou après la session.

398-645c. Grammaire pratique approfondie et stylistique

Réservé aux étudiants non francophones.

Ce cours s'adresse aux étudiants qui ont besoin de parfaire leurs connaissances grammaticales et d'enrichir leurs moyens d'expression.

Le cours comportera deux aspects : la grammaire et la stylistique.

La grammaire sera étudiée de façon pratique et vivante par des exercices de rédaction individuelle ou collective.

La stylistique étudiera les moyens d'expressions et leurs nuances à l'aide d'exercices.

Les étudiants peuvent suivre ce cours durant deux sessions d'été, consécutives ou non.

Manuel : C. Bally, *Traité de stylistique française* (tomes I et II) (Klincksieck).

Jean Domerc

398-646-647c. Phonétique corrective, techniques de la classe de conversation et animation culturelle (cours double)

Stage de pratique et de recherche réservé aux étudiants francophones. Seuls les *enseignants* sont admis à s'inscrire à ce cours. En raison du nombre très limité de places, les admissions seront sélectives ; les critères retenus seront : 1. une pré-inscription auprès du Secrétariat de l'Ecole dès que possible et au plus tard le 15 juin ; 2. un examen du dossier académique ; 3. *un entretien* avec le professeur responsable au début de la session d'été (le jour des inscriptions). Le professeur réunira les étudiants admis au cours aussitôt après la fin des inscriptions.

Le cours comportera trois parties :

1. *Phonétique corrective*

Cours quotidien (cinq heures par semaine).

Après un cours théorique d'introduction, chaque étudiant sera chargé d'assurer en collaboration avec le professeur responsable du cours, des séances de phonétique corrective auprès des étudiants non francophones.

Les étudiants devront remettre chaque semaine un travail écrit de transcription phonétique.

Manuel : J. C. Lemyze, *A l'écoute du français* (en vente au Secrétariat de l'Ecole).

Lectures conseillées : P. Delattre, *Principes de phonétique française* (Middlebury College) ; B. Malmberg, *La phonétique* (Coll. Que sais-je ?, P.U.F.) ; H. Sten, *Phonétique française* (Munksgaard).

2. *Techniques de la classe de conversation*

Les étudiants seront chargés d'assurer cinq heures de conversation par semaine dans le cadre des cours de Vocabulaire systématique et expressions usuelles (cours 413 et 643) pour non francophones.

Les étudiants seront assistés dans leur enseignement par le professeur responsable du cours qui visitera les classes de conversation régulièrement.

Manuel : J. C. Lemyze, *Par exemple* (Livre II et Dialogues II) (Centre Educatif et Culturel, Montréal).

Lecture complémentaire (et obligatoire) : P. Burney et R. Damoiseau, *La classe de conversation* (Hachette/Larousse).

3. *Animation culturelle*

Les étudiants agiront comme animateurs culturels dans le cadre du cours 411-412 (Le français tel qu'on le parle) ; cette activité d'animation exigera en moyenne neuf heures par semaine réparties en trois séances de l'après-midi ou du soir ; la plupart de ces activités auront trait à la découverte de Montréal.

Les étudiants devront remettre en fin de session un *rapport écrit* de huit à dix pages dactylographiées à double interligne (ou l'équivalent manuscrit) portant sur les trois parties du cours (phonétique, conversation et animation). Ce rapport prendra la forme d'une étude critique fondée sur leur expérience personnelle au cours de la session d'été.

Les étudiants peuvent suivre ce cours durant deux sessions d'été, consécutives ou non.

Jean-Claude Lemyze

398-648c. Initiation à l'heuristique : exercices pratiques de créativité

« Eurêka, j'ai trouvé ! » s'écria Archimède en sortant de sa baignoire. Nous allons essayer, nous aussi, de « sortir du bain » (clichés de toutes sortes, comportements stéréotypés, pesanteur du bagage culturel, réflexes conditionnés... qui brident notre fantaisie et bloquent la découverte). Nous nous efforcerons d'assouplir notre imagination par une modeste gymnastique mentale pompeusement appelée « heuristique ». Comme toute gymnastique, celle-ci n'a d'efficacité que si elle est régulièrement pratiquée : il ne s'agira ici que d'une mise en forme.

Ces séances voudraient offrir à chacun une occasion de déployer librement, pour le plaisir, son *imagination créatrice,* de se découvrir chercheur et « trouveur », mais aussi d'acquérir systématiquement une *technique d'invention* utile à chacun dans son domaine propre. Les exercices proposés visent à développer de nouvelles attitudes en cultivant, par exemple, l'aptitude à saisir et à exploiter les analogies, à rapprocher et à combiner des connaissances sans lien apparent... Chaque séance comprendra en général deux temps très différents : une phase spontanée et désordonnée d'accumulation des idées, et une phase critique d'organisation et de synthèse.

Dans l'ensemble, on mettra l'accent sur la *méthodologie de la recherche d'idées* plus que sur l'apprentissage de la langue. Toutefois, les étudiants trouveront à ce cours l'occasion d'étendre leur vocabulaire et de s'entraîner à la prise de parole.

Pour chaque séance, des documents ronéotypés seront distribués aux étudiants.

Le nombre de participants au cours sera limité à 15. Pré-inscription par lettre adressée dès la parution du présent Programme au Secrétariat de l'Ecole. Clôture des inscriptions : 1er mai. Les étudiants qui ne seraient pas admis seront avisés par lettre avant le 20 mai.

Manuel de références : M. Fustier, *Exercices pratiques de créativité* (Ed. S.M.E., 26, place Tolozan, 69281 Lyon, Cedex I) (ce manuel servira de base de travail pour de nombreux exercices, mais son acquisition n'est nullement nécessaire aux étudiants).

Dominique Nichet - Baux

398-649c. Image et langage

Le problème sera introduit historiquement par l'étude comparée de quelques positions *philosophiques* classiques. La réflexion se poursuivra par un examen de la thèse *sémiologique,* à travers l'étude de quelques auteurs contemporains.

Au début de la session, les étudiants pourront se procurer, au Secrétariat de l'Ecole Française d'Eté, un recueil ronéotypé de textes choisis.

Cette élucidation théorique s'accompagnera nécessairement d'une initiation à la lecture d'images, au moyen d'exercices pratiques.

On s'interrogera éventuellement, si le besoin s'en fait sentir, sur les problèmes posés par les méthodes audio-visuelles d'apprentissage des langues.

Les travaux des étudiants comporteront obligatoirement un double aspect, théorique et expérimental.

Ce cours peut compter au choix pour un cours de Langue ou de Civilisation.

Lectures obligatoires : J.-P. Sartre, *L'imaginaire* (N.R.F., 1948) ; R. Barthes, *Le degré zéro de l'écriture,* suivi de *Eléments de sémiologie* (Seuil, 1965) ; G. Mounin, *Introduction à la sémiologie* (Ed. de Minuit, 1970).

Lectures conseillées : C. Metz, *Essais sur la signification au cinéma* (Klincksieck, 1968) ; *L'analyse des images* (no 15 de la revue Communications, Seuil, 1970) ; U. Eco, *La structure absente* (Mercure de France, 1972).

Maurice Fauquet

398-650-651c. Réflexions critiques sur l'image, moyen de communication
(cours double)

La pédagogie doit intégrer les acquis récents, mais déjà solides, d'une recherche audio-visuelle dont la problématique transcende l'aspect figuratif, illustratif, de ses premières démarches. L'image peut, et doit devenir, à l'égard de tout autre objet quelconque, l'occasion d'opérations qui autorisent une activité intelligente. Dans ce but, les recherches audio-visuelles doivent surtout faire porter leur évaluation sur les opérations sans lesquelles il n'y a pas de véritable compréhension. L'objet du cours est précisément d'approfondir quelques exemples concrets de telles recherches sur la compréhension des messages audio-visuels par des publics scolaires.

Programme

I *Introduction générale*

— Examen critique de différents schémas théoriques sur le processus de communication.

— Réflexions théoriques sur les conditions préalables à l'évaluation de la compréhension des messages audio-visuels.

Cette introduction a pour but de définir les concepts psychologiques indispensables à la suite du cours.

II *Etude approfondie de quelques thèmes de recherche donnés ici uniquement à titre indicatif*

— Etude expérimentale des problèmes posés par la perception et la compréhension d'une image fixe (bref rappel d'une partie du cours 609-610 de la session de 1974).

— Etude expérimentale des problèmes posés par la compréhension d'une suite d'images fixes.

— Etude expérimentale sur la compréhension de films de motivation à l'expression.

— Exemple d'emploi pédagogique d'une batterie multimédia sur le thème : La mer (film de motivation + films didactiques + diapositives).

— Etude expérimentale de la compréhension d'un dessin animé par des enfants.

Pour faciliter le choix des étudiants, l'ensemble de ces thèmes sera d'abord rapidement présenté au début de la session. D'autre part, des visites de services pédagogiques audio-visuels sont envisagés l'après-midi, pour permettre une éventuelle sélection de documents produits localement. Ceux-ci serviront de matériaux pour les travaux des étudiants, travaux conçus comme une initiation à la méthodologie de la recherche pédagogique expérimentale.

On approfondira alors l'un ou l'autre des thèmes énumérés plus haut, en fonction des travaux expérimentaux retenus.

III *Exploitation des travaux effectués pendant la session*

Les résultats obtenus seront exposés et étudiés collectivement au cours du troisième tiers de la session.

Ce cours est ouvert aux étudiants qui auraient déjà suivi en 1974 le cours 609-610.

Ce cours peut compter au choix pour deux cours de Langue ou pour un cours de Langue *et* un cours de Civilisation.

Lectures obligatoires : J. Piaget, *Psychologie et pédagogie* (Denoël, 1969) ; M. Fauquet, *Conditions préalables à l'évaluation de la compréhension des messages audio-visuels* (revue : « Les Sciences de l'éducation », Paris, Didier, no 2-3 : avril-septembre 1973) ; A.M. Thibault-Laulan, *Le langage de l'image* (Ed. Universitaires, 1971).

Lectures conseillées : G. Mialaret, *Psycho-pédagogie des moyens audio-visuels dans l'enseignement du premier degré* (P.U.F., 1964) ; L. Porcher (sous la direction de), *La photographie et ses usages pédagogiques* (Colin-Bourrelier, 1974) ; R. La Borderie, *Les images dans la société et l'éducation* (Castermann, 1972).

Maurice Fauquet

398-652c. Linguistique générale

Définition : grammaire, philologie, linguistique.

Bref historique : Ferdinand de Saussure. Linguistique diachronique et linguistique synchronique. Langue et parole.

La phonologie et l'école de Prague. Hjelmslev et l'école danoise. La linguistique américaine. Sapir et les universaux du langage. La méthode distributionnelle : Bloomfield, Harris. Chomsky et la grammaire générative et transformationnelle.

Quelques grands problèmes : langage et langue ; langage et communication ; code oral et code graphique ; signe, sens, référence ; langue et culture, etc.

Notions de phonologie.

Ce cours s'adresse à des étudiants qui n'ont pas de connaissances préalables en linguistique générale.

Lectures obligatoires : E. Benveniste, *Problèmes de linguistique générale* (tomes I et II) (Gallimard).

Lectures conseillées : F. de Saussure, *Cours de linguistique générale* (Payot) ; Numéro spécial de la revue *Diogène :* Problèmes du langage (Gallimard, 1965) ; R. Jakobson, *Essais de linguistique générale* (Ed. de Minuit).

Ouvrage de référence [1] *:* O. Ducrot et T. Todorov, *Dictionnaire encyclopédique des sciences du langage* (Seuil).

Jean Domerc

(1) **Ouvrages de référence** — Il s'agit d'ouvrages dont la consultation peut être utile aux étudiants, mais dont l'acquisition n'est aucunement nécessaire.

398-653c. Syntaxe générative et transformationnelle du français contemporain

Principes et méthodes : Grammaire historique, analyse distributionnelle, théorie générative et transformationnelle. Compétence et performance. Phrases grammaticales et phrases non-grammaticales.

Questions étudiées : la transformation relative et l'adjectif épithète ; la transformation complétive et la transformation infinitive ; la « proposition infinitive » ; la nominalisation et les compléments du nom.

Ce cours s'adresse à des étudiants qui ont reçu une formation de base en linguistique générale ou qui ont une certaine expérience de l'enseignement de la grammaire française.

Lecture obligatoire : N. Ruwet, *Introduction à la grammaire générative et transformationnelle* (Plon) ou : C. Nique, *Initiation méthodique à la grammaire générative* (A. Colin).

Lectures conseillées : M. Gross, *Grammaire transformationnelle du français, Syntaxe du verbe* (Larousse) ; N. Ruwet, *Théorie syntaxique et syntaxe du français* (Seuil).

Jean Domerc

398-654c. Ethno-linguistique : les français d'Amérique

Description comparative, sous les aspects structural et sociolinguistique, des divers français en usage dans les Amériques. Le cours s'attachera davantage à la situation du français canadien considéré dans ses manifestations actuelles ainsi que dans ses racines socio-historiques. Dans la mesure du possible, les autres français — acadien, louisianais, haïtien et antillais — feront également l'objet d'une description susceptible de renforcer l'hypothèse de l'éclairage culturel d'une situation linguistique.

Ce cours peut compter au choix pour un cours de Langue ou de Civilisation.

Manuel : G. Dagenais, *Dictionnaire des difficultés de la langue française au Canada* (Ed. Pedagogia, Québec — Montréal, 1967).

Lectures conseillées : P. Pompilus, *Contribution à l'étude comparée du créole et du français à partir du créole haïtien (phonologie et lexicologie)* (Ed. Caraïbes, Port-au-Prince, Haïti) ; G. Lefebvre, *L'étude de la culture : la linguistique* (Recherches sociolinguistiques, p. 233 à 252, Presses de l'Un. Laval, 1962, vol. 3, no 1-2).

Gilles Lefebvre
Nathan Ménard

398-655c. Problèmes linguistiques du français canadien

Phonèmes et variphones du français canadien. Réductions phonétiques et incidences morpho-syntaxiques. Niveaux de langage et sociolinguistique. Travaux pratiques à partir d'un corpus du montréalais.

N.B. Les étudiants devront avoir suivi antérieurement au moins un cours d'introduction à la linguistique.

COURS DE LITTÉRATURE (1)

398-656c. Méthodologie du commentaire des textes littéraires français

Lorsqu'il se trouve amené à commenter un texte français, l'étudiant (et souvent même le professeur) se trouve généralement fort embarrassé pour déterminer la manière dont il abordera et présentera cette étude de texte. Il n'existe sans doute pas, en cette matière, de méthode qui ait valeur de panacée. Il est néanmoins possible d'abord de préciser les difficultés inhérentes à ce genre d'exercices, ensuite de prendre en considération les différents modes de lectures applicables à un texte.

(1) Le programme de 1975 ne comporte pas de cours sur la littérature du 18ème siècle qui sera en revanche représentée par au moins deux cours dans le programme de 1976.

Ce cours aura donc un objet éminemment pratique. A partir d'un certain nombre d'exemples choisis aussi diversement que possible (dans la littérature française des 19ème et 20ème siècles), il tendra à fournir un éventail de méthodes appropriées aux différents types de textes qui peuvent être soumis à un commentaire.

Des textes ronéotypés seront distribués aux étudiants au début de la session.

Ce cours peut compter au choix pour un cours de Littérature (du 19ème ou du 20ème siècle) ou pour un cours de Langue.

Maurice Descotes

398-657c. Atelier de poésie

Et pourquoi ne pas prendre à la poésie un plaisir sensuel, musculaire, gastronomique ? la palper, la mâcher, la respirer, en déguster les sons et danser sur ses rythmes, — l'habiter physiquement.

Etre poète, c'est d'abord *faire :* pourquoi ne fabriquerions-nous pas, nous aussi, des poèmes ? Les surréalistes, l'équipe de l'*Oulipo,* d'autres encore nous y aideront, en nous livrant les jeux auxquels ils ont souvent joué eux-mêmes : associations involontaires, manipulations de noms propres, de proverbes, de définitions du dictionnaire, etc. Ce faisant, il ne sera nullement interdit de réfléchir sur notre propre pratique pour mieux la contrôler et pour mieux comprendre (sentir) celle des autres « faiseurs ». En accomplissant ainsi le mouvement inverse de la démarche traditionnelle des étudiants face à un texte, nous pourrons peut-être prendre *personnellement* la mesure des éléments qui entrent dans le travail poétique.

Des textes ronéotypés seront distribués aux étudiants en début de session. Mais tous sont invités à apporter les textes poétiques qu'ils aiment et qu'ils souhaiteraient soumettre au travail du groupe. Une large place pourra être faite à la *poésie québécoise.*

Ce cours peut compter au choix pour un cours de Littérature (du 20ème siècle) ou de Langue.

Dominique Nichet-Baux

398-658c. Rencontre de la poésie de la Renaissance et de la chanson contemporaine de langue française

Comment a-t-on chanté l'amour au 16ème siècle ? Comment le chante-t-on aujourd'hui ? pourquoi et pour qui le chanter ? et s'agit-il du même amour ? En confrontant poésie chantée au 16ème siècle et chanson poétique du 20ème siècle, nous essaierons de cerner désaccords et constantes, en comparant les conditions de production et de diffusion, les thèmes abordés, la facture des poèmes... Chemin faisant, nous aurons l'occasion d'aborder le délicat problème des rapports de la musique et de la poésie.

Notre méthode de travail consistera à composer une anthologie comparée de la poésie de la Renaissance et de la chanson francophone actuelle. Donc, si l'on veut, pas de « lectures obligatoires » : mais chaque participant est invité à effectuer, *avant le début de la session, un travail personnel de recherche* — de manière à apporter sa contribution au travail de groupe sous forme de poèmes et de chansons de son choix, qu'il aura transcrits ou enregistrés. La présence dans cette anthologie de *chansons québécoises* est très vivement souhaitée. Ne pas oublier disques, cassettes et éventuellement instruments de musique. On consacrera quelques heures, en début de session, au classement des documents qui nous permettra de définir les principales étapes de notre étude.

Ce cours peut compter au choix pour un cours de Littérature du 16ème ou du 20ème siècle.

Notes sur les textes des poètes français du 16ème siècle : de nombreux recueils ont été édités dans des collections de poche ; il existe aussi, chez Garnier-Flammarion, une *Anthologie poétique française du 16ème siècle.*

Lectures conseillées : E. Balmas, *Renaissance* (tome II ; 1548-1570) (Coll. Littérature française, Arthaud).

Ouvrage de référence : H. Weber, *La création poétique en France de Maurice Scève à Agrippa d'Aubigné* (Nizet, 1956).

Dominique Nichet-Baux

398-659c. Molière dans la classe

Etudier en classe une pièce de Molière ne devrait pas consister seulement à donner des principales scènes quelques bonnes « explications de textes » : tout le monde est d'accord là-dessus ; mais on est plus embarrassé quand il s'agit de trouver comment faire . . . autrement.

Il n'existe sans doute pas de méthode ayant valeur de panacée, et ce cours ne veut pas proposer de « recettes pour bien enseigner Molière », mais plutôt être le lieu d'une recherche commune sur la manière d'aborder les farces et les courtes pièces, souvent négligées en *milieu scolaire* au profit des grandes comédies. Qu'ont-elles à dire aujourd'hui à de jeunes élèves ? que peuvent-ils dire d'eux-mêmes à travers elles ? Nous voudrions essayer d'apporter un élément de réponse à ces questions, en utilisant le texte comme tremplin pour des exercices de jeux dramatiques.

Le choix de notre texte de travail sera fait en accord avec les participants au cours, parmi les pièces faisant l'objet de lectures obligatoires.

Lectures obligatoires : Molière, *La jalousie du Barbouillé ; Le médecin volant ; L'Etourdi ou les contretemps ; Le dépit amoureux ; Sganarelle ou le cocu imaginaire ; L'Impromptu de Versailles ; L'Amour médecin ; Le médecin malgré lui ; Le Sicilien ou l'amour peintre.*

Dominique Nichet-Baux

398-660c. La Rochefoucauld : misanthropie ou lucidité ? Les « Maximes »

Conçues à l'origine comme un simple jeu de société, les *Maximes* deviennent, avec la Rochefoucauld, un redoutable réquisitoire contre les illusions que l'homme garde sur lui-même. Mais le procès ainsi intenté à la nature humaine est-il inspiré par l'aigreur d'un homme d'action déçu ? Par le spectacle d'une société qui se désagrège ? Ou par la clairvoyance d'un analyste qui refuse de se laisser duper plus longtemps par l'image trop flatteuse que les contemporains se donnent d'eux-mêmes ?

Texte : Maximes (obligatoirement : éd. Garnier).

Lectures conseillées : A. Adam, *Histoire de la littérature française au XVIIe siècle* (tome IV) (Del Duca) ; E. Magne, *Le vrai visage de la Rochefoucauld* (Ollendorf, 1923) ; P. Bénichou, *Morales du Grand siècle* (N.R.F., 1948) ; *Revue des Sciences Humaines,* numéro spécial consacré aux *Maximes,* avril-juin 1965) ; E. Mora, *François de la Rochefoucauld* (Seghers, 1965).

Maurice Descotes

398-661c. Stendhal en face de lui-même et de son époque : « Vie d'Henri Brulard »

Toute l'œuvre romanesque de Stendhal est en grande partie nourrie de sa propre vie et de ses expériences. On ne saurait donc justement apprécier le romancier sans avoir déterminé quelle image Stendhal se faisait de lui-même et de son époque. L'étude approfondie de la *Vie d'Henri Brulard* permettra de préciser, derrière les divers masques qu'il a utilisés, quel homme il fût, quels jugements il a portés sur son temps (Révolution, Empire, Restauration, Monarchie de Juillet). Seront aussi abordés les problèmes généraux par le genre autobiographique.

Texte : Stendhal, *Vie d'Henri Brulard* (obligatoirement : éd. Garnier).

Lectures complémentaires (et obligatoires) : Stendhal, *Souvenirs d'égotisme, Journal.*

Bibliographie sélective : Caraccio, *Stendhal, l'homme et l'œuvre* (Boivin, 1952) ; Martineau, *Le cœur de Stendhal* (2 vol.) (A. Michel, 1952) ; Blin, *Stendhal et les problèmes de la personnalité* (Corti, 1958) ; Del Litto, *La vie intellectuelle de Stendhal* (P.U.F., 1962) ; Marill-Albérès, *Stendhal et le sentiment religieux* (Nizet, 1956) ; Descotes, *La légende de Napoléon et les écrivains français du XIXe siècle* (Lettres modernes, 1967) (chapitre I, 2e partie) ; Lejeune, *L'autobiographie en France* (A. Colin, 1971) ; Girard, *Le journal intime* (P.U.F., 1963) ; Leleu, *Les journaux intimes* (P.U.F., 1952).

Maurice Descotes

398-662c. Verlaine — Au cœur de l'homme et de l'œuvre : « Sagesse »

Sagesse reflète une crise profonde traversée par Verlaine qui, après une période de désarroi, revient au christianisme. Le recueil évoque les nostalgies, les espérances et les angoisses d'un homme qui, tentant d'échapper à ses démons, ne cesse de redouter la rechute : poésie de la confidence personnelle, poésie de la religion, poésie de la nature se confondent dans la même inspiration. Et en même temps que l'épreuve a mûri l'homme, le poète s'épanouit dans une œuvre qui, par bien des côtés, annonce un style poétique nouveau.

Texte : Verlaine, *Sagesse* (de préférence : éd. Cluny, A. Colin).

Lectures complémentaires (et obligatoires) : Verlaine, *Poèmes Saturniens, Fêtes galantes, Bonne chanson, Romances sans paroles.*

Lectures conseillées : Verlaine, *Mes prisons, Confessions ;* A. Adam, *Le vrai Verlaine* (Droz, 1936) ; *Verlaine, l'homme et l'œuvre* (Boivin, 1961) ; Bornecque, *Verlaine par lui-même* (Seuil, 1967) ; Martino, *Verlaine* (Hatier, 1951) ; J.-P. Richard, *Poésie et profondeur* (Seuil, 1955) ; P. Morice, *Verlaine, le drame religieux* (Beauchesne, 1966).

Maurice Descotes

398-663c. Stylistique littéraire — Mallarmé ou la recherche désespérée de l'absolu

Ce cours, qui accordera une très large place au commentaire des textes, tentera de montrer que, sous des apparences obscures, l'œuvre de Mallarmé, père du symbolisme, nous raconte une aventure poétique assez facilement intelligible.

Au delà du monde visible, Mallarmé perçoit, fortement et confusément à la fois, un Absolu lointain, un univers transcendant de Beauté et de Vérité, dont l'expression dans un livre (*Le* Livre...) donnerait « l'explication orphique de la Terre ». Mais cet absolu lointain vers lequel tend le poète (« Fuir ! là-bas fuir ! ») semble ne pouvoir pas et comme ne vouloir pas être enfermé dans des mots. Il est la seule matière authentique de la poésie, mais toute tentative pour l'exprimer le souille par le contact des images terrestres, et donc impures, que charrient les paroles des hommes. La seule approche possible de cet absolu, que Mallarmé perçut (insistons sur ce point) dans une prodigieuse expérience du vide intérieur, serait un langage totalement purifié qui parviendrait à dire le Rien — à ne plus rien dire de ce que disent les mots. Ce langage ne peut pas exister, et Mallarmé n'a pas écrit Le Livre. Mais son œuvre — poésie sur une impossible poésie — reste comme le témoignage le plus émouvant sur la quête désespérée de l'Absolu qui se retrouve chez tous les poètes du XIXe siècle. Et, parfois, elle nous offre aussi, par un étrange miracle, quelques miettes scintillantes du Livre rêvé : de larges trouées blanches et vides vers un lointain éblouissant et impalpable.

Ce cours peut compter au choix pour un cours de Littérature ou de Langue.

Texte : Mallarmé, *Poésies* (Coll. Poésie, Gallimard).

Lectures conseillées : G. Michaud, *Mallarmé* (Coll. Connaissance des lettres, Hatier) ; C. Mauron, *Mallarmé par lui-même* (Coll. Ecrivains de toujours, Seuil).

Bibliographie sélective : Mallarmé, *Oeuvres complètes* (Bibliothèque de la Pléiade, Gallimard), *Correspondance* (3 volumes parus, Gallimard) ; H. Mondor, *Vie de Mallarmé* (Gallimard) ; A. Thibaudet, *La poésie de Stéphane Mallarmé* (Gallimard) ; C. Mauron, *Mallarmé l'obscur* (José Corti) ; J.-P. Richard, *L'Univers imaginaire de Mallarmé* (Seuil) ; J. Schérer, *L'expression littéraire dans l'œuvre de Mallarmé* (Droz) ; C. Abastado, *Expérience et théorie de la création poétique chez Mallarmé* (Archives des lettres modernes, Minard).

A titre d'expérience, nous fournissons ci-dessous aux étudiants, pour ce cours, quelques titres de travaux possibles. Il leur est d'autre part loisible de proposer, dès maintenant ou au début de la session, d'autres sujets à l'approbation du professeur.

Liste de sujets :

1. Les descriptions chez Mallarmé.
2. Le symbole du voyage dans les *Poésies* de Mallarmé.
3. Le clos et l'ouvert dans l'imagination de Mallarmé.
4. Les couleurs chez Mallarmé.
5. L'analyse psychologique dans les *Poésies* de Mallarmé.
6. Le thème de la stérilité chez Mallarmé.
7. Le thème de la pureté chez Mallarmé.
8. L'angoisse mallarméenne.
9. La pensée sur la poésie dans les *Poésies* de Mallarmé.
10. L'expression de la négativité dans l'écriture mallarméenne.
11. L'expression de la versification mallarméenne.

Raphaël Molho

398-664c. Stylistique littéraire — Colette ou l'écriture du bonheur

Contrainte par son premier mari à exercer le « métier littéraire », Colette sait ensuite faire un merveilleux usage de ce qui a d'abord été pour elle une nécessité. L'écriture devient pour cette femme héroïque un instrument de liberté et de bonheur, le moyen de lutter contre un univers accablant. Par la littérature, elle se construit elle-même en se fabriquant des modèles ; par la littérature, elle se forge un monde savoureux dont, au sens propre, elle jouit sensuellement.

En partant de deux œuvres très « personnelles » de Colette, *La maison de Claudine* et *Sido,* on explorera ce monde imaginaire construit dans l'âge mûr à l'aide des souvenirs du paradis de l'enfance. On s'attachera aussi aux procédés du style de ce très grand écrivain, l'un des plus merveilleux artistes du XXe siècle, dont la plume sait mettre dans les mots toute la saveur des choses.

Ce cours peut compter au choix pour un cours de Littérature ou de Langue.

Textes : Colette, *La maison de Claudine, Sido* (Livres de poche).

Lectures conseillées : G. Beaumont et A. Parinaud, *Collette par elle-même* (Coll. Ecrivains de toujours, Seuil) ; M. Le Hardouin, *Colette* (Coll. Classiques du XXe siècle, Ed. Universitaires) ; M. Raaphorst-Rousseau, *Colette, sa vie et son art* (Nizet) ; L. Forestier, *Chemins vers « la maison de Claudine »* et *« Sido », notes pour une lecture* (SEDES).

Bibliographie sélective : T. Maulnier, *Introduction à Colette* (La Palme) ; P. Trahard, *L'art de Colette* (Jean Renard) ; N. Houssa, *L'approfondissement et la sensualité dans l'œuvre de Colette* (Nizet) ; M. Biolley-Godino, *L'homme objet chez Colette* (Klincksieck) ; Y. Resch, *Corps féminin, corps textuel : Essai sur le personnage féminin dans l'œuvre de Colette* (Klincksieck) ; M. Goudeket, *Près de Colette* (Flammarion) ; M. Crosland, *Colette ou la difficulté d'aimer* (Albin Michel) ; A. A. Ketchum, *Colette ou la naissance du jour — étude d'un malentendu* (Bibliothèque des lettres modernes, Minard).

Raphaël Molho

398-665c. Stylistique littéraire — Le théâtre de Montherlant ou l'expression dramatique du néant

Tendus vers une grandeur surhumaine qu'ils ne définissent pas avec exactitude parce quelle ne se laisse pas enfermer dans les limites de la pensée et du langage des hommes, les personnages de Montherlant, dans *La reine morte,* dans *Le maître de Santiago,* dans *Port-Royal,* ne peuvent marcher vers cette Grandeur, qu'ils nomment Dieu, que par le chemin du vide et de la destruction en eux-mêmes de tout sentiment naturel. Ils se rapprochent du TOUT de Dieu en réalisant le RIEN de l'homme.

L'intérêt de ce théâtre repose d'abord sur l'effort que s'impose le langage pour exprimer ce vaste Rien qui, peut-être, fait pressentir Dieu. Il repose aussi sur la contradiction intensément dramatique, au sens précis du terme, éprouvée par les personnages, qui doivent *vivre* alors qu'ils refusent la vie, cet au-delà que l'incroyant Henry de Montherlant voulut peut-être atteindre, à sa manière, quand il se suicida le 21 septembre 1972.

Ce cours peut compter au choix pour un cours de Littérature ou de Langue.

Textes : Montherlant, *La reine morte, Le maître de Santiago, Port-Royal* (Coll. Folio, Gallimard).

Lectures conseillées : P. Sipriot, *Montherlant par lui-même* (Coll. Ecrivains de toujours, Seuil) ; J. Robichez, *Le théâtre de Montherlant* (SEDES) ; A. Blanc, *Montherlant, un pessimisme heureux* (Le Centurion).

Bibliographie sélective : Montherlant, *Théâtre* (Bibliothèque de la Pléiade, Gallimard) ; A. Blanc, *« La reine morte », Montherlant, analyse critique* (Coll. profit d'une œuvre, Hatier) ; A. Weiss, *Héroïnes du théâtre de Montherlant* (Archives des lettres modernes, Minard) ; J. de Beer, *Montherlant, ou l'homme encombré de Dieu* (Flammarion) ; H. Perruchot, *Montherlant* (Pour une bibliothèque idéale, Gallimard) ; P. de Saint-Robert, *Montherlant le séparé* (Flammarion) ; J. Batchelor, *Existence et imagination, essai sur le théâtre de Montherlant* (Mercure de France).

Raphaël Molho

398-666c. L'œuvre narrative de Jean-Paul Sartre ou l'aventure et l'écriture de la liberté

En abordant Sartre par quelques-unes de ses œuvres narratives, ce cours reflétera peut-être plus fidèlement la pensée du plus grand philosophe de notre temps que s'il l'étudiait dans ses écrits proprement philosophiques. Car cette pensée se veut avant toute chose expression du vécu et incitation à l'engagement. L'homme libre et singulier luttant contre le monde pour conquérir son être : voilà le cœur du message de Sartre, qui a choisi très tôt la forme concrète de l'écriture narrative pour exprimer une pensée toujours proche du concret.

Pour connaître Sartre, il ne faut pas se limiter à Sartre. Cet homme échappe à lui-même et se confond avec son rayonnement. On verra comment l'existentialisme sartrien a transformé, au milieu du XXe siècle, les façons de penser, de vivre et d'écrire de toute une génération. Depuis l'éclosion de cette philosophie, la pensée ne peut se séparer de la vie, l'engagement vécu l'emporte sur les concepts et l'écriture refuse les généralités abstraites pour tenter d'exprimer des situations toujours singulières.

Ce cours peut compter au choix pour un cours de Littérature ou de Civilisation.

Textes : Sartre, *La nausée, Le mur, Les mots* (Coll. Folio, Gallimard).

Lecture complémentaire (et obligatoire) : Sartre, *L'existentialisme est un humanisme* (Nagel).

Lectures conseillées : Sartre, *Qu'est-ce que la littérature ?* (Coll. Idées, Gallimard) ; F. Jeanson, *Sartre par lui-même* (Coll. Ecrivains de toujours, Seuil), *Sartre dans sa vie* (Seuil).

Bibliographie sélective : Sartre, *Situations I* (Gallimard) ; S. de Beauvoir, *Mémoire d'une jeune fille rangée ; La force de l'âge ; La force des choses ; Tout compte fait* (Gallimard, 4 volumes) ; G. Idt, *« La nausée » de Sartre, analyse critique* (Coll. Profil d'une œuvre, Hatier), *« Le mur » de Jean-Paul Sartre* (Coll. Thèmes et textes, Larousse) ; A. J. Arnold et J. P. Piriou, *Genèse et critique d'une autobiographie : « Les mots » de Jean-Paul Sartre* (Archives des lettres modernes, Minard) ; G. J. Prince, *Métaphysique et technique dans l'œuvre romanesque de Sartre* (Droz) ; M. Contat et M. Rybalka, *Les écrits de Sartre* (Gallimard).

Raphaël Molho

398-667c. Peinture et littérature — Les écrivains jugent les peintres II : de Baudelaire à Malraux

Ce cours constitue la suite de celui qui a été donné en 1974, et qui, sans requérir de connaissances techniques particulières, s'applique à rechercher, à travers les manifestations d'un art précis, la peinture, les transformations et les aspirations de la société française.

Les étapes de cette étude seront jalonnées par Baudelaire (Delacroix), Zola (les Impressionnistes), les Goncourt (Watteau), Proust, Valéry (Degas), Malraux.

Le cours sera illustré par des projections de diapositives. Afin de s'assurer un *minimum de préparation*, les étudiants doivent nécessairement au préalable se familiariser avec la connaissance des auteurs pris en considération, en utilisant par exemple les manuels *XIXe siècle et XXe siècle* de Lagarde et Michard.

Les étudiants qui ont suivi, en 1974, le cours I peuvent s'inscrire à ce cours II.

Il n'est pas nécessaire d'avoir suivi le cours I pour s'inscrire au cours II.

Ce cours peut compter au choix pour un cours de Littérature (du 19ème ou du 20ème siècle) ou de Civilisation.

Maurice Descotes

398-668c. Poètes du Québec : une ethnie en évolution

Autour des « grands » de la poésie québécoise : Brault, Choquette, Garneau, Grandbois, Hébert, Lasnier, Miron, Nelligan, etc.

Etude d'œuvres choisies.

Texte : Histoire de la littérature française du Québec (Ed. P. de Grandpré, Beauchemin, Montréal, 1969, t. III).

Benoît Lacroix

398-669c. Le théâtre québécois : expression ou explosion d'une minorité en quête d'identification ?

Avec Dubé, Dufresne, Gélinas, Loranger, Tremblay, etc. Etude d'œuvres choisies. On étudiera également deux pièces acadiennes d'A. Maillet, *La Sagouine* et *Gapi et Sullivan*.

Texte : Histoire de la littérature française du Québec (Ed. P. de Grandpré, Beauchemin, Montréal, 1969, t. IV).

Benoît Lacroix

398-670c. De la connaissance littéraire du théâtre à son application pratique

Réservé en principe aux étudiants francophones (les étudiants non francophones pourront cependant être admis exceptionnellement après entretien avec le responsable du cours au début de la session, si leur niveau de langue est *très* satisfaisant).

Ce cours comporte une partie littéraire et une partie pratique.

La partie littéraire consiste à suivre obligatoirement au moins un des cours littéraires de théâtre donnés le matin (659, *Molière dans la classe ;* 665, *Le théâtre de Montherlant ;* 669, *Le théâtre québécois,* (ces cours seront bien entendu validés en plus du cours 670).

La partie pratique sera organisée en coordination étroite avec les cours littéraires de théâtre du matin, à l'usage plus particulièrement des professeurs chargés d'animation théâtrale dans les établissements secondaires ou susceptibles de le devenir.

La mobilisation pratique des connaissances littéraires du théâtre et des autres arts du spectacle n'est pas toujours facilement réalisée. La pauvreté des moyens techniques mis trop souvent à la disposition des professeurs, les choix des pièces, les niveaux d'enseignement sont autant d'obstacles rencontrés par les enseignants de la langue française.

Aussi ce cours se veut-il une esquisse de réponse aux questions que se posent quotidiennement les professeurs. Il n'a aucunement la prétention de faire de chacun de nous un spécialiste de la mise en scène ou des arts du spectacle, mais il permettra d'apporter peut-être un nouvel élément éducatif ou récréatif dans notre tâche quotidienne. Ce cours est aussi la somme des multiples expériences tentées dans une école secondaire de Montréal.

Le cours insistera surtout sur l'aspect pratique des arts du spectacle et à cet effet, *une vingtaine d'étudiants francophones du secondaire et les étudiants anglophones de la division B* seront à votre disposition pour l'élaboration de divers spectacles.

Le cours sera divisé en *trois ateliers de travail :*

1 — Dramatisation de la fable, du conte et du poème

2 — Théâtre de marionnettes

3 — Le théâtre à l'école

Chaque étudiant du cours devra passer par ces trois ateliers durant la session ; il devra en choisir deux pour y préparer les étudiants francophones du secondaire et les étudiants anglophones de la Division B à présenter des spectacles ; le responsable du cours pratique assistera les étudiants dans cette tâche.

Description des groupes d'activités :

1. *Dramatisation de la fable, du conte et du poème :*

Théorie : choix de la fable, du conte, du poème, réponse à une situation donnée, création ou adaptation de textes au milieu scolaire.

Pratique : création de spectacles de poésie (spectacles dans le cadre du programme culturel de l'Ecole, animation des cafés littéraires à *La Guinguette*).

2. *Théâtre de marionnettes :*

Théorie : histoire, types, procédés de fabrication, choix, adaptation ou élaboration de scénarios.

Pratique : fabrication de marionnettes en atelier (avec l'aide de moniteurs), présentation de spectacles (en atelier ou en programme culturel spécial).

3. *Le théâtre à l'école :*

Théorie : l'évolution de la dramaturgie moderne : théories de quelques grands dramaturges, metteurs en scène, acteurs (Cilar, Pitoëff, Brecht, Grotowski, Artaud, Stanislawski, le théâtre japonais, le happening, le nouveau théâtre en France, le théâtre québécois).

Pratique : mime, expression corporelle, communication non verbale, mise en scène de farces de Molière, d'extraits de pièces (forme de thèmes), exercices particuliers de préparation à l'expression théâtrale et à la représentation d'œuvres intégrales.

Le cours comportera quatre heures hebdomadaires ; chaque étudiant devra en outre consacrer en moyenne de huit à dix heures par semaine à divers exercices pratiques et préparation de spectacles ; ce travail aura lieu l'après-midi ou le soir après entente avec le responsable du cours pratique, de façon à éviter d'entrer en conflit d'horaires avec d'autres activités. Le cours ne comportera pas de travaux écrits.

En raison du nombre limité de places, les admissions seront sélectives ; les critères retenus seront : 1. une pré-inscription auprès du Secrétariat de l'Ecole dès que possible et au plus tard le 15 juin ; 2. un examen du dossier académique ; 3. un *entretien* avec le responsable du cours au début de la session d'été (le jour des inscriptions).

Ce cours peut compter au choix pour un cours de Littérature française du 20ème siècle ou de Langue.

Lectures obligatoires (selon le cours de théâtre suivi le matin) : Molière, *Le médecin malgré lui, Sganarelle ou le cocu imaginaire, Le médecin volant, La jalousie du Barbouillé ;* ou : Montherlant, *La reine morte, Port-Royal ;* ou : *Théâtre québécois et acadien :* F. Loranger, *Encore cinq minutes ;* M. Dubé, *Zone ;* A. Maillet, *La Sagouine, Gapi et Sullivan.*

Lectures obligatoires (pour tous) : Saint-Exupéry, *Le Petit Prince ;* B. Vian, *Cantilènes en gelée ;* G. de Nerval, *Poésies* (principalement *Les chimères).*

Le responsable du cours pratique soumettra en outre aux étudiants un choix de poèmes, d'extraits de pièces de théâtre, de contes, empruntés aux littératures québécoise, antillaise, africaine, française sous forme de thèmes (la liberté, la femme) susceptibles d'être interprétés.

COURS DE CIVILISATION

398-654c. Ethno-linguistique : les français d'Amérique

Ce cours figure à la section des cours de Langue (voir p. 25) et peut compter au choix pour un cours de Langue ou de Civilisation.

Gilles Lefebvre
Nathan Ménard

398-671c. Mentalité religieuse québécoise traditionnelle et sentiment religieux contemporain

Ce peuple renommé pour son art religieux, son langage coloré d'allusions et de références au culte, ses églises rurales, sa foi facile et ses refus massifs, est-il un peuple religieux ou un peuple païen ?

A partir de contes, de légendes et d'*enquêtes* dans les milieux populaires, une recherche de l'homme québécois et de ses rêves fondamentaux.

Benoît Lacroix

398-672c. Les outils de l'enseignement de l'histoire et de la géographie en France et au Québec

Quels sont les instruments de travail — les *outils* — dont les élèves de l'enseignement secondaire ont besoin pour mener à bien une découverte et un enrichissement par le biais de l'histoire ou de la géographie ?

Sur ce thème, le cours propose à des enseignants une confrontation entre ce qui se fait en France et ce qui se fait au Québec et une recherche pratique et théorique à la lumière des réalisations de *Mouvement de l'Ecole Moderne* (Pédagogie Freinet).

Confrontation : il est demandé à chaque participant d'apporter des documents de son travail d'enseignant : par exemple, enregistrements de séances en classe, réalisation d'élèves (affichages, montages, etc.).

Travaux pratiques : individuellement ou par groupe, les étudiants s'attacheront à la confection matérielle de certains outils, par exemple : fiches-guides destinées à aider des élèves dans une recherche donnée.

Recherche théorique : en partant des activités précédentes, des débats sur les questions de finalités ou de méthode pourront être engagés.

Le nombre de participants au cours sera limité à 15. Pré-inscription par lettre adressée dès la parution du présent Programme au Secrétariat de l'Ecole. Clôture des pré-inscriptions : 1er mai. Les étudiants qui ne seraient pas admis seront avisés par lettre avant le 20 mai.

Ce cours peut compter au choix pour un cours de Civilisation ou de Langue.

Lectures conseillées : Les Dossiers Pédagogiques de l'Educateur (Pédagogie Freinet, Imprimerie CEL, B.P. 251, 06406, Cannes, France) : La Pédagogie Freinet au 2e Degré (No 26) ; Histoire et Géographie au 2e Degré (No 78) ; Comment démarrer au 2e Degré (No 80) ; Exposés et débats au 2e Degré (No 81).

Catherine Dol

398-673c. Art et civilisation du Moyen-Age : de l'art roman à l'art gothique

« L'art du Moyen-Age n'est ni une concrétion naturelle, ni l'expression passive d'une société : dans une large mesure, il a fait le Moyen-Age même » (H. Focillon).

De l'art roman à l'art gothique, c'est toute la civilisation médiévale qui s'accomplit dans une profonde remise en cause. Une nouvelle spiritualité naît parallèlement aux mutations de l'économie et de la société.

Partant de l'analyse de vues projetées, le cours propose un cheminement à travers la vie et l'art du Moyen-Age français.

Lectures obligatoires : Duby et Mandrou, *Histoire de la civilisation française* (tome 1er, 1ère partie : *Le Moyen-Age*) (Coll. U. Colin) ; J. Gimpel, *Les bâtisseurs de cathédrales* (Le temps qui court, Seuil).

Lectures conseillées (ouvrages à consulter en bibliothèque en raison de leur prix élevé) : R. Huyghe, *L'art et l'âme* (Flammarion) ; M. Aubert et Goubert, *Cathédrales, abbatiales, collégiales et prieurés romans de France* (Artaud) ; G. Duby, *L'Europe des cathédrales : 1140-1280* (Editions d'Art Albert Skira, Suisse).

Pour les écoles régionales, se référer aux ouvrages de la Collection du Zodiaque (édités par l'Abbaye de la Pierre-qui-Vire).

Note : si l'étudiant souhaite disposer d'un manuel peu coûteux, il peut se procurer l'ouvrage ancien, mais de qualité, de H. Focillon, *Art d'Occident :* Tome I, *Le Moyen-Age roman,* Tome 2, *Le Moyen-Age gothique,* (Le livre de Poche illustré, Colin).

Catherine Dol

398-674c. Société et politique : l'extrême gauche en France

Mai 1968 a révélé au grand jour la montée de forces que l'on qualifie volontiers de gauchistes : « L'étiquette est commode. Mais sans doute trompeuse. Ce qu'y voyait Lénine..., des nouvelles formes d'action (Lip, Larzac)... qui mettent en cause le pouvoir et l'oppression sociale ». *(Le Monde,* 8.3.74).

Qu'est-ce que l'extrême gauche dans la France actuelle ? Trois approches complémentaires sont proposées :

Une approche historique : de nombreux mouvements ont des racines dans l'histoire du mouvement ouvrier français et international.

Une approche philosophique : les luttes se réclament de courants de pensée parfois opposés.

Une approche politique : quel est le milieu économique, social et politique que les militants veulent transformer ?

A partir de l'analyse de documents (livres, journaux, films) le cours s'attachera à ce thème central de débat : qu'en est-il de l'extrême gauche en France, sept ans après l'explosion de Mai 1968 ?

Le nombre de participants au cours sera limité à 20. Pré-inscription par lettre adressée dès la parution du présent Programme au Secrétariat de l'Ecole. Clôture des pré-inscriptions : 1er mai. Les étudiants qui ne seraient pas admis seront avisés par lettre avant le 20 mai.

Lectures obligatoires : J. Defrasne, *La gauche en France de 1789 à nos jours* (P.U.F., Que sais-je ? No 1464) ; T. Pfister, *Tout savoir sur le gauchisme* (Filipacchi, EPI).

Tout au long de l'année scolaire, lire si possible une revue française d'extrême gauche (une liste de références est fournie par l'ouvrage de T. Pfister ; on y ajoutera, dans la mesure du possible, le quotidien *Libération* et l'hebdomadaire *Charlie-Hebdo).*

Lectures conseillées : K. Marx et F. Engels, *Le manifeste du Parti communiste* (Ed. Sociales) ; V. I. Lénine, *La maladie infantile du communisme : le gauchisme* (Ed. Sociales) ; R. Gomblin, *Les origines du gauchisme* (Série Politique, Seuil) ; J.-P. Rioux, *Révolutionnaires du Front Populaire* (Collection 10/18) ; J. Bron, *Histoire du mouvement ouvrier français* (Tome III, « *Les luttes de classes aujourd'hui* », 1950-1972, Ed. Ouvrières) ; D. Guérin, *L'anarchisme* (Coll. Idées, Gallimard) ; E. Joyeux, *L'anarchie et la révolte de la jeunesse* (Coll. Mutations - Orientations, Casterman/Poche) ; J. Roussel, *Les enfants du prophète : histoire du mouvement trotskiste en France* (Spartakus) ; P. Kessel, *Le mouvement maoïste en France* (Coll. 10/18).

Catherine Dol

398-675c. Réflexions critiques sur la civilisation des mass-média

La civilisation des mass-média lance un véritable défi au pédagogue. On abordera ce problème à travers la lecture critique de quelques auteurs contemporains, en envisageant à la fois les *aspects technologique, philosophique et politique.*

On examinera ensuite comment les systèmes éducatifs tentent d'utiliser les nouveaux moyens de communication de masse pour l'enseignement, mais aussi pour la formation.

Au début de la session, les étudiants pourront se procurer, au Secrétariat de l'Ecole Française d'Eté, un recueil ronéotypé de textes choisis. Les travaux des étudiants consisteront, soit en l'analyse critique d'un auteur ou d'un problème qui les intéresse plus particulièrement, soit en une étude des ressources ou des expériences locales appliquées au domaine audio-visuel.

Ce cours n'est pas ouvert aux étudiants qui ont suivi à la session de 1974, le cours intitulé *Points de vue sur la civilisation de l'image.*

Lectures obligatoires : M. McLuhan, *Pour comprendre les média* (Mame/Seuil, 1968) ; L. Porcher, *L'école parallèle* (Larousse, 1974) ; M. Fauquet, S. Strasfogel, *L'audio-visuel au service de la formation des enseignants* (Delagrave, 1972).

Lectures conseillées : D. J. Boorstin, *L'image (ou ce qu'il advint du rêve américain)* — Traduction française de « What happened to the American Dream » (Julliard, 1963) ; M. Tardy, *Le professeur et les images* (P.U.F., 1965) ; M. McLuhan, *Mutations 1990* (Mame/Seuil, 1969) ; J. Cazeneuve, *Les pouvoirs de la télévision* (Gallimard, 1970) ; P. Schaeffer, *Machines à communiquer* (Tome 2 : Pouvoir et communication) (Seuil, 1972).

Maurice Fauquet

398-676-677c. De la psychanalyse à la psychologie du surconscient : Paul Diel et la traduction des mythes (cours double)

Ce cours est la continuation du cours de l'été précédent intitulé : *L'Ecole française de psychologie : introduction à l'œuvre de Paul Diel et à la psychologie des profondeurs.* Il ne sera cependant aucunement nécessaire d'avoir suivi le cours de l'été dernier pour s'inscrire à celui-ci.

Comme les rêves, les symboles et les mythes des diverses cultures religieuses ont un sens *littéral* et un sens *caché* qui recouvre toute l'étendue — et bien au delà — des couches profondes du psychisme humain mises à jour par la psychologie moderne. Dans un langage énigmatique analogue à celui des rêves, la symbolisation mythique, affirme Diel, parle en réalité du fonctionnement sain ou malsain de la psyché, en fonction du finalisme évolutif de l'espèce humaine. Mais pour être compris, le « langage oublié » des mythes demande actuellement à être traduit. Sa traduction en langage psychologique serait-elle *une* des clés qui permettrait à l'homme actuel de *retrouver* avec le dynamisme toujours agissant des symboles, la force évolutive nécessaire à son accomplissement ? C'est à cette question que ce cours tentera d'apporter des éléments de réponse, en s'attachant à préciser les rapports concevables a) entre la psychologie analytique et une psychologie du surconscient, dynamique et dilaectique b) entre cette dernière et le monde des symboles et des mythes. On évoquera aussi, à propos d'une œuvre ou d'un auteur choisis comme exemples, les perspectives nouvelles que peut offrir à la critique littéraire une approche *mythocritique.*

Le cours prendra la forme d'un séminaire de recherche. Il exigera des participants une solide connaissance des *Textes* et des *Lectures obligatoires* figurant au programme acquise *avant* la session.

Ce cours peut compter au choix pour deux cours de Civilisation ou pour un cours de Civilisation *et* pour un cours de Littérature (du 20ème siècle).

Afin de rendre plus aisé le travail des étudiants, ce cours est *jumelé* avec le cours suivant ; l'inscription à l'un rend obligatoire l'inscription à l'autre. Le travail écrit unique, commun aux deux cours (ordre de grandeur : une trentaine de pages dactylographiées à double interligne ou l'équivalent manuscrit) consistera : 1/ à *comparer* les vues de Diel sur les mythes avec les vues sur les mêmes questions de Freud, de Jung et d'un freudo-marxiste, Fromm ; 2/ à élaborer une *critique* des thèses diéliennes en s'inspirant en particulier des vues d'Henry Corbin (voir cours suivant). Il est bien précisé que ce travail écrit est un travail de *synthèse* et de confrontation qui ne saurait se réduire à un simple résumé des diverses thèses en présence. Le travail devra être remis *deux semaines avant la fin des cours ;* son élaboration devra être *avancée* lorsque la session débutera ; *aucun travail ne sera accepté après la date fixée.* La *participation* aux cours entrera pour un tiers dans l'attribution des notes finales.

Textes : P. Diel, *Le symbolisme dans la mythologie grecque, La divinité* (Petite Bibliothèque Payot) et un ouvrage à paraître sur *Le mythe judéo-chrétien* (Payot).

Lectures complémentaires (et obligatoires) : S. Freud, *Moïse et le monothéisme* (N.R.F., Idées) ; C. G. Jung et C. Kerényi, *Introduction à l'essence de la mythologie* (Petite Bibliothèque Payot) ; E. Fromm, *Le langage oublié* (Payot, Bibliothèque Scientifique).

Lectures conseillées : P. Diel, *Psychologie de la motivation, La peur et l'angoisse* (Petite Bibliothèque Payot) ; A. Adler et E. Jahn, *Religion et psychologie individuelle comparée* (Payot, Bibliothèque Scientifique) ; C. G. Jung, *La guérison psychologique* (Ch. 12 à 15) (Librairie de l'Université, Genève).

Bibliographie sélective : C. G. Jung, *Métamorphoses de l'âme et ses symboles* (Librairie de l'Université, Genève) ; E. Fromm, *La crise de la psychanalyse (Essais sur Freud, Marx et la psychologie sociale)* (Ed. Anthropos, 15, rue Racine, Paris 6e), *Psychanalyse et religion* (Ed. de l'Epi, 9, rue Séguier, Paris 6e) ; Aurobindo, *Le secret du Véda* (Cahiers du Sud, 28, rue du Four, Paris 6e) ; D. T. Suzuki, *Le non-mental selon la pensée zen* (Le Cercle du Livre) ; Lao Tseu, *Tao Te King (suivi d'aperçus sur les enseignements)* (Club des Libraires de France) ; M. Eliade, *Aspects du mythe* (N.R.F., Idées), *Naissances mystiques* (N.R.F., Gallimard) ; R. Otto, *Le sacré (L'élément non rationnel dans l'idée du divin et sa relation avec le rationnel)* (Petite Bibliothèque Payot) ; R. Bultmann, *Le christianisme primitif dans le cadre des religions antiques* (Petite Bibliothèque Payot) ; R. S. *Cours d'autosuggestion et de rééducation mentale* (Astra, 10, rue Rochambeau, Paris 9e) ; J. H. Schultz, *Le training autogène* (P.U.F.) ; G. Durand, *L'imagination symbolique* (P.U.F.) ; D. Fernandez, *L'arbre jusqu'aux racines (Psychanalyse et création)* (Grasset) ; J. Chevalier et A. Gherbrant, *Dictionnaire des symboles* (Seghers) ; G. A. Gaskell, *Dictionary of all Scriptures and Myths* (The Julian Press, New York) ; J. E. Cirlot, *A Dictionary of Symbols* (Philosophical Library, New York) ; *Metaphysical Bible Dictionary* (Unity Press) ; M. Taniguchi, *Divine Education and Spiritual Training of Mankind* (Seicho-No-Ie, Tokyo).

Jean Lerède

398-678c. De la psychanalyse à la psychologie du surconscient : introduction à l'œuvre d'Henry Corbin et à l'herméneutique comparée des religions

Depuis Champollion qui le premier déchiffra les hiéroglyphes égyptiens, nombreux sont les savants qui ont illustré l'orientalisme français en redécouvrant ou en contribuant à mieux faire connaître en Occident les grandes civilisations historiques du Moyen-Orient, de l'Asie du Sud-Est et de l'Extrême-Orient. Henry Corbin se situe dans cette lignée prestigieuse. Longtemps Directeur de l'Institut Franco-Iranien de Téhéran et professeur à l'Ecole Pratique des Hautes Etudes à Paris, ses travaux sur l'Iran islamique et pré-islamique lui ont assuré une très large audience internationale et font de lui un des meilleurs spécialistes actuels du monde iranien, berceau d'une des plus anciennes et des plus riches cultures de l'humanité.

Henry Corbin n'est pas seulement un chercheur, et un découvreur, d'une étonnante érudition en matière de textes arabes et persans et d'islamologie. C'est aussi un penseur dont la rare pénétration a ouvert des perspectives nouvelles à l'herméneutique comparée des religions.

Cette jeune science — jeune au moins par ses moyens nouveaux d'investigation — se préoccupe de déchiffrer la signification psychologique profonde, selon leur *sens caché,* des symboles et des mythes des diverses cultures. Un « langage oublié » dit Fromm et qu'il s'agit de redécouvrir, de « désocculter », pour reprendre une expression chère à Henry Corbin. Il est permis de voir dans l'herméneutique comparée une des sciences appelées à jouer un rôle capital dans la culture mondiale de demain.

Ce cours en forme de séminaire est *jumelé* avec le précédent ; l'inscription à l'un rend obligatoire l'inscription à l'autre ; le travail écrit est commun. Ce jumelage des deux cours est destiné à rendre plus aisée aux étudiants et plus profitable une *introduction* à l'herméneutique comparée, par un essai de confrontation sur le plan mythique, de trois des cultures religieuses fondamentales : la grecque ancienne, la judéo-chrétienne et l'islamique, et aussi par la confrontation des vues, et des approches, fondamentalement différentes des deux éminents spécialistes de ces questions que sont chacun dans leur domaine Henry Corbin et Paul Diel.

Texte : H. Corbin, *En Islam iranien* (tome I) (N.R.F., Gallimard).

Bibliographie sélective : H. Corbin, *En Islam iranien* (tomes II, III et IV), *Terre céleste et corps de résurrection : de l'Iran mazdéen à l'Iran shîite* (Buchet-Chastel), *L'homme de lumière dans le soufisme iranien* (Librairie de Médicis), *L'imagination créatrice dans le soufisme d'Ibn Arabî* (Flammarion).

Jean Lerède

398-679c. Introduction à la suggestologie

Vieille comme le monde, la suggestion est actuellement l'objet de travaux scientifiques de pointe dans divers pays. Ces travaux ont donné naissance à une nouvelle science, la suggestologie, dont les domaines de recherche et les applications pratiques s'avèrent dès à présent aussi nombreux qu'importants.

La suggestologie pourrait se définir comme la science de la suggestion en tant que moyen d'éveil, de développement et d'utilisation des potentialités insoupçonnées de la personnalité inconsciente.

Ce cours d'introduction comportera une partie théorique et une partie pratique.

La partie *théorique* retracera l'historique de la question depuis les premières recherches scientifiques consacrées en France à la suggestion par l'Ecole de la Salpétrière et l'Ecole de Nancy à la fin du siècle dernier jusqu'aux travaux actuels du Dr Lozanov à l'Institut de Suggestologie de Sofia. Le cours s'attachera à préciser ce qu'est exactement la suggestion et à la situer par rapport aux autres courants actuels de la psychologie, en particulier par rapport à la psychologie analytique et à la psychologie du surconscient. Le cours donnera aussi des informations sur l'état présent des recherches, de l'expérimentation et de l'enseignement dans le domaine particulier de la suggestopédie au Canada, aux Etats-Unis et dans divers pays d'Europe. Des spécialistes éminents en suggestologie pourront participer éventuellement à certaines séances du cours.

La partie *pratique* du cours comportera : 1/ des *séances d'observation du cours accéléré de français parlé* aux débutants donné à l'Ecole Française d'Eté selon la méthode Lozanov dans la même session ; ce cours sera filmé en vidéo et certaines leçons seront projetées devant les étudiants du cours de suggestologie. 2/ la participation à l'*animation socio-culturelle* de groupes d'étudiants non francophones débutants, enseignés à l'Ecole Française d'Eté selon la méthode Lozanov ; cette tâche d'animation, qui se situera l'après-midi ou le soir, comportera trois activités par semaine dont la nature et les horaires seront fixés au début de la session en accord avec le responsable du cours (durée moyenne de chaque activité : trois heures).

Le travail écrit consistera pour chaque étudiant du cours à rédiger un bref *journal de bord* où il consignera une fois par semaine ses impressions personnelles et ses suggestions touchant à la fois les séances d'observation auxquelles il aura assisté et la tâche d'animation culturelle qui lui est dévolue ; les journaux de bord seront remis au responsable du cours au début de chaque semaine et feront l'objet de discussions de groupe au cours de la session.

Les étudiants de ce cours pourront être indifféremment francophones ou anglophones, mais ils devront *obligatoirement* avoir une *très bonne connaissance* de l'autre langue.

Le cours est réservé aux *enseignants*. En raison du nombre limité de places, les admissions seront sélectives ; les critères retenus seront : 1. une pré-inscription auprès du Secrétariat de l'Ecole dès que possible et au plus tard le 15 juin ; 2. un examen du dossier académique ; 3. un *entretien* avec le professeur responsable au début de la session d'été (le jour des inscriptions).

Ce cours peut compter au choix pour un cours de Civilisation ou de Langue.

Lectures obligatoires : W. Pöll, *La suggestion* (Payot) ; S. Ostrander et L. Schroeder, *Fantastiques recherches parapsychiques en U.R.S.S.* (Laffont) *(Psychic Discoveries behind the Iron Curtain)* (Prentice Hall).

Lectures conseillées : M. Ferguson, *La révolution du cerveau* (Calmann-Lévy) *(The Brain Revolution)* (Taplinger, New York) ; L. Watson, *Histoire naturelle du surnaturel* (Albin Michel) *(Supernature)* (Anchor Press, New York).

Jean Lerède

26. **L'Aide-Mémoire**
27. **Les lundis de l'Ecole Française d'Eté**

---

(1) Voir p. 12 et suivantes.

I — RÉGLEMENTATION DU M.A. (DIVISION D)

Les études à l'Ecole Française d'Eté en vue de la Maîtrise en français s'effectuent sous la responsabilité de la Faculté des Etudes Avancées de l'Université McGill, en coordination avec le Département de Français.

La **scolarité totale** des études de M.A. est de **24 cours d'été.** Cette scolarité s'accomplit en **4, 5 ou 6 sessions d'été,** selon les modalités précisées plus bas ; **elle équivaut à deux années de scolarité à temps plein.**

Le régime normal des études à l'Ecole Française d'Eté est celui du *M. A. sans thèse.* Les étudiants qui le désirent peuvent cependant choisir la formule du M. A. avec thèse, qui comporte un nombre de cours moins élevé répartis sur quatre ou cinq sessions d'été, selon le cas. **Les deux Maîtrises (sans thèse et avec thèse) sont strictement équivalentes sur le plan académique et confèrent à leurs titulaires rigoureusement les mêmes droits.**

CONDITIONS D'ADMISSION ET RÉGIME DES ÉTUDES

Les admissions sont sélectives. Elles ne sont prononcées qu'après examen des dossiers et dans la limite des places disponibles.

(a) Les étudiants titulaires d'un B.A. « Second class Honours in French » de l'Université McGill, d'un diplôme équivalent d'une autre Université, d'une Licence ou d'un Baccalauréat Spécialisé avec une concentration équivalente en français et des notes jugées satisfaisantes, sont admis directement en 1ère session de Maîtrise (D1), *après examen de leur dossier.*

Les étudiants titulaires d'un B.A. ou d'un diplôme équivalent et qui ne répondraient pas aux conditio snprécédentes, pourront être admis à suivre une *Session Préliminaire* (Da) durant un été à l'Ecole, *après eaxmen de leur dossier.* Les titulaires d'un B. Péd. sont également admis à présenter leur candidature à la Session Préliminaire.

Les cours de la Session Préliminaire sont les mêmes que ceux des autres sessions de Maîtrise. La Session Préliminaire *n'est pas* une session propédeutique (qualifying session) ; c'est une *session probatoire* qui a la valeur d'un test destiné à établir si l'étudiant est apte à poursuivre pendant plusieurs étés des études de Maîtrise.

Les étudiants qui ont obtenu la note B (65% au moins) à chacun de leurs *quatre* cours de Session Préliminaire seront admis en 1ère session de Maîtrise (D1) l'été suivant.

(b) Les études de M.A. (après la Session Préliminaire) comportent normalement *quatre ou cinq sessions d'été* (D1 à D4 ou D5) [1].

Les étudiants admis en D1 peuvent y suivre *quatre ou cinq cours* au choix. L'attention des étudiants est cependant attirée sur le fait que suivre cinq cours par session d'été constitue une scolarité *lourde* et que *quatre* cours par session d'été doivent être considérés comme *la norme.* Les étudiants admis en D2, D3, D4, D5 (et D6 s'il y a lieu) ne sont autorisés, s'ils le désirent, à suivre *cinq* cours que s'ils ont obtenu à la session d'été précédente une moyenne de 77%, calculée sur leurs quatre meilleurs résultats ; s'ils ne répondent pas à cette exigence, ils ne pourront suivre que *quatre* cours.

Les étudiants passant le M.A. en *quatre sessions d'été* (Session Préliminaire non comprise) devront donc suivre et réussir *cinq cours* à chaque session, compte-tenu de l'exigence de moyenne mentionnée ci-dessus.

(1) La scolarité est de 20 cours (répartis sur quatre ou cinq étés) auxquels s'ajoutent 4 cours au titre de la Session Préliminaire, soit une scolarité totale de 24 cours.

Cette exigence de moyenne s'applique également aux deux sessions d'été précédant une éventuelle scolarité à temps partiel au Département de Français de l'Université McGill telle que prévue au paragraphe (c) qui suit.

Les étudiants de M.A. doivent obtenir la note B (65% au moins) à chacun des cours suivis.

(c) Les étudiants préparant un M. A. *sans thèse à* l'Ecole Française d'Eté et admis à la Faculté des Etudes Avancées (après leur session d'été en D2), peuvent suivre l'équivalent de six cours de l'Ecole Française d'Eté au Département de Langue et Littérature françaises de l'Université McGill ; six cours de l'Ecole correspondent à deux cours d'année entière (ou quatre cours semestriels) au Département ; les étudiants de l'Ecole ne peuvent suivre au total plus de deux cours d'année entière au Département, ni plus d'un cours d'année entière par année universitaire. Les étudiants désireux de se prévaloir de cette disposition doivent choisir leurs cours au Département de Français en fonction des exigences du programme de M. A. sans thèse à l'Ecole Française d'Eté et demander au Directeur de l'Ecole une autorisation écrite *dans les dix premiers jours de septembre* (condition de date absolument impérative).

(d) Aucun étudiant de M. A. en français ne peut suivre moins de quatre sessions d'été à l'Ecole Française d'Eté (Session Préliminaire non comprise).

(e) *Echecs :* toute note à un cours inférieure à B (65%) constitue un échec pour les étudiants de M. A. En Session Préliminaire (Da), un seul échec entraîne normalement l'élimination ; cependant, selon la note obtenue et si les notes aux autres cours sont jugées acceptables, l'étudiant pourra être autorisé à redoubler la Session Préliminaire l'été suivant après examen de son dossier ; tout échec à *un cours* en Da entraîne l'annulation (pour le M. A.) de tous les autres cours suivis durant la session. Pour les étudiants en scolarité de Maîtrise (D1 à D4 ou D5), un échec à l'un des cours suivis dans une session oblige l'étudiant à suivre un cours supplémentaire durant une session d'été ultérieure, à moins qu'il ne préfère s'inscrire à une session d'été supplémentaire s'il désire ne pas suivre plus de quatre cours par session. Deux échecs à une même session entraînent l'élimination de la Maîtrise après examen du dossier. Trois échecs au cours de la scolarité de M. A. entraînent l'élimination après examen du dossier.

(f) Tout au long de leur scolarité de Maîtrise, les étudiants doivent se réinscrire à l'Ecole Française d'Eté chaque année.

(g) Dans le courant de leur deuxième session d'été (D2), les candidats au M. A. doivent demander leur *admission à la Faculté des Etudes Avancées* de l'Université. Les formules à remplir à cet effet sont disponibles au Secrétariat de l'Ecole Française d'Eté à qui elles doivent être demandées par les *étudiants de D2* dès le début de la session d'été ; ces formules doivent être retournées au Secrétariat le plus rapidement possible et *au plus tard* une semaine avant la fin de la session (condition de date absolument impérative). L'admission à la Faculté des Etudes Avancées sera prononcée après la session D2 et sous réserve de succès aux cours suivis durant cette session.

Les étudiants en cours de session D2 et optant pour la formule du M.A. *avec thèse,* doivent indiquer leur choix, qui est dès lors définitif, par une lettre remise au Secrétariat de l'Ecole *au plus tard* une semaine avant la fin de la session.

II — SCOLARITÉ DU M. A. (DIVISION D)

L'assistance aux cours est considérée comme faisant partie intégrante du travail exigé des étudiants. L'assiduité entre en ligne de compte dans l'attribution des notes finales, qui tiennent également compte en principe de la participation aux cours.

I — SESSION PRÉLIMINAIRE

Les cours de la Session Préliminaire (Da) sont les mêmes que ceux des autres sessions de Maîtrise.

Les étudiants doivent suivre 4 cours dont :

1. un cours de Langue ;
2. un cours de Littérature *québécoise ;*
3. un cours de Littérature *française ;*
4. un cours de Civilisation.

II — SCOLARITÉ ULTÉRIEURE

Les étudiants doivent suivre 20 cours en *quatre ou cinq sessions d'été* [1] (D1 à D5).

Les 20 cours à suivre sont ainsi répartis :

— 5 cours de Langue ;
— 6 cours de Littérature, dont :
1 cours de Littérature *ou de Civilisation* du Moyen-Age ou du 16ème s. ;
1 cours de Littérature du 17ème s. ;
1 cours de Littérature du 18ème s. ;
1 cours de Littérature du 19ème s. ;
1 cours de Littérature *québécoise* du 20ème s. ;
1 cours de Littérature *française* du 20ème s. ;
— 5 cours de Civilisation ;
— 4 cours au choix [2].

Les étudiants de D1 doivent suivre obligatoirement un cours de Langue, deux cours de Littérature et un cours de Civilisation ; ils peuvent suivre, s'ils le désirent, un cinquième cours au choix.

Les étudiants qui choisissent le M. A. *avec thèse* (ce qui est l'exception à l'Ecole Française d'Eté), doivent suivre 14 cours [3] en *quatre* sessions d'été. Les étudiants sont astreints à suivre 2 cours de Langue, 6 cours de Littérature (mêmes exigences que pour le régime du M. A. sans thèse), 2 cours de Civilisation et 4 cours au choix.

---

(1) En incluant la Session Préliminaire, la scolarité totale est de 24 cours.

(2) Dans le choix de leurs cours, il est vivement conseillé aux étudiants de s'acquitter le plus tôt possible des obligations du programme en ce qui concerne les cours obligatoires et de réserver les cours au choix pour leurs dernières sessions d'été, **aucune** dérogation ne pouvant être accordée en ce qui concerne les cours obligatoires.

(3) En incluant la Session Préliminaire, la scolarité est de 18 cours. Aux cours s'ajoute la thèse qui équivaut à 6 cours. La scolarité totale équivaut ainsi à 24 cours.

L'étudiant doit préparer et présenter une thèse écrite en français qui témoignera de son aptitude à la recherche.

L'étudiant devra avoir déposé sa thèse au plus tard au début du mois d'août du quatrième été qui suivra l'achèvement de ses derniers cours de M.A.

Les étudiants peuvent suivre leurs cours dans n'importe quel ordre. Il suffit qu'au terme de leur scolarité ils aient suivi tous les cours figurant dans le programme ; il est très vivement conseillé aux étudiants parvenus en D3, D4 ou D5 de s'assurer auprès de la Direction de l'Ecole que leur choix de cours leur permettra de satisfaire à cette obligation. Les étudiants sont personnellement responsables de la conformité du choix de leurs cours aux exigences du programme.

Les étudiants ne sont pas tenus de suivre quatre cours, ou plus, par session d'été (sauf en Session Préliminaire). Ils peuvent en suivre deux ou trois seulement, ce qui allongera leur scolarité de Maîtrise en leur imposant un ou plusieurs étés supplémentaires. Les droits à acquitter restent les mêmes quel que soit le nombre de cours suivis à chaque session. A partir de D5, les étudiants bénéficient d'un tarif réduit (voir p. 53, « Tuition and Residence Fees »).

Sauf indication contraire dans la description des cours ou en cas d'échec, les étudiants ne peuvent suivre deux fois le même cours durant leur scolarité de M. A. En cas de doute de leur part, les étudiants doivent consulter la Direction de l'Ecole avant de choisir leurs cours.

Les modifications intervenant dans la réglementation ou la scolarité du M.A. ne sont jamais rétroactives pour les étudiants en cours d'études lorsqu'elles ont pour effet de mettre en vigueur des dispositions plus exigeantes.

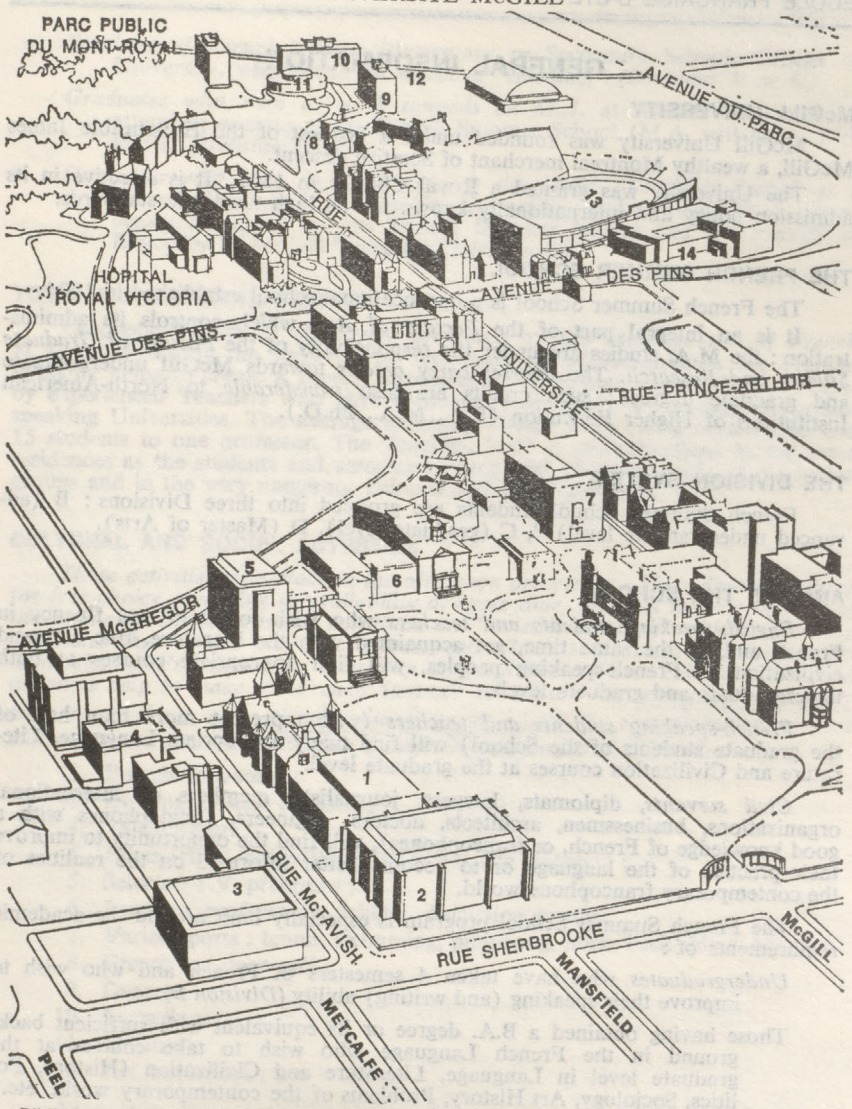
ANNÉES DE SCOLARITÉ

La Maîtrise en français accomplie à temps partiel en plusieurs sessions à l'Ecole Française d'Eté et terminée au complet (24 cours) est officiellement reconnue par le Ministère de l'Education du Québec comme équivalente à deux (2) années de scolarité à temps plein. 12 cours de Maîtrise suivis et réussis à l'Ecole Française d'Eté sont officiellement reconnus pour une (1) année de scolarité à temps plein.

FRAIS DE SCOLARITÉ

Les étudiants doivent acquitter tous les frais de scolarité (« Deposit and Tuition Fees ») à chacune des sessions d'été auxquelles ils s'inscrivent. En D5 (et éventuellement en D6), les étudiants bénéficient d'un tarif réduit (voir « Tuition and Residence Fees », p. 53). *Les étudiants dispensés de D5 devront acquitter les frais de scolarité réduits prévus pour cette session* ($165. ou $135. Can. selon le cas)), *en même temps que les frais de D4.*

UNIVERSITÉ McGILL



1. Bibliothèque Redpath
2. Bibliothèque McLennan
3. Pavillon Bronfman
4. Peterson Hall (Secrétariat de l'Ecole Française d'Eté pendant l'année universitaire ; Laboratoire de Langue et salles de cours)
5. Leacock Building (salles de cours)
6. Arts Building (salles de cours)
7. F. Cyril James Building (Caissière)
8. Douglas Hall (Secrétariat de l'Ecole Française d'Eté pendant la session d'été ; Résidence universitaire).
9. McConnell Hall (Résidence universitaire)
10. Molson Hall (Résidence universitaire)
11. Bishop Mountain Hall (cafeteria)
12. Terrains de tennis
13. Stade Molson
14. Gymnase et Piscine

GENERAL INFORMATION

McGILL UNIVERSITY

McGill University was founded under a bequest of the Honourable James McGill, a wealthy Montreal merchant of Scottish descent.

The University was granted a Royal Charter in 1821. It is selective in its admission policy and internationally known for its high academic standards.

THE FRENCH SUMMER SCHOOL

The French Summer School is a coeducational school established in 1904.

It is an integral part of the *Faculty of Arts* which controls its administration ; the M.A. studies are under the responsibility of the *Faculty of Graduate Studies and Research*. The *courses carry credits* towards McGill undergraduate and graduate degrees ; such credits are also *transferable* to North-American Institutions of Higher Education (B.A., M.A., Ph.D.).

THE DIVISION SYSTEM

French Summer School students are grouped into three Divisions : B (advanced undergraduate level) [1], C (graduate level), D (Master of Arts).

AIMS OF THE SCHOOL

English-speaking students and teachers who wish to attain real fluency in French and, at the same time, get acquainted with the literature, fine arts and civilization of French-speaking peoples, will find appropriate courses at both undergraduate and graduate levels.

French-speaking students and teachers (who represent more than half of the graduate students of the School) will find many appropriate Language, Literature and Civilization courses at the graduate level.

Civil servants, diplomats, lawyers, journalists, members of international organizations, businessmen, architects, doctors, engineers, (anglophones with a good knowledge of French, or francophones), will find the opportunity to improve their practice of the language or to become better informed on the realities of the contemporary francophone world.

The French Summer School program is especially built around the academic requirements of :

Undergraduates who have taken 4 semesters of French and who wish to improve their speaking (and writing) ability *(Division B)*

Those having obtained a B.A. degree or its equivalent with sufficient background in the French Language who wish to take courses at the graduate level in Language, Literature and Civilization (History, Politics, Sociology, Art History, Problems of the contemporary world, etc.) *(Division C)*

Graduates who are presently working towards an M.A. or a Ph.D. at Universities other than McGill and who wish to transfer the credits earned at the French Summer School *(Division C)*

(1) The 1975 session will also offer a **Ba section** — Accelerated learning of spoken French for beginners. Details on p. 17.

Teachers of French, at the Elementary or Secondary School, College or University, who desire an effective "refresher" *(Divisions B or C)*

Graduates who wish to work towards an M.A. at McGill University by attending sessions at the French Summer School (M.A. without or with thesis) *(Division D)*

Graduates who wish to work towards the M.Ed. (Teaching French as a Second Language) at McGill University, and taking the Program organized jointly by the French Summer School and the Faculty of Education of McGill University *(Division D)*

TOTAL IMMERSION IN FRENCH

Linguistic fluency is effectively promoted by the *exclusive use of French* at all times during the session. The fact that half of the students are French-speaking helps to create a French atmosphere. All courses are taught in French, by experienced Teachers who have graduated from and are teaching in French-speaking Universities. The average student-professor ratio varies between 12 and 15 students to one professor. The Teaching Staff is accommodated in the same residences as the students and associates freely with them at meals, in discussion groups and in the very numerous cultural and social activities.

CULTURAL AND SOCIAL ACTIVITIES

These activities take place in the afternoon or evening. Their diversity allows for free choice according to availability of spare time, personal tastes or whims of the moment. These activities constitute an "invisible teaching" which effectively completes that of the academic courses and allows students to experience total immersion in French during their stay at the School. These cultural and social activities help to make the French Summer School a lively university community and an enriching international cultural centre where the representatives of four cultures meet : Québécois, English Canadians, Americans and French.

1. French folk-songs ;
2. Evening musical concerts ;
3. Talent shows ;
4. Films (short, educational and full-length features) ;
5. Selected T.V. programs ;
6. Lectures, conferences, debates, discussion groups ;
7. Varied sports : tennis, swimming, ping-pong, horse-back riding, etc, ;
8. French out-door café ;
9. Dances ;
10. Excursions ;
11. Theatre ;
12. Art workshops ; etc.

As a rule, these activities, except for sports, art workshops, refreshments served in the out-door café and excursions, are free.

THE GET-ACQUAINTED-WITH-QUÉBEC-PROGRAM

The fact that it is held in Montréal explains in part the continued favour enjoyed by the McGill French Summer School. Montréal, the bilingual metropolis of Canada, is the cultural centre of the French-speaking Province of Québec.

This special program has been organized in order to introduce students to the realities of present-day Québec.

The program includes :

(a) courses on the different aspects of Québec civilization and culture ;

(b) public lectures given by leading figures of Québec ;

(c) cinema, folklore, songs ;

(d) several informal outings to places of historical, social and cultural interest in and around Montréal ;

— visits in Old Montréal ;

— meetings with representatives of different social and professional groups ;

— visits in Museums and Art Galleries ;

(e) several excursions to places of interest such as Québec City and Oka Beach.

In addition, students will find in Montréal all they need in order to practise French. The French Summer School is located in the heart of the city whose various resources include French radio, T.V. and cinema, French-speaking churches, boutiques, book-shops, theatres and restaurants. At the beginning of the session, touristic information (maps, booklets, etc.) will be given to students. An information bulletin, l' « Aide-Mémoire », printed daily by the French Summer School and distributed to students and professors each morning, contains suggestions on particularly interesting entertainments presented in the Montréal area.

LANGUAGE LABORATORY

One of the most effective teaching aids used at the French Summer School is the McGill University Language Laboratory. The excellence of its equipment makes it one of the best tools available for programmed and individual practice. The Tape Library places a considerable variety of audio material (readings in prose and verse by elocutionists and contemporary writers ; plays, acted by the best French companies) at the disposal of French Summer School students.

THE GENERAL ASSOCIATION OF THE FRENCH SUMMER SCHOOL STUDENTS

All the students of the School are grouped under a General Association. Every summer the M.A. students elect permanent delegates who carry out their duties throughout the year.

INFORMATION FOR PROSPECTIVE STUDENTS

STATUS OF STUDENTS IN THE SCHOOL

The School is a **residential School** which accepts only *full-time resident students,* who pay full tuition fees. (No exception to this rule is made for Division B students).

Students qualified to take *Division C or D* courses or in the Ba section may be admitted as *non-residents,* provided they are living in Montréal during the year [1].

(1) However, it is strongly advised to Divisions C and D students who can do so, to reside at the School, this being much more beneficial to them.

ADMISSION REQUIREMENTS

Applicants for admission must meet specific requirements with respect to age, general education and proficiency in French. Admissions are selective.

AGE

minimum : 18, before January 1st, 1976.

GENERAL EDUCATION AND PROFICIENCY IN FRENCH

Division B : 2 years of French at CEGEP, College or University or having an equivalent knowledge of French.
Section Ba : General post-secondary standing with no previous knowledge of French.

Division C : Students should normally have graduated (or be graduating) with a Major in French or sensibly the equivalent. They should be able to speak with reasonable fluency (using an active vocabulary of at least 2,000 words), write correct French and experience no difficulty in reading French.

Division D : See "Réglementation du M.A." p. 43.

APPLICATION FOR ADMISSION

Application to the School must be made on an *Application for Admission form* obtainable from the School Secretary.

The completed Application form, accompanied by a *Letter of Recommendation,* a *Transcript of academic records* and the *Deposit* of $50. in **Canadian currency** must reach, before June 15, the French Summer School Secretary's Office (Peterson Hall, P.O. Box 6070, Station A, Montréal, Québec, Canada, H3C 3G1). **Since the number of students admitted to the School is limited,** it is strongly advisable that students **apply as soon as possible.** Accepted applicants will receive a *Letter of Admission.*

Division D students who have not sent in by Registration Day an *official transcript of their B.A. degree,* because they have just completed their senior year in June immediately preceding the Summer School session, must send this document in as soon as possible, and not later than December 31 following their first summer session.

Division D students are required to fill in a complete Application for Admission form each year they plan to attend.

N.B. : Students having attended a previous session of the French Summer School are not required to send again a letter of recommendation, a transcript (and a photograph), unless they register in Division D for the first time.

CANADIAN BURSARY FEDERAL-PROVINCIAL PROGRAM

The French Summer School being an accredited institution of the Federal-Provincial Summer Language Bursary Program, participates in the distribution of full bursaries. The amount of the Governmental bursary being of $650., the full coverage of Tuition and Residence fees is attained by a *complementary bursary* from the School. These bursaries are given to English-speaking Canadians (or landed immigrants), who are full-time students and who satisfy our entrance requirements. Those students intending to apply for a bursary are asked to write as soon as possible to the Secretary of the French Summer School (Peterson Hall,

McGill University, P.O. Box 6070, Station A, Montréal, Québec, Canada H3C 3G1) or call her at (514) 392-4678 or 4679, to obtain the necessary information.

The students in section Ba do not fall into this category of bursary recipients.

DATES AND REGISTRATION

The French Summer School will begin on Saturday, June 28 and end on Saturday August 10.

Students in residence must arrive at the School before midnight (at the latest) on Saturday, June 28. Meals taken at the Bishop Mountain Hall cafeteria previous to the Saturday evening dinner (5:30 to 6:30), are not included in the Residence fees.

REGISTRATION will take place at **Douglas Hall Residence** (3851 University St.) on **Saturday, June 28** and **Sunday, June 29.**

All non-resident students must present themselves on **Saturday afternoon, June 28,** in the following order :

ABC names at 2:00	MNOP names at 3:30
DEFG names at 2:30	QRS names at 4:00
HIJKL names at 3:00	T to Z names at 4:30

All resident students must present themselves on **Sunday afternoon, June 29,** in the following order :

ABC names at 2:00	MNOP names at 3:30
DEFG names at 2:30	QRS names at 4:00
HIJKL names at 3:00	T to Z names at 4:30

Students will be given instructions concerning their registration. For some language courses, they will possibly have to write a placement test or be interviewed. The professors will be at the students' disposal during Registration to provide them with complementary information on the content of courses, on the oral and written work requested in these courses, etc.

No resident student will be admitted at the School if he arrives later than Saturday, June 28.

Classes will begin on Monday morning, June 30.

Changes of courses can be made until Friday, July 4 (included), with the approval of the professor of the newly chosen course. No change can be effected after this date.

Classes will end on Friday, August 8.

The Closing Exercises will take place on Friday, August 8, at 7:30 p.m.

On Saturday, August 9, the professors will be at the students' disposal to supply information or for personal conversation, from 11:00 a.m. to 1:00 p.m. in Douglas Hall.

Students must have left the School by 4:00 p.m. on Sunday, August 10.

TUITION AND RESIDENCE FEES

Deposit	$ 50.00 Can.
Tuition Fee	
Canadian students	$400.00 Can. (+ Deposit)
Non-Canadian students	$450.00 Can. (+ Deposit)
Residence (single room and board)	$390.00 Can.

Division D students: those attending their D5 or D6 session for the **M.A. without thesis** are eligible for the following reduced rates :

Deposit	$ 50.00 Can.
Tuition Fee	
Canadian students	$135.00 Can. (+ Deposit)
Non-Canadian students	$165.00 Can. (+ Deposit)

This advantage of reduced fees is applicable only to those students having accomplished their scholarity at the French Summer School from the beginning (Da or D1).

In very exceptional cases, students may, on an individual basis, be admitted as partial (one or two courses) at the reduced rate of $150. or $250.

N.B.: In order to facilitate the Registration procedure, **students are strongly advised to mail in advance the fees for Tuition and Residence.** Cheques or Money Orders should be made payable to "McGill University" and sent to the Secretary of the French Summer School (Peterson Hall, McGill University, **P.O. Box 6070, Station A, Montréal, Québec, Canada, H3C 3G1).**

Fees should be mailed in BEFORE June 15. After this date, students should not send for their fees, but pay them after the Registration Day.

REFUNDS:

1. The Deposit fee of $50.00 is not refundable. Tuition and Residence fees are refundable any time before Registration Day.
2. After Registration Day, refund of Tuition and Residence fees is obtainable provided students withdraw *before* Saturday July 5. Refunds will be of $600. Can. for Canadian resident students or $650. Can. for non-Canadian resident students. The non-residents will be entitled to a refund of $325. Can. (if Canadian) or $375. Can. (if Non-Canadian). For Division D resident students attending their D5 or D6 session, refund will be of $400. Can. (for Canadians) or $410. Can. (for Non-Canadians) ; the non-residents will obtain a refund of $95. Can. (if Canadians) or $125. Can. (if Non-Canadians). From Saturday July 5 onwards, no refund will be made.

THE GRADING SYSTEM

Final marks for each course are classified into four grades : A (80 - 100%) ; B (65 - 79%) ; C (55 - 64%) ; D (45 - 54%).

In Division D, a mark under 65% is considered a failure.

REPORTS OF STANDING AND TRANSCRIPTS

The Reports of Standing are issued and mailed to the students by the Registrar's Office within the four weeks following the end of the session.

Undergraduate credit is usually given as follow :
4 French Summer School courses = 8 credits.

At the graduate level (M.A.), McGill University does not function under a credit system but in terms of number of courses.

In Division C, the equivalence is :

1 French Summer School course = 2,5 credits ; 4 courses = 10 credits.

Credits may be transferred from the French Summer School to other Institutions (B.A., Bac. Spéc., M.A., Ph.D., Doctorates).

Requests for transcripts (transfer of credits) should be addressed to the Registrar of the University (Registrar's Office, Transcripts Department, Administration Building, P.O. Box 6070, Station A, McGill University, Montréal, Canada, H3C 3G1), who will forward them on payment of a fee of $1.00 for each of the first two copies and $0.10 for each additional copy. **Students who intend to apply such credits towards a degree are recommended to obtain the consent of their own Institution or Department to the transfer of French Summer School credits before attending the School.**

MASTER IN EDUCATION

Students preparing at McGill the degree of M.Ed. (Teaching French as a Second Language) and taking the *Program organized jointly by the French Summer School and the Faculty of Education* are permitted to take certain of the Language, Literature and Civilization courses offered in Division D. These students admitted in De (M.Ed.) at the French Summer School should seek advice on the selection of their courses from the Department of Education in Second Languages, Faculty of Education, McGill University, P.O. Box 6070, Station A, Montréal H3C 3G1. (Tél. : 392-8863). Their choice of courses must be approved by the Chairman of the Department. Also, these students must register in the Graduate Studies of the Faculty of Education (room 531, 3700 McTavish).

RESIDENCES

The residences are DOUGLAS HALL (3851 University St.) and McCONNELL HALL (3905 University St.). (Please see "Plan de l'Université McGILL", p. 47).

The two residences are situated on the wooded "Mountain", and are surrounded by lawns, rock-gardens and playing fields. They adjoin the large public park of the Mount-Royal, and are at the same time, in the centre of the city.

Each student has a single study room and there are spacious common rooms and game rooms.

All rooms are furnished. Linen and blankets are provided.

Each residence is equipped with complete laundry facilities.

Meals (breakfast, lunch and dinner) are served every day, including Sunday, in the dining-room of Bishop Mountain Hall, which adjoins the residences.

The University tennis courts and swimming pool are open to French Summer School students.

HEALTH SERVICE

Students in residence are entitled to the University Health Service (517 Pine Ave. West, tel. : 392-5446) for counselling and guidance. For emergencies recourse can be had at the Royal Victoria Hospital clinic on University Street, very close to the Residences (tel. : 842-1251, local 1885). Referral to a private physician for other treatment will be arranged but the School cannot assume any responsibility for medical treatment.

In case of illness, the non-Canadians will be required to pay their medical and hospital fees.

SCHOOL DISCIPLINE

On Registration Day, students will be given necessary information concerning residence and study. Rules have been kept to the minimum compatible with the efficient administration of a University School and the necessities of community life in which the normal discipline is the respect that each individual accords to the collective will of the group.

The rule at the French Summer School being that of *self-discipline,* each student must consider himself as personally responsible for the smooth running of the School in general and for the respect of the discipline by all.

a) *Telephones :* Telephone calls necessitating the use of English must be made outside the residences. Students would be well advised to request their parents not to call them at their residence except in an emergency.

b) *Visitors* cannot be entertained in the residences unless they can speak French.

c) *The cultural and social activities organized by the School that take place in the afternoons and evenings are very strictly reserved to the students regularly enrolled in the present session, to the staff of the School and to those persons giving assistance in the cultural and social activities.*

Moreover, every student admitted at the French Summer School undertakes to follow these three rules :

1° THE EXCLUSIVE USE OF FRENCH AT ALL TIMES, IN AND OUT OF CLASS, AND ESPECIALLY IN THE RESIDENCES. EVERY APPLICANT PLEDGES HIMSELF TO USE ONLY FRENCH DURING THE SESSION IN ALL CIRCUMSTANCES. THE SCHOOL EXPECTS EVERY STUDENT TO OBSERVE THIS RULE VERY STRICTLY, AS IT WAS INSTITUTED AT THE REQUEST OF THE STUDENTS AND IN THE INTEREST OF ALL [1].

2° EVERYONE'S FREEDOM IS LIMITED BY THE OTHERS'. CONSEQUENTLY, IN AND AROUND THE RESIDENCES, AND AT NIGHT ESPECIALLY, AVOID ANY NOISE THAT MIGHT DISTURB THOSE WORKING OR RESTING.

3° THE WEARING OF THE PERSONAL IDENTITY BADGE IS ABSOLUTELY COMPULSORY IN CLASSES, RESIDENCES AND CAFETERIA. This rule, which is applicable to students and to professors, was decreed for reasons of security and also to personalize the teaching to the maximum by making the mutual identification of the members of the School more easy and more rapid.

(1) This rule does not concern the students in section Ba.

A student who does not intend to abide by these rules is strongly requested not to apply for admission at the French Summer School. Any student who does not follow these three rules puts himself in the position of being excluded immediately from the School ; every student who applies to the French Summer School assents to the application of the School's rule concerning this last point [1].

TEXTBOOKS AND LIBRARY FACILITIES

Students are required to own a copy of all the « Manuels » and « Textes » listed for the courses they take.

They should bring with them the dictionaries and grammars which they use at home or at school.

Readings for courses are available in the Redpath and McLennan Libraries. The majority of books listed as "Lectures obligatoires" and "Lectures conseillées" are found in the Reserve section for the benefice of French Summer School students.

Guided visits (in French) and information on the cataloguing system of the Librairies will take place on Wednesday and Thursday, July 2 and 3, in the afternoon.

IMMIGRATION REQUIREMENTS

Students who are not residents of Canada should bring with them for presentation to Canadian Immigration Officers their **Letter of Admission.**

United States citizens should carry some documents of identification such as passports, birth certificates, and similar papers in order to facilitate their return to their country.

Students who are citizens of the United States by naturalization should carry their naturalization certificates, and those who have not acquired such status should present evidence that they are legally in the United States and that they will be allowed to re-enter that country after their temporary stay in Canada.

BANKING ARRANGEMENTS

It is recommended to out-of-town students that they bring letters of credit or use traveller's cheques, rather than draw ordinary cheques on their home banks. The School has no facilities for cashing cheques.

(1) A student excluded from the School for disciplinary reasons cannot claim any reimbursement of Tuition fees. Only the Residence fees will be refunded in proportion to the number of weeks left before the end of the session, any week already in progress being counted in total.

EMPLOI DU TEMPS

EMPLOI DU TEMPS

LUNDI MERCREDI VENDREDI

Horaire	Cours	Titre
8.15 à 11.45	**409**	**Cours accéléré de français parlé : cours quotidien**

CALENDAR FOR SESSION 1975-76

1975

September 8, Monday	Enrolment of first year students
September 9, Tuesday	Lectures begin for first year students
September 10, Wednesday	Lectures begin for second year students
October 13, Monday	Thanksgiving holiday
December 8, Monday to December 12, Friday	Examinations for first year students
December 12, Friday	Fall term ends

1976

January 5, Monday	Winter term begins
February 13, Friday and February 14, Saturday	Mid-term holiday
April 15, Thursday	Winter term ends for second year students
April 16, Friday to April 19, Monday (incl.)	Easter Vacation
April 20, Tuesday to April 23, Friday	Examinations for first year students

1 STAFF

1.1 ADMINISTRATIVE OFFICERS

ROBERT E. BELL, C.C., B.A., M.A.(U.B.C.), Ph.D.(McG.), D.Sc.(U.N.B., Laval), LL.D.(Tor.), F.R.S., F.R.S.C. **Principal and Vice-Chancellor**

EIGIL PEDERSEN, B.A. (Sir G. Wms.), M.A. (McG.), Ph.D.(Harv.)
Vice-Principal (Academic)

LEO YAFFE, B.Sc., M.Sc.(Man.), Ph.D.(McG.), F.C.I.C., F.A.P.S., F.R.S.C.
Vice-Principal (Administration)

ALLAN McCOLL, D.F.C., B.Com.(McG.), C.A.
Vice-Principal (Finance)

DALE THOMSON, B.A.(Alta.), D.U.(Paris)
Vice-Principal (Planning)

WALTER F. HITSCHFELD, B.A.Sc(Tor.), Ph.D.(McG.), F.R.Met.S.
Vice-Principal (Research) and Dean, Faculty of Graduate Studies and Research

COLIN McDOUGALL, D.S.O., B.A.(McG.)
Secretary-General

JEAN-PAUL SCHULLER, B.A.(Ott.) **Registrar**

1.2 LIBRARY SCHOOL STAFF

EFFIE C. ASTBURY, B.A., B.L.S.(McG.), M.L.S.(Tor.)
Director and Professor of Library Science

RODOLPHE LAVERGNE, B.A.(Montreal), B.L.S., M.L.S.(McG.)
Associate Director and Associate Professor

C. DAVID BATTY, B.A.(Durham), F.L.A.
Professor of Library Science

MARY M. HALL, B.A.(Marianopolis), B.L.S., M.L.S.(McG.) **Associate Professor**

ENID CLEMENT, B.A.(Sir G. Wms.), B.L.S., M.L.S.(McG.) **Assistant Professor**

MARY ELIZABETH DOLAN, B.A.(U.N.B.), M.L.S.(McG.) **Assistant Professor**

PETER F. McNALLY, B.A.(Western Ontario), B.L.S., M.L.S.(McG.) **Assistant Professor**

VERNON ROSS, B.S. in L.S.(Col.), M.A.(McG.)
Emeritus Professor

STEPHANIE BOTH, B.A.(Sir G. Wms.), B.L.S.(Tor.), M.L.S.(McG.) **Librarian**

1.3 SPECIAL LECTURERS

JOHN ANDREASSEN, Ph.B.(Wis.), M.A.(Louisiana) **University Archivist**

DAVID BOURKE, B.Arch.(McG.), M.Arch.(Harv.), F.R.A.I.C., R.C.A.
Executive Assistant to the Principal

WILLIAM HILLGARTNER, B.S., M.Ed.(Penn. State), Ph.D.(Syracuse)
Director, Instructional Communications Centre

ELIZABETH LEWIS, B.A., B.L.S.(McG.)
Rare Books Librarian

WALTER GROSSMANN, M.S.(Simmons), Ph.D.(Harv.)
Director of the Library, University of Massachusetts, Boston, Mass.

KEVIN J. McGARRY, Dip.Soc.(London), F.L.A.
Principal Lecturer, College of Librarianship, Wales

MIRIAM TEES, B.A., B.L.S.(McG.)
Chief Librarian, Royal Bank of Canada

OCCASIONAL LECTURERS

IRENE AUBREY, Children's Librarian, Westmount Public Library; NORAH BRYANT, Chief Librarian, Westmount Public Library; ANDREW N. DE HEER, Director, Research Library on African Affairs, Accra, AILEEN DESBARATS, Lande Canadiana Librarian, McGill University; E. ANTHEA DOWNING, Librarian, Royal Bank of Canada, Montreal; JOEL DOWNING, Deputy Director, Bibliographic Services Division, British Library, London; JOHN DRBLIK, Supervisor, Records Servi-Centre, Canadian National Railways; ROSEMARY HADDAD, Print Curator, Rare Book Department, McGill University; JOHN HOBBINS, Reference Librarian, McLennan Library, McGill University; HELEN HOWARD, formerly Chief Librarian, Sir George Williams University; CATHERINE KOLLAR, Government Documents Librarian, McGill University; JOHN LARIVIERE, Rare Book Conservator, Chicago; ROY LEMOYNE, Architect, Montreal; MARY E. LEWIS, Chief Librarian, United Aircraft of Canada Ltd.; ELEANOR LONDON, Chief Librarian, Côte St. Luc Public Library; ELIZABETH McDONALD Librarian, Bell Northern Research, Technical Information Centre; JOHN MAPPIN, Book Collector, Montreal; EILEEN B. MORASH, Chief Librarian, National Film Board of Canada; IRENA MURRAY, Reference Librarian, McLennan Library, McGill University; ROBERT REID, Typographical Designer, Montreal; HELEN ROGERS, Chief, SDI

Division, National Library, Ottawa; ELIZABETH SAUNDERS. Map Curator, Rare Book Department, McGill University; ELIZABETH SILVESTER, Head, Reference Department, McLennan Library, McGill University; MICHEL THERIAULT, Chef du Service des Acquisitions, Université de Montréal; LIANA VAN DER BELLEN, Chief, Rare Books and Manuscripts Division, National Library, Ottawa.

2 GENERAL INFORMATION

McGill University was the first institution in Canada to provide library training and the first to grant a degree in library science. Short summer programs were given from 1904-1927, the first regular sessional program being given in 1927-28. The program of the School was accredited by the Board of Education for Librarianship of the American Library Association, and the B.L.S. (5th year) degree was first conferred in May 1931. In the session of 1956-57, a 6th year Master of Library Science degree was first offered. After 1964-65 the 5th year degree was discontinued and the M.L.S. degree awarded only after two years of graduate study. In January 1975 the School's M.L.S. program was re-accredited by the Committee on Accreditation of the American Library Association under the *1972 Standards for Accreditation.*

The School's program aims to prepare its graduates to play a dynamic part in the operation of the libraries of today, to be responsive to change, flexible, and perceptive of the need to adjust to new modes in the future. It recognizes a responsibility, in cooperation with professional associations, to share in the continuing education of practising librarians. Though the School does not offer a degree at the doctoral level, it endeavours to make a contribution to the advancement of knowledge, especially in the field of information science.

The School is situated in a large city in which are to be found all types of libraries and is part of a university with a tradition of sound scholarship.

It is located on the street floor of the recently-completed McLennan Library and has an excellent collection in the field of library science and laboratory collections for cataloguing, reference, and children's literature. Students also have full access to the resources of the University's library system.

For instruction in information science a Documentation and Information Systems laboratory is located within the School.

LENGTH OF STUDY FOR M.L.S. DEGREE

The M.L.S. degree is awarded after successful completion of two academic years of post-graduate study. The first year of the program must be taken on a full-time basis; the second year may be completed by part-time study.

REQUIREMENTS FOR ADMISSION

1) Applicants for admission must have a B.A. or B.Sc. degree from a recognized university.

The School will take into account the character of the applicant's undergraduate studies and his/her suitability for library work. Courses in the *humanities, sciences,* and *social studies* are preferred as forming a suitable basis for studies in library science. Courses of a purely vocational or professional nature cannot be counted as fulfilling this requirement, which is intended to ensure an adequate academic preparation. Academic standing of at least B (or second class) is required.

2) A knowledge of at least one language other than English is expected.

3) Application forms may be obtained from the School and, when completed, should be returned to the School. Official transcripts of the applicant's university record must also be supplied. Deadline for receipt of application forms for entrance into the first year of the program is May 15. *As enrolment is limited, early application is advisable.*

4) Previous library experience, while not essential will be given consideration in assessing an application.

WORK EXPERIENCE

All students, and especially those without previous experience of library work are strongly advised to work in a library during the summer period between the end of the first year session and the second year of the program.

EMPLOYMENT

A placement service is situated on the campus.

REGISTRATION

Students entering the first year of the M.L.S. program should present themselves at the Graduate School of Library Science, 3459 McTavish Street on September 8, 1975. All others may register between September 9 and September 12.

EXAMINATIONS AND ADVANCEMENT

Final marks are based on the term's work and/or on examinations. First class standing is 80% and over. The pass mark is 65%.

Students who do not fulfill requirements satisfactorily may be asked to withdraw from the School.

FEES AND EXPENSES

TUITION FEES

The University reserves the right to make changes without notice in the published scale.

Fees are due and payable 10 days after formal registration in the Faculty of Graduate Studies and Research. A late fee of $25 is charged for payment after the specified dates, and no days of grace are allowed.

	Tuition	Student Services	Students' Societies
First year	$570	$60	$29.50
Second year	285	30	29.50
Transfer students entering in second year	570	60	29.50
Additional year	40	30	29.50

SPECIAL FEES

Application for Admission	$15.00
Graduation Fee	$10.00

Information concerning other special fees may be found in the *General Announcement.*

TEXTBOOKS AND MATERIALS

Students should allow at least $100 for textbooks and supplies. These are available from the University Bookstore and the School.

LIBRARY VISITS

Visits to libraries, under the direction of members of the Faculty, are a required part of the course.

BOARD AND RESIDENCE

Information regarding accommodation may be found in the *General Announcement* available from the Registrar's office, P.O. Box 6070, Station "A", Montreal, Quebec. H3C 3G1.

STUDENT SERVICES

Full information concerning Student Services is given in the *General Announcement.*

TRANSFER OF CREDIT

Students wishing to take courses towards their McGill degree at any university in the province of Quebec should refer to the section entitled "Academic Credit Transfer Agreement" in the *General Announcement. In certain cases, credit may be granted for courses taken at other universities after* a student's initial registration in the School. Approval of the Director is necessary and should be obtained in advance.

A student who has obtained a B.L.S. (Canadian) or a M.L.S. (American) with satisfactory standing from another accredited library school will be considered for admission into the second year.

A student who has completed the first year with satisfactory standing at another accredited Canadian library school with a two-year program (four half-year terms) may be permitted to transfer into second year. The applicant must have academic and other qualifications acceptable for entrance into McGill's M.L.S. program and have taken the core courses required in the first year M.L.S. at McGill. In such cases the full program of the second year, or its equivalent, must be taken at McGill.

3 FINANCIAL AID AND AWARDS

SCHOLARSHIPS

These awards are made after due investigation and recommendation to deserving students who require financial assistance. Application should be made to the Director of the School before March 1.

DR. G.R. LOMER SCHOLARSHIPS

Two annually of $660 each in honour of Dr. G.R. Lomer, former Director of the School.

ELIZABETH G. HALL SCHOLARSHIP FUND

$200 from the fund founded in honour of a former member of the McGill University Library staff.

ETHELWYN M. CROSSLEY SCHOLARSHIP FUND

$200 from the fund founded in honour of a former student of the School.

SYRA DEENA TARSHIS FLEISHMAN BURSARY

$200 from the fund founded in memory of a former student of the School.

Additional information concerning financial aid is detailed in the publication, *Postgraduate Awards, Fellowships and Bursaries* available from the Registrar's Office, P.O. Box 6070, Station "A", Montreal, Quebec H3C 3G1. The Canadian Library Association, 151 Sparks Street, Ottawa K1P 5E3, also compiles an annual list of *Scholarships, Bursaries and Loans in the field of Library Science.*

AWARDS

VIRGINIA MURRAY PRIZE FOR CATALOGUING

Awarded to the student in M.L.S. I who obtains the highest grade in the Organization of Materials course.

4 COURSES OF INSTRUCTION

FIRST YEAR COURSES

REQUIRED COURSES

(Total credit hours - 27)

405-602A. INTRODUCTION TO LIBRARIANSHIP. (Not given in 1975-76)

405-603A. SELECTION AND USE OF BOOKS AND RELATED MATERIALS. (3 hours) Basic principles of evaluation and selection of library materials. Attempts to develop knowledge of bibliographic aids for the acquisition of books, periodicals, and other print and non-print materials; current reviewing media; the nature and structure of the publishing industry; controversial materials and censorship in the context of selection; selection policies and their relationship to the library collection and to the library's users.
Professor Hall

405-604B. SELECTION AND USE OF BOOKS AND RELATED MATERIALS. (3 hours) The second half of 603A. For description see above.
Professor Hall

405-605A. REFERENCE MATERIALS AND METHODS. (3 hours) Students are introduced to reference materials and methodology. The fall term concentrates upon informational sources; the winter term emphasizes bibliography and the service aspects of reference work.
Professor McNally

405-606B. REFERENCE MATERIALS AND METHODS. (3 hours) This is the second half of the first year reference course. For a description, see the entry under 405-605A.
Professor McNally

405-607A. ORGANIZATION OF MATERIALS. (3 hours) The scope and objectives of this basic course are aptly expressed in its title. It implies that any type of material may be organized, and that cataloguing and classification are among the several means by which this can be accomplished. Though the approach to the course is theoretical, practical assignments serve as a reinforcement of the theoretical principles.
Professor Clement

405-608B. ORGANIZATION OF MATERIALS. (3 hours) This is the second half of this first year course. For a description, see the entry under 405-607A.
Professor Clement

405-609A. ADMINISTRATION OF LIBRARY OPERATIONS. (3 hours) The first part of this course deals with a study of the "organization" with examples drawn from the library environment. The second part deals with operations which are not usually performed by professional librarians such as the ordering and processing of books and periodicals, circulation, shelf work, and security.
Professor Lavergne

405-610D. INTRODUCTION TO DATA PROCESSING. (2 hours) The need for data processing in libraries; hardware, software, and system analysis and design; case studies in automated library processes.
Professor Batty

405-611A. RESEARCH METHODS. (1 hour) An introduction to some methods of quantitative and non-quantitative research appropriate to the investigation of library problems. Attempts to introduce students to what is involved in planning, conducting and reporting on research thereby providing criteria helpful in evaluating published research in library science.
Professor Hall

COLLOQUIUM
Visiting Lecturers

ELECTIVE COURSES

One of the courses marked * below is to be elected by M.L.S. I students.

SECOND YEAR COURSES

REQUIRED COURSES (3 Hours)

(Total Credit Hours – 24)

405-620A. THEORY AND PRINCIPLES OF ADMINISTRATION. (3 hours) This course is concerned with the application of scientific management to the library situation. It deals with the work of the administrator under the broad headings of information gathering, planning, budgeting, organizing, staffing, directing, and controlling. The case study method is used to illustrate some of the problems encountered in management.
Professor Lavergne

405-622D. RESEARCH PAPER. A documented paper in which a student explores a particular and limited aspect of a general topic in the field of librarianship, such as, the Library and Society, Professionalism and Librarianship, etc. or writes a bibliographical essay on the state-of-the-art of some library problem.
Professor Hall

405-611A. RESEARCH METHODS. (Required for students entering at the second year level.)
Professor Hall

ELECTIVE COURSES (21 Hours)

Seven courses must be taken. Each course 3 credit hours. Not all courses are available in any one year.

405-612B. HISTORY OF BOOKS AND PRINTING. Surveyed are the development of writing, alphabets, and books from their inception, and of printing from its invention in the fifteenth century.
Professor McNally

* **405-613B. AUDIO–VISUAL MATERIALS.** Introduction to audio-visual equipment and typical audio-visual programs in libraries, problems of selection, acquisition, evaluation, organization, housing, and use in various types of libraries.
Professors Dolan and Hillgartner

* **405-614B. PUBLIC LIBRARY ORGANIZATION AND DEVELOPMENT.** A study of the backgrounds of the public library, tracing the development of legislation and the concept of total coverage through larger tax bases. Includes an introduction to current problems.

405-630B. LIBRARY COLLECTIONS: ASSESSMENT AND DEVELOPMENT. Standards for research collections and quantitative and qualitative criteria for evaluating them. Formulation of an acquisitions policy and elements of an acquisitions program. Inter-library relationships, library specialization, and cooperative programs as factors in the development of collections. Developing research collections in special subject fields.
Professor Hall and Walter Grossmann

405-631A. SYSTEMS ANALYSIS. Analysis and description of system objectives, resources, input, processing, output, problem areas and possible solutions. Students undertake problem projects in local libraries and information agencies.
Professor Batty

405-632B. LIBRARY APPLICATIONS OF DATA PROCESSING I. (Prerequisite: 405-610D.) The design and construction of a representative library sub-system using a prepared computer program package.
Professor Batty

405-633B. LIBRARY APPLICATIONS OF DATA PROCESSING II (Information Retrieval). Principles of information retrieval; index languages and information system design; analysis of a sample set of documents for entry into a laboratory model of representative information retrieval systems; search strategies and system evaluation.
Professor Batty

405-634A. PROBLEMS AND DEVELOPMENTS IN CATALOGUING AND CLASSIFICATION. Advanced studies in the problems inherent in several aspects of cataloguing and classification, the general solutions available (e.g. cataloguing codes, classification schemes, etc.), a critical examination of those solutions, and a study of current research into new solutions.
Professor Batty

405-635B. ADVANCED BIBLIOGRAPHY AND REFERENCE METHODS. (Prerequisite: 405-651A) Not given in 1975-76.

405-636A. GOVERNMENT PUBLICATIONS. The nature and scope of official publications of Canada, Great Britain, the United States, and the United Nations; their acquisition, bibliographic organization, and use.
Professor Dolan

405-637B. SCIENTIFIC AND TECHNICAL LITERATURE. Introduction to the process of communication and information requirements in the scientific community; sources of scientific and technical information; study of representative reference sources in specific fields of basic and applied science.
Professor Dolan

405-638B. BUSINESS LITERATURE. An introduction to the literature used in business. Most classes take place at the Library of The Royal Bank of Canada in Place Ville Marie. Various aspects of business are described, and students learn to handle reference questions in this field.
Miriam Tees

405-639A. SPECIAL LIBRARIES. A practical course on administration of special libraries using a simulation technique. Following a general introduction, the class, working in groups, sets up and

puts into operation a hypothetical special library. Class discussion and visits to special libraries are of paramount importance.
Miriam Tees

* **405-640B. COLLEGE AND UNIVERSITY LIBRARIES.** This course first examines the history, development, and current organization of academic institutions and the development of their libraries. A study of the various types of academic libraries is then made as to their role, organization, administration, services, staff and physical facilities. This is completed by a lecture on large non-academic research libraries and national libraries.
Professor Lavergne

405-641A. SEMINAR IN PUBLIC LIBRARY PROBLEMS. (Prerequisite: 405-614B.) Not given in 1975-76.

405-642A. LIBRARY MATERIALS FOR CHILDREN. Survey of the historical background and development of children's literature; study of criteria for the selection and evaluation of books for children; consideration of current titles in relation to the child's reading interests, needs, and abilities.
Professor Dolan

* **405-643B. LIBRARY MATERIALS AND SERVICE FOR YOUNG ADULTS.** An attempt to understand adolescents in today's world and to become familiar with books and other library materials suitable for their interests and needs.

405-644. RARE BOOKS. This is a brief, practical course on books in rare book departments, with mention of the different kinds of material to be found there and also a few of the special problems arising in the day-to-day running of such a department. Books, maps and prints are shown, attendance at a book auction is arranged, as well as a visit to an antiquarian book shop; and visiting lecturers speak on their specialities.
Elizabeth Lewis and Visiting Lecturers

405-645A. ARCHIVES AND RECORDS IN LIBRARIES. This seminar aims at introducing librarians to the literature on archives, historical manuscripts, and records management which may prove useful to them as practising librarians in future. Definitions, principles, and terminology in these three fields are compared with those in library science. Emphasis is placed on records of the various media. Selection, conservation of writings, finding tools, and controls are examined. The impact of the computer and other technological developments are explored. A practical assignment, involving the description of unique papers in publishable form, is called for.
John Andreassen

405-646D. A RESEARCH PROJECT. (Prerequisite: 405-611A) Permission to undertake this is granted by the Director of the School to the exceptional student having the necessary experience or background.
Faculty

405-647A or B. INDEPENDENT STUDY. (Prerequisite 405-611A.) Permission to register for this is given to able students after consultation with the Director of the School. It usually consists of an exploration in depth of a topic in library science which is not emphasized or elaborated on in any other part of the curriculum. Students electing this option work under the direction of a faculty advisor.
Faculty

405-648A. CRITICAL ANALYSIS OF LIBRARY STUDIES. Attempts to develop the ability to analyze and evaluate library research reports through the reading and discussion of both classic and contemporary studies in the field of librarianship. The course illustrates in depth the content of course 611A. (Research Methods).
Professor Hall

405-649B. LIBRARY PLANNING AND ARCHITECTURE. This course is concerned at first with promotion work, the building committee, the program, the study of the region and the determination of the site. It then deals with the major areas and their relationships as well as with furnishings. Part of the course is given by an architect.
Professor Lavergne and David Bourke

* **405-650B. SERVICE TO CHILDREN IN SCHOOL AND PUBLIC LIBRARIES.** Introduction to objectives, functions, and services in school and public library work with children, including trends in the development of elementary and secondary school media centres; problems relating to the organization, administration and evaluation of children's services.
Professor Dolan

405-651A. REFERENCE SERVICE IN THE HUMANITIES AND SOCIAL SCIENCES. This course investigates the conceptual orientation of the disciplines and their constituent subjects. Also considered are the information needs of researchers in these fields and the extent to which reference sources meet these needs.
Professor McNally

405-652A. COMMUNICATION MEDIA AND THE LIBRARY. The intention of the course is to use a model of the communication process to describe the culture and society that is the context of libraries; to analyze the interaction process between the library and the community; to analyze and improve library operations by prediction based on the model.
Professor Batty and Kevin J. McCarry

Courses in Another School or Faculty

A maximum of 12 hours (i.e. four half courses) may be taken with permission provided students have the necessary prerequisites. The following are among the courses suggested:

MATHEMATICAL LOGIC
INTRODUCTION TO DEDUCTIVE LOGIC
HISTORY OF BIOLOGY
GOVERNMENT OF CANADA
PRINCIPLES OF PUBLIC ADMINISTRATION
SOCIAL PSYCHOLOGY
MODERN PSYCHOLOGY IN HISTORICAL PERSPECTIVE
SOCIOLOGY OF THE PROFESSIONS
COLLECTIVE BARGAINING
MASS COMMUNICATIONS
INTRODUCTION TO STATISTICS
EDUCATION AND SOCIETY IN QUEBEC
THE HISTORY AND PHILOSOPHY OF EDUCATION
RUSSIAN LANGUAGE
LITERATURE AND SCIENCE
THIRD WORLD LITERATURE
MODERN NORTH AMERICAN FICTION
20TH CENTURY CANADIAN LITERATURE
THE FILM
STUDIES IN COMMUNICATIONS
LA LITTERATURE QUEBECOISE
HISTOIRE CULTURELLE DU QUEBEC
LIVRES ET SOCIETE QUEBECOISE
LITTERATURE FRANCOPHONE COMPAREE

GENERAL STATEMENT

The McGill Preparatory School of Music is operated by the McGill Faculty of Music. It offers an integrated programme of studies in practical and theoretical subjects at preparatory levels.

GRADE CERTIFICATES

Please note the change in grade designations which will take effect in 1975-76. These have been requested by the Ministry of Education so that grade levels will correspond to those of the secondary school levels. (See table on page 10.)

The Ministry of Education will allow secondary school students to have credit for McGill Preparatory School of Music certificates if they submit successful marks for the following examinations:

Practical Sec. V plus Theory/Ear Training Sec. V. = Music 53

Practical Sec. IV plus Theory/Ear Training Sec. IV = Music 43

Practical Sec. III plus Theory/Ear Training Sec. III = Music 33

Practical Sec. II = Music 23

Practical Sec. I = Music 13.

Secondary school students should apply to the secretary of the Preparatory School for a transcript of the appropriate marks, which should then be submitted to the Principal of the secondary school. For Music 53, Music 43, and Music 33, the mark submitted will be an average of the two marks for the practical examination and for theory/ear training from the Preparatory School.

In Montreal, the preparatory courses are given, and grade examinations held, at 555 Sherbrooke St. W.

LOCAL CENTRES

For non-McGill music students at the preparatory level, the Faculty of Music, through its Preparatory School, acts as an Examination Board, both in Montreal and in various Local Centres in the Province of Quebec, where students prepared by private local teachers can sit the Grade examinations before visiting McGill Examiners in all *practical* subjects, as set by the Faculty of Music (McGill Local Centre Examinations). Examinations in *theoretical* subjects are conducted at each centre under the supervision of a local representative of the McGill Faculty of Music and the papers will be sent to the Faculty for marking. *For a list of McGill Local Centres, please refer to p. 49.*

ADMISSION TO THE McGILL PREPARATORY SCHOOL OF MUSIC

All inquiries should be directed to the Vice-Director, Prof. Donald Mackey, or the Secretary, Miss Dorothy Feinberg, McGill Preparatory School of Music, 555 Sherbrooke St. W., Montreal, telephone 392-4550.

ADMISSION REQUIREMENTS

Potential students will be given an appointment for an interview and, if necessary, an audition. Application forms may be obtained from the Secretary of the Preparatory School.

N.B. For admission requirements to degree and diploma programmes in the Faculty of Music, please consult the *Announcement of the Faculty of Music.*

REGISTRATION

Students in Theory and Ear Training register for the full session (twenty-eight weeks—September to April). Date of registration: September 10 to September 17, 1975.

Students in all *practical* subjects may register for either the full session of twenty-eight weeks (September to April), or for one term of fourteen weeks (September to January, or January to April).

EXAMINATIONS

Sessional Examinations: Final sessional examinations in *theoretical* subjects are held in late April and early May. Examinations in all *practical*

subjects take place during May. Entry forms must be obtained from the Secretary of the McGill Preparatory School of Music and returned duly filled in, on or before March 1.

N.B. For Payment of Examination Fees, please see p. 9.

N.B. Practical examinations contain no ear tests. Theoretical examinations consist of two parts: a written theory test, and, at another time, an ear-training test. Specimen papers are obtainable for a small fee ($0.25 each) from the office of the Preparatory School of Music.

Deferred Examinations

These are held in early fall and are permitted only if the regular spring examinations were missed as a result of illness or other special circumstances. A written request for the deferment of examination must be submitted to the Director on or before August 15.

Supplemental Examinations

Students who have failed to obtain the passing result of 55% in any examination have the choice of: a) passing a supplemental examination in that subject in early fall; b) repeating the course. A written request for a supplemental examination must be submitted to the Director on or before August 15.

Local Centre Examinations

The examinations in *theoretical* subjects are held at the Local Centres on the date of the regular sessional examinations of the McGill Preparatory School of Music. Examinations in *practical* subjects take place during May and June. The regulations concerning *deferred* and *supplementary* examinations outlined above apply also to Local Centre candidates in *theoretical* subjects. However, it should be noted that deferred and supplemental examinations in *practical* subjects are held only in Montreal, as McGill examiners visit the Local Centres only once a year, in the spring. Entry forms for all Local Centre examinations must be obtained from the Secretary of the McGill Preparatory School of Music in Montreal, or from the local Honorary Secretaries, and must be returned, duly filled in, to the Secretary of the McGill Preparatory School of Music on or before *March 1.*

CLASSIFICATION OF MARKS

The following classification of marks for the Preparatory School conforms with the marking system of the Faculty of Music and the rest of the University.

A—80%-100%
B—65%- 79%
C—55%- 64%
D—45%- 54%
F—Fail

Marks are qualified as follows

95% and above	Very High Distinction
90%—94%	High Distinction
80%—89%	Distinction
70%—79%	Honours
55%—69%	Pass

The D class mark implies a pass in the examination attempted but does not allow the candidate to continue to the next highest grade. Therefore in the interest of maintaining a good passing standard in both theoretical and practical subjects certificates will be awarded only to those candidates who have achieved a C category mark, or higher.

DISTRIBUTION OF MARKS IN THEORETICAL EXAMINATIONS

Sec. III, Sec. IV, Sec. V: Written Theory—50%; plus Ear Training—50%. Coll. Eq. I: Theory & Analysis—100%. Ear Training—100%. (Two marks.)

DISTRIBUTION OF MARKS IN PRACTICAL EXAMINATIONS

Technique (Skill in scales, arpeggios, study)	25%
Prepared Pieces (Interpretation, form, style, musicality)	60%
Sight-Reading	10%
General Impression	5%

N.B. Performance from memory should be encouraged and will be recognized in the total examination mark awarded. It is, however, not compulsory.

FEES

N.B. The University reserves the right to make changes without notice in the published scale of fees if, in the opinion of the Board of Governors, circumstances so require.

TUITION FEES

Theory and Ear-Training

			Full Session (28 weeks)
Secondary	III	(1½ hours a week)	$ 60.00
Secondary	IV	(1½ hours a week)	$ 60.00
Secondary	V	(2 hours a week)	$ 80.00
Collegial Equivalent	I	(4 hours a week)	$150.00

N.B. There will be no refund of tuition fees for classes missed in Theory and Ear-Training. Examination fees are additional.

PRACTICAL (ALL INSTRUMENTS AND VOICE)

	One Term	Full Session	
	14 1-hr. lessons	28½-hr. lessons	28 1-hr. lessons
All Levels Minimum:	150.00	150.00	300.00

N.B. Depending on choice of instrument and instructor, fees applying in the Faculty of Music may be charged to students in the McGill Preparatory School of Music, i.e.:

All Levels Minimum:	175.00	175.00	350.00

N.B. Examination fees are additional.

REGISTRATION FEE

A non-refundable registration fee of $5.00 is included in the published fees for tuition of students in the Preparatory School of Music.

REGISTRATION IN PRACTICAL SUBJECTS

Students may register for individual instruction in *practical* subjects as follows:

One term comprising fourteen 1-hour lessons
or for: Two terms comprising twenty-eight ½-hour lessons

or for: Two terms comprising twenty-eight 1-hour lessons

There will be no refund of tuition fees to those students who fail to attend the total number of lessons for which they have signed up, except in cases of illness if a doctor's certificate is produced stating that the student concerned is unable to continue attending lessons for the remainder of the term or the session.

EXAMINATION FEES

Examination fees in all Local Centres are as follows:

Theory and Ear-Training

Secondary III	$12.00
Secondary IV	12.00
Secondary V	12.00

N.B. Collegial Equivalent I Theory, Analysis, Ear Training, is not examined in the Local Centres.

All Practical Subjects

Elementary	$ 7.00
Secondary I	7.00
Secondary II	10.00
Secondary III	10.00
Secondary IV	12.00
Secondary V	15.00
Collegial Equivalent I	18.00
Collegial Equivalent II	18.00
Collegial Equivalent III	25.00

N.B. There will be no refund of examination fees to those students who fail to attend the examination at the time scheduled for them, except in cases of illness if a doctor's certificate is produced stating that the student concerned was unable to attend the examination. In making refunds, only one half of the fee can be refunded, or the full fee will be credited to the following year.

PAYMENT OF FEES

Tuition Fees are due at registration. Remittance may be made by cheque or money order payable to *McGill University* and addressed to the Secretary, Preparatory School of Music, McGill University, 555 Sherbrooke St. W., Montreal. Tuition fees for *practical* instruction covering the entire session of twenty-eight weeks may be paid in two instalments of equal halves, the first at registration, the second not later than December 15. Theory fees must be paid in full, except Collegial Equivalent I, which may be paid in two instalments. Late payment fee is $5.00.

Examination Fees, together with the application form duly filled in, must reach the Secretary of the McGill Preparatory School of Music, 555 Sherbrooke Street West, Montreal, on or before *March 1.* Remittance by cheque or money order should be made payable to *McGill University.*

ATTENDANCE REGULATIONS

1. All students are required to be punctual at all lessons and classes.
2. All students must sign the attendance card presented by the teacher upon completion of each individual lesson in a practical subject.
3. Individual lessons missed in consequence of the instructor's absence will be made up at the mutual convenience of instructor and student. Individual lessons missed as a result of the student's absence will be made up only if notice of cancellation has been given forty-eight hours in advance, or if a doctor's certificate is produced.

TABLE OF GRADE LEVELS IN PRACTICAL & THEORETICAL SUBJECTS

Please note the following change in grade designations which will take effect in 1975-76. These have been requested by the Ministry of Education so that grade levels correspond to those of the Secondary School levels.

Subject	New Designation	Former	Old Grades
Piano	Elementary	Elem. I	4
	Secondary I	Elem. II	5
	Secondary II	Elem. III	6
	Secondary III	Sec. I	7
	Secondary IV	Sec. II	8
	Secondary V	Sec. III	9
	leading to:		
	Collegial Equivalent I	Coll. Eq. I	10
	Collegial Equivalent II	Coll. Eq. II	11
	Collegial Equivalent III	Coll. Eq. III	100
Organ	(Piano Secondary V)	(Piano Sec. III)	(Piano 9)
	Secondary IV	Sec. I	8
	Secondary V	Sec. II	9
	leading to:		
	Collegial Equivalent I	Coll. Eq. I	10
	Collegial Equivalent II	Coll. Eq. II	11
	Collegial Equivalent III	Coll. Eq. III	100
Harpsichord	(Piano Secondary V)	(Piano Sec. III)	(Piano 9)
	Collegial Equivalent I	Coll. Eq. I	10
	Collegial Equivalent II	Coll. Eq. II	11
	Collegial Equivalent III	Coll. Eq. III	100
Violin	Secondary I	Elem. I	5
	Secondary II	Elem. II	6
	Secondary III	Sec. I	7
	Secondary IV	Sec. II	8
	Secondary V	Sec. III	9

Subject	New Designation	Former	Old Grades
	leading to:		
	Collegial Equivalent I	Coll. Eq. I	10
	Collegial Equivalent II	Coll. Eq. II	11
	Collegial Equivalent III	Coll. Eq. III	100
Viola	(Violin Secondary II)	(Violin Elem. II)	(Violin 6)
	Secondary III	Sec. I	7
	Secondary IV	Sec. II	8
	Secondary V	Sec. III	9
	leading to:		
	Collegial Equivalent I	Coll. Eq. I	10
	Collegial Equivalent II	Coll. Eq. II	11
	Collegial Equivalent III	Coll. Eq. III	100
Guitar	Secondary II	Elem. I	6
	Secondary III	Elem. II	7
	Secondary IV	Sec. I	8
	Secondary V	Sec. II	9
	leading to:		
	Collegial Equivalent I	Coll. Eq. I	10
	Collegial Equivalent II	Coll. Eq. II	11
	Collegial Equivalent III	Coll. Eq. III	100
Cello, Recorder,	Secondary III	Elem. I	7
Flute, Clarinet,	Secondary IV	Sec. I	8
Saxophone	Secondary V	Sec. II	9
	leading to:		
	Collegial Equivalent I	Coll. Eq. I	10
	Collegial Equivalent II	Coll. Eq. II	11
	Collegial Equivalent III	Coll. Eq. III	100
Voice, Double Bass,	Secondary IV	Elem. I	8
Oboe, Bassoon,	Secondary V	Sec. I	9
	leading to:		
Trumpet, Trombone,	Collegial Equivalent I	Coll. Eq. I	10
Tuba, French Horn,	Collegial Equivalent II	Coll. Eq. II	11
Percussion	Collegial Equivalent III	Coll. Eq. III	100
Theory/Ear Training	Secondary III	Elem. I	7
	Secondary IV	Sec. I	8
	Secondary V	Sec. II	9
	leading to:		
	Collegial Equivalent I	Coll. Eq. I	12

N.B. Preparatory Grade examinations in practical subjects are incomplete without the corresponding grade in Theory and Ear-Training. Students are therefore obliged to plan their course of instruction and examinations as follows:

Subject								
Practical Subjects:	Elem.	Sec. I	Sec. II	Sec. III	Sec. IV	Sec. V	Coll. Eq. I	Coll. Eq. II
Theory/Ear Training:	—	—	—	Sec. III	Sec. IV	Sec. V	(Sec. VI	(Sec. VI

Students with previous training in practical and/or theoretical subjects will be granted equivalent credit.

APPROXIMATE EQUIVALENTS TO McGILL PREPARATORY GRADES

Please note the change in grade designations which will take effect in 1975-76. These have been requested by the Ministry of Education so that grade levels will correspond to those of the secondary school levels. **(See table on page 10.)**

Subject	System	Grade Equivalents							
Piano	McGill	Elem.	Sec. I	Sec. II	Sec. III	Sec. IV	Sec. V	Coll. Eq. I	Coll. Eq. II
	Tor.	1	2	4	6	7	8	9	10
	W.B.	1	2	4	6	7	8	9	10
	A.B.	1	2	3	4	5	6	7	8
	M.A.	1	2	4	6	7	8	9	10
Violin	McGill	Sec. I	Sec. II	Sec. III	Sec. IV	Sec. V	Coll. Eq. I	Coll. Eq. II	
	Tor.	2	4	6	7	8	9	10	
	W.B.	2	4	6	7	8	9	10	
	A.B.	2	3	4	5	6	7	8	
	M.A.	2	3	4	5	6	7	8	
Voice	McGill	Sec. IV	Sec. V	Coll. Eq. I	Coll. Eq. II

	W.B.	3	5	7	10				
	M.A.	3	4	5	6				
Clarinet	McGill	Sec. III	Sec. IV	Sec. V	Coll. Eq. I	Coll. Eq. II			
	Tor.	4	6	8		10			
	A.B.	3	4	5	6	8			
	M.A.	3	4	5	6	8			
Theory	McGill	Sec. III	Sec. IV	Sec. V					
	Tor.	I		II					
	W.B.	2	3	4					
	A.B.	2	4	6					
	M.A.	2	4	6					

The above chart attempts to give approximate grade equivalents of several other Preparatory Music Grade Systems, as compared with those of McGill, in some of the most frequently chosen subjects:

Tor. — Royal Conservatory of Music of Toronto.
W.B. — Western Examination Board (Univ. of Manitoba).
A.B. — Associated Board of the Royal Schools of Music, London, England.
M.A. — Mount Allison University — Conservatory of Music.

COURSE DESCRIPTIONS AND GRADE CERTIFICATE REQUIREMENTS

1. Theory and Ear Training

N.B. A passing mark is required in both Theory and Ear Training of each grade level.
(See 'Classification of Marks,' p.5..)

Theory and Ear Training Secondary III (Elem. I)

Staff notation, including enharmonic equivalents. Major scales with not more than four accidentals, notated either with key signatures or with accidentals. Functional names of scale degrees. Perfect, major and minor intervals. Simple metres. Italian terms.

Elementary sight-reading and rhythmic reading in major keys up to one sharp and one flat in the treble clef. Elementary melodic and rhythmic dictation. Recognition of perfect, major, and minor intervals.

1½ hours per week.

Theory and Ear Training Secondary IV (Sec. I)

Major and minor scales with not more than five accidentals. All intervals. Simple and compound metres and the notation of rhythmic patterns associated with them. Additional Italian terms. Major and minor triads.

Sight-singing in major and minor keys with not more than three accidentals in treble clef. Rhythmic reading in simple and compound metres. Melodic and rhythmic dictation. Recognition of all intervals as well as major and minor triads.

1½ hours per week.

Theory and Ear Training Secondary V (Sec. II)

Completion of the study of basic musical notation. All major and minor scales, all intervals and their inversions. All triads and dominant sevenths, their inversions, and their component intervals. Introduction to simple cadences. Additional Italian terms.

Sight-singing in major and minor keys with not more than four accidentals in treble and bass clefs. Rhythmic reading. Melodic, rhythmic and elementary chordal dictation. Aural recognition of all perfect, major and minor intervals, as well as of major and minor triads and their inversions.

2 hours per week.

N.B. A more detailed course description of each grade level in Theory (revised, April, 1975) is available from the Secretary of the Preparatory School.

Theory — Analysis — Ear Training Collegial Equivalent I

A special course, for qualified and advanced students, which is the equivalent of the Faculty of Music 211-110A, Melody and Counterpoint, and 211-111B, Elementary Harmony, together with 212-131D — Ear Training.

4 hours a week.

2. Practical Subjects

Please note the following regulations:

1. All candidates are required to bring a written list of their programme to the examination.
2. Selections offered by a candidate in one examination may not be repeated in a subsequent grade's examination.
3. It is not necessary to take a practical examination each year, since some students require two years to proceed from one level to the next.
4. Substitutions of studies and pieces at the equivalent grade level are acceptable for examination purposes. Such changes should be submitted to Prof. Rose Goldblatt, Chairman of the Keyboard Committee, for approval before March 15. *Special forms are available for this purpose from the Secretary of the McGill Preparatory School of Music; please enclose a stamped, self-addressed envelope for reply.*

PIANO

The mention of certain editions is solely for identification and guidance.

A list of suggested teaching albums in early grades is available on request from the office of the Preparatory School.

Piano Elementary (Elem. I)

SCALES

C, G, F major; A, E, D harmonic minor, hands separately through one octave.

ARPEGGIOS

Tonic triads in the above six keys, hands separately through one octave, up and down.

STUDY

Any one to be chosen from "Child's Czerny", compiled by Hugh Arnold (Presser) or "Technic is Fun", Preparatory Book, ed. Hirschberg (Musicord).

PREPARED PIECES

Candidates must have prepared any three pieces from the following list:

Mel Bonis Album pour les Tout-Petits (Combre)
- La Toupie
- Le Petit Mendiant
- La Machine à Coudre
- Gros Chagrin
- Gouttes de Pluie
- Prière

Boris Berlin — Anne Morhange
Young Pianist's Joyful Hour, Bk. I
(Frederick Harris)

Kabalevsky
Little Pieces For Children
Op. 39 (International Music Ed.)
- Marionettes
- Waltz
- Fairy Tale
- Autumn Song

Piano Secondary I (Elem. II)

SCALES

C, G, D, F major, A, E, B, D harmonic minor, hands separately through two octaves. Suggested minimum speed: two notes to MM 84.

ARPEGGIOS

Tonic triads in root position only, in C, G, D, F major, and in A, E, B, D minor, hands separately through two octaves.

STUDY

"Technic is Fun", Bk. I, ed. Hirschberg (Musicord).
Pozzoli, 24 Little Studies, (Ricordi). One only.

PREPARED PIECES

Candidates must have prepared one piece from each of the following three groups:

1. Bach
   Minuet in G
   Bach
   Chorale in F
   Purcell
   Air in D minor
   Purcell
   Minuet in A minor
   Rameau
   Minuet in C

II. Beethoven
   Bagatelle in A minor
   Beethoven
   Ecossaise in G
   Haydn
   Dance in G
   Mozart
   Rondino in C

III. Bartók
   For Children, Vol. 1, No. 1 or 7
   (Boosey & Hawkes)
   Mel Bonis
   Album pour les Tout-Petits (Combre). Any that have not been specified for the previous grade.
   Kabalevsky
   Pieces for Children, Op. 39 (International Music Ed.). One of:
   - Clowns
   - Novelette
   - Slow Waltz

   Octavio Pinto
   Children's Festival: Prelude or Minuet
   Schumann
   Album For The Young, Op. 68, one of Nos. 2, 3, 5, 14.

Soulima Stravinsky
Piano Music for Children, Book I (Peters), one of Nos. 1, 4, 7

SIGHT-READING

Test of no greater difficulty than pieces of previous grade (hands separately).

Piano Secondary II (Elem. III)

SCALES

Scales beginning on white keys: C, D, E, F, G, A, B majors; and C, D, E, F, G, A, B harmonic minors. Hands separately and together through two octaves, piano or forte. Suggested minimum speed: two notes to MM 96.

ARPEGGIOS

Tonic triads in root position only, in the above keys. Hands separately and together through two octaves.

STUDY

"Technic is Fun", Bk. II, ed. Hirschberg (Musicord).
"The New Czerny", Bk. II, (Fox). One only.

PREPARED PIECES

Candidates must prepare one piece from each of the following three groups:

I. Bach
March in D

Bach
Minuet in D Minor

Bach
Minuet in G Minor

Bach
Polonaise in G minor

Couperin
Aria in C

Purcell
Minuet in G

II. Beethoven
Sonatina in G, either movement

Clementi
Sonatina Op. 36, No. 1, any one movement

Haydn
Little Dance in F

Hunten
Melody in C

Mozart
Allegro in B flat

Mozart
Minuet in C

Mozart
Polonaise in F

Pleyel
Minuet & Trio in C

III. Bartók
"For Children", Vol. 1 (Boosey & Hawkes), No. 11 or 15

George Fiala
Prelude (Berandol)

Otto Joachim
"Gossip" or "Plastic Soldier" from 12 Tone Pieces (Berandol)

Kabalevsky
Children's Pieces, Op. 27 (International Music Ed.)
Playing Ball or
Moonlight on the River

Schumann
"Happy Farmer" or "First Loss" from Album for the Young. Op. 68

Soulima Stravinsky
Piano Music for Children, Book I (Peters), one of Nos. 8, 12, 16

Tchaikowsky
Album for the Young: No. 16

SIGHT-READING

Test of no greater difficulty than pieces of Elem. (hands together).

Piano Secondary III (Sec. I)

Scales

A, E, B, F sharp, B flat, E flat, A flat, D flat majors; C, D, E, F, G, A, B harmonic and melodic minors; chromatic scale beginning on C sharp. These scales through two octaves, hands together, forte or piano. Suggested minimum speed: 4 notes to MM 72.

ARPEGGIOS

Tonic triads in all the above major and minor keys in root position only, hands together through two octaves.

STUDY

"Technic is Fun", Bk. III, ed. Hirschberg (Musicord), any one. Or
Bartok, Mikrokosmos, Vol. III, any two.

PREPARED PECES

Candidates must prepare one piece from each of the following three groups:

1. Bach
12 Short Preludes (Peters), one of Nos. 1, 2, 3

Handel
Courante in F

Scarlatti
Larghetto in D minor

II. Beethoven
Sonatina in F, either movement
Clementi
Sonatina Op. 36, No. 2, 1st or 3rd movement
Clementi
Sonatina, Op. 36, No. 3, 3rd movement
Diabelli
Rondino in C
Kuhlau
Sonatina Op. 55, No. 1, either movement

III. Bartók
For Children, Vol. I (Boosey & Hawkes), one of Nos. 8, 12, 23
Bartók
For Children, Vol. II (Boosey & Hawkes), one of Nos. 5, 8, 31
Bloch
Enfantines (Fischer): The Dream or Melody
Claude Champagne
Petit Scherzo (G. V. Thompson)
Jean Papineau-Couture
Aria (Berandol)
Otto Joachim
"Snowy Morning" with "Full Moon', from 12 Tone Pieces (Berandol)
Kabalevsky
Children's Pieces, Op. 27 (International Music Ed.). One of:
Toccatina
Joking
Ballad
Khatchaturian
Adventures of Ivan (Leeds), any one
Schumann
Waltz in A minor
Shostakovitch
Mechanical Doll
Prokofieff
Music for Children, Op. 65, No. 3
Tchaikowsky
Album for the Young, one of Nos. 9, 10, 22

SIGHT-READING

Test of no greater difficulty than pieces of Sec. I

THEORY AND EAR TRAINING

Secondary III

Piano Secondary IV (Sec. II)

SCALES

B, F sharp, C sharp, F, B flat, E flat, A flat, majors; also harmonic and melodic minors and chromatic scales, beginning from the same notes, hands together through four octaves in similar motion only, legato and staccato, piano and forte. Suggested minimum speed: four notes to MM 92, legato, and MM 69, staccato.

ARPEGGIOS

Tonic triads of the above keys, with inversions, through four octaves. These may be required to start in root position or in either inversion.

STUDY (ONE ONLY)

Bertini-Germer
50 Selected Studies, any one of Nos. 7, 12, 15, 17 or 22
Czerny
School of Velocity, Op. 299, Book I, any one of Nos. 1, 2 or 4
Czerny
School of Finger Dexterity, Op. 636, any one of Nos. 5, 6, 10 or 17

PREPARED PIECES

Candidates must prepare one piece from each of the following four groups:

1. Bach
Two-part Inventions, No. 1 or No. 4
Bach
12 Short Preludes (Peters), No. 5 or No. 8
Bach
6 Short Preludes (Peters), any one of Nos. 3, 5 or 6
Handel
Suite No. 14, Allemande or Air
Handel
Suite No. 16, Allemande
Scarlatti
Sonata in C, Longo 357
Sonata in Bb, Longo 36
from The Graded Scarlatti, ed. Motchane (Columbe)

II. Beethoven
Sonata, Op. 49, No. 2, either movement
Clementi
Sonatina in C, Op. 36, No. 3, 1st movement
Clementi
Sonatina in F, Op. 36, No. 4, 1st or 3rd movement
Clementi
Sonatina in G, Op. 36, No. 5, 1st or 3rd movement
Kuhlau
Sonatina in C, Op. 20, No. 1, 1st or 3rd movement
Kuhlau
Sonatina in C, Op. 55, No. 3, either movement
Mozart
Viennese Sonatina No. 1 in C, 1st or last movement

III. Chopin
Mazurkas, Op. 7, No. 2; Op. 67, No. 2; Op. 68, No. 3 (any one)

Grieg
Arietta, Op. 12, No. 1

Schubert
German Dances, Op. 33, No. 5 with No. 7

Schubert
Moment Musical, Op. 94, No. 3 or 6

Schumann
Album For The Young, Op. 68, No. 9 with No. 36; No. 21 with No. 23

IV. Bartók
For Children, Vol. I (Boosey & Hawkes), any one of Nos. 20, 21, 27

Bartók
For Children, Vol. II (Boosey & Hawkes), any one of Nos. 18, 21, 26

Kabalevsky
Variations, Op. 51, No. 4

Kenneth Meek
Turf Tune (Gordon V. Thompson)

Flor Peeters
10 Bagatelles, Op. 88 (Peters), one of Nos. 4, 7, 8

Prokofieff
Children's Suite, Op. 65 (Leeds), any one of Nos. 2, 4, 10, 11

Ravel
Prelude

Rhené Jaque
Rustic Dance from Canadian Festival Album, Vol. 1 (Berandol)

Julius Schloss
23 Pieces for Children in Twelve Tone Style (Peer International), No. 10, with No. 21

SIGHT-READING

Test of no greater difficulty than pieces of Sec. II.

THEORY AND EAR TRAINING

Secondary IV.

Piano Secondary V (Sec. III)

SCALES

At the interval of the octave: all major, harmonic and melodic minor, and chromatic scales, through four octaves. At the third: all major scales, through four octaves. Contrary motion: all major scales beginning from the unison through two octaves. Forte and piano, legato and staccato. Suggested minimum speed: four notes to MM 108, legato; and four notes to MM 84, staccato.

N.B. No minor scales in contrary motion are required.

ARPEGGIOS

All major and minor tonic triads in root position or inversion. Also dominant seventh chords in root position. Forte and piano, legato and staccato, through four octaves. Suggested speed: four notes to MM 92, legato; and four notes to MM 72, staccato.

STUDY (ONE ONLY)

Bertini-Germer
50 Selected Studies, one of Nos. 39, 43, 48, 49

Cramer-Buelow
50 Selected Studies, No. 1 or No. 19

Czerny
School of Velocity, Op. 299, one of Nos. 5, 6, 7 or 8

Czerny
School of Finger Dexterity, Op. 636, one of Nos. 1, 2, 7, 14 or 21

PREPARED PIECES

Candidates must prepare one piece from each of the following four groups:

I. Bach
Two-part Inventions, one of Nos. 6, 11, 13 or 14

Handel
Suite No. 7, Allegro or Andante

Scarlatti
Sonata in C, Longo 218
Sonata in B minor, Longo 263
Sonata in F minor, Longo 173
Sonata in E, Longo 430
from The Graded Scarlatti, ed. Motchane (Columbe)

II. Beethoven
Sonatina in E flat, first movement

Beethoven
Variations in G on an original theme

Beethoven
Sonata, Op. 49, No. 1, either movement

Clementi
Sonatina, Op. 36, No. 6, 1st movement

Mozart
Sonata in G, K 283, 2nd movement
Viennese Sonatina, No. 6 in C, 1st two or last two movements

III. Chopin
Mazurka, one of Op. 6, No. 1; Op. 17, No. 2; Op. 30, No. 2; Op. 67, No. 4

Chopin
Prelude No. 15

Chopin
Waltz, Op. 70, No. 2, or Op. 34, No. 2

Grieg
Lyric Pieces, Op. 43, No. 1 or No. 4

Liszt
Consolation, No. 2

Schubert
Waltzes, Op. 9a (Nos. 1, 2, 3: all three)

Schumann
Album For The Young, Op. 68, one of Nos. 13, 29 or 39

Schumann
Scenes From Childhood, No. 4 with No. 5

IV. Bartók
For Children, Vol. I (Boosey & Hawkes), No. 40, or all three of 34, 35, 36

Debussy
Children's Corner, one of Nos. 2, 5, 6

Duchow
Chant Intime

Maurice Dela
Chanson from "La Vieille Capitale" (Berandol)

Menotti
Poemetti, 12 Pieces, any one

J. Turina
The Circus, any one

SIGHT-READING

Test of no greater difficulty than pieces of Sec. III.

THEORY AND EAR-TRAINING

Secondary V.

Piano Collegial Equivalent I

SCALES

At the interval of the octave, third, and tenth: All major, harmonic and melodic minor, and chromatic scales, through four octaves.

At the sixth: All majors through four octaves.

Contrary Motion — All majors and harmonic minors beginning from the unison, through two octaves.

Broken Octaves — All majors, hands separately, through two octaves.

The above scales should be played forte and piano, legato and staccato. Suggested minimum speed for all, except broken octaves: four notes to MM 120, legato; and four notes to MM 84, staccato. Broken Octaves: suggested speed, four notes to MM 88.

ARPEGGIOS

Major and minor tonic triads, dominant seventh and diminished seventh chords, in root position or inversion. Forte and piano, legato and staccato, through four octaves.

STUDY

Any one from:

Cramer-Buelow
50 Selected Studies, No. 10 or No. 12

Czerny
School of Velocity, Op. 299, No. 11 or No. 13

PREPARED PIECES

Candidates must prepare one piece from each of the following four groups:

I. Bach
French Suite No. 4 in E flat:
Sarabande with Gigue

Bach
French Suite No. 5 in G:.
Allemande with Sarabande

Bach
Three-part Inventions, any one

Handel
Suite No. 16 in G minor:
Allemande with Sarabande, or
Sarabande with Gigue

Telemann
Fantasie No. 7 or No. 8 (Peters)

II. Beethoven
Sonatina No. 2 in F minor, any two movements

Beethoven
Sonatina No. 3 in D, 1st movement

Beethoven
Variations on "Nel cor piu"

Haydn
Sonata in E minor, No. 2, 1st movement (Peters)

Haydn
Sonata in D, No. 7, 1st movement (Peters)

Mozart
Sonata in G, K. 283, 1st movement

Mozart
Rondo in D

III. Brahms
Waltzes, Op. 39, No. 2 with No. 3 or No. 9 with No. 11

Chopin
Mazurka, one of Op. 17, No. 1; Op. 33, No. 1; or Op. 63, No. 2

Chopin
Waltz, Op. 69, No. 2 or Op. 64, No. 3

Chopin
Nocturne, Op. 55, No. 1 or Op. 37, No. 1

Mendelssohn
Songs Without Words, any one of: Op. 19, No. 1; Op. 38, No. 2; Op. 62, No. 1; Op. 67, No. 1

Schubert
Impromptu in A flat, Op. 142, No. 2

Schumann
Romance in F sharp.

IV. Bartók
Three Rondos on Folk Tunes, any one

Debussy

Arabesque No. 1 or No. 2

George Fiala
Sonatina (Berandol)

Kabalevsky
Variations, Op. 40, No. 1

Pinto
Memories of Childhood. No. 1 with No. 5

W. K. Rogers
Six Short Preludes (Berandol), No. 1 with No. 3 or No. 4 with No. 5

Scriabin
Etude, Op. 20, No. 1

Scriabin
Prelude, Op. 11, No. 14

SIGHT-READING

Test of a suitable level.

THEORY AND EAR TRAINING

Secondary V.

Piano Collegial Equivalent II

SCALES

At the interval of the octave, third, sixth, and tenth: All scales, including chromatics, through four octaves. Contrary motion: All scales, except melodic minors, from the unison only, through two octaves. Broken Octaves: All majors and melodic minors, hands separately and together, through two octaves.

ARPEGGIOS

Tonic triads, dominant and diminished seventh chords in root position or inversion, as requested by the examiner, at the interval of an octave.

Note: Scales and arpeggios should be played at as fast a speed as is consistent with clarity and accuracy, using legato and staccato touch, and without group accentuation, through four octaves.

STUDIES

Any two from:

Cramer-Buelow
Fifty Selected Studies (any except those listed for previous grades)

Czerny
School of Velocity, Vols. III and IV

PREPARED PIECES

Candidates must prepare one selection from each of the following four groups:

I. Bach
French Suite No. 3 in B minor:
Sarabande and Gigue

Bach
Well-Tempered Clavier, Bk. I: Prelude and Fugue No. 5 in D or No. 21 in B flat

Bach
Well-Tempered Clavier, Bk. II: Prelude and Fugue No. 7 in E flat; or No. 12 in F minor

Handel
Suite No. 7 in G minor: Passacaglia

Handel
Suite No. 10 in D minor: Air and Gigue

Handel
Suite No. 14 in G: Allemande and Allegro

Scarlatti
Sonata chosen at the discretion of the teacher

Telemann
Fantasie No. 12 in B minor

II. Beethoven
Sonata, Op. 2, No. 1: either 1st or last movement

Beethoven
Rondo, in C, Op. 51, No. 1

Beethoven
Bagatelles, Op. 33, No. 1 with No. 4 or Op. 126, No. 1 with No. 2

Haydn
Sonata No. 10 in G, 1st movement (Peters)

Haydn
Sonata No. 15 in D, 1st movement (Peters)

Mozart
Sonata in C, K. 330. 1st movement

Mozart
Sonata in E flat, K. 282, 1st movement

III. Brahms
Intermezzi, Op. 76, No. 4 or No. 6

Brahms
Ballade, Op. 10, No. 1

Brahms
Romance, Op. 118, No. 5

Chopin
Mazurka, Op. 17, No. 4, or Op. 41, No. 4

Chopin
Nocturne, Op. 32, No. 1, or Op. 72, No. 1

Chopin
Waltz, Op. 70, No. 1, or E minor (Posthumous)

Mendelssohn
Songs Without Words, any one of: Op. 19, No. 5; Op. 38, No. 6; Op. 53, No. 3; Op. 67, No. 4

Mendelssohn
Scherzo in E minor

Schubert
Impromptu, Op. 90, No. 4

Schubert
Moment Musical, Op. 94, No. 2

Schumann
Arabesque, Op. 18

IV. Albeniz
Sevillanas

Debussy
Children's Corner, any one of Nos. 1, 3, or 4

Debussy
Mazurka in F sharp minor

Duchow
Passacaglia

Hector Gratton
Fairy Tale (Berandol)

Jean Papineau-Couture
Deux Valses from 14 Piano Pieces by Canadian Composers (Frederick Harris)

Prokofieff
Visions Fugitives, Op. 22, any two

Prokofieff
Prelude, Op. 12, No. 7

Tcherepnine
Bagatelles, Op. 5, any two

Villa-Lobos
Polichinelle

SIGHT-READING

Test of a suitable level

THEORY AND EAR TRAINING

Secondary V.

Piano Collegial Equivalent III

The requirements are the performance of a previously approved program, comprising representative works from the Baroque, Classical, Romantic, and Modern periods. The program, with timings, should be submitted to Prof. Rose Goldblatt, Chairman of the Keyboard Committee, before March 15.

The complete program should be memorized if possible, but at least *one* major work will be required from memory. Sight reading will be part of the examination.

A separate scales test (pass-fail) at the level of Collegial Equivalent II must be undertaken by those candidates who have not previously taken the Collegial Equivalent II piano examination or its accepted equivalent.

A list of suggested repertoire for Collegial III is available on request.

ORGAN

AOP — Articulation in Organ Playing — Gordon Phillips (Hinrichsen, No. 1001)
VOS — Organ School — Finn Videro (Wilhelm Hansen, Copenhagen; (J. & W. Chester, London)
P — The Organ Works of Bach, new edition (Peters)
N — The Organ Works of Bach, ed. Emery (Novello)
S — The Organ Works of Bach, ed. Widor & Schweitzer (Schirmer)
D — The Organ Works of Bach, ed. Dupré (Durand)
HE — The Organ works of Dietrich Buxtehude (Wilhelm Hansen Edition, Copenhagen)
PE — Buxtehude Orgelwerke (Peters Edition)
OUP — Oxford University Press
P.V. — Peters Verlag

(Roman numerals indicate the volumes.)

N.B. It is recommended that students explore "Beginning Organists" by David N. Johnson (Augsburg), which contains much useful material.

The following examinations are intended for performance on the organ, not on electronic instruments.

Organ Secondary IV (Sec. I)

PREREQUISITE: PIANO SECONDARY V

STUDIES

The following are obligatory:
1. Bach — Herr Christ, der ein'ge Gottes-Sohn (AOP — pg. 12) (manuals only)
2. Pedal studies on pages 70, 71, 72, 73 (VOS)

QUESTIONS

Candidates will be questioned on matters of articulation, e.g., see Sections 3 and 5 (AOP) and page 15 et seq. (VOS)

PREPARED PIECES

Candidates must be prepared to play one piece from each of the following three groups:

I. Buxtehude
Puer natus in Bethlehem (VOS, 101)

Couperin
Kyrie (VOS, 104)

Dandrieu
Trio (VOS, 94)

Pachelbel
Vom Himmel hoch (VOS, 108)

II. Bach
Fugue in A minor (Eight Short Preludes and Fugues) (P. VIII; N. I)

Bach
Herzlich tut mich verlangen (VOS, 110)

Bach
Prelude in D minor (VOS, 112)

Bach
Prelude in B flat (VOS, 124)

III. Alain
Ballade en mode Phrygien (Leduc) (l'Oeuvre d'orgue de Jehan Alain — III)

Bloch
Processional (G. Schirmer) (No. 6, Six Preludes for Organ)

Boellmann
Menuet (Suite Gothique) (Durand)

Willan
Ave maris stella (OUP) (No. 4, Five Preludes on Plainchant Melodies)

SIGHT READING

Appropriately graded test chosen by the examiner.

THEORY AND EAR TRAINING

Secondary IV.

Organ Secondary V (Sec. II)

STUDIES

The following are obligatory:

1. Bach — Vater unser im Himmelreich (AOP, 35) (manuals only)
2. Bach — Nun bitten wir den heiligen Geist (AOP, 29) (manuals only)
3. Pedal studies on pages 74, 75, 76, 77 (VOS)

QUESTIONS

Candidates will be questioned on matters of articulation, on registration, and on the tonal structure of the organ.

(See, for example, "The Organ", W. L. Sumner, 4th edition (Macdonald, London).)

Candidates will also be questioned on the prepared pieces.

PREPARED PIECES

Candidates must be prepared to play one piece from each of the following three lists:

I. Buxtehude
Nun komm, der Heiden Heiland (HE IV, 48; PE II, 45)

Buxtehude
Prelude and Fugue in F (HE II, 92)

Couperin
Benedictus — Messe pour les paroisses (L'Oiseau-Lyre — Monaco, pg. 52)

Pachelbel
Herr Christ, der einig Gottes Sohn (Bärenreiter, Bk. II, 8)

II. Bach
Fugue on "Allein Gott in der Höh' sei Ehr'" (P. VI, 30; N. XVIII, 7)

Bach
Prelude and Fugue in E minor (VOS, 128)

Bach
Orgelbüchlein (P.V.; N. XV.)
One of: Der Tag, der ist so freudenreich; Herr Jesu Christ, dich zu uns wend'; Ich ruf' zu dir, Herr Jesu Christ

Bach
Vater unser im Himmelreich (P. VII, 66; N. XIX, 12)

III. Robert Cundick
Moderato from Divertimento (Novello)

Marcel Dupré
Te lucis ante terminum (Bornemann) (No. 5, "Le Tombeau de Titelouze")

Robin Milford
Musette and Trio in D (OUP) (Seven Simple Pieces)

Helmut Walcha
Fröhlich soll mein Herze springen (No. 7 of 25 Chorale Preludes — Set I — Peters)

SIGHT-READING

Test of not greater difficulty than pieces of previous grade.

THEORY AND EAR TRAINING

Secondary V

Organ Collegial Equivalent I

STUDIES

The following are obligatory:

1. Bach — Allein Gott in der Höh' sei Ehr' (AOP, 30)
2. Bach — Christ lag in Todesbanden (AOP, 25)
3. Pedal studies on pages 78, 79, 80 (VOS)

Questions

(As for Organ Secondary V.)

Prepared Pieces

Candidates must be prepared to play one piece from each of the following three groups:

I. Buxtehude
Chaconne in E minor (HE I, 9; PE I, 64)

Buxtehude
Prelude, Fugue and Chaconne (HE II, 5; PE I, 4)

Couperin
Dialogue sur les grands eux
(Messe pour les paroisses, pg. 57) (L'Oiseau-Lyre)

Pachelbel
Fugue on "Vom Himmel hoch" (Bärenreiter, Bk. II, 20)

II. Bach
"Little" Fugue in G minor (P. IV; N. III.)

Bach
Orgelbüchlein (P.V.; N. XV)
One of: Herr Gott, nun schleuss den Himmel auf; Hilf Gott, dass mir's gelinge; In dir ist Freude

Bach
Wachet auf (Schübler) (P. VI.; N. XVI.)

Bach
Wir glauben all' an einen Gott (Fugue) (P. VII, 78; N. XVI, 49)

III. Richard Donovan
Prelude on "Land of Rest" (Music Press, Inc., New York)

Hindemith
Sonata No. 2, 2nd movement (Schott)
Mendelssohn
Sonata No. 6, Fugue
Vaughan Williams
Romanza (No. 1 of Two Preludes on Welsh Folksongs) (OUP)

SIGHT-READING

Test of not greater difficulty than pieces of previous grade.

THEORY AND EAR TRAINING

Secondary V.

Organ Collegial Equivalent II

STUDIES

The following are obligatory:
1. Bach — Aus tiefer Notschrei' ich zu dir (AOP, 22)
2. Bach — Vom Himmel hoch (AOP, 14)
3. Pedal studies on pages 80 and 81 (VOS)

QUESTIONS

(As for Organ Sec. V & Coll. Eq. I.)

PREPARED PIECES

Candidates must be prepared to play one piece from each of the following three lists:

I. Buxtehude
Prelude and Fugue in F sharp minor (HE II, 72; PE I, 38)
Couperin
Offertoire (Messe pour les paroisses)
Sweelinck
Mein junges Leben hat ein Ende (Peters)

II. Bach
Concerto No. 4 in C (P. VIII, 44; N. XI, 49)
Bach
Nun freut euch, lieben Christen g'mein (P. VII, 36; N. XVIII, 80)
Bach
Prelude and Fugue in A (P. II; N. III)
Bach
Wir glauben all' an einen Gott (Double pedal) (P. VII, 82; N. XIX, 30)

III. Seth Bingham
Rhythmic Trumpet (Galaxy)
Marvin Duchow
Any three from Seven Chorale Preludes in Traditional Style (Berandol)
Graham George
Two Preludes on "The King's Majesty" (H. W. Gray, New York)
Saint-Saëns
Prelude in B (Durand)

SIGHT READING

Test of not greater difficulty than pieces of previous grade.

Theory and Ear Training

Secondary V.

HARPSICHORD

Harpsichord Collegial Equivalent I
(PREREQUISITE: PIANO SECONDARY V)

STUDIES

The following are obligatory:
1. Bach — Two-part Inventions, any three (Peters or Henle)
2. Daquin — L'Hirondelle (FSI, 1.60)
3. Arne — Gigue (FSI, 1.40)

QUESTIONS

Candidates will be questioned on matters of harpsichord touch, phrasing, articulation, ornamentation and registration.

(See "The Harpsichord", E. Harich-Schneider: Bärenreiter.)

Candidates will also be questioned on the prepared pieces.

PREPARED PIECES

Candidates must be prepared to play at least one piece from each of the four sections (English, French, German, Italian) of FSI (Ferguson, "Style and Interpretation"; an Anthology of Keyboard Music. Oxford University Press, vols. I and II.)

SIGHT-READING

Appropriately graded test chosen by examiner.

THEORY AND EAR TRAINING

Secondary V.

Harpsichord Collegial Equivalent II

STUDIES

The following are obligatory:
1. Bach — Three-part Inventions (Peters or Henle), any three
2. Daquin — L'Hirondelle (FSI, I.60)
3. Scarlatti — Sonata in G minor (FSI, II.61)

QUESTIONS

As for Harpsichord Collegial Equivalent I.

PREPARED PIECES

Candidates must be prepared to play one piece from each of the following lists: (FSI, vols. I and II)

I. Byrd
Pavana and Galiardo (Parthenia)
Gibbons
Fantasia of Foure Parts (Parthenia)
Purcell
Prelude in G minor (Suite II)

II. Couperin
La Convalescente (27e Ordre)
Couperin
Les Ondes (5e Ordre)
Rameau
La Triomphante

III. Handel
Allegro in G major (Suite XIV)
Bach
Prelude in A minor (English Suite II)
Bach
Fugue in B minor (Albinoni)

IV. Scarlatti
Sonata in E major
Scarlatti
Sonata in F minor

SIGHT READING

Test of not greater difficulty than pieces of previous grade.

THEORY AND EAR TRAINING

Secondary V.

VOICE

N.B. Selections offered by a candidate in one examination may not be repeated in a subsequent year's examination.

Voice Secondary IV (Elem. I)

STUDIES

Vaccai — Any two contrasting studies (Schirmer).

PREPARED PIECES

Three songs in all — one from each of the following groups:

I. Dowland, Purcell, Handel, Michael Head.
II. Haydn, Mozart, Schubert.
III. Italian School, i.e., La Flora, vol. I or French School, Fauré, Hahn.

SIGHT-READING

Appropriately graded test chosen by the examiner.

THEORY AND EAR TRAINING

Secondary IV.

Voice Secondary V (Sec. I)

STUDIES

Vaccai — Any two contrasting studies.

PREPARED PIECES:

Three songs in all — one from each of the groups given for Voice Secondary IV.

SIGHT-READING

Test of no greater difficulty than prepared songs of previous grade.

THEORY AND EAR TRAINING

Secondary V.

Voice Collegial Equivalent I

STUDIES

Concone — Any three contrasting studies chosen from Nos. 1 to 25 Schirmer).

PREPARED PIECES

Four songs in all — at least one from each of the groups given for Voice Secondary IV.

SIGHT-READING

Test of not greater difficulty than prepared songs of previous grade.

THEORY AND EAR TRAINING

Secondary V

Voice Collegial Equivalent II

STUDIES

Panofka — Any three contrasting studies.

PREPARED PIECES

Five songs in all — at least one from each of the following groups:

I. Early Italian School.
II. Dowland, Purcell, Handel.
III. Haydn, Mozart, Schubert.
IV. Fauré, Ravel, Hahn.

SIGHT-READING

Test of not greater difficulty than prepared songs of previous grade.

THEORY AND EAR TRAINING

Secondary V.

STRINGS

N.B. Letter codes appearing in the course descriptions refer to book authors and titles, and are explained below:

F-E — Fiorillo, Etudes.
K-E — Kayser, Etudes, Op. 20.
Kr-E — Kreutzer, Etudes.
M-TSS — Mazas, Thirty Special Studies, Op. 36.
R-C — Rode, Caprices.
S-VM — Sevcik, Violin Method, Op. 6 — Part II.
S-E — Sitt, Etudes, Op. 32 — Bk. III.
W-E — Wohlfahrt, Exercises, Op. 74.
W-FS — Wohlfahrt, Foundation Studies — Bks. I and II.

VIOLIN

Violin Secondary I (Elem. I)

SCALES

G and A major and minor through two octaves. D major and minor, F major through one octave, one

note to each bow. (Minor scales in melodic form only.)

STUDIES

S-VM (No. 13); or W-E (No. 2 — with different bowings).

PREPARED PIECES

One selection from the following list of pieces: Papini, Theme with Variations, Op. 57; Prachti, Twelve Easy Pieces, Op. 12; Rieding, Prière, Op. 22, No. 4; Old Masters for Young Players, Book I (ed. A. Moffat): any one; Schott's "Selected Series", Book I or III: any one.

SIGHT-READING

Appropriately graded test chosen by the examiner.

Violin Secondary II (Elem. II)

SCALES

G, A, and B major and minor through two octaves, four notes to each bow. (Minor scales in melodic form only.)

ARPEGGIOS

G major and minor in first position only through two octaves: (a) one note to the bow; (b) three notes to the bow.

STUDIES

K-E (No. 1 — played with four different bowings); K-E (No. 7).

PREPARED PIECES

One selection from the following list of pieces: Portnoff, Concerto Facile, Op. 14; Rieding, Concertino in B minor, Op. 35 (in first position); Seitz, Concertino, Op. 22, No. 5; Hans Sitt, Concertino in First Position, Op. 93 (first or last movement).

SIGHT-READING

Test of not greater difficulty than prepared pieces of previous grade.

Violin Secondary III (Sec. I)

SCALES

Two octaves of C and B flat major and minor in second position, D major and minor in third and fourth position. Minor scales are to be played in both forms. One note to each bow; three notes slurred to each bow.

ARPEGGIOS

Two octaves in the keys of G and D major and minor: one note to each bow; three notes slurred to each bow.

STUDIES

K-E (Nos. 9 and 12); S-E (No. 42).

PREPARED PIECES

One selection from the following pieces: Portnoff, concerto op. 13 or 14; Seitz, Concerto No. 2.

SIGHT-READING

Test of not greater difficulty than prepared pieces of previous grade.

THEORY AND EAR TRAINING

Secondary III

Violin Secondary IV (Sec. II)

SCALES

Two octaves of E and E flat major and minor (harmonic and melodic), starting in fourth and fifth position. F major and minor (harmonic and melodic), starting in fifth and sixth position. One note to each bow; three notes slurred to each bow.

ARPEGGIOS

Two octaves in keys of E flat, E, and F major and minor.

STUDIES

E-K (Nos. 13 and 16); M-TSS (No. 4).

PREPARED PIECES

One selection from the following list:

Pugnani-Moffat, Allegro entusiastico; Vivaldi: Concerto in A-minor (first movement, or second and third movement).

SIGHT-READING

Test of not greater difficulty than prepared pieces of previous grade.

THEORY AND EAR TRAINING

Secondary IV.

Violin Secondary V (Sec. III)

SCALES

G, A, B flat, and B major and their tonic minors (harmonic and melodic) through three octaves. All scales to be played detached and three notes to a bow.

ARPEGGIOS

G, A, B flat, and B major and minor, through three octaves: one note to each bow; three notes slurred to each bow.

STUDIES

K-E (Nos. 21 and 29); M-TSS (No. 7).

PREPARED PIECES

One selection from the following list:

Accolay, Concerto in A minor; Seitz, Concerto No. 3, op. 12 (first movement); Concerto No. 4 (first movement); Sitt, Concertino op. 31 (first or last movement).

SIGHT-READING

Test of not greater difficulty than prepared pieces of previous grade.

THEORY AND EAR TRAINING

Secondary V.

Violin Collegial Equivalent I

SCALES

All major and minor (harmonic and melodic) scales through three octaves. Slurred and detached bowing.

ARPEGGIOS

In all major and minor keys through three octaves, one note to a bow and slurred (one bow ascending and one descending).

STUDIES

F-E (No. 15); Kr-E (No. 10); M-TSS (No. 18).

PREPARED PIECES

Candidates must play the first piece and any one of the other four in the following list of pieces:

Handel, Six Sonatas (any one); Nardini, Concerto in E minor; Tartini, Sonata in G Minor; Viotti, Concerto No. 23 (first or last movement).

SIGHT-READING

Test of not greater difficulty than prepared pieces of previous grade.

THEORY AND EAR TRAINING

Secondary V.

Violin Collegial Equivalent II

SCALES

All major and minor (harmonic and melodic) through three octaves. Also the chromatic scales of C beginning on the G string, and E beginning on the D string, through two octaves. Slurred and detached bowing.

ARPEGGIOS

In all major and minor keys, as well as dominant and diminished seventh chords through three octaves, one note to a bow, and slurred (one bow ascending and one descending).

STUDIES

One selection from each of the following: F-E; Kr-E; F-C.

PREPARED PIECES

Candidates must play one selection from each of the following groups of pieces:

I. Corelli-Leonard, La Folia; Kreutzer, Concerto No. 19; Rode, Concerto in A minor, Op. 8; Veracini, Sonata in E Minor.

II. Bach, Concerto in E Major; Bach, Sixth Partita in E Major, for violin alone (first movement only).

SIGHT-READING

Test of not greater difficulty than prepared pieces of previous grade.

THEORY AND EAR TRAINING

Secondary V.

VIOLA

Viola Secondary III (Sec. I)
Prerequisite: Violin Sec. II

SCALES

C, D, and E major and minor melodic in two octaves, four notes to each bow.

ARPEGGIOS

C major and minor in first position only, through two octaves: (a) one note to each bow; (b) three notes to each bow.

STUDIES

K-E (any one); W-FS1 (any one).

PREPARED PIECES

Rieding, Concertino in B Minor, Op. 35 (viola transcription); or an easy selection from Old Masters For Young Players by Moffat-Palascho.

SIGHT-READING

Appropriately graded test chosen by the examiner.

THEORY AND EAR TRAINING

Secondary III

Viola Secondary IV (Sec. II)

SCALES

F and E flat major and minor (harmonic and melodic) in second position, G major and minor (harmonic and melodic) in third and fourth positions, through two octaves: (a) one note to each bow; (b) two notes slurred to each bow.

ARPEGGIOS

C and G major and minor, through two octaves: (a) one note to each bow; (b) three notes slurred to each bow.

STUDIES

One selection from any of the following:
K-E (any one); W-FS2 (any one).

PREPARED PIECE

R. V. Williams, Viola Suite (Carol, Ballade and Musette); or selections from Old Masters For Young Players by Moffat-Palascho.

SIGHT-READING

Test of not greater difficulty than prepared pieces of previous grade.

THEORY AND EAR TRAINING

Secondary IV.

Viola Secondary V (Sec. III)

SCALES

C, D, E flat, and E major and their tonic minors

(harmonic and melodic) through three octaves. To be played detached and three notes to a bow.

ARPEGGIOS

C, D, E flat, and E major and their tonic minors through three octaves. To be played detached and three notes to a bow.

STUDIES

K-E (Nos. 21 and 29); M-TSS (No. 7).

PREPARED PIECE

Grazioli, Sonata in F; or M. Marais, Five Old French Dances; or three selections from Album of Classical Pieces, adapted for the viola by Klengel.

SIGHT-READING

Test of not greater difficulty than prepared pieces of previous grade.

THEORY AND EAR TRAINING

Secondary V.

Viola Collegial Equivalent I

SCALES

All major and minor (harmonic and melodic) scales through three octaves except A, A flat, B, B flat (major and minor) through two octaves. Slurred and detached bowing.

ARPEGGIOS

All major and minor keys through three octaves, detached and slurred (one bow ascending and one descending).

STUDIES

Three studies, one from each of the following: F-E; K-E; M-TSS.

PREPARED PIECES

Handel, Sonatas (any one of the six); Mozart, Divertimento in C; or Sitt, Concerto Op. 68.

SIGHT-READING

Test of not greater difficulty than prepared pieces of previous grade.

THEORY AND EAR TRAINING

Secondary V.

Viola Collegial Equivalent II

SCALES

All major and minor (harmonic and melodic) scales through three octaves except A, A flat, B, B flat (major and minor) through two octaves. Also the chromatic scale of F beginning on C string, and of A beginning on G string, through two octaves. Slurred and detached.

ARPEGGIOS

All major and minor keys, as well as dominant and diminished seventh chords, through three octaves, detached and slurred (one bow ascending and one descending.)

STUDIES

Three studies, one from each of the following: F-E; Kr-E; R-C.

PREPARED PIECES

Ariosti, Sonata No. 2; or Handel, Concerto; Bruch, Romance; or P. Juon, Sonata; or Hindemith, Trauermusik; Milhaud, Sonatas Nos. 1 and 2.

SIGHT-READING

Test of not greater difficulty than prepared pieces of previous grade.

THEORY AND EAR TRAINING

Secondary V.

CELLO

Cello Secondary III (Elem. I)

SCALES AND ARPEGGIOS

C, G, D, and F major; A and D minor, through two octaves.

STUDIES

L. Feuillard, Studies for the Young Cellist (Nos. 11 and 17); Lee, Forty Studies, op. 31, No. 4.

PREPARED PIECES

L. Feuillard: Selections for the Young Cellist: any two.

SIGHT-READING

Appropriately graded test chosen by the examiner.

THEORY AND EAR TRAINING

Secondary III.

Cello Secondary IV (Sec. I)

SCALES AND ARPEGGIOS

E, A, D, A flat, and B flat major, and C sharp, F sharp, B, F, C, and G minor, through two octaves.

STUDIES

Dotzauer: 113 Studies (Nos. 10 and 33); L. Feuillard: Studies for the Young Cellist (Nos. 35 and 51).

PREPARED PIECES

W. H. Squire: Gavotte op. 5 (Augener ed. No. 7704 B). Also one additional piece, to be selected by the teacher.

SIGHT-READING

Test of not greater difficulty than prepared pieces of previous grade.

THEORY AND EAR TRAINING

Secondary IV.

Cello Secondary V (Sec. II)

SCALES AND ARPEGGIOS

All major and minor, through two octaves: detached; slurred, two notes to a bow, and four notes to a bow.

ARPEGGIOS

All major keys, through two octaves.

STUDIES

Any two studies selected from the following: Dotzauer: 113 Studies (any two advanced studies); Merk: Studies (Nos. 1 and 2); Duport: Exercises (No. 9); or Whitehouse: Progressive Studies for the Violincello (nos. 19, 20, 22, 24, 25, and 27).

PREPARED PIECES

Breval: Sonata in C major. Also one additional piece, to be selected by the teacher.

SIGHT-READING

Test of not greater difficulty than prepared pieces of previous grade.

THEORY AND EAR TRAINING

Secondary V.

Cello Collegial Equivalent I

SCALES

All major and minor melodic through three octaves: detached; slurred, two, four, or eight notes to a bow.

ARPEGGIOS

All major and minor keys, through three octaves.

STUDIES

Duport: Any two.

PREPARED PIECES

J. S. Bach: Unaccompanied Suite No. 1: any one movement; or Goltermann: Concerto in B minor (first movement); and Eccles: Sonata in G minor.

SIGHT-READING

Test of not greater difficulty than prepared pieces of previous grade.

THEORY AND EAR TRAINING

Secondary V.

Cello Collegial Equivalent II

SCALES

All major and minor melodic scales through three octaves. Chromatic scale of F beginning on the C string, and of C beginning on the G string, through two octaves. Slurred and detached bowing.

ARPEGGIOS

All major and minor, through three octaves.

STUDIES

Any two studies selected from the following: J. L. Duport, Study No. 7 or Caprice; Franchomme, Studies (any one); or Grutzmacher, Studies (any one).

PREPARED PIECES

Bach, Suites (two movements from any one); Saint-Saëns, Concerto in A Minor (first movement).

SIGHT-READING

Test of not greater difficulty than prepared pieces of previous grade.

THEORY AND EAR TRAINING

Secondary V.

DOUBLE BASS

Double Bass Secondary IV (Elem. I)

SCALES AND ARPEGGIOS

Major: C, D flat, D, E flat, G, A flat, B flat, B: through two octaves. Minor: B, F, E, G, A, B: through one octave. Bowing patterns: slurring 2, 3, and 4 to a bow, after playing the scale in a full, sustained tone, one note to a bow. Also simple rhythmic patterns.

STUDIES

Simandl I: up to the fourth position.

PREPARED PIECES

One movement from a sonata, or any one selection from Old Masters For Young Players (Cello), ed. Moffat.

SIGHT-READING

Appropriately graded test chosen by the examiner.

THEORY AND EAR TRAINING

Secondary IV.

Double Bass Secondary V (Sec. I)

SCALES

All major and minor, through two octaves. Bowing patterns: slurring up to five notes to a bow. Spiccato.

ARPEGGIOS

All major and minor: three slurred in a bow.

STUDIES

Completion of exercise portion of Simandl I, up to thumb position. Selections from Kreutzer, Moeckel, Storch-Hrabe.

PREPARED PIECES

Three movements from a sonata chosen by the instructor.

SIGHT-READING

Test of not greater difficulty than prepared pieces of previous grade.

THEORY AND EAR TRAINING

Secondary V.

Double Bass Collegial Equivalent I

SCALES

Same as Sec. V. Slurring up to eight notes to a bow.

ARPEGGIOS

Same as Sec. V. Four slurred in a bow.

STUDIES

Selections from Simandl II, Storch-Hrabe, Moeckel, Kreutzer. Selected orchestral passages.

PREPARED PIECES

Selected movements from Bach's Suites. A full sonata chosen by the instructor. Beethoven: 5th symphony — Scherzo; 9th symphony — Recitative and Ode to Joy.

SIGHT-READING

Test of not greater difficulty than prepared pieces of previous grade.

THEORY AND EAR TRAINING

Secondary V.

Double Bass Collegial Equivalent II

SCALES AND ARPEGGIOS

Same as Coll. Eq. I, incorporating bowings from Moeckel's Studies

STUDIES

Nanny, Kreutzer, Storch-Hrabe (Vols. I et II). Orchestral passages — Mozart: Symphonies Nos. 40 and 41.

PREPARED PIECES

Dragonetti: Concerto.

SIGHT-READING

Test of not greater difficulty than prepared pieces of previous grade.

THEORY AND EAR TRAINING

Secondary V.

WOODWINDS

FLUTE

Flute Secondary III (Elem. I)

Production of tone, low C to high E; Altès, Flute Method, Vol. 1; major scales to two sharps and two flats; easy pieces.

SIGHT-READING

Appropriately graded test chosen by examiner.

THEORY AND EAR TRAINING

Secondary III.

Flute Secondary IV (Sec. I)

Major and minor scales and arpeggios to two sharps and two flats; Altès, Flute Method, Vol. I; Gariboldi, Etudes Mignonnes; one duet by Telemann.

SIGHT-READING

Test of not greater difficulty than prepared pieces of previous grades.

THEORY AND EAR TRAINING

Secondary IV.

Flute Secondary V (Sec. II)

Scales, arpeggios, and scales in thirds, to four sharps and four flats: Altès, Flute Method, Vol. II; Koehler, Etudes, op. 33, No. 1; Gariboldi, Melodious and Progressive Studies; one sonata by Purcell, Pepusch or Vivaldi.

SIGHT-READING

Test of not greater difficulty than prepared pieces of previous grade.

THEORY AND EAR TRAINING

Secondary V.

Flute Collegial Equivalent I

Scales and arpeggios in all major and minor keys; Altès, Flute Method, Vol. II; Anderson, 18 Studies, op. 41; Berbiguier, 18 Etudes; Sonatas by Handel and Telemann.

SIGHT-READING

Test of not greater difficulty than prepared pieces of previous grade.

THEORY AND EAR TRAINING

Secondary V.

Flute Collegial Equivalent II

Moyse, Gammes et Arpèges; Andersen, 24 Studies, op. 21; Koehler, 12 Studies, op. 33, Book II; one concerto by Telemann, Quantz or Haydn.

SIGHT-READING

Test of not greater difficulty than prepared pieces of previous grade.

THEORY AND EAR TRAINING

Secondary V.

RECORDER

Recorder Secondary III (Elem. 1)

Duschenes, Method for the Recorder, Part 1 (BMI Canada); scales in C, G, D, and F major; Duschenes, Studies in Recorder Playing; two easy duets and pieces with piano.

SIGHT-READING

Appropriately graded test chosen by examiner.

THEORY AND EAR TRAINING

Secondary III.

Recorder Secondary IV (Sec. I)

Major and minor scales and arpeggios to two sharps and two flats; Duschenes, Method for the Recorder, Part I and beginning of Part II; Easy sonatas and duets by 17th and 18th century masters; Duschenes, Studies in Recorder Playing; any two.

SIGHT-READING

Test of not greater difficulty than prepared pieces of previous grade.

THEORY AND EAR TRAINING

Secondary IV.

Recorder Secondary V (Sec. II)

Scales and arpeggios to four sharps and four flats; Duschenes, Method for the Recorder, Part II; Fifteen Solos by Anonymous Masters of the Eighteen Century (Schott); Duschenes, Studies in Recorder Playing; Telemann, Duets; Sonatas by Handel, Loeillet, Vivaldi, Purcell.

SIGHT-READING

Test of not greater difficulty than prepared pieces of previous grade.

THEORY AND EAR TRAINING

Secondary V.

Recorder Collegial Equivalent I

Duschenes, Studies in Recorder Playing; Moenkemeyer, Hohe Schule (Moeck); Hoeffer-Winterfield, 40 Studies (Sikorski); Telemann, Sonatas; Bach, Brandenburg Concerto No. 4; Telemann, Suite in A minor; Telemann, Concerto in G minor; obligato parts to Bach arias; Graupner, Concerto; Tate, Spielstueck (Baerenreiter); Hoeffer-Winterfeld, 12 Etuden fuer Altfloete; ability to play soprano, alto, tenor, bass recorders. Duschenes, Method, Part II.

SIGHT-READING

Test of not greater difficulty than prepared pieces of previous grade.

THEORY AND EAR TRAINING

Secondary V.

Recorder Collegial Equivalent II

Moenkemeyer, Hohe Schule; Berkeley, Sonatina; Genzmer, Sonata; Bach, Brandenburg Concerto No. 2; Sammartini, Concerto in F; Telemann, Concerti in C and F major; Albinoni, Concerto in G; Naudot, Concerto in G; ability to play in C clef third line.

SIGHT-READING

Test of not greater difficulty than prepared pieces of previous grade.

THEORY AND EAR TRAINING

Secondary V.

OBOE

Oboe Secondary IV (Elem. I)

Posture. Proper hand position. Proper blowing. Correct reed position. Tonguing. Long tones. Ear training on the oboe (Scalework).

SIGHT-READING

Appropriately graded test chosen by examiner.

THEORY AND EAR TRAINING

Secondary IV.

Oboe Secondary V (Sec. I)

Scalework. Long tones. Learning about reeds. Sellner, Etudes Progressives (interval section only). Barret, 42 Progressive Melodies. Appropriate solo repertoire.

SIGHT-READING

Test of not greater difficulty than prepared pieces of previous grade.

THEORY AND EAR TRAINING

Secondary V.

Oboe Collegial Equivalent II

Long tones. All scales, slow and fast. Reedwork. Barret, 16 Grandes Etudes and 4 Sonatas. Solo repertoire. Beginning of orchestral repertoire.

SIGHT-READING

Test of not greater difficulty than prepared pieces of previous grade.

THEORY AND EAR TRAINING

Secondary V.

CLARINET

Clarinet Secondary III (Elem. I)

Position of lips and fingers; tone production. Scales and arpeggios in C, F, and G major through two octaves (legato).

STUDIES

"Le Débutant Clarinettiste", by A. Perrier (any one); and appropriate studies from "The Clarinet" by Thurston and Frank (Boosey & Hawkes).

SIGHT-READING

Appropriately graded test chosen by examiner.

THEORY AND EAR TRAINING

Secondary III.

Clarinet Secondary IV (Sec. I)

Scales and arpeggios in B flat, D and A major, A, D, and E minor (harmonic), through two octaves; chromatic scale on E through three octaves, legato.

STUDIES

Perrier, Etudes Faciles et Progressives; and appropriate studies from "The Clarinet" by Thurston and Frank (Boosey & Hawkes).

PREPARED PIECES

Slow movement from one of the clarinet concerti of Karl Stamitz.

SIGHT-READING

Test of not greater difficulty than prepared work of previous grade.

THEORY AND EAR TRAINING

Secondary IV.

Clarinet Secondary V (Sec. II)

Scales and arpeggios in E flat, A flat and E major, G, F, and F sharp harmonic minor, through two octaves, legato, and in the pattern of two legato, two staccato. Also scales in thirds.

STUDIES

Selections from: Rose, Twenty-Six Studies; Rose, Thirty-two Studies; Blancou, Forty Studies; and appropriate studies from "The Clarinet" by Thurston and Frank (Boosey & Hawkes).

PREPARED PIECES

First movement of one of the clarinet concerti of Karl Stamitz.

SIGHT-READING

Test of not greater difficulty than prepared work of previous grade.

THEORY AND EAR TRAINING

Secondary V.

Clarinet Collegial Equivalent I

Scales and arpeggios in B major and C sharp minor through two and a half octaves; in fourths in F major and A minor. Whole-tone scales to be played legato and staccato throughout clarinet range.

STUDIES

Labanchi, Method.

PREPARED PIECES

Mozart: Slow movement from Concerto in A major, K. 622; Weber: Slow movement from Concertos No. 1 or 2; Weber: Slow movement from Duo Concertante, opus 48.

SIGHT-READING

Test of not greater difficulty than prepared work of previous grade.

THEORY AND EAR TRAINING

Secondary V.

Clarinet Collegial Equivalent II

Scales and arpeggios in F sharp major and D sharp minor; in fifths in A major and G minor; in thirds on whole-tone scales through two octaves.

STUDIES

A. Perrier, Etudes de Genre et d'Interprétation; Labanchi, Studies.

PREPARED PIECES

Weber, Concertino; Dunhill, Phantasy.

SIGHT-READING

Test of not greater difficulty than prepared work of previous grade.

THEORY AND EAR TRAINING

Secondary V.

SAXOPHONE

Saxophone Secondary III (Elem. I)

Embouchure formation, tone production; attack. Chromatic scale, throughout complete range of instrument; major scales in C, G, D, F, and B flat. Studies from Paul DeVille, The Universal Method for Saxophone; Ben Verecken, The Elementary Method for Saxophone.

SIGHT-READING

Appropriately graded test chosen by examiner.

THEORY AND EAR TRAINING

Secondary III.

Saxophone Secondary IV (Sec. I)

Vibrato studies; elementary staccato studies. Scales in C, G, D, A, E, F, B flat, E flat, and A flat major; A, E, D, G, and C harmonic minor. — Intermediate studies from the books mentioned in Secondary III.

SIGHT-READING

Test of not greater difficulty than prepared work of previous grade.

THEORY AND EAR TRAINING

Secondary IV.

Saxophone Secondary V

All major and harmonic minor scales. Advanced studies from the books mentioned in Secondary III.

SIGHT-READING

Test of not greater difficulty than prepared work of previous grade.

THEORY AND EAR TRAINING

Secondary V.

Saxophone Collegial Equivalent I

Major and minor scales and arpeggios. Chromatic scales. Klose, Etudes; Ben Verecken, Studies, Book I; Labanchi-Iasilli, Book I.

SIGHT-READING

Test of not greater difficulty than prepared work of previous grade.

THEORY AND EAR TRAINING

Secondary V.

Saxophone Collegial Equivalent II

Labanchi-Iasilli, Books I and II; Mule-Soussman, Volume I. Advanced studies on chromatics. Transposition. Solos of intermediate difficulty.

SIGHT-READING

Test of not greater difficulty than prepared work of previous grade.

THEORY AND EAR TRAINING

Secondary V.

BASSOON

Bassoon Secondary IV (Elem. I)

Embouchure formation. Action of tongue and lips. Practice of attacks, long tones, fingering, scales.

SIGHT-READING

Appropriately graded test chosen by examiner.

THEORY AND EAR TRAINING

Secondary IV.

Bassoon Secondary V (Sec. I)

Extension of range. Scale studies. Exercises on articulations. Weissenborn, Studies, Books I and II.

SIGHT-READING

Test of not greater difficulty than prepared work of previous grade.

THEORY AND EAR TRAINING

Secondary V.

Bassoon Collegial Equivalent I

Tenor clefs. Major and minor scales. Weissenborn, Milde, Scale studies.

SIGHT-READING

Test of not greater difficulty than prepared work of previous grade.

THEORY AND EAR TRAINING

Secondary V.

Bassoon Collegial Equivalent II

Legato and staccato. Eugène Jancourt, Grande Etude pour Basson, op. 55; L. Milde, Twenty-Four Studies in All Keys, op. 24.

SIGHT-READING

Test of not greater difficulty than prepared work of previous grade.

THEORY AND EAR TRAINING

Secondary V.

BRASS INSTRUMENTS

TRUMPET

Trumpet Secondary IV (Elem. I)

Formation of basic embouchure and breathing procedures; emphasis on mouthpiece placement, basic tongue placement, posture. Chromatic scale through one and one-half octaves; major scales in three keys. Elementary beat studies. One solo piece, chosen by the instructor.

SIGHT-READING

Appropriately graded text chosen by examiner.

THEORY AND EAR TRAINING

Secondary IV.

Trumpet Secondary V (Sec. I)

Development of basic embouchure; emphasis on breath placement, posture, attack and release. Major scales in five keys through one octave. Elementary subdivision studies. One solo piece, chosen by the instructor.

SIGHT-READING

Test of not greater difficulty than prepared work of previous grade.

THEORY AND EAR TRAINING

Secondary V.

Trumpet Collegial Equivalent I

Continuing development of basic embouchure through two octaves; emphasis on tone production, sustained tones, staccato and legato. Major and relative minor scales and tonic arpeggios in three sharps and flats through one and one-half octaves. Rhythmic studies. Reading band and orchestral materials. One solo piece, with accompaniment, chosen by the instructor.

SIGHT-READING

Test of not greater difficulty than prepared work of previous grade.

THEORY AND EAR TRAINING

Secondary V.

Trumpet Collegial Equivalent II

Emphasis on tone production, breath support, embouchure development; all elementary articulations: attack, release, staccato, legato; intervals. Major and relative minor scales and tonic arpeggios in five sharps and flats through one and one-half octaves; chromatic scale through two octaves. Reading band and orchestral materials.

STUDIES

Two from: Schantl, Studies; Pares, Scale Studies; Arban, Method; Hering, 40 Progressive Studies; Endresen, Supplementary Studies; or equivalent.

PREPARED PIECE

One from Balay, Petite Piece Concertante, or equivalent.

SIGHT-READING

Test of not greater difficulty than prepared work of previous grade.

THEORY AND EAR TRAINING

Secondary V.

HORN

Horn Secondary IV (Elem. I)

Formation of basic embouchure; emphasis on mouthpiece placement, posture. Chromatic scale through one octave; major scales in three keys. Elementary beat studies.

SIGHT-READING

Appropriately graded test chosen by examiner.

THEORY AND EAR TRAINING

Secondary IV.

Horn Secondary V (Sec. I)

Formation of basic embouchure; emphasis on breath placement, posture, attack and release. Major scales in five keys through one octave. Elementary subdivision studies. One solo piece, chosen by the instructor.

SIGHT-READING

Test of not greater difficulty than prepared work of previous grade.

THEORY AND EAR TRAINING

Secondary V.

Horn Collegial Equivalent I

Development of basic embouchure; emphasis on tone production, sustained tones, staccato and legato. Major and relative minor scales and tonic arpeggios in three sharps and flats through one and one-half octaves. Rhythmic studies. Reading band and orchestral materials. One solo piece with accompaniment, chosen by the instructor.

SIGHT-READING

Test of not greater difficulty than prepared work of previous grade.

THEORY AND EAR TRAINING

Secondary V.

Horn Collegial Equivalent II

Emphasis on tone production, breath support, embouchure development; all elementary articulations; attack, release, staccato, legato; intervals. Major and relative minor scales and tonic arpeggios in five sharps and flats through one and one-half octaves; chromatic scale through two octaves. Reading band and orchestral materials.

STUDIES

Two from Schantl, Studies; Pares, Scale Studies; Alfonse, Book I; Horner, Primary Studies; Endresen, Supplementary Studies; or equivalent.

PREPARED PIECE

One from Mozart, Concert Rondo, or equivalent.

SIGHT-READING

Test of not greater difficulty than prepared work of previous grade.

THEORY AND EAR TRAINING

Secondary V.

TROMBONE

Trombone Secondary IV (Elem. I)

Formation of basic embouchure; emphasis on mouthpiece placement, posture. Chromatic scale through one octave; major scales in three keys. Elementary beat studies.

SIGHT-READING

Appropriately graded test chosen by examiner.

THEORY AND EAR TRAINING

Secondary IV.

Trombone Secondary V (Sec. I)

Formation of basic embouchure; emphasis on breath placement, posture, attack and release. Major scales in five keys through one octave. Elementary subdivision studies. One solo piece, chosen by the instructor.

SIGHT-READING

Test of not greater difficulty than prepared work of previous grade.

THEORY AND EAR TRAINING

Secondary V.

Trombone Collegial Equivalent I

Development of basic embouchure; emphasis on tone production, sustained tones, staccato and legato. Major and relative minor scales and tonic arpeggios in three sharps and flats through one and one-half octaves. Rhythmic studies. Reading band and orchestral materials. One solo piece with accompaniment, chosen by the instructor.

SIGHT-READING

Test of not greater difficulty than prepared work of previous grade.

THEORY AND EAR TRAINING

Secondary V.

Trombone Collegial Equivalent II

Emphasis on tone production, breath support, embouchure development; all elementary articulations: attack, release, legato, staccato, intervals. Major and relative minor scales and tonic arpeggios in five sharps and flats through one and one-half octaves; chromatic scale through two octaves. Reading band and orchestral materials.

STUDIES

Two from Schantl, Studies; Pares, Scale Studies; Slama, 66 Etudes; Arban, Method; Endresen, Supplementary Studies; or equivalent.

PREPARED PIECE

One from Croce-Spinelli, Solo de Concours, or equivalent.

SIGHT-READING

Test of not greater difficulty than prepared work of previous grade.

THEORY AND EAR TRAINING

Secondary V.

TUBA

Tuba Secondary IV (Elem. I)

Formation of basic embouchure; emphasis on mouthpiece placement, posture. Chromatic scale through one octave; major scales in three keys. Elementary beat studies.

SIGHT-READING

Appropriately graded test chosen by examiner.

THEORY AND EAR TRAINING

Secondary IV.

Tuba Secondary V (Sec. I)

Formation of basic embouchure; emphasis on breath placement, posture, attack and release. Major scales in five keys through one octave. Elementary subdivision studies. One solo piece, to be chosen by the instructor.

SIGHT-READING

Test of not greater difficulty than prepared work of previous grade.

THEORY AND EAR TRAINING

Secondary V.

Tuba Collegial Equivalent I

Development of basic embouchure; emphasis on tone production, sustained tones, staccato and legato. Major and relative minor scales and tonic arpeggios in three sharps and flats through one and one-half octaves. Rhythmic studies. Reading band and orchestral materials. One solo piece with accompaniment, chosen by the instructor.

SIGHT-READING

Test of not greater difficulty than prepared work of previous grade.

THEORY AND EAR TRAINING

Secondary V.

Tuba Collegial Equivalent II

Emphasis on tone production, breath support, embouchure development; all elementary articulations: attack, release, staccato, legato; intervals. Major and relative minor scales and tonic arpeggios in five sharps and flats through one and one-half octaves; chromatic scale through two octaves. Reading band and orchestral materials.

STUDIES

Two from Schantl, Studies; Pares, Scale Studies; Eby, Book I; Arban, Method; Endresen, Supplementary Studies; or equivalent.

PREPARED PIECE

One from Cohen, Romance and Scherzo, or equivalent.

SIGHT-READING

Test of not greater difficulty than prepared work of previous grade.

THEORY AND EAR TRAINING

Secondary V.

OTHER INSTRUMENTS

PERCUSSION

Percussion Secondary IV (Elem. I)

Hand position on snare drum (traditional or match grip) from Jacques Delécluse: Méthode de Caisse-claire. Concentration on rhythm with metronome.

THEORY AND EAR TRAINING

Secondary IV.

Percussion Secondary V (Sec. I)

Exercices for alternation from Jacques Delécluse: Méthode de Caisse-claire. Tympani roll from Pierre Béluse: Basic Tympani Technique.

THEORY AND EAR TRAINING

Secondary V.

Percussion Collegial Equivalent I

The roll and its explanation from Jacques Delécluse: Méthode de Caisse-claire. Exercises on tympani tuning from Pierre Béluse: Basic Tympani Technique.

SCALES

All major scales on keyboard instruments.

THEORY AND EAR TRAINING

Secondary V.

Percussion Collegial Equivalent II

The rebound and its control from Jacques Delécluse: Méthode de Caisse-claire. Tympani studies from Jacques Delécluse: Trente (30) Etudes. Book I.

SCALES

All minor scales (harmonic and melodic) on keyboard instruments.

THEORY AND EAR TRAINING

Secondary V.

Guitar Secondary II (Elementary I)

SCALES

C, D major, 1 octave; G, A, F major, 2 octaves; C melodic minor, 1 octave; F melodic minor, 2 octaves; one note to MM 92; rest strokes; im and mi. Cadences in same keys. (See Kish)

CHORDS

C, G, A, E major; A, E, D, C, F minor; A, G, B, C, D, E, F sharp dominant seventh.

ARPEGGIOS

No. 32 from Pujol, quarter note to MM 108.

STUDY

Estudio, p. 116 of Pujol, quarter note to MM 108.

PREPARED PIECES

Two pieces from Terzi, Nos. 1 to 30. 2e. Triquilandia, Nos. 1 and 3 by Pujol (ME 7237). One piece from Scheit, Nos. 1 to 5.

SIGHT-READING

To be chosen by examiner.

Guitar Secondary III (Elementary II)

SCALES

B flat, E, E flat major, 2 octaves; B, F sharp, C sharp melodic minor, 2 octaves; quarter and eighth notes, im and mi, ma and am; quarter note to MM 92. Cadences in same keys.

CHORDS

B flat, E flat major; B, F sharp, C sharp minor; F, B flat, C sharp, G sharp dominant seventh. (See Kirsh)

ARPEGGIOS

No. 84 from Pujol, quarter note to MM 92.

STUDY

Estudio No. 7, p. 123 of Pujol.

PREPARED PIECES

One piece from Terzi, Nos. 31 to 44.
2e. Triquilandia, Nos. 3, 4 and 5 by Pujol (ME 7237).
One piece from Scheit, Nos. 6, 8 or 12.
One Prelude by Tarrega, Nos. 20 to 23, or 25 (JK 16536).

SIGHT-READING

To be chosen by examiner.

THEORY AND EAR TRAINING

Secondary III.

Guitar Secondary IV (Secondary I)

SCALES

C, D, F major; E, F melodic minor; all right hand fingerings; quarter and eighth notes and eighth triplets; quarter note to MM 92; from Segovia.
Chords and cadences in same keys, from Kish.

ARPEGGIOS

Any one of Studies Nos. 2 to 6, or 8 by Giuliani (GA 69).

STUDIES

Carcassi, one of Nos. 1 to 8 (GA 2 or 43).
Sor, one of Nos. 19 to 21, 23, 24, 28 to 38 from 60 Short Pieces, Vol I (Papas) (CO 170A).

PREPARED PIECES

Two Renaissance pieces chosen from the following:

No. 9 from Scheit
7 pieces for Guitar by Dowland (GA 211)
Renaissance Dances, Nos. 1 and 4 (UE 13070)
6 Pavanes by Milan (FC NY 2090).

Two Baroque pieces chosen from the following:
Minuet and Aria (both), Gigue, Bourée I or Bourée II from Baroque Dances (UE 13069)
Partita in A minor by Logy, any two (UE 12102)
Partita in C by Logy, any two (UE 14454).

One prelude by Tarrega, from Nos. 8, 10 to 16, 19, 24, 26, 28 (JK 16536).

One piece by Alfred Uhl (UE 11180).

SIGHT-READING

One complete piece of the difficulty of the previous grade.

THEORY AND EAR TRAINING

Secondary IV.

Guitar Secondary V (Secondary II)

SCALES

A, E, B major; A, B, G sharp, D sharp melodic minor; all fingerings, quarter notes and triplet eighths; quarter note to MM 92; from Segovia.

Chords and cadences in same keys, from Kish.

ARPEGGIOS

Any one of Nos. 7, 9 to 12 by Giuliani (GA 69).

STUDIES

Any one of Nos. 9 to 19 by Carcassi (GA 2 or 43).
Sor, any one except Nos. 45, 46, 49 from 60 Short Pieces, Vol. II (Papas) (CO 170B).

PREPARED PIECES

One Renaissance piece chosen from the following:
Allemande or Galliard by T. Robinson (UE 12713)
Both No. 4 and No. 5 from 6 Lute Pieces by Anon. (CO 142)
No. 11 or No. 14 from Scheit.

One piece by Tarrega from the following:
Adelita (any edition)
Preludes 1, 5 to 8, 17 or 28 (JK 16536).
Preludes 6 and 10 by M. Ponce (GA 124-5).

One of the following:
Prelude from Suite Venezolana by A. Lauro
Prelude from Suite for Guitar by A. Harris (CO 196)
Suite No. 3 (any one except Elegy) by U. Ashland (R&R 46948)
Canzonetta by A. Tansman (ME 7175).

SIGHT-READING

One complete piece of the difficulty of the previous grade.

THEORY AND EAR TRAINING

Secondary V.

Guitar Collegial Equivalent I

SCALES

Major and minor scales in all keys; quarters, eighths, eighth triplets and sixteenths; quarter note to MM 88; from Segovia.

CADENCES

All keys; from Kish.

ARPEGGIOS

One suitable study from Aguado (GA 62), Nos. 15 to 19.

STUDIES

One of Nos. 20 to 25 by Carcassi (GA 2 or 43).
Two of Nos. 4, 6, 8 to 10 or 13 by Sor (Marks).

PREPARED PIECES

One Renaissance piece chosen from the following:
Two from 3 Fantasias by F. da Milano (N 3173)
Nos. 2 and 6 from 6 Lute Pieces by Anon. (CO 142)
Galliard by Cutting, p. 86 of IA
Pavan by Morley, p. 88 of IA.

One Baroque piece chosen from the following:
One movement from the 4 lute suites or Prelude in D minor by Bach
Pavanas or Folias by Sanz (NY 2402)
The Allemande from any suite by de Visée (UE)
Passacaille in E minor (ME 1022)
Allemande from Suite in A or G by Corbetta (RIC LD 531)
Prelude and Allegro by de Murcia (ME 1025).

One piece by Sor chosen from the following:
Minuet No. 1, 3, 12, 13, 17, 18 or 20 (GA 15)
Andantino, Op. 2, No. 3 (BA 12047)
Variations on Folia de Espana (CO 100).

One Prelude by Tarrega from Nos. 3, 4, 27, 29 (JK 16536).

One of the following:
Prelude No. 4 by Villa Lobos
No. 5 or 6 of Suite by Albert Harris (CO 196)
5 Pieces for Guitar by Eklund (R&R)
3 Modern Miniatures by Duarte (Schott 5725)
Any prelude except Nos. 6 and 10 by M. Ponce (GA 124-5)
Alla Polacca by Tansman (ME 7176)

Berceuse d'Orient by Tansman (ME 7174)
Sarabande by Poulenc from Abloniz Anthologie (RIC 129860).

SIGHT-READING

One complete piece of the difficulty of the previous grade.

THEORY AND EAR TRAINING

Secondary V.

Guitar Collegial Equivalent II

SCALES

All major and melodic minor scales; all fingerings; quarters, eighths, triplet eighths and sixteenths; quarter note to MM 92; from Segovia.

CADENCES

Grade VI from Kish.

INTERVALS

All studies from Giuliani (GA 30).

ARPEGGIOS

Study No. 1 by Villa Lobos (ME 6679).

STUDIES

Any one study from Dodgson and Quine, Book I (RIC LD554)
One of Studies 11, 12, or 14 to 20 by Sor (Segovia).

PREPARED PIECES

One complete suite, sonatina or set of divertimenti from List A and six pieces from List B, or two complete suites, sonatinas, etc. of a contrasting style. The six individual pieces from List B should be of contrasting styles.

List A.
Suites in D, G, B, C minor, E major by R. de Visée (UE)
Suite in A minor by R. de Visée (Schott 10540)
Suites in A minor or G major by F. Corbetta (RIC LD 531)
Sonatinas, Op. 71, No. 2 or 3 by Giuliani (ZIM 1307)
Sonata Op. 15, No. 2 by Sor, from Savio, 19 Compositions (RIC BA 11618)
1st, 2nd or 3rd set of six divertimenti by Sor (Oxford)
Suite in A by Hinterleithner (Aspiazu) (UME 19876)
One of 4 suites by Gaultier (FH 3001)
5 Pieces for Guitar by Hans Eklund (R&R)
Suite No. 3 for Guitar by Ulf Ashlund (R&R).

List B.
Melancholy Galliard and Allemande by Dowland (UE 12472)
Queen Elizabeth's Galliard by Dowland (UE 12402)
Fantasia by Milan (FC NY2020)
Galliard No. 1 or 2 by J. B. Besard (Bream) (Schott 5384)
Nos. 2 and 6 from 6 Lute Pieces by Anon. (CO 142)
Individual movements from the 4 lute suites by Bach
Serenata Burlesca by Moreno Torroba (GA 115)
Sarabande or Barcarolle from Cavatina by Tansman (GA 165)
Alla Pollaca by Tansman (ME 7176)
Nos. 3, 4, 7, 8, 9 by Tarrega from Savio, 12 Compositions (RIC BA 11248)
Preludes 1, 3 by Villa Lobos (ME)
Chôros by Villa Lobos (CO 150)
No. 1 or 2 of Three Popular Mexican Songs by Ponce (GA 111)
Any prelude except Nos. 6 and 10 by Ponce (GA 124-5).

SIGHT-READING

Difficulty of the previous grade.

THEORY AND EAR TRAINING

Secondary V.

Suzuki Violin Instruction

Taught by Dr. Alfred Garson and Assistants.

Dr. Schinichi Suzuki is the Japanese originator of this method which is also known as Talent Education.

The program is open to pupils between the ages of 5 and 16. The age limit may however be waived for entering pupils with previous Suzuki instruction.

Classes are held once a week for a period of one hour. Although the pupils are taught in groups, each pupil receives individual attention. One parent, particularly those with young children, is expected to attend his child's weekly lesson. The parent will be given sufficient instruction in order to act as auxiliary teacher at home.

The Suzuki Violin School consists of ten books, through which the pupils progress at their individual rates of learning.

All the pupils are expected to take part in the group practices and public concerts.

Fee for 28 1-hour classes: $175.00.

LOCAL CENTRES OF THE McGILL PREPARATORY SCHOOL OF MUSIC IN QUEBEC

The following places have been adopted as centres for public examinations; others will be added as necessity requires, but in all cases the establishment of a centre depends upon a sufficient number of candidates applying. All Grade Certificate examinations are held at these centres:

Arvida
Hon. Secretary
Mrs. Jeannine P. Partous,
312 Dickie St.,
Arvida, Que. G7S 2L5

Howick
Hon. Secretary
Mrs. Ainsworth Johnstone,
1 Lafond Street,
Howick, Que. J0S 1G0

Shawville
Hon. Secretary
Mrs. Evelyn M. McDowell,
Box 449,
Shawville, Que. J0X 2Y0

Sept-Iles
Hon. Secretary
Mme Lucien Morin,
839 Bourgeois St.,
Sept-Iles, Que. G4R 1N9

Shawinigan
Hon. Secretary
Mlle Marie-Paule Préfontaine
228 Fourth Street,
Shawinigan, Que. G9N 1G5

Sherbrooke
Hon. Secretary
Mr. G. L. Rothney,
35 Lorne Ave.,
Lennoxville, Que. J1M 1C7

2 GENERAL INFORMATION

2.1 THE SCHOOL

Since its beginning in 1920, the School of Nursing has grown in its continued effort to educate nurses who will improve the quality of nursing, in whatever area they may practise. With the growing complexity of medical care, and the rapid growth of scientific knowledge, the nursing profession needs educated, thoughtful practitioners who can assess nursing problems and develop new ways of solving them.

The School has four programs:

(1) A baccalaureate program for registered nurses until 1975-76.
(2) A basic baccalaureate program for holders of a collegial diploma in Health Sciences.
(3) A program leading to a Master of Science (Applied) degree for nurses holding a baccalaureate degree.
(4) A program leading to a Master of Nursing (Teaching) degree.

The School is administered in the Faculty of Medicine and is located in Wilson Hall, which houses classrooms, faculty offices, a professional library, and lounges. Students registered in the School also take courses in other Faculties within the University. Selected field experience in nursing is provided in the McGill Teaching Hospitals, and in a wide variety of health and social agencies in Montreal. Specific programs of study are outlined in the relevant section of the Announcement.

2.2 HEALTH SERVICES

All new students must have proof of a valid smallpox vaccination and must have a health interview and chest x-ray after registration. Health Service is provided for all students during the session. (See *Students' Information Pamphlet* available from the School.)

COMPULSORY HEALTH INSURANCE FOR NON-CANADIAN STUDENTS

All full-time foreign students (including landed immigrants during their first year at McGill) must take out a Health Insurance policy, which is available on a group basis. In general, the policy provides for payments towards hospital, surgical, medical, diagnostic and other medical expenses.

2.3 FEES

The University reserves the right to make changes without notice in its published schedule of tuition, board and residence, and other fees (See each program for amounts.). Further information about fees is contained in the *General Announcement.*

REGULATIONS FOR PAYMENT OF FEES

(1) Students entering the University for the first time and those returning in Graduate Studies are required to pay their fees by mail or in person

at the Accounting Office within 10 days after registration. For students registering in September the second instalment is due before January 15, 1976.

A late payment fee of $10.00 for the first 30 days, $25.00 thereafter, is charged for payment after the specified dates.

(2) Returning students from the previous year (except in Graduate Studies) must pay one half of the total required fee by mail or in person to the Accounting Office before August 23, 1975; otherwise they will not be permitted to register. Instructions for paying fees in advance will be mailed to all returning students, either with their Sessional Reports of Standing or a short time later. Students who have been notified by the University of the award of a scholarship, bursary or student loan, and who require this award for payment of the first instalment of fees, must obtain permission to delay payment of fees from the Student Aid Office.

The second instalment is due January 15, 1976. A late payment fee of $10.00 for the first 30 days, $25.00 thereafter is charged for payment after the specified dates.

(3) Students registering late must pay their fees at the time of registration, failing which they become subject to the late payment fee and the provisions of the following paragraph:

As soon as possible after the prescribed dates for the payment of fees the Chief Accountant will send to the Registrar's Office a list of the registered students who have not paid their fees. Reports of Standing, transcripts of records and diplomas will be withheld until such time as the fees are paid or a satisfactory arrangement is made with the Chief Accountant.

HOUSING AND RESIDENCE FACILITIES

Operating year-round, the Off-Campus Housing Service, 3465 Peel Street (392-4554), offers assistance to those seeking lodging. Early application is desirable. For a bachelor apartment expect to pay between $130.00 – $180.00 unfurnished.

There is limited room space available in university residences; again the earliest application possible is recommended. Further information is contained in the Residential Facilities section of the *General Announcement* which is available from the Registrar's Office.

2.4 SCHOLARSHIPS, BURSARIES AND PRIZES

There are a number of entrance scholarships open to students from all parts of Canada registering in the University. Information may be obtained from the Admissions Office. Additional information is available in the Undergraduate Scholarships, Bursaries, Prizes, Medals and Loan Funds section of the *General Announcement* which can be obtained from the Registrar's Office.

The *Postgraduate Awards, Fellowships and Bursaries Announcement* for students at the graduate level is also available from the Registrar's Office.

2.5 STUDENT SERVICES

Information concerning the various student services available is contained in Section 6 of the *General Announcement* which may be obtained from the Registrar's Office.

2.6 REGISTRATION

All students must report to Wilson Hall for preliminary registration between the hours of 9 a.m. and 4 p.m. as follows:

Students in the *first year* of the Bachelor of Nursing Program are required to complete a period of field work during September, beginning on Thursday, September 4 and will register in the Sir Arthur Currie Memorial Gymnasium on Thursday, September 1. Preliminary enrolment for B.N. 2 students will be held Friday, September 12, 1975. B.Sc.(N.) enrolment will take place as follows: Thrusday, September 1, – U-1 and U-2; Friday, September 12, – U-3.

N.B. *With the exception noted above, all students will complete their registrations in the Sir Arthur Currie Memorial Gymnasium on the days given above.*

2.7 EXAMINATIONS

Final examinations are held for first-term half courses in January, and for full courses and second-term half courses in April and May. Mid-term examinations for full courses may be held in December depending upon the instructor.

Course grades are converted to letter grades as follows: A (80-100%), B (65-79%), C(55-64%), D (45-54%), F (0-44%). For students in the B.N. and B.Sc.(N.) programs, the pass mark is a C. In the Master's programs the pass mark is a B, except for Nursing courses which are graded on a pass-fail basis.

A student who has failed in a final examination and has been given permission by the Director of the School to write a supplemental examination must write this supplemental during the following August. Written application must be made before August 1. A fee of $10.00 for each supplemental paper is payable to the Cashier as soon as the application has been approved. A student who wishes to write a supplemental examination outside McGill must make application to the Director to do so before July 15. There is an additional fee of $10.00 for establishing such an outside centre.

3 BACHELOR OF NURSING PROGRAM

3.1 GENERAL INFORMATION

FIRST YEAR

This program for Graduate Nurses focuses upon the study of the Nursing process in a variety of situations.

In addition to study in the field during the year, approximately two weeks are spent in orientation in September, and there is clinical practice during the month of May.

FINAL YEAR

The study of Nursing continues in the second year as it relates to:

a) Teaching of Nursing
b) Supervision of Nursing Services

Students in this final year are required to complete a month of field experience during May. This experience is related to the particular course, as well as to the needs of individual students.

PART-TIME STUDY

By special arrangement a one-year program may be extended over two years for students who are unable to attend full time.

ENTRANCE REQUIREMENTS

All applicants must have completed the basic nursing program in an approved school of nursing, be registered in an approved school of nursing, be registered in the province or country from when they come, and have satisfactory professional qualifications.

In addition, candidates must have five university subjects: English, Chemistry or Biology, with laboratory, and any three of the following: History, Geography, Science, Modern Language, Economics and Mathematics with an average of at least 65%.

TRANSFER CREDITS

Consideration will be given to transfer of credits for work completed in another university if an official transcript of the student's work is sent directly to the School by the officers of the institution in which the work was completed.

APPLICATION FOR ADMISSION

All applications must be made on forms which may be obtained from the Admissions Office or from the School of Nursing, McGill University. Photocopies of official transcripts from the School of Nursing may be submitted. All documents, including an official transcript of the student's academic preparation, are to be forwarded to the Admissions Office. Students will not be admitted to the first year after September 1975.

EXPENSES

Approximate cost for one year:

Tuition and student fees $662.50
Books & incidentals $125.00
Board & room . . . . . $1,800.00 to $2,300.00

Field work will involve additional expense for travel and living which the student must consider in estimating expenses.

3.2 COURSE OF STUDY

FIRST YEAR

Core Courses

Sociology 166-210A or 212A and one selected B course.
Psychology 204-201D.
Nursing 570-310A. Principles of Learning.
Nursing 570-311B. Community Organization.
Nursing 570-312D. Human Growth and Development.
Nursing 570-313A. Epidemiology and Health.
Nursing 570-370B. Unit Management.
Nursing 570-360D. Clinical Nursing.

Electives

One elective from the Faculty of Arts: English, History, Economics, modern languages.

FINAL YEAR

Core Courses

Nursing 570-410D. Introduction to Study Methods (Statistics).
Education 413-404A or 405A or 406B or 408B
Sociology (selected course)
Political Science 160-211D or 231D or 244A and 245B or 247 B.
Management 279-294A (Industrial Relations)
Management 280-222B.

Electives

Elective from the Faculties of Arts or Science as well as one of the following:

Nursing 570-460D. Teaching of Nursing.
or
Nursing 570-470D. Supervision of Nursing in Hospitals.

or
Nursing 570-450D. Supervision of Public Health Nursing.

3.3 DESCRIPTION OF COURSES

Nursing — General

570-311B COMMUNITY ORGANIZATION. A study of the changing patterns of community life and the influences on the development of health services. (Two hours, one term.)
Professors Logan and Doyle

570-410D INTRODUCTION TO STUDY METHOD. The use of research method in the study of nursing problems. (One hour and laboratory, two terms.)
Mrs. Reidy

Nursing — Education

570-460D TEACHING OF NURSING. A consideration of the relation between the process of learning nursing and the selection of teaching strategies and the development of a structure for learning. (Two hours, two terms; clinical experience in May is required.)
Professor Doyle

Nursing — Administration

570-370B UNIT MANAGEMENT. Management principles are applied to the organization of patient care. (Two hours, second term.)
Professor Kiss

570-450D SUPERVISION OF PUBLIC HEALTH NURSING. The supervisory process is studied as it relates to problem-solving in community nursing. The educative, developmental and administrative aspects of the supervisory role are included. Principles of epidemiology are applied to the study of a community problem. (Two hours, two terms; clinical experience in May is required.)
Mrs. Davis

570-470D SUPERVISION OF NURSING IN HOSPITALS. The supervisory process is studied as it relates to problem-solving in nursing in hospitals. The educative, developmental and administrative aspects of the supervisory role are included. Role playing and interviewing techniques are emphasized. (Two hours, two terms; clinical experience in May is required.)
Professor Besel

Nursing — Clinical

570-360D The practice of nursing is often divided into "fields" according to age group (Paediatric), particular kind of disability (Psychiatric), particular organizational structure (Public Health), etc. Nursing in all of these fields consists of promotion of health through care and teaching and involves the assessment of individual needs. It is based upon an understanding of individuals within a social setting and of the factors which influence health.

The aim of the course is to identify and study major concepts from the biological and social sciences which will provide a basis for the identification and solution of nursing problems.

The first part of the course deals with the major concepts related to nursing, while the second part is directed to the study of selected health problems with emphasis on the nursing aspects. Nursing assessment skills include history-taking and physical examination to enable the nurse to detect physical abnormalities and to assume responsibility for aspects of health care.

Field experience forms an integral part of this course, providing an opportunity for the student to apply knowledge and develop her nursing skills through examination of the nursing process. It is adjusted to meet individual needs of the students and can be provided in hospitals, health agencies and various areas of the community.
Professors Logan, Kiss, Oseasohn, G. Allen

Following completion of the baccalaureate program, internships of 2-4 months are planned for selected students to prepare for nursing practice in primary health care or nurse specialists in clinical fields.

Nursing — Cognate Courses

570-310A PRINCIPLES OF LEARNING. An introduction to theories of learning and a study of skills that facilitate learning. (Two hours, first term.)
Professor Doyle

570-312D HUMAN GROWTH AND DEVELOPMENT. An introduction to traditional problem areas in psychology viewed from a developmental perspective: learning, perception, motivation, personality, attitude, language and symbolic activity, socialization, and some aspects of abnormal behaviour. The purpose of the course is to acquire an appreciation of general principles of behaviour by a developmental approach. (Two hours, two terms.)
Prof. B.T. Wigdor

570-313A EPIDEMIOLOGY AND HEALTH. The principles of epidemiology, social medicine, and human nutrition. (Two hours, first term.)
Dr. Lise Davignon.

COURSES GIVEN IN OTHER FACULTIES

Students have an opportunity to select courses from those offered in the Faculties of Arts, Science and Education as outlined in the various programs.

4 BACHELOR OF SCIENCE IN NURSING PROGRAM

4.1 GENERAL INFORAMTION

Health Requirements

In addition to requirements listed in Section 2.2, students must have proof of inoculations for tetanus, poliomyelitis, typhoid, paratyphoid, and diphtheria. Arrangements will be made after registration for chest x-rays and tuberculosis sensitivity testing.

EXPENSES

Bachelor of Science in Nursing tuition and student fees (based on 30 credits at:

$19.00 per credit $663.00
Residence ..... approx. $1540 – $1800 plus summer.

UNIFORMS

All students in the Graduate Nurse Program are advised that uniforms are required for field experience in hospitals. Students in community nursing are required to provide themselves with appropriate public health attire for field experience starting in September. Laboratory coats are sometimes worn.

4.2 PROGRAM

The prerequisite is two pre-university years in the Biological (Health) Sciences in a General and Vocational College (CEGEP) or the equivalent in any university. Students are urged to select their options from introductory and advanced courses in Psychology and Sociology.

The curriculum extends over three years with general and professional courses in each year. There is a nursing course in May and June of the first two years. Experience will be concentrated in the community health centres, and experience in hospitals and other agencies will be closely linked to the home and community.

Each nursing course serves as a prerequisite for the following one. They are listed in sequence according to number and letter. The student must successfully complete each course before proceeding. Each course is assigned a credit rating reflecting the amount of effort it demands of the student.

Graduates of the diploma program in nursing in the General and Vocational College (CEGEP) can enter this program after they have obtained the prerequisite courses in the biological (health) sciences.

COURSE OF STUDY

FIRST YEAR

Physiology 552-201A and 202B or Biology 177-201D.
Psychology 204-304D
Nursing 572-200D, 572-210D, 572-201L

SECOND YEAR

Physiology 552-211D (if biology taken in first year) **OR**
Biology core (if physiology taken in first year)
OR Alternative course
Sociology (selected)
Nursing 572-300D, 572-301L

THIRD YEAR

Social Psychology 204-330A, 204-331B
Selected course from Arts or Science,
Nursing 572-400A, 572-401B

DESCRIPTION OF COURSES

570-200D. A study of health and illness in individuals of varying ages with emphasis on the beginning development of sensitivity to patient needs through observation and the use of interpersonal skills. The process of assessment will be facilitated by the derivation of nursing knowledge from contact with patients who have an acute illness or are in the acute phase of illness. These data will be linked to knowledge acquired concurrently from the Biological and Social Sciences and used to provide care for patients in hospital and at home. (2 hours class; 8 hours experience weekly - 2 terms) 6 credits.

572-201L. A concentrated period within the hospital will provide an opportunity for the student to acquire skill in a core of nursing techniques particularly related to the patient who is undergoing surgery. (May and June - 10 hours and 20 hours experience weekly) 8 credits.

572-210D SCIENCE OF HEALTH AND ILLNESS. This course is designed to give the student an understanding of the vital functions of the human cell and how it maintains itself; the gene in relation to heredity; microbiology and immunology as they affect man; the body's general reactions to disease and methods used to reverse disturbances. (3 hours class.) 6 credits.

572-300D. The study of the response of the individual and his family to chronic illness including the various factors affecting the response. The student learns how to nurse individuals and help them adjust to their life situations. (2 hours class - 16 hours weekly - 2 terms) 12 credits.

572-301L. This course concentrates on an understanding of pregnancy and delivery and the impact of a new member in the family. The student learns to identify and deal with manifestations of illness in children of different ages; the implications of hospitalization; and how to cope with rapid change in condition. (May and June - 10 hours class and 20 hours experience weekly.) 8 credits.

572-400A. In an intensive study of health-illness behaviour of families, community resources and participation in the health team are explored and utilized as vehicles through which assistance to individuals and families with health problems is provided. Emphasis is placed upon further development of nursing, interpersonal skills and selected medical techniques. (3 hours class and 20 hours experience weekly) 8 credits.

572-401B. A study of the principles of management as they pertain to the delivery of health care to groups of patients. This study is viewed within the context of today's health care issues. The nursing profession is examined within an historical perspective and as a force in today's society. (3 hours and 20 hours experience weekly.) 8 credits.

Experience is obtained in the McGill teaching hospitals and selected community agencies under the direction and guidance of the staff of the School of Nursing. Nutrition and pharmacology are integrated with nursing courses.

Following completion of the baccalaureate program, internships of 2-4 months are planned for selected students to prepare for nursing practice in primary health care or as nurse specialists in clinical fields.

5 MASTER OF SCIENCE [APPLIED] PROGRAM

5.1 GENERAL INFORMATION

The two-year program leading to the degree of Master of Science (Applied) is designed to prepare clinicians and researchers for the expanding function of nursing in our rapidly developing health care services. The options of the program, clinician *or* researcher, are closely associated with the Research Unit in Nursing and Health Care which has been established in the School of Nursing. Our growing attention to the study of nursing and health care problems should contribute to the quality of care and the delivery of health services in this country. Research in the health care field by graduates of the program will eventually lead some to undertake further study at the doctoral level.

Option A — Clinical Nursing Practice

To meet expectations for an expanded role function and for clinical nursing expertise in all domains of health care, the Master's program provides for the study of nursing over a two-year period incorporating research and evaluation methods in the investigation of nursing problems. All areas are available for students to experience, study and explore: maternal-child and family health, common health problems and illness situations in the various settings of hospital, community, home, health centre and school, or some dimension thereof.

Option B — Research in Nursing and Health Care

The two-year program combines the study of nursing in the expanded role with opportunity to carry out a thorough investigation of a problem in nursing or health care evaluation. Emphasis is placed on the design of research and evaluation projects. All clinical facilities and types of problems are available to students for exploration.

5.1.1 ENTRANCE REQUIREMENTS

Applicants for the M.Sc. (Appl.) degree must have completed a baccalaureate degree with a superior record of academic achievement (high II class or G.P.A. 3.5). To qualify for either the Clinical Nursing Practice Program (Option A) or the Research in Nursing and Health Care Program (Option B), preparation in nursing comparable to the baccalaureate programs offered at McGill and accomplishment and development as a nurse are required. There are a number of specific minimum requirements at the baccalaureate level for B.N. applicants to Option B.

Non-nurses holding a baccalaureate degree in the biological or social sciences comparable to the B.Sc. or B.A. programs offered at McGill and who have potential for the study of nursing may be admitted to a Qualifying Year. There are a number of specific minimum requirements at the baccalaureate level for B.A. and B.Sc. applicants to the Qualifying Year.

All nurse applicants are expected to have current registration in the province or country from which they come.

APPLICATION FOR ADMISSION

Application forms and other information may be secured from the Director, School of Nursing. Classes are admitted in September.

ACADEMIC REGULATIONS

The General Rules Concerning Higher Degrees (Section 4 of the *Faculty of Graduate Studies and Research Announcement)* apply. A minimum of two years of study is required for students entering the two-year program and three years of study for

those who enter as Qualifying students, one year of which in both instances may be taken on a half-time basis, i.e. extended over two years.

The comprehensive examination, Nursing G573-601, and the Nursing Seminar G573-602, should be taken on completion of all other course requirements. Graduates of B.A. and B.Sc. programs are expected to obtain their license to practice nursing (R.N.) following successful completion of requirements for the Qualifying Year and for the M.Sc. (Appl.) degree.

Candidates may maintain their connection with the University for five years after completing their course and residence requirements. The object of this regulation is to encourage candidates to complete their program and qualify for the degree without dalay (see Faculty of Graduate Studies and Research Regulation 3.6 (e).

EXPENSES

	Tuition	Student Fees
1st Year	$570	$89.50
2nd Year	$285	$59.50
TOTAL	$855	$149.00

Other Costs

Room and Board ..... $2000 — $2500 per year
Books ..... $150 — $200 per year
Other expenses including typing . . $150 per year

5.2 COURSE OF STUDY

FIRST YEAR (Option A and Option B)

Nursing 573-611D. Seminar in Practice of Nursing.
Nursing 573-615B. Health Care Evaluation.
Psychology 204-204A. Psychological Statistics

OR

Sociology 166-350A. Elementary Statistics in Sociology and Anthropology.
Anthropology 151-358B. Introduction to Research

OR

Sociology 166-461A. Introduction to Social Research.
One and a half electives.

SECOND YEAR

Option A — Clinical Nursing Practice

Nursing 573-711D. Study of Problems in the Practice of Nursing.
Nursing 573-763A and 764B. Teaching of Nursing and Practicum.

OR

Nursing 573-772A and 773B. Development and Management of Nursing Services and Practicum.
One Elective.

Option B — Research in Nursing and Health Care

Nursing 573-712D. Research in Nursing and Health Care.
Nursing 573-763A. Teaching of Nursing.
OR
Nursing 573-772A. Development and Management of Nursing Services.
Statistics — an advanced course.
Introduction to Data Processing, computation and programming.

Elective courses selected in consultation with the advisor are available from Arts, Science, Education and some, in the health care field, from the Department of Epidemiology.

ADDITIONAL REQUIREMENTS (to be completed toward the end of the program):

Nursing 573-601. Comprehensive Examination.
Option A — Clinical Nursing Practice. A comprehensive examination on the practice of nursing as it relates to the problems of patient and family well-being and community health.
Option B — Research in Nursing and Health Care. A comprehensive examination on the practice and study of nursing as it relates to health and health care services.

Nursing 573-602. Nursing Seminar — Option A. Presentation and discussion of a significant problem in the practice of nursing to faculty and to concerned practitioners in the clinical field.

Nursing 573-603. Research Seminar — Option B. Presentation and discussion of student's research or evaluation project to faculty and to concerned practitioners and researchers in the clinical field.

QUALIFYING YEAR (non-nurses entering with B.A. or B.Sc.)

Nursing 573-511D. Practice of Nursing — Part I.
Nursing 573-506D. Patterns of Illness and Health.
Nursing 573-507B. History and Development of Nursing.
Nursing 573-512L. Practice of Nursing — Part II.

One Elective

Students must complete all requirements for entrance and for the Qualifying Year prior to enrolling in the Master's Program proper. Fees are as listed below for first year students.

5.3 DESCRIPTION OF COURSES

GRADUATE PROGRAM

573-611D. SEMINAR IN THE PRACTICE OF NURSING. A study of the practice of nursing

through investigation and analysis of experiences in the clinical field. This study provides the method for expanding the role of the nurse and for evolving problems of research which are significant in nursing and critical to health care. Emphasis is placed on the development of knowledge and skills in family health care and specialization in one of several areas of nursing. (6 hour seminar with field experience concurrently and throughout the month of May.)

573-615B HEALTH CARE EVALUATION. An evaluation of educational and health care systems with particular reference to the nursing input in problems of health, health care and health care delivery. Evaluative research includes qualitative and quantitative approaches to assessing health status and quality of care. (3 hour seminar with concurrent field and laboratory experience.)

573-711D. STUDY OF PROBLEMS IN THE PRACTICE OF NURSING. An investigation of some of the critical nursing problems in the student's field of inquiry including extensive assessment, experimentation and evaluation of differing nursing approaches in response to particular situations. (6 hour seminar with field experience concurrently.)

573-712D RESEARCH IN NURSING AND HEALTH CARE. A study of research in nursing and in the broad health care field. There is systematic examination of the nature of problems including available knowledge, trends and directions in research, and problems of method, measurement, validity, etc. A major research project is a requirement of this course. (6 hour seminar with concurrent field and laboratory experience.)

573-763A TEACHING OF NURSING. The implications of method in teaching, evaluation and curriculum planning of learning to assume the expanded function of nursing within our modern health services. The relation of research in learning and in education to the preparation of the nurse is examined. (3 hour seminar with concurrent field experience.)

573-764B PRACTICUM IN THE TEACHING OF NURSING. Laboratory and field experience in the teaching of nursing including curriculum planning and administration of a program. (3 hour seminar with concurrent experience.)

573-772A DEVELOPMENT AND MANAGEMENT OF NURSING SERVICES. An investigation of the implications of research in nursing, in learning, and in organizational behavior in relation to the assessment, development and management of nursing personnel and health care services. (3 hour seminar with concurrent field experience.)

573-773B PRACTICUM IN THE DEVELOPMENT OF NURSING SERVICES. Laboratory and field experience in the management of individual patient care and family health in a variety of settings within the health care delivery system for the purpose of improving the quality of service through development of the nursing potential and the evaluation of care. (3 hour seminar with concurrent field experience.)

QUALIFYING YEAR

573-511D. PRACTICE OF NURSING – PART I. Learning to nurse in the expanding and developing health services with special reference to chronic illness in aged adults and in children and to crisis situations in families: acute episodes in long-term illness and in mother and baby care. (3 hour seminar with 12 hours concurrent field experience.)

573-506D PATTERNS OF ILLNESS AND HEALTH. An intensive study of the ecology of health and the pathology of illness including methods of assessment, therapy and control and approaches to the development of individual, family and community health. (3 hours lecture and tutorial with concurrent laboratory and field experience.)

573-507B HISTORY AND DEVELOPMENT OF NURSING. A study of nursing within its social context with particular emphasis on the evolving function of nursing historically and in our rapidly changing society. (3 hour seminar.)

573-512L PRACTICE OF NURSING – PART II. Learning to nurse the sick child and adult with particular emphasis on the acute phase of illness. (3 hour seminar with 30 hours concurrent field experience in May, June and 2 weeks in September.)

For the description of other courses see the *Announcements* of the Faculties of Arts and of Science and of the Faculty of Graduate Studies and Research.

6 MASTER OF NURSING [TEACHING] PROGRAM

6.1 GENERAL INFORMATION

The course aims to prepare teachers of nursing for the new educational programs across Canada. The program of one calendar year is based on the belief that beginning specialists in nursing, can, within this time, study how students learn to nurse and relate teaching methods to the conditions required for learning. Courses in learning and in education from other disciplines are included to assist students in exploring and participating in the teaching of nursing throughout the academic year and in the internship period.

ENTRANCE REQUIREMENTS

Applicants must have completed a *three* or *four* year basic nursing program comparable to the Bachelor of Science (Nursing) offered at McGill and have a superior record of academic and professional achievement and development. All students are expected to have current registration in nursing in the province or country from which they come.

APPLICATION FOR ADMISSION

Application forms and other information may be secured from the Director, School of Nursing. Classes are admitted in September.

EXPENSES

Tuition $570
Student fees $89.50
Summer session $114
Other costs
Room and board . . . . . $1,500–$2,000 per year
Books . . . . . $100–$150 per year
Other expenses,
including typing . . . . . .$150 per year

6.2 COURSE OF STUDY

CORE COURSES

574-661D. Teaching of Nursing
574-662B. Curriculum Development
Education 414-614C. Sociology of Education.

Two full courses and one half-course selected in consultation with the Department.

For example:

Psychology 204-401D. Cognitive Processes
or
Psychology 204-452D. Cognitive Development
Sociology 166-439B. Socialization
or
Anthropology 151-314A. Psychological Anthropology

And ONE of the following:

Philosophy 107-321A. Philosophy of Science
Psychology 204-204A. Psychological Statistics

and

Psychology 204-206B. Psychological Measurement
Education 413-641D. Education in Developing Nations
Education 413-657D. Leading Educational Thinkers

6.3 DESCRIPTION OF COURSES

574-661D. TEACHING OF NURSING. A study of how students learn to nurse and of the situations within which learning takes place. Participation in teaching and examination and evaluation of teaching practices. Description and analysis of a learning-teaching phenomenon experienced by the student. (6 hours. Concurrent fieldwork in addition; 2 months internship, May and June.)

574-662 B. CURRICULUM DEVELOPMENT. Consideration of factors involved in planning a course in nursing such as the function of nursing and types of nurse, the derivation and development of nursing knowledge, planning and use of clinical experience, sequence, evaluation, school agency relations (1-1/2 hours.)

For the description of other courses see the *Announcements* of the Faculties of Arts and of Science and of the Faculty of Graduate Studies and Research.

Leila Nicholson

2 General Information

2.1 DEGREES OFFERED

Occupational Therapy is the art and science of directing man's response to selected activity for the purpose of promoting and maintaining health, to prevent disability, to evaluate behaviour and to treat patients with physical or psychological dysfunction. The occupational therapist a) cooperates with other health professionals, social agencies and the patient himself, to determine his overall treatment, b) establishes the occupational therapy program for the patient according to precise short and long-term goals and supervises this program modifying it to the needs of the patient, c) acts as a consultant in such matters as community health or architectural barriers, and d) takes part in fundamental and clinical research.

Physical Therapy is the art and science of physical treatment and rehabilitation utilizing physical, chemical, electrical and electromagnetic properties in conjunction with the manual skills of massage and therapeutic exercises for an individual who manifests physical and psychological disorders. The scope of the profession includes patient evaluation, treatment planning, treatment delivery, education and consultation in the clinics and community settings in cooperation with the medical and paramedical professions and the social agencies concerned.

Bachelor of Science in Occupational Therapy [B.Sc. (Occ. Ther.)]

The full curriculum consists of three academic years from a Quebec Collegial Program in the Health Sciences or equivalent. Included are courses in science together with professional training in Occupational Therapy. Clinical experience is provided in the teaching hospitals of the Faculty of Medicine, McGill University, and other affiliated centres.

Bachelor of Science in Physical Therapy [B.Sc. (Phys. Ther.)]

The full curriculum consists of three academic years from a Quebec collegial program in the

Health Sciences or equivalent. Included during the three year program are courses in science together with professional training in Physical Therapy. Clinical experience is provided in the teaching hospitals of the Faculty of Medicine, McGill University, and other affiliated centres.

Master of Science (Applied) in Physical Therapy

The full curriculum consists of two years of study following a Bachelor of Science degree in Physical Therapy or equivalent plus two years of clinical experience (see page 9).

2.2 REQUIREMENTS FOR ADMISSION TO PROGRAMS LEADING TO B.Sc. (Occ. Ther.) OR B.Sc. (Phys. Ther.)

The undergraduate programs in the School of Physical and Occupational Therapy have been designed on the assumption that the student has a background in science equivalent to that provided by the Quebec Diploma of Collegial Studies; that is, that he has completed the following college-level courses or their equivalent: two semesters of biology; two semesters of general chemistry; one semester of organic chemistry; three semesters of physics (including one semester of electricity and magnetism), and calculus I and II. Introductory courses in psychology and sociology are also recommended.

Quebec students who have obtained a Diploma of Collegial Studies in the Health Sciences Stream are expected to have taken the following prerequisite courses: Biology 301 and 401 or 921 and 931; Physics 102, 202, and 302; Chemistry 101, 201, 202; Mathematics 101, 103, and 203. Students are strongly advised to also have taken Introductory Psychology and Sociology.

Ontario Grade 13 graduates and students who have completed the first year at Memorial University, Newfoundland, are considered for entrance to the university program requiring the completion of the difference between 120 credits and the number of prerequisite credits they have earned. Courses in Biology, Chemistry, Mathematics, and Physics taken at the grade 13 level or first year university may be accepted for exemption. A student who does not have all the prerequisite courses listed above may be accepted into a four-year program taking Basic Science courses in his first year. It should be noted that Organic Chemistry must be completed prior to beginning the first year of the professional programs.

Students from provinces in Canada other than Quebec, Ontario, and Newfoundland who have completed Grade 12 with adequate standing in appropriate subjects are considered for admission to a university program requiring the completion of 120 credits. (This normally requires four years of study.)

Graduates from Grade 12 in the United States are considered for admission to a university program requiring the completion of 120 credits (normally four years of study). Students who have passed Advanced Placement Examinations in appropriate subjects with a grade of "3" or better will be granted some advanced standing. Students who are admitted to a 120 credit program take Basic Science courses in their first year. These students must also complete a course in Organic Chemistry during the summer after the first year of study if they are to advance to the first year of the professional programs.

Students from the United Kingdom and Commonwealth countries must have completed G.C.E. examinations at the Advanced Level in Biology, Chemistry, Mathematics and Physics, and have achieved a grade of "C" or better in each if they wish to be considered for admission to a three-year program of study. Students who lack these qualifications but who meet the entrance requirements for the Faculty of Science may apply for admission to that Faculty. Upon completing one year of study in appropriate courses, they may apply for admission to a three-year program in Physical Therapy or Occupational Therapy.

2.3 APPLICATION FOR ADMISSION TO PROGRAMS LEADING TO B.Sc. (Occ. Ther.) OR B.Sc. (Phys. Ther.)

Application for admission to any year must be made through the Admissions Office of the University. The deadline for the submission of applications is **March 1st** of the entering year. A non-refundable application fee of $15.00 must accompany the application form. Application forms must be obtained directly from the Office of Admissions, McGill University, P.O. Box 6070, Station 'A', Montreal, Quebec H3C 3G1.

Students from the United States must write College Entrance Examination Board Tests, the Scholastic Aptitude Tests and three other appropriate achievement tests. Students from the Eastern United States may obtain information about the tests, testing centres, etc., by writing to: The College Entrance Examination Board, Box 592, Princeton, New Jersey, 08540. Students from the West should write to: The College Entrance Examination Board, Box 1025, Berkeley, California, 94701. The applications of these students are judged on the basis of the complete high school record, including the marks for the first semester of the final year, and other data as described on the application form.

Students from overseas are advised to write College Entrance Examination Board Aptitude and Achievement tests to support their application. Information with respect to these tests may be ob-

tained by writing to the College Entrance Examination Board, Box 592, Princeton, New Jersey, 08540, U.S.A.

Applicants whose mother tongue is not English must submit acceptable evidence of facility in English before their application for admission can be considered. The following evidence is acceptable: G.C.E. Ordinary and Advanced Level examination in English literature or composition; the Test of English as a Foreign Language (TOEFL); the University of Michigan English Language Test; the Certificate of Proficiency in English issued by the Universities of Cambridge and Michigan.

TOEFL is preferred by the University; it is administered by the College Entrance Examination Board and is easily available throughout the world. It is the student's responsibility to arrange for the writing of the test; full information may be obtained by writing to the Test of English as a Foreign Language, Box 899, Princeton, New Jersey, 08540, U.S.A.

2.4 LANGUAGE POLICY

The normal language of instruction at McGill is English. Students may if they wish write term papers and examinations in French, but reasonable competence in English is essential to success in the university programs. The English department offers a summer course, English 110-150C, and it is recommended that students who lack fluency in English take this summer course. Although there are no language requirements for this Faculty, students who wish to practise Occupational Therapy or Physical Therapy in the Province of Quebec must demonstrate a proficiency in the French language before they can obtain membership in the respective corporations. This regulation will come into effect on July 1st, 1976.

2.5 FEES

Annual undergraduate fee is $19.00 per credit. In addition, there are Student Society Fee of $26.00, Student Services Fees of $60.00 and a Graduation Fee of $10.00. Refer to *General Announcement* for details.

Expenses for textbooks and other equipment is approximately $200.00 per annum, uniforms, approximately $100.00.

2.6 PRIZES

The Canadian Physiotherapy Association Book Prize is awarded to the student with the highest standing throughout the B.Sc.(Phys. Ther.) program.

The Carol Rutenberg-Silver Memorial Award is presented to the student with the highest standing in the final year of the B.Sc.(Phys. Ther.) program.

The Canadian Association of Occupational Therapists' Award is presented to the student with the highest standing in theory, in the final year of the B.Sc.(Occ. Ther.) programs.

The Professional Corporation of Occupational Therapists of Québec Book Prize is awarded to the student demonstrating overall excellence in the clinical application of Occupational Therapy throughout the B.Sc.(Occ.Ther.) program.

Scholarships, Bursaries, Loans, Prizes and Awards

A complete list of scholarships, bursaries, prizes and awards, and the regulations governing the various loan funds are given in the Undergraduate Scholarships section of the *General Announcement* which may be obtained from the Registrar's Office.

2.7 RESIDENTIAL FACILITIES AND STUDENT SERVICES

Full information concerning residential facilities and student services is given in the *General Announcement.*

2.8 LICENCE TO PRACTISE

Certain provinces in Canada and states of the United States of America *require that those intending to practise occupational therapy or physical therapy within their borders comply with special provincial or state licensing regulations. In order to practise occupational therapy or physical therapy in the Province of Quebec, a permit must be obtained from the appropriate provincial corporation. Further information may be obtained from the offices of the associations listed below.*

2.9 PROFESSIONAL ASSOCIATIONS

In order to comply with the standards necessary for membership in both the Federal and Provincial Associations, students are required to complete further clinical practice in accredited occupational or physical therapy departments.

This standard is compatible with the licensing requirements in provinces where legislation is in force.

3 Regulations Governing Attendance, Advancement and Examinations

3.1 ATTENDANCE AND TERM WORK

No student will be permitted to write an examination in any course unless he has fulfilled the requirements of the course to the satisfaction of the instructor and the Director of the School.

It is the responsibility of each student to make sure at the time of registration that there is no conflict in the timetable of the courses which he proposes to follow.

Students may be required to attend lectures regularly if the Faculty so rules. Reasons for absences are dealt with only by the Director. For illness necessitating an absence of a week or more, a medical certificate should be presented to the Office of the Director immediately after a student's return to normal attendance.

All lectures begin at five minutes after the hour, and end at five minutes before the hour. Students arriving late for lectures may be denied entrance by the instructor.

3.2 CREDIT SYSTEM

All courses carry a credit rating. A total of 96 credits must be passed for a degree in Occupational Therapy or in Physical Therapy.

Courses are graded either by letter grades or in percentages, with the following correspondences: A (80 - 100%), B (65 - 79%), C (55 - 64%), D (45 - 54%), F (0 - 44%). Grades A, B, C are termed satisfactory passes, D a conditional pass and F a failure.

Numerical equivalents of 4, 3, 2, 1, 0 are attached to the grades of A, B, C, D, F respectively. The earned grade point for each course is calculated by multiplying the credit rating of the course by the numerical equivalent of the letter grade earned. Standing will be determined on the basis of a grade point average (GPA) computed by dividing the sum of the grade points accumulated during the year by the total course credits attempted.

The cumulative grade point average (CGPA) will be the grade point average calculated using the student's entire record in the program. A failed course will continue to be used in the calculation of the CGPA even after the course is repeated and passed, or if a supplemental examination is taken.

3.3 ACADEMIC ADVANCEMENT

There are three categories of standing: Satisfactory, Probationary and Unsatisfactory.

A student must maintain a Satisfactory standing with a GPA of 2.0 or above.

Full time students in Satisfactory standing take between 12 and 18 credits per term. A load of 19 credits per term is permitted students whose GPA is above 3.0.

All professional courses in Occupational Therapy and Physical Therapy must be passed with a grade C or better. For any professional course which is subdivided into sections, each section must also be passed with a grade of C or better. For any section of a course which is not passed by a grade of C or better when the overall course mark is C or better, the mark for the course will be withheld from the record until the student has demonstrated a proficiency in each section to a grade of C or better. The original course mark will not be changed. Any student obtaining an F grade in any professional course will be required to repeat that course. A student receiving a D grade in a professional course may be required to repeat the course or section of the course or complete supervised remedial work prior to sitting the supplemental examination. Evidence must be shown that the student has completed sufficient extra tuition to indicate that he has reviewed the subject and is a suitable candidate for the supplemental.

A GPA of less than 2.0 places a student in Unsatisfactory Standing.

Students in Unsatisfactory Standing must withdraw from the School. They may be readmitted after appeal to the Promotions Committee of the School and subsequently considered on Probationary standing. A student in Unsatisfactory Standing for the second time will be required to withdraw permanently.

The Faculty reserves the right to require the

withdrawal of any student at any time if in the opinion of the instructors he is incompetent.

3.4 DEGREE REQUIREMENTS

Holders of a Quebec Diploma of Collegial Studies must complete a total of 96 course credits for the degree of B.Sc. (Occ. Ther.) or the degree of B.Sc. (Phys. Ther.) (i.e. passed courses whose credit total is 96), have passed satisfactorily all professional courses and have a CGPA at McGill of at least 2.0.

Out-of-province students will have the minimum number of credits required for their degree indicated on their acceptance letter. To be eligible for a degree, they must in addition pass satisfactorily all courses required by their program, and have a CGPA at McGill of at least 2.0.

Students who graduate with a CGPA of 3.8 or better will be awarded their degrees with "Great Distinction"; those with a CGPA between 3.5 and 3.79 will receive their degrees with "Distinction".

3.5 ACADEMIC CREDIT TRANSFER AGREEMENT

In certain cases, credit may be granted by the Faculty for courses taken at other universities. Approval by the Director is necessary and should generally be obtained in advance.

There is an agreement among the universities in the Province of Quebec whereby a student, under special circumstances, may take some of his course load in any academic year with Faculty permission at another university in the Province of Quebec and have these courses recognized by McGill.

Note: Transfer credits are not calculated in the GPA or CGPA and the grades are not entered on the student's McGill transcript.

3.6 TRANSCRIPT OF ACADEMIC RECORD

Certified transcript(s) of a student's academic record may be obtained by applying to the Registrar's Office, F. Cyril James Building.

All courses taken at McGill and all results obtained appear on the transcript.

3.7 EXAMINATIONS

Students may write examinations or term papers in English or French.

Instructors are not permitted to grant any special treatment regarding examinations to any student. Faculty requires all instructors to decline to discuss a student's mark with him before its official publication.

Interim Class Tests

Members of the teaching staff may from time to time give interim class tests if they think them necessary.

Final Examinations

Final examinations are held during an examination period following the term in which the course is given. In some courses, there is no final examination; standing in these courses is determined on the basis of term work and class tests.

Supplemental Examinations

A student who has failed in an examination and who has been given permission to write a supplemental examination *must avail himself of this privilege at the time of the next supplemental period* which is held during the month of August. Written application to write a supplemental examination must be received at the Director's Office before July 2. A fee of $10.00 for each supplemental paper is payable to the Cashier as soon as the application has been approved.

It should be noted that the supplemental result will not erase the D or F grade originally obtained which was used in calculating the GPA. Both the original mark and the supplemental result will be calculated in the CGPA (i.e. the taking of supplemental examination has the same effect on a student's GPA as does repeating the course).

Deferred Examinations

A student, who, for reasons such as illness or family affliction, verified and accepted by the Director's Office, has been unable to write one or more examinations, may receive permission to write instead deferred examinations, which normally will be written in the next supplemental examination period. The Director's Office must be informed within one week of the examination of the reasons for absences. An "L" will appear on the Report of Standing in place of a grade in such courses and will be replaced by the grade obtained in the deferred examination after it has been written.

Reassessment of a Grade

Papers are marked and grades calculated and handled with considerable care. However, if a student wishes his marks checked or his examination paper reread, he should apply in writing to the Director's Office. There is a fee of $10.00 which will be refunded if an error is found in the student's favour. If the result is a lower mark, the lower mark will stand and there will be no refund. Requests for reassessment of standing in more than one course will not be permitted.

Incomplete Courses

If, in the instructor's opinion, there is sufficient reason to permit a delay in the submission of required term work, an extension of deadline of up to four months after the end of the course may be granted the student. In this case, the instructor will submit a grade of "K" (incomplete). If a new grade is submitted within the deadline by the instructor, this will appear on the student's Faculty reports and verification forms following the "K" and will replace the "K" on the student's official transcript.

If the required work is not completed before the deadline the grade of "KF" will be recorded in the same way as the grade above. (KF denotes a failed course and has the same effect on the GPA as an F.)

In exceptional circumstances, and with the approval of the Director, the four month deadline may be extended further, in which case the grade of KK will appear.

A student who has not, without accepted excuse, participated or written the final examination in a course for which he has registered may be given a grade of J (absent).

4 Undergraduate Courses of Instruction

4.1 BACHELOR OF SCIENCE IN OCCUPATIONAL THERAPY

The curriculum consists of three academic years from a college program plus approximately 500 hours of Clinical Affiliation. The program is made up of 96 credits, 48 credits in professional courses, including the Clinical Affiliation, and 48 credits for academic courses in the Faculties of Arts and Science.

University 1

504-311A ANATOMY (3 credits; 2 hours lectures, 2 hours laboratory on prepared specimens). Gross anatomy of the limbs and back with some sessions devoted to the visceral systems of the body.
Members of the Anatomy Department

552-201A PHYSIOLOGY OF MAN (3 credits).

552-202B PHYSIOLOGY OF MAN. (3 credits). (See announcement of the Faculties of Arts and Science.)

580-221A OCCUPATIONAL THERAPY I. (3 credits.) A course to include kinesiology, activity analysis, professional orientation and personal development.

580-222B OCCUPATIONAL THERAPY II. (3 credits.) A course to include: a) Occupational therapy in the treatment of conditions studied in Medical Science 580-232B; b) Muscle testing, joint range measuring, gait analysis; c) Techniques of treatment in Occupational Therapy.

580-231B MEDICAL SCIENCE I. (3 credits.) A course covering human growth and development.

580-232B MEDICAL SCIENCE II. (3 credits.) A lecture course to include: a) Basic concepts of pathology and clinical features of disorders of the musculoskeletal system, including fractures, orthopaedics, rheumatology and related collagen diseases; b) Introduction to psychiatry.

ELECTIVES

(See note on Electives on page 7.)

CLINICAL AFFILIATION

70 hours following end of term.

University 2

504-321A GENERAL HUMAN NEUROANATOMY. (3 credits; 2 hours lectures, 2 hours laboratory.) General neuroanatomy emphasizing the structure and function of the brain and spinal cord.

580-320D OCCUPATIONAL THERAPY III. (6 credits.) A course to include: a) Occupational Therapy in the treatment of conditions studied in Medical Science III; b) Splinting and adapted equipment; c) Techniques of treatment used in Occupational Therapy.

580-324B. OCCUPATIONAL THERAPY IV. (3 credits.) A course to include: a) Occupational Therapy in paediatrics; b) Occupational Therapy techniques of treatment used in paediatrics; c) Perceptual-motor evaluation and treatment.

580-327B OCCUPATIONAL THERAPY V. (3 credits.) A course to include: a) Functional Assessment; b) Introduction to professional writing; c) Advanced theories of Occupational Therapy in psychiatry.

580-335D MEDICAL SCIENCE III. (6 credits). A course to include the pathophysiology and clinical features of: a) Psychiatric conditions; b) Neurological conditions; c) Medical and Surgical conditions.

ELECTIVES

(See note on Electives on page 7.)

CLINICAL AFFILIATION

Approximately 150 hours following the end of the term.

University 3

580-426A OCCUPATIONAL THERAPY VI. (3 credits.) A course to include: a) Occupational Therapy in the treatment of conditions covered in Medical Science 580-434A; b) Pre-vocational and work assessments, and sheltered workshops; c) Techniques of Occupational Therapy.

580-427B OCCUPATIONAL THERAPY VII. (3 credits.) Projective techniques - a course to include the theory, assessment, change detection procedures and the therapeutic use of projective techniques.

580-428B OCCUPATIONAL THERAPY VIII. (3 credits.) Group dynamics - a course to include the theory of groups, group development and the therapeutic use of groups in Occupational Therapy.

580-429A OCCUPATIONAL THERAPY IX. (3 credits.) Administration and Research Methodology - a course to include department management; supervision; multidisciplinary relations; and research methods applicable to occupational therapy.

580-430B OCCUPATIONAL THERAPY X. (3 credits.) Clinical experience is provided in the teaching hospitals of the Faculty of Medicine, McGill University, and other affiliated centres at suitable periods throughout the three years of the course.

580-434A MEDICAL SCIENCE IV. (3 credits.) A course to include: a) Child psychiatry; b) Adolescent and geriatric conditions; c) Community medicine; d) Rehabilitation clinics.

580-440A/B OCCUPATIONAL THERAPY XI. (3 credits.) Specialized study - a project course in one of the following areas selected by the student: adolescence, community medicine, educational methodology, gerontology, kinesiology, neuro-developmental techniques, perception, prosthetics and orthotics, psychiatry, or research procedures. (This course is offered to graduate Occupational Therapists only.)

ELECTIVE COURSES

A total of thirty-six credits are to be taken in elective courses throughout the three years. Included must be a science continuation of eighteen credits and Psychological Statistics 204-204A or B if not already taken.

4.2 BACHELOR OF SCIENCE IN PHYSICAL THERAPY

The curriculum consists of three academic years from a college program plus 600 hours of Clinical Affiliation. The total program is made up of 96 credits, 53 being taken in the professional courses, including the term in clinical affiliation and 43 credits from the Faculties of Arts and Science.

University 1

504-213A ANATOMY. (4 credits; 1 hour lecture, 5 hours laboratory dissection.) Gross anatomy of the limbs and back.
Members of the Anatomy Department

504-312B HUMAN VISCERAL ANATOMY. (3 credits; 2 hours lectures, 2 hours laboratory on prepared specimens.) Gross anatomy of the visceral systems, including the circulatory, respiratory, digestive and reproductive systems.
Members of the Anatomy Department

552-201A PHYSIOLOGY OF MAN (3 credits.)

552-202B PHYSIOLOGY OF MAN. (3 credits.)

(See *Announcement of the Faculties of Arts and Science.)*

581-210A PHYSICAL THERAPY II - therapeutic exercise. (3 credits; 10 hours per week.) The theoretical and practical study of postural assessment, massage, hydrotherapy, normal gait and the therapeutic uses of exercise therapy in preparation for application in the clinical setting.

581-215B PHYSICAL THERAPY III – treatment procedures. (4 credits; 10 hours per week to include lectures, and practical classes.) A course consisting of clinical examinations, assessments and recording and methods of physical treatments of the disorders covered in Medical Science 581-230B.

581-230B MEDICAL SCIENCE I. (3 credits; 3 hours per week.) A lecture course consisting of a general introduction to pathology and disorders of the musculo-skeletal system including fractures, orthopaedics, rheumatology and related collagen diseases.

581-260D PHYSICAL THERAPY I - functional anatomy. (6 credits; 4 hours per week.) A seminar course on surface anatomy; fundamentals of kinesiology and analysis of movement including muscle testing and joint range measurement.

ELECTIVES

(See note on Electives, page 8.)

CLINICAL AFFILIATION.

3 weeks following end of second term (see Physical Therapy XI 581-415D, page 8.)

University 2

504-321A GENERAL HUMAN NEUROANATOMY. (3 credits; 2 hours lectures, 2 hours laboratory.) General neuroanatomy emphasizing the

structure and function of the brain and spinal cord. **Members of the Anatomy Department**

581-212A/B PHYSICAL THERAPY V – group dynamics. (2 credits; 3 hours per week.) The group process as it applies in the practice of Physical Therapy.

581-312D PHYSICAL THERAPY VI – treatment procedures. (3 credits; 4 hours per week to include lectures, practical classes and clinical demonstrations.) A course consisting of clinical examinations, assessments, recordings and methods of physical treatment of the conditions covered in Medical Science 581-330A.

581-316B PHYSICAL THERAPY VII - treatment procedures. (3 credits; 8 hours per week to include lectures, practical classes and clinical demonstrations.) A course consisting of clinical examinations, assessments, recordings and methods of physical treatment of the conditions covered in Medical Science 581-332B.

581-325A/B PHYSICAL THERAPY VIII – electrotherapy. (3 credits; 7 hours per week.) A theoretical and practical course covering physical principles and techniques of application of electrodiagnostic procedures, electrotherapy, heat therapy, cryotherapy and radiation therapy.

581-330A MEDICAL SCIENCE II. (3 credits; 3 hours per week.) A lecture course consisting of the pathophysiology and clinical features of respiratory and cardiovascular conditions, amputations, obstetrics and gynecology.

581-332B MEDICAL SCIENCE III. (3 credits; 3 hours per week.) A lecture course consisting of the pathophysiology and clinical features of neurological conditions.

ELECTIVES

(See note on Electives, following.)

CLINICAL AFFILIATION

6 weeks (see Physical Therapy XII, 581-415D, following.)

University 3

581-211A PHYSICAL THERAPY IV – professionalism. (2 credits; 3 hours per week.) A study of the profession of Physical Therapy including its history, the professional associations, educational and governmental influences.

581-415D PHYSICAL THERAPY XII - clinical affiliation. (6 credits; 600 hours of clinical experience carried out during the three year program at selected intervals.) Supervised clinical practice is provided for students in the following areas: physiotherapy departments in hospitals and rehabilitation centres affiliated to the Faculty of Medicine, convalescent and home care facilities, specialized schools and community centres.

This course commences at the end of the academic year in U1 and continues throughout the program. Clinical affiliation will extend until mid-June for 1st and 2nd year students.

581-420D MEDICAL SCIENCE IV. (3 credits; 45 hours)

i. A lecture course in psychiatry with emphasis on the psychological problems of the physically disabled.

ii. An introduction to epidemiology with emphasis on community needs and resources related to the problems of the physically disabled.

581-435B PHYSICAL THERAPY IX – co-ordinated rehabilitation. (3 credits; 3 hours per week.) A study of the interdisciplinary approach to rehabilitation: the role played by the physical therapist and related paramedical groups in total patient care (inhalation therapists, nurses, occupational therapists, prosthetists, social workers, speech therapists and others).

581-438B PHYSICAL THERAPY – specialized study. (3 credits; 4 hours per week.) A project course in one of the following areas selected by the student: kinesiology, pathokinesiology, sports medicine, psychiatry, neuro-developmental techniques, perception, prosthetics and orthotics.

581-440D PHYSICAL THERAPY XI - administration and research methodology. (3 credits; 45 hours) A seminar and project course on departmental administration, methods of supervision, professional ethics, medico-legal responsibilities and research procedures applicable to Physical Therapy.

581-455B NEUROPHYSIOLOGY. (3 credits; 3 hours per week.) Postural mechanisms: A study of neurophysiological principles of sensori-perceptuo-motor interaction as they relate to postural integration and motor behaviour.

ELECTIVE COURSES

Twenty-seven credits are to be taken in elective courses selected from the *Announcement of the Faculties of Arts and Science.* Within this choice of electives, there must be a continuation in a science subject of 18 credits and a 3 credit course in statistics, if not already taken, and a 3 credit course in pathology.

5 Postgraduate Courses in Physical Therapy

5.1 GENERAL COURSES

The following courses are open to graduate Physical Therapists:

581-410A GROSS AND FUNCTIONAL ANATOMY.

581-412B PHYSICAL ASSESSMENT AND TESTING PROCEDURES.

581-414B PROPRIOCEPTIVE NEUROMUSCULAR FACILIATATION.

581-416B NEURODEVELOPMENTAL APPROACH TO TREATMENT (BOBATH CONCEPT).

581-418B MANIPULATION OF SOFT TISSUES.

The following courses are open to Physical Therapists who hold a B.Sc. Degree.

581-520D PHYSICAL THERAPY. Education Methods. (6 hours per week.) A course designed to relate educational methods to Physical Therapy instruction. This course will include seminars, observation sessions and supervised teaching experience both in the classroom and the hospital setting. Field experience in student supervision and clinical teaching will be carried out in Physical Therapy departments during the month of May.

581-530B PHYSICAL THERAPY. Curriculum Development for Physical Therapy. (3 hours per week.) A course emphasizing current thought in education, curriculum development and factors underlying curriculum planning.

581-541A/B PHYSICAL THERAPY - Specialized Procedures. (3 hours per week.) A seminar course providing the basic sciences to specialized procedures and revision of these advanced procedures on the basis of physiological principles and recent research.

581-632A PHYSICAL THERAPY. Management and Supervision. (3 hours per week.)

5.2 MASTER OF SCIENCE (APPLIED) IN PHYSICAL THERAPY

Entrance Requirements

Candidates must normally hold a B.Sc. degree with a high second class standing and have had two years of clinical experience in Physical Therapy.

Length of Study

The program normally requires two academic years to complete. Upon recommendation by the Committee of Graduate Studies and Research and by the Department of Physical Therapy, this requirement may be reduced for exceptionally well-qualified candidates.

Application

Application for admission to the Faculty of Graduate Studies and Research should be made to the Director of Graduate Program, School of Physical and Occupational Therapy, 3654 Drummond St., Montreal H3G 1Y5.

Course Selection

581-601A COMMUNITY HEALTH NEEDS. Analysis of social trends and problems influencing the present practice and future development of health care delivery systems with particular emphasis on physical rehabilitation.

581-602A PHYSICAL THERAPY DEVELOPMENT I. Analysis and comparison of current therapeutic exercise techniques on the basis of physiological principles and recent research.

581-603B RESEARCH METHODS. Introduction to design of research appropriate to physical therapy. Philosophy of scientific enquiry and basic principles of research design with special considerations to problems of research in the health sciences.

581-604B PHYSICAL THERAPY DEVELOPMENT II. Investigation into the development and implementation of physical therapy in a selected area of particular interest to the individual student, such as orthopaedics, neurological disorders, paediatrics, cardio-vascular disorders and musculoskeletal disorders.

581-605A EDUCATIONAL METHODS I. Processes of learning, methods of communication and teaching strategies applied to physical therapy students and clinical personnel in hospitals, rehabilitation centres and schools.

581-606B EDUCATIONAL METHODS II. Practical application in hospitals and rehabilitation centres.

581-620B EDUCATIONAL METHODS III. Supervised participation in the undergraduate physical therapy program in the classroom and laboratory setting.

581-630B CURRICULUM DEVELOPMENT. A course emphasizing current thought in physical therapy education, curriculum development and factors underlying curriculum planning.

581-632B ADMINISTRATION. A course designed to review methods of administration and supervision in a physical therapy department. Basic concepts in management, administration, communication and supervision applied to hospital departments and home service treatment settings.

CALENDAR FOR SESSION 1975-76

1975

May 12, Monday	Summer Session commences, Special BSW
June 20, Friday	Summer Session ends
September 5, Friday	Registration, M.S.W. students
September 8, Monday	Lectures begin, M.S.W. students
September 8 – 10	Registration, B.S.W. students
September 11, Thursday	General Assembly and Reception, all students
September 16, Tuesday	Lectures begin, B.S.W. students
September 19, Friday	Field practice begins, B.S.W. students
October 13, Monday	Thanksgiving Holiday, lectures cancelled
November 5, Wednesday	Fall Convocation
December 19, Friday	Last day of lectures and field practice, all students

1976

January 5, Monday	Lectures and Field Practice resume, M.S.W. students Field Practice resumes, B.S.W. students
January 19, Monday	Lectures resume, B.S.W. students
February 13, Friday	Mid-term holiday
April 15, Thursday	Last day of lectures and field practice, all students
April 21, Wednesday	Lectures resume, Special B.S.W.
June 25, Friday	Lectures end, Special B.S.W. Last day for submission of M.S.W. research reports for Fall Convocation

SUMMERHILL HOMES: Executive Director, Mr. Ernest Hirschbach

VILLE MARIE SOCIAL SERVICE CENTRE: Director, Mr. D'Arcy Coulson

WALKLEY TENANTS' ASSOCIATION: Supervisor, Ms. Annette Werk

WESTHAVEN RECREATIONAL CENTRE: Supervisor, Mr. Eric Shragge

WESTMOUNT YOUTH CLINIC: Executive Director, Mrs. Marjorie Bedoukian

YOUNG MEN'S AND YOUNG WOMEN'S HEBREW ASSOCIATION: Executive Director, Mr. Harry Kosansky

YOUNG WOMEN'S CHRISTIAN ASSOCIATION Community Planner, Ms. Claire Kerrigan

3 SCHOOL OF SOCIAL WORK

3.1 HISTORY AND PLACE IN THE UNIVERSITY

In 1918, McGill University founded a School for Social Workers which was discontinued in 1932. In 1933, with the approval and cooperation of the University, an independent school, offering a two-year program to university graduates and known as the Montreal School of Social Work, was established. In October 1945, the University resumed the function of social work education and the Montreal School of Social Work, by agreement of its Board of Trustees, became the McGill University School of Social Work. The final step in integrating the School into McGill University was taken in 1950, since which time the University has assumed complete responsibility for it.

The School is an integral part of McGill University and its students are able to participate fully in the varied life of a great university. It has its own building providing classroom accommodation, research laboratory, and a compact up-to-date social work library to which new books, documents, and pamphlets are added continually. Students may also use the McLennan Library, the Redpath Library, and other special libraries.

3.2 OBJECTIVES AND EDUCATIONAL PHILOSOPHY

The School of Social Work is a professional school whose primary objective is to prepare students for successful careers and for leadership in the field of social welfare. The goal is to educate students for practice not only in established and well structured services, but also in initiating and pioneering in new and less explored areas of welfare. Students are expected to acquire the necessary knowledge, values, attitudes and technical skills of professional practice. They are, in addition, helped to develop critical and experimental approaches in the hope that during their professional careers they may contribute to the improvement of practice skill and knowledge and to the development of increasingly constructive and humane social policy and organization.

This School is a member of the Canadian Association of Schools of Social Work. Through its membership in this and other national and international organizations, the School is in close touch with significant developments in social work education on the North American continent, and throughout the world.

Until 1969-70, the School offered programs only at the graduate level, leading to the degree of Master of Social Work and the Diploma in Advanced Practice in Social Work. Conscious of a general need for more professionals in practice and for extension and strengthening of professional education, the School in 1969-70 initiated a Bachelor of Social Work degree program. This program now constitutes the first professional degree, preparing graduates for direct entry into practice, with general professional skill. It also forms a strong foundation for a specialized Master's degree.

The School does not select any special practice method or theory, but encourages first the establishment of general competence and from that base supports the choice of the individual student of specialization in specific fields of practice.

3.3 ADMINISTRATION OF THE SCHOOL

The School of Social Work is administered under the authority of the Faculty of Graduate Studies and Research of McGill University. The Director of the School is directly responsible to the Dean of that Faculty. The graduate degree programs are authorized by the Graduate Faculty Council to which representatives of the School are elected. The B.S.W. program is authorized by the Faculty of Arts.

Internal administration of the School is under the general direction of the Director. Various administrative and curriculum committees, with representatives of students and of the teaching staff, are charged with development and administration of major aspects of the School's program.

3.4 THE SCHOOL AND THE MONTREAL COMMUNITY

Montreal, the largest and most cosmopolitan city in Canada, affords varied community resources in both the private and public social services. A bilingual community, it affords unique opportunities for the study of social problems.

The School receives the full and generous cooperation of local welfare organizations in the provision of facilities for supervised field practice.

4 GENERAL INFORMATION

4.1 DEGREES AND DIPLOMAS

Two degrees and a diploma may be earned at the School. The Bachelor of Social Work degree is awarded to students who successfully complete the degree program at the undergraduate level. Students holding the B.S.W. may be admitted to the Master of Social Work program.

The Diploma in Advanced Practice in Social Work is awarded to students who already hold the Master's degree and who successfully complete the requirements for this diploma.

4.2 ADMISSION REQUIREMENTS 1975-76

BACHELOR OF SOCIAL WORK DEGREE

Educational Objectives

The Faculty of Arts, through the McGill University School of Social Work, offers an undergraduate program of professional studies in Social Work, leading to the Degree of Bachelor of Social Work (B.S.W.). The B.S.W. degree course has the following principal educational objectives:

1) To prepare students for professional practice in any one of a range of social service positions. (The B.S.W. degree represents the point of admission into the Corporation of Professional Social Workers of the Province of Quebec and the Canadian Association of Social Workers.)

2) To prepare selected students for entry into more specialized professional studies at the graduate level.

It is the policy of the School of Social Work to ensure that social workers are as diverse as the communities they serve, and when reviewing prospective applicants for the Special BSW and the Undergraduate BSW programs, special consideration is given to persons of varied backgrounds, including members of minority groups, members of low-income communities and those with paid or volunteer community work experience.

Admission to the BSW is open to two groups of applicants:

1. THREE-YEAR UNDERGRADUATE B.S.W.

Applicants to this program must have completed two years of collegiate or equivalent studies, including introductory courses in sociology, psychology, statistics and French, as recognized by the University Admissions Office. Students applying at the end of the first year of University should count on at least 2-1/2 years of study to complete the requirements for the B.S.W. degree. At the moment no provision exists for graduates of a 3-year collegial program to obtain the degree in less than 3 years.

Application for admission should be made at the University Admissions Office.

2. SPECIAL B.S.W.

A limited number of students with Bachelor's degrees are admitted into a Special B.S.W. program in which advanced standing is given for the social science content of the Bachelor's degree.

The minimum requirements for admission to the Special B.S.W. are as follows:

1. Bachelor's degree with a high standing in the final year, or in the last complete year, if graduating in the current year.
2. Completion of at least 5 full courses in the social and psychological sciences (economics, political science, psychology, sociology and anthropology).
3. Courses in both research and statistics are highly desirable, and if not taken prior to admission, at least one course in basic statistics must be completed during the B.S.W. program.

Preference is given to applicants with work experience in a social work setting. Volunteer work in a service involving people will also be given consideration.

The Special B.S.W. is a full-time program of study and is not open to students on a part-time basis. Those wishing to pursue this program must follow the prescribed pattern of study starting with the initial summer session in May (6 weeks), the academic session (Sept.—April), and the second summer session (April-July of the following year). Students who have satisfactorily completed the Special B.S.W. program are not guaranteed admission to the Master's program.

Application for admission should be made at the School of Social Work.

THE MASTER OF SOCIAL WORK

Students who have successfully completed a B.S.W. may be admitted to the Master of Social Work program.

Because of the large number of possible candidates, it should be understood that *admission to the M.S.W. program is not guaranteed for any person simply by reason of satisfactory completion of a B.S.W.*

It is expected that, as a general rule, applicants to the M.S.W. program will have completed course work in statistics and in research methods at the undergraduate level.

Students Transferring from Other Universities or Other Countries

A small number of students who have already completed the equivalent of the first year of an

M.S.W. program elsewhere will be considered for admission to the M.S.W. program in 1975-76.

DIPLOMA IN ADVANCED PRACTICE

Statement of Purpose

Students who have a Master's degree in Social Work and three years of professional practice may be admitted to the program leading to a Diploma in Advanced Social Work Practice. This year of advanced study is designed to deepen understanding and develop further professional skill in *Marriage and Family Counselling, Rehabilitation or Corrections, Research, Welfare Policy, and Administration.*

Admission Requirements

Candidates for advanced study should be those whose previous academic and professional performance has been of a high order. More specifically:

1) The candidate should possess personal characteristics and a breadth of professional interest that give promise of professional leadership. He should show capacity for scholarship and independent study.

2) He should have completed the M.S.W. program, with superior standing at a recognized School of Social Work.

3) He should have had normally a minimum of three years of professional experience, following completion of his M.S.W. program, and should be able to supply independent reports of his professional competence.

4.3 STUDENT STANDING

1) M.S.W. AND ADVANCED DIPLOMA students are expected to maintain at least "B" standing in all courses.

2) Permission to write supplementary examinations or to repeat courses is granted only upon recommendation of the Committee on Standings.

3) All students are admitted on probation. A student may be asked to withdraw at any point if, after careful review of his progress, the Committee on Standings deems this to be advisable.

4) Students enrolled in a full program of courses in any term are normally expected to devote their full time to study. Any plan for part-time study must be approved by the student's adviser.

5) B.S.W. students should refer to the *Arts and Sciences Faculties Announcement* for regulations concerning student standing.

4.4 ACADEMIC CREDIT TRANSFER AGREEMENT

Students wishing to take courses for credit towards their McGill degree at any university in the Province of Quebec should refer to the section entitled "Academic Credit Transfer Agreement" in the *General Announcement* for details.

4.5 FEES

The University reserves the right to make changes without notice in its published schedule of tuition and other fees if, in the opinion of the Board of Governors, circumstances so require. Tuition fees for the B.S.W. program are $19.00 per credit and this fee includes all the regular charges of the University for registration, tuition, laboratories and libraries. Student Service fees of $60.00 and Students' Society fees of $30.00 are separately assessed and must be paid at the same time as the tuition fees.

Tuition fees for the M.S.W. program are as follows:

	Tuition	Student Services	Students' Societies
M.S.W. 1	$570.00	$60.00	$31.50
M.S.W. 2	$285.00	$30.00	$31.50

Adv. Soc. Work Practice Diploma
$57.00 per half course

Graduation Fee $10.00

Student Services and Students' Societies fees assessed according to number of half courses taken. See *General Announcement* for details.

Students may refer to the *General Announcement* for further details and regulations for payment of fees.

4.6 BURSARIES, SCHOLARSHIPS AND LOANS

SCHOOL

Some sources exist for both loans and bursaries through the School. Inquiries may be made at the time of application for admission to the School. Since the School does not receive all the resources for bursary and/or loan purposes until late during the first term, students should endeavour to make other arrangements for their financial needs, whenever possible, prior to entering the School.

The School has access to a limited amount of funds for loans and bursaries, made available by individuals or private organizations. These funds are insufficient to meet all needs but may be used as supplements to other sources.

Inquiries concerning bursaries and loans should be made at the time of application for admission. Special request forms are available.

For the possible availability of bursaries open to students in all faculties and schools inquiry may also be made to the Student Aid Office of the University, 3465 Peel Street.

FEDERAL

The Federal Welfare Grants program awards a small number of graduate scholarships based upon academic achievement. Application should be made to the Welfare Grants Division, Department of National Health and Welfare, Ottawa, Ontario.

Overseas students should inquire of their governments concerning the availability of United Nations, Colombo Plan or their country's own study grants.

PROVINCIAL

Most provinces offer bursaries on condition that recipients accept employment in these provinces upon graduation. Information should be obtained from Provincial Departments of Welfare.

Quebec residents may apply before January 1 for educational bursaries for the following year. Application should be made to the following: Service des Bourses de Perfectionnement, Ministère de l'Education, Hôtel du Gouvernement, Québec, P.Q., or through the Student Aid Office of the University, 3465 Peel Street.

4.7 STUDENT SERVICES

Full information concerning student services is given in the *General Announcement* available from the Registrar's Office.

5 CURRICULA

5.1 B.S.W. CURRICULUM

REGULAR B.S.W.

a) The normal B.S.W. comprises a combination, over the three years, of professional courses, supervised field practice and practice-related courses drawn principally from the social and psychological sciences.

b) The program is organized so that the proportion of professional content to social and psychological science content increases from year I to year III.

c) The B.S.W. degree will be awarded upon successful completion of 90 credits of study, distributed approximately as follows:

Social Work courses 48-54 credits

Other University courses (at least 24 to 30 credits of which will be selected from social and psychological science offerings) to a total of 36-42 credits.

d) The distribution of the 48-54 credits of Social Work content over the three years will be approximately as follows:

Year I – 9 credits
Year II – 18-21 credits
Year III – 21-24 credits

e) Students entering their University I year will enrol in Social Work 254D plus one other 3 credit social work course. The remaining 21 course credits will be taken elsewhere in the University with the approval of the Director of the School of Social Work.

f) Students entering B.S.W. II will, in consultation with advisors, enrol in Social Work courses having a total credit value of 18-21, normally including Social Work 352A or B, Social Work 455D and Social Work 456D in their registration. The remaining credits will be taken elsewhere in the University.

g) Students entering B.S.W. III will enrol in Social Work courses having a total credit of 21 or 24, including 480, 458B and at least two of the following courses: 472A, 473A, 474A, 475B, 476A,B, 477B, 478A, 484B, 497A, 498B.

The remaining 6 to 9 credits will be taken elsewhere in the University. Students are encouraged to register for Course 127-401D *Functional French* (6 credits) which is specially designed for those in Social Work.

h) Before graduation with the B.S.W. degree it is required that each student satisfactorily complete one half course in introductory statistics and one half course in social science research methods.

SPECIAL B.S.W.

The Special B.S.W., for those holding an undergraduate degree, will be offered three time blocks: a pre-summer session of 6 weeks, May-June, one regular academic year, and a summer session of 12 weeks, April-May-June. Students in this program will take at least 48 credits, including courses in social work practice, field practice, and policy. Required courses are Social Work 353L, 352L, 481A, 482L, 456D, 458B, 480L, and at least two of the following courses: 472A, 473A, B, 474A, 475B, 476A, B, 477B, 478A, 484B, 497A, 498B. The remaining 12 credits will be selected from other courses offered at the B.S.W. level. Regulation (h) under Regular B.S.W. also applies to students in the Special B.S.W. program. Specific information and application material may be received directly from the School of Social Work in December for 76-77 admissions.

5.2 M.S.W. CURRICULUM

The M.S.W. degree represents a second level of professional study, in which students build their

areas of specialization through particular combinations of seminars, field practice, and research. Provision is made for the student to choose his own program by selecting 1) a field of practice in which he would develop expert knowledge, and 2) modes of intervention with which he would develop special competence. The time required will be approximately 39 weeks, plus allowance for study time and vacation, for a total of about ten months.

OBJECTIVES

There are three principal educational objectives in the Master's program:

1) The student is expected to demonstrate a capacity for analytical and critical understanding of the social problem categories, population groups, organizational arrangements and social policy issues pertaining to the field of practice which he has selected.

2) The student will have the opportunity further to develop and demonstrate an advanced level of skill in a particular mode of practice.

3) The student will be expected to give evidence of an ability to initiate, develop and report on a piece of independent research.

FIELD OF PRACTICE

The term Field of Practice implies a concern with certain types of problems and populations, and therefore with certain kinds of service organizations or institutions. It may imply, but does not limit, the kinds of intervention employed. A student may, for example, pursue an interest in administration or in policy-level studies with respect to his preferred substantive practice field, as well as the interpersonal modes of intervention. Academic courses (including tutorials and offerings in other departments), field practice and independent study will be selected as much as possible to reflect the student's needs.

Fields of practice may include:

Child and Family Welfare
Marriage and Family Counselling
Health Services
Social Work in Industry
Community Change
Corrections
Youth and School Services

SUMMARY OF REQUIREMENTS

Required of all students are:

1) The Field of Practice Seminar related to the student's practicum;

2) No fewer than 3 half courses in methods of practice;

3) No fewer than one half course in theory courses;

4) No fewer than two additional half course electives from either methods or theory courses,

5) A practicum of approximately 75 days (525 hours);

6) Independent study and research culminating in a significant report.

5.3 DIPLOMA IN ADVANCED PRACTICE CURRICULUM

DIPLOMA REQUIREMENTS

Courses

The Diploma in Advanced Practice will be awarded when the student has completed a minimum of *four* full courses and passed a comprehensive written examination.

Time Limit

The time limit for fulfilment of the requirements for the Diploma shall in no case be more than *four* years from date of enrolment.

Candidacy

It is desirable that students signify their interest in candidacy for Diploma *either* upon entering the Program (provided they have identified their area of specialization) or upon completion of at least one full course.

Students who are not in a position to signify their interest in candidacy at either of the aforementioned points may do so later in their program. However, under the latter circumstances, if a number of unrelated courses already have been completed, it may be necessary to complete other courses specific to the student's area of specialization.

Formal application for admission to candidacy for the Diploma should be made in writing to the Chairman of the Post-master's Committee upon successful completion of at least one full course in a theoretical area.

Applications will be evaluated by this Committee on the basis of performance in courses already completed, demonstrated capacity for independent study at an advanced level and the recommendation of the student's advisor.

6 COURSES OF INSTRUCTION

6.1 B.S.W. COURSES

407-254D. INTRODUCTION TO SOCIAL WORK. (6 credits.) An examination of major social problems associated with life in large urban areas and the social services, public and private which have been established to deal with such problems. Social work practice theory including models and theories of helping and change techniques.
Professor Sirota

407-270A,B,L. INTRODUCTION TO SOCIAL WORK RESEARCH. (3 credits) This course is intended to help students make effective use of published research reports and agency statistics, and to show them how to conduct simple research projects. It covers problem formulation, research design, data collection, analysis and interpretation, use of the computer terminal, and report writing. (Modular format).
Sydney Duder

407-352A, L. THE SOCIAL SERVICES IN CANADA. (3 Credits.) An introduction to the structure and programs of social services in Canada designed to familiarize students with these services and to increase their ability to evaluate the functions of the services.
Professor McGilly

407-353L INTRODUCTION TO PRACTICE. (6 Credits.) Introduction to the principles and practice of social work. Approaches to social problem identification and analysis. The role of the social worker as an agent of change or of social control. Elements of working with individual groups and communities. Laboratory periods will permit the application of course content to practice.
Professors Katz, Dalfen

407-451B CHILDREN'S NEEDS AND SOCIAL SERVICES. (3 Credits.) The identification and analysis of the needs of children and their families. Consideration of the processes of selected social services e.g. day care, visiting homemakers, foster family and institutional care, adoption, etc., designed to support, supplement and substitute for the family. Special emphasis will be placed on social legislation related to neglected, abused and dependent children.
Ernest Hirschbach

407-452A SOCIAL WELFARE ORGANIZATIONS AND DISADVANTAGED CLIENTELE. (3 Credits.) An examination of the structure of organizations serving the needs of socially disadvantaged persons or groups, and the processes through which such services are provided. Particular attention will be paid to the definition, screening and serving of disadvantaged clients as compared to those drawn from more "privileged" groups in society. Strategies for changing such organization will be explored.
Professor Deehy

407-453B YOUTH AND YOUNG ADULTS: SOCIAL NEEDS AND SERVICES. (3 Credits.) The physical, psychological and social development of youth and young adults and the relationship of such development to demands of the social environment. Emphasis is on the effects of societal change on family roles, interpersonal relationships, educational and work achievement, youth's community role, social services for youth and young adults.
Professor Dalfen

407-454A SOCIAL SERVICE IN THE HEALTH FIELD. (3 Credits.) Recommended for students expecting to proceed to further studies in Health Services. An examination of the relationship between illness and social conditions. Social planning, practice and research aspects of health care and the delivery of health services. An evaluation of current and developing professional roles of social workers in health teams, with particular emphasis on social rehabilitation of the physically and mentally ill.
Professor Marcus

407-455D* SEMINAR IN SOCIAL WORK PRACTICE. (6 Credits.) This course will focus on principles of social work practice and on developing skill in working with individuals, families, small groups and communities. Attention will be given to the applicability of selected social and psychological science concepts in constructing models of social work intervention. Methods of practice will be analyzed from a range of settings, drawing upon student field experiences. *For special B.S.W. students, the content of this course will be presented in two courses (one in the fall and one in the summer session) under two course numbers — 407-481A (3 credits) and 407-482L (3 credits.)
Professors E. Hopmeyer, Judith Magill and Amy Shulman

407-456D FIELD PRACTICE. (6 Credits, two days per week September to mid-April; full-time practice during May.) Supervised educational experiences in social work practice designed to integrate practice with theoretical knowledge. Through field placements in university-affiliated teaching centres, students will work with individuals, families, groups and communities, receiving both individual and group instruction.
Field Instructional Staff

407-457B LEGAL PROBLEMS OF THE POOR. (3 Credits.) A lecture-and-seminar course on law and social welfare, with the emphasis largely on the social-legal problems and rights of the poor, and methods of legal protection and redress available to them. Aspects of Canadian civil law and criminal law will be reviewed. Emphasis will be placed on the Quebec scene, with landlord-tenant, contract and debtor, matrimonial regimes, parental responsibility and social insurance. The total Canadian perspective will be considered in areas of divorce, unemployment insurance, arrest, and bail.
Robert M. Cooper

407-458B THE IMPLEMENTATION OF WELFARE POLICY. (3 Credits.) An analysis of policy issues which underlie selected social service programs; the administrative structure of such programs, their legislative base, their effectiveness and the role of the professionals in the service delivery. Examples will be drawn from the current field experiences of students in the course.
Professors Woodsworth and Drover

407-460A POVERTY AND SOCIAL POLICY. (3 Credits.) An examination of the nature of poverty and of the characteristic problems of the poor, with comparative evaluation of alternative policies for resolution of the problems, including issues of maintenance of the incomes and social status of the threatened populations.
Members of the Staff

407-461B SEMINAR IN CORRECTIONS. (3 Credits.) An examination of criminal behaviour in Canada and the U.S., and the correctional system designed to deal with such behaviour. The parts played by the police, judiciary, penal system and the probation and parole services will be discussed, together with the role of social work in the correctional process.
Wayne Hanna

407-462A. POVERTY, INEQUALITY AND CAPITALISM. (3 credits) An examination of the notion of social welfare from the perspective of poverty and inequality. Attention is given to socio-economic dynamics of inequality in a capitalist state rather than programs designed to combat poverty. Specific topics include inequality in relation to income distributions, income redistribution, wealth, incentives, economic growth, inflation, consumption rich and poor nations.
Professor Drover

407-463B. SOCIAL WORK PRACTICE WITH THE AGED. (3 credits) A seminar dealing with social services for the aged. Topics will include: dilemmas of retirement, institutionalizing of the elderly, community care, separation and loss, role of the social worker with the elderly and their families.
Professor Sirota

407-464A. INDUSTRIAL SOCIAL WORK. (3 credits) A seminar on social work practice in industrial settings. Analysis of conceptions of work; work-related, personal and family problems, relationships between social agencies and the world of work, social service programs offered under industrial and trade union auspices.

407-465A. SEMINAR IN SCHOOL SOCIAL SERVICES. (3 credits) The seminar will examine the interrelationships of the pupil's social environment in the culture of the school, the problems of teachers and principal and their resultant impact on the pupil's academic achievement. Existing models of social work intervention in schools will be discussed with special emphasis given to "Interprofessional Collaboration".
Professor Dalfen

407-471B. INDIVIDUAL SOCIAL WORK RESEARCH PROJECTS. (3 credits) This course will provide an opportunity for interested students to conduct small-scale practical research projects, either individually or in small groups, with tutorial assistance from staff members and without the formal reporting requirements of the M.S.W. research project.
Professor Shiner and Staff

407-472A SEMINAR ON FAMILY ASSESSMENT. (3 Credits.) An advanced seminar designed to integrate knowledge of human personality in social process. Emphasis will be upon the appraisal and assessment of patterns of reciprocity among members of disturbed and disorganized families.
Shirley Braverman

407-473A, B CASEWORK WITH INDIVIDUALS AND FAMILIES. (3 Credits.) Theory and practice of work with individuals and families under stress. Topics will include: categories of hazardous events; affective, behavioural and role disorganization; phases in the crisis cycle; techniques of crisis intervention and abatement.
Professor Katz

407-474A METHODS OF COMMUNITY DEVELOPMENT, SOCIAL ACTION. (3 Credits.) The aim of this course is to develop an understanding of the organizing process and to enrich the student's repertoire of direct organizing skills. Emphasis is on organizational entities, community power and conflict, organizing strategies and their application, in the context of current issues in urban community development.
Professor Torczyner

407-475B COMMUNITY ORGANIZATION. (3 Credits.) A continuation of methods of community development, and social action, with emphasis on the integration of community organization theory and practice. An examination of problems encountered in practice, current issues and trends in the conceptualization of community organization.
Professor Torczyner

407-476B SOCIAL WORK PRACTICE WITH GROUPS I. (3 Credits.) Theory and practice of work with groups. Focus will be on group development theory and the skills of the worker to strengthen group potential for mutual aid. Children and adult groups in a range of settings will be examined.
Judith Magill

407-477B SOCIAL WORK PRACTICE WITH GROUPS II. (3 Credits.) An advanced course in practice, with emphasis on comparative theories of groups. Prerequisite, Social Work Practice with Groups I.
Judith Magill

407-478A ACTIVITY GROUP METHODS. (3 Credits.) Theory and practice of the use of activity in work with groups. An analysis of a range of mediums through which group members provide mutual aid. An exploration of theoretical models of the role of the worker.
Lanie Melamed

MCGILL UNIVERSITY LIBRARY

407-480L, D FIELD INSTRUCTION. (6 Credits.) Supervised educational experience in social work practice integrating practice with theoretical knowledge characteristic of the selected field. Individual and group instruction.

407-481A SEMINAR ON SOCIAL WORK PRACTICE I. (3 Credits.) Principles of Social Work Practice in working with individuals, families, small groups and communities. Methods of practice will be analyzed from a range of settings, drawing upon student field experience.
Judith Magill

407-482L SEMINAR ON SOCIAL WORK PRACTICE II. (3 Credits.) A continuation of 481A.
Professor Reichertz

407-483B. SEMINAR ON MINORITY GROUPS AND SOCIAL WELFARE. (3 credits) This seminar is designed to prepare students for working effectively with selected minority clientele. Content will include: the impact of formal and informal social policies and institutions on the welfare of minorities, and the relationship between cultural patterns of clients and social work practice.
Carole Chirstensen

407-484B. SEMINAR IN COMMUNITY ORGANIZATION. (3 credits) This seminar examines issues and dilemmas which students encouter in community organization practice. The workshops provide a forum to analyse neighbourhood structures, organizations and systems which affect community lives. Particular attention will be directed toward the development of citizens' groups and coalitions, the analysis of power structures and planning with community associations for change.
Professor Torczyner

407-497A SEMINAR INTEGRATION OF PRACTICE METHODS. (3 Credits.) Discussion seminar in which attention will be given to a range of beginning theoretical attempts to define an integrated method. Emphasis will be placed on the examination of existing practice models; the problems entailed in creating a common model which allows for a differential application, and a study of the central requirements for a functional statement of practice.
Members of Staff

407-498B SEMINAR IN INTEGRATION OF PRACTICE METHODS. (3 Credits.) A continuation of 497A.
Members of Staff

6.2 M.S.W. COURSES

407-602 SOCIAL VALUES AND SOCIAL POLICY. (Half course.) Analysis of value assumptions underlying social welfare policies. An examination in depth of selected major social welfare issues, with particular attention to the value assumptions and their implications for the modification of policy.
Professor Woodsworth

407-603 THE ECONOMICS AND POLITICS OF SOCIAL WELFARE. (Half course.) This course is designed to acquaint the student with the concepts and methods of economic analysis of welfare problems and policies and with the political context in which welfare programs are developed and administered.
Professor McGilly

407-604 SEMINAR IN INTERNATIONAL SOCIAL WORK. (Half course.) Discussion based upon intensive study and reports on problems in selected countries. Particular emphasis is placed on identifying major social problems, understanding the social forces bearing on those problems and considering appropriate professional approaches to aid in their solution.

407-605 POVERTY AND SOCIAL POLICY. (Half course.) An examination of the nature of poverty and of the characteristic problems of the poor, with comparative evaluation of alternative policies for resolution of the problems, including issues of maintenance of the incomes and social status of threatened populations.
Members of the Staff

407-606 CHILDREN'S NEEDS, PROBLEMS, RESOURCES. (Half course.) A study in depth of the needs of children and the related problems, with consideration of relevant treatment modalities and community resources for problem solution.
Professor Reichertz

407-607 SOCIAL SERVICES IN THE SCHOOL SYSTEM. (Half course.) An examination of public schools as community institutions with emphasis on possible roles of the social workers in relation to pupils, parents, teachers, and administration.
Professor Dalfen

407-608 ADVANCED SEMINAR IN CORRECTIONS. (Half course.) A critical analysis of selected correctional programs, in terms of their underlying theoretical base and their effectiveness in modifying criminal behaviour.
Professor Deehey

407-609 SEMINAR ON HEALTH ISSUES. (Half course.) A tutorial requiring students to study in some depth a circumscribed area of their interest. Focus may be on theories of causation, comparative approaches to treatment, variations in service delivery and others. Selected guest lecturers may be invited and interdisciplinary discussions arranged.
Professor Marcus

407-612 THEORIES OF CRIMINAL BEHAVIOUR. (Half course.) An examination of selected

theories of criminal behaviour and their implications for social work intervention.
Professor Deehy

407-613 COMPARATIVE APPROACHES TO PSYCHOPATHOLOGY. (Half course.) An examination of attitudes and responses to emotional disturbances and breakdown of individuals in contemporary society. A discussion of the changing patterns of psychiatric services and the use of a variety of health professionals and community resources. Illustrations of treatment approaches whenever feasible.
Dr. Beck

407-614 ADMINISTRATION. (Half course.) Introduction to the theory and practice of administration, with particular reference to social welfare programs. Administration as process and method related to institutional change. The administrative unit as a social system.
Professor McGilly

407-615 CRITICAL STUDY OF RESEARCH IN SOCIAL WORK. (Half course.) Analysis and evaluation of social work research, and research of particular relevance to social work, from other disciplines.
Professor Shiner

407-616 RESEARCH PROJECT SEMINAR. (Half course.) Group conference with staff and students to formulate and develop research projects.
Members of the Staff

407-617 RESEARCH PROJECT. (Half course.) The major research undertaking of the student. The selection of a research topic, the design of the research, the collection and treatment of the data, the written report of the project.
Members of the Staff

407-618 INTRODUCTION TO SOCIAL WORK RESEARCH. (Half course.) Introduction to the conceptual framework of scientific inquiry and its relationship to social work research and practice. Information on and experience with selected methods of research. Problem identification and formulation is stressed.
Sydney Duder

407-620 THE FIELD OF PRACTICE SEMINAR. (Half course.) The seminar will provide an opportunity for integration of knowledge, theory and skills drawn from the practicum and other courses, and for close examination of special characteristics of the field. Organization of the seminar will vary with the field of practice. All students are required to participate in the seminar in one field.
Members of the Staff

407-621 CASEWORK WITH INDIVIDUALS AND FAMILIES IN CRISIS. (Half course.) Theory and practice of work with individuals and families under stress. Topics will include: categories of hazardous events; affective, behavioural and role disorganization; phases in the crisis cycle; techniques of crisis intervention and abatement.
Professor Katz

407-622 SEMINAR ON FAMILY DIAGNOSIS. (Half couse.) An advanced seminar designed to integrate knowledge of human personality in social process. Emphasis will be upon the appraisal and assessment of patterns of reciprocity among members of disturbed and disorganized families
Professor Freeman

407-623 MARITAL AND FAMILY COUNSELLING. (Half course.) The application of selected concepts from current research and practice theory related to marriage and family — centred treatment. Modes of intervention in joint and multiple interviews will be illustrated by instructor's and student's own case material. A continuation of Seminar on Family Diagnosis.
Professor Katz

407-624 COMMUNITY AND SOCIAL ACTION. (Half course.) The aim of this course is to develop an understanding of the organizing process at the grass-roots level. Emphasis is placed upon community power and conflict, the development of organizing strategies, and the application of such strategies in groups and movements dedicated to social change.
Professor Torczyner

407-625 COMMUNITY ORGANIZATION. (Half course.) A continuation of Community Organization and Social Action, with emphasis on the integration of community organization theory and practice. An examination of problems encountered in practice, current issues and trends in the conceptualization of community organization.
Professor Torczyner

407-626 SOCIAL WORK PRACTICE WITH GROUPS I. (Half course.) Theory and practice of work with groups. Focus will be on group development theory and the skills of the worker to strengthen group potential for mutual aid. Children and adult groups in a range of settings will be examined.
Professor Reichertz

407-627 SOCIAL WORK PRACTICE WITH GROUPS II. (Half course.) An advanced course in practice, with emphasis on comparative theories of groups. Prerequisite, Social Work Practice with Groups I.
Professor Reichertz

407-628 ACTIVITY GROUP METHODS. Theory and practice of the use of activity in work with groups. An analysis of a range of mediums through which group members provide mutual aid. An exploration of theoretical models of the role of the worker.
Lanie Melamed

407-629 PSYCHODRAMA. (Half course.) Study of the rationale and techniques of psychodrama application in role playing situations for individuals and groups; increase in sensitivity to clients. Didactic lectures with application in simulated situations.
Dr. Surkis

407-630 SEMINAR IN INTEGRATION OF PRACTICE METHODS. (Half course.) Discussion seminar in which attention will be given to a range of beginning theoretical attempts to define an integrated method. Emphasis will be placed on the examination of existing models; the problems entailed in creating a common model which allows for a differential application; and a study of the central requirements for a functional statement of practice.
Professor Katz

407-631 SEMINAR ON METHODS OF SUPERVISION. (Half course.) The seminar is designed for students who, on graduation, will assume immediate responsibility in a supervisory role. The seminar will deal with theories and models related to supervision of personnel engaged in different levels of practice and a variety of services with people.
Professor Freeman

407-632 FIELD INSTRUCTION. (Full course.) Supervised educational experience in social work practice integrating practice with theoretical knowledge characteristic of the selected field. Individual and group instruction.
Field Instructional Staff

407-633 EVALUATION OF SOCIAL WELFARE PROGRAMS. (3 Credits.) Program evaluation is examined in terms of the problems giving rise to the program, the objectives of the programs as specified outcomes, the program components, measurement of program variables, evaluation of outcomes, and the audience for whom the report is being prepared. Action research requirements are to be distinguished from research evaluation. Obstacles to program evaluation are noted.
Professors Shiner and McGilly

407-634 INTERDISCIPLINARY SEMINAR ON AGING AND SERVICES TO THE AGED. (3 Credits.) 1. Examination of services to older persons; their objectives, the resources they use, their sponsorship and administration, the knowledge upon which they are based, their use; 2. Exploration of the perspectives of disciplines, social and biological, that have contributed to values and to knowledge in this field, and particularly to assess the use made of such contributions in the development of services; 3. Evaluation of the impacts of services upon the recipients and upon the community. Representatives of relevant disciplines (e.g. medicine, economics, religious studies) and practitioners in service fields (e.g. residential, recreation, health) will take part. Some older persons will be invited to share in the seminar. Activities may include videotape presentations, visits to agencies and institutions, etc. The seminar will be open to graduate-level students from several disciplines and professional programs.
Professors Marcus and McGilly

407-635 SOCIAL WORK PRACTICE WITH CHILDREN. (3 Credits.) This course will consider direct work with young children experiencing a range of developmental, familial, and situational problems. Particular attention will be given to such themes as object relations theory, dependency, security, concepts of "self", maternal deprivation, separation and aggression. Students will be expected to provide current practice examples for discussion in the seminar.
Carol Speirs

407-636 CRITICAL READINGS IN SOCIAL WORK PRACTICE. (3 Credits.) An individual or small group tutorial in which students will work independently in conjunction with the instructor. The student will undertake a major project related to the area of specialization.
Members of the Staff

407-637. HOUSING POLICY. (3 Credits.) An examination of the dynamics of private and public housing in Canada and policies which have been designed to influence the provision of housing. Particular attention will be given to Canadian and Quebec policies and international comparisons will be made, notably, England, France, Sweden, United States. Specific topics include: housing demand and supply, taxation and subsidies, public housing, cooperative housing, rehabilitation, tenant and landlord relationships, standards to services to special groups.
Professor Drover

6.3 DIPLOMA IN ADVANCED PRACTICE COURSES

407-700 SEMINAR IN SUPERVISION. (Half course.) A discussion of basic concepts implicit in supervision as an administrative and teaching process. Open to students who are having or who are having or who have had experience as supervisors.
Professor Freeman

407-701D COMPREHENSIVE EXAMINATION. Requires candidates for the Diploma to demonstrate ability to reorganize and integrate knowledge and perspectives over the total curriculum. Will include at least one section in the field of specialization, and one section in another area of the candidate's choice.

407-702B BEHAVIOURAL SCIENCE THEORY AND ITS RELATION TO SOCIAL WORK PRACTICE. (Half course.) Some of the major concepts of learning, role, field and communication theory

will be systematically examined. Course content will include a critique of selected research in each of the above areas. Major consideration will be given to the relevance and application of behavioural theory to social work practice.

407-703 PRINCIPLES OF SMALL GROUP INTERACTION. (Half course.) A survey of theory, principles, and current research in small group dynamics, with emphasis on implications for the practice of social work.

407-704 CRITICAL STUDY OF RESEARCH IN SOCIAL WORK. (Half course.) Analysis and evaluation of social work research, and research of particular relevance to social work from other disciplines.
Professor Shiner

407-705 INDIVIDUAL RESEARCH STUDIES IN SOCIAL WORK. (Half course.) Tutorials on selected research problems.
Professor Shiner

407-706 ADVANCED PRACTICE SEMINAR IN MARRIAGE AND FAMILY COUNSELLING. (Full course.) A course emphasizing family diagnosis during first term. Theoretical presentations related to student's case material. Emphasis on: Evaluation of marital conflict, differential treatment methods, the role of the psychiatric consultant, the appropriate use of short-term counselling, individual and family interviews, group counselling with married and engaged couples.
Professor Freeman

407-707. ADVANCED PRACTICE SEMINAR IN REHABILITATION. (Full course.) In the first term, emphasis is placed on the biopsychological and socio-cultural aspects of health and disease. During the second term, particular attention will be given to the application of theory from various disciplines to the prevention, treatment, and rehabilitation aspects of chronic and disabling illness. Consideration also will be given to the impact of of disability on individuals, families and communities and to the actual and potential role of social work in this field.
Professor Marcus

407-708 SEMINAR IN ADVANCED RESEARCH METHODOLOGY. (Full course.) Study of contemporary theoretical and methodological approaches to social work research with special focus on design, measurement and analysis. A research project on a social work practice problem is central to the course.
Professor Shiner

407-709 FIELD PRACTICE. (Full couse.) Minimum of 300 hours of supervised practice in marriage and family counselling, rehabilitation or corrections, research, or welfare administration.
Members of the Staff

407-710 ADVANCED READINGS IN SOCIAL SCIENCE. (Half course.) Under special circumstances, and on recommendation of the student's advisor, arrangement will be made for a special tutorial course, involving readings and assignments.
Members of the Staff

407-711 SOCIAL WORK IN SOCIOLOGICAL PERSPECTIVE. (Half course.) The main defining features of social work and their interconnections are to be studied in the context of the sociology of occupations. Through comparison of several fields of work this course will seek to identify some of the characteristics of professionalization of occupations with particular attention to the helping professions.
Professor Deehy

407-712 PRINCIPLES OF REHABILITATION. (Half course.) This course will consist of a critical discussion and analysis of the concept of rehabilitation, from a number of theoretical standpoints. Particular attention will be paid to theories of adult socialization and to the organization structure of socializing agencies. The subject matter will provide a general framework from which to move into the courses specific either to rehabilitation or corrections.
Professor Deehy

407-713 CONTEMPORARY SOCIAL PROBLEMS AND SOCIAL POLICY. (Half course.) A review of social policy as revealed in the social welfare structure in Canada. Critical appraisal of such policy in relation to selected social problems, with particular emphasis on criteria of adequacy and the social, economic and political factors involved in policy formation.
Professor Woodsworth

407-714 ADVANCED PRACTICE SEMINAR IN CORRECTIONS. (Full course.) The first term consists of an intensive analysis of selected theories relating to crime and delinquency and an attempt to derive from these specific treatment programs applicable to social work intervention. The second term involves a critical analysis of selected correctional programs, particularly those in which social work plays a part in terms both of theoretical underpinnings and their effectiveness.
Professor Deehy

407-715 ADVANCED PRACTICE SEMINAR IN WELFARE ADMINISTRATION. (Full course.) Students will apply, through illustrations and discussion, concepts derived from various contributing disciplines and from social work practice, to particular problems in welfare administration. Topics will include problems, for example: of formal organizations with varying orientations, of pro-

fessional workers in organizations, of organizational adaptation to complex environments, of representation of client and community interests in administration, of communications where interaction among participants are highly differentiated, of organizational goalsetting, performance evaluation, and resource allocation. Various theoretical models of organization behaviour will be presented, such as "social systems" learning models and conflict models.

Professors McGilly and Woodsworth

407-716 COMPARATIVE APPROACHES TO PERSONALITY. (Half course.) A systematic examination of selected analytic and non-analytic approaches to personality. Attention will be devoted to the major concepts and basic assumptions of Freud, Rank, Adler, Horney, Fromm, Sullivan, and Rogers. Emphasis will be placed upon the implications of the various personality theories for social work practice.

Professor Katz

ELECTIVES

In certain instances, students may, where eligible, register for appropriate graduate courses offered in other departments of the University.

The University reserves the right to make changes without prior notice to the information contained in this publication, including the alteration of various fee schedules and the revision or cancellation of particular courses.

IT IS THE RESPONSIBILITY OF EACH STUDENT TO READ, UNDERSTAND, AND ABIDE BY THE RULES AND PROCEDURES PRINTED IN THIS ANNOUNCEMENT.

The university reserves the right to limit attendance, and to limit the registration in, or to cancel, any of the courses listed. REGISTRATION WILL BE ON A FIRST COME, FIRST SERVED BASIS.

CALENDAR — 1975
SUMMER SESSION PART I

Monday, May 12	Registration, Summer Session Part I. Both "terms" and full courses. Redpath Hall, 10:00 a.m. – 1:00 p.m., 2:00 p.m. – 7:00 p.m.
Monday, May 12	Classes begin: first "term" and full courses.
Wednesday, May 14	Last day for changes: half courses.
Wednesday, May 14	Last day for Late Registration: first "term" courses. Non-refundable late fee ($10) charged after May 12.
Friday, May 16	Last day for changes: full courses.
Friday, May 16	Last day for Late Registration: full courses. Non-refundable late fee ($10) charged after May 12.
Friday, May 16	Last day for 50% refund.
Monday, May 19	Victoria Day. Holiday. No lectures.
Tuesday, May 20	Last day to withdraw (W) without penalty: half courses (3 credits).
Thursday, May 22	Last day to withdraw (W) without penalty: 4-credit courses.
Monday, May 26	Last day to withdraw (W) without penalty: full courses (6 credits).
Friday, May 30	First "term" classes end.
Monday, June 2	Final examinations for first "term" courses.
Monday, June 9	**Last day for submission of final marks to Summer Session Office for the first "term" courses.**
Tuesday, June 3	Second "term" courses begin.
Thursday, June 5	Last day for changes: second "term" courses.
Thursday, June 5	Last day for Late Registration: second "term" courses. Non-refundable late fee ($10) charged after June 3.
Friday, June 6	Last day for 50% refund. (Second "term").
Tuesday, June 10	Last day to withdraw (W) without penalty: 3-credit courses (second "term").
Thursday, June 12	Last day to withdraw (W) without penalty: 4-credit courses (second "term").
Friday, June 20	Last day of classes
Monday, June 23	Final examinations: second "term" and full courses.
Tuesday, June 24	St. Jean Baptiste Day. Offices closed.
Monday, June 30	**Last day for submission of final marks to Summer Session Office for second "term" and full courses.**

CALENDAR — 1975
SUMMER SESSION PART II

Tuesday, July 1	Dominion Day. Offices closed.
Wednesday, July 2	Registration, Summer Session Part II. Both "terms" and full courses. Redpath Hall, 10:00 a.m. – 1:00 p.m., 2:00 p.m. – 7:00 p.m.
Wednesday, July 2	Classes begin: first "term" and full courses.
Friday, July 4	Last day for changes: half courses.
Friday, July 4	Last day for Late Registration: first "term" courses. Non-refundable late fee ($10 charged after July 2.
Friday, July 4	Last day for 50% refund.
Tuesday, July 8	Last day for changes: full courses.
Tuesday, July 8	Last day for Late Registration: full courses. Non-refundable late fee ($10) charged after July 2.
Wednesday, July 9	Last day to withdraw (W) without penalty: half courses (3 credits).
Friday, July 11	Last day to withdraw (W) without penalty: 4-credit courses.
Tuesday, July 15	Last day to withdraw (W) without penalty: full courses (6 credits).
Friday, July 18	First "term" classes end.
Monday, July 21	Final examinations for first "term" courses.
Monday, July 28	**Last day for submission of final marks to Summer Session Office for first "term" courses.**
Tuesday, July 22	Second "term" courses begin.
Thursday, July 24	Last day for changes: second "term" courses.
Thursday, July 24	Last day for Late Registration: second "term" courses. Non-refundable late fee ($10) charged after July 22.
Friday, July 25	Last day for 50% refund. (Second "term").
Tuesday, July 29	Last day to withdraw (W) without penalty: 3-credit courses (second "term").
Thursday, July 31	Last day to withdraw (W) without penalty: 4-credit courses (second "term").
Friday, August 8	Last day of classes
Monday, August 11	Final examinations: second "term" and full courses.
Monday, August 18	**Last day for submission of final marks to Summer Session Office for second "term" and full courses.**

EDGAR R. FILLMORE, A.A., B.A., M.R.Ed., Ph.D., Assistant Professor **Agriculture**

A. V. FODOR, B.A. (Leningrad), M.A., Ph.D. (Montr.), Associate Professor **Russian**

PEARL FRANCOEUR, B.Sc. (Sir. G. Wms.), M.Sc. (Mcq.), Associate Professor **Education**

H. FRIEDLI, Maturat (Zürich) **German**

WILLIAM C. GALLEY, B.Sc. (McG.), Ph.D. (Calif.), Associate Professor **Chemistry**

GEORGE GMELCH, M.A., Ph.D. (Calif.), Assistant Professor **Anthropology**

IRWIN GOPNICK, B.A., M.A., Ph.D. (Penn.), Associate Professor **English**

MYRNA GOPNIK, Ph.D. (Penn.), Associate Professor **Linguistics**

LAWRENCE GORDON, Ph.D., Associate Professor **Management**

JOHN R. GRACE, B.E.Sc. (W. Ont.), Ph.D. (Camb.), Associate Professor **Engineering**

JOHN B. GRADWELL, B.A., M.A. (Calif.), Ph.D., (Iowa St.), Associate Professor **Education**

FRANK GREENE, B.A., M.A., Ph.D. (Mich.), Associate Professor **Education**

FIONA M. GURR, B.Sc., Lecturer **Physics**

D. N. HARPP, A.B. (Middlebury), M.A. (Wesleyan), Ph.D. (North Car.), Professor **Chemistry**

JAMES P. HANRAHAN, B.A., B.Ed. (St. F.X.), Ph.D. (Lond.), Assistant Professor **Education**

NORMAN HENCHEY, B.A. (Loyola, Montr.), B.Ed., Ph.D. (Mcq.), Associate Professor **Education**

THEODORE L. HILLS, B.A. (N.Z.), M.A. (Cant.), Ph.D. (Mcq.), Professor **Geography**

JAMES J. HOGAN, B.S. (Rensselaer Pol. Inst.), M.Sc., Ph.D. (Chic.), Associate Professor **Chemistry**

ANDREW HUM, B.A. (Sir G. Wms.), M.Ed. (McG.), Ph.D. (Alta.), Assistant Professor **Education**

GEOFFREY ISHERWOOD, B.S. (Tufts.), M.Ed., Ed.D. (Rutgers), Associate Professor **Education**

ERIC JAY, B.A. (Leeds), M.A., B.D., M.Th. (Lond.), D.D. (Montr.), Professor **Religious Studies**

MARTIN JEFFREY, Licentiate in Theology, Lecturer **Education**

ROBERT JONES, B.A., B.Ped. (Montr.), M.A. (Sir G. Wms.), Assistant Professor **Education**

RABINDRA N. KANUNGO, Ph.D. (McG.), Associate Professor **Management**

LAWRENCE KAPLAN, B.A. (Yeshiva College), M.A. (Harv.), Assistant Professor **Jewish Studies Program**

MYER KATZ, B.A. (Sir G. Wms.), B.S.W., M.S.W. (McG.), Ph.D. (Col.), Professor **Social Work**

LEO KERKLAAN, B.Com. (Sir G. Wms.), Lecturer **Management**

J.C. KIRBY, B.A. (McG.), S.T.M. (Gen. Sem. N.Y.), Ph.D., Professor **Religious Studies**

HAROLD R. KLINCK, B.S.A. M.Sc., Ph.D. (McG.), Professor **Agriculture**

MICHEL LAFERRIERE, Lic. ès Lettres, M.Ed. Soc., M.Phil., Lecturer **Education**

MIRIAM LAFLEUR, Ph.D. (McG.), Reader **Physics**

MARIANNE LAFON, B.A. (Copen.), Ph.D., Assistant Professor **English**

ROBERT LAVERS, B.A. (Bishops), M.Sc., Ph.D. (McG.), Assistant Professor **Education**

WILLIAM LAWLOR, M.A., Ph.D. (Ott.), Associate Professor **Education**

HUGH LEARD, B.Ed., B.A. (Sask.), M.A. (Minn.), Ed.D. (Ariz.), Associate Professor **Education**

C. LE MAISTRE, B.Sc., Sessional Lecturer **Education**

SHIMON LEVY, B.A. (Hebrew), M.A., Lecturer **Jewish Studies Program**

YEHUDI LINDEMAN, Ph.D. (Harv.), Assistant Professor **English**

DONALD P. LITTLE, B.A. (Vanderbilt.), M.A. (Stan.), Ph.D. (Calif.), Associate Professor **Islamic Studies**

BARRY LUCAS, B.A. (U.B.C.), M.Ed. (W. Washington), Ph.D. (Mich.), Assistant Professor **Education**

JAN O. LUNDGREN, Ph.D. (Stockholm), Associate Professor **Geography**

CHARLES LUSTHAUS, B.S., M.S., Ph.D., Assistant Professor **Education**

ANGUS F. MACKENZIE, B.S.A., M.Sc. (Sask.), Ph.D. (Corn.), Professor **Agriculture**

FRANCIS MCGILLY, B.A. (St. F.X.), Ph.D. (Pitt.), Associate Professor **Social Work**

JAMES MCGILVRAY, Ph.D. (Yale), Assistant Professor **Philosophy**

DAVID D. MCWETHY, B.S., M.A. (Mich. State), Ph.D., Assistant Professor **Education**

GEORGE MAGER, B.A., Ph.D. (Harv.), Associate Professor **Education**

SUMMER SESSION

PAUL F. MARKS, B.A. (Calif.), M.M. (Tulsa.), Assistant Professor **Music**

THEODORE J. MAROUN, B.S. (S.U. Potsdam), M.S. (Canisius College), M.Ed. (N.Y. State), D.Ed. (Indiana), Associate Professor **Education**

JACQUES MICHON, B.A., M.A., Doctorat — 3e cycle, Sessional Lecturer **French Language and Literature**

PAUL NOBLE, B.A. (Loyola, Montr.), Ph.D., Associate Professor **Political Science**

KELVIN OGILVIE, B.Sc., Ph.D., Associate Professor **Chemistry**

PETER H. OHLIN, M.A., Ph.D. (New Mexico), Associate Professor **English**

CHESTER OLSON, Ph.D., Assistant Professor **Psychology**

CLIFFORD J. PAPKE, B.A. (Montr.), A.O.C.A., Assistant Professor **Education**

DON PARE, B.Th. (St. Marys), B.A., M.Sc. (Fordham), M.A. (Gonzaga), Ph.D. (Flor.), Associate Professor **Education**

JAMES PARK, B.Ed. (Alta.), M.Ed., Ph.D. (Alta.), Assistant Professor **Education**

I.E. PAVILANIS, B.A., M.A. (Montr.), Ph.D., Assistant Professor **Russian**

MONROE PEASTON, B.D. (Lond.), M.A. (Oxon.), Ph.D., Associate Professor **Religious Studies**

LOUIS PERRON, B.L.A., Lecturer **Agriculture**

MICHELANGELO PICONE, Ph.D., Assistant Professor **Italian**

GLYNE L. PIGGOTT, B.A. (WI.), M.A. (Tor.), Ph.D., Assistant Professor **Linguistics**

FRANCIS X. PINTO, B.A. (Madras), M.A. (Bombai), L.Ph. (Gregorian), Associate Professor **Education**

ALWYNN POLLARD, B.Ed., M.A. (U.B.C.), Assistant Professor **Education**

ROBERT N. POLLARD, B.A. (U.B.C.), M.Ed., Associate Professor **Education**

SALVATORE A. PUPO, B.Ed. (Duquesne), M.Sc. (Notre-Dame), Associate Professor **Education**

OSCAR PURDY, M.A. (Bowdoin), Associate Professor **Education**

SAM M. RABINOVITCH, B.Sc. (McG.), Ph.D. (Purdue), Professor **Education**

JAMES O. RAMSAY, Ph.D., Associate Professor **Psychology**

GERALD RATZER, B.Sc. (Glas.), M.Sc. (McG.), Associate Professor **Computer Science**

RONALD REICHERTZ, B.A., M.S., Ph.D. (Wisc.), Associate Professor **English**

GREG REID, B.Ed. (McG.), M.A., Lecturer **Education**

JOHN RIPLEY, B.A., M.A. (U.N.B.), Ph.D. (Birm.), Associate Professor **English**

JONATHAN ROBINSON, Ph.D. (Edin.), Associate Professor **Philosophy**

JOSEPH RONSLEY, B.Sc., M.A., Ph.D. (Northwestern), Associate Professor **English**

C. HARVEY RORKE, M.B.A., M.S., Assistant Professor **Management**

ISOBEL R. RUSSELL, B.Ed., M.Ed. (Sask.), Assistant Professor **Education**

GERTRUDE SCOTT, M.A., Assistant Professor **Education**

BRUCE M. SHORE, Teach. Dip., B.Sc., M.A. (McG.), Ph.D., (Calgary), Associate Professor **Education**

T. SHULTZ, B.A. (Minn.), Ph.D., (Yale), Assistant Professor **Psychology**

DAVID J. SIMKIN, B.Sc., Ph.D. (Penn. St.), Associate Professor **Chemistry**

GEORGE L. SNIDER, B.A. (Boston College), M.A., Ph.D. (Harv.), Assistant Professor **Classics**

DOROTHY SOKOLYK, B.A. (Sir G. Wms.), M.A. (Col.), Associate Professor **Education**

ROBIN K. STEWART, B.Sc. (Glas.), Ph.D., Associate Professor **Agriculture**

RICHARD LYNN STUDHAM, N.D.D. (Sanderland, Durham), M.A., A.R.A., Assistant Professor **Education**

HOWARD STUTT, B.A. (Qu.), B.Ed., M.Ed. (Montr.), Associate Professor **Education**

STEVEN TABAC, M.B.A., Lecturer **Management**

WILLIAM TALLEY, A.B. (Kentucky Christian), B.A. (Morehead St.), M.A., Ph.D. (Ohio St.), Associate Professor **Education**

McGILL UNIVERSITY LIBRARY

KEITH TEDMAN, B.Mus., Lecturer **Music**

ALBERT D. TEITLEBAUM, Ph.D. (McG.), Associate Professor **Management**

LOUIS TENCER, Sessional Lecturer **Jewish Studies Program**

GARY TORBIT, B.Ed., M.Ed., Ph.D., Assistant Professor **Education**

GODFRIED TOUSSAINT, B.Sc., M.A.Sc. (U.B.C.), Ph.D., Assistant Professor **Computer Science**

RICHARD TOWNSEND, B.A., M.A., Ph.D., Assistant Professor **Education**

MARTIN TURLEY, B.A., M.Ed., Assistant Professor **Education**

J. MARC VARY, B.A. (McG.), M.A. (Middlebury & Madrid), Assistant Professor **Spanish**

JUAN H. VERA, D. Ing., M.Sc., Ing. Quim., B. Mat., Research Associate **Engineering**

N. SHEILA VIRGO, B.S.A., Ph.D., Post Doctoral Fellow **Biology**

CATHERINE M. WADDELL, Dip.Ed., B.A. (Sir G. Wms.), Assistant Professor **Education**

PEGGY WANG, B.A. (Taiwan), Lecturer **East Asian Language and Literature**

JAMES WATLING, A.T.C. (Leeds), Associate Professor **Education**

PADDY WEBB-HEARSEY, Dip. Ed. (Southampton), M.A. (Sir G. Wms.), Assistant Professor **Education**

WILLIAM C. WEES, B.A. (Northwestern), M.A. (Roch.), Ph.D. (Northwestern), Associate Professor **English**

MARVIN WESTWOOD, B.Ed., M.Ed., Ph.D., Assistant Professor **Education**

BOYD E. WHITE, B.A. (Sir G. Wms.), B.F.A., M.F.A. (Guanajuato), Assistant Professor **Education**

NORMAN WHITE, Ph.D. (Pitt.), Assistant Professor **Psychology**

JAMES G. WHITTON, B.A. (Loyola, Montr.), M.Sc. Ed. (Hofstra), Assistant Professor **Education**

ROBERT E. WILKINSON, B.Sc. (McG.), M.A. (Col.), D.P.E., Professor **Education**

HARRY D. WOODS, M.A. (McG.), L.L.D. (U.N.B.), Professor **Management**

RONALD WUNDERLIN, B.A., M.S., Ph.D., Assistant Professor **Education**

MORTY YALOVSKY, M.Sc. (McG.), Lecturer **Management**

F. JACK YOUNG, B.Ed. (U.B.C.), M.A. (KentSt.), Associate Professor **Education**

PAUL ZSOMBOR-MURRAY, B.Eng., M.Eng., Ph.D. (McG.), Associate Professor **Engineering**

2. GENERAL INFORMATION

The Summer Session will be divided into two parts: Summer Session Part I, to be held from May 12 to June 20, and Summer Session Part II, from July 2 to August 8. Each session will further be divided into two "terms" in order to distinguish between full courses (6 credits) which will be held without interruption, save for regular holidays, over the six-week period and half courses (3 credits) which will, in general, be held over three weeks. Please consult the calendar of dates at the front of this Announcement for the starting dates of each "term".

Some courses may be offered prior to May 12 and some may extend beyond the normal three or six-week periods; please consult the appropriate sections of this Announcement for specific dates.

The term "daily" refers to Monday through Friday inclusively. Please note that some courses may be offered on alternate days.

The French Summer School, the Accountancy Summer School and the Centre for Continuing Education will offer additional courses which are not administered by the Summer Session. Individuals interested in those specific programs should contact the respective offices concerned.

All inquiries concerning graduate courses should be directed to the Faculty of Graduate Studies and Research, McGill University, P.O. Box 6070, Station A, Montreal, Quebec H3C 3G1, telephone 392-5092.

Students applying for *graduate* studies in Education should consult the Faculty of Education section of this Announcement.

Students intending to follow courses in the Faculty of Agriculture should consult that Faculty's section of the Announcement regarding special registration procedures.

Following is a description of the various forms used by the Summer Session Office.

Summer Session Registration Form: to be completed by *ALL* summer students (Regular, New,

Visiting, Special). Graduate students must complete the Faculty of Graduate Studies and Research Summer Session Registration Form.

Waiver: This form to be completed *ONLY* by Special Students and new students admitted conditionally. This is a form releasing McGill University from the obligation to recognize the credits towards a degree attached to a course or courses for which students are registering.

Letter of Permission: A letter to be submitted by Visiting Students stating the number of credits and/or courses to be undertaken in the Summer Session at McGill and signed by the Registrar or other responsible authority of the Visiting Student's institution.

Residence Application Form: to be completed by students wishing to live in residence during the Summer Session.

It is important to note that there is **no Application Form to the Summer Session.** Candidates may apply by mail, by telephone or in person, but will be registered only upon presentation of the documentation listed in the applicable categories below. Graduate students apply directly to the Faculty of Graduate Studies and Research.

Categories of Students

NEWLY ADMITTED McGILL STUDENTS

Conditional Acceptance: Students admitted to McGill conditionally will be required to sign a Waiver releasing the University from the obligation to recognize credit towards a degree for the work accomplished. Signature of the Waiver in no way guarantees admission to McGill.

Final Acceptance: Students in possession of their final letter of acceptance will be required to present an Authorization Form signed by the Associate Dean of the Faculty into which they have been accepted. Students must bring with them a copy of their most recent transcripts when requesting the Associate Dean's signature. This signature must be secured *before* registering in the Summer Session.

McGILL STUDENTS

Before registering in the Summer Session, regular undergraduate McGill students must secure, on the enclosed Authorization Form, the signature of the Associate Dean of the Faculty in which they are currently registered. It is the student's responsibility to obtain this signature *before* submitting the form (by mail or in person) to the Summer Session Office.

Students in the Faculty of Education must obtain the signature of the Director of the Program they wish to pursue as well as that of the Associate Dean of the Faculty.

Permission to Register in Summer Session Part I:

Permission to register for Summer Session Part I has to be granted before reports of standing for the preceding term of session have been released. Permission to register for summer courses does not represent a decision as to standing in the Faculty. Students whose June reports of standing show them to be in unsatisfactory standing will be permitted to complete the summer courses for which they have registered, but they will be considered to be special students for the Summer Session. Successful completion of the summer courses will not guarantee readmission in September for students in unsatisfactory standing as of the June reports of standing.

Permission to Register in Summer Session Part II:

Students wishing to register for summer courses *after* their June reports of standing show them to be in unsatisfactory standing will be required to sign the Waiver which will place them in the category of special students for the Summer Session. Successful completion of summer courses will not guarantee readmission in September for students in unsatisfactory standing.

Graduate students must contact the Faculty of Graduate Studies and Research for deadline dates, official signatures, and registration forms.

VISITING STUDENTS

A student from another university wishing to take a course or courses at McGill for credit at his own university may do so, provided he submits a letter of permission from the Registrar or other responsible authority of his home university. This letter should state the number of credits and/or courses to be attempted by the student. The Summer Session recommends that no more than 6 credits in each Session be attempted.

SPECIAL STUDENTS

In certain circumstances, students not pursuing a degree or diploma at McGill or elsewhere may be permitted to register in the Summer Session for a specific course for which they have prerequisite requirements without being first admitted to the University, but such students will be required to sign the Waiver.

Registration

Registration is on a first come, first served basis. Some courses have limited enrolment and students are advised to register early to avoid disappointment.

Summer students, except those registering in the Faculty of Graduate Studies and Research, have three options from which to choose; they may register by mail, in person through the Summer Session Office, or in person in Redpath Hall. Graduate students please consult the Faculty of Graduate Studies and Research for registration procedures.

Registration will be held in Redpath Hall on the first day of Summer Session Part I (May 12) and Summer Session Part II (July 2). Students may register in person in the Summer Session Office (9:00 a.m. - 5:00 p.m. Monday to Friday) up to the day before the Session starts; students wishing to register on May 12 or July 2 must register in Redpath Hall.

Students registering in person for courses in the second "term" of each Session may do so in the Summer Session Office up to and including the first day of Classes (i.e. June 3 or July 22) between 9:00 a.m. and 5:00 p.m. Monday to Friday.

Please note that students should complete only *ONE* Summer Session Registration Form. Students registering for one course who decide at a later date to attend another must NOT complete a second registration form but must simply ADD the course. Please see below for details.

REGISTRATION BY MAIL

Students registering by mail must submit the appropriate documentation at least one week before the start of the Session or "term" they wish to attend. A Registration form is enclosed with this announcement. The completed form must be returned along with the documents listed in the applicable categories below: 1) Copy (please keep the original for presentation at the September Registration) of the final letter of acceptance from the Admissions Office and signed Authorization Form, OR copy of the conditional letter of acceptance from the Admissions Office and signed Waiver (New Students); 2) Letter of Permission from the Registrar or other responsible official of the Home University (Visiting Students); 3) Authorization Form signed by the Associate Dean of the Faculty (regular undergraduate McGill students); 4) Signed Waiver (Special Students and students admitted conditionally.)

A **certified** cheque or money order (no cash) covering full fees (with the exception of Residence fees which are payable in advance directly to the Residence) MUST accompany the documentation. Students who do not enclose their certified cheque will not be registered. Personal cheques will be returned.

Cheques may not be post-dated. There are no provisions for paying fees on an instalment basis in the Summer Session Parts I and II. *Please make cheques payable to McGill University,* in Canadian funds.

Students expecting financial assistance must also submit, along with their registration form and appropriate documents, a letter from the granting agency outlining the method and date of payment.

Identification cards will be sent to registered students, including regular McGill students. No acceptance letters will be sent; receipt of the I.D. card will constitute notification of acceptance. These cards are necessary for using library facilities.

Those students whose documentation is received in the Summer Session Office less than one week before the start of the session or "term" they wish to attend will not be sent their I.D. cards but will pick them up at the Summer Session Office.

REGISTRATION IN THE SUMMER SESSION OFFICE

Students may register in the Summer Session Office any time convenient to them between 9:00 a.m. and 5:00 p.m. Monday to Friday except on May 12 and July 2 when registration is exclusively at Redpath Hall.

Students will be permitted to register upon presentation of the documents listed in the applicable categories below: 1) Copy (please keep the original for presentation at the September Registration) of the final letter of acceptance from the Admissions Office and signed Authorization Form, OR copy of the conditional letter of acceptance from the Admissions Office and signed Waiver (New Students); 2) Letter or Permission from the Registrar or other responsible authority of the Home University (Visiting Students); 3) Authorization Form signed by the Associate Dean of the Faculty (regular undergraduate McGill students); 4) Signed Waiver (Special Students and students admitted conditionally).

Students must also pay their fees in full (with the exception of Residence fees which are payable in advance directly to the Residence) at that time. Only *certified* cheques or money orders (no cash) will be accepted. Personal cheques will *not* be accepted. Cheques may not be post-dated and there are no provisions for paying fees on an instalment basis in the Summer Session Parts I and II. *Please make cheques payable to McGill University,* in Canadian funds.

Students expecting some sort of financial assistance must also submit, at registration, a letter from the granting agency outlining the method and date of payment.

Identification cards will be issued to all students, including regular McGill students when they register. These cards are necessary for using library facilities.

SUMMER SESSION

REGISTRATION IN REDPATH HALL

Registration will be held in Redpath Hall on two days: Monday, May 12 for Summer Session Part I and Wednesday, July 2 for Summer Session Part II. Students may register in Redpath Hall at any time convenient to them between 10:00 a.m. and 1:00 p.m. and from 2:00 p.m. to 7:00 p.m. Students may attend the 8:00 a.m. class of their choice but must register sometime during the day.

Students will be permitted to register upon presentation of the documents listed in the applicable categories below: 1) Copy (please keep the original for presentation at the September Registration) of the final letter of acceptance from the Admissions Office and signed Authorization Form, OR copy of the conditional letter of acceptance from the Admissions Office and signed Waiver (New Students); 2) Letter of Permission from the Registrar or other responsible authority of the Home University (Visiting Students); 3) Authorization Form signed by the Associate Dean of the Faculty (regular undergraduate McGill students); 4) Signed Waiver (Special Students and students admitted conditionally).

Students must also pay their fees in full (with the exception of Residence fees which are payable in advance directly to the Residence) at that time. Only **certified** cheques or money orders (no cash) will be accepted. Personal cheques will *not* be accepted. Cheques may not be post-dated and there are no provisions for paying fees on an instalment basis in Summer Session Parts I and II. *Please make cheques payable to McGill University,* in Canadian funds.

Students expecting some sort of financial assistance must also submit, at registration, a letter from the granting agency outlining the method and date of payment.

Identification cards will be issued to all students, including regular McGill students when they register. These cards are necessary for using library facilities.

LATE REGISTRATION

Students will be permitted, in special cases but only if space is available, to register up to and including the last day for course changes in the session or "term" they wish to attend. Please consult the calendar of dates for deadlines. These students must register, *in person,* in the Summer Session Office (9:00 a.m. – 5:00 p.m. Monday to Friday) and must bring, along with the appropriate documentation (please see above), a **certified** cheque or money order (no cash) covering their full fees (with the exception of Residence fees which are payable in advance directly to the Residence). In addition, a Late Registration fee of $10.00 (non-refundable) will be charged. Personal cheques will *not* be accepted; cheques may not be post-dated and there are no provisions for paying fees on an instalment basis in Summer Session Parts I and II. *Please make cheques payable to McGill University,* in Canadian funds.

ADDING A COURSE

Students need *register* in the Summer Session only *ONCE.* Students wishing to attend a course not listed on the Registration Form at the time of registration must present themselves to the Summer Session Office (9:00 a.m. – 5:00 p.m. Monday to Friday) to *ADD* the course. They must bring with them at that time a second Authorization Form signed by the Associate Dean of their Faculty (Special and Visiting students will be required to sign an additional Waiver) as well as a **certified** cheque or money order (no cash) to cover payment for that course. As the proper documentation is a necessary part of the "adding a course" process, telephone requests to add a course are not acceptable; students must present themselves in person at the Summer Session Office.

Fees and Residence Charges

(fees subject to change without notice.)

TUITION FEES

Graduate Courses	
Full Course	$114.00
Half Course	57.00
Undergraduate Courses	
6-credit course	$114.00
5-credit course	95.00
4-credit course	76.00
3-credit course	57.00
2-credit course	38.00
1-credit course	19.00
Faculty of Agriculture	
Students enrolled in the Faculty of Agriculture:	
Per credit	$16.50
Students enrolled in other Faculties, but taking Faculty of Agriculture courses	
Per credit	$19.00
Technical-Vocational and Business Education Courses	
New Program or Individual Courses	
8-credit course	$152.00
6-credit course	114.00
4-credit course or 50 hours	76.00
3-credit course	57.00
2-credit course or 25 hours	38.00

Tuition fees cover the use of laboratories when applicable.

Late Registration Fee (non-refundable)	$10.00

RESIDENCE CHARGES

Room and Board (per week, min. 3 weeks)	$60.00
For less than 3 weeks (per day)	9.00

STUDENTS SERVICES FEES (OPTIONAL)

Option I (Student Services)	
One Session	$10.00
Both Sessions	15.00
Option II (Athletics)	
One Session	$15.00
Both Sessions	30.00

Receipts will be automatically sent to students in late August, 1975.

Summer Session Regulations

COURSE LOAD – SUMMER SESSION

The permissible course load for McGill degree and diploma candidates will be that listed on their Faculty Authorization Forms.

New students admitted conditionally, Visiting and Special Students will be permitted to attempt no more than one full course or two half courses per Session.

GRADING SYSTEM

In the summer the G.P.A. (Grade Point Average) and C.G.P.A. (Cumulative Grade Point Average) are calculated *only* for McGill degree and diploma candidates. As regulations vary between Faculties, students are requested to consult their Faculty's Announcement for information regarding G.P.A.'s and C.G.P.A.'s.

Following is an explanation of the letter grades used at McGill University.

UNDERGRADUATE LEVEL

A	(80 – 100%)		D	(45 - 54%)	Conditional Pass
B	(65 – 79%)	Satisfactory Pass	F		Failure
C	(55 – 64%)		P		Pass.

K	Incomplete	Student has valid reason for not having completed essential term papers or research. Four (4) months granted to complete.	G.P.A. calculation suppressed until course is completed.
K*	Incomplete-Extension Granted	Permitted to complete the course after the four (4) month period has expired.	G.P.A. calculations suppressed until course is completed.
KK	Completion not required	Faculty prepared to indefinitely waive the requirement to complete the course, but student may be able to complete the course in future.	Course treated like a "W".
KF	Incomplete-Failed	Failed to meet the extended deadline for submission of work in a course.	Counted as "F" in G.P.A. calculations.
J	Absent	The student is registered but does not write the examination or do other essential work and has no valid reason.	Counted as "F" in G.P.A. calculations.
W	Withdrew	Student drops a course with special permission.	Does not enter into G.P.A. calculations.
WF	Withdrew Failing	Student drops a course with special permission, but the work done to date is on the level of an "F".	Does not enter into G.P.A. calculations.

L	Deferred	Student's final exam has been deferred for reasons such as illness or family affliction at the time of the examination. Approval of Associate Dean of the Student's Faculty is necessary.	G.P.A./C.G.P.A. will not be calculated until "L" is cleared.
L*	Deferred	Permitted to defer the examination for more than the normal period.	G.P.A. calculations identical to that used for L (deferred).

Normally, grades A, B, C are termed satisfactory passes, D a conditional pass and F a failure. Certain courses have been approved for Pass/Fail (P/F) grading.

Although D is a passing grade, it will not permit entry into a subsequent course for which it is a prerequisite, nor will it be recognized if the course is a requisite of the student's program.

GRADUATE LEVEL

A	(80 – 100%)	First Class
B	(65 – 79%)	Second Class
Below 65%		Failure
K		Incomplete
J		Absent
W		Withdrew
L		Deferred

Prerequisites

It is the responsibility of each student (whether New, Regular, Visiting or Special) to ensure that the prerequisites listed for the course (or courses) for which he intends to register have been completed.

Class Tests

Members of the teaching staff may from time to time give class tests if they think them necessary.

Final Examinations

Final examinations are scheduled at the end of each "term" of each session. In some courses there will be no final examinations: standing in these courses will be determined on the basis of course work and class tests. The decision regarding the holding of final examinations rests solely with the Instructor, but final marks must be entered for all registered summer students.

Instructors are not permitted to grant any special treatment regarding examinations to any students. If a student believes there is some circumstance which might be legitimately taken into account in evaluating his performance, he should apply to the Dean or Associate Dean of his Faculty, not to the Summer Session Office. Visiting and Special students should contact the Faculty offering the course.

Excused Absence from Examination

A student who, for reasons such as illness or family affliction, is unable to write final examinations must inform the Associate dean of his Faculty of the reason for his absence within three days of the examination. An "L" will appear on the report of standing in the place of a grade and will be replaced by the grade obtained in the deferred examination after it has been written. The Associate Dean will advise the student of the date of the examination(s).

A Visiting student may be allowed to write a deferred examination if suitable arrangements can be made as to a date for the examination and if approval is granted both by the Visiting Student's Home University and the Associate Dean of the Faculty offering the course at McGill. The "L" will be replaced by the grade received in the deferred examination(s).

Reassessment of a Grade

Papers are marked and grades calculated and handled with considerable care. However, if a student wishes his marks checked or his examination paper re-read, he should apply in writing to the Office of the Dean or Associate Dean of his Faculty; not to the Summer Session Office. There is a fee of ten dollars which will be refunded if an error is found in the student's favour. If the result is a lower mark, the lower mark will stand and there will be no refund. Requests for Reassessment of standing in more than one course will not be permitted.

Any request to have a term paper reassessed must be made directly to the Professor concerned. Visiting and Special Students should contact the Faculty offering the course.

Course Changes

Students wishing to change a course must first secure the authorization of their Associate Dean and then record the change in the Summer Session Office. Please consult the calendar of dates for the change of course dates in each "term" of each Session. Such changes should not introduce conflicts in the timetable. Visiting and special students must secure the authorization of the Summer Session Office.

Withdrawals

Students are held responsible for the course (or courses) in which they are registered unless and until they formally withdraw. Simply notifying the Instructor or ceasing to attend lectures does NOT constitute withdrawal. Students MUST withdraw formally, by mail or in person at the Summer Session Office. Telephone notification is not acceptable.

Students withdrawing (by mail or in person) before the start of classes will receive a total refund of fees and their registration will be cancelled; students withdrawing after the start of classes will receive either a 75% or 50% refund of their fees, depending on the date of withdrawal (see "Refunds" below), and will be given a letter grade of "W". In the case of withdrawal by mail, the date of receipt in the Summer Session Office will constitute the effective withdrawal date and refunds (if applicable) will be determined by the date of receipt.

The withdrawal deadlines are as follows:

Summer Session Part I

"Term" 1	Tuesday, May 20	Last day to withdraw from half courses (3 cr.)
	Thursday, May 22	Last day to withdraw from 4-credit courses
	Monday, May 26	Last day to withdraw from full courses (6 cr.)
"Term" 2	Tuesday, June 10	Last day to withdraw from half courses (3 cr.)
	Thursday, June 12	Last day to withdraw from 4-credit courses

Summer Session Part II

"Term" 1	Wednesday, July 9	Last day to withdraw from half courses (3 cr.)
	Friday, July 11	Last day to withdraw from 4-credit courses
	Tuesday, July 15	Last day to withdraw from full courses (6 cr.)
"Term" 2	Tuesday, July 29	Last day to withdraw from half courses (3 cr.)
	Thursday, July 31	Last day to withdraw from 4-credit courses

McGill degree and diploma candidates who wish to withdraw from a course or courses after the deadlines must secure the written permission of the Associate Dean of their Faculty. The Associate Dean will at that time determine the letter grade to be assigned, i.e. "W" (withdrew) or "WF" (Withdrew Failing).

A student who has not, without accepted excuse, participated in or written the final examination for a course for which he was registered and from which he did not formally withdraw will be given a letter grade of "J" (Absent).

Refunds

Students withdrawing from a course or courses before the start of classes will receive a total refund of their tuition fees; prior to the second scheduled class will receive a 75% refund, and those withdrawing by the first Friday of classes will receive a 50% refund. No refunds will be made for students withdrawing after the first Friday of classes. This also applies to students receiving financial aid. Please note that the Late Registration fee ($10.00) is non-refundable.

Change of Name or Address

Students must inform the Summer Session Office of any change of name (e.g. marital status) or address either by telephone or in writing. This will eliminate errors in transcripts and delays in forwarding reports of standing and Income Tax receipts.

Reports of Standing and Transcripts

A report of standing is an unofficial statement designed to inform the student of the marks received in the courses for which he is registered.

A transcript is an official document showing the student's entire academic record and destined to be sent, upon request, to universities, school boards and other institutions.

Reports of standing will be sent only to students. Those wishing transcripts of their marks sent to their home university or to a school board *MUST* complete the necessary forms in the Registrar's Office.

Cost – First two copies each $1.00
Additional copies made at the same time, each $.25.

English as a Second Language

The normal language of instruction at McGill is English. Students may, if they wish, write term papers and examinations in French, but compe-

tence in English is essential to success in university programs. The Summer Session offers an Introductory English course (110-150C ENGLISH AS A SECOND LANGUAGE) for the convenience of students who lack fluency in that language. Students whose mother tongue is other than English who wish to improve their comprehension and reading of the language should avail themselves of this opportunity. A placement test is mandatory for this course. Please consult the Faculty of Arts section of this booklet for details.

Students wishing to take this course but who have not been admitted to McGill will be permitted to register upon signing the Waiver described in the Summer Session Requirements section of this Announcement.

Cours d'anglais comme langue seconde

En général, sauf certains cours de langue et de littérature, les cours sont donnés en anglais à McGill. Les étudiants peuvent, s'ils le désirent, écrire leurs dissertations et examens en français mais une bonne connaissance de l'anglais est nécessaire afin d'assurer le succès académique. Le "Summer Session" offre aux étudiants dont la langue maternelle est autre que l'anglais un cours élémentaire (110-150C ANGLAIS COMME LANGUE SECONDE) leur permettant d'améliorer leur compréhension de la langue anglaise. Les étudiants qui ont été admis aux cours réguliers commençant en septembre devraient profiter de l'occasion qui leur est offerte et s'inscrire à ce cours d'été. Un test de classement est obligatoire pour ce cours. Veuillez consulter la section "Faculty of Arts" de cet annuaire pout plus de renseignements.

Les étudiants qui ne sont pas admis à l'université mais qui désirent suivre ce cours pourront le faire après avoir signé une formule indiquant qu'ils prennent ce cours sans y être officiellement autorisés et qu'ils s'engagent à prendre sur eux-mêmes la charge de faire reconnaître ces crédits s'ils le désirent.

Student Services

RESIDENCE

Residence accommodation will be available for Summer Session students. The fee for room and board (payable in advance — **certified** cheque or money order) for the 1975 Summer Session Parts I and II is $60.00 per week for a duration of at least 3 weeks. Students who are accommodated for a period of less than 3 weeks will pay $9.00 daily. *Should you seek accommodation,* PLEASE CHECK THE APPROPRIATE AREA ON THE APPLICATION FORM. Students intending to register in person on the first day of the term but who wish to be assured of a place in residence before their arrival should request a Residence application form by writing the Summer Session Office.

All rooms are adequately furnished, and residents are provided with a bedspread, sheets, pillow cases and two towels. Residents are expected to keep their rooms clean. Each wing has its own kitchenette with some refrigeration space; residents may also have a radio, phonograph, or other small electrical appliances in their room. Recreational facilities are available.

Each hall has its own launderette. An outside cleaning firm also calls regularly at the residences.

While all care will be taken to provide supervision in the residences, the University cannot be responsible for personal possessions left in students' rooms.

Non-resident Summer Session students are encouraged to take advantage of the flexible meal plans available at Co-ed Residence during the summer.

LIBRARIES

Summer students are welcome to make use of the University's library facilities. Following is a list of libraries on campus, including addresses and telephone numbers for general information. Since individual privileges and summer hours of service may vary from library to library, it is wise to check with a library before visiting. Stack access and borrowing privileges are assured in the Undergraduate Library and in McLennan Library, which houses the research collection in Humanities and Social Sciences.

BOOKSTORE SUMMER SCHEDULE – 1975

The McGill University Bookstore, located in the Bronfman Building, 1001 Sherbrooke Street West, will be open from 9:00 a.m. to 6:30 p.m. from May 12 to May 16; from July 2 to July 4 and on July 7 and 8. Otherwise, the Bookstore will be open from 10:00 a.m. to 4:00 p.m. The Bookstore is closed on Saturday.

PARKING REGULATIONS

A limited number of Summer Session students are allowed to park in predesignated areas providing they pay the normal rates and abide by the rules and regulations. Parking permits may be obtained at the Parking Office which is located at 840 McGregor. On the morning of July 2 only, permits may be obtained at the Education Building located at 3700 McTavish in the main foyer.

McGill University does not accept liability for damage to or theft of a vehicle or its contents while on the University's property.

OTHER STUDENTS SERVICES AVAILABLE TO SUMMER SESSION STUDENTS

Students who have validated I.D. cards from the 1974-75 fall and winter sessions have access to student services as part of their registration for 1974-75.

All other students will be welcome to use University facilities during their summer stay. Membership will be on a *VOLUNTARY* basis. A fee of $10.00 for one Session (6 weeks) or $15.00 for both Sessions (12 weeks) will entitle students to the following services *(excluding Athletics):*

Option I

CHAPLAINCY SERVICE

A counselling service is available through the campus chaplains independent of McGill administration. This service exists to serve the needs of all students such as marriage counselling, value systems and group dynamics. Open meetings on a variety of religious and campus topics are regularly sponsored by the Chaplains.

At 3484 Peel Street there is a lounge and reading area where books and periodicals are available to students free of charge. Information concerning individual denominational services is available.

Location:	3484 Peel St.
General Information:	392-5890

STUDENT COUNSELLING SERVICE

This office provides a place where students of all faculties may discuss any problem confidentially. Among the services offered are individual counselling, human awareness groups, psychological assessment, vocational testing, effective reading courses, career planning and the Career Information Library.

Location:	522 Pine Avenue West
General Information:	392-5119

STUDENT AID & FOREIGN STUDENT ADVISER OFFICE

The Student Aid section of this office handles all matters relating to financial assistance whether University, Provincial or Federal. Non-Canadian students requiring certification of registration and/or letters of advice to Foreign Exchange Control Boards obtain these from this office.

The Foreign Student Adviser section of this office deals with all matters which may affect non-Canadian students such as problems with the Canadian Department of Manpower and Immigration and information concerning the necessity of the compulsory health insurance.

Location:	3465 Peel St.
General Information:	392-5256

HEALTH SERVICE

Medical clinics operate daily, five days of the week from 9:00 a.m. – 5:00 p.m. A physician is always on call at night and on weekends and he can be contacted by dialing the Health Service number. There are both male and female physicians on staff as well as a competent staff of college health nurses. Students are asked to bring their Medicare cards or equivalent. All information is completely confidential and forms no part of any "University record".

Many students are seen for discussion about sexual life, contraception, drug problems and venereal disease. We urge students who suspect that they have V.D. to consult us. We invite students who are concerned about a drug problem to contact the Health Service and most particularly the Mental Health Section.

In order to ensure medical coverage while a student is at McGill, Canadian students from provinces other than Quebec are advised to consult with the medicare and hospital insurance offices of their own province before coming to McGill. This is particularly important since residents of other provinces are not covered by Quebec Medicare and Hospitalization while studying at McGill.

Location:	517 Pine Avenue West
Appointment and General Office	392-5441
Mental Health Section	392-5449

Location:	Macdonald College
Appointment and General Office	457-6581

OFF-CAMPUS HOUSING SERVICE

This service operates on a year-round basis. Up-to-date listings of various types of accommodation in the downtown area and surrounding suburbs on bus and metro routes are maintained with the use of McGill computers. The service also attempts to accommodate English-speaking students wishing to live with French-speaking families and vice-versa. Students wishing to make use of the service are asked to apply in person.

Location: 3465 Peel St.
General Information: 392-4554

STUDENT PLACEMENT

The Canada Manpower Centre provides a comprehensive placement service to McGill students in the areas of part-time, summer and permanent employment. The principal aims of the service are to encourage employers to make available a wide variety of job opportunities to McGill students; to assist students in finding suitable employment, by providing information on the labour market and arranging interviews with prospective employers; to encourage students to prepare for a career by doing their own research into the labour market, through library facilities, films, seminars, plant visits, summer and part-time jobs.

Location: 762 Sherbrooke St. W.
General Information: 283-4411

Option II

ATHLETICS ONLY

A payment of $15.00 for one Session (6 weeks) or $30.00 for both Sessions (12 weeks) will entitle students to use the swimming pool, tennis courts, squash courts and track facilities.

Visiting and Special students wishing to take advantage of one or both options should include the amount in their certified cheque covering their tuition fees.

Visiting and Special students who have paid their tuition fees and decide later to take advantage of one or both options will pay these fees directly to the Cashier's Office and bring the receipt to the Summer Session Office.

3 COURSE DESCRIPTIONS

Faculty of Arts

ANTHROPOLOGY

151-308L POLITICAL ANTHROPOLOGY. (3 credits.) The study of political processes in non-industrial societies: conflict and its resolution; leadership and social change; factions, parties, patronage and protest movements.
June 3 – June 20
10:30 a.m. – 12:30 p.m. daily
Text: Bailey, F.G., *Stratagems and Spoils: A Social Anthropology of Politics,* Schocken Books, New York, paperback, 1969.
Professor Attwood

151-317L PEASANT SOCIETY. (3 credits.) AWAITING APPROVAL. A comparative analysis of peasant society: origins of peasant society, market and economic systems, social organization, relationship to the nation-state, the rural revolution, rural-urban migration and peasants in cities.
May 12 – May 30
10:30 a.m. – 12:30 p.m. daily
Suggested Pre-Sessional readings: any or all of the texts listed below. *Texts:* Shanin, T., Ed., *Peasant Societies;* Foster, Potter and Diaz, Ed's., *Peasant Society;* Pitt-Rivers, J.A., *People of the Sierra;* Arensberg, C., *The Irish Countryman;* Gamst, F., *Peasants in Complex Society;* Diaz, M., *Tonala.*
Professor Gmelch

151-222L THE CULTURAL DIVERSITY OF MAN. (6 credits.) An introductory analysis of the diversity of human cultures and social behaviour: cultural and social systems, kinship, politics, economics, religion, and the arts. Selected readings from both traditional and modern societies.
May 12 – June 20
4:00 p.m. – 6:00 p.m. daily
Pre-sessional reading: Smith Bowen, E., *Return to Laughter;* OR Powdermaker, H., *Stranger and Friend.*
Professor Aronson

CLASSICS

114-203L INTRODUCTION TO GREEK MYTHOLOGY. (3 credits.) A survey of the myths and legends of Ancient Greece.
May 12 – May 30
10:30 a.m. – 12:30 p.m. daily
Suggested Pre-sessional reading: Hamilton, E., *Greek Mythology;* OR Rose, H.J., *Gods and Heroes of the Greeks.*
Text: Morford and Lenardon, *Classical Mythology,* Longman Canada Ltd., Don Mills, Ontario, 1972.
Professor Snider

EAST ASIAN LANGUAGES AND LITERATURE

117-210L FIRST LEVEL CHINESE. (6 credits.) Introduction to the use of modern Chinese, with emphasis on speaking and pronounciation. Direct methods, as well as film-strips and tape recordings are used for audio-lingual achievements.
May 12 – June 20
1:30 p.m. – 3:30 p.m. daily
Text: Wang, P., *Elementary Chinese I and II,* (and Supplementary Materials), Peking, China, 1971.
Professor Wang

117-220L SECOND LEVEL CHINESE. (6 credits; Prerequisite: First Level Chinese or equivalent.) A continuation of Chinese 117-210D with more advanced study of Chinese language in both aspects of reading and conversation: grammar, vocabulary building and writing practice. Basic literary structures will be introduced.
May 12 – June 20
10:30 a.m. – 12:30 p.m. daily
Text: Shang-Wu Publishing Comp., *Elementary Chinese Part II,* Shang-Wu Publishing Comp., Peking, 1972.
Professor Chang-Orlov

ECONOMICS

154-200L INTRODUCTORY UNIVERSITY ECONOMICS. (6 credits.) A university level discussion of price theory, national income determination, money and banking, international trade theory and economic policy.
May 12 – July 4
10:30 a.m. – 12:30 p.m. daily
T.B.A.

ENGLISH

110-150C ENGLISH AS A SECOND LANGUAGE. (6 credits.) Designed to help students whose native tongue is not English and who have difficulty in: a) understanding spoken English, b) speaking it themselves, c) reading English text material or d) writing assignments in English. Classroom instruction and language lab.
July 2 – August 8
3 hrs. lectures, 1 hr. lab. daily
(Open to anyone whose mother tongue is not English.) Limited enrolment on a first come first served basis. All students must appear at the placement test Friday, June 27, 1975, at 9:00 a.m. sharp, Room 151, Bronfman Building.
Professor Chow and Staff

110-150C ANGLAIS – COURS DE LANGUE SECONDE. (6 crédits.) Offert aux étudiants dont la langue maternelle est autre que l'anglais et qui ont de la difficulté à: a) le comprendre, b) le parler, c) l'écrire. Cours et périodes de laboratoire. Ouvert à tous ceux dont la langue maternelle n'est pas l'anglais. L'inscription est limitée; les premiers arrivés seront les premiers servis. Tous les candidats doivent se présenter vendredi, le 27 juin, 1975, à 9 heures précises afin de passer un test de classement, chambre 151, Edifice Bronfman.
2 juillet – 8 août
3 heures de cours et une heure de laboratoire par jour
Mlle Chow et Associés

110-245L BACKGROUNDS TO ENGLISH LITERATURE. (6 credits.) Study of major writings of Europe.
May 12 – June 20
10:30 a.m. – 12:30 p.m. daily
Professor Lindeman

The following three courses on the subject of the English Language are offered in a "modular" format. There are no regular class meetings or formal lectures as such but there is a pool of "independent study" units and a "resource center" where tutorial guidance is available at the hours assigned for the course. An Introductory Handbook which describes the courses in detail is available in the Departmental Office.

***110-252L THE STRUCTURE OF THE ENGLISH LANGUAGE.** (3 credits.) An introduction to the linguistic study of the English Language: includes traditional, structural and transformational generative approaches to sound and syntax.
May 12 – June 20
10:30 a.m. – 12:30 p.m. first meeting
Professor I. Gopnik

***110-253L THE HISTORY OF THE ENGLISH LANGUAGE.** (3 credits; Prerequisite: English 252 or Linguistics 200.) An introduction to both the internal (sound and syntax) and external (socio-cultural) history of English.
May 12 – June 20
10:30 a.m. – 12:30 p.m. first meeting
Professor I. Gopnik

***110-254L THE ENGLISH LANGUAGE AND THE STUDY OF LITERATURE.** (3 credits; Prerequisite: English 252 or Linguistics 200.) The study of linguistic theories of Poetics and the application of linguistic techniques to problems of literary criticism such as stylistics, structural and thematic analysis, metrics, etc.
May 12 – June 20
10:30 a.m. – 12:30 p.m. first meeting
Professor I. Gopnik

**These modular courses may be completed in three or six weeks. Reports of standing will be produced only after June 20.*

110-275L COMMUNICATION, LITERATURE AND SOCIETY I. (3 credits.) Modular course. The aim of the course is to give the student a basic understanding of the communication process and its relationship to society and literature. It deals with communication theory and also introduces the students to various methodologies of communication study.
May 12 – May 30
1:30 p.m. – 3:30 p.m. (May 12, only) flexible times to be arranged at first meeting.
Professor Lafon

110-276L COMMUNICATION, LITERATURE AND SOCIETY II. (3 credits; Prerequisite: 110-275.) Modular course – continuation of 110-275L. The course offers the students the opportunity to pursue individual interests within either the theoretical or practical aspects of communication. The course is given in modular format, i.e. it relies on self-instructing and self-pacing materials such as handbooks, video-tapes, slide-shows, etc. on the topics to be covered.
June 3 – June 20
1:30 p.m. – 3:30 p.m. (June 3, only) flexible times to be arranged at first meeting.
Professor Lafon

110-279C INTRODUCTION TO THE FILM. (6 credits.) An introductory study of the cinema as a medium.
July 2 – August 8
10:30 a.m. – 12:30 p.m. daily
Professor Ohlin

110-379L THE FILM. (6 credits.)
May 12 – June 20
1:00 p.m. – 4:00 p.m. M. and W.
1:30 p.m. – 3:30 p.m. T. & Th.
Professor Wees

110-297L SPECIAL TOPICS OF LITERARY STUDIES: CHILDREN'S LITERATURE. (6 credits.) Study of children's literature in its society and critical context.
May 12 – June 20
1:30 p.m. – 3:30 p.m. daily
Professor Reichertz

110-315L SHAKESPEARE. (6 credits.) A critical and historical study of dramatic works on Shakespeare.
May 12 – June 20
1:30 p.m. – 3:30 p.m. daily
Professor Bristol

110-329L 20TH CENTURY CANADIAN LITERATURE. (6 credits.) Study of 20th Century Canadian prose and poetry.
May 12 – June 20
10:30 a.m. – 12:30 p.m. daily
Professor Conway

110-398C DEPARTMENTAL SEMINAR: LITERARY CRITICISM. (6 credits.) An historical study of the theories of the aesthetics of literature.
July 2 – August 8
10:30 a.m. – 12:30 p.m. daily
Mr. Booth

110-405L THE NINETEENTH CENTURY. (6 credits.) A study of the poetry and prose in England in the 19th Century. Mostly Romantic and Victorian including a study of critical and expository prose.
May 12 – June 20
1:30 p.m. – 3:30 p.m. daily
Professor Cecil

110-431C STUDIES IN DRAMA. (6 credits.) A study of theatrical communication as a formal art by a consideration of the acting process in workshop meetings.
July 2 – August 8
10:30 a.m. – 12:30 p.m. daily
Professor Ripley

110-418L STUDIES IN 20TH CENTURY LITERATURE. (6 credits.) A study of major British and American poetry of the 20th Century.
May 12 – June 20
10:30 a.m. – 12:30 p.m. daily
Professor Ronsley

110-498L DEPARTMENTAL SEMINAR. (6 credits.) Departmental Seminar: The 18th Century. A study of the writings of some of the major and minor poets and prose writers of the period, with some consideration of the intellectual background.
May 12 – June 20
10:30 a.m. – 12:30 p.m. daily
Professor Buitenhuis

FRENCH LANGUAGE AND LITERATURE

126-222L FRANCAIS ÉCRIT. (6 crédits.) Ce cours est destiné aux étudiants qui désirent suivre un cours de composition française.
12 mai – 20 juin
10:30 – 12:30 lundi au vendredi
Madame Benarresh

126-227C INTRODUCTION À LA LITTÉRATURE QUÉBÉCOISE I. (3 crédits.) Ce cours proposera l'étude des oeuvres les plus significatives de la littérature québécoise afin d'arriver à une meilleure compréhension de la société québécoise d'hier et d'aujourd'hui.
2 juillet – 18 juillet
10:30 – 12:30 lundi au vendredi
Monsieur Michon

126-228C INTRODUCTION À LA LITTÉRATURE QUÉBÉCOISE II. (3 crédits; Préalables: 126-227C ou permission du professeur.) Ce cours proposera l'étude des oeuvres les plus marquantes de la littérature québécoise afin d'arriver à une meilleure compréhension de la société québécoise d'hier et d'aujourd'hui.
22 juillet – 8 août
10:30 – 12:30 lundi au vendredi
Monsieur Michon

FRENCH LANGUAGE CENTRE

127-211L ORAL AND WRITTEN FRENCH I. (6 credits; Prerequisite: 127-201D or equivalent beginner's course.) Mainly for students from outside the Province of Quebec with only an elementary knowledge of French. Comprehension, grammar review, vocabulary, discussion and essays on topics chosen and prepared by students. Language laboratory practice. *Admission after interview only.*
May 12 – June 20
8:00 a.m. – 10:00 a.m. daily
Text: Taggart, *Panorama de la Grammaire Française,* Aquila; Gourevitch and Stadler, *Premiers Textes Littéraires,* Ginn.
T.B.A.

127-341L INTERMEDIATE FUNCTIONAL FRENCH. (6 credits; Prerequisite: High School French or equivalent.) Mainly for students who attended High School in the Province of Quebec. Practice in oral French via discussions: use of records, films etc. Systematic study of recurrent language problems. Extra-curricular activities. *Admission after interview and placement test.*
May 12 – June 20
8:00 a.m. – 10:00 a.m. daily
T.B.A.

GERMAN

129-202L GERMAN LANGUAGE, BEGINNERS. (6 credits.) A solid, traditional method. The stress is on oral and written comprehension and expression.
May 12 – June 20
5:00 p.m. – 8:00 p.m. daily
Text: Kessler, H., *Deutsch für Ausländer,* Verlag für Sprachmethoden, 1972. Limited Registration.
Professor Friedli

129-202C GERMAN LANGUAGE, BEGINNERS. (6 credits.) A solid, traditional method. The stress is on oral and written comprehension and expression.
July 2 – August 8
5:00 p.m. – 8:00 p.m. daily
Text: Kessler, H., *Deutsch für Ausländer,* Verlag für Sprachmethoden, 1972. Limited Registration.
Professor Friedli

129-252L GERMAN LANGUAGE, INTERMEDIATE. (6 credits; Prerequisite: 129-202D or permission of Department.) Continuation of 202D. Stress is on oral and written comprehension and expression.

5:00 p.m. – 8:00 p.m. daily
Texts: Schulz-Sundermeyer, *Deutsche Sprachlehre für Ausländer,* Hueber, 1973. Other texts. Limited Registration.
T.B.A.

129-252C GERMAN LANGUAGE, INTERMEDIATE. (6 credits; Prerequisite: 129-202D/R or permission of Department.) Continuation of 202R. Stress is on oral and written comprehension and expression.
July 2 – August 8
5:00 p.m. – 8:00 p.m. daily
Texts: Schulz-Sundermeyer, *Deutsch Sprachlehre für Ausländer,* Hueber, 1973. Other texts. Limited Registration.
T.B.A.

HISTORY

101-202C AN INTRODUCTION TO THE HISTORY OF CANADA. (6 credits.) This course will be a survey of the evolution of Canada, from the pre-Columbian explorations to the end of the Second World War. Social, economic, political, and intellectual developments will all be considered in a general way. Special emphasis will be placed on the themes of French-English relations, regional particularism, Canadian-American relations, and the influence of technology on Canadian society.
July 2 – August 8
1:30 p.m. – 3:30 p.m. daily
T.B.A.

101-241C HISTORY OF THE UNITED STATES. (6 credits.) AWAITING APPROVAL. A survey of the development of the United States of America from the era of European exploration to the present. Emphasis will be placed upon the growth of the English colonies within the British imperial system, the War of Independence, the Constitution, political and economic progress in the nineteenth century, the Civil War, and domestic and international politics since 1900. (This course is not open to candidates who have previously taken History 211A and/or History 221B.)
July 2 – August 8
Hours: T.B.A.
Texts: Blum, John M., ed. *The National Experience,* Harcourt, Brace, Dist. by Longman, 1973; Garraty, John A., ed., *Historical Viewpoints* Harper Paperback, 1971, (2 vols.)
T.B.A.

101-693C FRENCH ENGLISH RELATIONS IN CANADA 1867 TO THE PRESENT. (Full course.) An examination of the interaction of French and English in Canada since confederation emphasizing the growth of distinct national ideologies and with particular attention to conflicts over minority rights, Canada's external relationships and the relations between the Provincial and Dominion governments. (Not open to M.A. students in History.)
July 2 – August 8
4:00 p.m. – 6 p.m. daily
T.B.A.

ISLAMIC STUDIES

397-200L ELEMENTARY ARABIC. (6 credits.)
Please see Faculty of Religious Studies.

ITALIAN LANGUAGE AND LITERATURE

132-230C SURVEY OF ITALIAN LITERATURE. (6 credits; Prerequisite: CEGEP Intermediate Italian or permission of the Department.) Readings from representative works of Italian literature; special emphasis on the nineteenth and twentieth centuries.
July 2 – August 8
6:00 p.m. – 8:00 p.m. daily
Texts: *Dizionario Garzanti della lingua italiana,* Garzanti; di Lampedusa, Tomasi, *Il Gattopardo,* Feltrinelli; Marchese, *Panorama,* La Nuova Italia; Jovine, *Signora Ava,* Einaudi; Rossi, *Idee e realtà del mondo moderno,* Sansoni.
Professor Picone

132-360C SEMINAR ON ITALIAN STYLISTICS AND COMPOSITION. (6 credits; Prerequisite: Permission of the Department.) Intensive practice in stylistics and composition, with special emphasis on literary style. Seminar discussions on exercises and papers submitted by students. Oral dissertations on various subjects, mainly of a literary character, prepared and delivered by students.
July 2 – August 8
6:00 p.m. – 8:00 p.m. daily
Texts: *Dizionario Garzanti della lingua italiana,* Garzanti; Cerutti, *A Guide to Composition in Italian,* Cambridge; Fochi, *L'italiano facile,* Feltrinelli; Rossi, *Idee e realtà del mondo moderno,* Sansoni; De Roberto, *I Viceré,* Garzanti.
Professor Picone

JEWISH STUDIES PROGRAM

The Jewish Studies Program in conjunction with the Jewish Teachers Training Program proposes to offer five three-credit courses during the Summer Session. In each course the emphasis will be placed on textual analysis and the language of instruction will be either Hebrew or Yiddish. Students must be fluent in the language of instruction.

Those who have taken an equivalent course during the academic year may not take the parallel summer course for credit.

No course will be offered with fewer than 15 students. The courses listed below represent only a tentative outline of the program and will be offered only if there is sufficient interest. Therefore interested students should respond immediately and contact Professor E. Orenstein, Chairman of the Jewish Studies Program (392-5884) or Professor S. Epstein, Director of the Jewish Teacher Training Program (392-8257).

135-330C ADVANCED HEBREW. (3 credits; Prerequisites: Permission of Instructor; Fluency in Hebrew.) AWAITING APPROVAL. A study of the Hebrew language for speakers of the language using literary texts and essay assignments.
July 22 – August 8
1:30 p.m. – 3:30 p.m. daily
Professor Levy

135-314C INTRODUCTION TO BIBLICAL TEXTS. (3 credits; Prerequisites: Permission of Instructor; Fluency in Hebrew.) AWAITING APPROVAL. Detailed number of Biblical texts will be carefully examined and analysed.
July 2 – July 18
10:30 a.m. – 12:30 p.m. daily
Professor Kaplan

135-436C TUTORIAL IN HEBREW LITERATURE. (3 credits; Prerequisites: Permission of Instructor; Fluency in Hebrew.) AWAITING APPROVAL. Topic for summer, 1975: *Midrash Agadah.*
July 2 – July 18
1:30 p.m. – 3:30 p.m. daily
Professor Kaplan

135-434C TUTORIAL IN HEBREW LITERATURE. (3 credits; Prerequisites: Permission of Instructor; Fluency in Hebrew.) AWAITING APPROVAL. Topic for summer, 1975: The Prayerbook: Development and Structure.
July 2 – July 18
1:30 p.m. – 3:30 p.m. daily
T.B.A.

135-485C TUTORIAL IN YIDDISH LITERATURE. (3 credits; Prerequisites: Permission of Instructor: Fluency in Yiddish.) AWAITING APPROVAL. Topic for summer, 1975: Selected readings in Yiddish literature.
July 22 – August 8
10:30 a.m. – 12:30 p.m. daily
Professor Tencer

LINGUISTICS

104-200L INTRODUCTION TO THE STUDY OF LANGUAGE I. (3 credits.) A modular course introducing the students to a wide range of issues concerning language.
May 12 – May 30
10:30 a.m. – 12:30 p.m. daily
Texts: Modular Booklets which are available at the McGill Bookstore.
Professor M. Gopnik

104-201L INTRODUCTION TO THE STUDY OF LANGUAGE II. (3 credits.) Introduction to elements of Linguistics (phonology, morphology, syntax) and its connection with other related studies (speech aquisition, aberrations, bilingualism, second language teaching, language and thought, psycholinguistics, etc.)
June 3 – June 20
10:30 a.m. – 12:30 p.m. daily
Text: Fromkin-Rodman, *Introduction to Linguistics,* Holt, Rinehard & Winston, 1974, (paperback).
Professor M. Gopnik

104-350L INTRODUCTION TO GENERAL PHONETICS. (3 credits.) This course is concerned with the study of human speech sounds. Emphasis will be placed on the production and perception of sounds. Detailed description of the speech mechanism will be provided; illustrative material to be drawn from many languages.
May 12 – May 30
10:30 a.m. – 12:30 p.m. daily
Pre-sessional reading: Denes, P. and Pinson, B., *The Speech Chain.*
Text: Ladefoged, P., *Preliminaries to Linguistic Phonetics,* Chicago U. Press, 1971.
Professor Piggott

PHILOSOPHY

107-200C INTRODUCTION TO PHILOSOPHY. (6 credits.) A survey of several important texts drawn from the history of philosophy including selections from Plato, Wittgenstein, Nietzsche and Hume.
July 2 – August 8
10:00 a.m. – 12:00 p.m.
Professor McGilvray

107-335C INTRODUCTION TO THE PHILOSOPHY OF HISTORY. (6 credits.) This course comprises a survey of some of the classical theories of the interpretation of the historical process including those of Vico, Kant, Hegel, Comte, Marx, Mill and Spengler, as well as an examination of recent views concerning historical knowledge and explanation by such writers as Popper, Russell, Walsh, Hempel and Scrivener.
July 2 – August 8
10:30 a.m. – 12:30 p.m. daily
Text: Gardiner, P., *Theories of History,* Free Press, New York.
Professors Robinson and Shea

POLITICAL SCIENCE

157-226C INTRODUCTION À LA VIE POLITIQUE QUÉBÉCOISE. (3 crédits.) Une introduction à la vie politique québécoise à travers l'étude des institutions, des idéologies et des comportements politiques. Une attention particulière sera accordée à la structure et aux changements dans le système politique québécois. Bilingue.
July 2 – July 18
Hours: T.B.A.
T.B.A.

160-211C INTRODUCTION TO COMPARATIVE GOVERNMENT AND POLITICS. (6 credits.) This course will first examine in detail the major features and processes of the political systems of Britain, France and Germany. The course will then move to focus cross nationally on the themes of conflict and consensus in these polities. Reference will also be made to Belgium, Canada and the U.S.A.
July 2 – August 8
Hours: T.B.A.
T.B.A.

160-227L POLITICAL CHANGE IN THE THIRD WORLD. (3 credits; Prerequisite: 1 course in political science.) An introductory course on politics in the Third World, dealing primarily with state and nation-building processes, social movements, political institutions, elites, ideologies, party systems, and the extent and nature of social change. In the 1975 summer session, the focus will be on the new states of Asia. (Students who have taken Political Science 160-322A during the 1974-75 session will not be entitled to take this course.)
May 12 – May 30
6:00 p.m. – 8:00 p.m. daily
Professor Krishna

160-327L THE PRINCIPLES OF PUBLIC ADMINISTRATION. (3 credits.) An outline of the basic concepts employed in public administration will include organizational structure and behaviour, the concept of management and personnel development, the decision-making processes and the problems of change and innovation.
May 12 – May 30
10:30 a.m. – 12:30 p.m. daily
Professor Nef

160-340L POLITICS AND FOREIGN POLICY IN THE ARAB WORLD. (6 credits; Prerequisite: A previous course on the politics of developing countries and/or on the analysis of foreign policy or international systems would be helpful but not required.) AWAITING APPROVAL. The first part of this course will examine the societies, regimes and major political forces in the eastern Arab world (Egypt, Fertile Crescent area, Arabian Peninsula). The second part will examine the foreign policies and behaviour of the Arab states in three areas: Inter-Arab relations, Arab-Israeli relations,

Arab-Great Powers relations. The course will also include a simulation dealing with current foreign policy problems in the Middle East. (Not open to students who have taken Political Science 160-348B.)
May 12 – June 20
5:30 p.m. – 7:30 p.m. daily
Pre-sessional readings: Stephens, R., *Nasser,* Penguin; Kerr, M., *The Arab Cold War,* Oxford, 3rd. Ed.; Rodinson, M., *Israel and the Arabs,* Penguin.
Professor Noble

RUSSIAN AND SLAVIC STUDIES

141-218L SOVIET LITERATURE (UP TO WORLD WAR II). (3 credits.) The social conditions leading to the creation of post-revolutionary literature. What does the West understand by "socialist realism" and what does this term mean in Russia? The period of different literary schools in Soviet literature and the organization of the Writers' Union. Specific features of the literature of the thirties. This course will be conducted in English.
May 12 – May 30
10:30 a.m. – 12:30 p.m. daily
Professor Fodor

141-220L RUSSIAN LANGUAGE. (6 credits; Prerequisite: First level or equivalent.) Intermediate reading, grammar, translation, oral practice.
May 12 – June 20
10:30 a.m. – 12:30 p.m. daily
Text: Dawson, C.L., *Modern Russian Book 2,* Harcourt, Brace and World, Inc.
Professor Pavilanis

SOCIOLOGY

166-354C SOCIAL CHANGE. (6 credits; Prerequisite: introductory course in one of the social sciences.) The process of social change in the modern world. National development within a world-system. The course deals with: 1) the creation of a European world-economy, 1450-1815: commerce, capitalist agriculture, and statism; 2) The capitalist world-system, 1815 to present: industrialism, nationalism and revolution.
July 2 – August 8
7:00 p.m. – 9:00 p.m. daily
Professor Ehrensaft

SPANISH

144-215L ADVANCED ORAL AND WRITTEN EXPRESSION. (3 credits; Prerequisite: one year of Spanish.) Review of grammar; practice in speaking and writing.
May 12 – May 30
10:30 a.m. – 12:30 p.m. daily
Limited Registration.
Professor Vary

144-216L ADVANCED ORAL AND WRITTEN EXPRESSION. (3 credits; Prerequisite: 144-215L or the equivalent of one and a half years of Spanish.) Review of grammar; practice in speaking and writing.
June 3 – June 20
10:30 a.m. – 12:30 p.m. daily
Limited Registration.
Professor Vary

SOCIAL WORK

The following summer courses may be taken by students registered in the BSW degree program in the School of Social Work. Students not registered in the School of Social Work must obtain the instructor's permission in order to register for any of these summer courses. In consultation with their advisors, *current BSW students* may also take non-social work courses, offered during the summer at McGill. Advisors are available at the School of Social Work to assist students to select summer courses.

407-270L INTRODUCTION TO SOCIAL WORK RESEARCH. (3 credits; Prerequisite: an introductory course in statistics.) This is a modular course. It is intended to help students make effective use of published research reports and agency statistics, and to show them how to conduct simple research projects. It covers problem formulation, research design, data collection, analysis and interpretation, use of the computer terminal and report writing.
May 12 – May 30
1:30 p.m. – 3:30 p.m. daily
Texts: 12 modules.
Limited Registration.
Professor Duder

407-352L SOCIAL SERVICES IN CANADA. (3 credits.) Introduction to the structure and operations of the basic public social services in Canada (income, housing, health) and to the social policy issues related to them.
May 12 – June 20
10:30 a.m. – 11:30 a.m. daily
Texts: McGilly, F., *11 Modules specially prepared for the course,* Office of Educational Development, 1974.
Professor McGilly

407-353L INTRODUCTION TO SOCIAL WORK PRACTICE. (6 credits.) Introduction to the principles and practice of social work. Approaches to social problem identification and analysis. The role of the social worker as an agent of change or of social control. Elements of working with individuals, groups and communities. Laboratory periods will permit the application of course content to practice.
May 12 – June 20
9:00 a.m. – 11:00 a.m. daily
Limited Registration.
Professors Dalfen and Katz

407-452L SOCIAL WELFARE ORGANIZATIONS AND DISADVANTAGED CLIENTELE. (3 credits.) Discussion of the ways in which social welfare organizations process clientele drawn from disadvantaged groups relative to clients drawn from more "privileged" groups. Strategies and tactics of organizational change are explored in detail.
June 3 – June 20
10:30 a.m. – 12:30 p.m. daily
Limited Registration.
Professor Deehy

407-480L FIELD INSTRUCTION-SOCIAL WORK. (6 credits.) Supervised educational experience in social work practice integrating practice with theoretical knowledge characteristic of the selected field. Individual and group instruction.
April 21 – June 27
Hours: T.B.A.
T.B.A.

407-482L SEMINAR ON SOCIAL WORK PRACTICE II. (3 credits.) Principles of Social Work Practice in working with individuals, families, small groups and communities. Methods of practice will be analyzed from a range of settings, drawing upon student field experience.
April 21 – June 27
Hours: T.B.A.
Limited Registration.
T.B.A.

Faculty of Science

BIOLOGY

177-274C PRINCIPLES OF GENETICS. (3 credits; Prerequisites: 177-111A and 177-112B.) Theoretical and practical principles of genetics, particularly human genetics, are considered. The gene, the fundamental unit of heredity, will be discussed from various aspects at the introductory level. Subject matter will be taken from the following fields: Molecular, Population and Developmental Genetics and Cytogenetics.
July 2 – July 18
1:30 p.m. – 3:30 p.m. daily
Text: Winchester, A.M., *Genetics: A Survey of the Principles of Heredity,* 4th. Ed., 1972.
Professor De Leon

177-370C GENETICS OF MAN. (3 credits; Prerequisites: 177-274A, B; 177-201D or permission of Instructor.) A contemporary view of the genetic factors determining human characteristics – normal and abnormal. Topics to be considered will include: genetic basis of race, intelligence, mental deficiency, common congenital malformations and protein structure and function; and practical application of genetic knowledge in detecting, treating and preventing genetic disease.
July 22 – August 8
10:30 a.m. – 12:30 p.m. daily
Text: Fraser, F.C. and Nora, J.J., *Genetics of Man,* Lea & Febiger, 1974.
Professor Virgo

CHEMISTRY

180-212L INTRODUCTORY ORGANIC CHEMISTRY I. (4 credits; Prerequisites: 180-110A and 120B or equivalent courses.) A survey of reactions of aliphatic and aromatic compounds including modern concepts of bonding, mechanisms, conformational analysis and stereochemistry.
May 12 – June 6
8:00 a.m. – 10:00 a.m. daily
Text: Morrison and Boyd, *Organic Chemistry,* 3rd Ed., Allyn & Bacon, 1972.
Professors Harpp and Ogilvie

180-213L INTRODUCTORY PHYSICAL CHEMISTRY I. (3 credits; Prerequisites: Chemistry 120B or equivalent plus 1 full course in Calculus.) First law of thermodynamics, enthalpy, thermochemistry, bond energies. Second law of thermodynamics: the entropy and free energy functions. Chemical and thermodynamic equilibrium states. Phase rule. Colligative properties of ideal solutions. Electrochemistry, electrochemical cells. Liquid and Liquid surfaces. Chemical kinetics.
June 3 – June 27
10:30 a.m. – 12:30 p.m. daily
Text: Barrow, G., *Physical Chemistry.*
Professors Galley and Simkin

180-222C INTRODUCTORY ORGANIC CHEMISTRY II. (4 credits; Prerequisite: Chemistry 212A, B, C.) Modern spectroscopic techniques for structure determination. The chemistry of alkyl halides, alcohols, ethers, carbonyl compounds and amines with special attention to mechanistic aspects. Special topics.
July 2 – July 25
8:00 a.m. – 10:00 a.m. daily
Text: Morrison and Boyd, *Organic Chemistry,* 3rd Ed., Allyn & Bacon, 1972.
Professor Farrell

180-281C CHEMISTRY OF THE MAIN GROUP ELEMENTS. (3 credits; Prerequisites: Chemistry 110A and 120B or equivalents.) Modern concepts of atomic structure, chemical bonding and stereochemistry will be reviewed. This will be followed with a survey of selected main group elements and their compounds, with emphasis on trends in physical and chemical properties and molecular geometry. *(Modular course.)*
July 2 – July 18
No formal lectures; first meeting July 2, 1:30 p.m.
Limited Registration
Professor Butler

MACGILL UNIVERSITY LIBRARY

180-301C MODERN INORGANIC CHEMISTRY II. (3 credits; Prerequisites: Chemistry 110A and 120B or equivalent courses.) Modern concepts of metallic bonding and metallic crystals will be reviewed and extended to include descriptions of crystal field theory and molecular orbital theory of coordination compounds. The chemistry of transition metal coordination will be treated in some detail from the viewpoint of structural, chemical and mechanistic behaviour.
July 22 – August 8
10:30 a.m. – 12:30 p.m. daily
Professor Butler

180-311C INTRODUCTION TO RADIOCHEMISTRY. (3 credits; Prerequisites: Chemistry 110A and 120B.) The basic fundamentals of radiochemistry, radio-active decay, counting techniques, radioactive tracer studies, carbon-14 dating and applications.
July 2 – July 18
10:30 a.m. – 12:30 p.m. daily
Professor Hogan

180-666C SPECIAL TOPICS. (full course; Prerequisite: Acceptance in the Graduate School or, in exceptional circumstances only, with permission of Department.) Critical and original studies together with a written essay on various subjects of current interest in chemistry.
July 2 – August 8
No formal lectures; first meeting July 2, 10:30 a.m.
Staff

COMPUTER SCIENCE

308-100L INTRODUCTION TO COMPUTING. (3 credits.) Introduction to computers and the programming language FORTRAN. (Modular course.)
May 12 – May 30
First lecture: 10:30 a.m. – 12:30 p.m.
Text: Introduction to Computing Modules
Professor Toussaint

308-200L INTRODUCTION TO COMPUTER SCIENCE. (3 credits; Prerequisite: 189-202A, B or equivalent.) Number systems, data representation, algorithm design. FORTRAN; computer methods including sorting, searching, solutions of equations, numerical integration and matrix manipulation.
May 12 – May 30
10:30 a.m. – 12:30 p.m. daily
Text: Didday, R.L. and Page, L., *Fortran for Humans,* West, 1974.
Professor Ananthanarayanan

308-210L COMPUTER STRUCTURE AND ASSEMBLY LANGUAGE PROGRAMMING. (3 credits; Prerequisite: 308-200.) Computer structure, machine language, instruction execution address techniques and digital representation of data. Symbolic coding, assembly systems, macros, segmentation and linkage.
June 3 – June 20
10:30 a.m. – 12:30 p.m. daily
Text: IBM, *Principle of Operations,* IBM.
Professor Ratzer

308-230L COMPUTERS IN DATA PROCESSING. (3 credits; Prerequisite: 308-200.) Uses of computers in data processing: COBOL: job control language; system utilities; file processing; comparison of languages in business-oriented applications.
June 3 – June 20
10:30 a.m. – 12:30 p.m. daily
Text: Indahl, L., *Introduction to American National Standard COBOL,* Cummings.
Professor Burrage

GEOGRAPHY

183-308C AIR PHOTO INTERPRETATION. (3 credits; Prerequisites: Geography 201A or previous courses in geography, geology, biology, agriculture or engineering. Related experience or permission of Instructor.) The principles of air photo interpretation and remote sensing. Applications to urban problems, geomorphology, land use and inventory of natural resources. Elementary photogrammetry. Field and Lab work are an integral part of the course.
July 2 – July 18
10:30 a.m. – 12:30 p.m. daily & Lab.
Pre-sessional readings: selected chapters of Strandberg, C., *Aerial Discovery Manual,* Wiley, 1967; Avery, E., *Air Photographic Interpretation,* Burgess.
Text: Strandberg, C., *Aerial Discovery Manual,* Wiley, 1967. Limited Registration.
Professor Drummond

183-310C GEOGRAPHY OF THE CARIBBEAN. (3 credits; Prerequisite: Permission of Instructor.) The nature, perception and management of Caribbean resources will be described and analysed from the point of view of historical factors, cultural diversity, and political organization. Models of economic development and attempts at regional organization will be considered. (modular organization.)
July 2 – July 18
1:30 p.m. – 3:30 p.m. daily
Texts: Modules as specially prepared for the course. Limited Registration.
Professor Hills

183-314C INTERMEDIATE URBAN GEOGRAPHY. (3 credits; Prerequisite: Permission of Instructor.) A review of selected topics related to urban problems and urban policy-making with emphasis on their geographic aspects. Topics include: social justice, provision of public services, public finance, locational conflict, transportation,

and urban renewal. The Montreal Metropolitan area will be examined in some detail.
July 22 – August 8
8:00 a.m. – 10:00 a.m. daily
Professor Barlow

183-315C GEOGRAPHY OF TOURISM. (3 credits; Prerequisite: introductory Geography course or permission of Instructor.) Geographic characteristics of tourist travelling, including changing tourist attractions, touristic mobility, tourist travel components and the modern integrated tourist travel system; tourism and regional economic development, especially in Third World economics.
July 22 – August 8
10:30 a.m. – 12:30 p.m. daily
Professor Lundgren

MATHEMATICS

189-121C CALCULUS II. (3 credits; Prerequisite: 189-120A.) The definite integral. Techniques of antidifferentiation. Applications.
July 2 – July 18
8:00 a.m. – 10:00 a.m. daily
T.B.A.

189-221C ANALYTICAL GEOMETRY AND VECTORS. (3 credits; Prerequisite: 189-121A, B.) Vectors, lines and planes, coordinate systems in three dimensions, inner products, quadric surfaces, vector-valued functions. Applications.
July 2 – July 18
10:30 a.m. – 12:30 p.m. daily
T.B.A.

189-222C CALCULUS III. (3 credits; Prerequisite: 189-221A, B.) Infinite Series. Length, curvature; partial differentiation, multiple integration and applications.
July 22 – August 8
10:30 a.m. – 12:30 p.m. daily
T.B.A.

189-231C MATHEMATICS FOR BIOLOGISTS. (3 credits; Prerequisite: 189-202A, B. Calculus II.) Introductory Probability Theory, vectors and matrices, differential and difference equations with applications to the biological sciences.
July 22 – August 8
1:30 p.m. – 3:30 p.m. daily
T.B.A.

189-245C LINEAR ALGEBRA I. (3 credits.) Simultaneous linear equations. Matrices. Trace and determinant. Quadratic forms. Orthogonal matrices. Characteristic roots and vectors.
July 2 – July 18
1:30 p.m. – 3:30 p.m. daily
T.B.A.

189-315C DIFFERENTIAL EQUATIONS I. (3 credits; Prerequisite: 189-222A, B.) First order ordinary differential equations. Linear equations with constant coefficients. Laplace transform. Series solutions.
July 22 – August 8
8:00 a.m. – 10:00 a.m. daily
T.B.A.

PHYSICS

198-102L ELECTROMAGNETISM. (4 credits; Prerequisite: 198-101A, B; Corequisite: 189-120A, B, C.) This course is designed for Biological Sciences and Premedical students. Electric field and potential. D.C. circuits and measurements. Capacitance. Magnetic field and induction. Semiconductor devices and their application. Feedback and control systems. Electromagnetic waves. This course, together with 198-101A, B satisfies: a) physics requirements for Medical School; b) minimum B.Sc. requirements for post-matriculation physics.
June 3 – June 20
Lectures: 9:00 a.m. – 11:00 a.m. daily
Labs: 11:00 a.m. – 1:00 p.m. daily
Text: Physics 102 notes.
Professor Gurr

198-110C MECHANICS AND ELECTROMAGNETISM. (3 credits; Prerequisites: 198-101A, B and 198-102A, B, C or equivalent.) This course is intended for those students who have completed nine collegial credits of Physics in Health Sciences or the equivalent and now wish to transfer into Physical Science at McGill. It includes the elements of mechanics and electromagnetism treated with the use of calculus.
July 2 – July 25
8:00 a.m. – 10:00 a.m. daily
Text: Weidner and Sells, *Elementary Classical Physics,* Allyn & Bacon.
T.B.A.

198-122C ELECTRICITY AND MAGNETISM. (3 credits; Prerequisites: 198-121A, B and 189-121A, B.) The basic laws of electromagnetism; electrical measurements; direct current circuits.
July 22 – August 8
10:30 a.m. – 12:30 p.m. daily
Five Laboratory periods: T.B.A.
Text: Sears, F.W., *Electricity and Magnetism,* Addison Wesley.
T.B.A.

198-603C PHYSICAL MEASUREMENTS. (full course; Prerequisite: 198-602D.) *A FULL COURSE FOR M. ED. STUDENTS ONLY.* This will be basically a laboratory course interspersed with lectures and seminars. Experimental techniques, instrumentation and data analysis will be stressed in the development and carrying out of experiments specifically oriented towards a High School Program. This will include experiments where the result is unknown to the experimenter.
July 2 – August 8
9:00 a.m. – 12:00 noon daily
Professor Lafleur

PSYCHOLOGY

204-200C INTRODUCTION TO PSYCHOLOGY. (6 credits.) An introductory course which is a prerequisite to other courses in Psychology excluding statistics. It deals with scientific methods as applied to the study of behaviour, perception, intelligence and related topics.
July 2 – August 8
8:00 a.m. – 10:00 a.m. daily
Professor Morgan

204-204C INTRODUCTION TO PSYCHOLOGICAL STATISTICS. (3 credits.) Statistical analysis of psychological data; frequency distributions, graphic representation; measures of central tendency and variability, elementary probability theory; the normal probability curve; simple correlation methods; elementary sampling theory and tests of significance.
July 2 – July 18
8:00 a.m. – 10:00 a.m. daily
Text: Ferguson, G.A., *Statistical Analysis in Psychology and Education,* McGraw-Hill, 1971.
Professor Olson

204-300C MOTIVATION I. (3 credits; Prerequisite: Introductory Psychology.) Basic principles of motivation are developed, based on the behaviour of both animals and humans. Emphasis is on the evolutionary development of behaviour.
July 2 – July 18
8:00 a.m. – 10:00 a.m. daily
Professor White

204-301C LEARNING I. (3 credits; Prerequisite: Introductory Psychology.) The phenomena of learning, emphasizing human learning, from both the theoretical and practical point of view.
July 2 – July 18
8:00 a.m. – 10:00 a.m. daily
Professor Donderi

204-302C PERCEPTION. (3 credits; Prerequisite: Introductory Psychology or equivalent.) The organization of sensory input into a representation of the environment. Topics such as perception and the moving observer, pattern recognition, computers and perception, speech perception, sensory-motor rearrangement.
July 22 – August 8
8:00 a.m. – 10:00 a.m. daily
Professor Donderi

204-303C THINKING. (3 credits; Prerequisite: Introductory Psychology.) An introduction to the study of higher mental processes. Topics such as: development of thought and language, problem solving, concept formation, imagery, artificial intelligence.
July 22 – August 8
10:30 a.m. – 12:30 p.m. daily
T.B.A.

204-304C CHILD PSYCHOLOGY. (6 credits; Prerequisite: Introductory Psychology or equivalent.) A study of current theory and knowledge about psychological processes in children, with particular attention to the development of intelligence, language and social behaviour.
July 2 – August 8
10:30 a.m. – 12:30 p.m. daily
Professor Shultz

204-305C PSYCHOLOGICAL STATISTICS. (3 credits; Prerequisite: Psychology 204-204A, B or C.) An introduction to the design of experiments, analysis of variance and covariance, trend analysis, correlational methods, and nonparametric statistics including the statistics of ranks.
July 22 – August 8
8:00 a.m. – 10:00 a.m. daily
Text: Ferguson, G.A., *Statistical Analysis in Psychology and Education,* McGraw-Hill, 1971.
Professor Ramsay

204-330C INTRODUCTION TO SOCIAL PSYCHOLOGY. (3 credits; Prerequisite: Introductory Psychology.) Introduction to basic concepts and experiments in the area of social attitudes, attitude change, and interpersonal processes.
July 2 – July 18
10:30 a.m. – 12:30 p.m. daily
Professor Aboud

204-332C INTRODUCTION TO PERSONALITY. (3 credits; Prerequisite: Introductory Psychology.) A broad survey of theories of personality. The student is introduced to most of the major theoretical positions.
July 2 – July 18
10:30 a.m. – 12:30 p.m. daily
Professor McCall

204-337C INTRODUCTION TO ABNORMAL PSYCHOLOGY. (3 credits; Prerequisite: Introductory Psychology.) A survey of the genetic physiological and environmental origins of intellectual and emotional disorders.
July 2 – July 18
10:30 a.m. – 12:30 p.m. daily
Professor Sperack

204-338C BEHAVIOUR PROBLEMS. (3 credits; Prerequisites: Psychology 200C and 204-337A or C.) An introduction to psychotic behaviour problems, character disorders, experimental methods of pathology and behaviour modification.
July 22 – August 8
10:30 a.m. – 12:30 p.m. daily
Professor Gutbrodt

204-433C SELECTED TOPICS IN PERSONALITY. (3 credits; Prerequisite: Psychology 204-332A or C.) An intensive study of the behavioural approach to personality. The emphasis is on a functional analysis of personality.
July 22 – August 8
10:30 a.m. – 12:30 p.m. daily
Professor McCall

Faculty of Agriculture

There will be ONE registration day: July 2 from 9:00 a.m. to 5:00 p.m. in the Registrar's Office, Main Building, Macdonald College, Ste. Anne de Bellevue.

The registration procedure is in all ways identical to that outlined in the Registration section of this Announcement. Students from other faculties wishing to attend one or more of the courses offered by the Faculty of Agriculture may register in the Summer Session Office or in Redpath Hall if it is more convenient for them.

Students intending to attend 336-214L (Surveying) may register up to and including April 28, either at Macdonald College (Registrar's Office, Main Building) or at the Summer Session Office (McGill Campus). A non-refundable late fee of $10.00 will be charged on April 29 and 30. No registrations will be accepted after April 30 for that course.

DEPARTMENT OF AGRICULTURAL ENGINEERING

336-214L SURVEYING. (2 credits; Prerequisite: High school or CEGEP Trigonometry.) Use of engineer's tape, level, transit, plane table, hand level, and compass for land measurement, differential levelling, topographic mapping, surveying computations and preparation of plans.
April 28 – May 9
8:00 a.m. – 10:00 a.m. daily
Labs. scheduled throughout the day
Text: Breed, Charles B., *Surveying,* 2nd edition, John Wiley and Sons, Inc.
Professor Broughton

DEPARTMENT OF AGRONOMY

340-350C EXPERIMENTAL METHODS IN AGRONOMY. (2 credits; Prerequisite: CEGEP Science or equivalent.) Techniques of handling agronomic plants for food and feed under experimental conditions in the field, greenhouse and controlled environment rooms. Crop hybridization. Planning and preparing test plots. Establishing, managing, harvesting and processing crop research materials. Recording and analysing data from crop measurements. Preparation of reports.
July 2 – July 12
8:00 a.m. to 9:00 a.m. and 1:00 p.m. to 2:00 p.m.
Labs. T.B.A.
Limited Registration
Professor Klinck and Staff

DEPARTMENT OF BIOLOGY

344-205C PRINCIPLES OF ECOLOGY. (3 credits; Prerequisite: Some background in Biology.) Ecological principles will be discussed at the level of the individual, the population and the community. A Field Laboratory on collecting methods in animal ecology.
July 2 – July 18
10:30 a.m. – 12:30 p.m. daily
Text: Kormondy, E.J., *Concepts of Ecology,* Prentice-Hall, 1969.
Professor Stewart

DEPARTMENT OF HORTICULTURE

358-332C LANDSCAPE ARCHITECTURE. (3 credits.) Description, characteristics, and identification of ornamental plants, nursery practices and care of plant material; brief history of gardens and architecture; landscape design, plans, sketches, drafting, construction specifications, as applied to rural and urban homes, estates, parks and playgrounds, etc.
July 22 – August 8
1:30 p.m. – 3:30 p.m. daily
Limited Registration
Mr. Perron

DEPARTMENT OF RENEWABLE RESOURCES

370-360C RURAL SOCIOLOGY. (3 credits; Prerequisite: An introductory course in Sociology is recommended.) Settlement patterns and their social significance. The major social systems of the rural community. Farms and Farmers. Government policies. Rural life in traditional societies and in urbanized societies.
July 2 – July 18
10:30 a.m. – 12:30 p.m. daily
Professor Chevrier

372-230C THE PHYSICAL ENVIRONMENT. (3 credits.) Description and classification of soils, geomorphology and landscape. The hydrologic cycle, surface drainage, ground water, water quality. Energy balance at the ground surface, evaporation, temperature regimes and micro-climate. Components of the physical environment discussed on the basis of unifying concepts of water balance, heat balance, etc. Lectures and field laboratory work.
July 22 – August 8
8:00 a.m. – 10:00 a.m. daily
Texts: Bruce, J. P., and Clark, R. H., *Introduction to Hydro-Meteorology,* Pergamon (paperback); Rose, C W., *Agriculture Physics;* Bridges, E. M., *World Soils,* Cambridge University Press, 1970.
Professors Mackenzie and Broughton

374-210C METHODS OF ENVIRONMENTAL INTERPRETATION. (3 credits.) For people interested in conducting effective field study trips; organization and operation of studies, class preparation, field methods, basic information and sources, functions of tour guides, utilization of different study areas, special problems and possi-

bilities for follow-up class work. Field work at the Morgan Arboretum and the Gault Estate.
July 22 – August 8
10:30 a.m. – 12:30 p.m. daily
Professor Fillmore

Faculty of Engineering

CHEMICAL ENGINEERING

302-021L CHEMICAL THERMODYNAMICS I. (3 credits; Co-requisite: 189-284 OR Calculus III.) Basic concepts; macroscopic vs. microscopic point of view; properties of a pure substance. Work and heat. First law of thermodynamics and its applications. Second law of thermodynamics and thermodynamic relations. Basic power and refrigeration cycles. Elements of phase and chemical equilibria; the combustion process.
May 12 – June 20
5:00 p.m. – 6:00 p.m. daily
Text: Van Wylen, G.J. and Sonntag, R. E., *Fundamentals of Classical Thermodynamics,* John Wiley & Sons, Inc.
Professor Vera

302-131L FLUID MECHANICS. (4 credits; Prerequisite: 189-286 or equivalent.) Fluid properties; fluid statics; basic concepts and equations of fluid dynamics; Bernoulli's equation; flow measuring devices; dimensional analysis; momentum theorems; pumps; potential flow; drag and boundary layers; flow in pipes, valves and fittings.
May 12 – June 6
6:00 p.m. – 8:00 p.m. daily
Professor Grace

COMPUTER SCIENCE

308-573L MINI-COMPUTER SOFTWARE AND APPLICATIONS. (Half course; Prerequisite: 308-210.) Characteristics of Mini-Computers; their internal structure. Assembler and machine language programming with emphasis on PDP11. Assemblers loaders, and simulators for several machines. Manufactures supplied software including operating systems. Mini-computer applications.
May 12 – May 30
10:30 a.m. – 12:30 p.m.
T.B.A.

MECHANICAL ENGINEERING

305-091L GRAPHICS. (3 credits; Prerequisite: a set of reasonably good quality drafting instruments and elementary knowledge of their use). 1) Descriptive Geometry; 2) Working Drawings and conventions; 3) Graphical Statics; 4) Elementary Computer Graphics.
April 28 – May 9
9:00 a.m. – 12:00 p.m. *and* 2:00 p.m. – 5:00 p.m. daily
Pre-Sessional readings: Chs. 1-7, 10, 18-20, 14-17 of Levens, A.S., *Graphics,* Wiley, 2nd Ed.; Practice freehand sketching and lettering. *Text:* Levens, A.S., *Graphics,* Wiley, 2nd Ed.
Professor Zsombor-Murray

305-161L MEASUREMENT LABORATORY. (2 credits; Co-requisite: knowledge of FORTRAN). Basic experimental laboratory measurements, such as measurement of temperature, pressure, force, torque, small time intervals, velocity, acceleration, flow. Criteria for selection of instruments. Introduction to automatic data acquisition and processing using the DATAC Computer Laboratory, real time programming.
May 12 – May 23
10:30 a.m. – 12:30 p.m. daily + 3 hrs. of Lab in afternoon
Text: Doebelin, E.O., *Measurement Systems Application and Design,* McGraw-Hill, 1966.
Professor Zsombor-Murray

Faculty of Management

272-420C GROUP DYNAMICS AND INTERPERSONAL RELATIONS. (3 credits; Prerequisites: some courses in psychology or business psychology preferred.) Students will explore theory, research, and applications relating to group dynamics in task-oriented groups. Students will increase their level of awareness of group dynamics and their skills at functioning in work groups. Teaching/learning methods will include lecture and discussion, learning cells, skill development exercises (role plays, videotape analysis) and training laboratories (task group development and interpersonal sensitivity).
July 2 – August 14
6:00 p.m. – 9:00 p.m. Monday and Wednesday
Pre-sessional readings: selected readings will be available in the Management Library.
Text: Myers and Myers, *The Dynamic of Human Communication: A Laboratory Approach,* McGraw Hill, 1973.
Professor Burnett

275-453C ADVERTISING MANAGEMENT. (3 credits; Prerequisites: Marketing Management and some experience in behavioural science.) This is an intensive exposure to the strategy and tactics of advertising management from basic concepts to the development of on demand Marketing/Advertising Plan. The program is designed to provide definitive structures to the advertising function and to integrate that structure with the other functional areas of the firm. The course covers both Consumer & Industrial advertising.
July 2 – August 14

6:00 p.m. – 9:00 p.m. Monday and Wednesday
Text: Mandel, M., *Advertising,* Prentice Hall, 2nd Ed., 1974.
Professor Marcus

278-384L BUSINESS LAW. (6 credits.) Law of contract, sale, agency, partnership, company law and negotiable instruments.
May 12 – August 14
6:00 p.m. – 9:00 p.m. Tuesday and Thursday
Text: Smyth and Soberman, *The Law and Business Administration in Canada,* Prentice Hall.
Professor Audet

279-294C INTRODUCTION TO INDUSTRIAL RELATIONS. (3 credits.) An introduction to the problems of labour-management relations, the structure, function and government of labour unions, labour legislation, the collective bargaining process, and the public interest in industrial relations.
July 2 – August 14
6:00 p.m. – 9:00 p.m. Monday and Wednesday
Professor Woods

280-211L ACCOUNTING I. (3 credits.) An introduction to business accounting, considered as an information system serving the decision needs of investors and lenders, and as an aid to management in the planning and control of operators (Management accounting).
May 12 – June 26
6:00 p.m. – 9:00 p.m. Monday and Wednesday
Professor Tabac

280-211C ACCOUNTING I. (3 credits.) An introduction to business accounting, considered as an information system serving the decision needs of investors and lenders, and as an aid to management in the planning and control of operators (Management accounting).
July 2 – August 14
6:00 p.m. – 9:00 p.m. Tuesday and Thursday
Professor Tabac

280-221L SOCIAL PSYCHOLOGY (3 credits.) Methods and theories of analysing individual and small group behaviour. Topics include person perception, social motivation, attitudes, conformity, group structure, group dynamics and leadership phenomena. Experimental approach to social behaviour is emphasized.
May 12 – June 26
6:00 p.m. – 9:00 p.m. Monday and Wednesday
Texts: Freedman, Carlsmith and Sears. *Social Psychology,* 2nd Ed., Prentice Hall, 1974; (plus selected reading).
Professor Kanungo

280-222C ORGANIZATIONAL BEHAVIOUR. (3 credits; Prerequisite: Social Psychology.) The social psychology of organizations, the relationship of man to the organization in which he works, his motivation, attitudes and involvement in his work. Theories of perception, motivation and leadership as they relate to organizational problems.
July 2 – August 14
6:00 p.m. – 9:00 p.m. Monday and Wednesday
T.B.A.

280-271L STATISTICS I. (3 credits; Prerequisite: Calculus I.) Introduction to statistical concepts and methodology, demonstrating their application to management problems, and constituting a foundation for further study in the subject. Includes: descriptive statistics and statistical inference, probability theory, random processes, some important discrete and continuous probability distributions, sampling distributions, decision theory, index numbers.
May 12 – June 26
6:00 p.m. – 9:00 p.m. Tuesday and Thursday
Texts: Parsons, R., *Statistical Analysis: A Decision Making Approach* and *Solutions Manual,* Harper and Row, 1974.
Professor Teitlebaum

280-272C STATISTICS II. (3 credits; Prerequisite: Statistics I.) Decision theory, hypothesis testing and estimation, goodness of fit tests, analysis of variance, sample surveys and experimental design, simple and multiple regression and correlation analysis, time series.
July 2 – August 14
6:00 p.m. – 9:00 p.m. Tuesday and Thursday
Text: Parsons, R., *Statistical Analysis: A Decision Making Approach,* Harper and Row, 1974.
Professor Yalovsky

280-323C ORGANIZATIONAL THEORY. (3 credits; Prerequisites: Social Psychology and Introduction to Organizational behaviour.) The organization as a unit of analysis. Analysis of organizations as distinctive collectivities through an understanding of theories and problems of organization. Contributions of psychology, sociology and economics towards solving organizational problems of adaption, authority and power, conflict resolution, etc.
July 2 – August 14
6:00 p.m. – 9:00 p.m. Tuesday and Thursday
Pre-sessional readings: selected bibliography will be available in the Management Library.
Text: Hampton, Summer and Webber, *Organizational Behaviour and the Practice of Management,* revised Ed., Scott Forseman, 1973.
Professor Burnett

280-331L MANAGEMENT INFORMATION SYSTEMS I. (3 credits.) To provide an introduction to computer systems and program flowcharting. Specific emphasis is placed on developing the ability to program (FORTRAN) and utilise the resources available on the McGill time-sharing system. Problems of implementing computer systems in the organization are discussed.
May 12 – June 26
6:00 p.m. – 9:00 p.m. Tuesday and Thursday

Texts: Sanders, *Computers in Society,* McGraw Hill, 1973; Ratzer, *A FORTRAN COURSE,* McGill.
Mr. Kerklaan

280-341L FINANCE I. (3 credits; Prerequisites: Accounting I and Calculus I.) An introduction to financial management and the role of finance, both within the organization and the economy as a whole. Financial decision-making as it applies to diverse types of organizations. The main topics considered are investment decisions, financing and asset management.
May 12 – June 26
6:00 p.m. – 9:00 p.m. Tuesday and Thursday
Texts: Lusztig and Schwaab, *Managerial Finance in a Canadian Setting,* Holt, Reinhart & Winston, 1973; Robinson and Johnson, *Self-correcting Problems in Finance,* Allyn & Bacon, 2nd Ed., 1970.
Professor Rorke

280-352L MARKETING MANAGEMENT. (3 credits.) This course focuses on the problems of the marketing manager in the measurement of market opportunity and the allocation of marketing effort. Emphasis is placed on analytical techniques based on the behavioural sciences, economics, accounting and management science that can be of use to marketing managers in the development of effective marketing plans.
May 12 – June 26
6:00 p.m. – 9:00 p.m. Monday and Wednesday
Professor Schechter

280-352C MARKETING MANAGEMENT. (3 credits.) This course focuses on the problems of the marketing manager in the measurement of market opportunity and the allocation of marketing effort. Emphasis is placed on analytical techniques based on the behavioural sciences, economics, accounting and management science that can be of use to marketing managers in the development of effective marketing plans.
July 2 – August 14
6:00 p.m. – 9:00 p.m. Tuesday and Thursday
T.B.A.

280-373L OPERATIONS RESEARCH I. (3 credits; Prerequisites: Applied Matrix Algebra or Linear Algebra, Statistics I and Calculus I.) An introduction to applications of mathematical model building and analysis in managerial decision-making, including: mathematical programming (linear programming and network analysis); simple stochastic processes including waiting lines and inventory systems; simulation.
May 12 – June 26
6:00 p.m. – 9:00 p.m. Monday and Wednesday
Professor Goffin

280-393L MANAGERIAL ECONOMICS. (3 credits; Prerequisite: Introduction to Economics.) The course focuses on the application of economic theory to management problems and the economic foundations of marketing, finance and production. Attention is given to the following topics: price and cost analysis, demand and supply analysis.
May 12 – June 26
6:00 p.m. – 9:00 p.m. Tuesday and Thursday
Pre-sessional reading: Chapter 4 on Profits, Spencer, *Managerial Economics,* Irwin.
Text: Spencer, *Managerial Economics,* Irwin.
Professor Gordon

Faculty of Music

MUSIC THEORY

211-110C MELODY AND COUNTERPOINT. (3 credits; Prerequisite: McGill Preparatory Theory Secondary II (grade 9) OR its equivalent.) A study of melody, both as a single line and in combination with other lines, through an analysis of melodies from various eras and cultures, and of two-part counterpoint, especially the styles and techniques of 20th century counterpoint; written exercises in melody and two-part counterpoint will be required.
July 2 – July 18
10:30 a.m. – 12:30 p.m. daily
Limited Registration.
T.B.A.

211-111C ELEMENTARY HARMONY. (3 credits; Prerequisite: 211-110A Melody and Counterpoint OR co-requisite.) This course will cover diatonic chords, harmonic progression, the concept and practice of tonality, simple modulation, seventh chords and secondary dominants; small forms from c. 1700 to the early 19th century will be analyzed; written four-part exercises will be required.
July 22 – August 8
10:30 a.m. – 12:30 p.m. daily
Limited Registration.
T.B.A.

211-224C TONAL THEORY AND ANALYSIS. (6 credits; Prerequisites: 211-110A Melody and Counterpoint AND 211-111B Elementary Harmony OR 211-121D Theory and Analysis OR 211-223D Melody and Counterpoint.) A study of the harmonic materials of the 18th and early 19th century; exercises in four-part harmony; two and elementary three-part tonal counterpoint; analysis of sonata form and other common forms from the period c. 1700-1850; works analyzed will include orchestral and chamber music.
July 2 – August 8
10:30 a.m. – 12:30 p.m. daily
Pre-sessional assignments: Aural familiarity with Mozart, Quintet in C, K. 515; Beethoven, Piano Concerto No. 4 and Symphony No. 9.
Texts: Sessions, *Harmonic Practice;* Morris, *Introduction to Counterpoint.*
Limited Registration.
Professor Jones

211-321C 19TH AND 20TH CENTURY THEORY AND ANALYSIS. (6 credits; Prerequisite: 211-221D Theory and Analysis OR 211-224D Tonal Theory and Analysis OR 213-240D Tonal Composition.) Expanded harmonic studies, including resources of the late nineteenth century, and their relation to structural developments; exploration of various twentieth century techniques, including neo-modality, serialism, polytonality, etc.; analysis of larger forms and complex small forms from the period c. 1850 to the present.
July 2 – August 8
10:30 a.m. – 12:30 p.m. daily
Limited Registration.
Professor Tedman

212-231L EAR TRAINING (FIXED DOH). (4 credits; Prerequisites: 212-131D Ear Training (Fixed Doh) and Pre- OR Co-requisite: 211-224D Tonal Theory & Analysis OR 213-240D Tonal Composition.) Sightsinging of melodies of medium complexity using all clefs; aural analysis of cadence types, simple modulations and form of moderately complex material; melodic, rhythmic, two-part contrapuntal, and harmonic dictation of medium difficulty; introduction to atonal materials.
May 12 – July 4
5:00 p.m. – 6:30 p.m. daily
Texts: Benward, *Workbook in Ear Training;* Berkowitz, Fontrier and Kraft, *A New Approach to Sightsinging.*
Limited Registration.
T.B.A.

212-331L EAR TRAINING (FIXED DOH). (4 credits; Prerequisite: 212-231D Ear Training (Fixed Doh).) Sightsinging of exercises of melodic and rhythmic complexity involving remote modulation; treble, alto, tenor, soprano, and bass clefs will be employed; melodies in mixed clefs; atonal melodies; vocal and instrumental literature of all periods with emphasis on the 20th century; advanced aural analysis; advanced melodic, rhythmic and harmonic dictation.
May 12 – July 4
5:00 p.m. – 6:30 p.m. daily
Texts: Benward, *Workbook in Advanced Ear Training;* Edlund, *Modus Novus.* Limited Registration.
Professor Zuk

213-241C ELECTRONIC MUSIC. (3 credits.) A course for non-composers; introduction to recording techniques, microphones, splicing, wave shapes, mixing, filtering, development techniques, spatial considerations, etc; historical survey of musique concrète and electronic music; analysis and discussion of representative works.
July 2 – July 18
10:30 a.m. – 12:30 p.m. daily
Limited Registration.
Professor Mayr

213-242C ELECTRONIC MUSIC. (3 credits; Prerequisite: 213-241A/C Electronic Music.) A continuation of 213-241C Electronic Music; introduction to modulation techniques, voltage control, synthesizers, live electronics, mixed media, etc; further analysis and discussion of representative works.
July 22 – August 8
10:30 a.m. – 12:30 p.m. daily
Limited Registration.
Professor Mayr

214-215C INTRODUCTION TO THE ART OF MUSIC. (6 credits.) A course designed to acquaint students with the styles, materials, idioms and forms of Western art music; references will be made to traits common in other cultures; a grounding will be provided in elementary theory, and in the characteristics and history of musical stylistic periods.
July 2 – August 8
10:30 a.m. – 12:30 p.m. daily
Texts: Bamberger, Shapiro, J. and Brofsky, H., *The Art of Listening,* 3rd Ed., Harper & Row, 1975 plus set of 7 records, also titled *The Art of Listening;* Karolyi, O., *Introducing Music,* London, Pelican, 1969, paperback; Jacobs, A., *A New Dictionary of Music,* London, Penguin, 1973, paperback.
Professor Marks

Faculty of Religious Studies

260-280L INTRODUCTION TO NEW TESTAMENT GREEK. (6 credits). An introduction to the grammar and syntax of New Testatment Greek. Reading of simple passages from the New Testament.
May 12 – June 20
6:00 p.m. – 8:00 p.m. daily
Texts: Machen, J.G., *New Testament Greek for Beginners,* MacMillan, 1956.
Professor Kirby

260-360L SEXUALITY AND HUMAN VALUES. (3 credits.) AWAITING APPROVAL. A study designed to provide accurate information about human sexuality and to deepen our understanding of it. Changing sex roles and behaviour patterns are considered together with current attitudes, standards and values. Students are encouraged to develop a framework for decision-making in sexual matters. Teachers from other departments will be invited to participate.
May 12 – May 30
2:00 p.m. – 4:00 p.m. daily
Registration will be limited to an equal number of men and women.
Professor Peaston and Staff

260-683L RESEARCH IN HISTORICAL THEOLOGY. (Half course; Prerequisite: B.A. major in Religion of at least second class standing, or the equivalent.) The topic for the 1975 Summer Session will be: The Theology of Dietrich Bonhoeffer. An examination of some of the principal theological writings of Bonhoeffer and an attempt to assess their influence on subsequent theological trends.
May 12 – May 30
6:00 p.m. – 8:00 p.m. daily
Pre-sessional readings: Godsey, J.D., *The Theology of Dietrich Bonhoeffer,* Philadelphia, Westminster Press; Bethge, E., *Dietrich Bonhoeffer: A Biography,* New York, Harper and Row.
Text: Bonhoeffer, D., *Christ The Centre,* New York, Harper and Row, 1966; Bonhoeffer, D., *The Cost of Discipleship,* London, S.C.M., 1971; Bonhoeffer, D., *Letters and Papers from Prison,* New York, MacMillan, 1972.
Professor Jay

ISLAMIC STUDIES

397-200L ELEMENTARY ARABIC. (6 credits; Prerequisite: 1st year Arabic 397-621D). Arabic grammar, syntax and vocabulary. Basic vocabulary building, use of dictionary, reading appointed text.
May 12 – June 20
10:30 a.m. – 12:30 p.m. daily
Text: Kapliwatzsky, *Arabic Language and Grammar,* Vols. III & IV.
Professor Little

Faculty of Education

Bachelor of Education (Elementary Education) for part-time students

Admission requirements:

a) Applicants must hold a teaching certificate valid in the Province of Quebec, or its equivalent.

b) Applicants must have a Quebec Diploma of Collegial Studies standing or its equivalent (i.e. a minimum of 13 years of attested study). Inquiries regarding course selection should be addressed to:

Professor G. W. E. McElroy
B.Ed. Co-ordinator (Part-time students)
McGill University
Faculty of Education
3700 McTavish St.
Montreal, Quebec H3A 1Y2

Candidates wishing to enrol in the B.Ed. program must apply to:

Student Affairs Office
Faculty of Education
McGill University
3700 McTavish St.
Montreal, Quebec H3A 1Y2

411-394C ADMINISTRATION OF EDUCATION IN QUEBEC. (3 credits.) Consideration of the system of education in Quebec. The focus will be, first, on the basic legal framework of education in Quebec and the principal legal documents, and second, on the educational system in interaction with other social systems and with society as a whole.
July 2 – July 18
10:30 a.m. – 12:30 p.m. daily
Professor Townsend

This course is intended for:
1) Extra Provincial Teachers.
2) Anyone Registered in a McGill Teacher Certification Program (Part-Time).

DIPLOMA PROGRAM IN READING INSTRUCTION

Program Director: Professor F. Greene

The Quebec Department of Education grants a Diploma in the teaching of Reading to candidates who have successfully completed the requirements of the program and have teachers' certificates valid in the Province of Quebec. The diploma program is not intended to train clinicians, but rather to aid practising teachers in more effective developmental and corrective teaching of reading.

The program consists of ten 3-credit courses. Full information about the program may be obtained from the Reading Centre, (392-8888).

427-223C READING INSTRUCTION – EARLY CHILDHOOD. (3 credits.) Methods and materials for the teaching of reading in the primary grades.
July 22 – August 8
8:00 a.m. – 10:00 a.m. daily – Section 01
July 22 – August 8
10:30 a.m. – 12:30 p.m. daily – Section 02
Mrs. Pycook

427-233C READING INSTRUCTION – LATER CHILDHOOD. (3 credits.) Methods and materials for the teaching of reading in the intermediate grades.
July 2 – July 18
8:00 a.m. – 10:00 a.m. daily Section 01
July 2 – July 18
10:30 a.m. – 12:30 p.m. daily – Section 02
Professor Whitton

427-523C READING INSTRUCTION – HIGH SCHOOL. (3 credits.) Methods and materials for the teaching of reading in the High School.
July 22 – August 8
8:00 a.m. – 10:00 a.m. daily – Section 01
July 22 – August 8
10:30 a.m. – 12:30 p.m. daily – Section 02
Professor Earle

427-533C INTEGRATED LANGUAGE ARTS. (3 credits.) Methods and materials for integrating reading/writing/speaking aspects of communication instruction.
July 2 – July 18
8:00 a.m. – 10:00 a.m. daily – Section 01
July 2 – July 18
10:30 a.m. – 12:30 p.m. daily – Section 02
T.B.A.

427-344C CHILDREN'S LITERATURE. (3 credits.) Selection and use of literature for the differing abilities and interests of elementary school students.
July 2 – August 8
1:30 p.m. – 3:30 p.m. every second day
Professor Dolan

N.B.: No more than one three week course may be taken at the same time as this one. (The other literature course may be elected in addition.) I.e., a maximum of 6 credits may be taken during each of the two three-week sessions.

427-345C LITERATURE FOR YOUNG ADULTS. (3 credits.) Selection and use of literature for the differing abilities and interests of High School students.
July 3 – August 8
1:30 p.m. – 3:30 p.m. every second day
T.B.A.

N.B.: No more than one three week course may be taken at the same time as this one. (The other literature course may be elected in addition.) I.e., a maximum of 6 credits may be taken during each of the two three-week sessions.

IMPORTANT:

The corrective practicums are limited to candidates who have already completed two reading instruction courses. The two practicums required of the diploma program are done over one summer making a six week session. Because these are practicums rather than courses, they meet for more than the usual number of contact hours and no other courses can be taken during the practicum summer.

For details about sections and locations of the following three Corrective Reading Practicums, please contact the Reading Centre, (392-8888).

IMPORTANT: Students wishing to attend these practicums must obtain permission to register, from the Reading Centre, before May 1, 1975.

427-224C CORRECTIVE READING INSTRUCTION – EARLY CHILDHOOD. (3 credits; Prerequisite: 427-223.) Reading problems at the readiness and basic decoding level presented in a practicum format covering classroom diagnosis and remediation.
July 22 – August 8
9:00 a.m. – 1:00 p.m. daily
Staff

427-234C CORRECTIVE READING INSTRUCTION – LATER CHILDHOOD. (3 credits; Prerequisite: 427-233.) Reading problems beyond the readiness and basic decoding level presented in a practicum format covering classroom diagnosis and remediation.
July 2 – July 18
9:00 a.m. – 1:00 p.m. daily
Staff

427-577C CORRECTIVE READING INSTRUCTION – HIGH SCHOOL. (3 credits; Prerequisite: 427-523.) Reading problems found in remedial reading classes at the high school level presented in a practicum format covering diagnosis and remediation appropriate for remedial classrooms.
July 22 – August 8
9:00 a.m. – 1:00 p.m. daily
Staff

DIPLOMA PROGRAM FOR KINDERGARTEN SPECIALISTS

Chairman: Professor R. Duncan

The Quebec Department of Education grants a Kindergarten Specialist Diploma to candidates who have successfully completed the program and have teachers' certificates valid in the Province of Quebec. The program consists of the courses listed below and additional courses equivalent to six credits. It is recommended that the additional courses be selected from the programs in Special Education or in Reading Instruction.

429-212C MUSIC FOR KINDERGARTEN TEACHERS. (Not offered in 1975.) (3 credits.) Contemporary methods in music education at the kindergarten level; development of musical skills through group and individual practice sessions.

427-328C CREATIVE MOVEMENT AND DRAMATICS. (Not offered in 1975.) (3 credits.) Experiences in creative drama and the dynamics of space; body movement, improvisation, creative problem solving, control and release of emotional energy.

414-214C CHILD DEVELOPMENT. (Not offered in 1975.) (6 credits.) The social, emotional, psychological and intellectual growth and development of the young child; guided observation of children; seminars; reports; individual readings.

426-212C ART FOR KINDERGARTEN TEACHERS. (3 credits.) Exploration of a variety of art media suitable for the kindergarten child; relationships of line, colour and texture; development of manipulative skills and the child's perceptual awareness of his environment.
July 22 – August 8
8:00 a.m. – 10:00 a.m. daily

Text: Lindstrom, Miriam, *Children's Art,* University of California Press, 1970. Limited Registration
Mrs. Foixet-Studham

433-312C METHODS AND MATERIALS FOR THE KINDERGARTEN. (3 credits.) Analysis of the Kindergarten environment with emphasis on equipment and materials, and suggestions for their use.
July 2 – July 18
8:00 a.m. – 10:00 a.m. daily
T.B.A.

427-327C CREATIVE DRAMATICS AND CHILDREN'S LITERATURE. (3 credits; Prerequisite: 427-328 or permission of Instructor.) Experience in characterization, story making, story dramatization; an exploration of the elements of drama and dramatic literature.
July 2 – July 18
10:30 a.m. – 12:30 p.m. daily
Text: Jacobs, Leland, *Literature with Little Children,* Columbia T. College.
Mrs. Russell

414-314C DEVELOPMENTAL TESTING OF YOUNG CHILDREN. (3 credits.) Guided observation of children with emphasis on developmental testing. Lectures, demonstrations and testing practicum.
July 22 – August 8
10:30 a.m. – 12:30 p.m. daily
Professor Lavers

DIPLOMA IN SPECIAL EDUCATION COURSES FOR TEACHERS OF CHILDREN WITH LEARNING DIFFICULTIES

Program Director: Professor A. Wilkinson

The Faculty of Education and the Provincial Department of Education have established a three-summer program leading to a diploma in Special Education for teachers of children with learning difficulties.

Application for admission to this special program must be accompanied by references from school principals or other officials to certify that the applicant possesses the qualifications necessary for this type of teaching. Students not intending to work for the Diploma may take any courses for which they have an appropriate background of training and experience.

Classes begin on July 2; timetables for these courses may be obtained after February 1 from the Special Education Office, Room 504, Education Building, (392-8802).

Candidates for the Diploma should take courses 340, 341, 342, 343, 344, 440, 441, 442, and any two of the remaining courses.

For Diploma students, 340C, 341C, 342C and 343C should be taken in the first summer.

In applying for any of these courses, students should indicate whether they are interested in sections directed toward children below age 12 or above age 12. As far as possible, sections will be organized on this basis.

N.B.: Normal prerequisite for all courses: Teacher Certification.

Courses 414-340C, 341C, 343C, 441C, 442C, 443C, 444C, 445C, and 446C may be taken by students not in the Diploma Program with permission of the Department.

414-340C EDUCATION OF EXCEPTIONAL CHILDREN. (3 credits.) Introduction to the education of exceptional children; characteristics, classification, needs of exceptional children; developmental and corrective programs; areas of current research.
July 22 – August 8
8:00 a.m. – 10:00 a.m. daily – Section 01
8:00 a.m. – 10:00 a.m. daily – Section 02
T.B.A.

4-341C GENERAL METHODS IN SPECIAL EDUCATION. (3 credits.) Class organization, teaching methods, assessments of educational level, setting objectives, grouping, individual programming, and reporting.
July 2 – July 18
8:00 a.m. – 10:00 a.m. daily – Section 01
8:00 a.m. – 10:00 a.m. daily – Section 02
Mrs. Price and Professor Turley

414-342C ORGANIZATION OF SPECIAL EDUCATION PROGRAMS. (3 credits.) Needs of EMR, slow learning, and emotionally disturbed children; characteristics, school programs, evaluation of progress; integration into the community.
July 2 – July 18
10:30 a.m. – 12:30 p.m. daily – Section 01
10:30 a.m. – 12:30 p.m. daily – Section 02
Mrs. Price and Professor Turley

414-343C INTRODUCTION TO DIAGNOSIS AND ASSESSMENT. (3 credits.) Principles and procedures in the evaluation of pupil growth and achievement. Emphasis on the use and interpretation of tests to be given by the class teacher.
July 22 – August 8
10:30 a.m. – 12:30 p.m. daily – Section 01
10:30 a.m. – 12:30 p.m. daily – Section 02
T.B.A. and Professor Pupo

414-344C PRACTICUM IN DIAGNOSIS AND ASSESSMENT OF LEARNING PROBLEMS. (3 credits.) A supervised practicum in the use of various tests and measures in learning problems of children; developing prescriptive teaching programs.
July 2 – July 18
10:30 a.m. – 12:30 p.m. daily – Section 01
8:00 a.m. – 10:00 a.m. daily – Section 02
Professor Doll

414-440C COGNITIVE AND PSYCHOMOTOR PROBLEMS OF EXCEPTIONAL CHILDREN. (3 credits.) Teaching methods appropriate to individual and small group instruction to overcome a variety of learning problems. Emphasis on perceptual difficulties. Concurrent with 414-442C.
July 22 – August 8
8:00 a.m. – 10:00 a.m. daily – Section 01
10:30 a.m. – 12:30 p.m. daily – Section 02
T.B.A.

414-441C BEHAVIOURAL PROBLEMS OF EXCEPTIONAL CHILDREN. (3 credits.) Teaching methods appropriate to the needs of pupils with emotional and behaviour problems. Methods presented will include behaviour modification techniques.
July 22 – August 8
10:30 a.m. – 12:30 p.m. daily – Section 01
8:00 a.m. – 10:00 a.m. daily – Section 02
Professor Mager and T.B.A.

414-442C PSYCHOLOGY OF LEARNING PROBLEMS. (3 credits.) The learning process; personality development; perceptual dysfunction; behaviour disorder and other handicapping conditions related to learning.
July 2 – July 18
8:00 a.m. – 10:00 a.m. daily – Section 01
10:30 a.m. – 12:30 p.m. daily – Section 02
Professor Quinn and T.B.A.

414-443C SCHOOL-HOME-COMMUNITY RELATIONS IN SPECIAL EDUCATION. (3 credits.) Influence of home and community on the child, teacher-parent interviews, reporting, cooperation with hospital clinics, other professionals, etc.
July 2 – July 18
8:00 a.m. – 10:00 a.m. daily – Section 01
July 22 – August 8
8:00 a.m. – 10:00 a.m. daily – Section 02
Professor Little and T.B.A.

414-444C MATERIALS IN SPECIAL EDUCATION. (3 credits.) A critical examination of materials available for special educational programs, commercial and teacher-made materials; the application of A-V techniques to Special Education.
July 22 – August 8
10:30 a.m. – 12:30 p.m. daily
T.B.A.

414-445C VOCATIONAL HABILITATION OF EXCEPTIONAL CHILDREN. (3 credits.) Vocational requirements of non-academic children, vocational preparation as a responsibility of the special class teacher, placement services, follow-up.
July 22 – August 8
8:00 a.m. – 10:00 a.m. daily
Mr. Tisshaw

414-446C SPECIAL TOPICS IN THE EDUCATION OF EXCEPTIONAL CHILDREN. (3 credits.) A seminar or workshop approach to selected topics in the field of Special Education. Examples of possible topics include Language Development, Educable Retarded Adolescents, and Behaviour Modification.

Section 01: Normalization in the Life of the Exceptional Person
July 2 – July 18
10:30 a.m. – 12:30 p.m. daily
Professor Little

Section 02: Disadvantaged Children
July 2 – July 18
8:00 a.m. – 10:00 a.m. daily
Mr. Derevensky

Section 03: Various concepts of Schizophrenia and Educational Intervention
July 2 – July 18
10:30 a.m. – 12:30 p.m. daily
Professor Mager

Section 04: Talented and Gifted Children
July 2 – July 18
8:00 a.m. – 10:00 a.m. daily
Professor Shore

Students may register for only ONE section of this course. Please specify section number on the Authorization Form.

DEPARTMENT OF EDUCATION IN ART

Chairman: Professor E. Jaques

426-209L CERAMICS II. (3 credits; Prerequisite: 426-208A or B; 6B4-303; or permission of Instructor.) Workshop. Exploration of Primitive and Raku processes.
May 12 – May 30
9:00 a.m. – 12:00 noon daily
Limited Registration
Professor Studham

426-209C CERAMICS II. (3 credits; Prerequisite: 426-208A or B; 6B4-303; or permission of Instructor.) Workshop. Exploration of Primitive and Raku processes.
July 22 – August 8
9:00 a.m. – 12:00 noon daily
Limited Registration
Professor Studham

426-205C PAINTING II. (3 credits; Prerequisite: Drawing 426-204 or equivalent.) Investigation of media, tools, techniques primarily through studies of natural forms; the human figure.
July 2 – July 18
9:00 a.m. – 12:00 noon daily
Limited Registration
Professor Watling

426-204L DRAWING. (3 credits.) Development of draughtsmanship; exploration of various forms of graphic expression; various media.
May 12 – May 30
9:00 a.m. – 12:00 noon daily
Limited Registration
Professor Watling

426-398L EARLY CANADIAN ART HISTORY. (3 credits.) Visual environment and expression in early Canada until the Confederation of 1867, as revealed in native and European forms of sculpture, painting, architecture and the applied arts.
May 12 – May 30
8:00 a.m. – 10:00 a.m. daily
Professor Papke

426-296L BASIC DESIGN. (3 credits.) Exploration of the basic elements of visual art, two dimensional composition, and three dimensional constructions. Investigation of materials and tools and the process of manipulating and relating materials.
June 3 – June 20
8:00 a.m. – 10:00 a.m. daily
Limited Registration
Professor Benjamin

426-296C BASIC DESIGN. (3 credits.) Exploration of the basic elements of visual art, two dimensional composition, and three dimensional constructions. Investigation of materials and tools and the process of manipulating and relating materials.
July 2 – July 18
8:00 a.m. – 10:00 a.m. daily
Limited Registration
Professor Benjamin

***426-206L INTRODUCTION TO GRAPHICS.** (3 credits.) An introduction to some graphic techniques; a practical study in the various elementary processes, e.g. lino cuts, wood cuts, monoprints, etc. Workshop.
May 12 – May 30
9:00 a.m. – 12:00 noon daily
Professor White

***426-206C INTRODUCTION TO GRAPHICS.** (3 credits.) An introduction to some graphic techniques; a practical study in the various elementary processes, e.g. lino cuts, wood cuts, monoprints, etc. Workshop.
July 2 – July 18
9:00 a.m. – 12:00 noon daily – Section 01
July 22 – August 8
9:00 a.m. – 12:00 noon daily – Section 02
Professor White

***426-207L GRAPHICS II.** (3 credits; Prerequisite: Introduction to Graphics or permission of the Instructor.) Study in further graphic techniques. These may include line engraving, dry point, relief etching, intaglio and related processes. Workshop.
May 12 – May 30
9:00 a.m. – 12:00 noon daily
Professor White

***426-207C GRAPHICS II.** (3 credits; Prerequisite: Introduction to Graphics or permission of the Instructor.) Study in further graphic techniques. These may include line engraving, dry point, relief etching, intaglio and related processes. Workshop.
July 2 – July 18
9:00 a.m. – 12:00 noon daily – Section 01
July 22 – August 8
9:00 a.m. – 12:00 noon daily – Section 02
Professor White

***426-394L GRAPHICS III.** (3 credits; Prerequisite: Graphics II or permission of the Instructor.) Continuation of studies of graphic techniques. These may include variations of previously learned techniques, silk screen, viscosity printing, multiple plate work, etc. Workshop.
May 12 – May 30
9:00 a.m. – 12:00 noon daily
Professor White

***426-394C GRAPHICS III.** (3 credits; Prerequisite: Graphics II or permission of the Instructor.) Continuation of studies of graphic techniques. These may include variations of previously learned techniques, silk screen, viscosity printing, multiple plate work, etc. Workshop.
July 2 – July 18
9:00 a.m. – 12:00 noon daily – Section 01
July 22 – August 8
9:00 a.m. – 12:00 noon daily – Section 02
Professor White

***426-395L GRAPHICS IV.** (3 credits; Prerequisite: Graphics III or permission of the Instructor.) Advanced studies in various graphic media. The student will be expected to be familiar with standard processes to enable him/her to begin to develop a personal style. Workshop.
May 12 – May 30
9:00 a.m. – 12:00 noon daily
Professor White

***426-395C GRAPHICS IV.** (3 credits; Prerequisite: Graphics III or permission of the Instructor.) Advanced studies in various graphic media. The student will be expected to be familiar with standard processes to enable him/her to begin to develop a personal style. Workshop.
July 2 – July 18
9:00 a.m. – 12:00 noon daily – Section 01
July 22 – August 8
9:00 a.m. – 12:00 noon daily – Section 02
Professor White

***426-494L GRAPHICS V.** (3 credits; Prerequisite: Graphics IV or permission of the Instructor.) An extension of skills learned in Graphics I – IV. Techniques explored may include engraving, silk

screen, relief etching, intaglio, collagraphy, dry point, combinations of printing techniques. The student will be expected to explore those areas which most closely correspond to his particular graphic style.
May 12 – May 20
9:00 a.m. – 12:00 noon daily
Professor White

***426-494C GRAPHICS V.** (3 credits; Prerequisite: Graphics IV or permission of the Instructor.) An extension of skills learned in Graphics I – IV. Techniques explored may include engraving, silk screen, relief etching, intaglio, collagraphy, dry point, combinations of printing techniques. The student will be expected to explore those areas which most closely correspond to his particular graphic style.
July 2 – July 18
9:00 a.m. – 12:00 noon daily – Section 01
July 22 – August 8
9:00 a.m. – 12:00 noon daily – Section 02
Professor White

***426-495L ADVANCED GRAPHICS VI.** (3 credits; Prerequisite: Graphics V or permission of the Instructor.) A further extension of skills learned in Graphics V. The student is expected to have mastered basic graphic skills and be able to work independently. A competent development of personal style, experimentation with, and control over the chosen medium is expected.
May 12 – May 30
9:00 a.m. – 12:00 noon daily
Professor White

***426-495C ADVANCED GRAPHICS VI.** (3 credits; Prerequisite: Graphics V or permission of the Instructor.) A further extension of skills learned in Graphics V. The student is expected to have mastered basic graphic skills and be able to work independently. A competent development of personal style, experimentation with, and control over the chosen medium is expected.
July 2 – July 18
9:00 a.m. – 12:00 noon daily – Section 01
July 22 – August 8
9:00 a.m. – 12:00 noon daily – Section 02
Professor White

*Registration in the combined Graphics courses in each "term" is limited to 12 students.

DEPARTMENT OF CATHOLIC STUDIES
Chairman: Professor T. Francoeur

415-341C RELIGIOUS RESPONSE IN THE ELEMENTARY SCHOOL. (3 credits.) In harmony with the discoveries of developmental religious and moral phases in the life of the elementary child, this course explores developing programs and procedures in the elementary school.
July 2 – July 18
8:00 a.m. – 10:00 a.m. daily
Professor Lawlor

415-397C VARIETIES OF CHRISTIAN WITNESS. (3 credits.) An exploration of divergent paths of Christian witness as exemplified in the lives and writings of Thomas Merton, contemplative-mystic. . . and others as time permits.
July 2 – July 18
10:30 a.m. – 12:30 p.m. daily
Professor Lawlor

415-495C THE EUCHARIST. (3 credits.) The Eucharist is celebration of event and a way of life. Its theology is studied as well as its rich symbolism rooted in the most ancient of man's images, and presented to us in the new reality of Christ. A catechesis of Eucharist will be kept in mind.
July 22 – August 8
10:30 a.m. – 12:30 p.m. daily
Professor Scott

415-392C GUIDING THE RELIGIOUS RESPONSE. (3 credits.) Introduction to the science of the guidance of young people through the slow developmental patterns of grasping life's meaning and of directing their lives in consequence.
July 22 – August 8
8:00 a.m. – 10:00 a.m. daily
Professor Jeffery

DEPARTMENT OF EDUCATION IN ENGLISH
Chairman: Professor M. O'Hara

427-594C CREATIVE DRAMATICS IN THE CLASSROOM. (3 credits.) A participatory course in creative drama and the use of improvisational techniques in the pursuit of child development.
July 2 – July 18
10:30 a.m. – 12:30 p.m. daily
Pre-sessional reading: Way, Brian, *Development Through Drama,* Longmans. *Texts:* Slade, Peter, *Child Drama,* University of London Press, 1959; Hodgson & Richards, *Improvisation,* Methuen, 1966. Limited Registration.
Professor Webb-Hearsey

427-595C IMPROVISATION AND THEATER ARTS FOR THE CLASSROOM. (3 credits.) A participatory course beyond the introductory level of developmental drama. This course provides further perspectives on the teaching of drama, improvisation and performance.
July 2 – July 18
1:30 p.m. – 3:30 p.m. daily
Pre-sessional readings: Way, Brian, *Development Through Drama;* either Piaget, *Play, Dreams and Imitation in Childhood,* or Jung, C.G., *Modern Man in Search of a Soul.*
Texts: Hodgson & Richards, *Improvisation,* Methuen, 1966; Spolin, Viola, *Improvisation for the Theater,* Northwestern University Press, 1963.
Limited Registration
Professor Webb-Hearsey

DEPARTMENT OF EDUCATION IN MATHEMATICS AND SCIENCE
Chairman: Professor O. Purdy

428-241C BACKGROUND MATHEMATICS FOR ELEMENTARY SCHOOL TEACHERS. (3 credits; Prerequisite: Good knowledge of secondary mathematics essential.) A course specially designed for elementary school teachers to provide the basic foundations, insight and understanding of the Quebec modern elementary mathematics program.
July 2 – July 18
10:30 a.m. – 12:30 p.m. daily
Text: Polis, A.R., & Beard, E.M., *Fundamental Mathematics for Elementary Teachers,* Harper & Row, 1973.
Professor Purdy

EDUCATIONAL MEDIA CENTRE
Program Director: Professor R. Pollard

The Media Specialist Diploma Program consists of a sequence of ten credit courses.

The courses are offered by the Faculty of Education, 3700 McTavish St. Courses are offered each summer and also over the winter as evening classes. Upon completion of the program a Province of Quebec diploma is awarded.

The diploma program is intended to train practising teachers in more effective classroom communication and to prepare school or district media specialists and library-resource centre staff.

One of the two following courses is acceptable for credit toward the Diploma in Educational Media:

427-344C CHILDREN'S LITERATURE
427-345C LITERATURE FOR YOUNG ADULTS

Please consult the Diploma Program in Reading Instruction section of this announcement for further information about these two courses.

For more information contact the Director of the Educational Media Centre at 392-8876.

432-204C EDUCATIONAL MEDIA I. (3 credits.) Application of educational media to the elementary and secondary school teaching and learning situation; rational and underlying principles, the sources, selection, production, effective utilization and evaluation of the media.
July 2 – July 18
8:00 a.m. – 10:00 a.m. daily
Limited Registration
Professor A. Pollard

432-205C FILM PRODUCTION AND FILM CRITICISM. (3 credits.) A study of the use of films and film-making in Education. Students will participate in a critical viewing of films of various formats. These include animation, instructional, documentary and experimental films. Concurrently, students will undertake Super 8 film-making assignments related to the categories above.
July 22 – August 8
8:00 a.m. – 10:00 a.m. daily
Extra Charge
Limited Registration
Professor Jones

432-303C PHOTOGRAPHY. (3 credits.) This course includes the basic technical and aesthetic components of black and white and colour 35mm photography. The course will consist of lectures, seminars and extensive fieldwork and darkroom sessions.
July 2 – July 18
10:30 a.m. – 12:30 p.m. daily
Extra Charge
Limited Registration
Professor R. Pollard

432-304C EDUCATIONAL MEDIA II. (3 credits; Prerequisite: 432-204 or experience with media.) This course is intended for the individual with some experience in educational media. Topics include communication theory, implications of learning theory for the media specialist and advanced production techniques.
July 22 – August 8
10:30 a.m. – 12:30 p.m. daily
Extra Charge
Limited Registration
Professor Jones

432-306C EDUCATIONAL TELEVISION. (3 credits.) This course will survey the development of ETV with particular reference to current topics including children's TV programs. Short TV productions will take place in class to encourage a critical analysis of the potential of portable TV equipment for local teacher and student production.
July 2 – July 18
8:00 a.m. – 10:00 a.m. daily
Limited Registration
Professor R. Pollard

432-309C THE LIBRARY – RESOURCE CENTRE. (3 credits.) The developing of a library-resource centre including such topics as administration, acquisitions, processing, circulation routines, budgeting, and methods of integrating the library-resource centre into the school curriculum.
July 2 – July 18
10:30 a.m. – 12:30 p.m. daily
Professor A. Pollard

432-405C INDEPENDENT PROJECT. (6 credits; Prerequisite: Approval of the Director in advance of Summer Session registration.) An extensive media production undertaken by the student after consultation with and the approval of the Director of the Program.
July 2 – August 8
Private meetings at mutually agreeable times
Professor R. Pollard

DEPARTMENT OF EDUCATION IN MUSIC
Chairman: Professor L. E. McDonald

429-201C BASIC MUSICIANSHIP. (3 credits.) Introduction to the elements of music theory through techniques of aural training, sightsinging, keyboard, and written applications to be presented as the classroom teacher should teach such elements of music to elementary school students. Lab work at the keyboard.
July 2 – August 8
10:30 a.m. – 11:30 a.m. daily
Text: Nye, Robert, and Bergethon, Bjornar, *Basic Music: Functional Musician for the Non-Music Major,* 4th edition, Prentice-Hall of Canada, 1973.
Limited Registration
Professor Cook

429-322C MUSIC CURRICULUM AND INSTRUCTION – EARLY CHILDHOOD. (3 credits, Prerequisite: 429-201 preferable.) Understanding of the musical development of children at this level by class participation in listening, singing, playing instruments, creating and moving to music. Materials and methods of planning the above experience.
July 2 – August 8
11:30 a.m. – 12:30 p.m. daily
Text: Gelineau, R. Phyllis, *Songs in Action,* McGraw-Hill, 1974.
Limited Registration
Professor Cook

429-332C MUSIC CURRICULUM AND INSTRUCTION – LATER CHILDHOOD. (3 credits; Prerequisite: 429-201 preferable.) Materials, methods, planning and organizing of musical experiences for later childhood classes through class participation in singing, playing, moving, creating, reading music and listening activities.
July 2 – August 8
1:00 p.m. – 2:00 p.m. daily
Text: Gelineau, R. Phyllis, *Songs in Action,* McGraw-Hill, 1974.
Limited Registration
Professor Cook

DEPARTMENT OF PHYSICAL EDUCATION
Chairman: Dr. R. E. Wilkinson

434-493L ADMINISTRATION OF PHYSICAL EDUCATION. (3 credits.) Organization and administration of programs in Physical Education; emphasis on common problems encountered by Physical Educators in the instructional, intramural and interscholastic areas.
May 12 – May 30
8:00 a.m. – 10:00 a.m. daily
Professor Wilkinson

434-496L PHYSICAL EDUCATION FOR EXCEPTIONAL CHILDREN. (3 credits; Prerequisite: 434-242B or consent of Instructor.) Identification, evaluation and remediation techniques basic to the development of effective Physical Education programs for educably mentally retarded children and children with specific learning disabilities.
May 12 – May 30
10:30 a.m. – 12:30 p.m. daily
Mr. Reid

DEPARTMENT OF EDUCATION IN PSYCHOLOGY AND SOCIOLOGY
Chairman: Professor H. Stutt

414-205C SOCIOLOGY OF EDUCATION – AN OVERVIEW. (3 credits.) Introduction course designed to present students with a broad sociological perspective from which to view education and to provide background for subsequent courses in the sociology of education.
July 2 – July 18
10:30 a.m. – 12:30 p.m. daily
T.B.A.

N.B.: For information on additional Educational Psychology courses please consult the Diploma in Special Education section of this Announcement.

DEPARTMENT OF SOCIAL FOUNDATIONS OF EDUCATION
Chairman: Dr. J. K. Jobling

413-407C EDUCATION AND SOCIETY IN QUEBEC. (3 credits.) A study of the relationship between education and society in Quebec from the 17th century to the present. Such topics as cultural dualism and education, church and education, modernization, are examined.
July 22 – August 8
10:30 a.m. – 12:30 p.m. daily
Mr. Laferriere

DEPARTMENT OF EDUCATION IN SECOND LANGUAGES
Chairman and Program Director: Professor M. Buteau

The following courses will be offered only if a sufficient number of applicants register for them. For information regarding course requirements and timetable, please contact Professor M. Buteau, Faculty of Education, McGill University, 3700 McTavish St., Montreal H3A 1Y2, (392-8863).

***431-303C MEDIA AND SECOND LANGUAGE TEACHING.** (3 credits.) Language laboratory and Audio-Vidual Media: assessment of potentialities and limitations, in the process of second language teaching. Manipulation of equipment; selection, adaptation, and creation of materials. Preparation of group and independent learning units. Practice sessions.

431-304C QUEBEC CULTURAL CONTENT OF SECOND LANGUAGE PROGRAMS. (3 credits.) Introduction to general socio-linguistics. Study of

the local socio-cultural scene; contacts with cultural and educational institutions; preparation of class materials related to the milieu and current events.

431-305C PSYCHOLINGUISTICS AND SECOND LANGUAGE TEACHING. (3 credits.) Exploration of areas in psycholinguistics relevant to second language teaching; theories of language acquisition, relationship between first and second language learning, student motivation and individual differences in second language learning, problems of meaning.

431-306C PHONOLOGY AND TEACHING FRENCH AS A SECOND LANGUAGE. (3 credits.) Study of phonological features that are relevant to audio-lingual approaches for second-language teaching. Training in identifying and analyzing phonological errors. Initiation to phonetic correction techniques.

431-307C ANTICIPATION OF DIFFICULTIES IN SECOND LANGUAGE TEACHING. (3 credits.) Study of findings of error analysis. Nature and sources of linguistic interference in second language learning. Introduction to contrastive linguistics with special application to the lexical and grammatical areas that are within objectives of the different school programs.

431-332C TEACHING FRENCH AS A SECOND LANGUAGE – LATER CHILDHOOD. (3 credits.) Principles of second language teaching. Objectives and Curriculum, teaching techniques and materials. Lesson planning and practice.

431-340C ANIMATION TECHNIQUES FOR SECOND LANGUAGE TEACHING. (3 credits.) Exploration, demonstration of animating procedures and techniques for enlivening second-language learning and for integrating it into the child's general development. Workshops conducted in cooperation with other departments; music, media, art, etc. Practical sessions in communication experience.

431-373C IN-DEPTH STUDY OF CURRICULUM DEVELOPMENT IN SECOND LANGUAGES. (3 credits) Discussion of current issues and trends in Second Language Education. Individual and group research projects.

431-548C TEACHING ENGLISH AS A SECOND LANGUAGE – ELEMENTARY SCHOOL. (6 credits.) Principles of second language teaching and their application to TESL in Quebec elementary schools; survey of various approaches and techniques used in developing relevant second language skills; utilization of related teaching and testing materials; micro-teaching exercises.

431-558C TEACHING ENGLISH AS A SECOND LANGUAGE – SECONDARY SCHOOL. (6 credits.) Descriptive view of ESL situations in Quebec; objectives and curriculum; study of modern English phonology and structure in a second language perspective.

*N.B.: The prerequisites for the above courses are language proficiency and permission of the Instructor.

TEACHERS' CERTIFICATION PROGRAM IN TECHNICAL-VOCATIONAL AND BUSINESS EDUCATION

Program Director: Professor F. Jack Young
July 2 – August 1

Candidates admitted to the Technical-Vocational, Business Education Teachers' Certification program prior to the summer of 1973 will complete the requirements for certification under the conditions for entry established for this program in 1969.

Candidates admitted to the Technical-Vocational, Business Education Teachers' Certification in the summer of 1973 and thereafter will come under the conditions established by the Ministry of Education in PLAN DIRECTEUR.

Admission Requirements (Candidates enrolled prior to Summer 1973).

To continue in this program candidates must:

1. Have successfully completed all phases of the program taken in previous summers.
2. Have evidence of successful teaching during the past school year.
3. Hold a valid Provincial Teaching Authorization.
4. Be under contract to teach Technical-Vocational or Business subjects full-time at the secondary level for the next school year.

Course Requirements (Candidates enrolled prior to Summer 1973)

Having satisfied the prerequisites, the equivalent of 400 hours of course work are needed to meet the requirements for certification.

The maximum course load for one summer is 125 hours, or equivalent, and is normally supplemented by a research project – Course 436-264C – during the Fall/Winter Semester between the second and third summers.

Candidates are reminded that the following courses are *compulsory* and must be taken before the requirements for certification can be met.

436-260C Teaching Methods
436-261C Organization and Administration (Technical students only)
436-271C Organization and Administration (Business students only)
436-205C Introduction to Educational Psychology
436-206C Educational Evaluation
436-202C Development of Education in Quebec
436-264C Research Problems

SUMMER SESSION

After successful completion of three full summers on this Technical-Vocational Business Education program, candidates are entitled to credit for one full year of scolarité.

Admission Requirements (Candidates enrolled Summer 1973 onward) – PLAN DIRECTEUR

Note: No candidate will be admitted to this program until his/her credentials have been evaluated and an acceptance of admission has been given by the University.

To be *admitted* to the Technical-Vocational/ Business Education program (Secondary level) as outlined in PLAN DIRECTEUR, the conditions are:

1. Legal Qualification: Candidates must possess a Provisional Authorization to Teach issued by the Ministry of Education
2. Contract: Candidates must be under contract to teach Technical-Vocational or Business Education subjects full-time at the secondary level for the next school year.

To *continue* in the program the conditions are in addition to numbers 1 and 2 above:

a. have successfully completed all phases of the program taken in previous Summer or Winter Sessions
b. have evidence of successful teaching during the past school year.

Course Requirements (Candidates enrolled in Summer 1973 onward) – PLAN DIRECTEUR

Candidates will follow courses over a period of three summers and two winters to a total of 30 credits.

Candidates currently in the program and those entering for the first time in Summer 1975 will be informed by the Director of the Program of the courses to be taken.

After successful completion of this experimental program as put into operation in July 1973, candidates will receive a Certificate from the University and a Teaching Permit issued by the Ministry of Education. Candidates who successfully complete this 30 credit program are entitled to one full year of scolarité.

Language Requirements

Candidates enrolled in either the old or the new program may be required to prove proficiency in the language of instruction prior to recommendation for certification.

Supplies

Students will be required to pay the actual cost of all materials used in the construction of special projects and other assignments. Such materials will be made available at the summer school.

Texts

Required texts will be on sale during the first week of summer school.

Location of Summer School

Rosemount High School, 3737 Beaubien St. East.

Any inquiries and applications concerning these programs should be directed to: Professor F. Jack Young, Faculty of Education, McGill University, 3700 McTavish Street, Montreal, Quebec H3A 1Y2.

COURSE OFFERINGS

436-264C RESEARCH PROBLEMS IN TECHNICAL-VOCATIONAL EDUCATION. (N.B. – Restricted to students in last year of old program. Directed study). To provide individualized instruction and analysis in a specialized area of technical/ vocational or business education. The student may select a problem which equates to other courses from the standpoint of scholarship, time requirements and utilitarian value, and develop the problem into a practical document.
As directed, 25 or 50 hours.
Staff

436-265C RESEARCH PROBLEMS IN TECHNICAL-VOCATIONAL EDUCATION. (Orientation. Prerequisite to 436-465C.) Preparation for and participation in a work-study program. This course is designed to up-date practising technical/ vocational and business education teachers.
Five hours per day for two weeks
July 2 – July 11
9:00 a.m. – 12 noon and 1:00 p.m. – 3:00 p.m.
Staff

N.B.: With approval of coordinator-limited enrolment. Not open to candidates in first year program.

436-465C RESEARCH PROBLEMS IN TECHNICAL-VOCATIONAL EDUCATION. (Work on Location. Prerequisite: 436-265C.) Preparation for and participation in a work-study program. This course is designed to up-date practising technical/vocational and business education teachers.
Three weeks on location in selected industry
July 14 – August 1
Staff

N.B.: With approval of coordinator-limited enrolment. Not open to candidates in first year program.

436-266C BASIC INTEGRATED STUDY IN TECHNICAL-VOCATIONAL EDUCATION. (8 credits.) An interdisciplinary approach to the theories and practices of teaching and learning in the area of Technical-Vocational Education.
8:30 a.m. – 12:00 noon
12:45 p.m. – 4:00 p.m.
Staff

MCGILL UNIVERSITY LIBRARY

435-253Z SUPERVISED FIELD EXPERIENCE – TECHNICAL-VOCATIONAL – SECONDARY. (4 credits; Not offered in summer 1975). Supervised field courses arranged with the cooperation of regional schools. Under guidance of an assisting teacher, students work in a shop or laboratory, over an extended period of time, teaching at the level and in the subject areas appropriate to their individual programs. In conjunction with this practical experience the faculty provides conferences and seminars in related methodologies as well as individual counselling and post-practicum evaluation.

436-267C DEVELOPMENT OF VOCATIONAL EDUCATION IN QUEBEC. (2 credits). A study of the trends in Vocational Education in Quebec with emphasis on the period since 1945. Consideration will be given to the affects of the Federal and Provincial legislation and Ministry regulations as these relate to Vocational teachers.
Hours: T.B.A.
Staff

436-268C INSTRUCTIONAL TECHNOLOGY IN VOCATIONAL EDUCATION. (6 credits.) An integrated study of introductory concepts of media strategies, communications theory, and research and development in the teaching of vocational subjects. Emphasis will be placed on individual project development in each participating teacher's area of specialization.
Hours: T.B.A.
Staff

436-269Z INSTRUCTIONAL DESIGN IN VOCATIONAL EDUCATION. (3 credits.) (Not offered in Summer 1975). An integrated study of introductory concepts in the development and evaluation of instructional design in Vocational Education. Emphasis will be placed on individual project development in each student's teaching speciality.

436-277C ORIENTATION TO INDUSTRY. (2 credits.) This course is a prerequisite for course 436-278C. It provides a perspective of the participant's role as an observer through seminars and field trips, management of human resources, the internal structure and operation of industry, the rate of technological change, and demands upon personnel will be studied.
5 hours per day. July 2 – July 11
9:00 a.m. – 12:00 noon and 1:00 p.m. – 3:00 p.m.
Staff

436-278C INDUSTRIAL FIELD EXPERIENCE. (6 credits.) Three weeks full-time observation on location in an industry or business. The work situation chosen by an individual should relate to his/her technical, trade or business specialization as currently taught by that person at the secondary school level.
3 weeks on location in selected industry
July 14 – August 1
Staff

436-366C INTRODUCTION TO TECHNOLOGY. (6 credits.) To prepare the Technical-Vocational teacher to teach the Secondary II course – Introduction to Technology. The aim of the course is that the student should become aware of the technological world through manipulation, observation and design of technological objects.

N.B.:
1. Sections and Hours: T.B.A.
2. Enrolment in any section limited to 20 candidates.
3. Open only to certificated Technical-Vocational teachers.

Staff

436-562C TEACHING METHODS IN TECHNICAL EDUCATION. (6 credits.) A course in general teaching principles which will include the teaching and learning process, lesson planning, unit planning, and techniques of instruction specific to business subjects.
Hours: T.B.A.
Staff

436-572C TEACHING METHODS IN BUSINESS EDUCATION. (6 credits.) Methods and techniques of instruction in industrial and commercial education subjects. Classroom management and administration. Lesson planning and use of instructional materials. Individual assignments, demonstrations and reports. Special problems of the teacher. Testing and evaluation.
Hours: T.B.A.
Staff

NOTE: *REGARDING POSSIBLE CHANGES AND ADDITIONS TO VOCATIONAL COURSES*

At the time of going to print revisions and expansion of the Plan Directeur program are under active consideration.

Candidates and potential candidates are advised to check for a supplement to the Calendar giving additional and up-to-date details. Inquiries may also be directed to the Program Director Professor F. Jack Young in writing or by telephone 392-8824/8838.

GRADUATE DEGREES IN EDUCATION

Eligibility

During the Summer Session 1975 (July 2 to August 8) graduate courses in education will be available only to students who have been accepted either to a master's program in education or as a Visiting Student for a graduate course in education.

Visiting Students

Students wishing to take courses at the graduate level in education, but not to work towards a degree in the McGill Faculty of Education, may be considered if they fall into one of the following categories.

1. A graduate student in another McGill Faculty may take a course or courses for credit towards his degree, provided he submits a letter of permission from his Adviser in his home faculty.
2. A graduate student from another university wishing to take a course or courses at McGill for credit at his own university may do so, provided he submits a letter of permission from the Adviser, and in the case of Quebec universities from the Registrar, of his home university.
3. A student who is not working towards a degree, but who wishes to take a course at McGill may do so providing he meets the entrance requirements for the degree and program in which the course he wishes to take is offered. A maximum of two full courses may be taken.

Application Deadlines

Applicants for programs in Counsellor Education and Educational Administration must submit their application forms and supporting documents before March 1. The submission date for all other programs is April 1.

Application forms and further information may be obtained from:

L.B. Birch
Macdonald Professor of Education
Director of Graduate Studies in Education
McGill Faculty of Education
3700 McTavish Street
Montreal, Quebec H3A 1Y2

Course Registration

Students whose applications have been duly approved and are registered with Graduate Faculty for a degree should complete the GRADUATE Summer Session Course Registration form and return it with a **certified** cheque or money order for the full tuition fee to their Program Director NOT LATER THAN JUNE 15. Cheques should be made payable to McGill University.

Personal cheques and postdated cheques will be returned to the students. No provisions have been made for registration in person for graduate students in education, therefore the Registration dates of May 12 and July 2 listed in the Calendar – 1975 Summer Session are not applicable to graduate students in education. Registration for graduate courses should be completed by June 15 and any forms or cheques received after this date will be subject to the procedures for Late Registration.

Students registered for a Master of Education degree in a teaching subject must obtain approval for the courses they wish to take from both the Academic Department and from the Faculty of Education Program Director. Formal course registration must be completed with the Faculty of Education by following the steps outlined above.

A maximum of two full courses or their equivalent may be taken during a Summer Session though in some programs the maximum is one.

Fees

Students taking graduate courses in education and students in the Master of Education degrees in teaching subjects do not pay a Summer Session registration fee, nor a deposit fee, nor a lab fee. Tuition fees are as follows:

Half course	$ 57.00
Full course	$114.00
Monograph	$300.00

General Information

Graduate students in education should consult the front section of this Announcement for information concerning the areas listed below. N.B.: All records for graduate students in education are maintained in the Graduate Studies in Education Office (Room 531). Therefore wherever "Summer Session Office" appears, please substitute "Graduate Studies in Education Office."

Course Descriptions

EDUCATIONAL ADMINISTRATION

411-635C FISCAL ACCOUNTABILITY FOR SCHOOLS. (Half Course. Prerequisite: 411-612 – Principles of Educational Administration). Consideration of the schools' responsibility to the public in maintaining high quality education within the limitations of accountability and organizational framework. Budgeting and evaluation of pupil progress will be studied as the measures of the schools' fulfillment of responsibility.

411-642C. DEVELOPMENT AND ADMINISTRATION OF THE SCHOOL CURRICULUM. (Full Course.) This course deals with the development of the school curriculum at various age levels and in different settings with the organization of the school and the classroom to implement curricular plans. A study will be made of a variety of organizational schemes and of their development and implementation.

411-647C RESOURCE UTILIZATION IN EDUCATION SYSTEMS. (Half Course). An introduction to planning-programming-budgeting systems in education. The historical development, theoretical foundations, mechanics, potentialities and limitations of this approach to resource utilization analysis and planning will be discussed with particular reference to those aspects of alternative approaches employed in a proposal for educational systems.

411-660C COMMUNITY RELATIONS IN EDUCATION. (Half Course.) Development of school-community analytical skills based upon relevant sociological and political concepts and techniques as well as development of skill in establishing and maintaining effective methods of school-community liaison.

SUMMER SESSION

411-663C POLICY-MAKING IN EDUCATION AT THE LOCAL LEVEL. (Half Course. Prerequisite: 411-612 — Principles of Educational Administration). The process and sources of influence involved in the development and implementation of educational policies within the local school district.

411-671C THE PRINCIPALSHIP (Half Course. Prerequisite: 411-612 — Principles of Educational Administration). A study of the principalship from the perspective of role theory. Analysis of theoretical positions and the findings of recent research into the work of a school principal in terms of role conflict. Both theoretical statements and recent research related to the principalship will be considered.

411-673C LEADERSHIP THEORY AND EDUCATIONAL ORGANIZATIONS (Half Course. Prerequisite: 411-612 — Principles of Educational Administration.) A study of past and contemporary notions of leadership. The role of the leader in organizations staffed with professionals. The relationship between leadership and personal and organizational concepts.

411-674C ORGANIZATION THEORY AND EDUCATION (Half Course. Prerequisite: 411-612 — Principles of Educational Administration). A study of contemporary organization theory and the school as an organization. The interplay between structural concepts such as authority, hierarchy and centralization will be considered, along with human behaviour in organizations.

411-683L PRACTICUM IN THE ADMINISTRATION OF INSTRUCTION III (Half Course. Prior approval of professor.) Planned observation of a specific aspect of administration in a school setting. Practices observed will be examined for their implication to educational systems and for feasibility in student's own situation.

***411-685C EDUCATIONAL ADMINISTRATION AS A SOCIAL PROCESS** (Half Course. Prerequisite: 411-612 — Principles of Educational Administration). Inter-relationships of such concepts as participation, consultation, decision-making, leadership, control, co-operation etc., within the administrative process.

**Awaiting approval*

COUNSELLOR EDUCATION

412-602C. PHILOSOPHY OF GUIDANCE. (Half Course.) Philosophical foundations of guidance; history, growth, and recent trends of the guidance movement. Orientation to the field in respect to the functions, scope, organization, and administration of counselling services.

412-603C. THEORIES OF PERSONALITY. (Half Course.) Study and comparison of contemporary theories of personality. Emphasis upon theories having significance for counselling and assessment principles. Recent research in personality theory.

412-604C. DYNAMICS OF GROUP WORK. (Half Course.) Study of group organization, with opportunity to develop skills in group leadership. Interpretation of group interaction and typical roles played by members in groups.

412-605C. INTRODUCTION TO THEORIES IN COUNSELLING. (Half Course.) Correlation and interpretation of counselling data and the study of individual cases. Emphasis on the process in counselling, the counselling relationship, and counselling techniques.

412-611C. INDIVIDUAL TESTING. (Half Course.) This course is intended to make the student familiar with the individual tests in common use and to give him some degree of proficiency in their application. Special emphasis will be placed on the Binet and Wechsler scales. There will be opportunities for diagnostic testing under supervision.

412-620C. ADVANCED CHILD PSYCHOLOGY. (Half Course.) Study of the growing person from birth to pre-adolescence with emphasis on the background and methods as well as research on the principles of child development, disturbances in child development, various areas of development, and characteristics of different age levels.

412-621C. PSYCHOLOGICAL TESTING IN THE ELEMENTARY SCHOOL. (Half Course.) Group testing in the elementary school, including: readiness, reading, diagnostic, intelligence, interest, aptitude, and other tests.

412-622C. TRENDS IN ELEMENTARY SCHOOL COUNSELLING. (Half Course.) Social, psychological, educational, factors in vocational development of elementary school children. Implications of the elementary curriculum for career planning and decision making. Functions, relationships, organization, and administration of guidance in elementary education.

412-625C. PRACTICUM IN ELEMENTARY SCHOOL COUNSELLING. (Half Course; Prerequisite: student in Counsellor Education.) Practice in counselling. Adapting to counselling sessions person to person, educational, occupational and social relationships. Practice with individual cases.

412-626C. PRACTICUM IN ELEMENTARY SCHOOL COUNSELLING. (Half Course; Prerequisite: student in Counsellor Education.) Practices in counselling. Adapting to counselling sessions person to person, educational, occupational and social relationships. Practice with individual cases.

MCGILL UNIVERSITY LIBRARY

412-640C. ADOLESCENT DEVELOPMENT. (Half Course.) Normal development of adolescents through young adulthood. Problems and concerns of adolescence which occur with physical, social and personal developments, in the context of family and school adjustment.

412-641C. PSYCHOLOGICAL TESTING. (Half Course.) Theory and application of group tests appropriate for adolescents and adults. Specific instruments; intelligence, aptitude, interest and personality, analyzed in terms of basic concepts, reliability, validity, and practical utilization.

412-642C. INFORMATION SERVICES IN THE SECONDARY SCHOOL. (Half Course.) Procedures and systems of utilizing and communicating social, educational, and occupational information and materials. Structure of occupations; theories of vocational development.

412-645C PRACTICUM IN SECONDARY SCHOOL COUNSELLING. (Half Course.) Practices in counselling. Adapting to counselling sessions person to person, education, occupational, and social relationships. Practice with individual cases.

412-646C PRACTICUM IN SECONDARY SCHOOL COUNSELLING. (Half Course.) See course description for 412-645C.

412-662C. INFORMATION SERVICES IN STUDENT PERSONNEL WORK. (Half Course.) Procedures and systems of utilizing and communicating social, educational and occupational information and materials. Structure of occupations; theories of vocational development.

412-663C. ORGANIZATION AND ADMINISTRATION OF SCHOOL PERSONNEL SERVICES. (Half Course.) The functions, relationships, organization, and administration of guidance services in the secondary school and student personnel services.

SOCIAL FOUNDATIONS OF EDUCATION

413-617C HISTORICAL FOUNDATIONS OF CONTEMPORARY EDUCATION (Full Course.) A study of contemporary issues in education against an historical background. Some of the questions treated in depth will be the changing relations of church and state in education; the problems of mass education; the evolving concept of the university; the impact of the "second industrial revolution" on the school.

413-627C PHILOSOPHICAL ANALYSIS AND THE PROBLEMS OF EDUCATION (Full Course). An examination of philosophical methods such as logical analysis, linguistic analysis and phenomenology, together with an exploration of their function in the clarification of educational issues.

413-650C COMPARATIVE STUDIES OF EDUCATION IN COMMUNIST COUNTRIES (Full Course.) An examination of the educational system of several eastern European countries in relation to their political and ideological premises, and the social and economic functions which they perform. Although educational developments since World War II are the focus of the course, attention is given to the continuing influence of earlier educational traditions and practices.

EDUCATIONAL PSYCHOLOGY

414-610C. EDUCATIONAL MEASUREMENT. (Half Course. *N.B. Prerequisite* to 414-602D. THE USES OF STATISTICS IN EDUCATIONAL PROCEDURES. These courses may not be taken concurrently.) Statistical measurements in education; graphs, charts, frequency distributions, central tendencies, dispersion, correlation, and sampling errors.

414-614C. SOCIOLOGY OF EDUCATION. (Full Course.) Specific topics in this course differ somewhat from year to year but in general they deal with education in relation to society as a whole, educational organizations related to each other, the socialization process and the place of education in that process, and the social psychology of learning.

414-615C. STUDIES IN EDUCATIONAL PSYCHOLOGY: CHILD DEVELOPMENT AND PERSONALITY. (Full Course.) An analysis of the theoretical and research literature in child and adolescent development with particular attention to theories of personality. Applications to teaching and other aspects of education.

SPECIAL EDUCATION

414-642C. EDUCATION OF EXCEPTIONAL CHILDREN I. (Half Course.)

414-643L EDUCATION OF EXCEPTIONAL CHILDREN II. (Half Course.) Two related and sequential half courses. Introduction to programs and problems of educating handicapped or gifted children.

414-643C. EDUCATION OF EXCEPTIONAL CHILDREN II. (Half Course.) Two related and sequential half courses. Introduction to programs and problems of educating handicapped or gifted children.

414-644C. LEARNING PROBLEMS OF EXCEPTIONAL CHILDREN. (Full Course.) Learning process; relationship of various handicapping conditions to difficulties in learning; developmental and corrective programs.

414-645C. DIAGNOSIS AND ASSESSMENT OF LEARNING PROBLEMS. (Half Course.) Principles and procedures in the education of pupil growth and achievement and in the diagnosis of the causes of poor achievement. Emphasis will be given to the use and interpretation of tests to be given by the class teacher. Reference will be made to the use by the teacher of tests given outside the classroom by guidance counsellors or psychologists.

414-646C. PRACTICUM: DIAGNOSIS AND ASSESSMENT OF LEARNING PROBLEMS. (Half Course.) Practice in the administration and interpretation of individual and group tests; use of other-than-teacher test results; collection and use of other pertinent data.

414-653C. INDIVIDUALIZED CURRICULA AND SPECIAL TEACHING METHODOLOGY. (Half Course.) Methodology and curricula for pupils of different types of exceptionality and at different stages of development; materials; activities, records, grading.

414-654C. PRACTICUM: INDIVIDUALIZED CURRICULA AND SPECIAL TEACHING METHODOLOGY. (Half Course.) An opportunity will be given to develop individual teaching programs for selected exceptional children. Practice will be given in the use of specialized teaching techniques.

†414-656C. CLINIC: REMEDIATION OF SELECTED LEARNING DIFFICULTIES. (Full Course.) Participation as a special education teacher in an interdisciplinary team; planning and carrying out of remedial programs for individual pupils; working with parents of children with learning difficulties.

†414-658C. SEMINAR: REMEDIATION OF SELECTED LEARNING DIFFICULTIES. (Full Course.) Interpretation of observable data and of information obtained from cumulative records; preparation and evaluation of individual and group programs of both a short and long range nature; planning developmental and remedial programs for the clinic, the regular class, and the special class.

TEACHING OF READING

427-666C. DIAGNOSIS AND TREATMENT OF READING DISABILITY I. (Full Course.)

427-667C. DIAGNOSIS AND TREATMENT OF READING DISABILITY II. (Full Course. Two related and sequential full courses which cannot be taken separately; *Prerequisite:* permission of instructor.) Causes, diagnosis and treatment of reading disability including neurological, physiological, psychological and social factors; use of diagnostic instruments, construction of informal diagnostic measures; observation of diagnosis and treatment in schools, clinics and hospitals; supervised individual case studies including diagnosis and treatment.

TEACHING FRENCH AS A SECOND LANGUAGE

Information concerning the courses and the registration procedures for this program may be found in the Ecole Française d'Eté Calendar. Please contact the McGill French Summer School Office.

N.B.: Prior to registering with the Ecole Française d'Eté, Students in the M.Ed. Teaching French as a Second Language must obtain the approval of Dr. Buteau for the courses they are to take and they must also register for these courses in Room 531 of the Faculty of Education building at 3700 McTavish Street.

431-611C TEACHING FRENCH SEMINAR I (Full Course). Theory and practice in the implementation of the teaching of French.

431-618C TEACHING FRENCH MONOGRAPH PREPARATION AND PRESENTATION. (Double course.)

TEACHING BIOLOGY

177-274C PRINCIPLES OF GENETICS (3 credits.) A survey of the gene as the fundamental unit of heredity, with special emphasis on human genetics.

177-370C GENETICS OF MAN (3 credits.) A contemporary view of the genetic factors determining human characteristics, normal and abnormal.

TEACHING PHYSICS

198-603C PHYSICAL MEASUREMENTS. (Full Course for M.Ed. students only.) This will be basically a laboratory course interspersed with lectures and seminars. Experimental techniques, instrumentation and data analysis will be stressed in the development and carrying out of experiments specifically oriented towards a High School Program. This will include experiments where the result is unknown to the experimenter.

†At present courses 414-656C and 414-658C include participation as a junior staff member in the Learning Centre under the direction of Dr. M. S. Rabinovitch of the Department of Psychology of McGill.

MCGILL UNIVERSITY LIBRARY

TEACHING GEOGRAPHY

183-308C AIR PHOTO INTERPRETATION (3 credits.) The principles of air photo interpretation and remote sensing of the environment, applications to geomorphology, land use and inventory of natural resources. Elementary photogrammetry and orthophoto-mapping.

183-310C GEOGRAPHY OF THE CARIBBEAN (3 credits.) The nature, perception and management of Caribbean resources will be described and analysed from the point of view of historical factors, cultural diversity, and political organization. Models of economic development and attempts at regional organization will be considered.

183-314C INTERMEDIATE URBAN GEOGRAPHY (3 credits.) A review of selected topics relating to urban policy making, social justice; provision of public goods; public finance; infrastructure planning and impact studies. An examination of spatial interaction analysis, including gravity and space preference models of passenger and commodity flows, shopping trips and migration flows; planning applications. An introduction to urban environment perception.

183-315C GEOGRAPHY OF TOURISM. (3 credits.) Geographic characteristics of tourist travelling, including changing tourist attractions, touristic mobility, tourist travel components and the modern integrated tourist travel system; tourism and regional economic development, especially in Third World economics.

430-611C TEACHING GEOGRAPHY: SEMINAR I. (Half Course.) An advanced course which examines some contemporary methods in the teaching of geography. These include the use of quantitative methods, deterministic and probabilistic models and gaming.

430-612C TEACHING GEOGRAPHY: SEMINAR II. (Half Course.) See above for description.

PHYSICAL EDUCATION

434-664C PSYCHOLOGY OF MOTOR PERFORMANCE. (Full Course.) Study of the application and analysis of psychological principles and theories to motor learning and performance. Emphasis on selected aspects such as individual differences, transfer, interference, stress, reminiscence and factors affecting motor performance.

TEACHING HISTORY

101-693C FRENCH ENGLISH RELATIONS IN CANADA 1867 TO THE PRESENT. (Full Course.) An examination of the interaction of French and English in Canada since Confederation emphasizing the growth of distinct national ideologies and with particular attention to conflicts over minority rights, Canada's external relationships and the relations between the Provincial and Dominion Governments. (NOT OPEN TO M.A. STUDENTS IN HISTORY.)

430-603C READING COURSE IN HISTORY TEACHING. (Full Course.) Individualized guided study of a topic in the teaching of history selected according to the student's interests and teaching experience.

2 INTRODUCTION

The Centre is located in Strathcona Hall, 772 Sherbrooke St. W., at the corner of McGill College Avenue. The Information Office (Room 101), in Strathcona Hall, is open for general information throughout the year from Monday to Friday 9:00 a.m. to 5:00 p.m. and during term time from Monday to Thursday until 9:00 p.m.

The emphasis in the Centre is upon part time study programs leading to Diplomas and Certificates, although regular day students are enrolled in some courses for degree credit as are part time students who have been accepted by Faculty for credit towards a degree.

This calendar includes all courses that commence in August, September or October and many that commence in January. Supplementary leaflets are available in December describing all courses commencing in January and other leaflets, available on request in April, list courses in May, June and July.

3 GENERAL INFORMATION

REGISTRATION

The following information refers to the Centre as a whole, for specific information please refer to the section.
Registration must be made in person or by proxy during the official registration periods listed below.

MANAGEMENT UNDERGRADUATE

11-14 August 9:00 a.m. to 8:00 p.m.
15 August 9:00 a.m. to 4:30 p.m.

MANAGEMENT GRADUATE

25-28 August	9:00 a.m. to 8:00 p.m.
29 August	9:00 a.m. to 4:30 p.m.

EDUCATION

2-4 September	9:00 a.m. to 8:00 p.m.
5 September	9:00 a.m. to 4:30 p.m.

LANGUAGES
LIBERAL ARTS
COMMUNITY SERVICES
ENGINEERING

15-18 September	9:00 a.m. to 8:00 p.m.
19 September	9:00 a.m. to 4:30 p.m.

JANUARY 1976 REGISTRATION

MANAGEMENT GRADUATE
MANAGEMENT UNDERGRADUATE
EDUCATION

5-8 January	9:00 a.m. to 8:00 p.m.
9 January	9:00 a.m. to 4:30 p.m.

LANGUAGES
LIBERAL ARTS
COMMUNITY SERVICES
ENGINEERING

12-15 January	9:00 a.m. to 8:00 p.m.
16 January	9:00 a.m. to 4:30 p.m.

In no case will telephone applications be accepted or commitments made by telephone for acceptance into a course. A student is registered and accepted into a course only when he has received a student card of admission.

NOTE:

The University reserves the right to restrict registration in any class, to make substitutions or additions to the published list of instructors and to cancel any class for which an insufficient number of registrations has been received.

FEES

The fee as indicated for each course is payable at time of registration. Students accepted by Faculty and registered in a degree program will be charged $19.00 per credit.

Fees in full will be refunded when a course has been cancelled.

PENALTIES

Late Registration	$10.00	(non-refundable)
Refunds	5.00	(see refunds)
Transfers	5.00	(see transfers)
Instalment on fees	5.00	(with special permission)

REFUNDS

To obtain a refund, the Student Card of Admission, library card and any material handed out in class must reach the Centre for Continuing Education before the second lecture in the course is given; this can be done by mail or in person. A refund, less $5.00 per course, will be mailed within six weeks. In limited enrolment courses of twelve or less than twelve lectures, the refund will be pro rata, less the regular charge of $5.00. No refund will be made to a student who registers after the second lecture in a course.

The Centre for Continuing Education is not responsible for any fees paid to an association or institute.

Allowances cannot be made for a change of personal plans including transfer from Montreal or for additional commitments which a student may accept after arranging his course schedule.

TRANSFERS

Students may transfer from one class to another AFTER the first lecture and BEFORE the date of the third class in both courses, provided that registration for the new course is still open. A charge of $5.00 will be made for a transfer from one course to another or from one section of a course to another section. A transfer cannot be made by speaking to the instructor or telephoning the Centre; the student must bring his Student Card of Admission to the Centre.

WITHDRAWALS

Ceasing to attend a class or notifying the lecturer does not constitute a withdrawal, nor can telephone calls be accepted as notification of withdrawal.

A student is held responsible for all courses in which he registers unless he officially withdraws in writing and returns his student card prior to the completion of 50% of the course.

Students who wish to withdraw after the deadline may, under special circumstances, withdraw with permission and will receive a "W" on their record.

In order to conform with the policy for day students, students at the Centre registered in part time degree programs requesting withdrawal from a course and having no record of the course appear on his/her transcript, must do so **no later than six weeks after the start of lectures in that course.**

LIMITED CLASS

The size of a class will be limited in courses where the progress of the student is dependent upon his participation and upon the individual attention he receives from the lecturer. It will also be limited in courses where equipment determines the number of students who can be accommodated. In all such cases, enrolment is on a "first come, first served" basis.

CANCELLATION OF LECTURES

Lectures are cancelled by the Centre in cases of emergency. Cancellations will be announced over the radio whenever possible. In such cases lectures will be made up at a time convenient to the students.

EXAMINATIONS

An examination, optional to students, will be available in the majority of courses. Examinations may be written in English or French. Students will be notified by mail of their results. No examination results will be given by telephone; **they will be posted in Strathcona Hall three to four weeks after the date of the final examination.**

Students who are seeking credit for a Diploma or Certificate who are unable to write the final examination for reasons of health must submit a medical certificate to the Centre. Those who are out of town on business must submit a letter from their firm.

GRADING SYSTEM

The Centre uses the grading system common to the university. Unless otherwise noted in an individual section, grading will be as follows:

Letter Grades — A, B, C, D, F — Fail, P — Pass, J — Absent, K — Incomplete, L — Deferred, W — Withdrew with approval.

Percentage Grades — 80-100 (A), 65-79 (B), 55-64 (C), 45-54 (D), 0-44 (F).

CONVOCATION

A Spring Convocation will be held for students who have successfully completed the following programs of study through the Centre for Continuing Education:

Diploma in Translation; Certificates of Proficiency in English, French, German, Italian, Russian, Spanish, Translation; McGill Certificates in Management; and Diploma of Licentiate in Accountancy.

TRANSCRIPTS

Official transcripts may be obtained upon written request and payment of $2.00 and 25c for each additional transcript provided the order is given at one time.

REREADS

Students wishing to apply for a reread must do so within 30 days following the posting of the final marks. Students may request rereads of final examinations upon payment of $15.00.

NOTICES

Students should consult the Continuing Education notice board in the building in which their classes are held. They also may consult the notice board located in Strathcona Hall.

BOOKSTORE 392-4870

All required textbooks and some of the suggested reference texts may be purchased at the McGill University Bookstore, located in the Bronfman Building, 1001 Sherbrooke St. West.

The following store hours for the convenience of the evening students:

August	25, 26, 27, 28	9:00-8:15 p.m.
August	29	9:00-4:30 p.m.
September	8, 9, 10, 11	9:00-8:15 p.m.
September	12	9:00-4:30 p.m.
September	22, 23, 24, 25	9:00-8:15 p.m.
September	26	9:00-4:30 p.m.

For those students from out of town the bookstore will open Saturday morning 9:00 a.m. to 12:00 September 13 and 27.

CHANGES OF ADDRESS

Students should inform the Centre in writing of any change of address and telephone number after registration. The student's number and course number(s) must be indicated.

RECEIPTS

Official receipts for income tax purposes will be mailed in February of each year to all students. Receipts will be mailed to the address on record and students are urged to inform the Centre in writing of any change in address.

OFFICIAL MAILING ADDRESS

All official correspondence with the Centre should be addressed to the section in which they are registered at the following address:

McGill University, P.O. Box 6070, Station A
Montreal, Quebec, Canada
H3C 3G1

CLASSROOMS

A schedule of rooms and buildings will be handed out to all students at time of registration. A master list will be posted on the notice board in Strathcona Hall and will also be found on the Continuing Education notice boards in all buildings.

On the night of the first lecture, students should consult the notice board of the building in which their course is to be held.

SMOKING

Smoking is strictly forbidden in all classrooms.

Students may smoke in the corridors and are asked to use the containers provided.

UNIVERSITY CENTRE

The University Centre is located at 3480 McTavish Street. Cafeteria and Grillroom services are available to Continuing Education students up to 7 p.m.

PARKING

Parking facilities are limited. Students may park in the garage of the McIntyre Medical Sciences building (entrance on Peel Street) on presentation of their student card and payment of 50 cents for the evening. Those wishing to park on the Campus may do so after 5:00 p.m. on payment of $1.00 for the evening.

SENIOR CITIZENS

Senior citizens will be able to attend courses offered by the Centre upon payment of 20% of the course fee indicated.

Courses having LIMITED registration will only be available to Senior Citizens AFTER the final date of registration when enrolment numbers have been determined. A late registration fee will not be charged in the case of Limited classes.

IT IS THE RESPONSIBILITY OF EACH STUDENT TO READ, UNDERSTAND, AND ABIDE BY THE REGULATIONS AND PROCEDURES PRINTED IN THIS BOOKLET.

4 COMMUNITY SERVICES

Program Co-ordinator
Mrs. Eva St-Pierre
392-4935

INTRODUCTION

Courses offered in this Section of the Calendar come under the headings of Occupational Preparation and Social Work.

LIBRARIES

All students registered in the Community Services Section have full library privileges at McLennan Library upon presentation of their student card of admission.

COURSE INFORMATION

A listing of instructors, textbooks, buildings and room numbers for all courses will be distributed at time of registration. Please ask for a copy.

An evaluation process will be conducted in all courses. Students who do not wish to avail themselves of this opportunity are not obliged to do so.

REGULATIONS AND PROCEDURES

Please see General Information, Section 3.

IT IS THE RESPONSIBILITY OF EACH STUDENT TO READ, UNDERSTAND, AND ABIDE BY THE REGULATIONS AND PROCEDURES PRINTED IN THIS BOOKLET.

OCCUPATIONAL PREPARATION

INTRODUCTION TO DENTAL ASSISTING

640-101Z

DAY:	Tuesdays 7 - 9 p.m.
FEE:	$120.00
DURATION:	25 lectures (50 hours) beginning 23 September
PREREQUISITE:	High School Matriculation

This lecture series is introductory in nature and assumes no experience on the part of the student. Students will be taught chairside assisting; some responsibilities for assisting the dental specialist; home care patient education and the proper handling and care of instruments.

MEDICAL SECRETARIES

640-102Z-61
640-102Z-81

DAY:	Tuesdays 6 - 8 p.m. Thursdays 6 - 8 p.m.
FEE:	$95.00
DURATION:	25 lectures (50 hours) beginning 23 September
PREREQUISITE:	Good command of English, especially written form

First hour — basic anatomy and physiology by a qualified medical practitioner. Second hour — medical office practice with emphasis on medical terminology. Considerable homework required.

LEGAL SECRETARIES

640-103X

DAY:	Tuesdays 6 - 8 p.m.
FEE:	$55.00
DURATION:	12 lectures (24 hours) beginning 23 September
PREREQUISITE:	High School Matriculation

This course is designed to give secretaries working in law offices and those who wish to work in law offices an understanding and appreciation of some of the basic legal concepts and terminology employed in their office; of basic rules of civil procedure and instruction in the drafting and preparation of basic forms of civil and corporate proceedings employed in a law office.

ADVANCED LEGAL SECRETARIES

640-203Y

DAY: Tuesdays 6 - 8 p.m.
FEE: $55.00
DURATION: 12 lectures (24 hours) beginning 20 January
PREREQUISITE: Introductory course or 2 years experience

This course is intended to give Secretaries instruction in the understanding and drafting of more difficult civil and corporate forms and concepts employed in law offices.

UNIT MANAGEMENT

648-301X

DAY: Thursdays 6 - 8 p.m.
FEE: $65.00
DURATION: 13 lectures (26 hours) beginning 25 September
PREREQUISITE: Registered Nurse

This course is planned for those who are now head nurses or who wish to prepare for a position as head nurse. A study of the roles and responsibilities of the head nurse in the provision of care for the hospitalized patient will be undertaken.

SOCIAL WORK

SHORT TERM COUNSELLING METHODS

***646-101X**

DAY: Wednesdays 6 - 8 p.m.
FEE: $60.00
DURATION: 12 lectures (24 hours) beginning 24 September

This course is for counsellors working in the fields of education, industry, social welfare or health. It will focus on concepts of prevention to help people deal with their everyday problems and their changing roles. Based on theories developed by Rogers, Caplan, and Erikson our values, prejudices and attitudes in the helping relationship will be examined.

This course is limited to a maximum of 20 registrations.

FUNCTIONAL FRENCH FOR SOCIAL WORKERS

***646-301X**

DAY: Tuesdays 6 - 8 p.m.
FEE: $60.00
DURATION: 12 lectures (24 hours) beginning 23 September
PREREQUISITE: P.S.W.

The purpose of this course is to facilitate communication between Anglophone social workers and the Francophone community. Instruction will be mainly in the form of discussions on matters pertaining to Social Work practice led by a French speaking social worker.

HOUSING PROBLEMS AND PROGRAMS IN QUEBEC

646-102X

DAY: Thursdays 6 - 8 p.m.
FEE: $60.00
DURATION: 12 lectures (24 hours) beginning 25 September

*Courses marked with an asterisk will be repeated in January.

This course is for social workers, community workers and planners interested in knowing more about housing issues in Quebec and Canada. It will concentrate on housing problems and how these problems have been tackled by government. Emphasis will be placed on housing to special groups, such as the aged, youth, or families as well as special programs such as public housings, cooperatives, and condominiums.

A GENERALIST MODEL OF SOCIAL WORK PRACTICE

646-302X

DAY: Wednesdays 6 - 8 p.m.
FEE: $55.00
DURATION: 10 lectures (20 hours) beginning 24 September
PREREQUISITE: P.S.W.

This course will examine the basic core of helping activities related to social work with individuals, groups and communities. Analytic and interventive skills will be analyzed and a framework developed which endeavours to integrate a variety of social work activities and roles. Emphasis will be on discussion with the instructors providing weekly bibliographies of recent articles and books.

THERAPEUTIC PSYCHODRAMA

Part I

646-401X

DAY: Mondays 6 - 8 p.m.
FEE: $60.00
DURATION: 12 lectures (24 hours) beginning 22 September
PREREQUISITE: Masters degree in one of the Psycho-Social Sciences relevant to the rendering of mental health services.

Part II

646-402Y

DAY: Mondays 6 - 8 p.m.
FEE: $60.00
DURATION: 12 lectures (24 hours) beginning 19 January
PREREQUISITE: Masters degree in one of the Psycho-Social Sciences relevant to the rendering of mental health services.

An operational orientation to psychotherapeutic psychodrama. Teaching includes didactics and practicum class sessions.

NOTE: In order to register in this course, application must be made in advance. For appointment, please call Dr. Surkis. Telephone 937-6011, Local 302.

5 EDUCATION

Professor R. Boulianne
Associate Director
392-4757

INTRODUCTION

The Education Section of the Centre for Continuing Education offers courses on a part-time basis leading to the Bachelor of Education degree for Certified teachers, a Certificate in Second Languages and Diplomas in Educational Media, Reading Instruction and Special Education. Courses for Non-credit are also offered.

These programs meet the Provincial standards in regard to the up-grading of teacher classification (Regulation No. 5). Therefore teachers who register for courses and wish to have them considered for purposes of *scolarité* are advised to apply for admission to one of these programs.

For application forms apply to:

The Student Affairs Office
McGill Faculty of Education
3700 McTavish Street
Montreal, Quebec H3Y 1Y2

PROGRAMS

BACHELOR OF EDUCATION

The Centre for Continuing Education in cooperation with the Faculty of Education offers a program leading to the Bachelor of Education degree for part-time students. Applicants must hold a teaching certificate valid in the Province of Quebec or its equivalent and have completed a minimum of 13 years of study.

Candidates must complete the requirements for the degree within 12 years. The program requires a total of 90 credit hours, 45 in academic courses and 45 in education courses.

The academic course requirements are:

12 credit hours in one teaching subject
9 credit hours in a second teaching subject
3 credit hours in a third teaching subject
3 credit hours in a fourth teaching subject
3 credit hours in a fifth teaching subject
15 credit hours in free electives

The education course requirements are a maximum of 45 credit hours in areas of: Kindergarten, Media-Librarian, Reading Instruction, Special Education or any other courses in Elementary Education which are offered in the evening or summer programs and are not a repetition of courses taken previously.

A transfer of credits may be obtained under the following conditions:

a) Candidates accepted into the program may receive credit for education courses taken previously in the McGill Summer Session or through the Centre for Continuing Education.

b) 30 credit hours may be transferred from another university with the approval of the Department Chairman and the Associate Dean, Extension, Faculty of Education.

Enquiries concerning the program or selection of courses should be addressed to:

Professor Réal Boulianne
Associate Dean, Extension
McGill Faculty of Education
3700 McTavish Street
Montreal, Quebec H3A 1Y2

CERTIFICATE IN SECOND LANGUAGE TEACHING

The Certificate in Second Language Teaching is a 30 credit program offered to certified teachers who are interested in the teaching of English or French as a second language at the elementary level.

For further information contact the Faculty of Education, Department of Education in Second Languages.

Professor M. Buteau — 392-8861 or 392-8863

DIPLOMA PROGRAMS

The Quebec Department of Education upon the recommendation of the Faculty of Education grants the following Diplomas to candidates who successfully complete the required 30 credit program and have teacher certification valid in the Province of Quebec.

Inquiries concerning these programs or the selection of courses in these programs should be directed to the appropriate office in the Faculty of Education.

DIPLOMA IN EDUCATIONAL MEDIA
Professor R. Jones — 392-8876

DIPLOMA IN READING INSTRUCTION
Professor F. Greene — 392-8888

DIPLOMA IN SPECIAL EDUCATION
Professor H. Stutt — 392-8802
Professor A. Wilkinson — 392-8809

INFORMATION

REGULATIONS AND PROCEDURES

It is the responsibility of each student to read, understand, and abide by the regulations and procedures printed in this booklet. Please see General Information, Section 3.

LIBRARIES

Library privileges are available to all students registered in the Education Section of the Centre for Continuing Education in the following Libraries.

1) Education Library
   Faculty of Education
   3700 McTavish Street
2) McLennan Library
   McGill Campus

CURRICULUM LAB

The materials in the Curriculum Lab may be used in the Curriculum Lab but they are not available on a loan basis for evening students.

GRADING SYSTEM

Courses are graded either by letter grades or in percent, with the following correspondences: A (80-100%), B (65-79%), C (55-64%), D (45-54%), F (0-44%). Grades A, B, C are termed satisfactory passes, D is a conditional pass, and F is a failure. For further details see Section 3 of the General Information.

SUPPLEMENTAL EXAMINATIONS

It should be noted that supplemental examinations are not necessarily available in all courses and that in fact no supplemental examinations are offered in Art, Music, Second Languages and Reading. It is therefore the students' responsibility to check with the individual instructors to ascertain whether or not supplementals will be available.

If a student fails a course or obtains a conditional pass (45-54%), he may be permitted to sit a supplemental, repeat the course or substitute another course. It should be emphasized that these privileges are within the discretion of the Committee on Admission, Standing and Promotion. If permission is granted, the student must normally clear the failure or conditional pass within 16 months of terminating the original course.

In order to be eligible to write a supplemental examination, the candidate must apply in writing to the Associate Director and attach an examination fee of $15.00.

FEES

Tuition fees for students who are registered with the Faculty of Education are $19.00 per credit or $57.00 per 3 credit course. This reduced rate is possible because the University receives grants for these students from the Quebec Department of Education.

Penalty fees for Late Registration, Refunds, Transfers and Instalment on Fees are listed in Section 3, General Information and referred to under the heading Course Registration in this Section.

ACADEMIC COURSES

Archaeology

GREEK CIVILIZATION (FROM ITS BEGINNING TO THE PERSIAN WARS) (3 credits)

114-200X

DAY: Mondays 6 - 8 p.m.
BEGINNING: 15 September

GREEK CIVILIZATION (FIFTH CENTURY B.C. AND LATER (3 credits)

114-202Y

DAY: Mondays 6 - 8 p.m.
BEGINNING: 12 January

INTRODUCTION TO GREEK MYTHOLOGY (3 credits)

114-203X

DAY: Wednesdays 6 - 8 p.m.
BEGINNING: 17 September

GREEK DRAMA AND THE THEATRE (3 credits)

114-300Y

DAY: Wednesdays 6 - 8 p.m.
BEGINNING: 14 January

See Section 7 for details of the above courses.

Educational Psychology & Sociology

SOCIOLOGY OF EDUCATION (3 credits)

414-205X

DAY: Wednesdays 6 - 8 p.m.
FEE: $75.00
DURATION: 15 weeks (30 hours)
BEGINNING: 10 September

An introductory course, designed to present students with a broad sociological perspective from which to view education and to provide background for subsequent courses in the sociology of education.

ADOLESCENCE & THE PROCESS OF EDUCATION (3 credits)

414-377Y

DAY: Tuesdays 6 - 8 p.m.
FEE: $75.00

DAY: Tuesdays 7 - 10 p.m.
BEGINNING: 7 October

426-204Y

DAY: Tuesdays 7 - 10 p.m.
BEGINNING: 13 January

DURATION: 10 weeks (30 hours)
FEE: $90.00

Development of sound draughtsmanship; exploration of various forms of graphic expression; various media.

STUDIO ART — PAINTING (3 credits)

426-205X

DAY: Thursdays 7 - 10 p.m.
BEGINNING: 9 October

426-205Y

DAY: Thursdays 7 - 10 p.m.
BEGINNING: 15 January

DURATION: 10 weeks (30 hours)
PREREQUISITE: 426-204
FEE: $90.00

An investigation of media, tools, techniques primarily through studies of natural forms, the human figure.

BASIC DESIGN (3 credits)

426-296X

DAY: Thursdays 7 - 10 p.m.
FEE: $90.00
DURATION: 10 weeks (30 hours)
BEGINNING: 9 October

Exploration of the basic elements of visual art through two dimensional compositions and three dimensional constructions. Investigation of materials and tools and the processes of manipulating and relating materials.

DESIGN II (3 credits)

426-297Y

DAY: Thursdays 7 - 10 p.m.
FEE: $90.00
DURATION: 10 weeks (30 hours)
BEGINNING: 15 January

Further rendering of two and three dimensional compositions (426-296) investigating the potential of basic geometric and organic forms, spatial relationships and environment.

GRAPHICS I (3 credits)

426-206X

DAY: Mondays 7 - 10 p.m.
BEGINNING: 6 October

426-206Y

DAY: Mondays 7 - 10 p.m.
BEGINNING: 12 January

DURATION: 10 weeks (30 hours)
LIMITED ENROLMENT: 12 students
FEE: $90.00

NOTE: The Monday and Tuesday night graphics classes will be held as workshops. Each student will work at his or her own appropriate level and no student will be permitted to register for more than one level at a time. Priority will be given on Monday nights to Graphics I level students, but, numbers permitting, students at other levels may also join this class. Students at any level may join the Tuesday night workshop up to a maximum of 12 students.

An introduction to some graphic media; monoprints; calligraphy, linocuts, woodcuts, etc. A practical study of the various elementary processes. Exhibition of students' work required at the end of the course.

GRAPHICS II (3 credits)

426-207X

DAY: Tuesdays 7 - 10 p.m.
BEGINNING: 7 October

426-207Y

DAY: Tuesdays 7 - 10 p.m.
BEGINNING: 13 January
DURATION: 10 weeks (30 hours)
FEE: $90.00

LIMITED ENROLMENT: Graphics II, III, IV, V, VI will be a combined workshop with a total of 12 students. See 426-206, NOTE.

A study in further graphic media techniques. These may include line engraving, dry point, relief, etching, intaglio, and related processes. Exhibition of students' work required at the end of the course.

GRAPHICS III (3 credits)

426-394X

DAY: Tuesdays 7 - 10 p.m.
BEGINNING: 7 October

426-394Y

DAY: Tuesdays 7 - 10 p.m.
BEGINNING: 13 January
DURATION: 10 weeks (30 hours)
FEE: $90.00

LIMITED ENROLMENT: Graphics II, III, IV, V, VI will be a combined workshop with a total of 12 students. See 426-206, NOTE.

A continuation in studies of graphic techniques. These may include variations on previous learned techniques, silk screen, viscosity, printing, multiple plate work, etc. Exhibition at the end of the course is required.

GRAPHICS IV (3 credits)

426-395X

DAY: Tuesdays 7 - 10 p.m.
BEGINNING: 7 October

426-395Y

DAY: Tuesdays 7 - 10 p.m.
BEGINNING: 13 January
DURATION: 10 weeks (30 hours)
FEE: $90.00

LIMITED ENROLMENT: Graphics II, III, IV, V, VI will be a combined workshop with a total of 12 students. See 426-206, NOTE.

A more advanced study of various graphic media. The student will be expected to be familiar with the standard processes studied in the preceding courses. At this stage the student should begin to concentrate on developing a personal style, incorporating the necessary techniques to make his personal statement.

GRAPHICS V (3 credits)

426-494X

DAY: Tuesdays 7 - 10 p.m.
BEGINNING: 7 October

426-494Y

DAY: Tuesdays 7 - 10 p.m.
BEGINNING: 13 January
DURATION: 10 weeks (30 hours)
FEE: $90.00

LIMITED ENROLMENT: Graphics II, III, IV, V, VI will be a combined workshop with a total of 12 students. See 426-206, NOTE.

An extension of skills learned in Graphics I-IV. Techniques explored may be engraving, silk screen, relief, intaglio, collography, dry point, combination printing. The student will be expected to explore those areas which most closely correspond to his particular graphics style. An exhibition of students' work is required at the end of the course.

GRAPHICS VI (3 credits)

426-495X

DAY: Tuesdays 7 - 10 p.m.
BEGINNING: 7 October

426-495Y

DAY: Tuesdays 7 - 10 p.m.
BEGINNING: 13 January
DURATION: 10 weeks (30 hours)
FEE: $90.00

LIMITED ENROLMENT: Graphics II, III, IV, V, VI will be a combined workshop with a total of 12 students. See 426-206, NOTE.

A further extension of skills learned in Graphics I-V. The student is expected to have mastered basic graphic skills and be able to work independently. A competent development of personal style experimentation with, and control over the chosen medium is expected.

INTRODUCTION TO CERAMICS (3 credits)

426-208X
DAY: Tuesdays 7 - 10 p.m.
BEGINNING: 7 October

426-208Y
DAY: Tuesdays 7 - 10 p.m.
BEGINNING: 13 January

DURATION: 10 weeks (30 hours)
FEE: $95.00
LIMITED ENROLMENT: 12 students

A consciousness of the medium is developed through basic ceramic processes; hand building experiences and introduction to wheel thrown constructions.

CERAMICS II (3 credits)

426-209X
DAY: Thursdays 7 - 10 p.m.
BEGINNING: 9 October

426-209Y
DAY: Thursdays 7 - 10 p.m.
BEGINNING: 15 January

DURATION: 10 weeks (30 hours)
FEE: $95.00
PREREQUISITE: 426-208
LIMITED ENROLMENT: Ceramics II-IV will be a combined workshop with a total of 12 students.

A continuation and concentration of wheel projects. Elementary clay and glaze preparations.

CERAMICS III (3 credits)

426-300X
DAY: Thursdays 7 - 10 p.m.
BEGINNING: 9 October

426-300Y
DAY: Thursdays 7 - 10 p.m.
BEGINNING: 15 January

DURATION: 10 weeks (30 hours)
FEE: $95.00
PREREQUISITE: 426-209
LIMITED ENROLMENT: Ceramics II-IV will be a combined workshop with a total of 12 students.

Chemistry of glazes, formation of slips, engobes and glaze. Firing and maintenance of kiln and equipment.

CERAMICS IV (3 credits)

426-309X
DAY: Thursdays 7 - 10 p.m.
BEGINNING: 9 October

426-309Y
DAY: Thursdays 7 - 10 p.m.
BEGINNING: 15 January

DURATION: 10 weeks (30 hours)
FEE: $95.00
PREREQUISITE: 426-300
LIMITED ENROLMENT: Ceramics II-IV will be a combined workshop with a total of 12 students.

Chemistry of glazes. Emphasis placed on lab work. Firing and maintenance of kiln and equipment.

BASIC ART MEDIA (3 credits)

426-241X

DAY: Wednesdays 7 - 10 p.m.
BEGINNING: 8 October

426-241Y

DAY: Wednesdays 7 - 10 p.m.
BEGINNING: 14 January

DURATION: 10 weeks (30 hours)
FEE: $90.00

A course designed for the classroom teacher to develop sensitivity to visual design. A program of experimentation in a variety of art media suitable for application to art in the classrooms of elementary schools.

Education in English

CHILDREN'S LITERATURE (3 credits)

427-344Y

DAY: Thursdays 6 - 8 p.m.
FEE: $75.00
DURATION: 15 weeks (30 hours)
BEGINNING: 15 January

Selection and use of literature suitable for children in the elementary school.

LITERATURE FOR YOUNG ADULTS (3 credits)

427-345X

DAY: Thursdays 6 - 8 p.m.
FEE: $75.00
DURATION: 15 weeks (30 hours)
BEGINNING: 11 September

A study of the strategies of developing reading habits and tastes among high school students. The selection of works in a variety of genres suitable to different abilities and interests will be discussed.

CREATIVE DRAMATICS FOR THE CLASSROOM (3 credits)

427-594X

DAY: Wednesdays 6 - 8 p.m.
FEE: $75.00
DURATION: 15 weeks (30 hours)
BEGINNING: 10 September

A course in Creative Drama and in the use of Improvisional Techniques in the pursuit of child development. Theories of creative drama will be considered, but the emphasis will be on practical activities and exercise.

IMPROVISATION AND THEATRE ARTS FOR THE CLASSROOM (3 credits)

427-595Y

DAY: Wednesdays 6 - 8 p.m.
FEE: $75.00
DURATION: 15 weeks (30 hours)
BEGINNING: 14 January

A course beyond the introduction level to provide further perspectives on the teaching of drama and the techniques of improvisation. Instruction and practice in play production will be included.

Education in Mathematics and the Sciences

BACKGROUND MATHEMATICS FOR ELEMENTARY SCHOOL TEACHERS (3 credits)

428-241X

DAY: Tuesdays 6 - 8 p.m.
FEE: $75.00
DURATION: 15 weeks (30 hours)
BEGINNING: 9 September

A course specially designed for elementary school teachers to provide the basic foundations, insight and understanding of the Quebec modern elementary mathematics program. Recommended for all elementary school teachers.

Education in Music

BASIC MUSICIANSHIP (3 credits)

429-201X	DAY:	Mondays 5 - 7 p.m.
	BEGINNING:	8 September
429-201Y	DAY:	Mondays 5 - 7 p.m.
	BEGINNING:	12 January
	DURATION:	15 weeks (30 hours)
	FEE:	$75.00

Introduction to the elements of music theory through techniques of aural training, sight, singing, keyboard and written applications to be presented as the classroom teacher should teach such elements of music to elementary school teachers.

EDUCATION COURSES

Counsellor Education

GROUP PROCESSES (3 credits)

412-304X	DAY:	Thursdays 6 - 8 p.m.
	FEE:	$75.00

	BEGINNING:	9 September

Introduction to the education of exceptional children; characteristics, classification, needs of exceptional children; developmental and corrective programs; areas of current research.

GENERAL METHODS IN SPECIAL EDUCATION (3 credits)

414-341Y	DAY:	Tuesdays 6 - 9 p.m.
	FEE:	$75.00
	DURATION:	10 weeks (30 hours)
	BEGINNING:	2 December

Class organization, teaching methods, assessments of educational level, setting objectives, grouping, individual programming, and reporting.

ORGANIZATION OF SPECIAL EDUCATION PROGRAMS (3 credits)

414-342Y	DAY:	Tuesdays 6 - 9 p.m.
	FEE:	$75.00
	DURATION:	10 weeks (30 hours)
	BEGINNING:	16 March

Needs of EMR, slow-learning and emotionally disturbed children; characteristics, school programs, evaluation of progress, integration into the community.

INTRODUCTION TO DIAGNOSIS AND ASSESSMENT (3 credits)

414-343X

DAY:	Thursdays 6 - 9 p.m.
FEE:	$75.00
DURATION:	10 weeks (30 hours)
BEGINNING:	11 September

Principle and procedures in the evaluation of pupil growth and achievement. Emphasis on the use and interpretation of tests to be given by the class teacher.

PRACTICUM IN DIAGNOSIS AND ASSESSMENT OF LEARNING PROBLEMS (3 credits)

414-344Y

DAY:	Wednesdays 6 - 9 p.m.
FEE:	$75.00
DURATION:	10 weeks (30 hours)
BEGINNING:	3 December

A supervised practicum in the use of various tests and measures in learning problems of children; developing prescriptive teaching programs.

COGNITIVE AND PSYCHOMOTOR PROBLEMS OF EXCEPTIONAL CHILDREN (3 credits)

414-440X

DAY:	Mondays 6 - 9 p.m.
FEE:	$75.00
DURATION:	10 weeks (30 hours)
BEGINNING:	8 September

Teaching methods appropriate to individual and small group instruction to overcome a variety of learning problems. Emphasis on perceptual difficulties. Concurrent with 414-442.

BEHAVIOURAL PROBLEMS OF EXCEPTIONAL CHILDREN (3 credits)

414-441Y

DAY:	Thursdays 6 - 9 p.m.
FEE:	$75.00
DURATION:	10 weeks (30 hours)
BEGINNING:	4 December

Teaching methods appropriate to the needs of pupils with emotional and behaviour problems. Methods presented will include modification techniques.

PSYCHOLOGY OF LEARNING PROBLEMS (3 credits)

414-442Y-51

DAY:	Mondays 6 - 9 p.m.
BEGINNING:	1 December

414-442Y-52

DAY:	Mondays 6 - 9 p.m.
BEGINNING:	15 March
FEE:	$75.00
DURATION:	10 weeks (30 hours)

The Learning Process; personality development; perceptual dysfunction, behaviour disorders and other handicapping conditions related to learning.

SCHOOL-HOME-COMMUNITY RELATIONS IN SPECIAL EDUCATION (3 credits)

414-443X

DAY:	Wednesdays 6 - 9 p.m.
FEE:	$75.00
DURATION:	10 weeks (30 hours)
BEGINNING:	10 September

Influence of home and community on the child, teacher-parent interviews, reporting, co-operation with hospital clinics, other professionals, etc.

MATERIALS IN SPECIAL EDUCATION (3 credits)

414-444Y

DAY: Thursdays 6 - 9 p.m.
FEE: $75.00
DURATION: 10 weeks (30 hours)
BEGINNING: 4 December

A critical examination of materials available for special education programs, commercial and teacher-made materials; the application of A-V techniques to Special Education.

VOCATIONAL HABILITATION OF EXCEPTIONAL CHILDREN (3 credits)

414-445Y

DAY: Wednesdays 6 - 9 p.m.
FEE: $75.00
DURATION: 10 weeks (30 hours)
BEGINNING: 17 March

Vocational requirements of non-academic children, vocational preparation as a responsibility of the special class teacher, placement services, follow-up.

SPECIAL TOPIC: TALENTED STUDENTS (3 credits)

414-446X-51

DAY: Mondays 6 - 9 p.m.
BEGINNING: 8 September

SPECIAL TOPIC: EDUCATION FOR THE DISADVANTAGED (3 credits)

414-446X-72

DAY: Wednesdays 6 - 9 p.m.
BEGINNING: 10 September

SPECIAL TOPIC: INDIVIDUALIZED PROGRAMS

414-446Y

DAY: Thursdays 6 - 9 p.m.
FEE: $75.00
DURATION: 10 weeks (30 hours)
BEGINNING: 18 March

A seminar or workshop approach to selected topics in the field of Special Education. Examples of possible topics include Language Development, Educable Retarded Adolescents, and Behaviour Modification.

Education in Catholic Studies

RELIGIOUS RESPONSE IN THE ELEMENTARY SCHOOL (3 credits)

415-341X

DAY: Tuesdays 6 - 8 p.m.
FEE: $75.00

BEGINNING: 9 September

In harmony with the discoveries of developmental religious and moral phases in the life of the elementary child, this course explores developing programs and procedures in the elementary school.

GUIDING THE RELIGIOUS RESPONSE (3 credits)

415-392Y

DAY: Tuesdays 8 - 10 p.m.
FEE: $75.00
DURATION: 15 weeks (30 hours)
BEGINNING: 13 January

An introduction to the science of the guidance of young people through the slow developmental patterns of grasping life's meaning and of directing their lives in consequence. Attention is given to the importance of the teacher's own self-image.

Education in English

READING INSTRUCTION — EARLY CHILDHOOD (3 credits)

427-223Y

DAY: Wednesdays 6 - 8 p.m.
FEE: $75.00
DURATION: 15 weeks (30 hours)
BEGINNING: 14 January

Methods and materials for the teaching of reading in the primary grades.

READING INSTRUCTION — LATER CHILDHOOD (3 credits)

427-233X

DAY: Wednesdays 6 - 8 p.m.
FEE: $75.00
DURATION: 15 weeks (30 hours)
BEGINNING: 10 September

Methods and materials for the teaching of reading in the upper elementary grades.

CORRECTIVE READING INSTRUCTION — EARLY CHILDHOOD

427-224X, Y Practicum

Instructor's permission required to register.

CORRECTIVE READING INSTRUCTION — LATER CHILDHOOD

427-234X, Y Practicum

Instructor's permission required to register.

READING INSTRUCTION — HIGH SCHOOL (3 credits)

427-523Y

DAY: Wednesdays 6 - 8 p.m.
FEE: $75.00
DURATION: 15 weeks (30 hours)
BEGINNING: 14 January

Methods and materials for the teaching of developmental reading at the high school level.

INTEGRATED LANGUAGE ARTS PROGRAMS (3 credits)

427-533X

DAY: Tuesdays 6 - 8 p.m.
BEGINNING: 9 September

427-533Y

DAY: Tuesdays 6 - 8 p.m.
BEGINNING: 13 January
FEE: $75.00
DURATION: 15 weeks (30 hours)

Methods and materials for integrating reading, listening, writing, speaking aspects of communications instruction.

READING IN THE HIGH SCHOOL (3 credits)

427-576X

DAY: Mondays 6 - 8 p.m.
BEGINNING: 8 September

427-576Y

DAY: Mondays 6 - 8 p.m.
BEGINNING: 12 January
FEE: $75.00
DURATION: 15 weeks (30 hours)

An exploration of reading instruction in secondary programs in the content fields; survey of remedial and developmental reading instruction throughout the elementary and secondary schools, together with review of research in secondary reading.

CORRECTIVE READING INSTRUCTION AT THE HIGH SCHOOL LEVEL (3 credits)

427-577X, Y Practicum

Instructor's permission required to register.

Education in Mathematics and Science

PERSPECTIVES ON ELEMENTARY MATHEMATICS EDUCATION (3 credits)

428-443Y

DAY: Tuesdays 6 - 8 p.m.
FEE: $75.00
DURATION: 15 weeks (30 hours)
BEGINNING: 13 January

A course to provide a deeper perspective of modern elementary mathematics education through a study of the active learning approach, use of structured materials, modern mathematics projects and research.

Education in Music

MUSIC CURRICULUM & INSTRUCTION — EARLY CHILDHOOD (3 credits)

429-322X

DAY: Tuesdays 5 - 7 p.m.
FEE: $75.00
DURATION: 15 weeks (30 hours)
BEGINNING: 9 September

Understanding of the musical development of children at this level by class participation in listening, singing, playing instruments, creating and moving to music. Materials and methods of planning the above experiences.

MUSIC CURRICULUM & INSTRUCTION — LATER CHILDHOOD (3 credits)

429-332X

DAY: Tuesdays 7 - 9 p.m.
FEE: $75.00
DURATION: 15 weeks (30 hours)
BEGINNING: 9 September

Materials, methods, planning and organization of musical experiences for later childhood classes through class participation in listening, singing, playing instruments, creating, reading music and listening activities.

Education in Social Sciences

SOCIAL STUDIES CURRICULUM & INSTRUCTION — EARLY CHILDHOOD (3 credits)

430-322X

DAY: Mondays 6 - 8 p.m.
FEE: $75.00
DURATION: 15 weeks (30 hours)
BEGINNING: 8 September

Theories and strategies of learning. Data and resources materials. Evaluation procedures as applied to the primary level.

LOCAL AND COMMUNITY STUDIES (3 credits)

430-332X

DAY: Tuesdays 6 - 8 p.m.
FEE: $75.00
DURATION: 15 weeks (30 hours)
BEGINNING: 9 September

The place and purpose of community studies in the Quebec elementary social science curriculum.

COMPARATIVE SOCIAL STUDIES (3 credits)

430-333Y

DAY: Tuesdays 6 - 8 p.m.
FEE: $75.00
DURATION: 15 weeks (30 hours)
BEGINNING: 13 January
PREREQUISITE: previous course in curriculum and instruction in history

An exploration of the theoretical bases of history teaching. Study and analysis of recent research in high school history curriculum and instruction.

Education in Second Languages

LINGUISTICS APPLIED TO SECOND LANGUAGE TEACHING (3 credits)

431-301X

DAY: Tuesdays 6 - 8 p.m.
FEE: $75.00
DURATION: 15 weeks (30 hours)
BEGINNING: 9 September

An introduction to general and contrastive linguistics; a study of the areas of interference in the learning of a second language, phonology, lexis and grammar. Examination and preparation of teaching, remedial and testing materials.

MEASUREMENT & EVALUATION IN SECOND LANGUAGE EDUCATION (3 credits)

431-302Y

DAY: Tuesdays 6 - 8 p.m.
FEE: $75.00
DURATION: 15 weeks (30 hours)
BEGINNING: 13 January

The importance and role of evaluation in second language teaching; principles of educational measurement applied to second language skills; types of language tests and examinations; analysis of commercially prepared tests; practice in preparing, administering and scoring periodical examinations; test items; formulation and relevance to short term and long term objectives.

QUEBEC CULTURAL CONTENT OF SECOND LANGUAGE PROGRAMS (3 credits)

431-304Y

DAY: Mondays 6 - 8 p.m.
FEE: $75.00
DURATION: 15 weeks (30 hours)
BEGINNING: 12 January

A study of the Quebec socio-cultural scene; contacts with francophone cultural and educational institutions: preparation of class material related to Quebec.

PSYCHOLINGUISTICS AND SECOND LANGUAGE TEACHING (3 credits)

431-305Y

DAY: Thursdays 6 - 8 p.m.
FEE: $75.00
DURATION: 15 weeks (30 hours)
BEGINNING: 15 January

Exploration of areas in psycholinguistics relevant to second language teaching: theories of language acquisition, relationship between first and second language learning, student motivation and individual differences in second language learning, problems of meaning; various aspects of bilinguilism.

TEACHING FRENCH AS A SECOND LANGUAGE — EARLY CHILDHOOD (3 credits)

431-322X

DAY:	Wednesdays 6 - 8 p.m.
FEE:	$75.00
DURATION:	15 weeks (30 hours)
BEGINNING:	10 September

Principles of second language teaching. Objectives and curriculum, teaching techniques and materials. Lesson planning and practice.

TEACHING FRENCH AS A SECOND LANGUAGE — LATER CHILDHOOD (3 credits)

431-332Y

DAY:	Wednesdays 6 - 8 p.m.
FEE:	$75.00
DURATION:	15 weeks (30 hours)
BEGINNING:	14 January

French Methods course. For further description, please contact Dr. M. Buteau, 392-8863.

TEACHING ENGLISH AS A SECOND LANGUAGE — ELEMENTARY SCHOOL (3 credits)

431-347X

DAY:	Thursdays 6 - 8 p.m.
BEGINNING:	11 September

431-347Y

DAY:	Thursdays 6 - 8 p.m.
BEGINNING:	15 January
FEE:	$75.00
DURATION:	15 weeks (30 hours)

This course will be concerned with the following topics: A general body of knowledge common to all second language teaching. A further study of the English Language in a "second" language perspective based on applied linguistics. Examination of teaching techniques and media.

TEACHING FRENCH AS A SECOND LANGUAGE — ELEMENTARY SCHOOL (6 credits)

431-544Z

DAY:	Thursdays 6 - 8 p.m.
FEE:	$150.00
DURATION:	30 weeks (60 hours)
BEGINNING:	11 September

Principles of second language teaching. An intensive study of the curriculum: objectives and development: lesson planning, micro-teaching; second language teaching strategies and techniques.

TEACHING FRENCH AS A SECOND LANGUAGE — SECONDARY SCHOOL (6 credits)

431-572Z

DAY:	Wednesdays 6 - 8 p.m.
FEE:	$150.00
DURATION:	30 weeks (60 hours)
BEGINNING:	10 September

Principles of second language teaching. Objectives and curriculum. Language skills at the secondary level: teaching and evaluation. Examination and preparation of class materials. Lesson planning. Training in micro-teaching situations.

TEACHING ENGLISH AS A SECOND LANGUAGE — SECONDARY SCHOOL (6 credits)

431-558Z

DAY: Mondays 6 - 8 p.m.
FEE: $150.00
DURATION: 30 weeks (60 hours)
BEGINNING: 8 September

Descriptive view of ESL situations in Quebec; objectives and curriculum; study of modern English phonology and structure in a language perspective.

EDUCATIONAL MEDIA — I (3 credits)

432-204X

DAY: Tuesdays 7 - 10 p.m.
BEGINNING: 16 September

432-204Y

DAY: Tuesdays 7 - 10 p.m.
BEGINNING: 13 January
FEE: $75.00
DURATION: 10 weeks (30 hours)
LIMITED ENROLMENT: 20 students

Application of educational media to the elementary and secondary school teaching and learning situations; rationale and underlying principles, the sources, selection production, effective utilization and evaluation of the media.

FILM PRODUCTION AND FILM CRITICISM (3 credits)

432-205X

DAY: Wednesdays 7 - 10 p.m.
FEE: $90.00
DURATION: 10 weeks (30 hours)
BEGINNING: 17 September
LIMITED ENROLMENT: 15 students

A study of the educational significance of various projected media; 16mm films, 8mm films, 35mm slides, multi-media presentation. The utilization of such media, teacher or student production.

EDUCATIONAL TELEVISION (3 credits)

432-306Y

DAY: Wednesdays 7 - 10 p.m.
FEE: $90.00
DURATION: 10 weeks (30 hours)
BEGINNING: 14 January

This course will survey the development of ETV with particular reference to current topics including children's TV programs, cable and closed circuit ETV. Short TV productions will take place in class to encourage a critical analysis of the potential of portable TV equipment for local teacher and student production.

CATALOGUING AND CLASSIFICATION OF LIBRARY MATERIALS (3 credits)

432-307X

DAY: Thursdays 7 - 10 p.m.
FEE: $75.00
DURATION: 10 weeks (30 hours)
BEGINNING: 18 September

An introduction to the use of subject heading, the Dewey Decimal Classification and other classification systems for print and non-print materials.

CONTEMPORARY DEVELOPMENTS IN EDUCATIONAL MEDIA (3 credits)

432-404Y

DAY: Thursdays 7 - 10 p.m.
FEE: $75.00
DURATION: 10 weeks (30 hours)
BEGINNING: 15 January

An examination of current trends in educational media including a critical analysis of educational television, computer assisted instruction, systems, analysis, programmed instruction, independent learning carrels, gaming and simulation, etc.

INDEPENDENT PROJECT (6 credits)

432-405Z

DAY: by arrangement with EMC Director
FEE: $150.00
DURATION: 60 hours

An intensive media production undertaken by the student after consultation with and the approval of the Director of the Library-Media program.

Physical Education

PHYSICAL EDUCATION FOR EXCEPTIONAL CHILDREN (3 credits)

434-496X

DAY: Mondays 6 - 9 p.m.
FEE: $75.00
DURATION: 10 weeks (30 hours)
BEGINNING: 22 September

Identification, evaluation, and remediation techniques basic to the development of effective physical education programs for educable mentally retarded children and children with specific learning disabilities; Progressive motor learning experiences related to body image, spatial relations, eye-hand coordination, and balance will be developed, applied and evaluated.

MOVEMENT EDUCATION — CURRICULUM & INSTRUCTION EARLY CHILDHOOD (3 credits)

434-521X

DAY: Wednesdays 6 - 9 p.m.
FEE: $75.00
DURATION: 10 weeks (30 hours)
BEGINNING: 24 September

An introduction to content and methodology in early childhood physical education for classroom teachers. The teaching of manipulative, non-manipulative and expressive uses of movement are stressed.

PHYSICAL EDUCATION — CURRICULUM & INSTRUCTION LATER CHILDHOOD (3 credits)

434-531Y

DAY: Wednesdays 6 - 9 p.m.
FEE: $75.00
DURATION: 10 weeks (30 hours)
BEGINNING: 21 January

An introduction to content and methodology in later childhood physical education for classroom teachers. How organization games, gymnastics and dance are stressed.

NON-CREDIT COURSES

CLASS PIANO FOR CLASSROOM TEACHER

429-200Y

DAY:	Tuesdays 5 - 6 p.m.
FEE:	$55.00
DURATION:	15 weeks (15 hours)
BEGINNING:	13 January

Keyboard experiences through group piano lessons utilizing the multiple key approach, transposition by ear; improvising simple chordal accompaniments for classroom singing, and sight reading.

UKULELE FOR BEGINNERS

429-204X

DAY:	Wednesdays 5 - 6 p.m.
FEE:	$55.00
DURATION:	15 weeks (15 hours)
BEGINNING:	10 September

Students need not have any previous experience in music. The objectives of the course are to teach the basic skills of Ukulele playing (picing and strumming), to present ear training indirectly, to teach the basic concepts of theory, and to increase the enjoyment of music. Musical learning obtained may be transferred to the guitar at a later date.

RECORDER FOR BEGINNERS

429-205Y

DAY:	Tuesdays 6 - 7 p.m.
FEE:	$55.00 ($6.00-$10.00 for materials)
DURATION:	15 weeks (15 hours)
BEGINNING:	13 January

Students need not have any previous experience in music. Introduction to basic skills in beginning recorder playing: producing a good tone; playing expressively; developing functional understanding of the basic elements of music; devising simple descants to accompany classroom singing; and preparation of material to assist the classroom teacher in teaching his own music.

UKULELE II

650-212Y

DAY:	Wednesdays 5 - 6 p.m.
FEE:	$55.00
DURATION:	15 weeks (15 hours)
BEGINNING:	14 January

Continuation of Ukulele I. Concentration on the following: picing, fast picing in the classroom, working with minor modes and use of songs with more complicated chord structures.

OFF CAMPUS COURSES

A number of courses will be given in off campus locations. Candidates should direct their inquiries to the appropriate official of their local school board or Professional Association.

Probable locations for courses in the 1975-76 Session will include: Baldwin Cartier, Chateauguay, Cowansville, Gaspé, Hull, Lakeshore, Laval, Lennoxville, MCSC (CECM), North Island, PSBGM, Schefferville-Seven Islands and South Shore.

6 ENGINEERING

Program Co-ordinator
Mrs. Eva St-Pierre
392-4935

INTRODUCTION

The 1975/76 evening program in Engineering offers two Certificate Programs, one in Textile Technology and one in Computer Languages. Graduate level courses and General Interest courses are also offered.

LIBRARIES

All students registered in the Engineering Section have full library privileges at McLennan Library and the Engineering Library upon presentation of their student card of admission.

COURSE INFORMATION

A listing of instructors, textbooks, buildings and room numbers for all courses will be distributed at time of registration. Please ask for a copy.

An evaluation process will be conducted in all courses. Students who do not wish to avail themselves of this opportunity are not obliged to do so.

REGULATIONS AND PROCEDURES

Please see General Information, Section 3.

IT IS THE RESPONSIBILITY OF EACH STUDENT TO READ, UNDERSTAND, AND ABIDE BY THE REGULATIONS AND PROCEDURES PRINTED IN THIS BOOKLET.

GENERAL

MATERIAL HANDLING AND MANAGEMENT

660-001Z

DAY: Tuesday 8 - 10 p.m.
FEE: $95.00
DURATION: 20 lectures (40 hours) beginning 23 September
PREREQUISITE: High School Graduation

(In co-operation with the Material Handling Society of Montreal)

Characteristics and applications of material handling equipment; hand equipment, pallets and pallet systems, unit loads, powered industrial trucks, conveyors; warehousing, including design and layout, receiving, storing, shipping, stock location systems, order picking, space and inventory control, and public warehousing.

INTRODUCTION TO INDUSTRIAL ENGINEERING

660-002Z

DAY: Thursday 6 - 8 p.m.
FEE: $95.00
DURATION: 20 lectures (40 hours) beginning 25 September
PREREQUISITE: High School Graduation

This course is designed to give an appreciation and working knowledge of industrial engineering and manufacturing principles. Specific areas covered include, method study, work simplification, work measurement, assembly line balancing, inventory control and production planning, quality control; maintenance control — procedures, planning, scheduling cost control and budgeting; work sampling, statistical analysis and method, critical path scheduling; labour relations — collective bargaining, conciliation grievance procedures, arbitration; scientific management — motivation.

INDUSTRIAL INSTRUMENTATION

660-003Z

DAY: Tuesday 6 - 8 p.m.
FEE: $115.00
DURATION: 25 lectures (50 hours) beginning 23 September
PREREQUISITE: High School Graduation

(In co-operation with the Instrument Society of America, Montreal Chapter)

This introductory course covers industrial process measurements and automatic process control. The first half of the course describes the principles of, and hardware for, taking pressure, level, temperature, flow and analytical measurements, while the second half describes transmission of signals, automatic control theory, final control elements and computer applications.

DESIGN FOR PLASTICS

660-004X

DAY: Mondays 6 - 8 p.m.
FEE: $50.00
DURATION: 12 lectures (24 hours) beginning 22 September
PREREQUISITE: High School Graduation

This course will cover essentially the Industrial Designer's approach to plastic design. While not a technical course in the sense of a chemical or physical study of polymers and processes, nor an analytical study of the structures involved, the subject will be treated in adequate technical depth to permit an understanding of the factors governing the application of plastics to their end uses in industrial, commercial and domestic applications.

GRADUATE LEVEL COURSES

AIR POLLUTION

660-502Z

DAY: Thursdays 7:30 - 9:30 p.m.
FEE: $115.00
DURATION: 25 lectures (50 hours) beginning 25 September
PREREQUISITE: B. Sc., B.Eng., or Instructor's Permission

This general course in air pollution is designed for personnel of governmental agencies and consulting engineers dealing with environmental control. The history of air pollution, sources, health effects, measurement and control methods, legal aspects, climatological and long-term effects will be discussed.

APPLICATION PROBLEMS IN POWER SYSTEMS

660-501X

DAY: Mondays 6 - 8 p.m.
Wednesdays 6 - 8 p.m.
FEE: $95.00
DURATION: 20 lectures (40 hours) beginning 22 September
PREREQUISITE: B. Eng., or Equivalent

Subjects covered will include a brief review of synchronous machines, transformers, induction motors, transmission and distribution systems and such equipment as are encountered in utility and industrial plants. Detailed treatment will be given to short-circuit calculations, circuit breaker selections, system and equipment grounding, system overvoltage and overcurrent. Other subjects include thermal overload characteristics of apparatus, unbalanced loads and the effects of harmonics on power systems.

HVAC POWER TRANSMISSION

304-663X

DAY: Tuesdays 6 - 8 p.m.
Thursdays 6 - 8 p.m.
FEE: $95.00
DURATION: 20 lectures (40 hours) beginning 23 September
PREREQUISITE: B. Eng., or Equivalent

Design considerations of EHV and UHV power transmission systems: audible noise, radio interference, environmental aspects of transmission lines. Coordination of system overvoltages with external and internal insulation strengths leading to economic insulation structures based on quantitative evaluation of reliability.

SUBSTATION APPARATUS

304-665X

DAY: Tuesdays 8 - 10 p.m.
Thursdays 8 - 10 p.m.
FEE: $95.00
DURATION: 20 lectures (40 hours) beginning 23 September
PREREQUISITE: B. Eng., or Equivalent

Description and analysis of major apparatus used in modern power systems: circuit breakers, switches, bushings. Electrical connection of substations; principles of equipment selection based on stresses, reliability and economic requirements. Substation protection. Physical arrangement of substations.

HVDC POWER TRANSMISSION

304-664Y

DAY: Tuesdays 6 - 8 p.m.
Thursdays 6 - 8 p.m.
FEE: $95.00
DURATION: 20 lectures (40 hours) beginning 20 January
PREREQUISITE: B. Eng., or Equivalent

Principles of HVDC power, transmission: HVDC transmission circuits, bridge convertor operation, thyristor valve developments, control of HVDC systems, protection of lines and convertor stations, harmonic filtering, modelling techniques for performance studies.

POWER SYSTEM OPERATION

304-666Y

DAY: Mondays 8 - 10 p.m.
Wednesdays 8 - 10 p.m.
FEE: $95.00
DURATION: 20 lectures (40 hours) beginning 19 January
PREREQUISITE: B. Eng., or Equivalent

Power system optimality criteria: economic, environmental, reliability factors. Short and long-term load forecasting; simulation of river flows; economic operations of hydroelectric thermal and hydro-steam systems. Planning of additional equipment by the global and marginal approaches. Siting of new plants. Planning of interconnections; maintenance scheduling.

MODERN TECHNIQUES FOR POWER SYSTEM ANALYSIS

304-667Y

DAY: Mondays 6 - 8 p.m.
Wednesdays 6 - 8 p.m.
FEE: $95.00
DURATION: 20 lectures (40 hours) beginning 19 January
PREREQUISITE: B. Eng., or Equivalent

Mathematical descriptions of power systems suitable for computer analysis, and solutions algorithms. Topics will include: matrix algebra, incidence and network matrices, sparse matrix techniques, phase and component representation, short circuit studies, Diakoptics, load flow studies, transient and dynamic stability studies, contingency analysis, state estimation, system identification.

TEXTILE TECHNOLOGY

The Centre for Continuing Education in co-operation with the Canadian Association of Textile Colourists and Chemists (CATCC) Quebec Section, and the Department of Chemical Engineering will continue to offer courses which if successfully completed will lead to the "Certificate of Advanced Technology in Dyeing and Finishing". The aim of the program is to introduce the student to the underlying scientific and engineering principles of textile processing, with particular emphasis on dyeing and finishing.

CERTIFICATE OF ADVANCED TECHNOLOGY IN DYEING AND FINISHING

Six courses will be offered in all. There will be an examination at the completion of each course and a mark of "C" must be attained in order to qualify for the certificate. Students who successfully complete all six courses will be awarded the CATCC (Quebec) Certificate of Advanced Technology in Dyeing and Finishing.

Prospective students seeking further information should contact:

Mr. F. Peach
Celanese Canada Ltd.
Montreal
Telephone: 878-1581
Local: 455

or

Professor G. Boulé
CEGEP Bourgchemin
St. Hyacinthe
Telephone: 773-6691

Students entering the program should have completed High School or CATCC's textile courses 101, 102, and 103. Others with several years of relevant industrial experience at the supervisory level are eligible to take these courses.

The six courses which make up the program are:

Engineering Principles for Dyers and Finishers
Polymers and Fibres
Colour Physics and Colour Measurement
Chemistry of Dyestuffs and Auxiliaries
Colouration Systems and Physical Chemistry of Dyeing
Testing and Analytical Procedures

Courses to be offered in 1975-76 are:

COURSE DESCRIPTIONS

ENGINEERING PRINCIPLES FOR DYERS AND FINISHERS

662-200X

DAY: Thursdays 6 - 9 p.m.
FEE: $90.00
DURATION: 15 lectures (45 hours) beginning 25 September

Application of the laws of conservation of mass and energy to steady and transient processes. Work and energy concepts. The laws of thermodynamics and related concepts. Equations of state and estimation of fluid properties. Concepts of fluid flow and heat and mass transfer. Application of the above principles to problems in dyeing and finishing with special emphasis on the properties of water and steam, flow measurement and pumps, temperature measurement and control, and other relevant aspects of fluid and heat flow in dyeing and setting machines. Unit operations of importance in dyeing and finishing; extraction, absorption and drying.

COLOUR PHYSICS AND COLOUR MEASUREMENTS

662-202X

DAY: Wednesdays 6 - 9 p.m.
FEE: $90.00
DURATION: 15 lectures (45 hours) beginning 24 September

The course will deal with the theories of colour and the various methods of defining and measuring colour. The principles of colour measuring instruments and their use in colour matching will be discussed and practice given in their operation.

CHEMISTRY OF DYESTUFFS AND AUXILIARIES

662-203Y

DAY: Wednesdays 6 - 9 p.m.
FEE: $90.00
DURATION: 15 lectures (45 hours) beginning 29 January

Will cover the general chemistry and properties of dyes, pigments and textile auxiliary products. The relationship between chemical constitution of dyestuffs and their behaviour in textile applications will be stressed. A reasonable knowledge of organic chemistry is necessary to obtain the maximum benefit from this course.

COMPUTER SCIENCE

Registration in the following courses is limited and the course fee contains a laboratory fee for use of the computer and for keypunching services.

All courses involve considerable homework assignments and students should not normally take additional evening courses at the same time.

McGILL CERTIFICATE IN COMPUTER LANGUAGES

Students may qualify for a "McGill Certificate in Computer Languages" by completing 3 core courses and 2 options from those listed below. In order to progress in the Certificate Program at least a "C" must be attained in each course. Students may receive exemptions for equivalent courses, but must complete a minimum of 4 courses at McGill in order to receive a Certificate, a minimum of 3 being in the evening.

CORE COURSES

Fortran I
Computer Structure and Assembly Language Programming
PL1/APL

OPTIONS

Computers in Data Processing
Fortran II
Computer Systems and Organization

COURSE DESCRIPTIONS

*FORTRAN 1

664-100X

DAY: Tuesdays 6 - 8 p.m.
FEE: $90.00
DURATION: 12 lectures (24 hours plus labs) beginning 23 September
PREREQUISITE: High School Mathematics

This is a first course in computer programming using the FORTRAN language.

*COMPUTER STRUCTURE AND ASSEMBLY LANGUAGE PROGRAMMING

664-210X

DAY: Wednesdays 6 - 8 p.m.
FEE: $90.00
DURATION: 12 lectures (24 hours plus labs) beginning 24 September
PREREQUISITE: A knowledge of Fortran

Computer structure, machine language, instruction execution, addressing techniques and digital representation of data. Symbolic coding and assembly systems, program segmentation and linkage.

COMPUTER SYSTEMS AND ORGANIZATION

664-310X

DAY: Mondays 6 - 8 p.m.
FEE: $90.00
DURATION: 12 lectures (24 hours plus labs) beginning 22 September
PREREQUISITE: Fortran and Assembly

Hardware concepts. Control and scheduling of large information processing systems. Operating system software — resource allocation dispatching, processors, access methods, job control languages, batch processing, multiprogramming, multiprocessing, time sharing.

COMPUTERS IN DATA PROCESSING

664-230X

DAY: Wednesdays 6 - 8 p.m.
FEE: $90.00
DURATION: 12 lectures (24 hours plus labs) beginning 24 September
PREREQUISITE: A knowledge of Fortran

A considerable portion of this course will be taken in developing and applying basic COBOL principles. Other major topics include job control language and file processing.

*PL1/APL

664-300X

DAY: Thursdays 6 - 8 p.m.
FEE: $90.00
DURATION: 12 lectures (24 hours plus labs) beginning 25 September
PREREQUISITE: Fortran I

A study of the scientific programming languages including PL1/APL. Introduction to theory of compilers and interpreters. Computer solution of non-numerical problems.

FORTRAN II

664-200Y

DAY: Mondays 6 - 8 p.m.
FEE: $90.00
DURATION: 12 lectures (24 hours plus labs) beginning 19 January
PREREQUISITE: Fortran I

An extension of FORTRAN I this course should be taken by those interested in expanding their computer programming experience. Students are taught the use of a time-sharing computer system. Problems both business and scientific in orientation are discussed in addition to advanced FORTRAN topics.

GRADUATE LEVEL

COMPUTING METHODS I

664-507X

DAY: Tuesdays 6 - 8 p.m.
FEE: $90.00
DURATION: 12 lectures (24 hours plus labs) beginning 23 September
PREREQUISITE: A knowledge of FORTRAN and advanced calculus including matrices

Interpolation, numerical integration, function evaluation, roots of equations of one and several variables, matrices, smoothing and Chebyshev, least square and spline fitting.

COMPUTING METHODS II

664-608Y

DAY: Tuesdays 6 - 8 p.m.
FEE: $90.00
DURATION: 12 lectures (24 hours plus labs) beginning 20 January
PREREQUISITE: Computing Methods I

An extension of Computing Methods I. Solutions to ordinary differential equations (predictor-corrector and Runge-Kutta) Monte Carlo methods, linear programming, regression analysis and eigenvalues.

*Courses marked with an asterisk will be repeated in January.

7 LANGUAGES

Professor P. D. Stewart
Associate Director
392-4901

INTRODUCTION

The Language Section of the Centre offers courses leading to the following Certificates of Proficiency and Diploma:

Certificate of Proficiency in

ENGLISH	ITALIAN
FRENCH	RUSSIAN
GERMAN	SPANISH

TRANSLATION

Diploma in TRANSLATION

Non-certificate courses:

ARABIC	MODERN GREEK
CHINESE	JAPANESE
CROATOSERBIAN	PORTUGUESE

With the exception of Translation courses, all courses offered in the Languages Section are open to any interested person who has the required degree of language competence; there are no academic admissions requirements.

REQUIREMENTS

Application

All students who have completed or who are completing the requirements for the Certificate of Proficiency in any language in which it is offered (except Translation) and expect to receive it at the Convocation in June, must apply before March 31, using the special application forms available at the Centre, attaching photocopies of the Reports of Standing for the relevant courses. If the course is not finished at the time of application, marks will be entered by the Centre. After March 31, a late application fee of $5.00 will be charged.

Certificate of Proficiency in English and French

Candidates for the Certificate of Proficiency in English and in French must complete a total of 270 class-hours if they begin at Level One. The 270 hours consist of forty-five hours at Levels One to Four inclusive plus ninety hours at Level Five. The ninety hour requirement at Level Five includes one oral course and one written course.

Students passing these two Fifth Level courses with a minimum of 75% in each course will be awarded the Certificate of Proficiency.

Students will be exempted from Levels One, Two, Three or Four according to the results of the classification test. The requirement of Level Five must be completed by all candidates for the Certificate.

All five levels of English and French are offered three times each year. Terms begin in September, in January and in May. During the January and May terms, only twice-a-week courses are offered.

Certificate of Proficiency in German, Italian, Russian and Spanish

Candidates for the Certificate of Proficiency in German, Italian, Russian or Spanish must complete a total of 200 class-hours if they begin at Level One.

Students passing the Fourth Level course with a minimum of 75% will be awarded the Certificate.

Those who have studied these languages at some other institution may be exempted from one or more levels depending on the progress they have made but must take at least 100 hours at the upper Levels at the McGill Centre for Continuing Education.

Certificate of Proficiency and Diploma in Translation

Prerequisite for Admission: A considerable degree of fluency and correctness in both English and French, especially written.

Applicants for admission must take the entrance examination which is held each year in June. Special application forms may be obtained by contacting the Centre in May. The examination fee is $5.00 (non-refundable). Applicants will be notified by mail of their admission which is valid only for the year the examination is taken. No dictionaries are allowed at this examination.

After completing First and Second Year, students will normally elect to specialize in English or in French. The Third and Fourth Year courses include French and English sections.

The Certificate of Proficiency in Translation will be awarded to students who pass the Third Year course with a minimum of 70%. The Certificate of Proficiency is pre-requisite to registration in Fourth Year.

The Diploma in Translation will be awarded to students who pass the Fourth Year course with a minimum of 70%.

Students who do not sit a final examination or who are absent from the program for one or more years and wish to be re-admitted must apply in writing to the Committee on Translation Courses before 1 September. Applications will be judged individually. The decisions of the Committee will be final.

REGULATIONS AND PROCEDURES

For Regulations and Procedures concerning Registration dates, Refunds, Transfers, Bookstore, etc., please see Section 3.

At the time of registration, a listing of instructors, textbooks, buildings and room numbers for all courses will be distributed. Please ask for a copy.

IT IS THE RESPONSIBILITY OF EACH STUDENT TO READ, UNDERSTAND AND ABIDE BY THE REGULATIONS AND PROCEDURES PRINTED IN THIS BOOKLET.

Classification Tests for English and French courses:

All new students must take a classification test before they are allowed to register for courses. The fee for this test is $5.00 (non-refundable).

A special application form for this test will be found at the end of this announcement. Candidates may also apply in person at the Centre. The completed form, together with the $5.00 fee (cash or money order, no cheques, please) must reach the Centre, at the latest, on the Friday before the test. A receipt will then be sent to the applicant. No applicant will be admitted to the test without this receipt.

Applicants will be notified by mail of the level at which they have been classified a few days after the test. They must then register for courses as soon as possible.

Taking the test will not automatically guarantee a place in a course. Those who take the earlier tests have a better chance of registering in the course of their choice.

The tests for ENGLISH COURSES will be held on the following dates:

Thursday, 28 August, 1975, at 7 p.m.
Wednesday, 3 September, 1975, at 7 p.m.
Tuesday, 9 September, 1975, at 7 p.m.
Monday, 15 September, 1975, at 7 p.m.

The tests for FRENCH COURSES will be held on the following dates:

Thursday, 4 September, 1975, at 7 p.m.
Wednesday, 10 September, 1975, at 7 p.m.
Tuesday, 16 September, 1975, at 7 p.m.

The location of the test will be given on the receipt form.

EXAMINATIONS

There is an examination at the end of all language courses. It is compulsory for all students who plan to register in the following level.

The official dates of examinations will be as follows:

All 100-hour courses:	week of April 5
All 50-hour courses:	week of April 5
All 45-hour twice-a-week courses:	week of December 8
All 45-hour once-a-week courses:	week of March 15
Translation courses:	week of April 12

However, if an instructor is forced to miss a class, the time will be made up at the end of the course, so that the dates above may change in individual cases.

A Report of Standing will be mailed to all students who take an examination.

GRADING SYSTEM

Final marks for each course will be classified into five grades: A (80-100%); B (65-79%); C (55-64%); D (45-54%); and F (fail) less than 45%. The grade of D is a "passing" grade, but a grade of C or higher is required in order to register in the following level.

CREDIT

In special circumstances, students registered in a degree program at McGill University may apply to their Faculty for permission to have courses taken in the Language Section of the Centre counted for credit. Courses of 45 to 50 hours will be counted for 3 credits and courses of 90 to 100 hours will be counted for 6 credits. In case of withdrawal from a course taken for credit, students must (1) return their Card of Admission to the Centre, and (2) notify their Faculty in writing. Withdrawal will be authorized only if it takes place before the sixth week of the course.

LIBRARY PRIVILEGES

All students registered in the Language Section have full library privileges at McLennan and Redpath libraries on presentation of their Student Card of Admission.

ARABIC

Classes limited to 25 students

FIRST LEVEL, INTENSIVE

681-210Z-61

DAYS:	Tuesdays and Thursdays 6 - 8 p.m.
FEE:	$145.00
DURATION:	100 hours including 25 hours in the laboratory (25 weeks) beginning 23 September

This course, planned for beginners, will offer a basic background in Arabic grammar and rudiments of reading and writing in classical and modern Arabic through the audio-visual method.

SECOND LEVEL, INTENSIVE

681-220Z-51

DAYS: Mondays and Wednesdays 6 - 8 p.m.
FEE: $145.00
DURATION: 100 hours including 25 hours in the laboratory (25 weeks) beginning 22 September
PREREQUISITE: First Level course or permission of the instructor.

This course offers students who have already acquired a basic knowledge of Arabic the opportunity of practising the reading and writing of classical and modern Arabic and of acquiring a higher degree of fluency and correctness in the language.

CHINESE

Classes limited to 25 students

FIRST LEVEL, INTENSIVE

682-210Z-51
682-210Z-57

DAYS: Mondays and Wednesdays 6 - 8 p.m.
Mondays and Wednesdays 8 - 10 p.m.
FEE: $145.00
DURATION: 100 hours including 25 hours in the laboratory (25 weeks) beginning 22 September

This course aims to teach the basic structure and the vocabulary of Mandarin Chinese through the audio-visual method. Speaking, reading and writing skills will be equally stressed. By the end of the course students should have gained a mastery of basic grammatical constructions for reading and speaking. They should also be able to recognize 400 single and 1200 compound characters.

SECOND LEVEL, INTENSIVE

682-220Z-51

DAYS: Mondays and Wednesdays 6 - 8 p.m.
FEE: $145.00
DURATION: 100 hours including 25 hours in the laboratory (25 weeks) beginning 22 September
PREREQUISITE: A minimum of 50 hours of Chinese

This course offers the student the opportunity to continue the practice of spoken and written Chinese and to attain a greater degree of fluency and correctness in the language.

CROATOSERBIAN

Class limited to 25 students

FIRST LEVEL, INTENSIVE

683-210Z-61

DAYS: Tuesdays and Thursdays 6 - 8 p.m.
FEE: $145.00
DURATION: 100 hours (25 weeks) beginning September 23

This course is designed to provide students, who have very little or no knowledge of the language, with basic training in Croatoserbian grammar, conversation, reading and writing.

ENGLISH

INTENSIVE COURSES

FEE: $145.00
DURATION: 90 hours (12 weeks)
beginning week of 22 September

REGULAR COURSES

FEE: $85.00
DURATION: 45 hours (twice-a-week courses: 12 weeks)
(once-a-week courses: 23 weeks)
beginning week of 22 September

FIRST LEVEL, INTENSIVE — Class limited to 18 students

684-210X-51 DAYS: Mondays and Wednesdays 6 - 10 p.m.
PREREQUISITE: A mark between 20 and 30 in the Classification Test

This course is designed to cover First and Second Levels in one session. Only students who are classified at First Level but already have a basic knowledge of English will be admitted.

FIRST LEVEL, REGULAR — Classes limited to 18 students

684-211X-51 DAYS: Mondays and Wednesdays 6 - 8 p.m.
684-211X-67 Tuesdays and Thursdays 8 - 10 p.m.

SECOND LEVEL, REGULAR — Classes limited to 25 students

684-221X-51 DAYS: Mondays and Wednesdays 6 - 8 p.m.
684-221X-57 Mondays and Wednesdays 8 - 10 p.m.
684-221X-61 Tuesdays and Thursdays 6 - 8 p.m.
684-221X-67 Tuesdays and Thursdays 8 - 10 p.m.

One period per week, ending in March:

684-221Z-81 DAYS: Thursdays 6 - 8 p.m.

THIRD LEVEL, INTENSIVE — Classes limited to 25 students

684-230X-51 DAYS: Mondays and Wednesdays 6 - 10 p.m.
684-230X-61 Tuesdays and Thursdays 6 - 10 p.m.
PREREQUISITE: A mark between 50 and 65 in the Classification Test or a mark of at least 70% in the Second Level

This course is designed to cover Third and Fourth Levels in one session. Only students qualified for Third Level will be admitted.

THIRD LEVEL, REGULAR — Classes limited to 25 students

684-231X-51 DAYS: Mondays and Wednesdays 6 - 8 p.m.
684-231X-57 Mondays and Wednesdays 8 - 10 p.m.
684-231X-61 Tuesdays and Thursdays 6 - 8 p.m.
684-231X-67 Tuesdays and Thursdays 8 - 10 p.m.

One period per week, ending in March:

684-231Z-67 DAYS: Tuesdays 8 - 10 p.m.

FOURTH LEVEL, REGULAR — Classes limited to 25 students

684-241X-51	DAYS:	Mondays and Wednesdays 6 - 8 p.m.
684-241X-57		Mondays and Wednesdays 8 - 10 p.m.
684-241X-61		Tuesdays and Thursdays 6 - 8 p.m.
684-241X-67		Tuesdays and Thursdays 8 - 10 p.m.

One period per week, ending in March:

684-241Z-71	DAYS:	Wednesdays 6 - 8 p.m.
684-241Z-87		Thursdays 8 - 10 p.m.

FIFTH LEVEL, REGULAR — Classes limited to 25 students

ATTENDANCE REQUIREMENT: Not less than ⅔ of lectures

Students entering the Fifth Level may choose the course best suited to their needs among the following:

COMPOSITION

684-351X-51	DAYS:	Mondays and Wednesdays 6 - 8 p.m.
684-351X-67		Tuesdays and Thursdays 8 - 10 p.m.

One period per week, ending in March:

684-351Z-77	DAYS:	Wednesdays 8 - 10 p.m.

The purpose of this course is to encourage the students to increase their overall ability in English by acquiring more skill in written expression. The basic principles of composition — unity, coherence and adequate development of the subject matter — will be taught and practised. In addition, paraphrasing, letter and report writing, summarizing and précis writing will be covered.

BUSINESS WRITING

684-352X-57	DAYS:	Mondays and Wednesdays 8 - 10 p.m.
684-352X-61		Tuesdays and Thursdays 6 - 8 p.m.

One period per week, ending in March:

684-352Z-61	DAYS.	Tuesdays 6 - 8 p.m.

This course offers a detailed study of the composition of various types of business letters and includes a review of English grammar and syntax. Business phrases, terminology, idioms and usage are given particular attention. Difficulties experienced by those learning English as a second language are discussed and explained. Students are expected to prepare written assignments which will be corrected and returned.

CONVERSATION

684-353X-51	DAYS:	Mondays and Wednesdays 6 - 8 p.m.
684-353X-61		Tuesdays and Thursdays 6 - 8 p.m.
684-353X-57		Mondays and Wednesdays 8 - 10 p.m.

This course is intended for advanced students who want intensive practice in spoken English but feel they still require help with grammar and syntax. Written work will be assigned every week.

LIVING ENGLISH (ORAL)

684-354X-61	DAYS:	Tuesdays and Thursdays 6 - 8 p.m.

One period per week, ending in March:

684-354Z-67	DAYS:	Tuesdays 8 - 10 p.m.

This course is offered mainly for improving vocabulary, pronunciation, idiom and sentence structure. This is achieved by the reading of texts from modern English and American authors and also of scenes from modern plays which will familiarize students with modern spoken English. Scenes, dialogues and short stories provide the opportunity for active student participation in discussing, reproducing and reading aloud.

ENGLISH — POST CERTIFICATE COURSES

ADVANCED COMPOSITION AND STYLISTICS

684-361X-61

DAYS: Tuesdays and Thursdays 6 - 8 p.m.
FEE: $85.00
DURATION: 45 hours (12 weeks) beginning 23 September
PREREQUISITE: Certificate of Proficiency in English or at least 90% in the Classification Test.

A course designed for those who wish to improve their written communication ability. Building on acquired basic composition skills, the course material and assignments will focus on matters of style and appropriateness of expression.

FRENCH

FEE: $85.00

686-210X-67 Tuesdays and Thursdays 8 - 10 p.m.

SECOND LEVEL — Classes limited to 25 students

686-220X-61 DAYS: Tuesdays and Thursdays 6 - 8 p.m.
686-220X-57 Mondays and Wednesdays 8 - 10 p.m.

THIRD LEVEL — Classes limited to 25 students

686-230X-51 DAYS: Mondays and Wednesdays 6 - 8 p.m.
686-230X-67 Tuesdays and Thursdays 8 - 10 p.m.

FOURTH LEVEL — Classes limited to 25 students

686-240X-61 DAYS: Tuesdays and Thursdays 6 - 8 p.m.
686-240X-57 Mondays and Wednesdays 8 - 10 p.m.

WITHOUT LABORATORY

FIRST LEVEL — Classes limited to 18 students

686-211X-61 DAYS: Tuesdays and Thursdays 6 - 8 p.m.
686-211X-57 Mondays and Wednesdays 8 - 10 p.m.

SECOND LEVEL — Classes limited to 25 students

686-221X-61 DAYS: Tuesdays and Thursdays 6 - 8 p.m.

One period per week, ending in March:

686-221Z-81 DAYS: Thursdays 6 - 8 p.m.

THIRD LEVEL — Classes limited to 25 students

686-231X-57 DAYS: Mondays and Wednesdays 8 - 10 p.m.

One period per week, ending in March:

686-231Z-61 DAYS: Tuesdays 6 - 8 p.m.

FOURTH LEVEL — Classes limited to 25 students

686-241X-51 DAYS: Mondays and Wednesdays 6 - 8 p.m.

One period per week, ending in March:

686-241Z-67 DAYS: Tuesdays 8 - 10 p.m.

FIFTH LEVEL — Classes limited to 25 students

ATTENDANCE REQUIREMENT: Not less than ⅔ of lectures

Students entering the Fifth Level may choose the course best suited to their needs among the following:

COMPOSITION

686-351X-61 DAYS: Tuesdays and Thursdays 6 - 8 p.m.

One period per week, ending in March:

686-351Z-57 DAYS: Mondays 8 - 10 p.m.

This course consists of exercises in grammar, composition and stylistics. Homework will be assigned each week and discussed in class.

BUSINESS WRITING

686-352X-51 DAYS: Mondays and Wednesdays 6 - 8 p.m.

This course offers a study of various types of business letters and a review of grammar and syntax. Business phrases, terminology, idioms and usage are given special attention. Homework will be assigned each week, corrected and returned.

CONVERSATION

686-353X-51 DAYS: Mondays and Wednesdays 6 - 8 p.m.
686-353X-67 Tuesdays and Thursdays 8 - 10 p.m.

One period per week, ending in March:

686-353Z-77 DAYS: Wednesdays 8 - 10 p.m.

This course is conducted in the form of discussions, debates and short speeches on a variety of subjects. It includes a review of grammar and syntax.

GERMAN

INTENSIVE COURSES

FEE: $145.00
DURATION: 100 hours (25 weeks) beginning week of 22 September

REGULAR COURSES

FEE: $90.00
DURATION: 50 hours (25 weeks) beginning week of 22 September

All classes limited to 22 students

Counselling: Students who need assistance in deciding the level at which they should register may telephone the Department of German (392-5091 or 5093) between 9 a.m. and 5 p.m. after 1 September or consult any staff member of the Department at 1001 Sherbrooke Street West.

Drop-in Centre: The German Drop-in Centre is open to evening as well as daytime students daily from 9 a.m. to 9 p.m. in Room 601 (lounge) of Bronfman Building. One hour before and one hour after evening courses (but not after 9 p.m.), a staff member will be on hand to help students with their homework and lead conversation groups. There is no charge for this service.

INTENSIVE PROGRAM (2 years)

FIRST AND SECOND LEVEL (Beginners)

688-210Z-51	DAYS:	Mondays and Wednesdays 6 - 8 p.m.
688-210Z-61		Tuesdays and Thursdays 6 - 8 p.m.
688-210Z-57		Mondays and Wednesdays 8 - 10 p.m.

The direct method will be used in this course. Instruction will be in German from the beginning. With the help of filmstrips and cards the vocabulary will be picked up rapidly. At the end of the course, most students will be able to converse in German, to read a German newspaper and to write in German. Students who complete this course successfully will be able to register in Third Level. One hour a week will be spent in the laboratory.

THIRD AND FOURTH LEVEL

688-230Z-51	DAYS:	Mondays and Wednesdays 6 - 8 p.m.
	PREREQUISITE:	100 hours of German
	ATTENDANCE REQUIREMENT:	Not less than 2/3 of lectures

This course combines the program of the Third and Fourth Level Regular courses. Students who obtain 75% or more in the final examination will receive the Certificate of Proficiency.

REGULAR PROGRAM (4 courses)

FIRST LEVEL (Beginners)

688-211Z-51	DAYS:	Mondays 6 - 8 p.m.
688-211Z-61		Tuesdays 6 - 8 p.m.

This direct-method course is designed for students who want to speak and understand everyday German.

SECOND LEVEL

688-221Z-71	DAYS:	Wednesdays 6 - 8 p.m.
	PREREQUISITE:	50 hours of German

This course offers the student the opportunity to continue the practice of spoken and written German and to attain a greater degree of fluency and correctness in the language. Such discussion of grammar and syntax as is found necessary will be given.

THIRD LEVEL

688-231Z-81	DAYS:	Thursdays 6 - 8 p.m.
	PREREQUISITE:	100 hours of German

This course will consist of conversation, composition and some readings of literary texts.

FOURTH LEVEL

688-241Z-51

DAYS: Mondays 6 - 8 p.m.
PREREQUISITE: 150 hours of German
ATTENDANCE REQUIREMENT: Not less than 2/3 of lectures

This course will consist of conversation, composition and translation.

GREEK (MODERN)

Classes limited to 25 students

FIRST LEVEL

690-211Z-61
690-211Z-51

DAYS: Tuesdays 7 - 9 p.m.
Mondays 7 - 9 p.m.
FEE: $90.00
DURATION: 50 hours (25 weeks) beginning week of 22 September

This course is planned for beginners. It will begin with the spoken language and will aim at the acquisition of automatic skills. It will gradually proceed to the written language and will aim at developing the ability to understand and to write a simple composition.

ITALIAN

All classes limited to 25 students

Counselling: Students who need assistance in deciding the level at which they should register may telephone the Department of Italian (392-4567) between 9 a.m. and 5 p.m. after 1 September.

FIRST LEVEL, INTENSIVE

692-210Z-61

DAYS: Tuesdays and Thursdays 6 - 8 p.m.
FEE: $145.00
DURATION: 100 hours including 25 hours in the laboratory (25 weeks) beginning 23 September

This course is designed for beginners who wish to acquire a good working knowledge of the language in one year. Students obtaining a good standing in the final examination will be admitted directly to the combined Third and Fourth Levels course. The direct method will be used and instruction will be in Italian from the beginning. Conversation and class discussion will be encouraged. The language laboratory will be used to improve pronunciation, develop aural comprehension and to drill students in basic speech patterns.

REGULAR PROGRAM

FIRST LEVEL

692-211Z-61

DAYS: Tuesdays 6 - 8 p.m.
FEE: $90.00
DURATION: 50 hours (25 weeks) beginning 23 September

A beginner's course using the direct method approach. Special emphasis will be placed on building a practical vocabulary for everyday use through conversation and

questions on the readings. Written exercises and oral drills will acquaint students with basic language patterns and grammatical structures.

SECOND LEVEL

692-221Z-71

DAYS:	Wednesdays 6 - 8 p.m.
FEE:	$90.00
DURATION:	50 hours (25 weeks) beginning 24 September
PREREQUISITE:	50 hours of Italian or equivalent

This course is designed to develop fluency and correctness in speaking, reading and writing the language. Italian periodicals and texts, and visual aids will be used to promote class discussion on current events and also on life in modern Italy.

THIRD AND FOURTH LEVELS

692-231Z and 241Z-51

DAYS:	Mondays 6 - 8 p.m.
FEE:	$90.00
DURATION:	50 hours (25 weeks) beginning 22 September
PREREQUISITE:	100 hours of Italian or equivalent
ATTENDANCE REQUIREMENT:	For Fourth Level students: Not less than 2/3 of lectures

This course will be conducted entirely in Italian and will include conversation, readings, composition, and an outline of contemporary Italian civilization. The emphasis will be placed on class discussion of the reading, and of the main features of contemporary Italy. The areas of study will be in alternate years: (1) Italian novels and short stories; (2) Italian plays and cinema. Those who are in their fourth year of Certificate of Proficiency studies are required to study an additional text.

ITALIAN — POST CERTIFICATE COURSES

COMMERCIAL ITALIAN

692-352Z-51

DAYS:	Mondays 6 - 8 p.m.
FEE:	$90.00
DURATION:	50 hours (25 weeks) beginning 22 September
PREREQUISITE:	200 hours of Italian or equivalent

This course will be given in collaboration with the Italian Chamber of Commerce, Montreal, and is designed for students who are especially interested in acquiring a grounding in Italian business terminology and commercial practice. Problems in translation will also be studied. Students taking the course will be invited to talks given by prominent personalities in the business community particularly interested in industrial, commercial and financial contacts between Canada and Italy. These talks will be organized by the Italian Consulate and the Italian Chamber of Commerce, Montreal.

CINEMA AND SOCIETY IN MODERN ITALY

692-354X-67

DAYS:	Tuesdays and Thursdays 8 - 10 p.m.
FEE:	$85.00
DURATION:	45 hours (12 weeks) beginning 23 September
PREREQUISITE:	200 hours of Italian or equivalent

This course will provide a survey of the most important trends in post-war Italian cinema seen in the context of the rapidly and dramatically evolving society of modern Italy. Each week one class will be devoted to the showing of a film and one class to discussion.

JAPANESE

Classes limited to 25 students

FIRST LEVEL, INTENSIVE

694-210Z-61

DAYS: Tuesdays and Thursdays 6 - 8 p.m.
FEE: $145.00
DURATION: 100 hours including 25 hours in the laboratory (25 weeks) beginning 23 September

This course will offer basic training in Japanese grammar, conversation, reading and writing with special emphasis on pronunciation and aural comprehension.

SECOND LEVEL, INTENSIVE

694-220Z-51

DAYS: Mondays and Wednesdays 6 - 8 p.m.
FEE: $145.00
DURATION: 100 hours including 25 hours in the laboratory (25 weeks) beginning 22 September
PREREQUISITE: 100 hours of Japanese or equivalent

This course offers an opportunity to continue the practice of spoken Japanese. It will also emphasize reading and writing (Kana and Kanji) thus enabling the students to attain a higher degree of fluency and correctness in the language.

PORTUGUESE

Class limited to 25 students

FIRST LEVEL, REGULAR

695-211Z-81

DAYS: Thursdays 6 - 8 p.m.
FEE: $90.00
DURATION: 50 hours (25 weeks) beginning 25 September

In this course, frequent and systematic drill is used to develop rapid response to spoken Portuguese and to enable the student to read quickly.

RUSSIAN

All classes limited to 25 students

Counselling: Students who need assistance in deciding the level at which they should register may telephone the Department of Russian (392-4610 or 4616) between 9 a.m. and 5 p.m. after 1 September.

FIRST LEVEL, INTENSIVE

696-210Z-61

DAYS: Tuesdays and Thursdays 6 - 8 p.m.
FEE: $145.00
DURATION: 100 hours including 25 hours in the laboratory (25 weeks) beginning 23 September

In this course the direct method will be used with instruction largely in Russian from the very beginning. The Russian Minimum Word List used at Moscow University will guide the choice of vocabulary. At the end of the course most students will be able to converse easily in Russian, to read a Soviet newspaper and to write straightforward letters in Russian.

CENTRE FOR CONTINUING EDUCATION

REGULAR PROGRAM

FIRST LEVEL

696-211Z-51

DAYS: Mondays 6 - 8 p.m.
FEE: $90.00
DURATION: 50 hours (25 weeks) beginning 22 September

This course will begin with the general characteristics of the Russian language, the alphabet, the phonetic value of letters, and the basic rules of grammar. It will include reading, oral and written exercises, and a gradual introduction to Russian culture and civilization.

SECOND LEVEL

696-221Z-71

DAYS: Wednesdays 6 - 8 p.m.
FEE: $90.00
DURATION: 50 hours (25 weeks) beginning 24 September
PREREQUISITE: 50 hours of Russian or equivalent

This course consists of grammatical drills and oral exercises, reading and translation of selected texts by modern Soviet Russian authors. On request, some time will be devoted to scientific Russian and if there is sufficient demand, a separate study group may be formed.

THIRD LEVEL

696-231Z-57

DAYS: Mondays 8 - 10 p.m.
FEE: $90.00
DURATION: 50 hours (25 weeks) beginning 22 September
PREREQUISITE: 100 hours of Russian or equivalent

This course is intended to help students to acquire a greater degree of aural comprehension and fluency in Russian while continuing the review of grammar.

FOURTH LEVEL

696-241Z-61

DAYS: Tuesdays 6 - 8 p.m.
FEE: $90.00
DURATION: 50 hours (25 weeks) beginning 23 September
PREREQUISITE: 150 hours of Russian or equivalent
ATTENDANCE REQUIREMENT: Not less than 2/3 of lectures

This course will be conducted entirely in Russian with emphasis on conversation. Points of grammar and syntax will be explained as the need arises. Discussions will be based in part on readings in Russian civilization and folklore. Those who wish to apply for the Certificate of Proficiency are required to complete additional reading and written work.

SPANISH

All classes limited to 25 students

Counselling: Students who need assistance in deciding the level at which they should register may telephone the Department of Spanish (392-4600 or 4601) between 9 a.m. and 5 p.m. after 1 September.

REGULAR PROGRAM

FIRST LEVEL

Two periods per week, ending in December:

697-211X-51

DAYS:	Mondays and Wednesdays 6 - 8 p.m.
FEE:	$85.00
DURATION:	45 hours (12 weeks) beginning 22 September

One period per week, ending in April:

697-211Z-51
697-211Z-67
697-211Z-71
697-211Z-87

DAYS:	Mondays 6 - 8 p.m. Tuesdays 8 - 10 p.m. Wednesdays 6 - 8 p.m. Thursdays 8 - 10 p.m.
FEE:	$90.00
DURATION:	50 hours (25 weeks) beginning week of 22 September

In this course, frequent and systematic drill is used to develop rapid response to spoken Spanish and to enable the student to read quickly. Use of the language laboratory is an integral part of the course.

SECOND LEVEL

697-221Z-51
697-221Z-71

DAYS:	Mondays 6 - 8 p.m. Wednesdays 6 - 8 p.m.
FEE:	$90.00
DURATION:	50 hours (25 weeks) beginning week of 22 September
PREREQUISITE:	50 hours of Spanish or equivalent

This course will be conducted entirely in Spanish and its aims are to speed up fluency, to achieve correctness of pronunciation, and to give a review of grammatical structures. Oral and written exercises will be given. Readings will be taken from modern Spanish and Spanish-American literature.

THIRD LEVEL

697-231Z-61

DAYS:	Tuesdays 6 - 8 p.m.
FEE:	$90.00
DURATION:	50 hours (25 weeks) beginning 23 September
PREREQUISITE:	100 hours of Spanish or equivalent

This course includes a review of grammar, phonetics, conversation, and cultural material, and will concentrate on readings in Spanish-American literature.

FOURTH LEVEL

697-241Z-61

DAYS:	Tuesdays 6 - 8 p.m.
FEE:	$90.00
DURATION:	50 hours (25 weeks) beginning 23 September
PREREQUISITE:	150 hours of Spanish or equivalent
ATTENDANCE REQUIREMENT:	Not less than 2/3 of lectures

This course will be similar to Third Level but will be devoted to readings in Spanish literature.

TRANSLATION

All classes limited

FEE: $100.00
DURATION: 50 hours (25 weeks) beginning week of 22 September

FIRST YEAR – METHODOLOGY AND PRACTICE OF TRANSLATION

698-311Z-51	DAYS:	Mondays 6 - 8 p.m.
698-311Z-61		Tuesdays 6 - 8 p.m.
698-311Z-77		Wednesdays 8 - 10 p.m.

This course will consist of one hour of French and one hour of English. It will be an introduction to the basic principles of translation through careful analysis of selected texts and practice work leading to improved skills in both French and English.

SECOND YEAR – TECHNICAL TRANSLATION I

698-321Z-61	DAYS:	Tuesdays 6 - 8 p.m.
698-321Z-77		Wednesdays 8 - 10 p.m.

As in First Year, this course will consist of one hour of French and one hour of English. The fields covered will be commercial correspondence, banking and finance.

THIRD YEAR – TECHNICAL TRANSLATION II

FRENCH SECTION

698-331Z-71	DAYS:	Wednesdays 6 - 8 p.m.
698-331Z-77		Wednesdays 8 - 10 p.m.

ENGLISH SECTION

698-332Z-81	DAYS:	Thursdays 6 - 8 p.m.

In this course the full period will be devoted to the language of the students' choice. The fields covered will be legal terminology, insurance, advertising and public relations.

FOURTH YEAR – GENERAL AND LITERARY TRANSLATION

PREREQUISITE: Certificate of Proficiency in Translation

FRENCH SECTION

698-341Z-77	DAYS:	Wednesdays 8 - 10 p.m.

ENGLISH SECTION

698-342Z-77	DAYS:	Wednesdays 8 - 10 p.m.

The material covered will be prose of literary quality ranging from the critical essay to the descriptive or psychological novel. Students will be encouraged to undertake the translation of major contemporary works as personal research projects.

8 LIBERAL ARTS

Program Co-ordinator
Mrs. J. Hollander
392-4905

A listing of instructors, textbooks, buildings and room numbers for all courses will be distributed at time of registration. Please ask for a copy.

REGULATIONS and PROCEDURES

Please see General Information, Section III.

IT IS THE RESPONSIBILITY OF EACH STUDENT TO READ, UNDERSTAND AND ABIDE BY THE REGULATIONS AND PROCEDURES PRINTED IN THIS BOOKLET.

*Asterisk indicates course will be repeated in January.

ARE YOU INTERESTED IN RECEIVING NOTICES OF SPECIAL SHORT-TERM COURSES THAT WILL BE OFFERED DURING THE COMING YEAR? SEND YOUR NAME AND ADDRESS TO: CENTRE FOR CONTINUING EDUCATION
772 SHERBROOKE STREET WEST, ROOM 206
MONTREAL, QUEBEC H3A 1G1

COMMUNICATION ARTS

ITALIAN HIGH RENAISSANCE ART

670-102X

DAY:	Mondays 7 - 9 p m.
FEE:	$50.00
DURATION:	12 lectures (24 hours) beginning 22 September

The few decades of the High Renaissance in Italy are of crucial importance for the development of Western Art and civilization during the following centuries. Artists such as Leonardo, Raphael, Michelangelo, Titian, Giorgione will be analyzed and discussed — their individual merits and their relationship to the ideas of their time and twentieth century man.

IMPRESSIONISM AND SYMBOLISM

670-103Y

DAY:	Mondays 7 - 9 p.m.
FEE:	$50.00
DURATION:	12 lectures (24 hours) beginning 19 January

The crucial developments in painting during the second half of the 19th Century, mainly in France. The rapid succession of new schools in visual arts and the culmination in the emergence of modern art at the turn of the century. Works of masters like Manet, Monet, Degas, Van Gogh and Cezanne will be systematically analysed and discussed.

THE ART OF LISTENING – PART I

***670-106X**

DAY: Thursdays 8 - 10 p.m.
FEE: $50.00
DURATION: 12 lectures (24 hours) beginning 25 September

A non-technical course for the listener designed to expand his perception and appreciation of music from the Baroque to the Twentieth Century, and to develop his awareness of those structural and stylistic aspects important in the understanding and enjoyment of music. Emphasis is upon non-technical analysis, relevant currents in the sister arts and works to be played by the Montreal Symphony Orchestra. Illustrated with tape recordings, slides and instruments. Class limited.

ART OF LISTENING – PART II

670-107Y

DAY: Thursdays 5:30 - 7:30 p.m.
FEE: $50.00
DURATION: 12 lectures (24 hours) beginning 22 January

This continuation of the preceding course now examines in greater depth specific works and their composers from Bach to Stravinsky. New areas to be discussed will include the prelude, the symphonic poem, the rhapsody, chamber music, the art song, program music and opera, along with works to be performed in Montreal's coming music season. Class limited.

THE CONCERTO

670-108X

DAY: Thursdays 5:30 - 7:30 p.m.
FEE: $50.00
DURATION: 12 lectures (24 hours) beginning 25 September

A non-technical investigation of the changing character of the concerto as it has evolved through the various aesthetic currents of the last three hundred years. Included for examination will be concerti for piano, violin, cello, flute and guitar by Vivaldi, Bach, Mozart, Beethoven, Chopin, Liszt, Tchaikovsky, Grieg, Brahms, Rachmaninoff, Gershwin, and Bartok, along with appraisals of legendary and contemporary virtuosi from Paganini to Horowitz. Class limited.

TWENTIETH CENTURY LITERATURE – PART I

670-200X

DAY: Wednesdays 8 - 10 p.m.
FEE: $50.00
DURATION: 12 lectures (24 hours) beginning 24 September

Short stories, novels, plays, and poetry by major twentieth century writers. Selection of texts will be discussed at the first meeting. The course will be conducted using a mixture of lecture and class discussion.

TWENTIETH CENTURY LITERATURE – PART II

670-201Y

DAY: Wednesdays 8 - 10 p.m.
FEE: $50.00
DURATION: 12 lectures (24 hours) beginning 21 January

A variety of modern writers and genres, demonstrating major literary themes of today. The course is a continuation of Part I but may be taken separately. The format of the course remains the same, but different works will be studied. Texts will be discussed at the first meeting of the course.

FREUD AND SHAKESPEARE

***670-202X**

DAY: Wednesdays 8 - 10 p.m.
FEE: $50.00
DURATION: 12 lectures (24 hours) beginning 24 September

An exploration of Shakespeare's non-dramatic poetry from two points of view — literary and psychoanalytic. Special stress will be given to such elements as the fear of death, narcissism, and bisexuality.

NORTH AMERICAN LITERATURE: THE OUTSIDER'S VISION

670-203X

DAY: Thursdays 6 - 8 p.m.
FEE: $50.00
DURATION: 12 lectures (24 hours) beginning 25 September

The Black, Indian-Eskimo and French speaking people of our continent have produced fresh, startling and controversial perspectives on North American life and values — and some brilliant literature. This course will study authors from each of these groups.

ABOUT WOMEN, BY WOMEN

670-204Y

DAY: Thursdays 6 - 8 p.m.
FEE: $50.00
DURATION: 12 lectures (24 hours) beginning 22 January

One of the remarkable achievements in Twentieth Century Literature, especially in Canada, is the creative contribution of women authors. This course will study the development of womanhood through stages of childhood, love, marriage, motherhood, to self-knowledge through the truthful, sensitive, profound voices of some of these authors.

COMMUNICATION, LITERATURE AND SOCIETY

670-205X

DAY: Thursdays 6 - 8 p.m.
FEE: $50.00
DURATION: 12 lectures (24 hours) beginning 25 September

This course is designed to provide an overview of human communication processes and phenomena. It will examine the interplay between psychological, social, linguistic, aesthetic and other factors underlying all of our communication and providing material on which theories of communication can be formulated.

INTRODUCTION TO DRAMA AND THEATRE

670-206Z

DAY: Wednesdays 6 - 8 p.m.
FEE: $95.00
DURATION: 25 lectures (50 hours) beginning 24 September

A study of the dramatic text and its realization in a theatre performance. Special attention will be paid to the following areas: The play and the playwright; The actor and art of acting; Design and stagecraft; Directors and directing; Audience and dramatic criticism. Plays to be studied will be announced at first class. Locally produced plays may be included as well as some television programs and films.

THEATRE OF THE ABSURD — ALIENATION OF MAN

***670-207X**

DAY: Mondays 6 - 8 p.m.
FEE: $50.00
DURATION: 12 lectures (24 hours) beginning 22 September

A study of Absurd Drama as a unique presentation of 20th Century man. What is Absurd Drama? What is the image of modern man? What is an Absurd World? How does one live an Absurd Life in an Absurd World? Through the study of many plays these questions and others will be explored.

PORTRAITS OF DRAMATIC WOMEN

670-208X

DAY: Wednesdays 6 - 8 p.m.
FEE: $50.00
DURATION: 12 lectures (24 hours) beginning 24 September

This is a survey course with the purpose of exploring the image of women to be found in great dramatic literature from early Greek drama to the present time.

INDIAN LANGUAGES OF NORTH AMERICA

670-210Z

DAY: Mondays 6 - 8 p.m.
FEE: $95.00
DURATION: 25 lectures (50 hours) beginning 22 September

An introduction to Indian languages of North America: a study of their distribution and classification with special attention to the characteristics of selected structural types; a consideration of certain socio-linguistic problems.

BIBLICAL ARCHAEOLOGY

670-211X

DAY: Tuesdays 6 - 8 p.m.
FEE: $50.00
DURATION: 12 lectures (24 hours) beginning 23 September

A survey of the civilizations of Palestine from the Natufians of 7000 B.C. until the time of Christ. The 12 lectures, illustrated with slides, will tie together the history of early Israel in the light of new discoveries in archaeology and new understandings of the ancient literature. Of interest to travellers.

SUMER — THE WORLD'S FIRST CIVILIZATION

670-212Y

DAY: Tuesdays 6 - 8 p.m.
FEE: $50.00
DURATION: 12 lectures (24 hours) beginning 20 January

This course will introduce the dynamic civilization of the Sumerians including its business, literature, art and language systems. The lectures will be illustrated with colour slides.

THE ARAB WORLD

670-215X

DAY: Thursdays 6 - 8 p.m.
FEE: $50.00
DURATION: 12 lectures (24 hours) beginning 25 September

This course will study the social and intellectual history of the Arab world, explaining the ideologies and trends of today. Presently counting 21 countries, stretching from the Indian Ocean to the Atlantic, with a population of 130 million, the Arab world plays an important part in the Third World (non-alignment, OAU).

GREEK CIVILIZATION (FROM ITS BEGINNINGS TO THE PERSIAN WARS) (3 credits)

114-200X

DAY: Mondays 6 - 8 p.m.
plus modular instructional periods
FEE: $60.00
DURATION: 13 weeks (26 hours) beginning 15 September

A survey of Greek civilization from its beginnings in the Bronze Age down through the Persian Wars, including art and architecture, literature, philosophy and religion, archaeology and history. This and 114-202Y are companion courses but may be taken separately. Both should be of interest to travellers to Greece.

GREEK CIVILIZATION (FIFTH CENTURY B.C. AND LATER) (3 credits)

114-202Y

DAY: Mondays 6 - 8 p.m.
plus modular instructional periods
FEE: $60.00
DURATION: 13 weeks (26 hours) beginning 12 January

A survey of Greek civilization of the 5th century B.C. including art and architecture, drama, philosophy and religion, archaeology and history. See preceding course.

INTRODUCTION TO GREEK MYTHOLOGY (3 credits)

114-203X

DAY: Wednesdays 6 - 8 p.m.
plus modular instructional periods
FEE: $60.00
DURATION: 13 weeks (26 hours) beginning 17 September

The Gods and Heroes of the Greeks. This course will consider the origins, formation and transmission of the Greek myths. It will examine the more important myths as they appear in literary sources (Homer, Hesiod and the dramatists) and as they are represented in Greek art. Some attention will also be paid to the more common themes of Greek myth, as well as to the cultural values and religious attitudes which they reflect.

GREEK DRAMA AND THEATRE (3 credits)

114-300Y

DAY: Wednesdays 6 - 8 p.m.
plus modular instructional periods
FEE: $60.00
DURATION: 13 weeks (26 hours) beginning 14 January

A study of the Greek dramatists, both tragic and comic, in the light of their plays, with special emphasis on the theatrical techniques of the authors and the means of production in the Greek theatre.

POETRY, LITERATURE AND MANAGEMENT

670-900X

DAY: Wednesdays 6 - 8 p.m.
FEE: $45.00
DURATION: 7 lectures (14 hours) beginning 1 October

This is a special course designed for those who wish to discuss great literature and its relevance to some of our present problems. Examples could range from the Serpent's salesmanship to Eve, the Performance Review of God with Adam, Jethro's advice to Moses on Delegation and Span of Control to modern songs such as "People who need people are the luckiest people in the world", or "What is more, I did it my way". Some might find lessons in the *Emperor's New Clothes* or *Alice in Wonderland*. All literature is open to us.

BASIC PRINCIPLES OF ART

671-100X

DAY: Mondays 7 - 10 p.m.
FEE: $70.00
DURATION: 12 weeks (36 hours) beginning 22 September

This introductory class will work in various media, exploring the nature of shape, line, texture, volume, colour — the basic principles of pictorial expression. Students will provide their own material. Class limited.

DRAWING

***671-101X**

DAY: Tuesdays 7 - 10 p.m.
FEE: $70.00
DURATION: 12 weeks (36 hours) beginning 23 September

This drawing class is for both beginners and intermediates. It will explore the fundamentals of graphic expression using various media, including charcoal, pencil, pen and ink, conté crayon. Students will provide their own materials. Class limited.

PAINTING

*671-102X	DAY:	Wednesdays 7 - 10 p.m.

671-103X-71		Wednesdays 6 - 8 p.m.
	FEE:	$60.00
	DURATION:	12 lectures (24 hours) beginning week of 22 September

Students will learn to plan an entire project including the establishment of a critical path, the planning of a house and each individual area of the house. There will be practical exercises in order to learn how to compile a portfolio.

BASIC INTERIOR DESIGN – PART II

671-104Y-51	DAYS:	Mondays 6 - 8 p.m.
671-104Y-71		Wednesdays 6 - 8 p.m.
	FEE:	$60.00
	DURATION:	12 lectures (24 hours) beginning week of 19 January
	PREREQUISITE:	Basic Interior Design — Part I

The subject of the second half of this course will be: Materials, Colours, Lighting and Furniture. The general method of presentation for Part I and Part II will be audio-visual and the student will be asked to work on some practical exercises.

RESIDENTIAL INTERIOR DESIGN – PART I

671-105X	DAY:	Tuesdays 6 - 8 p.m.
	FEE:	$60.00
	DURATION:	12 lectures (24 hours) beginning 24 September
	PREREQUISITE:	Basic Interior Design — Part I and Part II or some experience

This course is of particular value to people who are working in businesses related to Interior Design. It will deal with: Room analysis, Thinking with a pencil, The language of furniture arrangement, The law of contrasts, creative budgeting. The student will work on self-selected design projects.

RESIDENTIAL INTERIOR DESIGN – PART II

671-106Y	DAY:	Tuesdays 6 - 8 p.m.
	FEE:	$60.00
	DURATION:	12 lectures (24 hours) beginning 21 January
	PREREQUISITE:	Basic Interior Design — Part I and Part II or Residential Interior Design — Part I or equivalents

This course will cover: Enlightened Lighting, The Application of colour, Creating atmosphere, Psychology of Interior Design, Placing pictures and ornaments. The student will work on self-selected design projects.

CREATIVE WRITING

***671-200X**

DAY: Tuesdays 6 - 8 p.m.
FEE: $50.00
DURATION: 12 classes (24 hours) beginning 23 September

A course designed to aid the student with the type of writing he/she chooses, as well as giving an overview of various forms: short story, novel, play etc. Techniques, style, setting, character, description, dialogue, atmosphere, plot etc. will be covered in a situation of total student participation. Class limited.

WRITING FOR FILMS

671-201Z

DAY: Tuesdays 6 - 8 p.m.
FEE: $95.00
DURATION: 25 lectures (50 hours) beginning 23 September

An introduction to the writing of screen plays for feature films, including the development of ideas through synopsis and treatment stages up to final shooting script. Where and how to send completed scripts will be explored.

SPEECH WRITING AND DELIVERY

***671-202X**

DAY: Wednesdays 6 - 8 p.m.
FEE: $50.00
DURATION: 12 classes (24 hours) beginning 24 September

This course is designed to teach the student how to communicate effectively from the organization of a speech through to its final delivery. Emphasis will be on practical work: information gathering, idea development, presentation.

THEATRE, TELEVISION, FILM: DIRECTING AND PRODUCING

671-203Z

DAY: Mondays 8 - 10 p.m.
FEE: $95.00
DURATION: 25 lectures (50 hours) beginning 22 September

How to direct and/or produce for today's theatre including a comparative analysis of techniques used on stage, motion pictures, television. A complete concept from casting to final production. The second half will include field trips to studios of three media. Students will be working in a TV studio and film production house for a learning experience. This course is designed for those who have some practical experience but lack theory of the fundamentals.

EFFECTIVE TELEVISION COMMUNICATION

671-204X

DAY: Mondays 6 - 9 p.m.
FEE: $115.00
DURATION: 12 classes (36 hours) beginning 22 September

This course is designed for people who are presently responsible for (or those who are interested in) some aspect of television communication in a non-commercial environment. The student is introduced to the theory, equipment, techniques and practices of television production. Practical experience constitutes 60% of the course time.

BASIC ACTING TECHNIQUES

671-205Z

DAY: Thursdays 7 - 10 p.m.
FEE: $150.00
DURATION: 25 sessions (75 hours) beginning 25 September

This course is designed to give the beginning actor a foundation in the basic approach to the art of acting. It includes such areas as voice training, movement, communication of text, improvisation, and special acting techniques as well as an approach to the study of a role.

HUMAN BEHAVIOUR

INTRODUCTION TO PSYCHOLOGY

672-200Z

DAY: Tuesdays 8 - 10 p.m.
FEE: $95.00
DURATION: 25 lectures (50 hours) beginning 23 September

An introduction to basic methods and terminology. The course will cover biological issues in psychology, measurement methods, learning, motivation, and perceptual development. Human functioning will be treated in terms of emotion, problem solving, personality, psychological disorders. The lecturer's objective will be to develop the student through personal involvement and active observation.

PSYCHOLOGICAL DEVELOPMENT I

672-201X

DAY: Thursdays 6 - 8 p.m.
FEE: $50.00
DURATION: 12 lectures (24 hours) beginning 25 September

This course is designed for the interests of the general public, with or without a specialized background in psychology. Consideration will be given to processes of psychological development from birth to maturity in the areas of intelligence, perception and language. Format will consist of readings, films and discussion.

PSYCHOLOGICAL DEVELOPMENT II

672-202Y

DAY: Thursdays 6 - 8 p.m.
FEE: $50.00
DURATION: 12 lectures (24 hours) beginning 22 January

This is a continuation course of Psychological Development I although it may be taken separately. It will follow the processes of psychological development from birth to maturity in the areas of social behaviour, personality and emotion. Format similar to Part I.

HER BODY, THE BATTLEGROUND — PSYCHOLOGY OF WOMEN

672-203X

DAY: Wednesdays 8 - 10 p.m.
FEE: $50.00
DURATION: 12 lectures (24 hours) beginning 24 September

This course will attempt to question and answer problems of differences in sex roles, both political and scientific. It will take an interdisciplinary approach to important issues, using recent sociological, psychological, cross-cultural evidence. Hopefully, it will help men and women to achieve a more realistic picture of women and their potential while analysing prevailing myths about biological determinism, dependency and media images.

HUMAN RELATIONS I

672-230Z

DAY: Mondays 6 - 8 p.m.
FEE: $95.00
DURATION: 25 lectures (50 hours) beginning 22 September

This course is a broad introduction to human relations, stressing understanding of interpersonal experiences. Topics include perception, motivation, reaction to conflict, problem solving, group operations and communication, group pressures, conformity and independence, leadership, people and technology.

HUMAN RELATIONS II

672-231Z

DAY: Wednesdays 6 - 8 p.m.
FEE: $95.00
DURATION: 25 lectures (50 hours) beginning 24 September
PREREQUISITE: Introduction to Psychology or
Human Relations I or Equivalent

This course will develop and apply principles learned previously to increase self-understanding through psychological tests and interviews, observing and reporting on group discussions, etc. It will help participants apply knowledge about self and human interaction to formation of personal and career plans.

INTRODUCTION TO SOCIOLOGY

672-240Z

DAY: Tuesdays 6 - 8 p.m.
FEE: $95.00
DURATION: 25 lectures (50 hours) beginning 23 September

The history of sociology; some basic concepts used by sociologists; some classic problems in sociology; the structure and function of the family; the process of training new social members; stratification; the sociology of religion, deviance.

PHILOSOPHY, PSYCHOLOGY AND MORAL ISSUES

672-260X

DAY: Thursdays 7 - 9 p.m.
FEE: $50.00
DURATION: 12 lectures (24 hours) beginning 25 September

The relevance of contemporary psychological research to certain moral and legal concepts will be examined. Problems concerning responsibility, punishment, voluntary behaviour, altruism, mental illness will be discussed. Traditional philosophical and modern psychological standpoints (behaviourism, mechanism, humanism) will be considered in relation to specific moral controversies and debates.

SOUND OF THE CITY: SOCIAL PSYCHOLOGY OF ROCK

672-261X

DAY: Wednesdays 8 - 10 p.m.
FEE: $50.00
DURATION: 12 lectures (24 hours) beginning 24 September

This course will explore such issues as the origins of rock in the minority black American culture and how it became the preferred style of white American teenagers; the role of the mass media in its development; the reaction of parents, teachers and clergy; the role of women in rock and rock culture etc. It will also investigate rock as a medium of communication supplying new ideas about life, death, religion, politics, sex, drugs etc.

HEROES AND HERO WORSHIP

672-263X

DAY: Tuesdays 6 - 8 p.m.
FEE: $50.00
DURATION: 12 weeks (24 hours) beginning 23 September

This course will attempt to account for the phenomenon of hero worship in terms of mythology, history, sociology, psychology and art. A variety of heroic modes will be studied — culture hero, warrior, athlete, poet, musician, adventurer, intellectual, physician, prophet, politician, and anti-hero. Attention will be given to questions of changing ideals of heroism and whether heroes are necessary and beneficial or dangerous for mankind.

HUMAN BIOLOGY

672-280Z

DAY: Mondays 8 - 10 p.m.
FEE: $95.00
DURATION: 25 lectures (50 hours) beginning 22 September

A study of the structure and function of the heart, lungs, kidneys, eyes, brain and other human organs plus important body functions. Energy production, blood clotting, defence against infection, reactions to stress and other important body processes will be discussed.

CANADIAN STUDIES

CANADIAN ART HISTORY

***674-100X**

DAY: Tuesdays 7 - 9 p.m.
FEE: $60.00
DURATION: 12 lectures (24 hours) beginning 23 September

An environmental approach to the study of Canadian painting, sculpture, architecture and the decorative arts. Special emphasis on the influences of geography, history and settlement patterns. A study of the Canadian work of art with comparisons and contrasts to American and European works of the same period.

CANADIAN ARCHITECTURE

674-101X

DAY: Mondays 8 - 10 p.m.
FEE: $50.00
DURATION: 12 lectures (24 hours) beginning 22 September

The history of the Canadian built environment and its relation to the development of our lifestyles and society. The period concerned stretches from the pre-European to the post-industrial and cybernetic era.

CONTEMPORARY CANADIAN ART

***674-102X**

DAY: Thursdays 6 - 8 p.m.
FEE: $60.00
DURATION: 12 lectures (24 hours) beginning 25 September

A study of the Canadian Art scene from Borduas to the present time. This course will include discussion of painting, sculpture, graphic arts with some comparisons with the art of other countries important in today's movements and "schools" of art.

***674-103X**

DAY: Wednesdays 8 - 10 p.m.
FEE: $60.00
DURATION: 12 lectures (24 hours) beginning 24 September

A study of the many art forms of the Eskimo and North American Indian from earliest discovery to the present time. Comparisons will be made with the art of other cultures considering social, historical and geographical influences.

LITERATURE — ENGLISH CANADIAN LITERATURE

674-200X

DAY: Wednesdays 6 - 8 p.m.
FEE: $50.00
DURATION: 12 lectures (24 hours) beginning 24 September

This course is devoted to the study of some Canadian short stories and novels of the 19th and 20th centuries with the emphasis on the modern period. The fiction is approached chronologically but with close examination of the works themselves from a literary point of view.

LITERATURE – FRENCH CANADIAN LITERATURE

674-201Y

DAY: Thursdays 6 - 8 p.m.
FEE: $50.00
DURATION: 12 lectures (24 hours) beginning 22 January

A survey of the evolution of French Canadian literature with emphasis on the 20th century. A reading knowledge of French is recommended as some of the books to be studied have not been translated into English.

ANTHROPOLOGY – CANADA'S NATIVE PEOPLES

674-400X

DAY: Mondays 6 - 8 p.m.
FEE: $50.00
DURATION: 12 lectures (24 hours) beginning 22 September

A study of the Canadian Eskimo and Indian cultures. This course will try to place the contemporary problems of Canada's indigenous peoples in their historical context.

HISTORY – CANADA TO 1867

674-500X

DAY: Tuesdays 6 - 8 p.m.
FEE: $50.00
DURATION: 12 lectures (24 hours) beginning 23 September

A survey of the economic, political, military and social development of Canada from the pre-Columbian discoveries to Confederation. Particular attention will be given to the growth of French-Canadian institutions, the fur trade, the emergence of English-Canada, Maritime particularism, French-English relations and political tensions of the early nineteenth century.

HISTORY – CANADA SINCE 1867

674-501Y

DAY: Tuesdays 6 - 8 p.m.
FEE: $50.00
DURATION: 12 lectures (24 hours) beginning 20 January

A historical survey of contemporary Canada with special reference to Western expansion, Maritime development, Canadian-American relations, Quebec society, and Canada in two world wars. The development of modern political parties will be examined as well as the impact of urbanization and economic change.

HISTORY OF QUEBEC SINCE CONFEDERATION

674-502Y

DAY: Mondays 6 - 8 p.m.
FEE: $50.00
DURATION: 12 lectures (24 hours) beginning 19 January

A study of the economy, political and cultural development of Quebec since 1867, placing particular emphasis on the origins of the present political developments.

HISTORY OF THE CANADIAN LABOUR MOVEMENT

674-503X

DAY: Wednesdays 6 - 8 p.m.
FEE: $50.00
DURATION: 12 lectures (24 hours) beginning 24 September

A study of the labour movement in Canada from its beginnings to the present time. Sociological and historical as well as economic implications will be emphasized.

ENVIRONMENTAL LAW FOR CITIZENS (3 credits)

***495-472X**

DAY: Tuesdays 6 - 8 p.m.
FEE: $60.00
DURATION: 13 lectures (26 hours plus individual work assignment/projects) beginning 23 September

This course will delve into the basic legal aspects of environmental issues. Federal and provincial statutes, municipal legislation, court system and citizen action will be discussed.

MONTREAL — AUJOURD'HUI ET HIER

***674-504X**

DAY:	Mondays 6 - 8 p.m.
FEE:	$85.00
DURATION:	14 lectures (28 hours) plus one 3 hour Saturday morning city tour beginning 8 September
PREREQUISITE:	Bilingualism

This course will study the geography, history, culture, civic administration and artistic aspects of our city. The teaching will be done by several lecturers according to his field of expertise and each in his own language — French or English. Fee includes Saturday morning bus tour of the city on a date to be arranged during the term. Registration 11-15 August

SPECIAL COURSES FOR WOMEN

INTRODUCTION TO MANAGEMENT FOR WOMEN

***626-014X**

DAY:	Tuesdays 6 - 9 p.m.
FEE:	$85.00
DURATION:	13 classes (39 hours) beginning 9 September

The role of line and staff, span of control in functional areas such as planning production, finance, marketing, control, research and development and their interrelationship will be discussed. Also — shareholders', customers', workers' and managers' needs will be examined. One hour of class time will be devoted to preparation and discussion of assignments. Registration 11-15 August

BEHAVIOURAL DIMENSIONS OF WOMEN IN MANAGEMENT

***622-022X**

DAY:	Mondays 7 - 9 p.m.
FEE:	$60.00
DURATION:	30 hours beginning 22 September

This course will look at the situation women have to face as women in a management situation. It will be composed of lectures and some experiential work for each participant. The 30 hour session includes one weekend workshop. Class limited. Registration 11-15 August

TIMETABLE — LIBERAL ARTS

MONDAY

6:00	*670-207X	Theatre of the Absurd
	670-210Z	Indian Languages of North America
	114-200X	Greek Civilization — (from its Beginnings to Persian Wars)
	114-202Y	Greek Civilization — (5th Century B. C. and Later)
	671-103X-51	Basic Interior Design — Part I
	671-104Y-51	Basic Interior Design — Part II
	671-204X	Effective Television Communication
	672-230Z	Human Relations I
	674-400X	Anthropology — Canada's Native Peoples
	674-502Y	History of Quebec Since Confederation
	*674-504X	Montreal — Aujourd'hui et hier

7:00	670-102X	Italian High Renaissance Art
	670-103Y	Impressionism and Symbolism
	671-100X	Basic Principles of Art
	671-101Y-51	Drawing
	*622-022X	Behavioural Dimensions of Women in Management
8:00	671-203Z	Theatre, Television, Film: Directing and Producing
	672-280Z	Human Biology
	674-101X	Canadian Architecture

TUESDAY

6:00	670-211X	Biblical Archaeology
	670-212Y	Sumer — the World's First Civilization
	671-105X	Residential Interior Design — Part I
	671-106Y	Residential Interior Design — Part II
	*671-200X	Creative Writing
	671-201Z	Writing for Films
	672-240Z	Introduction to Sociology
	672-263X	Heroes and Hero Worship
	674-500X	History of Canada to 1867
	674-501Y	History of Canada since 1867
	*495-472X	Environmental Law for Citizens
	*626-014X	Introduction to Management for Women
7:00	*671-101X-61	Drawing
	*674-100X	Canadian Art History
8:00	672-200Z	Introduction to Psychology

WEDNESDAY

6:00	670-206Z	Introduction to Drama and Theatre
	670-208X	Portraits of Dramatic Women
	114-203X	Introduction to Greek Mythology
	114-300Y	Greek Drama and Theatre
	670-900X	Poetry, Literature and Management
	671-103X-71	Basic Interior Design — Part I
	671-104Y-71	Basic Interior Design — Part II
	*671-202X	Speech Writing and Delivery
	672-231Z	Human Relations II
	674-200X	English Canadian Literature
	674-503X	History of Canadian Labour Movement
7:00	*671-102X	Painting
	670-200X	Twentieth Century Literature — Part I
	670-201Y	Twentieth Century Literature — Part II
8:00	*670-202X	Freud and Shakespeare
	*672-203X	Her Body the Battleground: the Psychology of Women
	*672-261X	Sound of the City — Social Psychology of Rock
	*674-103X	Eskimo and North American Indian Art

THURSDAY

5:30	670-108X	The Concerto
	670-107Y	Art of Listening II
6:00	670-203X	North American Literature — the Outsider's Vision
	670-204Y	About Women, by Women
	670-205X	Communication, Literature and Society
	670-215X	The Arab World
	672-201X	Psychological Development I
	672-202Y	Psychological Development II
	*674-102X	Contemporary Canadian Art
	674-201Y	French Canadian Literature

7:00	671-205Z	Basic Acting Techniques
	672-260X	Philosophy, Psychology and Moral Issues
8:00	*670-106X	Art of Listening I

* denotes course will be repeated in January

X courses run from September — December
Y courses run from January — April
Z courses run from September — April

9 MANAGEMENT GRADUATE

Professor W. H. Ellis
Associate Director
392-6700

INTRODUCTION

This section of the Centre offers courses leading to the Diploma in Management, the MBA I Degree, and the Diploma in Management (Tourism).

COUNSELLING

Counselling will be available by appointment only up to 22 August. There will be no counselling during the registration period.

TRANSCRIPTS

Students registering for the first time must have arrangements made for an official transcript to be mailed to the Associate Director, Management-Graduate Program indicating the program in which they are registering.

EXAMINATIONS

An examination is held at the end of each course unless specifically exempted. Candidates who fail to pass a course may be permitted to write a supplemental examination. To qualify for supplemental privileges, students must first write the final examination in the course and obtain at least 40%. Candidates who fail to pass the supplemental examination will be required to repeat the course. Students who do not write a final exam in any course and fail to provide adequate proof of their absence must repeat the course.

Students will receive written confirmation of their examination or course results after each term. As the results of each course become available, they will be posted on the Notice Board in Strathcona Hall by STUDENT NUMBER. Results cannot be obtained by telephone.

REREADS

Students may request rereads of final exams on payment of the required $15.00 fee. Students wishing to apply for a reread must do so within 30 days following the posting of the final marks.

GRADING SYSTEM

The Centre uses the grading system common to the university. Unless otherwise noted in the description of an individual course or program, the grading will be as indicated on page 7 of the General Information.

A mark of A or B is a pass at the Graduate level; a mark of C is a pass at the Undergraduate level but does not count as a credit towards a Graduate Diploma.

LIBRARIES

Full library privileges are available to all students registered in the Management-Graduate Section at the following locations:

1) Management Library
   Samuel Bronfman Building
   1001 Sherbrooke Street West
2) McLennan Library
   McGill Campus

TUITION FEES

Students who have been reclassified into the first year of the MBA Program pay tuition fees at the rate of $19 per credit (i.e. $57 per course). This reduced rate is possible because the university receives grants for degree students from the Quebec Department of Education.

COURSE INFORMATION

A listing of instructors, books, buildings and rooms will be distributed at time of registration. Please ask for a copy.

REGULATIONS AND PROCEDURES

Please see General Information.

IT IS THE RESPONSIBILITY OF EACH STUDENT TO READ, UNDERSTAND, AND ABIDE BY THE REGULATIONS AND PROCEDURES PRINTED IN THIS BOOKLET.

NOTE: Unless otherwise indicated all courses will be repeated in January 1976.

DIPLOMA IN MANAGEMENT/MBA I

(In Cooperation with the Faculty of Management)

To meet the demand for the more advanced and broader training required by those graduates whose work is primarily administrative and managerial, the Centre for Continuing Education, in cooperation with the Faculty of Management, offers a series of courses leading to a Diploma in Management. While these courses are intended primarily for those interested in obtaining the Diploma, all courses are open to any graduate interested in an individual course.

Admission Requirements

1) Applicants must have a university degree with high standing from an approved university (exception indicated next paragraph). When registering, proof of university graduation must be provided and arrangements made for an official transcript to be mailed to the Associate Director, Management — Graduate Program indicating the program to be followed. This also applies to McGill graduates.
2) Some non-university graduates may be admitted on a provisional basis. After completing two subjects their records will be reviewed. Those who have distinguished themselves may be given permission to pursue the program as regular students on approval of the Faculty of Management. Provisional students include C.A.'s and Professional Engineers (who are not university graduates), Technical College graduates and those holding the H.N.C.
3) Students who have completed post-graduate level courses at a recognized university may apply for transfer of credits. An official description of the courses taken elsewhere and the marks obtained must be submitted before completing the first year of the program.
4) Students who have completed some of the required courses at the undergraduate level at McGill or elsewhere may substitute elective courses. In requesting exemption from required courses, the student must submit an official description of the content of the course he regards as equivalent and a transcript of his marks.
5) Candidates must obtain a mark of not less than 65% in each course. Those who fail to obtain 65% may under certain circumstances write a supplemental examination ($15.00), but if the standing obtained in the supplemental examination is less than 65%, the student must repeat the course to receive the Diploma credit. Candidates are permitted to repeat any course once only. No candidate who has failed more than three courses on the first attempt will be granted the Diploma.
6) The Diploma may be obtained in two years but the student is advised to spread the work over a longer period not exceeding seven years.

7) TEST FOR COLLEGE-ENTRANCE MATHEMATICS

All evening students entering the Diploma in Management courses for credit must demonstrate an adequate knowledge of college-entrance mathematics by successfully completing either: (1) Survey of Basic Mathematics 277-674 or (2) the Test for College-Entrance Mathematics.

Students failing the Test must enrol in Survey of Basic Mathematics 277-674 and successfully complete it before registering for any diploma courses, except Behavioural Science, Organizational Theory & Design and Economic Environment of the Firm.

Students wishing to sit the Test in July may do so by making an appointment.

Students who wish to sit the Test on any of the given dates mentioned below must register for it at the Centre 10 days prior to that date.

Thursday 7 August 1975	6 - 7 p.m.
Thursday 21 August 1975	6 - 7 p.m.
Thursday 16 October 1975	6 - 7 p.m.
Tuesday 6 March 1976	6 - 7 p.m.
Monday 7 June 1976	6 - 7 p.m.

Contact the Centre for the location of the Test on these dates. *A sample test and supplemental notes* are available from the Centre upon request.

There will be a $5.00 fee for the College-Entrance Mathematics Test.

CORE COURSES

Students wishing to qualify for the Diploma in Management must complete at least one course in each of the five groups listed below:

1) Basic Management Statistics (2)
   Statistics for Business Decisions (3)
   Introduction to Modelling Methods in Management (8)
2) Accounting — A Management Approach (4)
   Finance I (9)
3) Economic Environment of the Firm (10)
   Economic Analysis of Business (5)
4) Behavioural Science (7)
   Organizational Theory and Design (12)
5) Data Processing and Computers (6)
   Marketing Management (11)

All Diploma candidates must take, in addition to the above five required "core" courses five electives from the list below:

Investment Analysis (14)
Personnel and Industrial Relations (16)
Introduction to International Business (8)
International Financial Management (18)
International Marketing Management (19)
Industrial Production (15)
Sales Management (13)

Financial Accounting II (21)
Financial Accounting III (22)
Financial Accounting IV (23)
Financial Accounting V (24)
Management Control Systems (26)
Auditing I (27)
Auditing II (28)
Taxation I (29)
Taxation II (30)
Computer Systems — Audit and Control (31)
Law I (32)
Law II (33)
Management Policy (34)
Management Applications in Tourism (37)
Geography of Tourism (35)
Sociology of Tourism (36)
Hotel, Motel and Restaurant Management (38)
Recreation (39)
Resort Area Development (40)
Travel Agency Management (41)

DIRECT ENTRY TO THE SECOND YEAR OF THE M.B.A.

Admission Requirements

1) A university degree with high standing from an approved university.
2) The Admission Test for Graduate Study in Business and the Test of English as a foreign language (foreign students only whose first language is not English).

The diploma courses that must be taken by those who aspire to direct entry in the second year of the MBA are indicated below. It must be emphasized, however, that successful completion of this program does not automatically guarantee admission. Acceptance is dependent upon the student's overall average in the Diploma program, the number of openings and the competition for openings in any given year.

Students are recommended to follow the program in the sequence presented.

Basic Management Statistics (2)
Accounting — A Management Approach (4)
Economic Analysis of Business (5)
Data Processing and Computers (6)
Behavioural Science (7)
Introduction to Modelling Methods in Management (8)
Finance I (9)
Economic Environment of the Firm (10)
Marketing Management (11)
Organizational Theory and Design (12)

RECLASSIFICATION AS M.B.A. I STUDENTS

Candidates who have a university degree but are not yet ready for admission into the MBA I Program may register in the Diploma in Management Program. Application for reclassification as an MBA I student may be made after a candidate has completed FOUR of the required courses listed in the Direct Entry sequence with an average of 70% or over.

Those Diploma in Management students interested in being reclassified into the MBA I Program should apply by 30 November to:

Miss Brenda E. Martin
Supervisor Part-time Programs
Faculty of Management
McGill University
1001 Sherbrooke St. W.
Montreal, Quebec
H3A 1G5
Telephone 392-5938

C.A. GRADUATES

University graduates who have obtained their C.A. Diploma since 1969 may qualify for direct entry into the second year of the MBA Program after completion of the following four qualifying courses with at least a 70% average.

1) Basic Management Statistics (2)
2) Economic Analysis of Business (5)
3) Introduction to Modelling Methods in Management (8)
4) Marketing Management (11)

Students wishing to enter this program should bring proof of university graduation and the granting of their C.A. Diploma when they register.

PART-TIME M.B.A. II PROGRAM

In September 1972 the Faculty of Management introduced a part-time program leading to the degree of Master of Business Administration. The program will permit those who have obtained the McGill Diploma in Management, with satisfactory standing, to complete the second year of the MBA on a part time basis.

To be considered for the program, candidates must have completed the ten compulsory courses (or their equivalent).

The MBA II will consist of two required courses, a research paper and six electives. Students may take two additional electives in lieu of the research paper. Further information and application forms may be obtained from Miss Brenda Martin at the address indicated above.

SUMMER PROGRAM

All courses in the MBA I Program will be offered during the summer session to be held each May to June. This factor should be kept in mind by students who wish to plan a program that would allow them to complete the Diploma Program as expeditiously as possible.

CANDIDATES FOR THE DIPLOMA

Candidates who expect to receive the Diploma at spring Convocation 1976 are required to complete application forms, available at the Centre for Continuing Education. The completed forms together with a cheque for $40.00 made payable to McGill University must reach the Centre by 15 December 1975.

Candidates who expect to receive the Diploma at fall Convocation must return the completed forms to the Centre together with a cheque for $40.00 made payable to McGill University by 30 July 1976.

Students who pay the fee for obtaining the Diploma but fail to meet the graduation requirements do not have to pay again when they become eligible candidates at a subsequent convocation. Another non-thesis form, however, is required for submission to the Centre by the dates given above.

EXAMINATIONS

Final examinations will be held the weeks of 8 December and 15 December for all fall term courses in the Diploma in Management and in April for winter term courses.

Students who fail to pass a summer course must write the supplemental examination with the December final examinations. Those wishing to sit the supplemental must apply in writing or at Strathcona Hall, 772 Sherbrooke Street West by 15 November 1975.

COURSE DESCRIPTIONS

(1) SURVEY OF BASIC MATHEMATICS

277-674X-51

DAY: Mondays 6 - 9 p.m.
FEE: $85.00
DURATION: 13 lectures (39 hours) beginning week of 8 September

The first part of the course will be spent in an intensive review of basic mathematics including algebra, graphs, functions and logarithms. The last part of the course will introduce the student to calculus including limits, functions of one variable, differentiation, integration and applications; and to matrix algebra including determinants and solutions of simultaneous linear equations. The material covered in this course will be adequate to enable students to follow the usual mathematical applications in business, economics, statistics and operations research.

(2) BASIC MANAGEMENT STATISTICS

277-673X-51
277-673X-71

DAYS: Mondays 6 - 9 p.m.
Wednesdays 6 - 9 p.m.
FEE: $100.00 (includes $15 for use of computer)
DURATION: 13 lectures (39 hours) beginning week of 8 September
PREREQUISITE: College-entrance mathematics

Topics covered include: descriptive statistical analysis, common probability distributions (binomial, Poisson, normal), sampling procedures, sampling distributions, estimation, hypothesis testing, distribution-free procedures (tests of goodness of fit and independence), simple and multiple regression, correlation, one-way analysis of variance, classical time series analysis, Bayesian probability analysis. The course stresses the use of computer programs as an aid in statistical analysis.

(3) STATISTICS FOR BUSINESS DECISIONS (offered until 1976 only)

277-671X-51

DAY: Mondays 6 - 9 p.m.
FEE: $100.00 (includes $15 for use of computer)
DURATION: 13 lectures (39 hours) beginning 8 September
PREREQUISITE: Basic Management Statistics or equivalent.

Bernoulli and Poisson processes, Bayesian inference, decision theory, regression and correlation analysis, sampling theory, experimental design and analysis of variance, non-parametric methods, index numbers, classical time series analysis and exponential smoothing. Several exercises using statistical computer programs available on the McGill RAX system are assigned.

(4) ACCOUNTING — A MANAGEMENT APPROACH

271-611X-51
271-611X-61
271-611X-71

DAYS: Mondays 6 - 9 p.m.
Tuesdays 6 - 9 p.m.
Wednesdays 6 - 9 p.m.
FEE: $85.00
DURATION: 13 lectures (39 hours) beginning week of 8 September

This course focuses on the internal use of accounting data by management for planning and control purposes and in the decision-making process. Covered are the basic concepts of financial accounting, the analysis and interpretation of financial statements, cost and control concepts, budgeting and the measurement of performance.

(5) ECONOMIC ANALYSIS OF BUSINESS

279-692X-51
279-692X-71

DAYS: Mondays 6 - 9 p.m.
Wednesdays 6 - 9 p.m.
FEE: $85.00
DURATION: 13 lectures (39 hours) beginning week of 8 September

This course is primarily devoted to demonstrating the applications of economic theory and methodology in solving business problems. The following topics are discussed in some detail: demand, production, cost analysis, pricing, growth, concentration, profitability, and resource allocation of the firm. Marketing and sales forecasting techniques are also introduced briefly, and attention is given to opportunities for the application of incremental analysis.

(6) DATA PROCESSING AND COMPUTERS

273-631X-61
273-631X-62
273-631X-71

DAYS: Tuesdays 6 - 9 p.m. (Cobol)
Tuesdays 6 - 9 p.m. (Fortran)
Wednesdays 6 - 9 p.m. (PL1)
FEE: $135.00 (includes $50 for use of computer)
DURATION: 13 lectures (39 hours) beginning week of 8 September

The course covers a variety of topics including computer concepts, programming systems, time-sharing, file organization and modern applications of the computer. Instruction will be given in the use of one or more programming languages and students will be assigned problems involving actual use of computer.

(7) BEHAVIOURAL SCIENCE

272-621X-61
272-621X-71
272-621X-81

DAYS: Tuesdays 6 - 9 p.m.
Wednesdays 6 - 9 p.m.
Thursdays 6 - 9 p.m.
FEE: $85.00
DURATION: 13 lectures (39 hours) beginning week of 8 September

The implications for management and the essential concepts of social psychology such as motivation, perception, attitude change and organization, group and organizational dynamics will be the major emphasis of the course. Classroom discussion and student participation is encouraged.

(8) INTRODUCTION TO MODELLING METHODS IN MANAGEMENT

277-672X-51
277-672X-61

DAYS: Mondays 6 - 9 p.m.
Tuesdays 6 - 9 p.m.
FEE: $85.00
DURATION: 13 lectures (39 hours) beginning week of 8 September
PREREQUISITE: College entrance mathematics

Topics covered include: Introduction to Decision Analysis and Risk Attitudes, Inventory Control, Elementary Queueing Models, Simulation, Linear Programming Models and Extensions. The course stresses the formulation of problems and their solution by standard methods or computer packages.

(9) FINANCE I

274-641X-51	DAYS:	Mondays 6 - 9 p.m.
274-641X-61		Tuesdays 6 - 9 p.m.
274-641X-81		Thursdays 6 - 9 p.m.
	FEE:	$85.00
	DURATION:	13 lectures (39 hours) beginning week of 8 September
	PREREQUISITE:	Accounting 271-611 and Economic Analysis of Business 279-692

An introduction to financial management and the role of finance, both within the firm and the economy as a whole. The institutional framework of the firm is discussed, including legal forms, taxes, financing instruments and the capital markets. An introduction to the analytics of finance is presented including the pricing of financial instruments, simple models of capital market equilibrium, the financial structure of the firm, cost of capital, dividend policy, investment criteria for new capital spending proposals, and working capital management.

(10) ECONOMIC ENVIRONMENT OF THE FIRM

279-691X-61	DAYS:	Tuesdays 6 - 9 p.m.
279-691X-71	(John Abbott College Kirkland Campus)	Wednesdays 7 - 10 p.m.
279-691X-81		Thursdays 6 - 9 p.m.
	FEE:	$85.00
	DURATION:	13 lectures (39 hours) beginning week of 8 September

This course examines the main macro-economic mechanisms, i.e. income determination and the multiplier theory as well as fiscal policy; the level of investment, the demand for money and the rate of interest as well as the Canadian banking system and deposit creation; the general equilibrium of product and money markets, and monetary and fiscal policies; the dynamics of investment, the employment sector, and the price level and inflation; the balance of payments and international trade as well as methods of dealing with balance-of-payments disequilibria.

(11) MARKETING MANAGEMENT

275-651X-51	DAYS:	Mondays 6 - 9 p.m.
275-651X-61	(John Abbott College Kirkland Campus)	Tuesdays 7 - 10 p.m.
275-651X-71		Wednesdays 6 - 9 p.m.
	FEE:	$85.00
	DURATION:	13 lectures (39 hours) beginning week of 8 September

A combination of lectures, and case studies involving team-work will be used. Lectures and text material will cover the marketing concept, law, buyer, behaviour, product-policy, advertising, pricing, distribution, research, and marketing planning. Canadian content will be used where appropriate. Case studies at weekly intervals will provide opportunities for involvement in problem-solving.

(12) ORGANIZATIONAL THEORY AND DESIGN

272-623X-51	DAYS:	Mondays 6 - 9 p.m.
272-623X-81		Thursdays 6 - 9 p.m.
	FEE:	$85.00
	DURATION:	13 lectures (39 hours) beginning week of 8 September

The course is aimed at studying how organizations are designed. The focus is on the relationship between the nature of the external environment of the organization, the technology it uses, and the management style, the goals, the organizational structure, the behaviour of individuals and groups in the organization, and its performance. A systems view is adopted. Implications for effective design of organizations are drawn.

(13) SALES MANAGEMENT

606-630Y-51

DAY: Mondays 6 - 9 p.m.
FEE: $85.00
DURATION: 13 lectures (39 hours) beginning week of 12 January 1976

An analytical study of the techniques and policies employed in the operation of a sales organization. The approach is from the viewpoint of the sales manager of an enterprise. Extensive use will be made of case materials in considering the problems of recruiting, training, controlling and managing the sales force. Sales appeals, quotas, and sales analysis and forecasting will also be discussed.

(14) INVESTMENT ANALYSIS

606-430X-51

DAY: Mondays 6 - 9 p.m.
FEE: $85.00
DURATION: 13 lectures (39 hours) beginning week of 8 September

This course deals with security analysis and investment techniques, covering the different types and classes of securities. The sources of information, methods of compiling statistics, and assessment of comparative values are discussed, together with portfolio objectives and differing philosophies of investment management. Broad economic trends and international political climates affecting security values are analysed.

(15) INDUSTRIAL PRODUCTION

606-820X-61

DAY: Tuesdays 6 - 9 p.m.
FEE: $85.00
DURATION: 13 lectures (39 hours) beginning week of 8 September

An examination of the Production System and its sub-systems. The design of Production Systems (Layout of facilities, Job Design) and Operations Planning and Control constitute the principal topics. Traditional concepts and analytical techniques will be developed concurrently.

(16) PERSONNEL AND INDUSTRIAL RELATIONS

606-930Y-71

DAY: Wednesdays 6 - 9 p.m.
FEE: $85.00
DURATION: 13 lectures (39 hours) beginning week of 12 January 1976

This course will be concerned with the general area of industrial relations, which includes an examination of the personnel function in modern industry. The use of behavioural science in industry will be discussed and analysed. Trade unionism and its functions in the United States and Canada will be examined as well as the nature of industrial conflict and the role of the state in law and dispute settlement machinery.

(17) INTRODUCTION TO INTERNATIONAL BUSINESS

278-686X-51

DAY: Mondays 6 - 9 p.m.
FEE: $85.00
DURATION: 13 lectures (39 hours) beginning week of 8 September

This course seeks to develop conceptual and analytic skills necessary to formulate feasible and effective management policies in multinational environments. It examines both levels of the international businessman's world: the environment (economic, political and social) within which he will be operating, and the new dimensions of his traditional management operations. A combination of lectures, discussions and case studies will be used.

(18) INTERNATIONAL FINANCIAL MANAGEMENT

278-482Y-81

DAY:	Thursdays 6 - 9 p.m.
FEE:	$85.00
DURATION:	13 lectures (39 hours) beginning week of 12 January 1976

This course examines operational problems of financial management in the multinational enterprise; forecasting adversities in the international finance environment; managing foreign exchange risk; transfer pricing and profit remittance policy; multinational capital budgeting; use of Euro Dollars and overseas sources of capital; consolidation of financial statements, etc.

(19) INTERNATIONAL MARKETING MANAGEMENT

275-660Y-71

DAY:	Wednesdays 6 - 9 p.m.
FEE:	$85.00
DURATION:	13 lectures (39 hours) beginning week of 12 January 1976

This course will analyse the major forms of international marketing; the impact of differing environments upon marketing policies and strategies; the segmentation of multinational markets; the development of international channel systems; the roles of marketing in developing countries, in communist countries and in integrated markets and trade blocs.

DIPLOMA IN MANAGEMENT (Tourism)

This Diploma in Management Program will enable qualified university graduates to pursue studies in the fields of Tourism. It will provide a career opportunity for individuals who aspire to managerial positions in a rapidly growing industry.

Admission Requirements

Applicants must have a university degree from an approved university. When registering, proof of university graduation must be provided and arrangements made for an official transcript to be mailed to the Associate Director, Management — Graduate Program.

For further details see Diploma in Management, Page 79.

CORE COURSES

Students wishing to qualify for the Diploma in Management (Tourism) must complete a total of ten courses, seven of which are "core" courses with three being selected from the group of electives.

1) Accounting — A Management Approach (4)
2) Finance I (9)
3) Economic Environment of the Firm (10)
4) Marketing Management (11)
5) Geography of Tourism (35)
6) Sociology of Tourism (36)
7) Management Applications in Tourism (37)

Courses one to four inclusive are offered as part of the Diploma in Management (M.B.A. 1) Program.

ELECTIVES

(Select any three)
Hotel, Motel and Restaurant Management (38)
Recreation (39)
Resort Area Development (40)
Travel Agency Management (41)

EXAMINATIONS

Final examinations will be held the weeks of 8 December and 15 December for all courses commencing in September.

COURSE DESCRIPTIONS

Accounting — A Management Approach (4)
Finance I (9)
Economic Environment of the Firm (10)
Marketing Management (11)

For course descriptions on the above see the Diploma in Management Program.

(35) GEOGRAPHY OF TOURISM

608-830X-51

DAY:	Mondays 6 - 9 p.m.
FEE:	$85.00
DURATION:	13 lectures (39 hours) beginning 8 September

The spatial aspects of tourism and recreation, geographical factors influencing tourism, climate, topography, interrelationship between human society and physical environment, and different forms of entrepreneurship in the economic geography of different levels of economic development will be covered.

(36) SOCIOLOGY OF TOURISM

608-835X-81

DAY:	Thursdays 6 - 9 p.m.
FEE:	$85.00
DURATION:	13 lectures (39 hours) beginning 11 September

Designed to study the philosophy, components, objectives and implications of vacation travel. It includes the motivation for pleasure travel, development of ethnic and class grouping, theories of social change and an appreciation of the cultural factors of the world's countries.

(37) MANAGEMENT APPLICATIONS IN TOURISM

608-610X-71

DAY:	Wednesdays 6 - 9 p.m.
FEE:	$85.00
DURATION:	13 lectures (39 hours) beginning 10 September
PREREQUISITE:	Accounting — A Management Approach and Finance I

The principles and philosophy of tourism development will be covered with emphasis on financial, organizational, and decision-making theories as they relate to management. The impact of cultural differences on business organizations will be an integral part of the course.

(38) HOTEL, MOTEL AND RESTAURANT MANAGEMENT

608-840X-71

DAY: Wednesdays 6 - 9 p.m.
FEE: $85.00
DURATION: 13 lectures (39 hours) beginning 10 September

The organization of hotel operations, departmental breakdown and responsibilities of hotels and motels are covered along with the fiscal aspects of management. Emphasis will be placed on the functions of organization, supervision, and human relationships.

(39) RECREATION

608-855Y-71

DAY: Wednesdays 6 - 9 p.m.
FEE: $85.00
DURATION: 13 lectures (39 hours) beginning 14 January 1976

A study of the future requirements for leisure and recreation and of their fulfilment through the provision of appropriate tourist facilities. The role and character of outdoor recreation is related to the physical characteristics of Canada.

(40) RESORT AREA DEVELOPMENT

608-860Y-61

DAY: Tuesdays 6 - 9 p.m.
FEE: $85.00
DURATION: 13 lectures (39 hours) beginning 13 January 1976

A comprehensive examination will be made of the interrelationships of social, economic and physical aspects of total tourist destination development within a country or region. The emphasis is on the physical development of tourist centres and resort areas.

(41) TRAVEL AGENCY MANAGEMENT

608-870X-81

DAY: Thursdays 6 - 9 p.m.
FEE: $85.00
DURATION: 13 lectures (39 hours) beginning 11 September

The course will deal with the fundamental management principles for competent, effective and profitable travel agency operations. Among the topics covered will be office organization, financial administration, employee development, and performance evaluation.

10 MANAGEMENT C.A. PROGRAM

Professor D. Gobeil
Associate Director
392-6708

INTRODUCTION

This section of the Centre offers courses leading to the Diploma of the Order of Chartered Accountants of Quebec (C.A.).

COUNSELLING

Counselling will be available by appointment only up to 22 August. There will be no counselling during the registration period.

TRANSCRIPTS

Students registering for the first time must have arrangements made for a transcript to be mailed to the Associate Director, C.A. Program in order to determine their program of studies.

REREADS

Students may request rereads of final exams on payment of the required $15.00 fee. Students wishing to apply for a reread must do so within 30 days following the posting of the final marks.

GRADING SYSTEM

The Centre uses the grading system common to the university. Unless otherwise noted in the description of an individual course or program, the grading will be as indicated on page 7 of the General Information.

A mark of A or B is a pass at the Graduate level; a mark of C is a pass at the Undergraduate level but does not count as a credit towards a Graduate Diploma.

LIBRARIES

Full library privileges are available to all students registered in the Management-Graduate Section at the following locations:

1) Management Library
   Samuel Bronfman Building
   1001 Sherbrooke Street West
2) McLennan Library
   McGill Campus

COURSE INFORMATION

A listing of instructors, books, buildings and rooms will be distributed at time of registration. Please ask for a copy.

REGULATIONS AND PROCEDURES

Please see General Information.

IT IS THE RESPONSIBILITY OF EACH STUDENT TO READ, UNDERSTAND AND ABIDE BY THE REGULATIONS AND PROCEDURES PRINTED IN THIS BOOKLET.

NOTE: Unless otherwise indicated all courses will be repeated in January 1976.

DIPLOMA OF THE ORDER OF CHARTERED ACCOUNTANTS OF QUEBEC

The Order of Chartered Accountants of Quebec conducts its own qualifying examinations but requires that candidates be recommended by McGill University as having successfully completed the program as determined by the C.A. syllabus. To meet this requirement, students must have passed or been granted exemption from the courses set out below. Students who wish to follow this program must have a university degree from a recognized university and also register with the Order.

The Order of Chartered Accountants of Quebec

CHANGES IN THE C.A. PROGRAM

Students presently enrolled and those entering the C.A. Program in the Fall of 1975 should note that a number of changes have been made in the program.

1) All C.A. students entering the program who do not receive an exemption from Survey of Basic Mathematics 277-674 must demonstrate an adequate knowledge of college-entrance mathematics by successfully completing either: (1) Survey of Basic Mathematics or (2) the Test for College-Entrance Mathematics.
(See details on the College-Entrance Test on page 80).

2) Students not exempt from Management I and/or Management II will be required to take Management Policy.

3) For most of the non-accounting courses, C.A. students will register in the equivalent MBA courses, satisfactory completion of which will count for credit towards an MBA should students wish to proceed to this degree after completing the C.A. requirements.

4) Candidates must obtain a mark of not less than 65% in each course. Those who fail to obtain 65%, but have attained at least 40%, may write a supplemental examination (fee $15.00). If the standing obtained in the supplemental is less than 65%, the student must repeat the course. Candidates are permitted to repeat any course ONCE only.

5) A candidate who has failed more than one-third of the courses stipulated as the number he was required to take at the outset of his program commencing in the Fall of 1974, will NOT be allowed to continue and will accordingly have to withdraw from the program. For this purpose only, one failure shall be defined as a failure at the final examination and the supplemental examination. If a student receives less than 40% in a course and is therefore not eligible to write a supplemental, such failure will count as one of that student's permitted number of failures. However, students who fail a course but receive a mark of 40% and over and thereby have the privilege of writing a supplemental, will forfeit the privilege for that particular supplemental if they elect to re-register for the course before writing the supplemental.

6) The maximum number of courses each student may take in any term is two.

SUMMER PROGRAM

Courses offered in conjunction with the Diploma in Management summer session to be held each May to June will be available to C.A. students. Further details on other C.A. courses to be offered in the Summer of 1976 will be announced at a later date and this factor should be kept in mind by students who wish to plan for subsequent courses.

EXAMINATION DATES:

First Term:
8 - 19 December 1975

Second Term:
3 - 7 May 1976

NOTE: Students who fail to pass a summer course must write the supplemental examination with the December final examinations. Those students wishing to sit the supplemental must apply in writing or at Strathcona Hall, 772 Sherbrooke Street West by 15 November 1975.

COURSE DESCRIPTIONS

(20) FINANCIAL ACCOUNTING I

271-501X

DAY: Thursdays 6 - 9 p.m.
FEE: $85.00
DURATION: 13 lectures (39 hours) beginning 11 September

Introduction to accounting principles and concepts; measurement of accounting income; preparation of financial statements; balance sheet classifications; depreciation; manufacturing statements.

(21) FINANCIAL ACCOUNTING II

271-502X

DAY: Tuesdays 6 - 9 p.m.
FEE: $85.00
DURATION: 13 lectures (39 hours) beginning 9 September
PREREQUISITE: Financial Accounting I or equivalent

A detailed review of the accounting for current and long term assets and liabilities, intangibles and shareholders' equity; determination of accounting income and the treatment of prior period adjustments and extraordinary items; working capital and flow of funds; financial statement presentation; partnerships. Current practices and the relevant CICA recommendations will be reviewed in terms of theoretical concepts and principles.

(22) FINANCIAL ACCOUNTING III

271-503X

DAY: Wednesdays 6 - 9 p.m.
FEE: $85.00
DURATION: 13 lectures (39 hours) beginning 10 September
PREREQUISITE: Financial Accounting II or equivalent

The underlying concepts and accounting treatment of intercorporate investments, business combinations, purchases and pooling of interests, including a detailed examination of the CICA recommendations. Reorganizations; valuation of business enterprises; branches — domestic & foreign; consignments; installment sales; estate and trust accounting.

(23) FINANCIAL ACCOUNTING IV

271-604X

DAY: Thursdays 6 - 9 p.m.
FEE: $85.00
DURATION: 13 lectures (39 hours) beginning 11 September
PREREQUISITE: Financial Accounting III or equivalent

Advanced topics in financial accounting including; earnings per share; diversified operations reporting; foreign currency translation; statement of change in financial position; shareholders' equity — retained earnings, extraordinary items, prior period adjustments; financial statement presentation and footnotes; interim reporting and subsequent events and contingencies; accounting for prospectuses, pension costs and corporate income taxes; specialized accounting — financial institutions, fund, real estate, construction, lease, extractive industries and franchises. Detailed study of the relevant CICA and Canada Corporations Act requirements.

(24) FINANCIAL ACCOUNTING V

271-605X

DAY: Tuesdays 6 - 9 p.m.
FEE: $85.00
DURATION: 13 lectures (39 hours) beginning 9 September
PREREQUISITE: Financial Accounting III or equivalent

The theory underlying current Canadian accounting practice. Considerable emphasis will be given to the CICA accounting recommendations, exposure drafts and current literature required by the CA syllabus. Topics will include: Accounting principles and conventions; current and long term assets and liabilities; human resource accounting; intercorporate investments, business combinations and goodwill; price level and current value accounting; valuation and measurement of income; published forecasts and other current developments.

(25) MANAGERIAL ACCOUNTING

271-521X

DAY: Thursdays 6 - 9 p.m.
FEE: $85.00
DURATION: 13 lectures (39 hours) beginning 11 September
PREREQUISITE: Financial Accounting II or equivalent

Introduction to accounting for management. Elements of cost; job order and process cost systems; budgeting; standard costs and analysis of variances; cost/volume/profit relationships; variable costing; relevant costs.

(26) MANAGEMENT CONTROL SYSTEMS

271-622X

DAY: Tuesdays 6 - 9 p.m.
FEE: $85.00
DURATION: 13 lectures (39 hours) beginning 9 September
PREREQUISITE: Managerial Accounting or equivalent

This course focuses on planning and control of accounting information systems. Such topics as — specifying relevant data for various decision models, cost control and statistical techniques, behavioural dimensions of accounting control systems, budgeting, and performance evaluation — are covered.

(27) AUDITING I

271-531X

DAY: Mondays 6 - 9 p.m.
FEE: $85.00
DURATION: 13 lectures (39 hours) beginning 8 September
PREREQUISITE: Financial Accounting II or equivalent

Nature and purpose of auditing; appointment, remuneration, powers, duties and responsibilities of an auditor; internal control; audit programs; financial statement presentation; procedures for verification of items in financial statements; audit reports.

(28) AUDITING II

271-632X

DAY: Wednesdays 6 - 9 p.m.
FEE: $85.00
DURATION: 13 lectures (39 hours) beginning 10 September

11 MANAGEMENT

UNDERGRADUATE AND CERTIFICATE PROGRAMS

Professor E. Burnett
Associate Director
392-6704

INTRODUCTION

The Undergraduate and Certificate programs offered by this section of the Centre for Continuing Education are designed for students of high calibre and educational promise. The programs are built in such a way that students will be afforded the opportunity to fulfill the requirements of various professional groups and, at the same time, proceed towards completing a Bachelor of Commerce degree in the Faculty of Management at McGill. Students are urged to keep both their academic and professional goals in mind as they choose their courses. Generally, the B.Com. is a longer and more profound commitment on the part of the student. Students should seek admission to the degree program as early in their education as possible. See page 107 concerning the Bachelor of Commerce for part-time students.

AWARDS AND CO-OPERATING ORGANIZATIONS

This section offers the Bachelor of Commerce for part-time students and the following McGill Certificates:

Administration
Appraisal of Real Estate
Banking
Business Communications
Insurance Brokerage
Marketing
Systems Design
Transportation

Many organizations give professional and career acceptance to the McGill courses as well as offering their own external diplomas and certificates. The following organizations are interested in students as potential members. See pages 110 to 120 for full descriptions.

Administrative Management Society
Appraisal Institute of Canada
Association for Systems Management
Canadian Credit Institute
Canadian Institute of Management
Canadian Institute of Travel Counsellors (Quebec)
Canadian Public Relations Society (Quebec) Inc.
Chartered Institute of Secretaries and Administrators
Corporation of Certified General Accountants of Quebec
Corporation of Industrial Accountants of Quebec
Corporation Professionnelle des Evaluateurs Agréés du Québec
Institute of Canadian Bankers
Institute of Internal Auditors
Insurance Brokers' Association of the Province of Quebec
International Association of Business Communicators

EXAMINATIONS

An examination is held at the end of each course unless specifically excepted. Please see the General Information section for dates. Candidates who fail to pass the course may be permitted to write a supplemental examination in July. To qualify for supplemental privileges, students must obtain at least 40% in the course.

Candidates who fail to pass the supplemental examination will be required to repeat the course.

Students will receive written confirmation of their examination or course results after each term. As the results of each course become available, they will be posted on the notice board in Strathcona Hall by STUDENT NUMBER. Results can NOT be obtained by telephone.

GRADING SYSTEM

The Centre uses the grading system common to the University. Unless otherwise noted in the description of an individual course or program the grading system will be as indicated in Section 3 of the General Information. See note on passing grades in the paragraph on Conditions below.

LIBRARIES

Full library privileges are available to all registered students at the following locations:

1) The Management Library
   Samuel Bronfman Building
   1001 Sherbrooke Street West
2) The McLennan Library
   McGill Campus

COURSE INFORMATION

A listing of instructors, text books, buildings and room numbers for all courses will be distributed at time of registration. Please ask for a copy.

REGULATIONS AND PROCEDURES

Please see General Information Section 3 of calendar.

IT IS THE RESPONSIBILITY OF EACH STUDENT TO READ, UNDERSTAND, AND ABIDE BY THE RULES AND PROCEDURES PRINTED IN THIS BOOKLET.

GENERAL REQUIREMENTS

ADMISSION

Candidates normally will be mature students or CEGEP graduates.

CONDITIONS

All certificate programs require the completion of 48 credits within a period of seven years.

Membership in the association co-operating with McGill in offering some of these programs is recommended and in some cases required for students proceeding towards the "certificate" offered by the association. For McGill Certificates in Management, a minimum mark of 55% in each subject is required. Students should become thoroughly familiar with the regulations of their association.

GRADUATION

Students who plan to complete the requirements for a Certificate in Management in the spring of 1976 may obtain an application to graduate from the Centre for Continuing Education. Students should list the courses completed, the year and the marks obtained. Please state the certificate for which the application is being made and enclose a cheque for $5.00 payable to McGill University.

Applications must reach the Centre before 31 January 1976. Applications received after that date and up to the final date of 31 March must be accompanied by a cheque for $10.00.

Certificates will be awarded at the spring convocation of the Centre for Continuing Education.

COURSE EVALUATIONS

The Centre seeks continuous feedback from its students about the courses offered. To this end students are expected to evaluate their courses each term.

CORE COURSES IN B.COM. PROGRAM FOR FULL-TIME DAY STUDENTS		B.COM. CORE COURSES IN THE CENTRE FOR CONTINUING EDUCATION	
ACCOUNTING — 280-212	(3 credits)	Introduction to Financial Accounting (1)	(3 credits)

		and	
		Principles of Economics II (61)	(3 credits)
MANAGERIAL ECONOMICS — 280-393	(3 credits)	Managerial Economics (62)	(3 credits)

To help you locate the course description, the number in brackets beside a course title refers to the Course Description listing. See page 121.
*The courses with an asterisk will count only 3 credits towards a B.Com. core, the other 3 credits being applied to B.Com. electives.
A supplement to the 1975/76 Bachelor of Commerce calendar is available from the Supervisor, Part-time Programs.

COUNSELLING

Certain associations will be available for consultation during registration (11 August to 15 August 1975 and 5 January to 9 January 1976) but there will be no academic counselling during the registration periods. Further information and help in course choice is available by calling 392-6704.

TUTORIALS

In courses where tutorials are included, 6 hours of extra tuition will be made available to students at times outside of regular class hours.

PROGRAMS

BACHELOR OF COMMERCE FOR PART-TIME STUDENTS

The B.Com. program for part-time students in the Faculty of Management has been designed to be of assistance to those students who, for various reasons, cannot attend the university during the daytime. The evening courses are offered during the fall, winter and summer. They are the same standard as, and are similar to, the daytime courses.

The B.Com. courses are offered by the Centre for Continuing Education in co-operation with the Faculty of Management. All B.Com. students, after acceptance, must present a course approval form when registering with the Centre for Continuing Education.

All students will have their programs approved and advised by the Faculty of Management. The courses will only form a degree program if you have been accepted by the Faculty of Management.

All correspondence and enquiries should be addressed to Miss Brenda E. Martin, Supervisor, Part-time Programs, Faculty of Management, McGill University, 1001 Sherbrooke St. W., Montreal, Quebec H3A 1G5. (Telephone: 392-5938)

McGILL CERTIFICATE IN MANAGEMENT (Administration)

Students may qualify for the McGill Certificate by completing 24 credits from the B.Com. core plus 24 credits from the credit courses offered by the Centre for Continuing Education for a total of 48 credits.

McGILL CERTIFICATE IN MANAGEMENT (Appraisal of Real Estate)

Students may qualify for the McGill Certificate by completing the following program (a total of 48 equivalent credits):

36 credits as follows:	*Credits*
Appraisal of Real Estate I (66) — non-credit equivalent	6
Appraisal of Real Estate II (67) — non-credit equivalent	6
Appraisal of Real Estate III (68) — non-credit equivalent	6
Introduction to Financial Accounting (1)	3
Introduction to Management Accounting (6)	3
Statistics I (53)	3
Statistics II (54)	3
Marketing Management I (36)	3
Mathematics of Finance (51)	3
12 credits from:	
Principles of Economics I (60)	3
Principles of Economics II (61)	3
Land Economics (will be offered in 1976/77)	3
Shopping Centres and Downtown Retail Locations (85) — non-credit equivalent	3

Communication Skills for Managers (22)	3
Management Information Systems I (23)	3
Building Construction and Cost Estimating (will be offered in 1976/77)	3
Law (will be offered in 1976/77)	3
Introduction to Organizational Behaviour (16)	3
Marketing Research (39)	3

McGILL CERTIFICATE IN MANAGEMENT (Banking)

Students may qualify for the McGill Certificate by completing 36 credits from the B.Com. core courses plus 12 credits from the options in the Diploma of the Institute of Canadian Bankers (a total of 48 credits).

McGILL CERTIFICATE IN MANAGEMENT (Business Communications)

(Pending academic approval of this program by the University authorities.) Students may qualify for the McGill Certificate by completing 48 credits as follows:

18 credits as follows:	*Credits*
A Practical Course in Public Relations Management I (71) — non-credit equivalent	3
A Practical Course in Public Relations Management II (72) — non-credit equivalent	3
Internal Communications Management I (69) — non-credit equivalent	3
Internal Communications Management II (70) — non-credit equivalent	3
Introduction to Organizational Behaviour (16)	3
Business Administration I (50A)	3
12 credits from:	
Social Psychology (15)	3
Group Dynamics and Interpersonal Relations (18)	3
Communication Skills for Managers (22)	3
Marketing Management I (36)	3
Marketing Research (39)	3
Advertising Management (40)	3
Business Administration II (50B)	3
6 credits from the B.Com. core — excluding those mentioned above	6
12 credits freely chosen from the Centre's calendar	12

Recommended: Business Writing in French — 686-352X (Languages)

McGILL CERTIFICATE IN MANAGEMENT (Insurance Brokerage)

Students may qualify for the McGill Certificate by completing 48 equivalent credits as follows:

18 credits as follows:	*Credits*
General Insurance I (Brokers) (81) — non-credit equivalent	6
General Insurance II (Brokers) (82) — non-credit equivalent	6
Law I (57)	3
Law II (58)	3
12 credits from:	
Introduction to Financial Accounting (1)	3
Financial Accounting I (2)	3
Marketing Management I (36)	3
Principles of Economics I (60)	3
Principles of Economics II (61)	3
18 credits from:	
Statistics I (53)	3
Statistics II (54)	3

Communication Skills for Managers (22)	3
Mathematics of Finance (51)	3
International Business (56)	3
Business Strategy (47)	3
Management Policy (48)	3
Communications (21)	3
Group Dynamics & Interpersonal Relations (18)	3
Introduction to Organizational Behaviour (16)	3
Managerial Finance (35)	3
Social Psychology (15)	3
Personnel Administration (20)	3
Marketing Research (39)	3
Marketing Planning I (43)	3
Marketing Planning II (44)	3
Elective: 1 other 3 credit course from the Management — Undergraduate offerings	3

McGILL CERTIFICATE IN MANAGEMENT (Marketing)

All students enrolled in the B.Com. degree program must take the Marketing core course (Marketing Management I *or* Marketing Management I & II) prior to taking other elective Marketing courses.

Students who are not designated B.Com. students may take certain Marketing electives without the introductory core course unless otherwise designated in the course description.

Students may qualify for the McGill Certificate by completing 48 equivalent credits as follows:

12 credits as follows:	*Credits*
Social Psychology (15)	3
Introduction to Organizational Behaviour (16)	3
Marketing Management I & II (37)	6
12 credits from the B.Com. Core	12
24 credits from:	
Shopping Centres & Downtown Retail Locations (85) — non-credit equivalent	3
Salesmanship (84) — non-credit equivalent	6
Advertising Management (40)	3
Marketing Planning I (43)	3
Marketing Planning II (44)	3
Sales Management (41)	6
Marketing Research (39)	3
Industrial Marketing (42)	3
Physical Distribution (38)	3
Quantitative Analysis for Marketing Decisions (45)	3

McGILL CERTIFICATE IN MANAGEMENT (Systems Design)

Students may qualify for the McGill Certificate by completing 48 credits as follows:

24 credits as follows:	*Credits*
Management Information Systems I (23)	3
Introduction to Systems Innovation I (26)	3
Introduction to Systems Innovation II (27)	3
Internal Controls and Systems Design (25)	3
Systems Project Management (31)	3
Data Administration (30)	3
Systems Innovation Workshop I (28)	3
Systems Innovation Workshop II (29)	3

15 credits as follows:

Introduction to Financial Accounting (1)	3
Introduction to Management Accounting (6)	3
Introduction to Organizational Behaviour (16)	3
Communication Skills for Managers (22)	3
Business Administration I (50A)	3

9 credits from:

Any of the credit courses offered by this Section, including Computer Based Information Systems (24) for those students with no prior experience in Data Processing. 9

Students should recognize that not every course can be offered every year. Further information on student program planning can be obtained by discussing this with the Systems Management Advisers. Students who are partly through their program should consult with these advisers on how to complete their programs. (Phone No.: 392-6704 for further information.)

McGILL CERTIFICATE IN MANAGEMENT (Transportation)

Students may qualify for the McGill Certificate by completing the following program of 48 credits:

27 credits as follows:	*Credits*
Introduction to Financial Accounting (1)	3
Introduction to Management Accounting (6)	3
Physical Distribution (38)	3
Transportation Economics (63)	6
Transportation Law and Government Regulations (59)	6
Management Policy (48)	3
Transportation Policy (49)	3
15 credits from B.Com. Core Courses	15
6 credits from the Management — Undergraduate credit courses:	6

CERTIFICATE OF THE ADMINISTRATIVE MANAGEMENT SOCIETY

To receive recognition from A.M.S. as a Certified Administrative Manager (C.A.M.), students must complete a total of 60 credits from the list below and then write the University's qualifying examinations.

Students entering the program subsequent to 1971 and who wish to obtain the international C.A.M. Certificate will be required to write the Association's qualifying examination. This qualification does not apply to those wishing to obtain only the Quebec Certificate.

The Society offers the annual A.M.S. prize to the student graduating with the highest Grade Point Average.

SPECIAL REQUIREMENTS

1) A minimum of two years' business experience unless specifically exempted.
2) Membership in the Corporate Administrative Managers of Quebec which is free. For particulars write: Mr. H. N. Black, Domtar Ltd., P.O. Box 7210, Montreal, Quebec H3C 3M1. (Tel.: 282-5431)

List of Courses	*Credits*
Introduction to Organizational Behaviour (16)	3
Personnel Administration (20)	3
Communications (21)	3
Group Dynamics & Interpersonal Relations (18)	3
Social Psychology (15)	3

Organizational Theory (17)	3
Introduction to Financial Accounting (1)	3
Introduction to Management Accounting (6)	3
Finance I (32)	3
Managerial Finance (35)	3
Principles of Economics I (60)	3
Principles of Economics II (61)	3
Statistics I (53)	3
Statistics II (54)	3
Marketing Management I & II (37)	6
Management Information Systems I (23)	3
Computer Based Information Systems (24)	3
Introduction to Systems Innovation I (26)	3
Introduction to Systems Innovation II (27)	3
Law I (57)	3
Law II (58)	3

CERTIFICATE OF THE APPRAISAL INSTITUTE OF CANADA

The title "Certified Residential Appraiser" (C.R.A.) may be awarded to students who successfully complete Appraisal I and II, and who have satisfied the membership requirements of the Institute.

The designation AACI (Accredited Appraiser Canadian Institute) will be awarded to students who register with the Institute and follow the requirements as set out by the Institute. The required courses in the academic program are all available by correspondence through the Institute's National Office.

In cooperation with the McGill Centre for Continuing Education, certain lecture courses have been given equivalent status. The following is a list of all required courses of the Institute with a corresponding list of equivalent McGill courses.

AIC Course	*McGill Equivalent*
Appraisal I	Appraisal of Real Estate I (66)
Appraisal II	Appraisal of Real Estate II (67)
Appraisal III	Appraisal of Real Estate III (68)
Economics I	Principles of Economics I (60) and Principles of Economics II (61)
Economics II	Land Economics (will be offered in 1976/77)
Building Construction and Cost Estimating	(will be offered in 1976/77)
Communications Concepts and Strategies	Communication Skills for Managers (22)
Law	(will be offered in 1976/77)

Further information regarding membership, exemption fees, etc. may be obtained from Mr. David A. Hughes, The Appraisal Institute of Canada, 245 Victoria Avenue, Montreal, Quebec H3Z 2M6. (Telephone: 931-2568).

Students proceeding towards the Institute's requirements will also be fulfilling part of the McGill Certificate in Management (Appraisal of Real Estate) program.

CERTIFICATE OF THE ASSOCIATION FOR SYSTEMS MANAGEMENT

The Certificate of the Association for Systems Management is offered by the Montreal Chapter of the Association for Systems Management in co-operation with McGill University's Centre for Continuing Education. Qualifications for admission to the program are two years' business experience and at least high school standing. The Certificate is offered by the Association when the student completes the McGill Certificate in Management (Systems Design). See page 109. Student membership in the Association for Systems Management is recommended. Further information may be obtained from the Association for Systems Management, Montreal Chapter (A.S.M.), 1390 Sherbrooke St. W., Executive Suites, Montreal, Quebec H3G 1K2. (Telephone: 845-5616)

CERTIFICATE OF THE CANADIAN CREDIT INSTITUTE

The Institute in co-operation with the McGill Centre for Continuing Education offers an opportunity for students to take some of the courses leading to the M.C.I. designation. The specialized subjects of Credit Management are, however, only available by correspondence study conducted through the Institute.

Students who wish to follow the courses available through the university program should register with the Institute before enrolling with McGill.

On successfully passing the university examinations in the equivalent subjects in the McGill program, a transcript of marks should be forwarded to the Institute with a request for exemption.

The following is a list of the McGill courses which correspond to those of the Institute:

C.C.I. Course	*McGill Equivalent*	*Credits*
Accounting	Introduction to Financial Accounting (1)	3
	and	
	Financial Accounting I (2)	3
Commercial Law	Law I (57) and	3
	Law II (58)	3
Quebec Civil Code	Law I (57)	3
Economics	Principles of Economics I (60)	3
	and	
	Principles of Economics II (61)	3
Marketing	Marketing Management I & II (37)	6
Business Administration	Business Administration I (50A)	3
	and	
	Introduction to Organizational Behaviour (16)	3

Further information regarding membership, exemption fees, etc. may be obtained from: Miss H. R. Witte, Montreal Chapter, The Canadian Credit Institute, P.O. Box 631, Station "A", Montreal, Quebec H3C 2T8, (Telephone: 389-8092).

CERTIFICATE OF THE CANADIAN INSTITUTE OF MANAGEMENT

The Canadian Institute of Management through the McGill Centre for Continuing Education offers a program of management development leading to the Certificate in Management and Administration (C.I.M.).

PURPOSE

The purpose of this program is to increase the effectiveness of middle and senior managers employed in the industrial, service, and governmental sectors of Canada. The basis of this program has resulted from the identification through research of management development needs.

MEMBERSHIP REQUIREMENTS

Students who qualify for membership in the Canadian Institute of Management are strongly advised to register with the Institute as they will not be given credit for any courses taken prior to membership.

Members may transfer with full credits to any city across Canada where C.I.M. courses are offered. Generally speaking the following criteria will be sufficient to meet the requirement for admission to the program:

1) Candidates must have Grade 12 education (or equivalent) with a minimum age of 24 years and a minimum of 2 years supervisory experience or 4 years staff experience.

or

2) Higher than Grade 12, be at least 23 years old and have at least 2 years supervisory experience or 4 years of staff experience.

or

3) Community College Graduate in Management Sciences, be at least 22 years old and no supervisory experience required.

or

4) University Graduate, immediately upon graduation with no minimum age or experience required.

PROGRAM

A new C.I.M. program consisting of five core courses and two option courses was introduced last year. Students presently enrolled may continue as originally planned as the new program is being phased in gradually. A special booklet giving full details is available from the Centre for Continuing Education or from the Institute.

An examination is held at the end of each course. Students who are unable to write that exam because of health or business reasons may apply for permission to write an Alternate exam.

Students may qualify for the Certificate in Management and Administration (C.I.M.) by completing the following program:

Year I — *Core Courses*
- Section A — Organizations as Systems (73)
- Section B — Managerial Accounting (74)

Year II — *Core Courses*
- Section A — Quantitative Information for Decisions (75)
- Section B — Organizational and Human Behaviour (76)

Year III — *Continuation of Existing Program*
- Section A — Operation Planning and Analysis (77)
- Section B — Marketing (78)

Year IV — *Continuation of Existing Program*
- Section A — Management of Human Resources (79)
- Section B — Cases and Problems in Administration (80)

FEES

The fee for each course is $65.00, payable to McGill University. The student membership fee in the Institute is $50.00 per year, and is payable to the Canadian Institute of Management. An additional charge of $15.00 is required for students accepted for Alternate exams.

Further information may be obtained from: The Canadian Institute of Management, P.O. Box 485, Station "B", Montreal, Quebec H3B 3K3, (Telephone: 845-6612).

CERTIFICATE OF THE CANADIAN INSTITUTE OF TRAVEL COUNSELLORS — see course 86

DIPLOMA OF THE CANADIAN PUBLIC RELATIONS SOCIETY (C.P.R.S.) AND THE INTERNATIONAL ASSOCIATION OF BUSINESS COMMUNICATORS (I.A.B.C.)

Students may qualify for the combined diploma of the Canadian Public Relations Society and the International Association of Business Communicators by completing the McGill Certificate in Management (Business Communications). See page 108.

INTERNATIONAL DESIGNATION OF THE INSTITUTE OF CHARTERED SECRETARIES AND ADMINISTRATORS

The Institute in co-operation with the McGill Centre for Continuing Education offers an opportunity for students to take some of the courses leading to the international title "Chartered Secretary". (ACIS designation)

Application for courses offered through ICSA may be made through: The Chartered Institute of Secretaries, c/o Board of Trade, 1080 Beaver Hall Hill, Montreal, Quebec H2Z 1S9, Attention: Miss Lorraine Campbell, (Telephone: 878-4651).

Although membership is not mandatory throughout the study period individuals must be registered students of the Institute for at least twelve (12) weeks before applying to sit any ICSA examination.

The following is a list of the McGill courses which correspond to those of the Institute and are accepted by the Institute without further examination:

BUSINESS ADMINISTRATION

Group A — Entrance Qualifications

ICSA Course	*McGill Equivalent Accepted by ICSA*	*McGill Credits*
1. Principles of Economics	Principles of Economics I (60)	3
	and	
	Principles of Economics II (61)	3

CORPORATION PROFESSIONNELLE DES EVALUATEURS AGREES DU QUEBEC (C.P.E.A.Q.)

In cooperation with the C.P.E.A.Q., McGill offers courses leading to this professional recognition. Successful candidates, upon completion of all requirements of the Corporation, will be allowed to use the title C. App. (Chartered Appraiser) or E.A. (Evaluateur Agréé).

The academic requirements of the C.P.E.A.Q. are a Bachelor of Commerce degree with a major in Real Estate Appraisal. The core courses making up the major in Real Estate Appraisal are available through the Centre for Continuing Education and are substantially as follows:

Appraisal of Real Estate I (66)
Appraisal of Real Estate II (67)
Appraisal of Real Estate III (68)
Land Economics (will be offered in 1976/77)
Mathematics of Finance (51)
Communication Skills for Managers (22)
Building Construction and Cost Estimating (will be offered in 1976/77)
Law (will be offered in 1976/77)

Further information on membership, regulations, course recognition, etc. is available through: Mr. Gilles Dion, Directeur-administratif, Corporation Professionnelle des Evaluateurs Agréés du Québec, Place du Canada, Montreal, Quebec H3B 2N2, (Telephone: 861-9729).

DIPLOMA OF THE CORPORATION OF INDUSTRIAL ACCOUNTANTS OF QUEBEC

Students who wish to follow the program must register with the Corporation. Information regarding the regulations for professional experience requirements and training may be obtained from: The Corporation of Industrial Accountants of Quebec, 1509 Sherbrooke Street West, Suite 15, Montreal, Quebec H3G 1L7, (Telephone: 931-2509).

The Corporation of Industrial Accountants of Quebec conducts its own qualifying examinations for the diploma of Registered Industrial Accountant (R.I.A.). The Corporation has adopted a policy of granting exemption from some of their examinations to students who have successfully completed equivalent courses in the McGill program. The remaining Corporation examinations must be written by all students after satisfactory completion of the appropriate McGill course.

The word mandatory (M) in the following tables signifies the corporation examination.

DIPLOMA OF THE PROFESSIONAL CORPORATION OF CERTIFIED GENERAL ACCOUNTANTS OF QUEBEC

Students who wish to follow the program must register with the Corporation. Further information regarding training may be obtained from the Professional Corporation of Certified General Accountants of Quebec, 5165 Queen Mary Road, Suite 512, Montreal, Quebec H3W 1X9. (Telephone: 487-3544)

The Professional Corporation of Certified General Accountants of Quebec conducts its own mandatory examinations in February and June and requires that candidates must have previously passed or been granted credit by the university and the corporation for the courses shown below.

CGA Course	*McGill Equivalent*
Level I	
Accounting Principles 101	Introduction to Financial Accounting (1) and Financial Accounting I (2)
Law 108	Law I (57) and Law II (58)
Level II	
Financial Accounting 221	Financial Accounting II (3)
Managerial Mathematics 202	Mathematics of Finance (51)
Statistics 203	Statistics I (53)
Level III	
Cost Accounting 311	Management Accounting — Cost Determination and Analysis (7) and Management Accounting: Planning and Control (8)
Economics 304	Principles of Economics I (60) and Principles of Economics II (61)

DIPLOMA OF THE INSTITUTE OF CANADIAN BANKERS

This program is designed specifically for staff members of Canadian banks. Its purpose is to provide formal education for men and women who wish to prepare themselves for responsible positions in banking.

Further details may be obtained from: The I.C.B. Co-ordinator, Suite 3920, Place Victoria, P.O. Box 9, Stock Exchange Tower, Montreal, Quebec H4Z 1A3 (Telephone: 878-3148).

The Institute of Canadian Bankers will recognize many electives at universities across Canada. McGill will not offer all these electives in 1975-76. Students who wish to take any other option than those listed below must have permission from the I.C.B.

I.C.B. Core Courses	*McGill Equivalents*	*Credits*
Fundamentals of Accounting	Introduction to Financial Accounting (1)	3
	and	
	Introduction to Management Accounting (6)	3
Business Administration	Business Administration I (50A)	3
	and	
	Business Administration II (50B)	3
Communications	Introduction to Organizational Behaviour (16)	3
	and	
	Group Dynamics & Interpersonal Relations (18)	3
Economics	Principles of Economics I (60)	3
	and	
	Principles of Economics II (61)	3
Financial Accounting	Financial Accounting I (2)	3
	and	
	Financial Accounting II (3)	3
Marketing	Marketing Management I & II (37) or	6
	Marketing Management I (36)	3
	and	
	Marketing Research (39)	3
Business Strategy	Business Strategy (47)	3
	and	
	Management Policy (48)	3

Options

18 credits to complete the program may be chosen from the following: (No more than 6 credits may be taken from any one section.)

I.C.B. Core Courses	*McGill Equivalents*	*Credits*
Management of Financial Resources		
Business Finance	Finance I (32)	3
	Managerial Finance (35)	3
Management Accounting	Managerial Accounting: Cost Determination and Analysis (7)	3
Taxation	Taxation I (13)	3
Management Information Systems	Management Information Systems I (23)	3
Investment Management	Investments and Portfolio Management (33)	3
	Capital Markets and Institutions (34)	3
Management of Human Resources		
Organizational Behaviour	Social Psychology (15)	3
	Organizational Theory (17)	3
Employee Relations	Introduction to Industrial Relations (64)	3
	Collective Bargaining (65)	3
Personnel Management	Personnel Administration (20)	3
	Salary Administration (19)	3

Economics		
Money and Banking	Not offered	
Contemporary Economic Issues	Not offered	
Intermediate Economics	Managerial Economics (62)	3
International Economics	International Financial Management (278-482) — To be offered 1976-77	3
General		
Business Law	Law I (57)	3
	and	
	Law II (58)	3
International Business	International Business (56)	3
Business and Government	Government and Business (276-466) — To be offered 1976-77	3
Marketing		
Consumer Behaviour	Consumer Behaviour (275-452) — To be offered 1976-77	3
Promotion Management	Advertising Management (40)	3
Quantitative Methods		
Business Statistics	Statistics I (53)	3
	Statistics II (54)	3
Computer Concepts and Applications	Introduction to Systems Innovation I (26)	3
	Introduction to Systems Innovation II (27)	3
Operations Research	Operations Research I (55)	3

CERTIFICATE OF THE INSTITUTE OF INTERNAL AUDITORS (C.I.A.)

The title Certified Internal Auditor (C.I.A.) may be awarded to students who successfully complete the requirements of this Institute. Institute exams are held in September. The body of knowledge on which the exams are based can be covered through the courses offered by the Centre.

Further information can be obtained direct from the Centre or from: The Institute of Internal Auditors, Montreal Chapter, 630 Lagauchetiere Street West, (Chartered Accountants' Building), Montreal, Quebec, (Telephone: 870-3128).

CERTIFICATE OF THE INSURANCE BROKERS' ASSOCIATION OF THE PROVINCE OF QUEBEC (C.I.B.)

The title Chartered Insurance Broker (C.I.B.) may be awarded to students who successfully complete the requirements of this association. Society exams are held in April or May. Students should note that the passing grade for these exams is 60%. (This is a variation from the General Rules and Regulations for the Centre for Continuing Education, McGill University where the credit mark for the Certificate is 55%.)

Further information can be obtained from: The Insurance Brokers' Association of the Province of Quebec, 550 Sherbrooke St. West, Suite 1570, Montreal, Quebec H3A 1C8, (Telephone: 842-2591).

COURSE DESCRIPTIONS

N.B.

1. Most of the courses described in this section carry credit towards the Bachelor of Commerce Degree for part-time students offered by the Faculty of Management. Course credits are indicated in the course description. In order to gain credit by the McGill Faculty of Management a student must be admitted to the Bachelor of Commerce Degree Program for part-time students. For further information on the Bachelor of Commerce see page 107.

2. Courses postponed or cancelled due to insufficient registrations occasionally delay students in proceeding with their programs.
3. Courses marked with an asterisk will be repeated in January 1976.
4. See pages 142 to 144 for course listings by subject and by evening and time.
5. The following courses are offered for credit to students in the degree program. See courses 66 to 86 for courses offered outside of the degree program.

*(1) INTRODUCTION TO FINANCIAL ACCOUNTING (3 credits)

280-212X-51
280-212X-61

DAYS: Mondays 6 - 8 p.m.
Tuesdays 6 - 8 p.m.
FEE: $70.00
DURATION: 15 lectures plus tutorials (36 hours) beginning 25, 26 August

Accounting concepts and principles; the accounting model and the measurement of accounting income; the statement of financial position.

*(2) FINANCIAL ACCOUNTING I (3 credits)

271-311X-61

DAY: Tuesdays 6 - 8 p.m.
FEE: $70.00
DURATION: 15 lectures plus tutorials (36 hours) beginning 26 August
PREREQUISITE: Introduction to Financial Accounting

A detailed examination of the elements of the income statement and the balance sheet with emphasis on the role of inventories and depreciation.

*(3) FINANCIAL ACCOUNTING II (3 credits)

271-312X-61

DAY: Tuesdays 6 - 8 p.m.
FEE: $70.00
DURATION: 15 lectures plus tutorials (36 hours) beginning 26 August
PREREQUISITE: Financial Accounting I

Development of accounting theory and practice; a detailed review of the accounting for current and long term assets and liabilities; intangibles and shareholders' equity; the treatment of prior period adjustments and extraordinary items in the determination of accounting income; working capital and flow of funds; financial statement presentation; partnerships.

*(4) FINANCIAL ACCOUNTING III (3 credits)

271-414X-71

DAY: Wednesdays 6 - 8 p.m.
FEE: $70.00
DURATION: 15 lectures plus tutorials (36 hours) beginning 27 August
PREREQUISITE: Financial Accounting II

The underlying concepts & accounting treatment of intercorporate investments, business combinations, purchase & pooling of interests including examination of the professional recommendations. Reorganizations; valuations of business enterprises; branches — domestic & foreign; consignments; installment sales; estate & trust accounting. Accounting for corporate income taxes, price level changes, pensions, leases, human resources & goodwill.

*(5) FINANCIAL ACCOUNTING IV (3 credits)

271-400X-81

DAY:	Thursdays 6 - 8 p.m.
FEE:	$70.00
DURATION:	15 lectures plus tutorials (36 hours) beginning 28 August
PREREQUISITE:	Financial Accounting III

Review and integration of previous courses; specialized accounting including fund accounting; specialized types of operations including banks, insurance companies, municipalities; accounting treatment of price level changes; contemporary financial accounting issues and developments; advanced budgeting and standard costs; cost analysis applied to decision making; capital budgeting; performance measurement; current developments in managerial accounting.

*(6) INTRODUCTION TO MANAGEMENT ACCOUNTING (3 credits)

271-220X-61

DAY:	Tuesdays 6 - 8 p.m.
FEE:	$70.00
DURATION:	15 lectures plus tutorials (36 hours) beginning 26 August
PREREQUISITE:	Introduction to Financial Accounting

An overview of Management Accounting designed to introduce the manager to the use of accounting reports and concepts in decision making; a general review of the various methods of accounting for costs and their analysis for decision making purposes; an introduction to budgeting for planning and control.

(7) MANAGERIAL ACCOUNTING — COST DETERMINATION AND ANALYSIS (3 credits)

271-313X-66

DAY:	Tuesdays 8 - 10 p.m.
FEE:	$70.00
DURATION:	15 lectures plus tutorials (36 hours) beginning 26 August
PREREQUISITE:	Financial Accounting II

Conceptual framework of management accounting. Cost determination and analysis: Cost concepts and terminology, measurement and accumulation of costs. Accounting for management control: Job order costs and cost control, variance analysis, process costing, spoilage, waste, defective units, joint and by-product costing. Accounting for management planning: Operation budgeting and co-ordination of plans, models for budgeting, introduction to D.C.F., budget simulation, pro forma financial statements, cost behaviour and flexible budgets.

(8) MANAGERIAL ACCOUNTING: Planning & Control (3 credits)

271-415Y-66

DAY:	Tuesdays 8 - 10 p.m.
FEE:	$70.00
DURATION:	15 lectures plus tutorials (36 hours) beginning 13 January 1976
PREREQUISITE:	Managerial Accounting — Cost Determination and Analysis

Decision models and their relationship to planning and control; certainty and uncertainty, determination of cost behaviour patterns, cost control, analysis of variances, cost accounting and quantitative techniques; preparation and use of budgets, behavioural input of budgets, simulation of operating budgets; decentralization and measurement of performance, transfer pricing.

(9A) MANAGEMENT ACCOUNTING CONTROL SYSTEMS (3 credits)

271-421X-61

DAY: Tuesdays 6 - 8 p.m.
FEE: $70.00
DURATION: 15 lectures plus tutorials (36 hours) beginning 13 January 1976
PREREQUISITE: Management Accounting: Planning and Control

A case method course emphasizing written and oral analyses of management control system problems. Subtopics include the identification of the key success factors of a business, the selection of suitable responsibility centres, transfer pricing, and the management control system as means of motivating and evaluating managers. Special emphasis will be placed on the use of logical and orderly analytical approaches to solving management control problems.

(9B) MANAGEMENT ACCOUNTING CASES (3 credits)

271-420Y-61

DAY: Tuesdays 6 - 8 p.m.
FEE: $70.00
DURATION: 15 lectures plus tutorials (36 hours) beginning 13 January 1976
PREREQUISITES: Managerial Accounting: Planning and Control and Management Policy and Management Accounting Control Systems

The use of managerial accounting concepts and techniques to solve comprehensive business problems. Instruction will be by the case method, and written reports will be required.

(10) AN INTRODUCTION TO AUDITING (3 credits)

271-413X-51

DAY: Mondays 6 - 8 p.m.
FEE: $70.00
DURATION: 15 lectures plus tutorials (36 hours) beginning 25 August
PREREQUISITE: Financial Accounting II

Nature and purpose of auditing; appointment, remuneration, powers, duties and responsibilities of an auditor; internal control; audit programs; financial statement presentation; procedures for verification of items in financial statements; audit reports.

(11) OPERATIONAL AUDITING (3 credits)

271-430Y-51

DAY: Mondays 6 - 8 p.m.
FEE: $70.00
DURATION: 15 lectures plus tutorials (36 hours) beginning 12 January 1976
PREREQUISITE: An Introduction to Auditing

Role of internal auditor; operational and managerial auditing; investigation audit procedures; audit of E.D.P. systems; current developments in auditing standards.

*(12) EXTERNAL AUDITING (3 credits)

271-431X-71

DAY: Wednesdays 6 - 8 p.m.
FEE: $70.00
DURATION: 15 lectures plus tutorials (36 hours) beginning 27 August
PREREQUISITE: An Introduction to Auditing

Auditing standards; auditor's legal rights and responsibilities; problems relating to: incorporated businesses; consolidated statements, prospectuses; events subsequent to balance sheet date; audit of E.D.P. systems; audits requiring special considerations; investigations and special reports; current developments in auditing standards.

*(13) TAXATION I (3 credits)

271-412X-71

DAY: Wednesdays 6 - 8 p.m.
FEE: $70.00
DURATION: 15 lectures plus tutorials (36 hours) beginning 27 August
PREREQUISITE: Financial Accounting II

Introduction to principles of taxation; determination of taxable income — personal and corporate; capital gains; corporate distributions; non residents and international; administrative provisions; sales taxes.

(14) TAXATION II (3 credits)

271-441Y-71

DAY: Wednesdays 6 - 8 p.m.
FEE: $70.00
DURATION: 15 lectures plus tutorials (36 hours) beginning 14 January 1976
PREREQUISITE: Taxation I

The development and application of the topics presented in the introductory income tax course. Tax planning matters are dealt with throughout. Primary emphasis will be on the corporation and its shareholders.

*(15) SOCIAL PSYCHOLOGY (3 credits)

280-221X-61

DAY: Tuesdays 6 - 8 p.m.
FEE: $70.00
DURATION: 15 lectures plus tutorials (36 hours) beginning 26 August

Method and theories of analysing individual and small group behaviour. Topics include person perception, social motivation, attitudes, conformity, group structure, group dynamics and leadership phenomena. Experimental approach to social behaviour is emphasized.

*(16) INTRODUCTION TO ORGANIZATIONAL BEHAVIOUR (3 credits)

280-222X-56
280-222X-66
280-222X-81

DAYS: Mondays 8 - 10 p.m.
Tuesdays 8 - 10 p.m.
Thursdays 6 - 8 p.m.
FEE: $70.00
DURATION: 15 lectures plus tutorials (36 hours) beginning 25, 26, 28 August
PREREQUISITE: Social Psychology

The social psychology of organizations, the relationship of man to the organization in which he works, his motivation, attitudes and involvement in his work. Theories of perception, motivation and leadership as they relate to organizational problems.

(17) ORGANIZATIONAL THEORY (3 credits)

280-323Y-81

DAY: Thursdays 6 - 8 p.m.
FEE: $70.00
DURATION: 15 lectures plus tutorials (36 hours) beginning 15 January 1976
PREREQUISITE: Introduction to Organizational Behaviour

The organization as a unit of analysis. Analysis of organizations as distinctive collectivities through an understanding of theories and problems of organization. Contributions of psychology, sociology and economics towards solving organizational problems of adaption, authority and power, conflict resolution, etc.

*(18) GROUP DYNAMICS AND INTERPERSONAL RELATIONS (3 credits)

272-420X-71	DAYS:	Wednesdays 6 - 8 p.m.
272-420X-76		Wednesdays 8 - 10 p.m.
272-420X-81		Thursdays 6 - 8 p.m.
	FEE:	$70.00
	DURATION:	15 lectures plus tutorials (36 hours) beginning 27, 28 August

Students will explore theory, research, and applications relating to group dynamics in task-oriented groups. Students will increase their level of awareness of group dynamics and their skills at functioning in work groups. Teaching/learning methods will include lecture and discussion, learning cells, skill development exercises (role plays, video-tape analysis) and training laboratories (task group development and interpersonal sensitivity).

(19) SALARY ADMINISTRATION (3 credits)

272-425X-66	DAY:	Tuesdays 8 - 10 p.m.
	FEE:	$70.00
	DURATION:	15 lectures plus tutorials (36 hours) beginning 26 August

This course is designed to expose the students to total compensation systems in business and service organizations. The emphasis is on understanding the various compensation theories and their relation to compensation policies within organizations. Behavioural effects of different types of compensation plans and how to make compensation plans more effective with the use of behavioural science knowledge will be discussed. Some of the topics that are covered in the course are: nature of financial motivation, compensation theories, job design and job analysis, compensation practices, designing a compensation package, pay and organizational effectiveness.

(20) PERSONNEL ADMINISTRATION (3 credits)

272-423Y-66	DAY:	Tuesdays 8 - 10 p.m.
	FEE:	$70.00
	DURATION:	15 lectures plus tutorials (36 hours) beginning 13 January 1976

This course is designed to introduce students to the various issues involved in personnel administration. The concepts and methods used by the staff personnel unit in building and maintaining an effective work force in an industrial organization will be discussed. Topics include the development of the ability to design the personnel subsystem within the firm and the problems encountered in such areas as recruitment, selection, motivation, communication and management training. Both a theoretical and case approach will be used.

(21) COMMUNICATIONS (3 credits)

272-211X-71	DAY:	Wednesdays 6 - 8 p.m.
	FEE:	$70.00
	DURATION:	15 lectures plus tutorials (36 hours) beginning 27 August

Human communications, transmission, receiving and processing of messages; alternative models of communication interaction, the cognitive, affective, imaginative and intuitive human processes are examined. Small group discussions are used to provide practice in listening, speaking, observing and organizing of thought.

*(22) COMMUNICATION SKILLS FOR MANAGERS (3 credits)

272-324X-81
272-324X-86

DAY: Thursdays 6 - 8 p.m.
Thursdays 8 - 10 p.m.
FEE: $70.00
DURATION: 15 lectures plus tutorials (36 hours) beginning 26 August
PREREQUISITE: Practical knowledge of English

This course will be both theoretical and practical. The theory will relate to how people deal with other people in organizations; involving encoding, transmission, receiving and decoding of messages. It will examine the knowledge, skills, attitudes and habits that are used in reading, writing, speaking and listening as well as non-verbal communications. It will analyse how to think clearly and the theory of General Semantics. Students will study leadership skills in chairing a meeting. It will examine writing skills in detail.

*(23) MANAGEMENT INFORMATION SYSTEMS I (3 credits)

280-331X-61
280-331X-66

DAY: Tuesdays 6 - 8 p.m.
Tuesdays 8 - 10 p.m.
FEE: $70.00 (plus $15 for use of computer)
DURATION: 15 lectures plus tutorials (36 hours) beginning 26 August
PREREQUISITE: Survey of Basic Mathematics

This course provides an introduction to computer systems and program flow-charting. Specific emphasis is placed on developing the ability to program (in Fortran) and utilize the resources available on the McGill time-sharing system. Problems of implementing computer systems in the organization are discussed.

(24) COMPUTER BASED INFORMATION SYSTEMS (3 credits)

273-332Y-61

DAY: Tuesdays 6 - 8 p.m.
FEE: $70.00 (plus $15 for use of computer)
DURATION: 15 lectures plus tutorials (36 hours) beginning 14 January 1976
PREREQUISITE: Management Information Systems I

Methodology, techniques and components of systems design and programming, with emphasis on management information systems.

*(25) INTERNAL CONTROLS & SYSTEMS DESIGN (3 credits)

273-303Y-76

DAY: Wednesdays 8 - 10 p.m.
FEE: $70.00
DURATION: 15 lectures plus tutorials (36 hours) beginning 14 January 1976

Designed to provide management, accounting, systems and data processing personnel with an in-depth analysis of internal control techniques and computer system protection. Among the topics covered will be: the controls that should be incorporated into a system; monitoring of controls; evaluation of controls common to all E.D.P. applications; evaluation of controls for specific applications; standards of documentation; allocation and segregation of duties.

(26) INTRODUCTION TO SYSTEMS INNOVATION I (3 credits)

273-320X-51

DAY: Mondays 6 - 8 p.m.
FEE: $70.00
DURATION: 15 lectures plus tutorials (36 hours) beginning 25 August
PREREQUISITES: Management Information Systems I or equivalent and preferably some business experience

System Analysis. Emphasis is placed on the definition of systems requirements and the subsequent formulation of a general system solution to meet these requirements.

(27) INTRODUCTION TO SYSTEMS INNOVATION II (3 credits)

273-321Y-51

DAY: Mondays 6 - 8 p.m.
FEE: $70.00
DURATION: 15 lectures plus tutorials (36 hours) beginning 12 January 1976
PREREQUISITE: Introduction to Systems Innovation I

System Development. Emphasis is placed on the detailed design of a system, construction and testing of the final system solution.

(28) SYSTEMS INNOVATION WORKSHOP I (3 credits)

273-322X-66

DAY: Tuesdays 8 - 10 p.m.
FEE: $70.00
DURATION: 15 lectures plus tutorials (36 hours) beginning 26 August
PREREQUISITES: A minimum of two years' business experience and completion of Introduction to Systems Innovation I & II

System Analysis Workshop. The course explores ways of avoiding the obstacles usually encountered in systems planning, problem definition, and the preparation of system proposals.

(29) SYSTEMS INNOVATION WORKSHOP II (3 credits)

273-323Y-66

DAY: Tuesdays 8 - 10 p.m.
FEE: $70.00
DURATION: 15 lectures plus tutorials (36 hours) beginning 13 January 1976
PREREQUISITE: Systems Innovation Workshop I

System Development Workshop. The course examines the system design and implementation processes with specific emphasis on the solution of problems frequently encountered.

(30) DATA ADMINISTRATION (3 credits)

273-324X-56

DAY: Mondays 8 - 10 p.m.
FEE: $70.00
DURATION: 15 lectures plus tutorials (36 hours) beginning 25 August
PREREQUISITE: Management Information Systems I

The course covers a variety of topics within the Data Administration function varying from the most fundamental to the more advanced. No previous knowledge in data administration is required of the student although the fundamentals of programming (FORTRAN or COBOL) and at least a superficial knowledge of hardware and software is expected. Most of the thirty hours of class time will be devoted to lectures although assignments and class problems will also be discussed.

(31) SYSTEMS PROJECT MANAGEMENT (3 credits)

273-325X-51

DAY: Mondays 6 - 8 p.m.
FEE: $70.00
DURATION: 15 lectures plus tutorials (36 hours) beginning 25 August
PREREQUISITE: Internal Controls & Systems Design

A study of the techniques available to the project leader that enable him to translate a system's proposal into an operational system. Emphasis will be placed upon resource budgeting coordination and control via Gant, P.E.R.T. and C.P.M. techniques; as well as methods of organization, communication and motivation. Extensive use will be made of teaching aids and guest lecturers in an effort to relate to the specific realities confronting the systems project manager.

*(32) FINANCE I (3 credits)

280-341X-81

DAY: Thursdays 6 - 8 p.m.
FEE: $70.00
DURATION: 15 lectures plus tutorials (36 hours) beginning 28 August
PREREQUISITE: Introduction to Financial Accounting

An introduction to financial management and the role of finance, both within the firm and the economy as a whole. The institutional framework of the firm is discussed, including legal forms, taxes, financing instruments and the capital markets. An introduction to the analytics of finance is presented including the pricing of financial instruments, simple models of capital market equilibrium, the financial structure of the firm, cost of capital, dividend policy, investment criteria for new capital spending proposals, and working capital management.

(33) INVESTMENTS AND PORTFOLIO MANAGEMENT (3 credits)

274-441X-76

DAY: Wednesdays 8 - 10 p.m.
FEE: $70.00
DURATION: 15 lectures plus tutorials (36 hours) beginning 27 August
PREREQUISITES: Finance I and Managerial Finance

The course examines the application of investment principles and security analysis to the selection and comparison of equity and fixed income securities in the current economic and financial environment. Also covered are: determinants of stock prices, growth models and portfolio diversification.

(34) CAPITAL MARKETS AND INSTITUTIONS (3 credits)

274-442Y-76

DAY: Wednesdays 8 - 10 p.m.
FEE: $70.00
DURATION: 15 lectures plus tutorials (36 hours) beginning 14 January 1976

This course studies the functions of the capital markets through flow of funds analysis and an examination of portfolio activities of financial intermediaries. Also covered are: Securities regulations and ethical considerations, the term structure of interest rates and risk and rates of return in debt and equity markets.

(35) MANAGERIAL FINANCE (3 credits)

274-203X-81

DAY: Thursdays 6 - 8 p.m.
FEE: $70.00
DURATION: 15 lectures plus tutorials (36 hours) beginning 28 August
PREREQUISITE: Finance I

This course follows closely Finance II (274-342) in the B.Com. day program. A foundation is established here from which students may pursue further specialization or from which specialists in other areas may appreciate their interaction with the Finance function. The theory covers three interrelated finance functions: capital budgeting, corporate finance (including cost of capital, capital structure, and dividend policy), and portfolio theory. An analytic approach is taken where objectives are specified, constraints recognized and the resource allocation of capital on both personal and corporate levels investigated.

*(36) MARKETING MANAGEMENT I (3 credits)

280-352X-61

DAY:	Tuesdays 6 - 8 p.m.
FEE:	$70.00
DURATION:	15 lectures plus tutorials (36 hours) beginning 26 August

An introduction to marketing management focussing on the problems of the marketing manager in the measurement of market opportunities and the allocation of the marketing effort. Emphasis is on decision-making in a marketing context. Topics covered include: the marketing concept; marketing strategies; marketing research; buyer behaviour; product and price policies; advertising, distribution and sales force decision. The course relies on lectures, text material and case studies.

(37) MARKETING MANAGEMENT I & II (6 credits)

275-201Z-61

DAY:	Tuesdays 6 - 8 p.m.
FEE:	$140.00
DURATION:	30 lectures plus tutorials (72 hours) beginning 26 August

This 6 credit course provides a more extensive introduction to the field of marketing management and can be taken in lieu of 280-352X-61 as the introductory marketing course. It gives the student an understanding of the basic problems and practices in marketing management. The focus is on problem-solving and decision-making in marketing, on identifying key market opportunities and applying the organization's resources to these opportunities. Real life examples, case studies, discussions, lectures, and text material form the basis for this course. Topics covered include: the marketing system and environment; the marketing concept; marketing planning and strategy; market segmentation and buyer behaviour in industrial and consumer markets; marketing research and sales forecasting; product policy and new product introduction; product pricing, advertising and distribution; sales force management; and marketing control.

Note: B.Com. students may take Marketing Management I & II in lieu of Marketing Management I as a core course but cannot take both courses. Marketing Management I & II would count 3 credits for core requirements and 3 credits as a marketing elective.

(38) PHYSICAL DISTRIBUTION (3 credits)

275-353X-81

DAY:	Thursdays 6 - 8 p.m.
FEE:	$70.00
DURATION:	15 lectures plus tutorials (36 hours) beginning 28 August

Systems approach to physical distribution; traffic management; plant and warehouse location; inventory control; information flows and order processing; supply scheduling; total cost planning; organizational patterns.

(39) MARKETING RESEARCH (3 credits)

275-451Y-61

DAY:	Tuesdays 6 - 8 p.m.
FEE:	$70.00
DURATION:	15 lectures plus tutorials (36 hours) beginning 13 January 1976

Training in the design, execution and interpretation of survey and experimental methods in marketing. Emphasis is placed upon sample design, data collection and data processing; evaluation of alternative, experimental designs, execution of problems and interpretation of data. A review of illustrative research studies is made; an actual study is designed and data are collected and interpreted.

*(40) ADVERTISING MANAGEMENT (3 credits)

275-453X-51

DAY: Mondays 6 - 8 p.m.
FEE: $70.00
DURATION: 15 lectures plus tutorials (36 hours) beginning 25 August

Surveys the field of advertising in its social and management contexts. Examines organization as it relates to the advertisers, the agency and media. Develops the creative approach, strategy and tactics as related to the total marketing management.

(41) SALES MANAGEMENT (6 credits)

275-205Z-61

DAY: Tuesdays 6 - 8 p.m.
FEE: $140.00
DURATION: 30 lectures plus tutorials (72 hours) beginning 26 August

An analytical study of the techniques and policies employed in the operation of a sales organization. The approach is from the viewpoint of the sales managers of an enterprise. Extensive use will be made of case materials in considering the problems of recruiting, training, controlling and managing the sales force. Sales appeals, quotas, and sales analysis and forecasting will also be discussed.

(42) INDUSTRIAL MARKETING (3 credits)

275-456Y-61

DAY: Tuesdays 6 - 8 p.m.
FEE: $70.00
DURATION: 15 lectures plus tutorials (36 hours) beginning 13 January 1976
PREREQUISITE: Marketing Management I or Marketing Management I & II

The course focusses on decision-making and management of the marketing effort in an industrial product context. The student gains an understanding of the industrial marketing environment and of the problems faced by the industrial marketing manager. Topics covered include: the industrial marketing system; industrial purchasing; researching the industrial market; product, price, distribution, selling and advertising decisions; strategies for industrial markets. A combination of lecture and case discussions are used.

(43) MARKETING PLANNING I (3 credits)

275-357X-56

DAY: Mondays 8 - 10 p.m.
FEE: $70.00
DURATION: 15 lectures plus tutorials (36 hours) beginning 25 August
PREREQUISITE: Marketing Management I

Marketing planning is viewed as a continuous process involving (1) setting company marketing goals, (2) assessing market opportunities, (3) developing a market strategy, (4) developing a set of integrated action programs, (5) monitoring the implementation of programs and adjusting the marketing plan. Emphasis is placed on steps 4 and 5, especially with regard to new product programs. Attention is given to the development of marketing planning systems — organizations and procedure — to make marketing planning a formal, coordinated, continuous process. Problems of implementation of new plans and systems in an ongoing organization are highlighted.

(44) MARKETING PLANNING II (3 credits)

275-358Y-56

DAY: Mondays 8 - 10 p.m.
FEE: $70.00
DURATION: 15 lectures plus tutorials (36 hours) beginning 12 January 1976
PREREQUISITE: Marketing Planning I

This is the second part of the Marketing Planning sequence in which the class is conducted as a seminar, with groups working on different "live" marketing problems faced by local and national businesses. The groups progress from an initial briefing stage with their clients, to the definition and analysis of "the problem", and finally to the set of recommendations, which they present as a group to the class, professor and client. The objective is to simulate a real life business situation, and to provide experience in the formulation and presentation of marketing plans.

(45) QUANTITATIVE ANALYSIS FOR MARKETING DECISIONS (3 credits)

275-458Y-81

DAY: Thursdays 6 - 8 p.m.
FEE: $70.00
DURATION: 15 lectures plus tutorials (36 hours) beginning 15 January 1976

The development of analytic quantitative models of various aspects of the firm's marketing environment and of models of marketing decision problems. The use of such models as a basis for marketing decisions. Topics include: market measurement, estimation of various kinds of market data, identification of the relationships between marketing variables and forecasting.

(46) RETAIL MANAGEMENT (3 credits)

275-459Y-51

DAY: Tuesdays 6 - 8 p.m.
FEE: $70.00
DURATION: 15 lectures plus tutorials (36 hours) beginning 13 January 1976

Principles and methods of management as applied to retailing, including location, organization, personnel, buying, inventory control, selling and advertising, services, expenses and profits.

(47) BUSINESS STRATEGY (3 credits)

276-303Y-61

DAY: Mondays 6 - 8 p.m.
FEE: $70.00
DURATION: 15 lectures plus tutorials (36 hours) beginning 12 January 1976
PREREQUISITES: Management Policy and core courses of F.I.C.B.

The main objective of this course is the formulation and implementation of long-range decisions. These decisions should take into account the broader socio-economic background and should also ensure integration of the needs of the various corporate functional areas. Emphasis will be placed on the inter-relationship of these functional areas, as this is the only course that will integrate the knowledge acquired by the bankers in previously taken courses in more specific disciplines.

It is expected that this course will develop an awareness of the factors involved in the determination and implementation of corporate strategy and an understanding of the concept of corporate citizenship.

*(48) MANAGEMENT POLICY (3 credits)

276-210X-51
276-210X-66

DAYS: Mondays 6 - 8 p.m.
Tuesdays 8 - 10 p.m.
FEE: $70.00
DURATION: 15 lectures plus tutorials (36 hours)
beginning 25, 26 August

Management of organizations; the process of determining corporate strategy and its operational expression, including decision models; dynamic processes of implementation and control; organization design for the accomplishment of purpose; internal and environmental aspects of the management of change; professional management in the present and the future.

(49) TRANSPORTATION POLICY (3 credits)

276-306Y-66

DAY: Tuesdays 8 - 10 p.m.
FEE: $70.00
DURATION: 15 lectures plus tutorials (36 hours)
beginning 13 January 1976

The course is designed to provide students with new perspectives of major policy decisions facing Canadian Transport. Executives of transportation companies will be guest lecturers. Management policies of each mode, their competitive position, their planning and current technology will be examined.

Government policy and Canadian transport will be discussed as well as transportation from the view of the user and transportation as it relates to our society in general. Case studies and a major term paper will be included.

(50A) BUSINESS ADMINISTRATION I (3 credits)

276-200X-51

DAY: Mondays 6 - 8 p.m.
FEE: $70.00
DURATION: 15 lectures plus tutorials (36 hours)
beginning 25 August

A general approach to Business Administration, Management Practice, Marketing and Personnel. Presents concepts to deal with a range of cases drawn from varied industries where analysis and decision making are required.

(50B) BUSINESS ADMINISTRATION II (3 credits)

276-201Y-51

DAY: Mondays 6 - 8 p.m.
FEE: $70.00
DURATION: 15 lectures plus tutorials (36 hours)
beginning 12 January 1976

A further development of Business Administration I through the case method, emphasizing the financial function and the integration of management processes with policy.

*(51) MATHEMATICS OF FINANCE (3 credits)

277-201X-71

DAY: Wednesdays 6 - 8 p.m.
FEE: $70.00
DURATION: 15 lectures plus tutorials (36 hours)
beginning 27 August
PREREQUISITES: Remedial Mathematics I & II

Simple and compound interest; discount equated time; equation of value annuities certain; perpetuities, sinking funds; bonds; amortization tables; depletion, depreciation and capitalized cost.

(52) SURVEY OF BASIC MATHEMATICS (6 credits)

277-203Z-81

DAY: Thursdays 6 - 8 p.m.
FEE: $140.00
DURATION: 30 lectures plus tutorials (72 hours) beginning 28 August

The first part of the course will be spent in an intensive review of basic mathematics including algebra, graphs, functions and logarithms. The last part of the course will introduce the student to calculus including limits, functions of one variable, differentiation, integration and applications; and to matrix algebra including determinants and solutions of simultaneous linear equations. The material covered in this course will be adequate to enable students to follow the usual mathematical applications in business, economics, statistics and operations research. Students who are doubtful about their abilities should see courses: Remedial Mathematics I & II.

(53) STATISTICS I (3 credits)

280-271X-86

DAY: Thursdays 8 - 10 p.m.
FEE: $70.00
DURATION: 15 lectures plus tutorials (36 hours) beginning 28 August
PREREQUISITES: Remedial Mathematics I & II
Mathematics of Finance

The course introduces the student to statistical concepts and methodology, demonstrates their application to management problems, and constitutes a foundation for further study in the subject. Topics include: descriptive statistics and statistical inference; probability theory, random processes, some important discrete and continuous probability distributions, sampling distributions, introduction to decision theory, index numbers.

(54) STATISTICS II (3 credits)

280-272Y-86

DAY: Thursdays 8 - 10 p.m.
FEE: $70.00
DURATION: 15 lectures plus tutorials (36 hours) beginning 15 January 1976
PREREQUISITE: Statistics I

Decision theory, hypothesis testing and estimation, goodness-of-fit tests, analysis of variance, sample surveys and experimental design, simple and multiple regression and correlation analysis, time series.

(55) OPERATIONS RESEARCH I (3 credits)

280-373X-76

DAY: Wednesdays 8 - 10 p.m.
FEE: $70.00
DURATION: 15 lectures plus tutorials (36 hours) beginning 27 August
PREREQUISITES: Survey of Basic Mathematics, Statistics I, Management Information Systems I, Finance I

The object of the course is to introduce the student to applications of mathematical model building and analysis in managerial decision-making. The student is introduced to some of the following topics: mathematical programming including linear programming and network analysis; simple stochastic processes including waiting lines and inventory systems; simulation.

(56) INTERNATIONAL BUSINESS (3 credits)

278-300X-86

DAY: Thursdays 8 - 10 p.m.
FEE: $70.00
DURATION: 15 lectures plus tutorials (36 hours) beginning 28 August

This course studies the international environment and its impact on business behaviour, considering cultural, social, economic and institutional factors. It will cover the major functions of international business, export and import trade and foreign investment. In addition, it will deal with production and marketing operations, government policies and business practices.

*(57) LAW I (3 credits)

278-201X-71
278-201X-81

DAYS: Wednesdays 6 - 8 p.m.
Thursdays 6 - 8 p.m.
FEE: $70.00
DURATION: 15 lectures plus tutorials (36 hours) beginning 27, 28 August

Introduction to law; the Canadian Constitution and the division of powers; the Quebec Civil Code comprising the law of persons, the law of property, obligations, contracts, sale, lease and hire, mandate, surety, privileges, hypothecs and prescription.

(58) LAW II (3 credits)

278-203Y-71

DAY: Wednesdays 6 - 8 p.m.
FEE: $70.00
DURATION: 15 lectures plus tutorials (36 hours) beginning 14 January 1976
PREREQUISITES: Law I and An Introduction to Auditing

Canada Corporations Act; Quebec Companies Act; Canada Business Corporations Act; bankruptcy and liquidations; executorship; negotiable instruments.

(59) TRANSPORTATION LAW AND GOVERNMENT REGULATIONS (6 credits)

278-205Z-86

DAY: Thursdays 8 - 10 p.m.
FEE: $140.00
DURATION: 30 lectures plus tutorials (72 hours) beginning 28 August

Law as it relates to all modes of public transportation in Canada; law of the carriage of goods and the rights and liabilities of the carriers, shippers and consignees; the National Transportation Act and the legal consequences of the declared national transportation policy.

(60) PRINCIPLES OF ECONOMICS I (3 credits)

279-201X-51
279-201X-56

DAY: Mondays 6 - 8 p.m.
Mondays 8 - 10 p.m.
FEE: $70.00
DURATION: 15 lectures plus tutorials (36 hours) beginning 25 August

Introduction to the basic forces at work in our economic system; the concepts of national output and income; aggregate employment and the general level of prices; the role of money and the banking system; fiscal and monetary policies; international economics; economic growth and development.

(61) PRINCIPLES OF ECONOMICS II (3 credits)

279-202Y-51
279-202Y-56

DAY: Mondays 6 - 8 p.m.
Mondays 8 - 10 p.m.
FEE: $70.00
DURATION: 15 lectures plus tutorials (36 hours) beginning 12 January 1976

Economic analysis of the firm, its environment and behaviour; price-production policies; market behaviour and performance under varying conditions of competition and monopoly; application of micro-economic theory to economic problems of the firm in the context of managerial decision-making.

(62) MANAGERIAL ECONOMICS (3 credits)

280-393X-51

DAY: Mondays 6 - 8 p.m.
FEE: $70.00
DURATION: 15 lectures plus tutorials (36 hours) beginning 25 August
PREREQUISITES: Principles of Economics I and Principles of Economics II

The course focuses on the application of economic theory to management problems and the economic foundations of marketing, finance, and production. Attention is given to the following topics: price and cost analysis, demand and supply analysis.

(63) TRANSPORTATION ECONOMICS (6 credits)

279-206Z-61

DAY: Tuesdays 6 - 8 p.m.
FEE: $140.00
DURATION: 30 lectures plus tutorials (72 hours) beginning 26 August

The economics of rail, air, truck, bus, steamship and pipeline as means of transporting goods and people. The historical influence of government on the economics of transportation costs and prices; the cost and price structure of competitive carriers; price policies under conditions of pure competition, imperfect competition and monopoly. Administrative pricing within the transportation industry and the effect of regulation on pricing policy of carriers.

(64) INTRODUCTION TO INDUSTRIAL RELATIONS (3 credits)

279-294X-61

DAY: Tuesdays 6 - 8 p.m.
FEE: $70.00
DURATION: 15 lectures plus tutorials (36 hours) beginning 26 August

An introduction to the problems of labour-management relations, the structure, function and government of labour unions, labour legislation, the collective bargaining process, and the public interest in industrial relations.

(65) COLLECTIVE BARGAINING (3 credits)

279-394Y-61

DAY: Tuesdays 6 - 8 p.m.
FEE: $70.00
DURATION: 15 lectures plus tutorials (36 hours) beginning 13 January 1976
PREREQUISITE: Introduction to Industrial Relations

This course is designed for those students who wish to study principles in collective bargaining in Canada and abroad. It deals with the structure of the bargaining parties and the structure of bargaining itself. It is problem-oriented and relies on empirical data and case problems.

NON-CREDIT COURSES

Appraisal of Real Estate

(66) APPRAISAL OF REAL ESTATE I

628-009Z-81

DAY: Thursdays 6 - 9 p.m.
FEE: $130.00
DURATION: 20 lectures (60 hours) beginning 28 August

A program of lectures, problems and case studies designed to commence professional training in real estate appraising. Subjects include the nature of real property and value, the appraisal process, site analysis and valuation, property inspection, building materials and equipment. Cost approach, depreciation and the legal aspects of real estate.

Students completing this course may apply to the Appraisal Institute of Canada to write the first year examination.

(67) APPRAISAL OF REAL ESTATE II

628-010Z-61

DAY: Tuesdays 6 - 9 p.m.
FEE: $130.00
DURATION: 20 lectures (60 hours) beginning 26 August

Primary emphasis will be placed on income and operating expense analysis, methods and techniques of capitalization, mortgage equity capitalization, residual techniques, market data approach, and the appraisal of lease interests. Emphasis will be placed upon practical urban appraisal problems.

Students completing this course may apply to the Appraisal Institute of Canada to write the corresponding second year examination.

(68) APPRAISAL OF REAL ESTATE III

628-011Z-51

DAY: Mondays 6 - 9 p.m.
FEE: $130.00
DURATION: 20 lectures (60 hours) beginning 25 August
PREREQUISITES: Appraisal of Real Estate I and Appraisal of Real Estate II

The third year program will be devoted primarily to case studies selected to give the student a wide exposure to a variety of appraisal problems confronted in the course of normal practice. Time will be devoted to the preparation of a narrative appraisal report. Concentration will be on the practical aspects of what is required in a proper narrative report, where the information can be found, how it should be analysed and presented in the report and how a typical narrative report should be organized and written.

Business Communications Management

(69) INTERNAL COMMUNICATIONS MANAGEMENT I
(In co-operation with the International Association of Business Communicators — Canada, District One)

628-022X-61

DAY: Tuesdays 6 - 8 p.m.
FEE: $65.00
DURATION: 15 lectures (30 hours) beginning 26 August
PREREQUISITE: An interview is required for admission. For more information contact 392-6704.

The purpose of this course is to examine the expanding role and scope of the internal communicator in industry, business, government and institutions. It is designed to provide an introduction to the wide range of practical skills needed by today's professional in communications management. Techniques and topics explored will include basic journalism, graphics and design, various media production processes, and communications theory, policy and administration.

(70) INTERNAL COMMUNICATIONS MANAGEMENT II

628-023Y-61

DAY: Tuesdays 6 - 8 p.m.
FEE: $65.00
DURATION: 15 lectures (30 hours) beginning 13 January 1976
PREREQUISITE: Internal Communications Management I

An extension of Internal Communications Management I, this course should be taken by those interested in expanding their management skills in business communications. Lecturers will identify specific problems and developments related to publications, audio-visual programs and support communications systems. The course will be structured around a combination of lectures, seminars, workshops and case studies involving individual and team projects. A certificate in Internal Communications Management will be issued by the affiliated organization upon successful completion of both courses.

(71) A PRACTICAL COURSE IN PUBLIC RELATIONS MANAGEMENT I (In co-operation with the Canadian Public Relations Society (Quebec) Inc.)

628-020X-51

DAY: Mondays 6 - 8 p.m.
FEE: $65.00
DURATION: 15 lectures (30 hours) beginning 25 August

Why and how business and other organizations seek the goodwill of general and specific "publics". How news handling, employee and investor communications, community relations and other aspects of a co-ordinated program fulfill a public relations policy. Case studies and guest lecturers. The course is designed both for students and practitioners seeking broader PR career knowledge and for executives who need an understanding of the public relations function.

(72) A PRACTICAL COURSE IN PUBLIC RELATIONS MANAGEMENT II

628-021Y-51

DAY: Mondays 6 - 8 p.m.
FEE: $65.00
DURATION: 15 lectures (30 hours) beginning 12 January 1976
PREREQUISITE: A Practical Course in Public Relations Management I

This Part II is a continuation of Part I and examines the operation of public relations in business, government and corporate communications. A certificate is given upon successful completion of Part II.

Canadian Institute of Management

(73) ORGANIZATIONS AS SYSTEMS (1A)

626-001X-61

DAY: Tuesdays 6 - 8 p.m.
FEE: $65.00
DURATION: 15 lectures (30 hours) beginning 26 August

The purpose of the new course is to help the students understand organizations as functioning systems. The study of the external environment in which organizations function will focus on economic, social, political, legal, governmental, industrial, competitive, and cultural forces generating inputs which impact on the organizations. Organization resources including people, capital, facilities, and output, will be examined. Students will then focus on the internal environment which can be shaped by individuals and managers at all levels to achieve organizational objectives. This includes the study of work-flow, and authority-power, communication, reward, and role structures. All of these functioning together, and interacting with the external environment we call organization.

(74) MANAGERIAL ACCOUNTING (1B)

621-000Y-61

DAY:	Tuesdays 6 - 8 p.m.
FEE:	$65.00
DURATION:	15 lectures (30 hours) beginning 13 January 1976

Managerial accounting is concerned with the exposure of the student to accounting theory and logic, cost control & profit planning, and appreciation of the techniques of financial analysis. Accounting theory & logic exposes the student to simple financial statements, how to read and understand them and the effect of routine business transactions upon them.

Accounting for cost control and profit planning explores the management tools provided through standard cost accounting, budgetary control, cost/volume/profit relationship. This is expected to give the student an appreciation of the benefits of a sound financial information system.

Financial analysis concentrate on comparative analysis, the methods used in identifying strengths and weaknesses and factors affecting income trends.

The emphasis is placed on analysis, interpretation and use of accounting data.

(75) QUANTITATIVE INFORMATION FOR DECISIONS (2A)

627-004X-71

DAY:	Wednesdays 6 - 8 p.m.
FEE:	$65.00
DURATION:	15 lectures (30 hours) beginning 27 August

This course is concerned with the expression of facts about the organization in quantitative terms. This includes statements in which some data contains uncertainty and on ways that decisions can be made under various circumstances. The emphasis in the course will be a delineation of the managerial decisions to which quantitative methods can make a contribution. It involves discussion of models for analysing data in common use in industry and how they contribute to decision making. The end result is that the student should be able to make intelligent use of specialists.

(76) ORGANIZATIONAL & HUMAN BEHAVIOUR (2B)

628-014Y-61

DAY:	Tuesdays 6 - 8 p.m.
FEE:	$65.00
DURATION:	15 lectures (30 hours) beginning 13 January 1976

Organizational and human behaviour will explore the interrelationship of individual personality and work, the characteristics of organizations and occupation and relationship of the first two factors to the business and economic dimensions of society.

Included are the structure of the organization in relation to the goals of the organization, integration of the reward system and objectives of the organization, the management of communication, the dynamics of groups.

(77) OPERATION PLANNING AND ANALYSIS (3A)

627-008X-61

DAY: Tuesdays 6 - 8 p.m.
FEE: $65.00
DURATION: 15 lectures (30 hours) beginning 26 August

Some of the quantitative methods and models for the choice, planning and control of production, inventory and distribution systems. The aim is to give the students a basic understanding of the use and value of these techniques, with emphasis on problem formulation and practical applications.

(78) MARKETING (3B)

625-002Y-61

DAY: Tuesdays 6 - 8 p.m.
FEE: $65.00
DURATION: 15 lectures (30 hours) beginning 13 January 1976

A broad management approach will be adopted in examining the marketing function as it is organized and practised by the modern business enterprise. The elements to be studied will include approaches to formulation of market strategies based on the origination and integration of policies respecting product mix, selection of distribution channels, and promotion and pricing of output. The course will also examine some of the historical and institutional factors which have contributed to current marketing practices. Case histories will be used to illustrate the principles behind these practices.

(79) MANAGEMENT OF HUMAN RESOURCES (4A)

622-023X-71

DAY: Wednesdays 6 - 8 p.m.
FEE: $65.00
DURATION: 15 lectures (30 hours) beginning 27 August

While this course will cover the Labour Relations Act, union relations, job evaluation, wages and salary administration, personnel administration and communications, its general emphasis will be on the role of an administrator in dealing with human problems and developing leadership in organizational structures.

(80) CASES AND PROBLEMS IN ADMINISTRATION (4B)

626-004Y-71

DAY: Wednesdays 6 - 8 p.m.
FEE: $65.00
DURATION: 15 lectures (30 hours) beginning 14 January 1976

Group discussions on case problems. Students will be required to analyse specific case material and to present their findings.

Insurance

(81) GENERAL INSURANCE I (BROKERS)

628-007Z-71

DAY: Wednesdays 6 - 8 p.m.
FEE: $130.00
DURATION: 30 lectures (60 hours) beginning 27 August

The law, theory and practice of insurance, policy construction and interpretation for all major classes of insurance including automobile, fire, crime, liability and life. This course will use the Insurance Brokers' Association text book and is designed for entrants into the practice of insurance, but will also be helpful for non-professionals who desire a general understanding of insurance.

(82) GENERAL INSURANCE II (BROKERS)

628-008Z-81

DAY: Thursdays 6 - 8 p.m.
FEE: $130.00
DURATION: 30 lectures (60 hours) beginning 28 August
PREREQUISITE: General Insurance I or A.I.B. member

The classes of insurance covered in the preliminary course will be dealt with more extensively and in greater depth. The course is oriented towards the application of insurance knowledge and features Risk Analysis and designing an insurance program.

General Courses

(83A) REMEDIAL MATHEMATICS I

627-000X-81

DAY: Thursdays 6 - 8 p.m.
FEE: $65.00
DURATION: 15 lectures (30 hours) beginning 28 August

A remedial course strongly recommended along with Remedial Mathematics II for those students who are required to take Mathematics of Finance, but who have never taken logarithms and progressions in intermediate or Elementary Algebra or who have forgotten them. The associative, distributive and commutative laws: fundamental operations; factoring and simplification of algebraic expressions; equations of the first degree in one and two unknowns; quadratic equations, indices, logarithms, progressions, simple graphs, linear interpolation.

(83B) REMEDIAL MATHEMATICS II

627-001Y-81

DAY: Thursdays 6 - 8 p.m.
FEE: $65.00
DURATION: 15 lectures (30 hours) beginning 15 January 1976
PREREQUISITE: Remedial Mathematics I

A continuation of Remedial Mathematics I covering: set theory and elementary matrices; functional notation; sigma notation; properties of polynomials including factor theorem; progressions, binomial theorem; factorial notation; elementary trigonometry as far as addition formulae for sine, cosine and tangent; coordinate geometry of the straight line.

(84) SALESMANSHIP

625-010Z-61

DAY: Tuesdays 6 - 8 p.m.
FEE: $130.00
DURATION: 30 lectures (60 hours) beginning 26 August

This course is a useful option in the McGill Certificate in Marketing. It is designed to meet the needs of salesmen who are interested in advancement or who are interested in a refresher course. Topics will include the relationship between selling and marketing; the social and economic roles of selling; selling as a career; qualifications of salesmen; the relationship between salesmen, company, and customer; the work required of the salesman; salesmen and product competition.

(85) SHOPPING CENTRES AND DOWNTOWN RETAIL LOCATIONS

625-009X-71

DAY: Wednesdays 6 - 8 p.m.
FEE: $65.00
DURATION: 15 lectures (30 hours) beginning 27 August

Retail locations with an emphasis on shopping centres from the point of view of the retailer, developer and mortgage lender. Major topics include: Economics of Shopping Centres; Department Store and Discount Department Store policies; Financing of Shopping Centres and Commercial Buildings; Utilization of Shopping Centre Economic Reports; Downtown Locations; Tenant Mix in Shopping Centres; Leases; Architectural Trends in Shopping Centres; Promotion of Shopping Centres; Parking Ratios.

(86) INTRODUCTION TO TRAVEL COUNSELLING
(In co-operation with the Canadian Institute of Travel Counsellors (Quebec))

628-015Z-51

DAYS:	Mondays & Wednesdays 6 - 8 p.m.
FEE:	$130.00
DURATION:	30 lectures (60 hours) beginning 25 August

This is an introductory course for new employees working for a travel agency or for those interested in entering this field of work. The course will survey world tourism and the complete travel service offered by an agency. Practical topics include ticketing, documentation, geography, as applied to individuals and groups; air, steamship, train, car rentals, etc. form individual parts of the course. Guest lecturers will discuss specialized topics and problems related to travel. A certificate will be awarded by the C.I.T.C. (Quebec) to successful students. A course material fee of $30.00 is charged to students and is payable to the C.I.T.C. (Quebec).

The courses are meant to meet individual needs as flexibly as possible. Students should explore the offerings of the whole Centre, for example:
